Part I

(:13)

K- Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. We welcome you back as usual, and we try to share knowledge, and see how things take shape, and how the knowledge goes. Traditionally, we make a few announcements at the beginning, and then we dive deep into the knowledge seeking. And then we run out of energy by about 10 o'clock or so, and then we go home to see how we can give each other a breathe of fresh air, with our knowledge, with our thoughts, and what we can share. A couple of announcements which we have today for you is very simple. For those of you who've been thinking to come to London, for the week conference and then the weekend with meeting with ambassadors.

(:14)

We have a bit of good news. As you know the cost of the week teaching, including Manchester and London, and then if you go to the next level, Beijing, was put at 10,000, and still stays at 10,000. We have received a donation from one of the Knowledge Seekers, which allows us to allow a few people, to be able to reduce the price or the cost of it to 5,000. We can give 2, 3, 4 tickets free to people, but then it's just sitting around, because we already have. We had donations we passed on to people. But now, something like about 10 - 20

seats are available. And 5,000 we put it. And if you can be with us, the donation we receive, we'll cover the other part. The whole structure will be set from Monday the 6th of November, 5 days in London. We have already chosen the venue. It will be announced very late in the sessions. But the ambassadors and the dignitaries and some of the Knowledge Seekers (KS), which will be invited and governmental offices and scientists. Will receive the location in due time. When you receive it, please give it confidential, that we don't get mayhems as usual. But the venue is right, and actually it befits the, what we call, the Space Development and everything else, and has a lot of tradition behind it. And it's one of the center points, has been for years of London.

(:16)

In this process, we go further to understand more. There will be one of the most elaborate shows of the space technology (T). NASA puts their show by launching rockets. We show the new space technology can be done inside a dome, inside a building. And with it, we'll show the implication, application of life. What life will be and how system to support life will take shape. And this will be one of the most, what we call, advanced technologies shown, which changes that. Meeting in London will change the Space technology. We are not coming to talk. We are not coming in to just walk and show something. While you're in a meeting, while you're in the session, You will feel, as you have become part of the Space. You'll feel

how you'll be for the passengers of Space to be in. How we can guarantee life. How we can support life. And you will feel it. We'll let you taste banana. And we'll let you to swim in the depths of the oceans of the waters of the Universe (U). The way we have set it up, will bring shock to a lot of people. In a way, the whole purpose of London Ambassadorial Meeting, is to bring shock to humanity, that what are we fighting for? Where everything can be available, 500 people to a 1000 people at no cost. The change in what will be shown, will bring changes very rapidly.

(:18)

Media's from all aspects of what we call, Internet, broadcast, and the rest, are invited to be there to record it. And that will bring the knowledge where we want it to be. It'll be a changing point, where we'll show, the way we've done to the Chinese military. The change has come. And Chinese authorities have understood the change will be so radical. As one of them said, "The scientists have nothing to say." "This is a new technology, we do not understand, but it works." And be part of it. The Saturday session, those of you who come for the Ambassador Meeting, you will not be allowed in. It's the session of the ?? part of Saturday and Sunday till 2 o'clock. And those of you who take part the week before, will be prepared to show part of this in the Sunday, or we call Saturday session. It'll be one of the most radical shows. I was talking to one of Knowledge Seekers. I said, you know, when the race was put on to show the first light in

Chicago Fair, where Tesla and Edison in two different sides, took part on the side of DC and AC, and Edison lost. And we saw the change, Tesla brought to touch the life of all of us. And then, by coming to that point, strange enough, we go back to Edison. We bring the AC to our homes, because it's easier and cheaper. And then we plug an adapter to make a DC,

(:20)

that it works with our system. So, the knowledge is the same, the knowledge of creation is the same. The old is there, which is a matter of physicality (P), and the new, which is the energy technology, will come into it. But, then they merit, one cannot work without the other. None of us could listen to this teaching, if we didn't have collaboration between the Tesla and Edison work. Even though one tried to discredit the other, Even by putting man on a electric chair, to show he was right. What would have happened if Edison and Tesla would have come to understand the collaboration between them would change the world in a different way at that time? You can imagine what Mankind would have achieved today. So the show, the presentation in London is the same. We are not putting one wrong and one right, we are putting two together, to show it has to be together to exist. Teaching of today will cover that part, you will understand. You'll come to see, and in a way, you come to appreciate life and it's cycle. So join us in London, and see the change, and bring the change. And one day, your Soul in Space will say, "I was

there when it happened." As I said, we had generosity of one of our Knowledge Seekers, who donated, and we covered that donation by half of the expenses of the. Very few people. You have to write to Keshe Foundation, pay the 5,000 and put the other parts, as has been announced, it'll be covered by Keshe Foundation.

(:22)

Saturday stays the same, we will, as we said, we'll stop registration for the Saturday. As of next week we start the invitations. And we'll come to you as Knowledge Seekers, those who we trust, to support, to help, to organize, everything that in London we have a smooth show, a smooth running and presentation. And then from there on, as we always done together, we build the next step. Very good news is that, as you know, UBESUS were offered as a huge bird, huge machines. And those of you who come to London, you will see them. We are shipping these two systems, Material and Body Enhancement, to be present in exhibition in London. So for the world to see the development. These two units have become very cumbersome, and it needs a lot of technology and the things, and a lot of teaching. We have brought the technology from 3 years ago, when we showed them for the first time in Linz, to a new advanced position, to a new system. We've centralized everything. And from this week and next week onwards, those people who bought the UBESUS from the Keshe Foundation, we'll start offering ?? the technology worldwide. In... they become a... << audio cut >>.

What you see in going to these places, will be something very simple. You don't need to carry anymore, what we call, the huge systems, and all you need to see, and you'll see in the, what we call, the positions of the places where they have received licenses, such a system. (shows a pair of headphones in screen)

(:24)

This is the new system, we show it for the first time in public, that something like this will be there. Those of you who came to Linz, you have seen part of this operation by sitting in the UBESUS and holding the two, what you call, electrodes. Now it's changed to this. We showed a different version of this in the teaching in Manchester. This system is self-sufficient. And it only goes to people come to agreement with licenses and about 6 - 7 of them will pop out. In next 2 3 weeks, we start promoting their use by the people. You have to go to them to get access to come through, we call, UBESUS, or anything you want to test. Where to? Whatever else ?? emotion, you have your ??, and whatever. And this is the new technology, in a way, is connected, as we said, through international wireless system of the Keshe Foundation, to our system. We monitor everything. We see and we test everything else. It's very interesting that you touch it, we feel it. We see it. In, as you know, last Monday we ran the, what we call, the "signature of your Soul," that you could see. And one of the Knowledge Seekers was holding in his hand, trying to boost his Soul,

whatever, a glass of Gans water. And it could be seen on the system. We stopped the session. I went back to him and I said, you have something with you which is interfering with our system. He said, I'm holding a glass of Gans water.

(:26)

I said you cannot do that, you cannot cheat, try to boost or change your Soul, while you're measuring it. And then the next session was with his wife. He was holding the headphone on his, but turning on the mobile of his wife. We could see that. And so everything is monitored. There is no wire connection, you don't need to plug it. Once it's there, it has to be accepted, and we can see it, and we connect it. We can give it time of connection, and everything else can be organized. So, we come a long way from those, what we call, units of the, what we call, Keshe Foundation, which you saw. The big UBESUS was kept as a center point, and the structure of them is now become one system, runs the whole operation, and we can control everything else. Through this, you'll see. I'm sure this soon become the grandfather of the new systems to come in. We already see what the next step is going to be. The headphone is connected to the, what we call, the stand, and inside, connected to our system, in what we call, central server. So, from now on, you can go and say, "I'm coming in to be tested, that I can taste banana. I'm coming in to be tested, to get this." And then, we see how we can adjust and give you that taste and the energy. You want to become, not to eat, we can test and

put it through. That you put the headphone on 3 times a day, and once a day, it becomes your food.

(:28)

This is all coming in the next few weeks and months. This is the technology you'll see in London. Knowledge Seekers in Manchester saw the prelude to this. And it's the first time we show. This is the Combination Head Unit. And it will bring changes. The system you buy as a Head Unit is different than the unit which is for the UBESUS. The other units which are connected to this, each one is set for a specific program, for a process, and we connect it to different machines. Therefore, in the coming time, in the next few years, what we see, ?? lives in the corner of the house. It will feed you, keeps you healthy, elevates your Soul. Even can, in the coming time, allow you to the transmutation. As we have shown, as the system has been brought up, we'll go to the next step. This is a change where you will see, this is what we'll show. Ambassadors can put on their head and get in touch with the presidents and their kings. We'll bring this to reality. And then many, many more systems you will see. We have to face the change. There is no choice. As I said, man always spoke about Tesla and Edison, but man never considered the beauty of the two knowledge's and technologies they brought together, brought mankind to where we are today. We transport through Tesla, we deliver through Edison. We transport through the transmutation of the Soul,

(:30)

and we deliver the physicality through the transfer of body into matter state. There's no difference. Now we see, in the body of the man we breathe, we take energy in the lung, through our nose, we take the energy through our mouth. What is at the highest level, energy fields in the dimension (D) of the air we breathe, passes through the back channel, near the Soul. The Soul takes the energy it needs to charge up, to expand. The material state of the gas in the lung, become the source of energy for the Soul of the Physicality (STP). In a way, when you plug your phone, when it's flat (battery discharged), to the wire system of Tesla, you bring that energy for it to charge up. Slowly, slowly, in one or two hours, it charges and it becomes full, and then you say the phone is ready to use. The same thing happens to the man, as I said before. Knowing, understanding technology of today, they tell us, after we breathe how many times, a million, two million, whatever, during the life cycle, on average, we die. Which means it takes us two million breath, let's say, to charge up the Soul. Now we understand why we breathe. We gather the energies and we charge it up. Slowly, step by step, every breath we take, it charges the Soul.

(:32)

Gives the energy to it, to exist and to expand its energy span. And what goes in our body as a gas, in lung, as a lower level energies, become the energy, the structure of what we call, the physicality and the STP of the man. Then we

understand, even the food we eat, we continuously create that condition for the physicality as an energy to exist, while we are still boosting into the Soul and boosting, creating condition of the fields interaction between the STP and the Soul of the Man (STM). Then we understand why we breathe. Then we understand why we eat. And then, once we understand certain level energies are needed for the Soul to expand, and certain energy levels are needed for the STP to be able to control the expansion, then we understand the secret of life. We need the two, the higher order and the lower order, the proton and the electron. To keep life, to keep confirmation of existence. And now we understand, if we can create a condition through these headphones, through this structure, that we can feed the STP and the STM at the same time, do we need to die? Do we need to kill to eat? And these headphones are set to do that. But we control, you go to shop to buy food, to eat, and the air is free from the Creator you breathe. He doesn't charge you for it.

(:34)

Maybe soon some governments even tell you after 1 million breathing you have to pay for it, because now we don't need the resources of the food and water and the rest of it, they'll find a way to tax us. Death, tax and birth, are the 3 only guaranteed things to the man on this planet. But soon it becomes no death, birth with no taxation. Because they can't tax you when you're in the Space. In so many ways, the London presentation will bring the

first step to the understanding of the reality. And then, with these systems, as we spread them more and more around the world, we'll come to understand, we really become the man of universe. In a few months time, in a few years time, as we expand the technology in conjunction with the Chinese central government, we'll bring the changes that the nations will not understand what National Food Security means. Nations will not even consider hunger. Nations will not even consider drought. We plan to show some amazing things that you feel, you taste, and you touch in the London show. In a way, some of you become the ambassador of the knowledge. And then we allow the world to assess where we go next. And we'll see the evolution in science and technology on the 11th of November. We bring it out. We show the MaGravs. We show the other side of the technology, which brings everything the man needs, but in dimension of physicality.

(:36)

But interesting enough, MaGravs will be there. Even though, you cannot see them. The knowledge of the Star Formation (SF) will be there, where the man become man of space. As I said to the Knowledge Seekers, who were in Manchester, we'll bring you in it, you'll be part of it. And, for the first time, man will understand how we feed him, how we give him the Oxygen, and how we give him the warmth, in the presentation of Saturday night. You'll become part of the Spaceship, you become part of the structure, to see

how you will live in the Space. How freely, the materials of the universe, are at your command and at your disposal, without any taxation. As I said, I wonder how many of you will come in with all sorts of conditions, from cancer to the other, and how many of you will walk without it, during the session, or start the process of it. London presentation will be a change in the history of Man. And the beauty of it is, it's so simple. The simplicity of it will bring shock to the world of science. But in a way, it's the science of energy. It's not the science of matter. Man has become good in controlling matter, but man has never understood how simply he can control energy. The beauty of it is, if your body can maintain the most powerful plasma, that it becomes a star in the future,

(:38)

how difficult can it be for a man, who's a beautiful replicator, to do? The beauty of it is, as you've seen, I gave life to Naomi, remote from behind in the window and we see her back with us. I didn't make the system. The father did. The same shall be with the London show. I don't touch any system. It's done by the Knowledge Seekers. That it does not become a magic. It becomes a knowledge. It becomes a technology, which means it's transferable, not only for a human, but for the whole of the universe, as the knowledge will be transferred. In the coming time, you want to go to China, you go to the Headset, you arrange to learn about the world, the emotion, the beauty of the Chinese language and the culture. When you

arrive in China, you understand what the joke is. If it's said, and you don't stand outside seeing the Chinese laughing, and you're looking at the ceiling. Because, the knowledge of the emotion of the language, and the language is transferred. In a way, we get the whole encyclopedia of the knowledge of the nation. The culture, the race, be it on this planet or in the Space. These units you see on the table, on your screen, is the beginning of that change. And I'm sure our Israeli scientists, with the Japanese copying machine, and with the mass production in China,

(:40)

soon these will be small enough to be implants within our body, where we can expand our Souls under our control. Where we decide which part of the energy will go to the Soul, as the lung does, and which part of the energy will go to the physicality, and the STP, as does our stomach and digestive system. There is one point, and this point will be, ?? the world leaders, there will be no more religion. And we all will bring in the Creator, because we connect to it directly ourselves. As I said to American politicians, as they say, the way to the emotion of the man is through his stomach. The way to the Creator is through his Soul. And once you have the connection with the Creator, which is you in part, do you need ?? fake intermediaries, as Ayatollahs ??. I've been told a lot of time, "why do you do and why do you say these things?" The truth is, that the teaching of Muhammad, or teaching of Christ, blessed are

their names, is perfect. It's what is needed to be what the life in the dimension of physicality. Those who call themselves the beholder of the faith, abused it. And that's where the change comes. Now you have access to the source of the energy. Do you need transformers,

(:42)

and the intermediaries, and Ayatollahs, and Mullahs, and priests and rabbis, to put in what suits

them? Because they can get their hands on your pockets, your children, and your life. I had a beautiful experience in the past few days, which brought this much closer to me, to my understanding. We had to attend and be present for a funeral, and the services of the funeral. And what we call, the preparation for the aftermath of the funeral. The interesting thing is the family was shopping from ??, tuna, to a specific drink that was asked for, the specific, God knows what, for the nuns and the priest and the clergy for the funeral. The nuns only want tuna, and they want a Schweppes, and not Pepsi. And you have to give to the priest, a special towel, and to what length. And I thought, "my God, how commercial God has become, you and the nuns decide what you have to give, that the Soul of the dead can elevate." Now we found a way, through the "mermaids in the cans of tuna." This is how ridiculous the name of the religion, through their people has become.

(:44)

I stood and I watched, as negotiation was going on between the mourning family and the nuns, that they don't want this drink, and they want the other drink, and this is how it has to be. I thought, "God, even God knows the taste of Schweppes." And it brought me back memories. I was a child in Iran, very young age, when the Schweppes brand came to Iran, after Pepsi Cola, owned by the same family. They brought the beautiful song, added to it, to bring the new drink into the market, saying how beautiful it is, and how it touches the heart and the Soul. And that song of the promotion some 60 years ago, brought me back to the nuns, and how they understood, they get to the stomach of the man, and these guys understand how to sell the Soul of the Creator. How to cheat, in the name of God. And, the funniest part was, that it has to be delivered the day before. Otherwise, you won't have the blessing. Now, you can see, scale it up to Ayatollahs and Pope, and you see how fake the whole structure of the religion is. And then you understand, the freedom of the man comes on the 11th of November, the day of the peace, but the peace between the STP and the STM. Where we start showing that is not held like by rabbis and the thing, the secret in the temple, but as the truth that every man has access to that secret, which is not a secret anymore, it's a secret of life.

(:46)

How you'll survive in the depths of universe?
What energies we have to take, will feed our Soul,

and what energies we need to take from the environment, to allow the STP to exist within the Soul. Would it be interesting, which I'll teach you in the coming time, is the fact that, the STP has chosen Calcium, as a cage, the ?? hole, the Soul within. And, is keeping it in, with the feeding in the small bits, from the energies from the brain, as emotion. I wonder how many of you can think, and can understand with the knowledge you have today, how would the STM encages the STP inside it? Would it make in another cage of Calcium for it to stay inside it? Or would it create a dimension of the interaction of the fields? That the separation in the fields of gravitational and magnetical creates that boundary of existence of both within each other. This is something which man has not understood, and in the teaching I have referred to it a few times, but as you are Knowledge Seekers never understood, maybe for the first time, maybe for the last time you understand, some of you may be enlightened in years to come what it means. The interaction of the fields, between gravitational and magnetical, creates an immeasurable fields containment.

(:48)

And this is what the world of science have not understood, at all. Because in the world of matter, we use a matter field energy to handle the matter. << audio cut >> become impossible. No ?? fusion of the plasmas ?? as fields, is amalgamation of the magnetic fields together. And how you elevate, how you energize, one plasma with the other. You

pack it in, to give it the strength, you don't hammer it in to confine it. If you understand this, you understand something very simple. And it is the fact that the energies of a very low, very low strength are the feeder of the STM. And even in another lower energy fields, are the feeder of the STP of the man. We don't take in a Hiroshima bomb on every breath we take. The secret of Creation is in nothingness, and the secret of man is in foolishness. That it has to be more and bigger to be more powerful to do things. Where the Creation works on the lowest and the softest and nothing else. And this is where, as I said, Tesla meets Edison, where material condition leads, what we call, the energy.

(:50)

We don't see huge pumping winds and we don't see huge motors running Earth rotating around the Sun, very soft, very low, very literally, fields that we cannot even feel, has been feeding the Soul of this Planet, and the physicality of this Planet, and the STP of this Planet, for billions of years, little by little, the weaker they become, the stronger we are. There is more energy in low level magnetic fields than has ever been in the highest strength fields. We showed this in Inzano (Italy), we can create some of the most powerful fields at 129 Tesla. But that is for different dimension, that is for matter state of the motion of the physicality. And we have shown with this headphone, the lowest of the low can feed the man. You don't see nuclear power stations in these headphones. You

don't see generators running in the system. As always said, dogs with dogs and birds with birds. Dimension of physicality works on its own way. Dimension of energy has a low level of strength. And now with this you understand what is to come. In today's teaching you already have. If you understood the essence of the teaching of today, I opened to you the secret of Creation. How to maintain your Soul, how to feed your Soul, how to live with your Soul in every dimension in the universe.

(:52)

You don't enter a nuclear power stations to transmute your Soul across the universe. You use the low level fields of the universe to interconnect. To be able to transmute, to be able to feed, to be able to exist as part of the world of the Creation. Always remember, you take a breath, and now you understand how, by breathing, you control the freedom of your Soul. And how, by the same breath, you feed the dimension of physicality. I remember I told you about an Indian guru who came, and he said, 21 days he hasn't eaten and he's done that seven times, and that's why he's a holy man. I told him, he's a holy man of lies and cheats. Because, sitting in front of me, six, seven years ago, in the Inzano, I was aware of the same knowledge that you received today. and I could see how he cheats. But, he never elevated his Soul, he found a way to cheat, to take the energy in the lung and convert it to banana, to water, and to what his body needs, and he became very holy. So

now when you can use these Headsets, when you start learning how to use your Soul, you all become a very holy guru, in the dimension of those who wanted 21 days, 7 times, you can live this span of this universe for millions of years. Then you can claim to be whatever you claim to be, as this guy was worshipped,

(:54)

even when he came out of the... he was so big, out of the... one of these ?? conferences. The guys who brought him, nearly became the step for him to step down on the ground. He was so holy he could not even step on the ground, because he hasn't eaten for 21 days and he's done that seven times. Another cheat, another religion, so called fake and belief. With this technology, there is no gurus, there is no cheaters and there's nothing but between you and yourself to cheat yourself or to, in a way, serve yourself. Knowledge is free. You have to understand it. As I said, we are not Prophets, we are not Messengers, we are teachers. We are Universal Teachers, we understand the work of the universe. And we start teaching it, for those who have not understood the secret, that no one becomes the cheats. No one kills in our name, in the land of Iran. Crime against God. You are Godless people, running a nation. As God's knowledge is within every man. The same goes to Vatican and the rest. Now you have the knowledge. Now, if those who are imprisoned for grave ?? claimed crime against the Creator have this knowledge in the prisons of Iran and the rest

of the world, and those who go to churches and get imprisoned in another way by the police, then you can move from these prisons,

(:56)

be it psychological, or physical. Now you understand this Headset. This is the beginning of the change. This is where Tesla meets Edison. And both are right. Both have served the same way. It's the same with us. We have to understand we have a dimension of physicality, and we have dimension of energy. And for the first time, we learn as a way, as a technology, how to connect the two. These are the tools for you to learn. These are not tools for you to be addicted and connected to. With the Headset brand of, "Sony will be better than Phillips." Then, you already have brought separation between your own Soul and the others. As the STM, in every shape or form, from the king, to the president, to the sweeper on the street, knows no "Sony," and knows no "Phillips," and they're all the same and equal. Now you understand the change which is about to come in, and the change you will see in London on the 11th of November. You will feel it. Those of you who were in Manchester felt it. Traveled to the Moon and handle the dust in the back pocket, or ?? boulders in your hand, trying to put it on the table. And not just one of you. So now this knowledge and the expansion will be shown in public. Now you will understand the depth of your own knowledge within you that you have ignored.

(:58)

But this time, the spaceship of humanity in London will

travel together. And I wonder how many of the 500 people in the auditorium will go to the same place. As I said in Manchester, you went to the Moon. Was there a placard to say you arrived on the Moon? Or is this the universe that your Soul creates, and this is the way you want it to be? Those of you who went to Mars, did you see a placard or a voice saying, "Welcome to Mars"? Or was that emotion that you are ?? the planet? Is that the planet that your Soul will create? Barren, and no fields to allow life? With this understanding, when you elevate your Soul, when you understand how to get to the field of the strength, to change a, what I call, deserted island, into a heaven, then you decide, "what I went to is my Soul." And, "would I like it to be barren and nothing in it? I collect sand in my pocket." Or, "do I make it a heaven for the lives and the Souls I create from my Soul?" It's very interesting, when people were in Manchester, or people were in Linz, when we told them to go to the Moon, they all said they went there, they picked up a stone, they had a dust, and they could walk and hop. Now, as I said to you, "did you see a placard to say, 'Welcome to the Moon?'" Did you see the American flag? Or were you lucky enough to see the Indians on the South Pole with their robots?

(1:00)

What you feel, you create. Was it the interaction of the Soul of your own, with ?? its environment? And it shows how much more you have to do, to make this barren land you landed yourself in with your Soul, become the heaven. How much more you need to do? How much more you need to get? How much more you have to be detached, to be able to change that barren land, into the forests and life that the other Souls which you create as children of your Soul, to enjoy. Now you understand, as I'm sure many of you have done, where you all are going. And as I said, in the coming time, in the coming weeks and months, the technology will be shown in a vaster way, in a totally different than what you're used to. I wonder if the, what we call, the organizers of the exhibitions will ask us to stay permanently, where people from around the world can come in and walk into the spaceship of universe, where it flies, nowhere, but the man can fly with his Soul to all dimensions of the universe. As I said, London week will be the week where the man will change. And a new history in the knowledge of energy of the man will come in to again be encaged by the physicality of a building.

(1:02)

where this UFO never flies, but this UFO creates the condition for the STM to find his position in the dimension of the universe in what we call, transmutation of itself. London presentation will be the what I call, the watershed in the world of

science. And the beauty of it is you'll feel it, you will touch it. As one of the highest ranking generals in Chinese army said, "it's on my clothes. How can I deny it? I'm breathing it. How can I deny it?" The power of the technology will change man on the 11th of November. No Prophets, and no, what I call, Messengers. Just teaching the Knowledge of Creation, and I'm one of the best teachers Creator could ever send. Long time been here, learned everything about the ways of man. Now man learns about the way of his own, to become passenger of universe. If you can make it to London, make it. Because there on, the history of the man will change, as is the technology and science. And not ?? a promise. We go for a break and we come back. As usual, we'll try to answer any questions.

>> BREAK >> 503 KSW September 14, 2023

Part II

(1:11)

K- As you always say, "We're ready, willing and able." R: Okay, well, we might have some challenges here. We have... K- Nothing is challenge, is to understand it. R: Okay, let me see here. I have a couple of questions in YouTube and... K- There is something I have to correct.

(1:12)

Sorry about that. In the last week teaching, there was a refer to Dean, feeling the system of what he said to "One Planet, One Nation." We knew we have no system outside, and the system was within always Keshe Foundation team. And we saw the inquiry and other things which happened in the background, and we found out actually Dean had a chance to test the new system. I didn't know about it at that time, he was... As you know, Dean is now resident in Linz, and he spends a lot of time in UNO Center. And it happened that when our people went to UNO Center to put the replication unit for demonstration, he was there. And one of these Headsets, not the bottom part, but the Headset itself, was carried by our guys. And Dean, what you call it, Dean was there. And he was given a few seconds to put this on his head, and he felt the change. And now we understand, I apologize for Dean, now we understand how it happened. He is one of the, more or less, the first person ever been being just present and being always as part of the Keshe Foundation team there, and with our people, with Mario, had a chance to have a taste of a few seconds of this new system. And so, as a member of Universal Council, when he talked to, what you call it, One Planet, One Nation,

(1:14)

he was talking from a few second experience with these units, how effective it is, and how it works. And I was not aware of this, because we knew no

unit was put outside, nobody had. And ... it's very interesting how things turn up, and Universal Council member has to be there to have the first taste of the, what you call it, energy of the Creation. Anyway, now we know how it happened and it's very interesting. You don't even need the bottom part, the what you call, the housing, for you to have a connection with. The housing was kilometers away from the Headphone. And, as I said with our guys last Monday, we could see, we could measure, the guy who had something with him, and he was interfering, and it was with a cup of Gans. But these systems are becoming so reliable, and this is just that, what you call it, "infancy of the knowledge." The Headphones, the pieces we have made, the unit you've seen, become, has already become museum part. And it's very interesting to see what will be the next, and how all of you will feel in London when you come out of the meeting. Any questions?

(1:16). ...

Q: ... Good morning, there are rumors going around, that the new Head Unit is no longer tied to people and can be used by the whole family. How big can the family be - 4, 7, 12? A village or even a city? Can you please tell us something about this?

K- There are different versions of the unit. And even we are discussing it in Keshe Foundation about allocations of it, and how we allow separate systems in operation. We have shown in Manchester, that we could share, and we have confirmation of it, the Headphones amongst

people, from different parts of the world. We had people from Australia, we had people from Germany, we had people from United States. And we shared this Headphone amongst them, because we had only six. I mean, and as you know, we had more than six people in the meeting. And the technology has reached a point it can be used (shred). And how extensive we'll go next step with it, it's something we were discussing. How the... there is one central unit. In a way we have created a system, we call it, the central server. How much can we accommodate,

(1:18)

is something we'll learn in the coming time. When I designed this system, I looked at it as the Soul of the whole Creation, the creator of that Soul condition. It has the capability of not only the man, but the universe to hold within it. It's very interactive and we can control all aspects of it. We can cut out lines, we can connect lines. And these things in the coming time will become what you call it, more apparent. There is no limitation in the use and there's no limitation in how many people can use it, but the limitation comes that we control the feedback and what it is. You've seen it how with the headphones we disconnect in sessions your microphones. We have the same capability with the systems. So anybody tries even to make a copy will not link into, because there is a way we have linked these units to our central server, or what we call it, station. The problem will come as these units and a point you have is connected to

how to you. With the, what we call, the Wellness side, we have a way, without actually our people knowing,

(1:20)

I've built up a way into it that we do not transfer anything one to other, but we break it up at our center system. You don't have that facility on these headsets. So my way of thinking and what I understand from technology, keep it to one or two people. Don't forget you're bringing, you're ?? ingraining other things into it. It has to become very much, very much, very much like a mobile phone. You don't share your mobile phone with other people. This mobile Headset works in a deeper way. And I so recommend, unless we control it from our end, we know what's happening from our end, do not share the Headphones. At least till we know more how to expand it and bring control in it. In the Manchester event, I set the things deliberately, that even your system washes out, in a way it is clean, when the next one touches, next one comes in. But with your unit, try to keep it to one, to one person. You can share it in the family, you can share it, but the... we have to have the security of the knowledge and not to create a fear, or what I call, rampaging. The system has... the way it's built, especially the new Headset and the Stand unit, carries a diversity of effect,

(1:22)

and I suggest for a time being, at least next year, two years, stick to one Headset, to one person, or

maybe husband and wife, but don't go beyond that. Or if you have two units at home, try, because some people bought one unit with two Headsets, yes you can do that, but if you have two individual sets, especially if you're husband and wife, try to see how you can communicate with each other. For one of us to become the electron and the other one the proton to feed and see how you can reach new levels. In the test we've done, especially last Monday, we had couples, we have, we had 2, 3 couples with us and they came one after another. And from the printouts, we could see how 2 couples are opposite to each other. And from the outcome, we could see why a couple have come together. The Souls are so similar. And one fits and the other one. And so, if this is the way we can do it, I advise you not to share. We gather all the beauties, and we gather no faults. But it has to be understood. We have to become more knowledgeable.

(1:24)

And the knowledge has to come through our team to understand more how to do it and bring a perfection into it. But essentially, when we built this system, the what we call, the master, the central system, I built it with a view of creating one unit for the whole of humanity. And that unit has already taken shape. It will be changed, we'll change pieces in it. But the confinement of the fields will stay the same. It's like, you know, you change, just because you change your kidney, it doesn't change you. We can change part of this.

We can take a leg out and put an artificial leg in or whatever. It still functions. This system, in this structure, in the future, will become the central operation of the whole humanity, or life on this planet, dogs, cats, and the rest of it. But essentially, at this moment of time, we do not have the support to come to put it into right across. In 6 to 12 months time, in the space, since we are getting involved into build, we go for what we call, satellite system, which is outgoing and not incoming. And then another satellite to take the incoming, not the outgoing. Which means it's very much like antennas of today, but separated on the field strength. You send in one satellite, you receive another, or you build a combination in satellite two together. There are a lot of factors needs to be done. And so, for the time being, even though we have started using the doctor's unit,

(1:26)

it's a separate unit, because it goes to a different system to come to the central system. That's why we can specifically, for the Wellness, target certain positions and things. And even that, our doctors and scientists are learning, have to learn. And going to that point, our team of doctors start increasing from this week, next week, to more and more who work with the central position. And then the, what we call, the service has to be spread around the world that everybody can use it. And all be connected to one master system, which is already in operation. So my advice to you is, use one system per person. And if you have two

systems at home, try to see how with the system, without the system, you start interconnecting to each other, feel each other, know what you want and what you do. And don't put it to chance. You decide to make a bacon egg at 12 o'clock at night, you see your partner say, I'll come to the kitchen to make the same. Then you get your confidence. Then you understand, you start. You don't need to talk. I have that now beautifully set up. And don't need to talk. Not much.

(1:28)

And it's a beautiful position to be in. And don't say, "oh, I just thought about it. I just thought to myself, there we go. The Souls understand each other." Because you get a ?? fed up saying, "oh, I just think, oh, I've just did." I was thinking about the same, no more, it's just now, it's another way of life. And, the new structure allows it to happen. Because we don't need the headphones anymore. We passed that point. When you establish links with, even with a few Knowledge Seekers around the world, I've had that situation. It's emotion, you feel through the Soul, you build that link. And it's, what you call it, for time being, we advise you not to. Till we have the whole package, we understand the whole package, our team can set up the whole package. We've got to understand technology is moving rapidly. Very, very rapidly. And what will be the next step, and how we expand it, it's... How much we get feedback, how much we get back from the knowledge from you lot. I don't need to speak to my partner anymore. As I said, if you feel

truly in love, you don't need to make love. You're always in a position of being loved, that you don't need to make it. In this, we want to see when it comes across the couples who have the units,

(1:30)

in what they report back to us. And these numbers are increasing, we start producing. Those of you who, for the reasons now you're receiving your unit, then you tell us with your, as what you call it, service centers, how feedback you get from your people. And we'll see how it goes to the next. A list of people who become, what we call the, licensed service points, will be released in the coming time, with the permission of themselves, that they can go through, them to get the, what we call, the services of the Wellness side of the Keshe Foundation. Do not use, or think, "I can use these Head units for what I want." We specifically ask you not to do it, because you'll understand very soon why. It's a ?? board for, or set up for individual use. And keep it that way, don't even let for a time being, your partner to use it, until we understand more about you and yourself, and how you understand to use the systems. And would it bring some of the partner's things to you. That's the whole thing when you share it. With the health side, we have a full control, because we use a, what I call, integrated system with it. With the Head units you bought, which is now coming out, is set up for individual cases.

(1:32)

Any other question? Q: ... Where is the best place to place the Compact unit and why? K- Best place, try to use a wooden or a natural material. Don't use it or don't place it where there is metals, because they interact with the fields. And the problem with the metals is, it interacts with one part of the bandwidth of the magnetic field strength, and not the other. So, it, it changes the balance. With a natural material like wood, it still has a Soul, it's still, if you understand, it's a Gans structure. A metal, it's like a filtering at certain bandwidth of the field strength. So, try to use it in the normal places. Keep it away from rooms where you have your MaGravs, your stereo system, your Gans's and that kind of thing. As I said to you, this week, when we're running the test, a guy says, "this guy is carrying something, we see it." Something is not right, compared to the other ones we always have. So, I had to stop the session, go to him, and says, "what are you, what you, what are you doing, what do you have with you?" "Nothing, nothing." "What are you holding in your hand?" "Oh, a glass of Gans water. We were picked that up." And then,

(1:34)

when it was the time for his wife, I could see the problem. And, being typical man, he puts a headset on himself, and gives the phone to his wife to hold, with the her number. There's no connection to the wife, because the session for him was finished. He wanted to see what the wife does. We could see that. So, try to create a natural

environment, because the universe is natural, everything else is a filter. And, work with it. Many of you will change in the first few days. At moment we are... We start sending out the units for our license agreements. And as we come we start delivering, changing the units only for individuals. Do not pass it on. Try to keep one unit per person, and then we have no complications. And we set the units to one use structure, and we'll see where we go. Any other question? Q: ... Are the new Head and Compact units constantly in operation and usable? Or are there certain times when they can only be used? K- We will allocate time. We will allocate time. We will allocate time per person, per use.

(1:36)

There will be a time allocation. Because when you come into the service center, we have then the same problems all of you have with your Home units. We already started doing this on the Wellness side. We give certain time access to people to come in certain time. And they come in and go. They don't need our doctors in the background. This has taken, this is something we tried very recently. And it works. So you'll be given a time, this time to fit you, this time to this time is you can, in the future, come back and say, "I would like to eat between this time and this time." And, we'll try to adjust and ... we provide a section for the energy facilities for... to be a feeding time. You could be in the desert, you still get fed. You could be under the sea, you still get

fed. We will allocate time. When we start sending the individual units out, we give you allocation of time and you have to be in that time zone. frame.

Q: ... They said that the old units would provide a 30% electricity saving. Have the new units become even more effective in terms of electricity savings? K- These are not electric units. These are communication bundles. If you see, there is no wires going in and no wires coming out.

(1:38)

They become totally to do with the... What will be interesting for us, we're coming to winter time. We want to know, those of you who get these bundles, if you report any cold, how you feel? Do you feel warm all the time? In a way we deliver the energy to you. And in the future, we deliver certain systems, miniature systems, very minute system, which you can put around you in the house, that creates the warmth before the condition to be warm. It's no use you being warm by the water, ice is up in the room. This is all coming in next few months. The communication bundles is communication bundle. The energy communication bundles they are already obsolete. We don't put it in, we separated it. But in a way, it can be done very soon as

one bundle. The technology development is so rapid, it's so rapid, that I think even the things we put out now, will be more or less, the grandfather to what will be here in next year, two years. And once we go to the 11th of November, we show this

technology. I think we'll see a huge jump in worldwide development. I can see, at the moment you'll like have masks that it covers.

(1:40)

These masks cover the cities with the communication lines, with telephones. It's not far, in next maybe two years, four years, we'll have the operation in a different way, but you ?? feel the whole city. I was talking to one of our beautiful Knowledge Seekers, before the teaching starts, and said that the guy is such and such a medicine man, and if he uses his bundle he can lose all his customers. The fact is, once we start mass releasing these systems, a lot of businesses, a lot of technologies can't exist. We have many doctors without a job. We have many supermarkets without customers. And it needs a lot of adjustments for our governments. This is a revolution in science, and how we're going to handle it, how the governments are going to handle it, it'll be very interesting. Prisons empty, judges who have no one to convict or to sentence, as nobody does a crime when you cover a city. These two first cities are like this, already on the plan, and soon will be constructed in the beautiful country of China. Next two to five years, we'll see cities with no hospitals, we see cities with no jails, no judges, no supermarkets. And the Keshe Foundation is behind the construction, development of these cities.

(1:42)

And the third one we built in the beautiful city of ?? Natanz in Iran. And we will see the effect of it, in how we change. Cities without light, we don't need any light, as the interaction of the fields with us will create a light in what we want to see, there is no distance to it. And our target is, as I said, those of you who are buying electric cars, in next two years, Keshe Foundation will endeavor to launch back in the flying cars. Now the technology is ready for it. And you will see, if you don't want to travel with the Soul, how what you call it, the plasma cars, will become part of the structure of life. You don't need no Tesla batteries and the rest of it. Because this system don't use any energy. It's feasible by 2025, we'll market this out of China. We tried to show it in Amsterdam on 26th of November 2011. And the criminal nation, the government of Belgium, tried to stop it. And we showed this power a week later by catching the American drone. This time we show the power of the technology as mass production. The political change with this technology is huge, and as now it's getting produced in different locations, it cannot be silenced, it's not killing a scientist and it stops.

(1:44)

And it'll change us, it'll bring that dimension of change. And it's how government will change, how governing will change. How do we pay taxes? Do we need to pay taxes? And you pay tax if you are a citizen of a nation. Now, you live on Mars or

a Moon or wherever you go. There's a huge change. You've got to understand, in the next 10 years, the way we release this technology, and millions of you know how to do things, if anything happens to me or around me, the technology has been set to be released internationally in a different way. We don't need governments to govern us, we govern ourselves without governments. And one of the most beautiful thing with this technology, which some of you might have understood and some of you haven't, is, we kill the greed and jealousy. It's because it satisfies the Soul and in a way it touches the emotion. The greed will come in how much more I can give, how much more I can serve, how many more people I can help with. And this will change a lot of things in you, all of you.

(1:46)

When there is no animosity, there is no jealousy. And you look at the hunger. I always looked at and always speak about it, but maybe you never understood, how much when you put that headphone at home. Jealousy, wanting what the neighbor had more, how can I have the best house, how I have the best car, will all be done. Because you found the best companion, which is your Soul, to satisfy all that. In the coming time, whatever you imagine you create, so you create to show to the others, I have better to serve you. Would you like to learn more? Maybe you can serve the others with it more. And that's how it's been the ethos of the Keshe Foundation. Now you understand what

we're coming to scientifically is what we taught for decades, as knowledge. The biggest gain for mankind is evolution in emotion. How you evolve. You are not jealous of what other one has, you don't want to have what other one has, because now you can create it yourself. Then, you don't commit a crime. Then you don't do things which is not there for you to be.

(1:48)

So there is no crime, no punishment, no... everything else is done by you. And this is the beauty of this system. I was telling one of our Knowledge Seekers, I've got the humanity by short and curly, if you understand the image. And you'll change. A lot of emotions in you become irrelevant. And then you find new dimensions, a lot of ?? things, which is the way of Mitra. Any other question? ... Q; ... I am glad to meet you again after so long. I was in holidays and I was not able to reach my Internet, where I have been there. My question of course is related to the conference for Peace with the ambassadors in London. Can you update me, because I am not updated, how is new and how I can help at the Soul level to be possible to have this? Thank you.

(1:50)

K- We talked about it at the beginning of the teaching, you can listen to it. It's all on the move and everything else with it, we'll go back to the Knowledge Seekers and the Universal Council and those who want to be part of it. To take, as I say, it's a "big carpet," organizing such organization,

such a meeting, to we as Knowledge Seekers collectively bring our people and technologies together, in London. Listen to the part of the teaching, you, I think you get more or less the whole what's going on. Thank you very much. Q: ... And I have another question related to this communication at the Soul level. That from the very beginning you, me, and other Knowledge Seekers we just communicated regarding the pandemic and the truth about this. I know from some information's that what we assume it is true, and what you teach us about this is perfectly true. Look, this is the proof that at the Soul level we can find and see the truth with the eyes of the Soul. This is my opinion about all what you teach today, as I learned from you.

(1:52)

And thank you very much, because you teach us how to find the truth. To communicate with our Source, this "bio Internet" of all the Souls. And your Unit, just put all of the planet together, in order to find the truth about our creation of the universe and creation of our selves. Thank you very much. K- Thank you very much. There's something I've been trying to tell you Knowledge Seekers for past few weeks and is partially irrelevant to what we do here, but can affect you without you knowing. Knowledge Seekers who we are in any shape or form, any shape or form, have transfer money, or travel to Turkey, and now United Arab Emirates has come under the same flag. Be very careful, as without us knowing as

citizens, governments in the background instead of calling it sanctions on Turkey like they did on Iran, they have created a network of sanctions. Which can effect you in even in your banking system and your travel and movement. At any cost avoid going to Turkey, or sending or receiving anything in a way with Turkey and United Arab Emirates.

(1:54)

You will understand where your problems starts. Up to now, on nations like Iran and North Korea and Venezuela, whatever, Americans brought open sanctions and we all knew. Now they have come up with a new technique and tactic. They cannot play with Turkey and the United Arab Emirates because a lot of things are happening in them, and NATO doesn't want to lose them, put them on this, what you call, a frying pan. Because Adaman (?? leader of Turkey) ?? will show them jumping with Chinese and the rest, the whole thing will go.

What we are asking or what we are informing you, because without us knowing Keshe Foundation was pulled into this. Absolutely without us having any clue, I never found out there's a new hidden, what we call, "blacklist." We're not talking about rumors. Keshe Foundation is badly and deeply affected by this. Avoid anything to do with the nation of Turkey and United Arab Emirates, traveling to or even going for holiday. Even the Chinese government would ask you, what's the reason you've gone to Turkey. And they can refuse you a visa. That extent is there. And as we all look after everything, everywhere else, just be aware.

And now United Arab Emirates has come under the same banner, hidden, because the reason for it is very simple. Turks in the United Emirates have hidden a lot of Russian money.

(1:56)

Or they do allow Russians to still carry on doing under the sanction. They can't put a sanction on them, because if they close the Straits, or what we call the "Moscow straits" with it, it can affect the economy of the West badly. Because we get a lot of Russian oils, or other countries on the banner of Russian oils. As they're running it, as I said, 50%, 60% of the oil jet fuels run by British airways, is Russian boat on the flag of India. So now we understand. Please be safe. And unknowingly, don't get caught in these hidden sanctions. Do not send any money in any shape or form to Turkey. Do not travel to Turkey. If you are planning to travel to other... Especially if you are coming to the Beijing conference, you will find out, maybe your visa will be refused.

And, the same is with Dubai, United Arab Emirates. It's become a central of fraud, money laundering, and the rest of it, and now, the sanctions have come out in a very hidden way, but not trying to shake their boats, as they call it. Any other question? Q: ... Is CO₂ and CH₃ plasma ionized? And what kind of fields do they exhibit?

(1:58)

K- I can answer you in a very simple question. There is no ionization in Plasma. Next question. R: There's no ionization in plasma? K- Yeah. Q: ...

Will the plasma technology, as a knowledge and technology, be used to accommodate other creatures in the universe, who would like to visit Earth, in the grand scheme of things? K- Partially, they already use it, we are behind. And secondly, it's part of the natural process of the universe. We've been using it, but we didn't know. We call it, "it was a dream, and coincidentally I thought, I was just thinking about it," these are all the ways we deny the truth about the plasma of our own Soul, and it's interactions. Now we don't call it that, now we call it a new plasma communication. We are the late comers, and we still think we are the first. Have you ever tried to get to a lecture, and you think, "oh, I'm going to go with the first and get the best seat, because I want to listen to this lecture." And you go about 20 minutes early, you find out you're the last person, everybody else has thought the same, they came in at 7 o'clock in the morning and sat in their seat.

(2:00)

And that's the story of man. If they're here amongst us, and if you're within them, and they manage to hide themselves well within us, I might go ?? over some ?? time. And so, you think you're the first one knowing about the plasma?

Transmutation through the Soul, is the new knowledge of the universe. Transmutation and transferring through physicality, is a different dimension, which is all been there, available. And it's a very big difference, in being able to transmute, than to be transferred. Any other

question? Q: ... Hello Mr. Keshe, thank you for your previous answer about reincarnation and our fate after physical death. I would like to continue to ask, what is the fate of those who do evil and deceive others, after their physical death? K- Find the dust, you've got the answer. R: Sorry, could you say that again?

(2:02)

K- I said, find the space dust, then you find your answer. R: Oh, space dust, yes, okay. Q: ... And beings like you, who can keep memory and knowledge of the universe, and are willing to help other Souls elevating, were they born by transmutating into their mother's womb? K- I would like to keep that out of the ?? line. One day mankind knows where we come from and who we are. There is a state of physicality and there is a state of Soul. And as I said, even if you listen to the teachings, you know when the Soul of the knowledge speaks and when the man speaks. Any other question? R: Okay, let's see. K- Have we finished? R: No, there's a big package of questions in the Q&A that is, I'm not sure if you want to deal with it or not. Maybe you should have a look at them. There's several paragraphs of comment, questions and explanation of from Dirk Schemberg here, who says, "can you do me a favor and read this text after Mr. Keshe finishes his speech, because I'm in a noisy place." I can read it if you like, and you can stop me where you want. K- Where is the Q&A?

(2:04)

<<< In this part Mr. Keshe tries to find where is the Q&A on his Zoom, but he was not able to find it. >>

(2:06)

K- ... Is there any other question than this, anywhere else? Q: ... Can you explain what voluntary attention is, and how it fits into the interactions of STM, STP and physicality. K- What is a voluntary attention? .. We deliberately try to pay attention to something? R: Yes,

(2:08)

I suppose it would be where we pay attention to the interactions between the STM, the STP, physicality and where we're consciously, voluntarily placing our attention, as opposed to random things that our attention might be caught up with normally. K- What do we do with it? I don't understand what's the question. R: One is asking what voluntary intention is, and how it fits into the interactions between the STM, STP... K- You're a master in the interpretation, .. R: I think it relates to consciousness and how, how can we consciously direct the interactions, you know, how do we find something common between the STM and the STP, so that they can communicate with each other, so they can have some sort of... K- We become naturally aware of it. It's a natural process, it's not teaching. It's a natural process. You'll find out your emotion, of physical, you're already aware of and then you ask yourself, how was I aware that this emotion will come. And then you

find out this is the emotion from the Soul. It's a very interesting point, I think we've spoken about this before. Like the way you say,

(2:10)

accidentally happened, and it ?? will come to it. But and the best word for it we deny the connection, the emotion, between the feeling of the Soul, and the feeling of the STP. The French have a beautiful word for it, they call it, déjà vu. But, we say, "I've been there, I felt this before." But in fact, that feeling is like, "I had a dream," and now we don't dream, it's a reality of the expansion of the Soul. Then, it's like say, "oh, I felt this and you talk about it now." Because, there is no talk with somebody else, it's within you, you realize the existence of two emotions inside you. And, French have this beautiful word which actually puts it in context of two emotions, which we denied one. We call it, déjà vu, but it's not ?? there. Now we found out our dream is a reality, but in dimension of energy. Now this déjà vu is the feeling of the emotion of our Soul with the emotion of physicality. It's just not coincidental, that now we recognize the other one. The way you tell your partner, I am just thinking to tell you this, and you said it. Or I'm thinking to do this, and you're doing it. You don't say anymore, because it becomes ridiculous. Oh, you're going crazy. You're just making it up. But inside you, you know, you knew the partner is going to do it. And you change your behavior. You know the partner is going to make a coffee,

(2:12)

you feel it, you don't say, "oh, I was thinking to making coffee" and you just come and make it. You go and get a cup and you put it in the front of her. She gives you a beautiful loving, looking, "how did you know?" And then it becomes closer. We have the same in our emotion of the Soul, and emotion of the physicality, and we always call it something, now we know it's you, it's us. And we don't deny it anymore, and we build it up, and we rely on one. I'm going to go, I don't need to ?? sneeze, as I said before, to stop. The Soul tells me, "just take time." And you ask the STP, "slow down this body, something's going to happen, at least we are not in it." Any other question? Q: ... About the fields of the Soul and the P test. Can you tell us a little more about the different fields which are measured? K- We... we... A system has been built, we look at a lot of things. In a way, there are 12 factors in this structure. In combination of different ones, with different interactions we see. Tomorrow's session, with the what you call, the testing with those of you who come in with a test on your, what I call, "diabetic of love," put it that way. We'll see, you measure it and you tell us.

(2:14)

In the last session last Friday was very amazing. We saw, and during the, or the end of the session, I could see two of the participants have cancer, or condition of pre-cancer, or condition of pre-cancer, which hasn't shown itself. And I said, two of you participants will see in condition of cancer. And

strange enough, after the teaching, we received, as people were supposed to communicate with us, the confirmation of one of them. But very interesting thing, which I'll discuss with the Knowledge Seekers tomorrow in the second session, is some of you saw elevation in the pH, and some of you saw a drop in the pH. Those of you who saw elevation in pH, going above 7, shows, and it's 7 and it goes to 7 – 8. It shows a movement up, which is need of change of salinity and what we call, manifestation of physicality. Some of you who saw it going down, you actually got a blood pressure, a hidden blood pressure or a blood pressure. It's not that, because you didn't see elevation, you saw reduction. You do not understand the interpretation of the data and we deliberately kept this away, that people don't think they have to show. The only thing they knew, they wanted to see if the, what you call it,

(2:16)

salinity went up and it works. We were looking at much, as was the question said, but if you go down, high salinity is the underneath cause of high blood pressure and many, many diseases. Those of you who saw, no, I didn't go up and I went down, it was a hidden question for us to see your health condition. And when you reduce salinity, you reduce blood pressure, you reduce a lot of other things inside the body. And this was the purpose. And as usual, because we have to tell you what we are doing, you get a piece of mind of this. But, in a way, we didn't tell you the other half of the story.

Because you can have a pre-set mind. And the same is with tomorrow. Tomorrow's session with the, what we call, sugar level, or insulin level, has two or three hidden data for us. If you noticed last time, we just pumped you with material. You didn't do anything. When I switch your microphones off and keep you off the line, is when we are feeding you. When you're taking from us what you need. It's not just for the... it's a one way. Our microphone to you is open. If you look at the list of panelists, you see certain unit numbers as unit 1, 2, 3, 4. We are operating in the background through units to interact with your Soul.

(2:18)

And this gives us a data. And those of you who were in Manchester with me, I showed the data of you lot directly. And those of you who participated in the last Monday session, and to see the print of your Soul, you received it. And you know, you see it, but just don't look at the line you're interested. We're interested to see exactly what happens, how much you're taking from our units, how much you're giving back to our units, what change it brings, how balanced is between your left lobe and the right lobe, how balanced is between your back of your head and your front of your head. How much you have control of the feeding of your Soul. These graphs, to you, even to our people who work on it, don't understand. It's a threedimensional structure of your Soul when I look at it. Because the system is set up that way.

We see a three-dimensional, and how you separated the front lobe from the back lobe, how you separated the Souls from each other, how you're feeding your Soul, how much you're taking from the environment, and how much you are giving to environment. And this is a part of the process. The technology is so complete. When our people put this system together, my Soul is there. Even they think they are putting, adding something, because I'm there. It's their hand, but my Soul.

(2:20)

We are there to create a system to change humanity. And there cannot be any mistake in it. And masters never leave the classroom, till the last children understood and left. So, when you see how we operate, how we sit in the systems, we collect a lot of data. It tells me how perfect, efficient it is. The system you get in is, it has a control, full understanding of your Soul and your brain, we call it. And the system is structured at the same time to have a full control between your physicality and your Soul. It's built that way. So, when you look at the graph, you just see the lines. When I look at the graph, I see how much balance is between the front and the back, to the sides, and in a way, to the dimension of your Soul. How my system interacts with your interactions. And then we have a system which is North Pole, South Pole, physicality and emotion. And I look at that. You're just interested in that line of, "oh, my Soul is separated from my physicality." But I look how

much you've taken from me to get there. What is my system telling me in compared to your system, to your physicality? I saw in the teachings in Manchester.

(2:22)

There were two people, they are not from our source, they are not from Earth. And I told them. I always say this, because it's like they send a representative to be amongst us to make sure humans don't go wrong with these teachings. If you were in Italy in the conference with us, I said, there is somebody here, not from us, and this woman who thought she's very clever, she stood up and says, "it's me." And the actual physicality was manifested in a body of the man, got up, looked at me and said goodbye and he left, and left. This is how the structure sits. It'll take men thousands of years to understand this central unit we've built and how it works. And the beauty of it is, no one can hack it. If you can hack that, you can hack God. And nobody has hacked God yet. Even billions of creatures around the universe have tried it, to find a shortcut to get to Him. Any other question? Q: ... We have a lot of water on the property,

(2:24)

that always stands on the property for a long time after extensive rain. Is there a possibility to solve this problem with plasma technology? Thank you very much for your answer. K- Drain the drainage system in there. R: Okay. You can be quite physical with that one. K- Physical thing, that's the

matter state. Unless you can find the Soul of the water and get them moved. In a recent trials with the Chinese military, we have shown the power of production of water and rain, and change of climate. It's actually recorded by them. And we did this with our beautiful Knowledge Seeker in South China Sea in Sanya, 4 or 5 years ago. He said every time, I put this 4 times, the power jumps. And the last time we did it together, setting up the flight system, it jumped. This time what it caused a huge damage. And this is part of the structure. Can you transfer water out? And can you create something, not water. Something very interesting, which it will be shown in London, in the exhibition with the governments on Saturday night. Many of you have asked us for fire system, to extinguish fires. This system in a way will be shown in London.

(2:26)

We have understood the work of this planet. Water, the wind and fire. And you will feel this on the 11th. You will feel the wind, you will feel the water, and the fire comes in the shape of the knowledge of man. You'll understand when you're there. So, try to find another way, if you can put massive fire forests out. What you can do with the rains on the ground? It should be able to be moved, but you have to find the Soul of it. Or change your, what you call it, I think it's usually alkaline land which holds water, if I'm correct. In the inner Mongolia, the land, the topsoil, is so alkaline and so high in salinity, that it's very hard

for things to grow. In about 30 centimeter, 50 centimeter below surface, if you find water it's sweet. And they were asking us, how can we change the topsoil? But the reality is, as Knowledge Seekers you know, without that filter of salinity,

(2:28)

you will not get the sweet water. Unless you change the climate. And the minute you change the climate, that sweet water becomes salty water, because the salt which is gathered in the layers over centuries and thousands of years, will wash into the water underneath. And the more it rains, the more salt you collect. And as practical Knowledge Seekers, some of you who made the Gans production, you've seen that salt on your wires, coming out of the water and everywhere else. Any other question? Q: ... In past teachings you have explained that our body works on a flow of DC plasma. Is it this flow that feeds the Calcium strength to create the cage for the Soul, which comes through the blood, which carries the strength of the MaGravs fields of the Earth? Can we say that to invert the fields, so that the Soul expands beyond physicality, would be to plant a seed of emotion in the Soul, and feed that seed with a deep inspiration or an accelerated rhythm, which creates the speed for conversion or separation? K- I answer you in a very, very simple way.

(2:30)

Get yourself a battery, and you always put it on a DC, and see how much voltage you have left, or how much power is left. Turn the switch to AC, and you see there is an AC in DC system. So, in the body of the man, we work on a DC, but the existence of matter state, conversion of fields, creates that AC. And that conversion of the AC is the creator of the basis for the creation of the heartbeat of the man. But, as it creates a heartbeat, it brings a lot of other changes in the physical dimension. If you want a good plant, you see yourself ?? a good seed. If you want to have a perfect, perfect life, as a human race, as a human being, the seed of every cell of the body of the man is a Calcium. You have to have, to create, to absorb, to intake a perfect Calcium, that when it becomes in field strength, the seed of the, what you call, the cell of the body of the man, the essence of his creation, is perfect. We always look, as I always say, into the back accident. You know, you have a car, you crash it, you take it to repair, you bring it back,

(2:32)

and you take it back in the garage, again as I said many times. But, you don't look that the brakes don't work, to change the brake. You put a good brake in, that you have a good system. The backbone of all disease of the man, irrespective of from cancer, to Alzheimer's, to everything else, is the wrong strength field of Calcium. If man one day understands that every cell of his body is, has

a Calcium seed as a center of gravity to hold on to the amino acid (AA), and perfect the "art of production" of Calcium in the body of the man, and is the intake, man will never go sick, in any shape or form. Because the seed is not of the good quality, he ends up with everything else, which then it can be affected by emotion and the rest. Why some people never get cancer? Why some people never go sick? Because the Calcium seed of their body, the production of it, is perfect. Till they hit an illness or something, they create a disbalance and then you find them, they take a "nose dive." Because now, imperfection has come in. So, the cornerstone of every life on this planet, is the seed of his physicality which is Calcium. Then you understand the rest of what it needs to be done,

(2:34)

to have a perfect life. And we've seen that when it goes wrong, viruses like Corona, which is a Calcium based, matching the same, creates mayhem. Shall we call it a day? Or do you still want to go? You had a big question. R: I sorted out some of that and most of it was a comment about his life and who he is and who he claims to be and so on. So, I think we're okay with that. And we're pretty much through the other questions I believe. There might be one or two left but I think you've done quite well. K- Thank you very much. R: So, would you like to... K- .. Shall we wrap it up? I hope I carried enough information to you. Please make your way to London. Those of you who can,

and we might increase the capacity. Because it has to be understood. In the coming days, world press will be brought in and we go through by showing and not talking, that we bring in the change. As I said, we had a kind generosity of a Knowledge Seeker and as usual, Keshe Foundation passes on to. Those of you who thought the 10,000 was too much,

(2:36)

we have brought in part of the, what you call it, to help out with the donation

we received, to help you to be able to be there.

And if there are any other Knowledge Seekers who would like to do this, to nominate or pay for the others to be there, that's their financially, well off, that the knowledge can be shared, by those who cannot afford to be there physically. Because the Soul will carry it on, you can still do the same thing with the Foundation. You tell us how many and which sessions you want and we have a large number of people in, we know we can invite or make it available to everybody to be equal, to be there. Something very important, on Saturday night, please try to dress (up) to meet the ambassadors. Don't come with boots and whatever. It's an official meeting, it's a respectful meeting. We don't put a dress code on, but you understand at these levels, the Knowledge Seekers cannot be "rift raft" as they call it in English. The sharing the knowledge has to go to ?? of man, as long as the man looks through the eye of the man. Thank you

very much for today and we hope we see you next week. Thank you very much Rick.

503 KSW Sept 14, 2023 END
