# Part I

(:15)

K- Yes, thank you very much. Good morning and good day to you, as usual, wherever, whenever you listen to this series of Knowledge Seekers from Keshe Foundation, Spaceship Institute. As usual, we welcome you back and we start thinking and sharing more and understanding more. It was interesting to listen to the Intro and to realize how true this is. A few minutes, literally, before the beginning of session, talking about Knowledge Seekers (KS), discussing how actually we can produce something which God creates so easily,

(:16)

we can come up with a solution to copy it in a new way. And ... KS think of the way, as they experience they've done. But then it goes back to a fundamental point of energy. Fundamental point of plasma energy. In understanding how energies of the Plasma of Gans's can be utilized with each other, against each other, and in conjunction with each other. The interesting point for us comes in comprehending the process of creation. Then in the Universe (U) we should have no problem in finding a way, even as a Soul, to add to our energy, or to take from our energy source. To go into the higher order and come down to a lower order.

When we transmute and we decide to take the direction towards the understanding of the fields of the Creator, what do we do? And then we go into strength, understanding the strength of the Creation towards Unicoise. But, we still miss home, we want to come back and be a Human. How do we give the energy back? Or how do we reverse the process to become a human? But what is the process of becoming a human cell? How do you. We don't reverse the position, but how do you give up so much to become back, but knowing the path that you can go out. It's like climbing a mountain you climb down a rope,

(:18)

but have you got the strength to climb back up. How do you gather that strength while you're hanging in the middle you're not up or down. What happened to us? How do we dictate this energy? How do we know what to collect? How do we know what to give up? How do we know, jump across the fields? Because there is somewhere, there is a shortcut. There is a way to go across the higher to the lower. Then, as said at the beginning of the interview, there is no formula. It's understanding of one's Soul's strength. Understanding of the process of creation in the energy level, not in the matter level. Understanding of the Totality. And the more we

understand of the Totality, we find out, we realize, we know nothing. Then a new search, a new position is created to understand the next and the next. And then what is beyond the next, and how can I go back to where I started? The hardest point, the one of the, what I call, most difficult things for man will be how to come down.

Stepping up is easy, because you gather, how to become a lover? How do you give unconditionally with a hope that you end up in the physicality (P) of the man? When we dream, we come back to our physicality. We shall ?? stall, we reduce the strength of the blood flow. And that's it. Because in a way, when we climb down on a stone, or a tree, or whatever to support us, that we can go back up again.

**(:20)**

When we are in the human body, then we dream, we got that hook. That hook is the physicality. The Soul of Physicality (STP) has anchored us. But when we die, that anchor is not there. That's why we can't come back. But when you have created a condition, when you have the connection between the Soul of Creation, the Soul of Creator, the STP, the Soul of the Man (STM), then how do you climb up and down this ladder of the energies of the universe? There is no calculation. There is no scale. There is no graphs. There is nothing there,

except the true understanding of the Creation. What do we anchor ourselves to, to come back to Earth? And what do we have to give up to become a human? And would many of those who have elevated would like to come back to where they anchored themselves, to pain of physicality, to kill, to live, to destroy, to exist? Now you understand why there is no formulas. It's literally one understanding of his own creation and how he got to it. You know the old story of the little boy who dropped the bread, as a stepmother was taking him to the jungles? And then he looked for the bread to come back home. But the birds have eaten the bread crumbs he dropped on the way. How do we create that condition?

(:22)

How do we understand which one is the bird and which one is being taken, and what we need to put to back in to go up, or to come down? This is why I keep on saying, that the STP within the STM is a fundamental point of Man to return back. But it's not that easy once you detach yourself from the environment of the plasma of the Earth. Jumping and hopping around, yes you can do. But when you uprooted yourself, where are you going to come back (to)? This is why I keep on saying, and one day mankind will understand, that "resurrection" is a fallacy as much as (is) fusion.

Because the STM is separated from the STP, we dumped the anchor. When we do it ourselves, we hold on to the anchor. We know where we anchored it. And this is part of our understanding of the totality of the Creation. And unfortunately, our Souls does not carry a calculator, and does not carry a system to reduce, or increase, or whatever. Then you understand where the feeling comes from. Each feeling creates emotion in a certain condition. In a physical condition, certain emotions makes us cry. Certain emotions makes us laugh. Certain emotions makes our hair rise. Certain emotions gives us the feeling of love. Then you understand, from the very first teaching of the Keshe Foundation, especially in the Health, when we did sessions with Dr. Elyia Kostova.

(:24)

How I emphasize on emotion. Now that we say it has come to "roost," it has come to the point where we have to understand what our emotion, emotion between the STP, emotion between the STM, plays for man to come back down. And the most interesting is how you can use. How you can take part of the Soul of Physicality, to feed the Soul of the Man, to elevate the Soul of the Man, to meet and become part of the Soul of the Creator. You don't need to look outside to find an anchor to go up. You look within to find a solution, which is

already within you, to create the condition of that elusive magic what Man has dreamt about. to reach, to understand, to be part of the Creator. One second to be the dimension (D) of the understanding of the universe, and the second after, be the dimension of the man. Isn't this that all the teachings been going through for past 500 odd sessions and the others? We teach in the language of the Creator, and immediately we teach the language of man. Understanding this is cornerstone of the man understanding of the Knowledge of the Creation. This is why we call ourselves teachers, because we have access to the knowledge of both ends. We were told the alphabet, and we were told the degrees of PhDs in how to use the alphabet to make sense for every created things in the universe, and not only man. That's why when we teach, we teach for the universe, and not just for the man.

(:26)

Even the man only takes his physical dimension of the voice. The reality is, can we, would man ever be able to understand this? To transmute between the two Souls, to transmute in the direction of the STP and the STM. Take the shape of the man, but within, understand the work of the universe and the positions of the field strength of where it wants to be. That in a way, it becomes that vehicle. It

becomes that point, that it points a laser to it, and then you carry on through it, the physicality, through the STP. And then when you arrive, if it is good enough, if it's what you expected, you might go through the reverse transmutation, through the emotion, to manifest yourself in the dimension of physicality of the time, space, and place. This is part of what man have to understand. This is part of what we need to comprehend in essence of the Creation. Would man ever be able to understand this? Even the Prophets of the past did not pass more than one level. Because they could not explain, they could not see, to teach further, as the man was not ready for that process. It took man billions of years to get to this point, and in some 500 and odd sessions, we taught enough, that the man can jump billions ahead, to understand more. He's matured enough to, technically and scientifically, has developed the understanding of the science of Creation, that it does not need the tool of the man, but he understands the process. And it does not need degrees. It needs understanding of ones own essence of Creation, (:28). the source of Creation, the source of elevation. And then, in that process, man shall not cheat. Man will understand to do the process the way it has to be. Because when you speak about the three Ethos of Mitra, talk good, do good, think good. Just only for yourself and nobody else. You

cannot cheat the STM, by the STP. And you cannot cheat the STP, by using the Soul. Because either one cheats, will create demise of the other, either one gives up, it brings an end. Isn't this what happens in the STP, departure, in essence of the time when the STM leaves and we call it, death? They cannot cheat, so they come to an agreement, they balance the book, to be correct. So we understand, there is no formula. It cannot be, it's impossibility to write a formula, how to use this system to elevate your Soul. But you can create conditions of, you can teach how to use that "controlling system," we call it, the emotion. It's not like using an onion and creating tears and you don't know if that tear is emotion of love, or hate, or fear. It's just mechanically produced. It

carries no emotion. Where the same tear when you love your child and hold it carries the emotion of love.

**(:30)**

When you lose your mother the tears of loss brings the emotion of sadness. It's the same drop, it's the same liquid. What emotion you put into it, creates a condition of physicality and the Soul in finding out what we can do. What is our strength? Can we stand absorbing the emotion of the love of the mother and can we cry and understand the loss of the mother with the same tear? This is for man to

understand how important, what man calls emotion is the tool of the control. I reach the destination of ??, I feel good, I manifest myself. The fields in this place are balanced in respect to me and I feel just, I do good if I appear in the dimension of physicality, and I don't do anything wrong, because then I can manifest the STP in this dimension of physicality. Now you understand, even the Ethos of Mitra is for the man himself, and not for the others. As each ones Soul does not do the correct thing, the other Soul will suffer. Then you understand the cornerstone of the teaching of Moses, "Thy shall not steal." Then you understand how man has been taught, in simple ways, but man always took the dimension of physicality, and not the dimension of energy and Creation. How man will go to understand this, And how would man endeavor to test this?

(:32)

Then you understand how you managed today to see in your dream the mother who passed away years ago and how hard you tried for 20 years to see her and the doors were shut. You have no control over your dreams, because you have not learned the emotions. Create the love of the mother, create the joy of the touch. Create within you the feeling of the kiss of the mother, and close your eyes. You create a dimension of physicality,

and then you dream. And then you say, I was thinking about the touch of the mother today. And today, because it was so sincere that love, I dreamt about my mom. In fact, in a dream, you open the channel of the field of the strength of the emotion of the love through the circulation of the blood's flow in the dimension of physicality. Now maybe you understand how it works. Now maybe for the first time, man knows how to create the emotion, because it's felt in the dimension of the physicality. So now you have the formula, you have the judgment of it. But was that feeling of the kiss you received, was the feeling that the mom gave? Mom gave you a kiss, not because of the love of it, but it felt that way. But it's just because you fell down, ?? on the knee, and you needed that emotion of the love. This is why you cannot dream every time you want to see the mother. Because you have not understood the essence of the emotion, which that kiss was created from, was given, and that strength of the emotion, which was received by you.

(:34)

Mother kissed you, to kiss it better, because you're so stupid. You keep on falling, and you don't understand. She raises you and gives another kiss. When would this child matures, and you see there's a kiss of the love of the mother, because she

loves you, but in fact you've been the fool, to not understand how to walk, and you walk again on the same stone, and you fall again. Now you understand. How can you measure the emotion? And the other point of it is, is the recipient of the emotion, has created same feeling as you. I dream about my mother anytime I like, she is present all the time around me. How many times you heard this? The fact is, that time, that emotion was the true emotion, and you have learned the way. Now try to do it with the dad, passed away years ago, about the dog you loved when you were a child. See if you can, can you repeat it? Then you start learning about the measurements of the emotion. What emotion you created. This is how, as I said many times, we go to a 100,000 football stadium. Then you have no connection to no one, if you ever been to one. And you walk out of the stadium and you see one man across the road, and you fall in love, or one woman sitting across you in the cafe, where you were remembering what happened in the match. And it changes your love, because the field strength is matching,

(:36)

and it's mutual. It's no use falling in love one sided. The emotion does not carry. When you stand in that stadium, when you stand with 100,000 people, you create a different love, a

different emotion. And then you all chant and shout at the same time, the same thing. And it sounds as every single man in that stadium says the same word individually. I don't know if you've ever been there? I don't know if you have ever tested this? As a football lover, I used to, when I used to go to the 100,000 stadium in Tehran for the matches, it always puzzled me, how come I shout, but I hear everyone shouting the same as me? And what emotion used to raise amongst the men, amongst the Soul, amongst the emotion. It puzzled me how to understand this from childhood. The first time was magic. The second time, it had a reason. The third time was, how does it work? And trying to understand how we can even synchronize emotion that a thousand of us, ten thousand of us, can at the same time land on the same planet and colonize in one go. Not one man landing, hoping you find another Soul. This is where the true colonization will come. This is where I explained many, many times, 8 billion population on this planet is not enough.

(:38)

If man starts truly colonizing, and truly work together to bring that change. Go to destinations and start making colonies of the true love of the Creator, in the essence of the STM. I turned around to my uncle and I said, "how come all

these hundred thousand shout the same?" I hear myself, but I'm a tiny boy standing in the stadium. What emotion created within us, is balanced and in common with the others. In anybody of you understand this, what commotion will create among the other Souls to hear what you say. Then you understand how hard it is to create that voice, that emotion, in the Soul of every created things on this planet, that "thy shall not kill." What is the, ?? abhorrent the feeling of the killing, that the man will feel together. And at that time, man stops (killing). Now you understand. Can we write a formula for this? Even though many of us at the same time might have the same feeling. We love our children, and the love is sincere and true. But we love them even we created them slightly different than the other.

**(:40)**

Even when we love the twins is the same, when we love our sons is the same. But, can we create that love amongst the two women, or amongst two men, or amongst the creatures of the universe? And which part of the universe? How come we dream with the emotion of the mother, and then we dream about the mother and the father together? So, we are capable of creating different emotions, but at the same time, and connecting them to each other. In a way, in the dimension of physicality, we

call it, alloys. In the dimension of the field of the emotion of the man, we call it the emotion towards the mother or the father. But in fact, we can connect them to each other, at different strength, or through the common denominator to be the same. In our dream we see them together, eating with them, enjoying their presence. But, if you understood this, that you can create different dimensions of emotion, what is next? What have you been blind to? Or what you've been ignorant to? If you can connect and see the mother and the father who passed away, and then understand through the common denominator, then, isn't it logical that through the essence of the Creation, we see the third, which could be the Soul of the Creator, at the same time as the mother and the father. But, with them we give the dimension of physicality.

(:42)

What about the Soul, energy, the fields of the Creator? And then something happens, you say, "this guy is blessed." No, because he has managed to create the direction and dimension, and connection and feeling of the emotion of the Creation. Even a planet has emotion. Even a star has an emotion. And when man understands this, you can tune, understand the emotion of the planet, even before you go to it, you don't need to

be there. But you know if it fits for your physicality to manifest itself, or you're just a tourist going through. We call it rain. We call it thunder. We call it volcanic eruption. We call it the earthquake. But, haven't all these created by the interaction of the matter state of the fields of the Soul of the Planet, and the Soul of the Planet itself. In the same words, we call it, a shout, we call it, a cry. When man tears, and when the clouds rain, when a man shouts, and when the Earth creates thunder, when a man shivers from his own wrongdoing, the Earth creates its earthquake. Have I been chosen, have I been choosing the same emotions,

(:44)

but different words for different conditions? Then can you imagine what happens when the Creator sneezes? Then can you imagine what it means when the Creator cries from the love? Then you understand how feeble man has been in understanding the process of the Creation, and emotion. And in that process, understanding there is no formulas, it's understanding one creation of oneself. Not to steal from the STP, and not to give too much to the Soul, just because it's stolen from the others. This is how, if you would have understood totality of the teaching, when we breathe, the STM takes the higher energy, and the

physicality takes the lowest. Because if the physicality takes the energy which comes in at the high level, will create mayhem within the lungs of the man. Now you see how these two physically work with each other, accommodate each other, share for the survival of the other. Then you understand why by changing the rhythm of your breathing, you can change the freedom of the Soul. Then you

understand much more, if you understand the operation of the Hydrogen. If you understand the combination, the way the Hydrogen reaches the body of the man. And the way it's created, the essence of its creation, shows you the path to the Creator. And if you understood, you have found your path to the world of Creation.

(:46)

For those of you who join us in the session tomorrow, and then you join us in the second session, we create that path. Deliberately in our system, we have set to create that condition. To see how you feel, to see how you approach, to see what energies are needed by you to find the path, to find the way to receive. Maybe tomorrow's session we'll speak maybe for 5 or 10 minutes and we close the session in silence. Maybe for one or two hours, depending what we see, depending on what we try to understand. The systems are set up

deliberately for this, for tomorrow. But then, maybe through it, you find out how to elevate. You find out how to receive, you find out how to give, and you find out how to find a solution. For what I call, elevation of the Soul, in a correct way, by yourself and not by stealing, not stealing from anyone else and not by stealing from the STP, or the STM. Tomorrow's trials which you join us will open a lot of things for us and for you. In a way we encourage you, for you to be able to elevate, to have the availability to elevate your own physical dimensions to the Soul, and the STP, through the fields which are there for you to use. And then you have to learn how to use the emotion.

(:48)

In a way we have created a party table ?? and set. Which fruit, which sandwich, which drink you want to take from this table? Are you drinking with ?? a maid? Are you having your fruit, having a child with your mom? You're taking the food for your child, which is hungry. It's the same table. It's the same energy. It's the same love of the Creator. It's you who will compartmentalize. You put it in there. I want to see mom. And this is the energy I need to see mom. This is the energy I need to feed myself. And it's the energy which brings me the flow of the fields of the universe I call, water. Man has not even understood the power, the strength,

the life, and understanding of the fields of the water he drinks and 95% of his body depends on it. Isn't the essence of the Creation holding to the gravity of this planet? As we always said, in the matter state, magnetic fields are measured by iron, we call it, magnets. And we have said many times, that in the dimension of the gas and liquid, that the magnetic field is Oxygen. And then, how come you have not understood, through that essence of the initial stage, the fundamental energy of the plasma of the Hydrogen? And two of it, one connected to the energy levels of the man, and one connected to the energy of the universe,

**(:50)**

and the creation and the Creator, you still live and you are ignorant to it. This is the secret of life on this planet. And it's the same right across the universe. The lover has never forgotten his love. You call it H<sub>2</sub>O and you don't even understand, but it means you're so physical. Why do you need two of the same, to be connected to the dimension of physicality of this universe of the planet of the man? Now you understand it. What you drink, gives you access to both your STP and your creator. And you've been ignorant to it, because you never understood. You called it a Gans, you called it whatever you like. You put it in the table of elements. But you never understood the element

which has created you from the energies of the Creator. Your path, your way, and your direction and dimension to that position in time and space and place, you call the Creator. Maybe now you look at the life, why you exist the way you exist. And maybe, again, you find the path to your Creator. But don't forget, just because man decided to call it two Hydrogen, as I said, there is no measure, one that you can add it up, you'll find the access. When you drink that water, the energy of it is instantaneous. One Hydrogen feeds the Soul connection to the Creator. And one feeds the physicality of the man.

(:52)

And even when you breathe, you say, "I'm taking Oxygen." I'm creating connection within the Hydrogen fields of my lung, to keep the circulation of the fields of the STM, that is connected to the field of physicality of the man, ongoing. And when you cut one out the other, you call it, death. And then you understand how little you understood. Even from what created you, what you depends on it, and what connects you to the Creator. And that's the strangest part, and I always wonder, how much man would run around, ignoring what is being his, and connection to him and to his Creator, and in the ignorance, as I always say, is a bliss. Now we understand, maybe,

now, maybe you understand more, that even the Earth, the water, the field strength of it, is the essence of your Creation, and not the matter of it. Then maybe you'll understand a little bit more, why we come from different part of this planet, and then we have different emotions. We have different features according to that emotion. The Hydrogen created in one part is slightly different, but consistence with the Inertia fields of the place, creates that image.

(:54)

Does not matter what you do. If we keep a man in a certain position for long enough, he will change from black to Chinese, and from Chinese to black. Does not need that evolution of the time, crossing the straits of Hormuz and splitting to the North, to the West, to the East, to become Chinese, European or Russian and the rest. And you can speed this up in one instant, if you understand the process. In the upcoming conference in London, our people will try to show you this through the dimension of physicality. But you understand the knowledge. To the ignorant people of the public who have no clue, this is magic. Everything, everything which connects man to the life of his physicality, is connected to the both. Otherwise, you don't have it. Look at the structure of your amino acid (AA). That Oxygen, magnetic field of

the planet Earth, the Hydrogen, connection to the dimension of the STM and the Soul of the Creator, to the dimension of life on this planet, ?? a free till the point it comes in touch with the water.

(:56)

When you have amino acid and no water, you have no life in the dimension of Soul of Creation. When you create that sack of protein and you put water in it, you create life, a cell. Because now it's connected both to the dimension of the matter state of the position, time, and place we call Earth, and to the Soul, and to the Creator. Now you understand why some of you get so fat through the emotion, and why some of you get cancer through the same emotion. And why through the same emotion and the same water you fall in love. In past 10 minutes, I've explained the wisdom of the Creation all the way from the Creator to the man. I wonder how many thousands of years it will take man to understand this. And if you understood this, then it comes the truth, how much we have ignored everything about ourselves, about life, and then go back to the original teachings. I keep on talking about the emotion. What emotion you put to that protein, and what emotion you put to that water. In a way, by controlling it, you call it salt content, salinity. You dictate the same cell to be the cell of the heart, to be the cell of the lung, to be

part of the emotion of the creation within the brain of the man. I have given you the secret of Creation.

(:58)

And I'm sure, one day, one man will understand what is been explained. And then if you do, you have found your path to exist in both dimensions, as we do. In a way, you connect to the Soul, and physicality stays the same, but depends which Soul, in what dimension and direction, shares the knowledge, the transmutation, and the source of the creation at the same time, through the same field strength of the source. And then you understand why everything in the Universe has one common denominator, comes from the same. In field strength, not in the physicality of a body. I've taught you a lot today, if you understood. I opened the secret passage of life on this planet and beyond. I showed you the way to your Creator, and I'm sure you still will be blind to understand it, in the knowledge of the emotion, to be able to create that condition for your own survival. As is said beautifully in Koran, << speaks Farsi >>. Then man understand the hundredth name of the Creator, which has been elusive to him, and I complete it, what he's been wishing and understood in many holy books, if you understood the essence of the teaching of today. Then you

understand why man is so physical. And then you understand why the physicality has been detrimental for him to reach to his Creator in the dimension of the fields. And he's always worried which hell and which heaven he will get his way, when he separates from physicality.

**(1:00)**

I hope you understand this, and I hope one day you mature enough to understand the Totality. Would like to go to a break and we come back. Thank you very much.

>> BREAK >> 506 KSW October 05, 2023

## **Part II**

**(1:06)**

K- Yeah, you said willing, that's a very good point. He's willing to answer questions. The thing is, we are willing to, but is the man ready to understand it? Yes, we... if there are any questions. I just wanted to remind you, that as of next week, the conferences in London go public, and will be announced through the medias, which is left with the, what we call, the promoters of the event. Please make sure that everything you want to do, and you want to be present, is there, and the way it

should be. And we try to make the best of it, to make it a point to be remembered by many people. One of the beautiful things which will come out of this, maybe we said it before, you might understand

it, or we mention it now. It's for the first time, that this conference will be live on Zoom. This conference will go on Zoom live, and it'll be monitored. And it's only for the world leaders.  
(1:08)

In allowing and trying to bring high level diplomats into London, creates a massive problem for many nations. As you know the tradition is if a President comes to UK, has to be met by the Prime Minister or by the King, it depends if they are a King or a President, or a Prime Minister, according to their level. If a King of a nation comes to, the King of England has to meet him, to greet him, he cannot be met by Prime Minister or whatever, and this is the tradition has been. And this one creates a lot of problem. We've spoken to people we know in influential places, and presidential, and what we call, some of the world leaders. And the best solution we have found is to create a specific Zoom, for the world leaders to come in. This makes it a lot easier for us to transfer and convey the message directly to the top. And this allows a common sense to come across the world leaders.

So, there will be a live Zoom session of the conference, but specifically only for the world leaders and what we call, those who are the decision makers in governments. And the rest, because it's no problem for many of them to get a visa to come in to London for that period, that should be no problem. So, if we manage to get our way through and get things done, there will be a Zoom session, we fully control, and I'm sure controlled by the security and many government officials. And this will be open to, we know the first three or four presidents, world leaders who will be online. It's already been set up for them. We expect many ambassadors to take the same path.

**(1:10)**

Because you got to remember, we are not just inviting, for example, the ambassador of Liberia in London. We're inviting all the ambassadors of Liberia across the world. So you will see interaction with world leaders and the ambassadors. Maybe the Iranian president online, as much as the American president. They want to talk, it's free, they chat in the background, it's free. No one will know. But the session will be run in that way. The event will go on the Livestream and Zoom. A specific situation will be made for them to be accessed. We do not know who will watch on

the other end, but it's been done directly to what we call, the people who are in that position. Whether it be the President, his wife and his cabinet, and the others to watch, to see what is going to come to Earth. There'll be some shocking developments for a lot of world leaders. And maybe, maybe an international conference will be called immediately, within the time of next months or years, for world leaders how to handle this technology. How to bring now that everybody knows that African nation is as powerful as the United States in science of space and technology. What dis-balance it will bring, where the superiority goes, where the weapons superiority becomes nonsense in the world of the others, where now every nation has access to the latest space technology. In next few days, in the next two or three weeks, with our partners in the Chinese government, we try and find a solution, that maybe the Chinese leadership will take the leadership in this conference on the Zoom. And we'll see how we build it up, and how it'll come. But those of you who will be in the conference, you will remember it.

(1:12)

This is where we bring the change, it is where we bring, we strive to bring that change through technology. It's a knowledge and not a talk. They

can ask their scientists to test, and to see. As I said, those of you who come to London, anywhere within the city center, is the right place to be. You're not very far, you have a few minutes from the conference. And I hope you enjoy this beautiful event, which will bring many changes. Not only for you, but those of you, who you consider as your rulers. They'll find out, all men are equal, and all nations are equal. Because now the knowledge is shared amongst all. They don't need to look for handout to finances. Even though, with the support of the Chinese government, we'll try to create that, facilitate that, that it doesn't become a handout, but it becomes a point of equal and in all measures. I hope, we'll see many of you in London, and I hope, that the world community would embrace this knowledge, in the way it should be done, to create the next step for peace. And as we said, "Technology in Exchange for Peace", for nations and for man, all equal. Are there any questions? Q: ... Rick .. ... May I ask, (1:14)

when we wake up from a dream, why is it that we remember so little of it, and can you explain more about dreams? K- It depends where you are. When you speak. I was talking to our Knowledge Seekers very recently. How they remember every detail of a dream. And I said, how can you remember all that? They tell you even where there

was a spoon, and where there was a fork, and who was standing there. I said, how can you remember it so precise? Says, "it's just as it is, and I have 10 dreams, and I can tell you every..." And I sit there and I listen, and they can tell you every detail about it. And something I had ??, I can't remember. But I remember having a dream about something. It is what I call, dementia of emotion, what we would like to remember. And how important it's to us in touching our emotion, becoming part of us. And some of us get up from a dream and it changes our life, because the field strength of the information, or the image, or what I call, the emotion, is exactly the same as ours at that time and second and moment. We get up, we change our life, because of the dream. And, it's just amnesia about what we want, and how that dream is important to us. I know a lady, I know her very well, who changed her religion.

(1:16)

Because she had a dream about a Prophet, in her dream, that she did not know existed in the ??, in one way or another. And she went and looked and it was there. And she never lost the love for that, for rest of her life. She had that dream in the early twenties. And she died with the same love in her eighties, very recently. So, it's us who decides and depends on the emotion, or connection with that

emotion, or information which we have. I still remember one of them, when my mother had a dream. And I explained that before. It had no meaning to me, I had no feeling about it, but it was so deep in her. It touched her, when I was only 19, 20 years old. And I went downstairs and she was sitting at the dining table and crying. And I said, "why are you crying mother?" "Oh," she said, "I had a dream, you're dead." And I said, "I'm here." And I asked her about the dream. And years later, that dream came reality. In a way she understood, what that dream was. And I've seen people who dream and they jump out of the bed and they run. (1:18)

The fear of what they saw. It's us who decides how to interpret and depends what that information brings for us, to create what condition of emotion. Interesting is, a lot of people tell you, "I never dream." And if you go deep enough, you find out they do nothing but dream life. In the process of tests, or what we call, sessions of tomorrow and next week, we try to show you how and which strength and dream you have, and how you control what is called a dream. Actually you work through the expansion of the Soul connection of ???. In the sessions of tomorrow and next week, ... you'll be tested in a very beautiful way for yourself. And we won't reveal anything about it till next week, after the end of the session. But don't forget, this is still

one headphone, it's the same headphone and nothing else. But, the way we tested the people for sugar and for salinity last time,

**(1:20)**

this time we test you for something totally different. But, last time you saw it, you felt it, you measured it, through physical means. This time, it's all to do with your Soul. But it's the same test. But in a different way. This time, you are the tool of measurement. You are the tool of the essence of the emotion. And then maybe in the upcoming sessions, we connect the physical and the emotional side together. And then you see how you can manifest yourself in the depth of the universe. Those of you Knowledge Seekers who kept on coming with us all the way through all these tests and you are everywhere, you'll find a magic very soon in your process of life. Because you'll find access to both, if you understood one, or the other. Last month we showed how we control, how we can change your physical dimension, salinity. Push what we call, the sugar level. You saw it, you measured it, you understand. Now this time, we play with changing of the condition, and you play yourself, in what you want to take from the table we've provided. And, when you answer, as usual, what I call, the questions at the end of the second

week, then you find out the magic. Last time we showed you the dimension of physicality.

(1:22)

This time we show you the dimension of the Soul. And then you see what you remember, and what you wanted to create to remember. And then you understand how we make it the passengers of the universe, through yourself and not through us. And then you understand why you remember some, and some you don't and you ignore. Because, in a way, it goes into the memory bank. But, in a way, you don't want to remember that memory, and you say, "it has no effect on me." Any other question? Q: ... Do the animals, plants, insects, etc. also dream and have emotions to set their Soul free to transmute, even to the Creator? K- Yes, of course. Have you ever watched your cats or dog laughing in the sleep? Have you seen them, they frown? Have you seen them, suddenly they jump up, exactly like the humans do. Of course they do. Have you ever walked in the forest?

In a way, it's part of the survival lessons, if you ever work or been in these teachings. They tell you which way the Sun is. They tell you how the weather is going to be, by the plants, by the trees. Have you ever seen the mole holes on a mountain, on a hill?

(1:24)

If you look at the trees, by the strength of the branches, they show you the direction of the South or the North, or where the Sun comes from. If you watch the mole in the autumn, by the position of the hole you see if the mole is just on the hill, you can tell the emotion of it, it knows it's going to be a rainy year, dry year, or it's going to be not that good. If it's a wet year, he makes the hole right on top of the hill, because he doesn't want to get flooded. And if it's average year, he'll dig the hole in the middle of. But still, sometimes makes a mistake. You look at 10 different mole holes in different, same area, in different places, and you get a good feeling of, if it's going to be a dry year, a wet year, or ?? , the same. So yes, they do have emotion. If you understood agriculture, why do farmers change every season from one grain to another. We need to learn a lot. But some of our ancestors understood, they were observers of the power of the knowledge and emotion. That mole is connected to the emotion of the planet, months ahead of us.

(1:26)

It's the same. If you want to ignore it, or we stick to it. If you feel it and you get it right, you dig a hole right on the top. You come closer to the Creator, as you call it. And if you dig it at the

bottom, you get flooded, that's the end. Too late to move. And this is a strange with everything, it depends a lot when it comes to larger scale, how, for example, governments work with this, with the knowledge having it, and ignoring it, and then live with the perils of it. Any other question? Q: ... In dreams we meet divine beings or receive orders or knowledge. Is it the higher own self? Can misleading emotions which originate from the brain cause something like that? Don't we have to distinguish between them? Does it depend on one's own higher development, which determine the quality of dreams? For others, the actual reality? K- Depends. I usually, jokingly,

(1:28)

but has a lot of sense to it, if you understand it. You have the dreams, which is connected to your day, physical work. A lot of people have a dream, depends what there was a conversation today with the others. They carry that dream, and they're connected, because of whatever emotion it created, to the condition. You hear about an accident, and then something happened, and then that night, "Oh, the next day..." "Oh, I had a dream about an accident, blah, blah." And because you know about it the day before, the few days before were talked about, you see it. And then, you see, but they don't see it, but you connect it, you say, "wasn't this

we're talking yesterday?" And now you say you had a dream. It's very much like Google of today. You try this with Google, very interesting. They have this system of recognition. You talk about, you want to go to Mexico and see the mountains, blah, blah, blah, for example. And then suddenly, 48 hours, 24 hours later, Google sends you a message, "Mexico is blah, blah, blah, would you like to have..." Whatever they said. And you say, "Oh, I was thinking about it, and see what happened." No, Google, even your phone is open, closed, you're not talking to anyone, gathers information, and through it make it advertising. There is no coincidence. So, it's the same with you. You try it, you mention things, and then you see it, a few days later, appears something on your mobile phone, then you understand the commercial emotion, what I call it, dream. And you do the same, in other ways.

### **(1:30)**

You know you get the letter shots, coming through the post or something, somebody sends you a letter box and gives you an indication of what it'll be. Some of the information we receive as a dream, is that letter box. It's a mass distribution of things, or individual distribution of emotion. And depends what we connect with, and what we are in touch with. And then, we receive information to correct

what was, as a dream. Or, try to understand it. And I witness this, in my own life. But because I stand outside it, I look at it the way it is. You receive connection, the way like you want to see mom, but mom is not there and you can't dream tonight about it. Or you wait, what happens, "Oh, I see my mom everyday, I want to speak." Because you have that connection of the Souls. So, it manifests itself different. But, you understand it in different way. And we interpret it in different way. But in essence, if we become aware of how dreams are structured, everything will have a meaning, and has a reason, and for it to be understood. And very recently I started speaking a lot about the cycle of my life, for in the future or present, you come to understand how the whole thing about the structure, the information, the knowledge comes about.

(1:32)

Because by example, I try to make a lot of things very clear for you to understand. So, we decide and partially is given to, and partially how we connect it to. But, in essence, it makes sense. In essence, you see the pattern. If you remember, I told you, I mentioned in some of the teachings. When I studied as a nuclear physicist, or nuclear engineer, when my degree came, it came in a cardboard tube, like a set of toilet paper. So when I

opened it, I was puzzled, "what's this? Why I received that? A toilet roll tube." And when I noticed my degree was inside it, I took it out, I stuck it on the toilet roll. I says, my mom said, "what's this here?" I said, "this is my degree, that's how much it worth." Because I'm not going to use it in a dimension you want. But, before I go to University, before I become a... going to a nuclear physicist, I became one of the top students in course I was doing in the United Kingdom. More or less, the top guy in that year. With 86.3% right across. And, because of that high level, any University, anything I wanted to do, was possible. So, my sister being in the medical, ?? school of Manchester University, goes to see the medical people, University side.

(1:34)

And, I was no intention, I see blood, I go crazy. Now, that's why I developed the Wellness without any blood, because I can do it without ever touching this thing. So, my mom came to me one Friday afternoon, in the summer time, at that time, and she said, "we're going to a movie tonight." I said, "mom, it's Friday or Saturday night, 10 o'clock at night, you go to sleep. Why do you want to go to a movie?" "No, no, no, your sister is coming, we're going to a movie, you're going to watch a movie." I said, "mom goes to bed 9, 10,

now, we're going to a movie." "We go to a movie." The movie called, if you go back on the Internet, called, 'China Syndrome'. China Syndrome in nuclear technology is when, we say, if a nuclear reactor melts, goes through the Earth, and it comes out the other side, and it doesn't even matter where you are, the other side is always China, according to philosophy of the world. And so, the story of the movie is, you can watch it, there's a nuclear reactor controller, the reactor goes, control at the end, they shoot him and they kill him, or he gets shot. And then, we go and watch this movie, we come out of the cinema, and my mom is crying, says, "look, your sister has got you a place, be met, go to become a doctor in Manchester University, you don't need to go to London and do these crazy things, you see what happens to the guy, they're going to kill you, why do you want to get killed?" I said, "mom, all this commotion going to the movie, was just because you and my sister decided you want me to become a medical man, a doctor, not me." Blood and me are two opposite sides, it carries too much emotion of pain with it. She couldn't get me working, she couldn't change my mind, it was a disaster. And then all the dreams came ?? at me.

(1:36)

Exactly what a lot of you say, what was, what is. And I told you about the, coming down and watching her crying, and I said, this was some time later, after I got into University, and I was going to go to University. I said, "mom, why you crying?" She said, "I had a dream of the Prophet, carrying your body in white." And I said to him, "is he dead?" He said, "no, he's one of us." And he said, "you're going to die." I said, "mom, what does it mean?" She said, "I saw you being carried by him, and you were all in white." I said, "that's good, at least I know where I'm going." And I started laughing. She said, "everything to you is a joke." We connect, we understand. Depends what we want the dream to connect. We remember the parts we want, because it suits us to justify the dimension of physicality. Many times you come across people who, especially when they are in old age, they say, "oh, they are talking to the dead." They see all their uncles, cousins have passed away.

(1:38)

Because, they are prepared to feel safe to go, because this is the way they feel safe, they know the journey starts. Many people in the last few days, weeks of their life, especially the elderly, they tell them, they tell you, they're talking to the

dead, because they say, "oh, what I saw this, I saw that." Because, in a way, the emotion of the transmutation is getting open. That dimension of emotion is accepted, so you allow certain emotions, and that emotion brings you towards who already died. Now we understand the process. At the same time, it goes the way I said about the football player. You, in the stadium, create that emotion, and if you create that emotion of 100,000 people wanting to go to Mars, and create the right strength, showing through the... not a physical ball on the football ground, but the ball as a Moon, you can transmute the whole 100,000 to Moon instantaneously.

But, can you imagine what mayhem will be there? Would they all transmute as this? You see 100,000 stones or 100,000 worms running around? Would they know all how to come back and watch the rest of the football? You look at... I speak about this because it's the emotion which creates. I don't tell you a lot of things, but go back to the history of the Book. I'm a football lover by childhood. I remember, one of the times I went to the 100,000 capacity stadium in Tehran, was a football match. Which is today unthinkable. Today's state of the situation.

**(1:40)**

The match was between Iran and Israel. It was one of the league games of the Asian games. And it was set, in a way, as you know, everything gets organized in the football team, even the World Cup. Most of it is planned, who's going to be where. I watched the Iranian football team playing against national team of Israel. On Tehran's soil. We were the only nation which accepted the state of Israel. And, what was interesting for me was, how the whole hundred thousand people were shouting "Iran". And how that eleven players of Israel were deaf to this emotion. Because they were trained, "your world is that ball." And, if you can get, find the match, watch it, it was a very interesting match. How it was one-sidedly decided that Iran has to win. And the goal was not allowed and the rest of the commotion with it, which is normal with these things. In a way, as half Jewish, half Muslim and totally Iranian, it brought me a lot of emotion. Who do you support? And why the emotion has to come by who you support and not just enjoy the game. I've been to football matches I've seen the joy of the team I support and the other team. But this had a lot of religion, nationalism, and a little bit of football in it.

(1:42)

But at the end, when the game finished, it didn't matter who played on the football pitch. It was all the beautiful game. And I said to my uncle, "we watched three things together today." He said, "Mehran, let's go have an ice cream, you think too much. You think too much, you understand too much." But, if we create that emotion as in the football match, and that was the Soul of the Creator playing with our Soul, would we watch the match the same way? Or it changes the emotion, because still we fear of a loss. As I said, when I came down to my mother, and she explained to me that she saw my body being carried, and she asked the Prophet, is he dead? He said, "no, he's one of us." I said to mom, "mom, you didn't want me to become a nuclear physicist?" And you don't let me go the other way. Why are you crying? Either way, I'm going to get killed, I'm dead. What is the worry?" What emotion we carry,

(1:44)

dictates the condition of the dream. And we understand this, what emotion we carry from the first teachings of the medical part, now you understand, decides the position, the time and the place, the shape, the color, and even the word we speak of our existence. We have to decide and which part is what we decided to have, and what's

the reason of that, or is it a message for the next steps, or next stages, and what we learn from it, or remember from it, and what we change for that to happen, or not to happen. Any other question? Q: ... How can it be that I welcome brother wind in a storm, and that I am protected by so much warmth of love around me? Love is transformative. Is ordinary love anything other than being love itself? If love is transforming into a being of light, as some saints already were, like Jesus and others, Is it still an emotion, since the emotion comes from the brain, and leads some people astray perhaps?

(1:46)

Dearest thanks and my warmest greetings in love, Mary. K- It depends, is it the wind of love or is it a physical wind, and how we separate and distinguish between the two. Is it flood of it? That's all it is. So much of it, that it touches us. And the air is always there, when is so much of it going so fast, we call it the wind. Is it the same with love? Is it the same with emotion? So much of it comes, and can we handle it? It's very much, does it give us elevation. That strong wind moves us, blows up, blows us across the road, blows us the wind, the leaves, saw ?? the others. Would that love do the same, makes us move. What we call it, love, that emotional wind. And to what extent?

And what we learn from that emotional wind we call, love or whatever you want to call it. Do you know you go visit one of the states, one of the states, I don't know if it's Seattle which is a windy city or whatever. Do you want to specially go and live in that place, because it's always windy? Or, do you want to go to desert, which hardly, you know, is warm, and maybe, the wind, but it's a warm wind, you don't want a cold wind?

(1:48)

Would you like, do you find love in the ice, or cold? Or do you find love in heat and warmth. And does the same emotion created by both conditions? And it's the same with love, it's the same what we do, what we wanted. And where we want to be in respect to what time and position. Because each one raises different emotion. You got to remember, you got to understand. Interaction between the fields of the physicality, in the fields of the STM, create their own emotion, even though each one has his own emotion. And that emotion is a decision maker for bringing the man, because it's accepted by both and we ?? actually ?? refuse ?? both. You go through this process of emotion and the Soul, and the loss of a son becomes a cancer. The pain of the son becomes a prostate cancer. The pain of the love with the mother becomes a cancer in the left breast. And the pain of the love with the

lover become a cancer in the right breast. In the future, the scientists, with the same kind of emotion, will tell you which testicle has a cancer because of which child. And in the future, scientists will come to understand why it's better to have a child of the Soul than the child of physicality. Child of the Soul comes from the love of the balance from of the both the STP within the STM, from both sides,

**(1:50)**

which means there are four factors to get one. And they all have to be in balance. And it'll be perfect. In the dimension of physicality, we put every emotion into it. And then, because we cannot reach it, we direct it to ourselves and we create the cancer inside ourselves, because the child is gone. We cannot do anything. It's departed. It's left the body of the mother. The mother is within you because you are born from it. The child is part of you. You still get the emotion ?? connected. Why do we get a cancer when it's to do with a lover on the right side? Don't we give with the right hand and don't we receive with the left hand? And because we gave so much in the right hand and it went wrong, you want to cut that part off. So you create cancer on the right side with the lover. With the left, it's where you receive love, the love of the mother, the love of the child. But don't forget, sits

on the right side of the brain, the left breast.  
Control of it, every functionality of it.  
(1:52)

Then you understand why even the cycle of the birth, the ovaries with a man and a woman, the testicles are positioned different. And why the emotion of the man is different than the woman. And the man has all collected in one part, even separated slightly from each other. But the woman's dimension is separated totally inside (the body). Man has not understood the connection between the STM and even the physical structure of the man through the STP. Then it's you who controls that cancer. And even the position of the cancer is controlled by the emotion. I don't want to sit, because it's time for me to go where. Now you understand, even before we start these 500 teachings or whatever, all those teachings we did with Dr. Kostova. And every session, every section which had to do with that part, emotion was put in 10 years later, now you might understand. Now that the teaching has gone far enough, then you can understand.

(1:54)

Any other question? Q: ... What happens after the Soul leaves the physicality? K- You call it death, you just got a pile of material, which made the working in the factory closed. The production is

done. It was a prototype, every Soul is one prototype. So, you build a machine for it to make the prototype, now we cannot use it again. You call it death, you leave the machine behind, call the body of the man. That's all. It's a "one off" production. Any other question? R: I was wondering if someone identifies really strongly with their physicality, then upon death do they stick with the physicality, rather than rise with the Soul, in a way? K- No, the job is done, you can. (1:56)

It's a very strange phenomenon, but it's hard to understand for a lot (of people). We are created out of the interaction of the fields, and the fields take us where they brought us. And if you understand this, doesn't matter what physicality you put on it, how you, and how many bits you hang on it. It's very much like this, you know, putting a man naked in a coffin, or dressing up with the most beautiful clothes and jewelry, and put him in a coffin. That's just a physicality, it's gone and done. Do you want to spend money on it, or you don't want to spend money? And how much emotion you want to attach to it? And how you accept that perception of the physical leftover? Apparels were put in with all the gold and everything else, and their wives and whatever children, whatever was supposed to be there. And the Muslims take everything off and put it in with a white robe,

white, what they call it, ?? bath. And they buy flowers and do whatever afterwards. The Jews put it in a coffin and never spend a single penny on it afterwards, because it's not much use spending money on it. And it depends how we see it. And the Zoroastrians put it on the mountain and let it share the

physicality with the others. Left over, is not important. Because we never understood the STM was within,

(1:58)

and it's produced, it reached maturity, and is on its way, and it's gone. And don't forget, it's instantaneous where it goes. It's not going to wander around to find a place and position. Zero-time communication. As you go on to what I call, fields of the universe and there is no resistance, as it's the dimension of the fields interaction and accommodation. I wonder one day, man will make a communication system on the Soul basis, to create the zero-time communication. The tools of it has been given, it's in the teaching and many of you have made it, but you don't know it. Any other question? Q: ... I'm looking for information that I can't find, maybe you have the answer. I read that it was necessary to make water charged with a Gans in a glass or plastic bottle, but that you did not need a stainless steel bottle. I can't find the

reason for this, do you know why? Because I have a 8 liter stainless steel gravity water filter and I put my Gans tubes inside. Thank you for your reply. K- The steel is in line with the gravitational field of the Earth,

**(2:00)**

as being an iron. And it creates a line of interaction, and that's the reason. And, I always advise, if you make a CO<sub>2</sub>, your best container is a plastic container, if you're making other things. Anything which is Carbon based, plastic is good, because it creates a balance holding, it creates a Nano structure, of the structure, if you understand it. Anything else, keep it in the glass jars. If you come to the labs of the Keshe Foundation, we hold more or less all our Gans's in glass jars, for that reason. Q: ... Can you explain why the wisdom teeth exist? Apparently they have no function and cause pain and suffering in most people due to their disordered growth requiring surgical interference. Is this an imbalance between the STM the STP and the physicality? K- That's a puzzle, isn't it? Why they call it the wisdom tooth? And, it's mainly because,

**(2:02)**

it's our interpretation, nobody else's. They supposed to grow at a point back, where by that time your jaw has grown big enough, and you

have to go to the history of the man's life. How we evolved. Wisdom tooth is part of the emotion. And don't forget, most of the man by the age of 18 in those days, they lost most of the teeth in the front, they needed the support with them. Most of the teeth at the front were lost, so the tooth move in, and it gives you a thing to chew, at least something you wanted for another 5 or 10 years, till they rotted as well. That's the whole reason for generation of it. Then it's like a, what you call, bits of the body which was not needed, but now it's become part of. There's a fish in Iceland which can crush the shell of the, like a oysters or mussels. And it's a very hard thing and it breaks most of his teeth. And then this happens during the summer time when he feeds. And in winter time, because he cannot feed, all the broken tooth come back up. And they literally gets new set for next year. And what we see with the jaws, they break the tooth and just literally another one comes out. And the man went through the same process. He could keep these teeth for maybe 10 years, 12 years, 15 years, some of it was lost.

(2:04)

You have to remember, in the time of pre, what you call, 18th centuries, before we got access to, or 19th centuries, because we didn't get access to sugar or whatever, people lose their tooth for

whatever reason. But 1,000 years ago, there was not so much loss. It was just coming by breakages and everything else. So those were there to support the last stage of life, and life span was different way. So, now 18 years later, the brain has decided it's a good time to put a new ones. There were no tooth, so they came out naturally, they didn't become crooked. Nowadays, as we do every dental surgery, everything else, the tooth doesn't fall out to create a room for it to grow, and we get all the complications of today's, what you call, wisdom tooth. It had every reason for your ancestors. It has every reason in the villages of Amazon and Africa. But in the western world, with all the interference and everything else, interventions we do, all our teeth stays. And then, there's no room for it by age of 18. And that's roughly where it came ??, brain sets itself. It's like that when you are 9 or 10 or 12, you mature, ?? sexually. It's part of the process of creation, it's like... But it had a reason for it, it's a good reason for it to do. Nowadays, we intervene so much, that, in our eighties and nineties, we carry 80% of our natural birth tooth, at the age of ?? 7. At 65 I think I have two, only two, actually one, which is... two which has been planted, the rest is what I brought from childhood.

(2:06)

But we ate, diets, everything else, dental intervention, allows us to keep our tooth into our, maybe in the eighties, nineties, hundreds. Those days it wasn't there. And change of diet has brought these changes and we... somewhere needed, needed it. In African nations, in the poor nations, and in tribes in Amazon, I don't think many people have that problem, because they go through the natural process. But they call it wisdom because it came, and when you're 18, you're wise. So they gave everything in the British culture. And when you're 18, they used to give you the key to the house, because you're wise enough, you ?? can look after the house. And the day before, 18, you were not mature enough. It's the same with the tooth. The others, you go and take all of them out in one go. When you're 18, 19, you take one out, two out. Because with the pressure of it not having room, it can deform the front tooth and all the ?? veins of it. But if you born 400 years ago, 500 years ago, this took millions of years to program for the brain, you lost most of your tooth. At least some of it in the front, so it was room. It comes in to back up another 10 years of life. That you can chew and eat. Any other question? By the way, in so many, talking about this, I was explaining this to a Knowledge Seeker yesterday.

It was this morning, yesterday, I can't remember.  
(2:08)

Our knowledge now has reached the point, that we can grow a tooth. We understand the process of it, to grow a tooth, put it that way. Because a piece of puzzle was missing in how you grow a tooth.

What's the reason that you can initiate the growth of the tooth. And now we are testing it. I'm pretty sure, 100%. We should be able to grow a tooth if our scientists who work on it understand the process themselves. Understand why at age of six or seven, you lose your tooth. And why that seven years is crucial, or six years. Understand the system why which tooth is lost. We don't choose. Teeth at 6, 7 is replaced in a specific way. It's not random. And it comes the age of first maturity. Then the wisdom tooth come in the second cycle of what you call, maturity, we call it. You can dictate, shape the future of a child. You have every say in it, till age of seven, six or seven. After that, it becomes on its own.

**(2:10)**

You have molded the character of the child. Now the child is ?? unknown. The child, or the brain, or the body, ?? shares .. the childhood what people have control in what I eat, what I put in my mouth. Now I decide. This is why we have two sets of ?? seed tooth, one in the first cycle, one in the second

cycle. No animal does this. Watch your child, till 6, 7, when the start of the dropping of the tooth. You put in front he eats. Now, he decides, I don't want this, I want this, I want that. I want to do this. We have phases of maturity, physical and emotionally, in different part of the cycle of life. 6, then you have 12, 13, and then 6 cycle later, you have the 18. We're born 6, 5, 6, 7, we shed our physical tooth. Round about 12, 13, we become mature sexually. And then 18, 20, we become mature. You call the wisdom to physicality, and the dimension of emotion is supposed to have control over. Life has a cycle. And where you live, what diet you have, shifts this a little bit higher and lower. Any other question? R: We have a question from Fushi Fush.

(2:12)

It's in, I believe, German, but he's given a translation. ... about the calcification of the pancreas. I think it might not be the pancreas, but ... perhaps it is ... he says pancreas. Some people talk about the calcification of the third eye, the gland, the pineal gland, but ... K- It's too hard to find a stone in there ?? probably. Q: So he is asking . Which Gans can I take to stop the punctual calcification of, well, pancreas or perhaps any organ or, you know, gland? K- Or, you have a kidney one, you have a gallbladder stone. Where

else do we find a stone? Do we find a stone in the heart? Yes, we can do that, calcification. That creates death, very, by, it's the emotion of the heart, when you get the calcification in the heart. It's a very rare disease. About 10, 15 people at any time in the world have this disease.

(2:14)

You can change calcification if you understand the process of how, and what emotion is behind it, or what fields has created it. And you have to use it in conjunction with it. That's why when there is no emotion, it's just a field strength we see viruses like Corona. If it's at the strength of the Calcium (Ca), where it touches it, the Calcium seed of every cell, now changes that cell to a strength of cell, in a ways, gravitizes it to Calcium. So we see death with a lot of people, with Corona, with the heart, or with lung, with massive calcification. Because it's a ?? field strength. It's just you have a magnet, which is a steel magnet, iron magnet. So anything with iron in it, attracts itself, because it has that field strength. It's the same with the calcification of the cells in the body or creation of stones, it's the field strength

environment, which dictates the calcification. When you can, you have to find out how, what it is, and we can, if you create the wind of the calcium with it, yes, it's possible. You can interact

with it. But it's a knowledge we, as Keshe Foundation have gathered over years. Any other question? Q: ... Hello Mr. Keshe, you were kind enough to tell us once more, what is the difference between transmutation and transportation? Because you often use these two words together, it seems like they occur simultaneously. Thank you. (2:16)

K- Transmutation is when we transfer through the energy. Transportation is when you do it in the physicality. You dream through transmutation. You travel through physicality, you get on a plane, you go in a car. Have you ever seen a car driving out of your brain? And because we have two Souls of STP and the STM, they do in the transmutation of the body, you then manifest in physicality. And so, you can do the ?? work. Teleportation doesn't exist, just because people made it in the television, now they made a word for it, which is a good dream. But, transmutation is very simple, it's done through the energy levels, without the physicality, and through transportation is what is connected to physicality. You can still carry a dead body across a plane to another continent. You show me how you're going to carry the Soul of the body which was in it, so it transmutes. Many times, I've said that many times, people may understand it. At the point of the burying the Soul, the physicality of the man, the STP is present. Many times. Any other

question? Okay. You're on out of questions, shall we call it the day?

(2:18)

R: Well, there's a couple of more, but you're doing quite well. Let's ... I've got one in German, I need to translate. K- Those of you, while you're translating, those of you who come into the session tomorrow and next week, you will have a fantastic time. Maybe you come a step closer to transmutation, where last week we worked with, or last sessions, we worked with the transportation. It'll be an amazing time in these two sessions. I want to see how, as Knowledge Seekers, come to it. We start a session with just normal welcoming you. And then, at the end of the session, we just say goodbye. It could be one hour, it could be two hours. And I'll receive continuous through the graphs. And then we decide. It could be three hours. But how you feel, how you come out of that session tomorrow, and then next Friday, it'll be an amazing experiment and knowledge for us. And as usual, we share it with you to see, to understand. But it brings you one step closer to understanding the direction of transmutation, the essence of the energies of transmutation, and how you can transmute. We most probably bring this dimension in London Conference in an amazing way. Any other question? Or have you managed to translate

yet? R: I haven't done the translation yet. I'm still trying to figure out the other questions here. But ... maybe we can just address one or two more and then we can wrap up.

**(2:20)**

Q: ... Recently on social media, we can see more and more videos showing people suddenly disappearing. If these are real, I cannot imagine the fear between human beings. I don't know if this is a question or I need confirmation about that.

R: Any rumors of people disappearing? K- Well, camera magic is a lot of them. Camera of magic is a lot of games played. But in reality can happen.

You are learning how to do it. But, it's a knowledge of understanding how to transfer energy. Up to now we transferred. You know what is very interesting in all these teachings, and how puzzles me sometimes, how man tries for man to be ignorant, because it suits him, because he doesn't understand, so he doesn't look. It's a few things we have, we do and we just don't talk about it, because it's there and then ?? you. What is a day and night? How come we got a daytime? How come we got a daylight? Just because Earth rotates and faces the Sun, Sun itself in its environment, if we go into, outside Earth, it's always dark. How come we have a daylight when it comes to Earth? Because we never wanted to understand the

interaction of the fields of the Earth, gravitational magnetical with the Sun, creates friction of plasma, we call it, daylight. And the photons or whatever it is, through connection to the field strength of the center of the Earth, getting pulled in, we have a continuous daylight. So, now we understand this.

(2:22)

But you go outside Keshe Foundation, you ask anybody, there is no explanation. Now we have the knowledge, we understand. It's the same with other factors in life. Now we understand, we can scientifically explain. And we try to be ignorant, because ignorance is a bliss for the ?? British, we don't know. And this is the same with these kind of questions. Now you understand the world of plasma and what it does, so it should be easy to, to understand it and to explain it. Next question. Q: ... Hello, I was at the meetings on September 8th and 15th, But unfortunately I didn't receive any feedback diagram. Greetings Joseph. Were there diagrams or public publications that were available to people? K- It was sent to people individually. Send a message to [info@keshefoundation.com](mailto:info@keshefoundation.com) Maybe it's been kept and hasn't been sent, or it's an email waiting to go out. Or you've been just, somewhere, been sent. Change, check your, what do you call it, Google, or change, check your junk

mail. Google has decided that if Keshe Foundation sends more than 4 or 5 messages, they just dump it as a junk, or they don't transfer it. We don't know why. Everything has been sent out. We were discussing this with our promoters this week, too. (2:24)

Somehow, Google has put a filter on Keshe Foundation, as usual. And if our offices send certain numbers, even one, they block it, or they send it to junk, or people don't receive it. Check your junk. If you haven't received it, send a message to info and see what it's because everybody else has received it. You understand these sessions we run is so time consuming. We can't send a mass email. Most of it, sometimes we have to go individually. When it's hundreds of you, every single one, every email has to be posted, mainly one by one. And it's also some problems with, what you call it, the Google with the Keshe Foundation. Any other question? R: I have it pretty much nailed here. K- .. When you expect something, sorry, just one second. When you expect some message back from Keshe Foundation, especially if you have a Google account holder, or Gmail account holder, especially Gmail, check your, what you call it, junk section. And if you don't receive it, send a reminder, because everything is sent. It's something Gmail has decided to do with Keshe

Foundation. Any other question? Q: ... I used the reactor with the Nano coated coil with the copper plate. I have placed the reactor on a red light therapy light for a while, when I made a picture the green LED turned black.

(2:26)

After a long time I did see copper crystallization on the plate. Can you explain more about this phenomena? K- Repeat, please. R: Well, he has a reactor with a Nano coated coil with a copper plate, and after a long time he saw copper crystallization on the plate. K- This is quite possible, we see this a lot. This comes from the field interactions of different layers of the Nano layer and environment. In a way, you take a copper, you Nano coat it, and then the interaction of the fields of the copper, takes the copper from the center of, let's say, if you have a wire, you have Nano coated the outer atomic structure of the copper. But you create the same thing in the other side of the copper. So, it comes to a Nano, becomes fields, and then the last layer pulls it back in, and you get the copper from the center on the top. This is a very normal, natural phenomenon. Depends on mixture of the copper, depends on the way you Nano coated it. And usually, when you get it, if it's not instantaneous, and you are in the water, it turns green, oxidizes immediately. This is

very normal, this, in a way, you take the one atom of the copper, or one molecule of the structure, from the center, through Nano coating, and then, because of the field strength changes outside, it, (2:28)

through the gravitational pull of the center copper, it just manifests itself as a copper. It's very much transmutation, but in a matter state of ?? ??. Shall we call it the day? Q: ... Yes, good day Mr. Keshe. Here in Uruguay, there's been a very big ecological accident. In a paper plant, they've spilt a thousand cubic meters of caustic soda into a river. And it's made a big mess there. And this will end up in the river plate, in the end. But what is the possibility of neutralizing this or correcting it? The pH water, in the water right now is 13. K- There are different ways to do it, very rapid ways to do it. Use the, the... One way to do it is to use Hydrogen Gans. The other way to do it, use a Gans of Zinc and Copper together. Just flood it and you will see the change in pH very rapidly. Q: Fine, well we hope the people there in Uruguay will listen to this and get their hands to it. Thank you very much. K- Yeah, it should do, it should, you change the... When you add the Hydrogen to it,

**(2:30)**

at such a high level, you push it to become, what you call it, alkaline, the acidic and the reverse. It

leads to creation of life, if you understand it. Or you use Zinc and Copper and you bring in natural ways of, what you call it, the caustic, into process of creation of Hydrogen and CO<sub>2</sub>. The... it's a very easy way to change it. If you have a free Gans of Hydrogen, you can throw it in the water, or bring it near to it, it should... It's so alkaline, that you change it to acidic. But the environment is so alkaline, acidic, that it becomes like a sugar of life.

Q: Thank you very much. K-

Thank you very much. If you have a caustic burn, try it, it works amazing. It's like when you have a hot water burn, you put CO<sub>2</sub> on it, the pain reduces. With caustics, if you, you have, if it goes so high, you have to change it. But at the same time, you have to introduce the element of balance, which is the same, you put the Hydrogen, you put the CO<sub>2</sub>, what you call it, Copper, and Zinc, you create a diversity. And you neutralize it, it becomes balanced<sup>7</sup>, more or less. Thank you very much for today. And we'll meet some of you tomorrow,

(2:32)

and you'll have one of the most amazing journeys. And as I said, if you're coming to London for the conference, make sure you complete it, because the promotion, I think, it starts on Monday worldwide. There is something I have to explain.

It was important to say, to explain it very carefully and directly. We saw people who causes a lot of problem in, what you call it, in Germany and the other functions, calling embassies and whatever. Please understand, if you're so selfish you want to do this and stop the man to become free from all the shackles of what we call, created for himself. Carry on with your work. We know you are all connected to pedophile groups, 95% of you. And we know your... what you think you want to do, or whatever it is. Do not forget, we're dealing with the governments, and we pass all your inputs directly to your governments to be handled, and handled by them. One of the biggest nations will suffer, will be Germany. Especially with the German people. We'll hand all your, all your inputs, whatever you've done, whatever you're trying to do, to your government. You will understand the reason, very, very quickly. This time, as this is a process of the International work. We have allowed our promoters to allow Belgium, Governor Belgium to be represented if they decide so in this meeting.

(2:34)

As it has to be equal to everyone. In this conference we allow any Belgians who applies to attend the conference. We cannot bring peace if we bring a division. We make it very clear to the

Belgian nationals and to the government. This is the last time we give you a chance to, in a way, understand your position. The same goes for the Dutch, and the same goes for the citizens of the state of Dubai, we call United Arab Emirates. We keep this conference international and open and all your leaders are invited if they want to join. You have access to your governments, your presidents or whatever, and you want to make them aware, you let us know. Our team, our promoting team, directly will send message directly through you, or whatever you have. They have access to all the presidential offices and the rest, there is one of the top companies, we know they will handle it themselves. But if you have access or private access to certain ministers, or cabinet ministers, or leaders of the parties, send it to [info@keshe.foundation](mailto:info@keshe.foundation),

(2:36)

and we'll send these to our promoters and to do. And they will be inviting your leaders to be. The session will not go public on Zoom, as it will be done, there is a reason for it. And we'll announce in the next few days, what is the position with the conference in Beijing. Beijing is very much like Saudi Arabia, and United Arab Emirates. Governments have to authorize a conference to take place. And we have started the process, and

we'll see what we get from the Chinese government. If they allow such a meeting to go, and we have requested the presence of his Excellency President Xi to open the conference in Beijing. We soon will have an answer for it and we'll see what they do, if he's going to be present and we'll match it accordingly. So, we have put everything aside to share knowledge with all man equal. In the conference in London has to become the center for peace, and work of the peace in a correct way. We hope we see some of you there, and in the coming time, we will announce the new position for exhibition in London, as the (?? Linz Exhibition) will move to London as the central position. Thank you very much, and see you next week.

506 KSW Oct 05, 2023 END
