Part 1

(:11) K- Thank you very much. Good morning, good afternoon, good day to you, as usual, wherever and whatever you listen to these series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. We are back to learn more about ourselves than anything else. Where we came from, where we are going to, and what is happening to us while we are here. In the past few months and past recent time I've been pondering on why mankind has a problem to understand the Plasma Technology.

(:12) Where is the mindset that has brought this about and how man cannot see the, what I call, beyond the horizon of his life, of live life, and living. In a way the biggest problem for man, as I said many times, man is know in the Space as the "four wheelers". As a 'wheeler nation we are used to cart wheels, we are used to the wheels of the cars, and we see, and have seen and observed it as to be a process of a motion where we gain direction, and we can go in that way. Unless we turn the wheel a little bit to the left or the right we change direction. And making a, what I call, a circle on the top of the wheel of the circle, what we call, our technologies, be it the car, be it the cart, be it the wheel itself, we can't do much different. And this where the difference between the mankind and the rest of the Universal Community comes. And changing this "four wheeler", thinking about the wheel, to become the, what I call, the Universal Passengers, or

people who understand the work of the Universe, where it works on a sphere. To change a man to think in a spherical shape, spherical dimension, being able to move on a ball than on the wheel, is the biggest problem for man to understand this new chapter in the knowledge of the man.

(:14) How long will take us to change the understanding of the man from a 'wheeler' to a sphere, it will be the time needed for the man to mature. Those who can think as a sphere, then they can see the path to what I call, direction for the Universal life. Even those of you who sits, or think, or see a ball, a light in the phases of the teachings, or the tests we do, you always see, most of you see as a light in front of you, as a shining light. But you never see it, or some of you don't see it, as a rotating sphere. You see a wheel rotating on its axis, but you can't see the light to be rotating on its axis in the spherical shape. How long it will take me and the rest of what I call, knowledgeable people to change man from the two dimensions of the one direction of the sphere, to three dimensional rotation in the, what I call, life from the rotational direction from the wheel, that is the 'Hercules' job. This is why most of you as Knowledge Seekers (KS), and most of you who come in touch with this Technology (T) of the Creation, have a problem.

(:16) You are able to stop a wheel with a break, with whatever, but you cannot stop a sphere to rotate as a plasma. And if you speak to the man of the Universe

(U), understanding this, they laugh of the whole condition situation and the dilemma that the man got himself into. We are puzzled when we see rotating firing work in, what I call, in circle in the Chinese firework. How the light flashes and what it goes. But if we change it that it goes in another direction, we are in a big dilemma. But in fact when the sphere is in that spherical shape of that firework, we see the firework coming from one end of the wheel to the other and rotate, now you have this firework in every direction on the sphere of, what I call, a plasma, what you see as a light. How long will it take me to get you to see the rays coming from a sphere, and not from, what I call, a wheel circular shape, that is the time that will take for the man to mature. In a way, if you look at it man is two dimensional, in thinking, understanding and structure of the work of its own Soul. Where he has to become 3 dimensional in the spherical shape. We look on how this sphere, this creation of light, this creation of life, could be rotating as a ball, and emits light.

(:18) The biggest problem we have, even we look at the sun, which is another, what I call, Soul, from Earth, we primarily see it in a flat two dimensional. That is why we cannot change our mind. The mindset, the understanding to look at the ball, at the sphere, is three dimensional. Because of our vision we see it, more or less at two dimension. A flat circle we call it the sun. We don't see the sun as a sphere, as a ball. And if we do, if we can reach that point of working with

a sphere of light, of energy, man will change the course of the history of himself and humanity. Changing man from a 'wheeler' life, to a sphere life, is one of the biggest challenges. Past few days in meetings with eminent scientists and some engineers and the rest, I tried to understand if they see the difference. But for them, even been so called, 'titled,' this was something unimaginable. And I see them laughing. In a way, they laugh at their own lack of knowledge of understanding about their own creation. And this is where more most of you as KS have run into problem when we speak about the plasma, (:20) when we speak about the dimension and direction in the structure of the life of the man. Somehow we have to bring this into vision of the man, to feel the life of itself as a sphere structure, and not as a two dimensional structure, when it comes to his Soul. Then, you can decide the direction, you decide which strength you want the fields to come to you, or you send the fields out, in the dimension of the full structure of 360 degrees, not a flat 180. Then, if you can reach that point, then you see interaction of different fields, then you'll see interaction of different, what we call, strength, then you understand the ray which is coming from the South Pole, most probably is already connected to another field of the North Pole, and is not on the same side as they've drawn it and we've seen it, and then it's connected to another field of the strength, with another sphere and the rest of it. Other problems which you have as Knowledge

Seekers, and is becoming more and more clear over past years, is that you have learned to burn fuel, you have learned to do work, to achieve the circulation of this wheel,

(:22) that allows you to move in one track direction, unless you put an ax (axis) on it and change it, that it can change its direction, and still needs another spherical rotation to come back to the same point. But, this does not happen when it comes to the sphere shape of your Soul, sphere shape of the work of the Universe. And this we see, especially when it comes to our scientists, on the edge of their claim to knowledge, to understand, whatever narrow-minded they are. The biggest problem for you Knowledge Seekers, is to understand the straight line rotation, according to the direction of the, what we call, axis of the wheel, does not apply when it comes to the spherical shape of the Soul of the Man (STM), the work of the Universe and the rest. You cannot jump with a wheel up, because when it's in the air, it does not have a, what I call, direction on the surface, that it can, allows it to jump forward. You have not made much difference, even when you make a jet engines. You know, the jet engines are still another fast wheeler rotation, but a combination of passing something through it. The turbine is nothing but a flat wheeler, but with different shape of many together. And if Man understand this, then you understand, when it comes to the spherical shape, you do not need contraction,

(:24) you don't need to be connected, because as a Plasma Field, you are hanging all the time in the air, you are hanging in the sphere of the Field connection with the others, which they really perk you up. For a wheel to show, needs to be connected to a source. You call it an engine, you call it whatever. In the spherical shape of the plasma, you don't need that. You are hung in the middle. And to be hung in the middle, you need to have many fields, that does not allow you to move in any direction, but rotating where you are. If one of the fields become slightly weaker, or one become slightly stronger, the whole structure has to agree with the movement, and the new position, and the direction. Then, it comes what we call the Emotion and Intention. In the structure of the matterstate wheel, you need engine and then a wheel to change direction in the motion. In the spherical shape STM, is your Intention and Emotion which drives this system. By taking strength from a field, or giving strength from the... to the field, from other sources within the strength. If I could get you Knowledge Seekers, and Mankind to think in a spherical shape, and understanding it, then all of you can transmute. All of you will see the balance,

(:26) where it is the intention and emotion for you to gain direction, to go to, to come back from. As the old children's song says, "The wheel of the bus goes round and round." The wheel of the Universe rotates on its axis. It goes round in circular and spherical shape, in all directions and dimensions, and not only

on one direction as the wheel goes on 'the bus.' And what mankind needs to understand, is the working of the plasma. Understanding even he walks on this planet, the STM in the center of his brain, is hanging on, is not attached to himself, to the physicality (P) of the man. Then mankind will come to understand the process of life, the way man is in the Universe.

Attachment comes by walking this Earth. Detachment comes when you are the Soul within this body, which you have no physical contact with. There is no umbilical cord between the STM and the brain of the man. Then you understand, partially your physical brain is containing this field, and partially the fields of the Universe are hanging it in there. You're just providing close protection.

(:28) The rest of it is still connected to the Universe. Then this will bring a lot of new dimensions (D) of understanding. For example, what happens when you go to another dimension, to another position in Universe, and Calcium does not exist? The field strength of the Calcium in this environment does not exist. The field strength of the Calcium in the Solar System is part of its inherent structure, but not necessarily to the next Solar System to us. What happened when you land there, and you want to stay in the body of the man, unfortunately, you'll be a bunch of jelly on the floor. There is no containment of the brain with the skull, there is no bone structure. And what happen when you go to a structure in the Universe, where Calcium is the, what we call, the iron

of this planet, it's the main backbone structure of the fields. We know this, what happened to us. We saw it with Covid-19. Calcification of the energy of the Universe in the body of the man, we saw how body 'choked up,' we saw how everything else became a bone. It's the first time we've seen, we had the technology to observe, the movement, the change of the fields, the matter state within the structure of the body of the man. And if you understood,

(:30) you took the Cup 1 or Cup 2, whatever, you strengthen the Soul, you changed the condition of the fields of the body of the man, and you said, "I owe the Cup 1, Cup 2, save Cups", because it's not a Cup, it's the energy which you change in the structure of the body, that the level change from Calcification to a normal condition. Again, part of that structure came through the, what we call, the field strength of the STM, working 3-dimensional, detached from the physicality of the man. The STM is a spherical shape, lives within your brain, has no physical connection to your body, but hangs in the middle and controls your life. Unfortunately, it does not have a directional rotating leg of the man to go one way or another, and the shape of the skull of the man, the shape of the brain of the man, decides how it hangs through the fields, or what we call, encagement of the fields of the brain of the man. Then you understand how easily, once this encagement, once the cage magnetic field strength disappears, this thing now hangs to what it was connected beyond to the magnetic field of the

Universe. And at that point, this, what I call, spider web of the fields of the Universe, will spring it to where it'll find the balance, and where the STM will manifest itself as a seed of another life, as a star, as a star connection and a star ??.

(:32) In a way, the STM, being a spherical shape, does not work the real shape, is hung in the center of the brain of the man, by magnetic field pressures, which nowadays you call it whatever, 'Tokomak' and the rest you see in how it could look, but it has two different sets of attachments of the fields to its structure. Near interaction fields, which is created by the brain and the blood flow magnetic field, which holds it in this position, and when this weakens, at the point of what you call, transmutation if you decide, or at the point of death, which is the separation comes, there is no more containment, the cage breaks, the bird is free, the other strings which were connected to it, in the higher field of strength, holding it and connecting it to this, what we call, the rest of the Universe, then they decide on which way, and where this ball, this Soul, this spherical shape of energy, will land and become its new home. That tulips, that onion, has no choice, because you ?? brought this in your pocket, it's you who decides as the external force, while it's still life living inside it, I'm going to plant it in a pot, I'm going to keep it in the freezer till next year, I'm going to put it in the garden.

(:34) You make the decision about that tulip ball, because field forces of your imagination, and

dimension and direction, decides the life of that ball. If in the case of your life, that ball, that spherical dimensional thing you call your Soul, once it's in the hand of the shopkeeper, once it's in the hand of the place, where it was placed and kept, as a ball, as a flower, now is decided by you, you are that outside field, which decides the next step, where it will land, according to your wishes, according to what was set by your imagination to be. Now you understand, even at that point, you have to reach the point of destination. The, what I call, the strings of the fields of the Universe, provides you direction. It's the energy within the Soul, which you gathered, decides the dimension, and decides in how to get to that direction, which is, in a way, is a balanced field, for the rest of your life, in the dimension of the STM, not the physicality of the man. Then, you have to understand, step by step, in understanding the Totality, you understand, all those fields, which still dictate, in a way, you're hanging on it, which gives you to the direction and dimension, where to be, the next step, that's where it's allocated for your Soul to create a life. (:36) The next cycle of a star, to create another dimension of life, still fields which come from the strength field of the Creator. So, he puts the seed in the womb of the mother, nourishes the Soul, and now it's time, in the hand of the Creator, which the field which was created by it, from it, through it, decides where this ball is going to be planted. Then, mankind understands. Still to get there, you are a spherical

shape, and there are no wheels. And, if I could get mankind to understand this, 99% of the problem, in handling it, in understanding their own existence, and the direction and the dimension, shall be done. In the coming weeks, as we go into the sessions of July, August, September, in sessions, I'll try to create for you to see, how, where, and the way your Soul is hanging in the Universal field dimension, and as a backup, or as a hidden strings you're hanging on it, than the structure of the magnetic fields of the brain of the man. We show you new dimensions, that you decide which string and where you want to go, by what I call, the emotion.

(:38) You decide which string will take you in this direction, where at the point of death, your dimension and direction is pre-set, everything is going where you, the way you behaved, how many people you killed, how many people you loved, how many people you gave energy to, that you received from, dictates your position. Going to the center, to the love of the Creator, to be enlightened, from way on the edges of the doldrums of the life, when there is no light and you're there till one day, the Universe of our Creator has expanded, that you expand to see the better fields of, the dimension of, and the existence of ?? His existence. In a way, when we transmute you, you choose the string, from which part of the Universal strength you want to travel through. When you die in the physical dimension, it's already pre-set by your behavior, but how you want to collect it, what strength

you brought within, that it decides you're stronger, you can stand in the dimension of the fields of the Creator, you can interact with it, or you're in the back ?? ball taking the wind. And life of the man is nothing different by that. And one thing which is important for Knowledge Seekers and mankind to understand, you were hanging in the,

(:40) what I call, the fields of the brain of the man, for 70, 80, 50 years. The question for you is, how long you will hang in the new position? Or, what would be the, what I call, the 'contract of termination' of the next cycle of life? Or, do you become part of the bigger structure? Then you see the bigger dimension to the reality of the Creation and the Creator. Those who could imagine different levels of connection, I've called it different things, different levels of the, what I call, 'promotion of the Soul.' But in fact, those who were enlightened could see to understand the direction of the motion of the STM, and how according to the strength it collects the fields it does, it find its position. Then the question comes, what is the man fighting for? Do we fight for better clothes, bigger houses, and we do everything wrong in the dimension of physicality to get it, hidden to the others but planned in our thoughts, in our emotion? Or, do we plan to live in the dimension of the larger scale, where our destiny is decided by us and not at the point of death,

(:42) which is we come out of our own ?? function? If you understood this, I bring you a trigger point. I bring to you a new state of understanding. Does man need

to wait for the final call? Or now that you're knowledgeable, choose the point of transmutation, not to escape from this physical dimension, but take this physical dimension, where it does no wrong, that it find itself in what I call, dimension of perfection, that when that time comes, that the STM become to find new position, it finds itself amongst a higher strength, higher position, closer to the Creator, that it becomes part of the Creation itself. In a way, I have said many times, you always rain back to the ground. Would you be at the point where, due to choice, or what I call, the final call, you become that ?? wick, that it goes higher and higher and away from the Earth, from the Creator?

(:44) Or you gather enough, and that allows you to go back, to rain back on, and become part of the ocean of the Creation, in the dimension of the fields of the Universe? Those who choose, either way, will find out what they battled with, and what they have to live with, and how. And one thing is a ?? simple fact, if you've seen the atmosphere of the Earth, the vapor comes from one end, and it rains on the other side of the planet, there is no difference with that, and the STM, the Soul of all created things. We came from, and we go back to. We become that vapor, we go away, and we rain back on. We started as a dust, became a small planet in the far distance of this Solar System, and on the way back, we became the Earth, we created life, and we rain back in, to the mother, to the sun, in just a matter of time. And this shall be for the

STM. And if the man understands that he works in three-dimensional, and it's him who decides which direction and which strength. Maybe, as I always say, I opened your eyes to another dimension. In the upcoming times, we show you how you are connected, you are hanging in the, what I call,

(:46) the magnetic field of the brain of the man. We let you to see what is the attachment, when you can decide to connect to the fields beyond the physicality of the man, and find a new position. And then, even after that, your life in the time of the planet Earth, 70 years or whatever, is a drop in the ocean of the time life span of the Universe. And one thing is that, as everything is field connected, and you decide, or life, time saving of the fields on this planet, decides where your next position is, the question comes in a simple way. If you, and when you, are positioned in the new, by your own decision, or by the time lapse of the 'last bell' of the physical life, and you have to leave, and you find a new position, where you are hung by other fields, like a 'puppet on the string,' the question for you comes, and live 70 years, man time on this planet, maybe 7,000 years, in this new freedom of the position, or 7 billion years, or 70 billion years, the biggest question for you is, who's holding, who's controlling, the string which I attach to hanging in that 7 billion years?

(:48) Then you understand. Then at that point, there is a need for new knowledge, to understand that level of the Creation. In some books it's referred to as '7

valleys.' Man has not started, man is just seated in the valley, in the physical dimension of the number 1. And he has problem even with that, for thousands of years, to understand how the second level of the strings is holding on to. And when you get to that, outer limit of the last valley, who's holding on to that? Who's the dictator? Who's the controller of that? That you're still hanging within his grasp. And then if you understand this, you can travel the full span from 1 to 7, or you can spend, what I call, time to mature 70 years, 70 million years, and 7 billion years, and go from 1 to another. Or you can gather enough, but in an instance, you reach the end, to the last point.

Detachment by elevation of the fields of the Universe, not attachment to the matter state of this planet. And everything we do wrong, to take the last breath, it has to keep the Soul in prison, that we can physically control it. And in a way, subconsciously, we want to stay longer,

(:50) that it can keep our Soul in prison, in this, what we call, miserable life of this planet. This greenhouse that has become, what I call, the point where all the windows are broken, everything shattered, and there is no greenery for the STM to be in it, that it decides to break through it, what I call it, the point of death. The only thing which is on the table for the man, for the first time maybe, is option not to, option to be able to choose to, option to create a condition, that at the point of separation of physicality, be it in the physical dimension of the body of the man, in the dimension of

the, where the strings are holding to the STM, he has the choice, and not it's chosen for (him) to be (by someone else). And that's all the teachings are.

Transmutation of the STM, in the dimension of the emotion of the man, decided by the man, and not sentenced to, by those who control, or have control over it, in any dimension and any level. If you understand it, you do not need to be imprisoned, within the physical brain of the man, or attachment to the others, but connect yourself to the Soul of the Creator, to understand the strength of the beauty of his power, and be part of that process of Creation, where it's your field string, which holds many ?? souls ?? , hanging in the perfection,

(:52) and in the dimension of Creation. But this time the creation of the Creator, not creation as man on this planet. You have two choices, up to now you had none, you waited your time, retired and sat in the bed, when the day comes I go. This time you can decide, your physicality can be whatever I decide to take it with me. It's not, that I kill, I get rid of, instead I care for what gave me life, and I take it with me. That it does not suffer in the dimension of physicality of the life of the man. Even though, I can still exist, within the dimension of physical life of the man, within ?? it.

Today's understanding, is understanding about yourself, that how you transmute, up to now you didn't know, as I said many times. Now you know. Do you hang within the structure of the, ?? of the plasma of the brain of the man? Or you, in a way loosen the

knot, and go to the next step and hang, and be, in a way, embedded within the fields of the Universe. And, if you understand this, transmutation in three dimensional essence of the Totality, now is a reality and fact within the hand and the reach of the man. You have to choose, it's your option.

(:54) You will stay the same as your, what we call, forefathers, in the prison cage of the brain of the man, until you are kicked out, at the point of death, or, you decide the next step of it. I decide where this seed will grow, and how will grow, and I protect it within me. In a way there is no difference, between the life of the man, it's the STM, the ball, the life of the Sun, the life of this Galaxy, and the rest. It just depends where you want it to grow, and how you decide it to grow. I hope you Knowledge Seekers understand, what's on the table of the knowledge today. And I hope those of you who join us, in the third week of this month, will come to understand the ?? more . Freedom does not need to become on a piece of paper, for those who call themselves free man, in the city of ?? Ghents some hundred years ago. For those who call themselves Americans, and today is the day of freedom, and actual slavery, to ?? another nation. Even they thought they got freed, but they walked themselves in a bigger trap, as they chose the wrong way. Those of you who are American, you call it today the 4th of July, but in fact, you chose the wrong direction, your ancestors did by walking from one thing to another, in

a bigger dimension of freedom, but it, in a way, the fields of interaction, created new dimension.

(:56) Another slavery of the man, by another man, on the title of the freedom. And I hope, mankind does not make the same mistakes with his Soul. And there are no treaties between the man and his Creator, to find freedom. But, its own interaction and dimension of the fields, and own interaction dimension of his emotion. That, in a way, brings an intention to what, and where, and how. And if you understand this, you understand more about your life, and how you need to do. To think three-dimensional, to think, I'm not attached on one string, but I'm attached in every point, to every string in the Universe. One is connected to the mother, and one connected to another. It's me who decides, I go to the mother, or I go to the other. And how often I visit the mother, because up to now, it wasn't my choice. My wish was to see my mother for past 20 years, I never got there, because I didn't know, it's me who decides, for the expansion of my Soul. In fact, the mother has always been there, even ?? though it has not been in the dimension of physicality. I hope you understand the essence, and not the words of the teaching of today. And if you understood that, you have matured yourself to the next level of life. In the world of the Creation,

(:58) and does not mean that you have to end the life in the dimension of the physicality of the man. But it gives you access to live in both dimension, and understand the Totality of it. When you understand the

truth about yourself, and the fields within, I hope, you've seen the 'bigger picture.' And you understand, man does not need to be a wheeler, but he can be a sphere, and finds a new dimension in the world of Creation. Rick, if you can take us for a break, and we come back, and hopefully, we'll be able to enlighten each other.

>> BREAK >> 545 KSW July 5, 2024

Part 2

(1:03). K- Thank you very much, as usual, yes. We always have something to say, otherwise we wouldn't be in here for past, God knows, 10 years.

(1:04) Please, those of you who are in, I've seen a number of you enrolling for the monthly sessions. We still need you to state the time and the place.

Otherwise, you'll find that when the time comes, we don't know where to fit you. And then, somehow you'll end up with those who are asleep time, and you hear a lot of snoring, because it's not their time, or your time. Please state to us where and how. And, we'll try to link you up. And do not worry about it, but decisions start getting very interesting with those of you who actually have reached, or can reach the dimension of what we call, transmutation. And, it'll become one of the essence of part of this work. In the next few

weeks, as we develop new systems and new technologies, we'll put another week, or a Thursday session, where all of the Knowledge Seekers can participate. But this time the job is not to participate, to be. It's for us to elevate the Soul of all of you in that process. To create a new cycle, a new generation of life. And, I'm looking forward for that, as we come to, to that phase of the, what we call, completion of the work. I'll explain the reason why we do this in the coming time. But, one of these days, very soon, will be another open teaching, open work,

(1:06) of connecting the Knowledge Seekers. The last time we had 300 odd people. And, this time we'll touch your Soul. We'll bring your Soul to be involved in the dimension of the connection with the system. That we start the next cycle of what we call, teachings worldwide. And I hope, those of you who join us in that session, you'll enjoy it, because, it'll be an experience you'll never forget. And, it's as part of what we call, we used to do, the Blueprint. We'll do the Blueprint of the travel of the STM. And, I'm sure many of you will enjoy that trip. You don't need to sign (up) for it, you don't need to register for it. When our systems are ready, we'll bring you into play with it, and understand about your Soul. Are there any questions? We'll try to answer. Q: ... Good morning Mr. Keshe, could you draw, or give a visual representation of the teaching today? Understanding of the wheel, two dimensions, and spherical, three dimensions, especially the direction of their fields. Is that something you would

like to take on, or... K- Yes, yes, I was thinking about to do that, during the teaching, but I thought, you as Knowledge Seekers are wise enough to see it.

(1:08) (Let's see if this thing works...) If this is the brain of the man, in a way, and if this is the position of the STM, there is a womb of the Soul, I call it, this spherical shape gap, which is created by the interaction between the fields, of what we call the brain, or physical matter state, and other physical matter states beyond the physicality, and the fields, from inside out. In position and understanding of physical, this is two dimension. You have to realize, this is, in a way, another field to it. It's three dimension, and unfortunately, this thing has a connection to the Gravitational Magnetic field of the man, and with it, to stabilize itself, it has created a connection to it, we call the spinal cord, and we see the shape. The other half of this sphere, to make a full circle of the brain of the man, has been used for vision, and everything else,

(1:10) that this guy gets his fields continuously. This is why, when they stick their... When you block the breathing, you die so fast, because this thing directly, continuously, takes energy to keep position. The death doesn't come by suffocation, the separation comes at the point, that no fields reaches to create the balance, to hold on the balance. And, as you travel in the three dimensional, at the time of the death, in a way, this disappears (the physical brain). Now you are in the hand of the fields of the Universe. Now you are

detached from, and there is no dimensional control. Now you are passengers of the Totality, in both dimensions and both directions. But, in reality, now, you are in a bigger structure control of the fields. You have changed from the prison of the STM, in this house, in the physical brain of the man, to be hanging in no dimension, dimension of the Universe. Where the field forces, at the time of the separation from the physicality, decides where will be your next destination, to grow, ready for expansion, to and ready for the next field generations,

(1:12) which you are hung on again and you did not know, even at the time, where in the physicality of the man. It's like an onion, growing from inside out, you get to the next shell, and the next shell, and that bigger shell, which is beyond this shell, is a shell of what we call the Creation. And then you'll understand, you come back into the circle of where you've been, and where you started from. That's how simple it is. The cycle of life, not in a physical dimension of the man, but in the field dimension of the Creation of the Universe. Your cycle of life on this planet, was restricted by the brain of the man. Where your cycle of life in the Universe, has become part of a bigger structure. But here, you were just a dot, in the physical structure of the body of the man. Here, you become part of the Universe, which embraces the Totality of what is within it. And this is in a way, if you understand what it says, "I come from and go back to." Either way,

is true. You come from the Creator, in a cycle of physicality,

(1:14) and you go back to become the Creator.

Created out of creation of myself. And, this is what life is, in a bigger dimension of the Creation. We just keep on changing, to the bigger dimension. And, in a way, if you look at it, till we have no strings attached, and then we become truly ?? attached, from the Totality.

Where, in a way, we are the beginning, and we are the end. Come from, and go back to. Then, what are we fighting for? Any other question? Q: ... Hello Mr.

Keshe, good afternoon. It's still morning here in the US. As you taught this morning, the difference between waiting to die, and you've taught us when we die, that the Soul of the Physicality (STP), right at the point of transition, it gives all its energy to the STM, and it departs. However, in transmutation, you have taught us that it's the interaction between the STP, and the STM, that allows us to have the freedom, (1:16) to go and to transmute, and to do many things in the Universe. So, what I was thinking, and I'm wondering if this is correct, is, is it the actual inclusion of the STM, as a strength of its own, that gives the man this freedom, rather than just losing all its power to the Soul, where its fate is dictated? K- It's a little bit of both, and none of all of it ... It's, in a way, you want to be driven, or you want to be the driver. When you're a Soul, within the physicality of the man, you're driven. And you have to follow, you can't jump out of the position of your, what I call, cage. When you drive,

you decide where that physicality goes to. And man has that freedom now, through technological development, understanding of the, what we call, physical matter. If you go back into the history of the man, maybe some of those who were Messengers of their own village, or ?? they were enlightened, of their own town, their own cities, they could only pass the message as long as their voice could go. As long as they could walk to see others,

(1:18) to teach, to share knowledge. Now, with a present communication system, we can reach everyone, on every point. And this makes it easier to enlighten more people. And this is why, when I teach, I say, we teach in the voice of the man, for the whole Universe to be taught. As we teach at the level of the Soul of the Creator (STC), not the physicality of the voice of the man. And this is what we call, the whole Universe enlightens. It's not just privileging a few we call, humans, into the detriment of the others, as ?? for their right, they think they are very special. But, when we teach, it's like, you are in the classroom, and your classmates who are sick, sits on the, what I call, Zoom line, in their bed, or his bed, and watches the teaching. Does not need to be present in the classroom. The classroom of today is the planet Earth, and the rest of the citizens of the Universe are those who are at home. Elevating the knowledge of their Soul, through the love of the Creator, the voice of the teacher. Through the STM, through the Soul of the Creation. Then, if you understand this, we now have

the freedom, to be in the classroom, or to go for a week vacation, or what we call, choose. I'll still be connected, I'll still learn the knowledge, but I'll do it from another part of the world, than being in, sitting in the classroom. And that's all, the only difference is, man has always had the freedom.

(1:20) Those who enlightened, according to their time and place, they enlightened their village, their tribe, the city, and whatever. Now, the teaching is Universal. And this is one of the reasons we created Universal Council. Man will understand the, what I call, the gift to humanity, by setting up the structure of Universal Council, and its members. You have not even understood the work of it. And this is part of, when you say you have a teacher and too many students, other students help to teach those who are not ready, and that's the job of the Universal Council. And this is part of the structure of the elevation of the Soul of the Universe, and not the man only. And, now you have the option, as I said, to stay in the class, or to move in the far distances of your choice to live. And you have a freedom, you don't need to be connected. And you don't need to be part of 'jammed in.' I was explaining this recently in the middle of the Knowledge Seekers. The beauty with this technology, when you put it in the physical dimension, when you produce your own MaGrav, your own energy, your own food, your own through the fields of the Universe, you do not need to sit within the cramped cities and live. If you understand transmutation, you can live on top of

Mount Everest, in the most luxurious freedom of the Soul,

(1:22) then go to work in New York or Washington, or London, or Paris, because you can transmute. It's very much what I call, European prison sentence. In some of the European countries, when you do something wrong, you don't become a burden on the nation. You work 9 to 5, 5 o'clock, you report back to prison, the same prison, you don't have the freedom to go to the restaurant and the rest. But you're still free to come and go. And now, that 'free jail' card is given to the man, but man has to use it, has to understand how to use it, and use it correctly.

Because in the time to come, you'll understand. While you're out of prison, (if) you do wrong, you'll find you .. ?? will not find your way back home, just because you learned how to do it, you'll lose your way to it. And this is where it comes to the 3 Ethos of Mitra. To do good, to act good and to think good, is the path to your own home. When you do one wrong, you lose the path and you lose the home. It's the fear of losing the love, then the fear of losing the life. And the love always rule.

Being able to give, gives a man a destination of the time and place. And life does not need to come to an end, by end of a breath, or a beat of the heart. This is what you got to understand, and this is the, what we call, the cornerstone of the teaching.

(1:24) You are given the chance, you're given the 'jail free' card, you can lose it as fast as you earn it. I always said, and that, what we call, when a man

forgets on this planet, he forgets about the son, the daughter, and where it lives. When a man forgets in dimension of the Universe, he loses his path to his Creator. And I prepared (preferred) to have Alzheimer's on this planet, where I can free the Soul, than get Alzheimer's outside, when I'm in the freedom of the Universe. Because then you have nowhere to go. Here, you're still engaged within the brain of the man's prison. And that's where the difference comes. Any other question? Q: I have a related question to that, is this ability to have both the STP and the STM in the transmutation process or existence, is this a permanent arrangement if you manage to accomplish this? (K - Yeah ..) Or is there a point in time, in your drawings and in your teaching, sometimes you tell us that at some point we become part of the totality, part of the Creator. And I wonder if at that point we willfully give up our free will,

(1:26) so to speak, or our inclusion of the physicality, STP, to become part of that. K- Have you ever seen a mother and a child? When the child tells to the mother, "I love you, mom." And the mother says to the child, "I love you, my daughter." Which love is bigger? And which one is more sincere? Is it the love of the created, or is it the love of the creator? I've witnessed that many times, and I always ask a single question. Or is it the intention of the mother who thinks how much she loves the child, that it triggers the child to speak the word? That the mother answers back in the verbal language, where before was through the Soul

and emotion. Next time when you see a child hugs the mom and says, "I love you, mom." Think if it comes from created, or is it coming from the creator? And how the creator holds, hugs the created with a true love. Because she wants to hear she's loved, as she created that love. Then you understand a lot about the world of Creation and the Creator, and how to behave. (1:28) Even though, maybe the child jumps off the lap of the mom, and does something naughty, and the mother forgives, because the emotion of the ?? feel of that love, super-passes the misconduct of the child, next second. And this is the story of the man, ?? where the Creation is created, and his Creator. Then you understand the next step. How we encage within the arm of the mother, or is it us who opens the arm to the mother? And is it the emotion of the child, or was it the thought of the mother, which initiated the physical dimension of the man, or the child? And then you understand, if you step further with it, does the mother shows the same love to the creator of that child, which is the man next to him? And when he cuddles and loves the man, is it the same love and cuddle, or when he cuddles the child, which they both created from their own creation? And then you understand the process of the Creation, and truly where and how, and what comes next to it. Any other question? Q: ...

(1:30) Do I free myself from the prison of physicality, with intention and awareness? K- Suicide is forbidden, in all realms of Creation. Which means, jumping off the, what you call it, in the sequence of works. So, you

cannot end a life in a physical manner, just to get to the next. And transmutation is a way of living both dimensions, till when the life in the physical dimension does not hold. There is an advantage if you learn transmutation, and really understand the true essence of it, not just the game of it. In the, those who understand the full operation of transmutation, and the possibilities, and the joy it brings, will never die even in a physical condition. Because you, at the point of, what I could even call it, physical pain, you transmute to the physical dimension of the Soul. And with that, you change in the condition of physical condition. You can even move on, to another position and dimension. This is what we do as the travelers. We decide where to travel, and how to travel. And when to go back, or carry on to the next destination.

(1:32) And this is the same true for the STM, and the physicality of the man. You cannot end life, it's forbidden, because then, the full maturity point of the position of the Soul, is not achieved, is not reached. And then, you become a ?? nomad in another position, because the Soul itself has not decided its own destination of the freedom, even though it's attached to the others. Suicide, end of physical life, in this life, and the others, when you become a bit wiser, is not allowed. But, if you learn how to transmute, you can take the physical body out, even in its, what you call, old age. And allow it to live everlasting life, in the dimension of the Soul. In a way you carry it with you, for the love of what created you. This is what we do as

the Universal travelers. Any other question? Q: ...
Hello Mr. Keshe, hello dear Rick. For my understanding, all animals have the same emotions. But why the most species cannot change the color of the skin? For example, an octopus can change the color of the skin, but not a shark, and both have the same environment.

(1:34) The whales and dolphins, also mammals like the men, should have the highest consciousness level of all animals, but can't also change their color. Can you explain more? Thank you. K- We become more physical. We can do, anyone can do, any creature can do. It's not exclusivity, it's those who are aware of. And those who make different kind of condition for their existence. Years ago, when we did the first coma patient, we, I left the, what you call it, support, because of the mother's misconduct. The scientific world was still puzzled in how I brought life back to this woman. I wasn't aware of it. For me, the case was closed, months ago. And nobody has ever done this. No one has ever brought a brain damaged coma to life, to live. But, as it was a surprise for the world of science and the scientists in Belgium, the word spread apparently around the world, in the scientific world, that Keshe has achieved to bring a coma back with a brain damage to life.

(1:36) After about a year or so, not knowing what impact this job had to me, was something we tried. We brought the life back and I gave the body to the family and the hospital and everybody else, did

whatever they like. The scientific world, and those days we were not talking about this, it was something hidden in the structure of the Keshe Foundation, was surprised and ?? intrigued by how this was done. And that we can bring back. Naomi was not the first time we did this. I received a call from the doctor who was connected to the trial, that they would like me to attend the University Hospital in Belgium, where the Cambridge University scientists built a system to check the correctness of my work. They wrote a program. And the scientists in Tel Aviv University built a machine. To me was something we did a year ago, it was irrelevant, case closed. But it was, it had such an influence on the scientific world, at that time, that the scientists in three nations decided to see how Keshe and how much he has brought the, everything back. Has he just built the brain? Or has he actually brought consciousness? And I was invited to be witness to it, because they wanted to see my output in this process. I spent a day in the University Hospital, with this girl who I saved the life of, a year before, with this gadget, (1:38) which was like a mesh on her head, with the computers run by the Israelis and the Cambridge Universities and the Belgium scientists together, to see how we recognize, how much we have saved the physical dimension. And the whole reason was I was invited, not only to be witness to it, what I have achieved, and now scientists confirm to it, was the girl recognized my voice and responded to my voice. They must have tried this with the voice of the mother,

it didn't work. And that was the reason I was called to go to the hospital, to be there. And there were sets of questions, set by the Cambridge University, the University of Tel Aviv, and the Belgians and I found out later on, a few other universities were involved in this. This was a great impact in bringing somebody back scientifically from coma and they wanted to see how much is conscious. And I had to read sentences which was written by the scientist for the girl to respond. And the interesting point was, was recognition of the truth by the brain and by what we call, the Soul. And the girl was next to the monitor, she didn't need to talk.

(1:40) I had to read these questions and the scientists monitored the behavior of the fields of the brain. For example, one of the questions was, "My name is Julie" and we watched the brain reacting that this is wrong. And then I said, "My name, the correct name of the girl" and we saw the reaction. Recognition of the truth. And then, that time, I, 2010, that time, 14, 15 years ago, it was setting the intention and for her to understand the intention. It brought a lot of knowledge, a lot of what you call, understanding this process. And clear to me that the voice has connection to the Soul. It does not matter if we get a physical response or not. And this is one of the things, first things I tried in Naomi, where I was outside and asked her to move through connection through the Soul, the voice ?? was the tool. And this is interesting for Knowledge Seekers to understand in the future. (Give me a second, I'll find a picture, because I took

the picture of this when it was happening with leading scientists from the world in Belgium,

(1:42) sitting around, trying to get this, confirming that you can bring physical life back. Just one second, please). I try to show you this picture, and this picture has a lot of significant scientific importance in the life of the Keshe Foundation. Then you understand when we teach how it is. And then later on I found out the reason for this not only was to test the correctness of the knowledge by scientists around the world. At that time I was an unknown scientist. I only have, just after I came back from Iran, with what we call, with the space technology. And we electronically monitored the behavior of this girl, how her Soul was doing, but they were not monitoring what I was looking at. And I tried to show it to you, because the face is, cannot be recognized.

(1:44) And we, I tried to do something with a picture before I show it to you that does not bring any cases against the Keshe Foundation in the future, by those who are mischievous. Let me just correct it, in a way, edit it a little bit, that you understand how... << Mr. Keshe arrange the picture to be shown >> ... I share it with you, and then I explain to you a lot of scientific, what we call, understanding from the test. And then I found out the reason that this was done, confirming the correctness of this technology, was later on, for what we offered to the Israeli Prime Minister.

(1:46) You see the face, and you see the diagram below. When you open up, you see how many electrodes. All the dots you see, there are one electrode. It's a couple of hundreds of them, connected to the, what we call, the skull. They picked up every sensation, every ?? motion, everything the brain could do, and there were monitors after monitors, like this, analyzing data, next to the girl. Her emotion, her feelings, her response, why, how she responded. And this went on for nearly 8 - 10 hours in the hospital. She was covered, that she has no physical connection. All the connections are the same. She couldn't feel cold, she couldn't feel warm. A special blanket was brought in from Israel, that everything is constant. Scientists spend hundreds of, most probably millions of dollars, to create this condition. With this, it was very clear, I was looking for something else, because it was the first time I seen the girl after a year. And it was a surprise for me to be invited by the, what you call, by the scientists of the University, to be present, because I did the job.

(1:48) They wanted to know how, and whatever, that how we are connected to our emotion, and how our emotion connects to our energy within, what we call, the Soul. Scientific way, is a lot of receivers, electrodes on this ?? plate . It's hundreds of them. And you can imagine, every single one of these electrodes was connected by wire to one point of a monitor. You can imagine what was in that ?? monitor. And, the reason the Israelis did this, and got the

Cambridge University ?? suffer for it, and they got the Belgians to test it in the University hospital, was the correctness of the technology, that they could bring Sharon, the Prime Minister of Israel, who was in coma, and be offered, to help to bring back. They wanted to see if it can be done, if it's correct here, we do. And after a few weeks, after this, Sharon, which was the Prime Minister, and the ?? stroke was ?? removed, privately to this hospital. You can check it on the news. That, they'll start the process of bringing Sharon out of coma. But, they didn't ask me to join, they didn't know how to do it. And, it ended up with his death. The Science of Creation is with every single one of us. It's not exclusivity. How to use that science, is the key. How to connect the dots. And, connecting the dots of life is very easy.

(1:50) Missing a dot, is the hard spot. I'm sure you've never seen so many electrodes on the head of a person. It's everywhere, even goes down her spine in the back. You can see it around the neck. Everything was covered. I sat there, and I understood more about my work. What I did, and what needed to be done. And, after this incident in 2011, 12, is where we started the problem with the Belgian monarchy. They wanted (to know) how to give life back to them (selves), (?? they could stay forever). They didn't understand that, they brought themselves to ?? an end. Now, you understand, even the world scientists are puzzled. From what, 13 years ago, I gave life back to this girl, which I was called by the Belgians, and ??.

This is one of the cases, giving life back to this woman, they took me to court to give me... Giving life in Belgium is criminality. Killing people is their right. This is one of the cases, when they brought me to court. Why I gave life to this woman? Their job is just to murder. In the state of Belgium, giving life is a criminality.

(1:52) Unless you are a pedophile, ?? rape young children, and ?? give them life ?? away. And then you understand, why dealing with Naomi was so easy. Any other question? Q: ... David Wilcock said, everything you said is spot on, and was looking forward to work with you soon. Have you heard of him? K- No, Maybe, but no, ?? can't recall. I'm sure our information ?? this week, ?? probably the information in the next few minutes. ?? Yes, carry on. Q: ... Will we connect to the Soul faster, if we vibrate the throat, when doing deep breathing technique? K- That's a new one.

(1:54) I presume opera singers have a problem with that. (Laughs). Never ?? heard about that. I'll try next time, I'll tell you when I shout. Oh, maybe ??. Maybe it does. R: Next time in the shower, when you're singing, you can check on that. K- Do you know what they say, what's the difference between the normal singer and the Jewish singer, in the shower? Normal singer just sings and enjoys, the Jewish singer bangs his head with the wall as well, at the same time. Right, I can say and tell these things, because I am half Jewish, so they can't blame it to be, whatever. Any other question? Q: ... Regarding a beautiful person with two

Souls inside, would it be possible for one Soul to leave first, for the light of the Creator, and the other to remain? K- Yes. Every Soul is independent, and is a ?? approaches the Creator, the same. Yes, it is. Just because you are in prison, in one prison cell, does not mean all the prisoners are all the same.

(1:56) Q: ... Hello Mr. Keshe, in Book Two it says, in understanding the function and the fundamental properties of the Gans, and molecular Gans, then computing systems can be produced, that not only they think the same ways as humans do, but due to their dynamic energy and singular directional rotation, then at this point, the first quantum computing systems can be produced, that these computers will be exact copy of the human brain, and muscles in structure, with the same multi-neuron cross linkage, and communication channel, as these channels are created as Gans, molecular MaGravs linkage, will allow them to have the same simultaneous, multi-cross connection, that these quantum Gans of molecules, structures, will be exact parallel systems, as do the human brain, and all aspects of a real working structure of logical system, which even they can carry emotions, as well as control and logic. So, the question is, from Hong, is the principle of quantum computing systems here, the same as that of the quantum computer, currently being developed by the scientific community, and what does quantum Gans mean here? R: ... You probably have less than a

minute now Mr. Keshe. K- No, it's very interesting, because,

(1:58) I have explained this in many of the recent presentations, you are 'dead on,' you're not even a pinpoint out. The future of the Gans, the future of the, what we call, first of all 'quantum' means smallest part, but the future of the computer, with specially with the new materials, which we have developed, will change the world. The size of a pinhead, most probably carry more data, than putting all the governmental America computers put together. If man understands how to use the new material, and how to process it, as we say, all the computers in the world, will fit into, what you call it, the smallest part of a brain of the man, because the computing of ours is so vast. We haven't managed, if we put all our computers together, we don't even reach, doing maybe 1 or 2% of what our brain does. The new materials, because of what even I explained today, the free ?? float positioning, will create, will do the new structure, with a much more rapid response. We can't even imagine. Yes, it is possible. I promoted in the past 2, 3 years, to places where, understand, and very recently I was in a conference,

(2:00) and the speaker, without knowing it, was referring back to our technology. And I thought, "Hm, that's nice, they don't know who the inventor is sitting here." Because it was never existed before we introduced it to. And there is a South Korean company, very advanced in Chip manufacturing, uses

Keshe Foundation technology extremely in depth, and they don't reveal how they do it. But as I've been involved with them, I know you'll hear and you'll see, even Huawei nowadays is using the Keshe Foundation technique, for the production of new dimension Chips. But they don't explain it, people don't understand it, but it's the part of the technology, actually the whole lot of it, based on the technology, which we left on Nano technology. And if you understand it, you can cut into a small piece of it, and then expand it, and make it a quantum computer, which is within actually few layers, more powerful than, putting all the computers, the world computers together, because it's a free positioning. It's like the way I explained about the STM, is strong on the other, beyond the connection, or locked within the STP of the brain of the man. You have to understand why it does. Because, if you go on the understanding, of what I just explained earlier on today, you have a Nano layers of material, which in fact they have no connection, physical tie to each other.

(2:02) They connect, they vibrate, they expand, and they move, according to what this layer and the layer above it, allows it. So they can store the whole information of the computers of the world, in one space gap. Because, every other one accommodates it to be. The physical dimension does not sit in another material, sits in the space gap open. STM, in the brain of the man is this, and runs the whole of the body of the man with the Universe. You can imagine

what capacity this has. Scientists have not understood this. There is a company, Huawei is working on this extensively in the background. I watched their papers, I watched it, but nobody understands. They're trying to break into this. Then, you don't need much to store all the information in the world. And the beauty is, this cannot be hacked. The quantum computers, if they understand this and they do it, because, whatever you do, this finds its new position, if it's not connected to it. And it's very strange how much they take in ?? hand. Remember, in one egg and one sperm, we carry the whole process of every single cell within the body of the man and his connection to outside. In that little tiny egg and sperm, if you look at it, carries how every single cell of your body needs to be, how the structure of your heart has to be, how it has to work. All that information of a creation sits in that little tiny thing. Now you can imagine this gap in a ?? Nano.

(2:04) Amazing times in development of the sciences is left to come, if man understand this. Then this is like the STM, it's no different. Any other questions? Q: ... Can animals think or just feel? K- Do you mean about the human animals or just animals? As much as a man can think, he thinks he's the king of the animals, so does an ant, a worm, a fish. But it depends what you think about. Of course they do, they react. If they couldn't think, if you put your foot on their tail, they run or they bite you. So, of course they think. It's not exclusivity of man or this planet. R: The scientists had to redefine the word 'bird brain' and take it out of the

dictionary, they want it removed, because they discovered there is no such thing, that birds actually are quite intelligent, it turns out. It's just they weren't asking the right questions of them, apparently.

(2:06) K- I wonder, one day, if publicly, we bring out the, what I call, our friends in Space, that man can see, what questions our analysts and our people ask them? Or would they believe in them, what they tell them? Or we treat them the way we treat each other on this planet? We're all foreigners to each other. And mistrust has brought us mistrust in ourselves, not with the others. Any other question? Q: ... Hello Mr. Keshe, can you please expand a little on the mono-magnetic and monogravitational work? K- Let me know when you understand, there is no mono-system. It's how you play the trick with the fields. You don't show it where it is, the other part. It's, well I explained this, it's very simple. It's like you standing in front of a group of people and you're seeing their faces. Where is their backside?

(2:08) Or just because you see their front, no back exists. It depends where you're standing and how well they have hidden the other side from you. Monopole, mono-fields is all those who take you for a ride on a trick. Because there's always another point, or ?? it just doesn't exist. And because you don't understand the work of fields, they trick you with the matter state. Any other question? Q: ... Thank you very much for your presence among us. My question is, when we transmute and decide to recreate a physicality in

another point in the Universe, our Soul will be trapped in that physicality and disconnected from the fields of the Universe, just as it is now in this physicality that we have here on planet Earth? Or our consciousness is higher and this new physicality will not be a barrier to our Souls? Thank you very much. K- No, no, you will not. This cannot happen. You can allow the physicality at the point to dominate. That's your decision. This is what we've done on Earth. We gave that. When I used to teach some 20 odd years ago, when I explained that the STM is a leech,

(2:10) and the physicality of the man is a leech from the STM, people couldn't understand. Now more and more people understand, because now we can explain the STM is within the body of the man. It depends on us how we allow this leech to, in a way, decide not to take over. There is no take over. And so, even if you manifest in another dimension, it depends what you decide, what the Soul decides, in its benefit and the time, place. Not the other way around. And you don't become imprisoned in it, because you gave physical life to it. Thank you very much for today. And hopefully we meet each other next week. And we'll see what more we can share to understand. R: Okay, very good. Thank you Mr. Keshe. Thank you for another Knowledge Seekers Workshop here. All right, well this has been number 545 in a continuous weekly series of workshops. And we look forward to next week the same. Probably be back to the 9 a.m. time for next week, so far as we know Mr. Keshe. K- You

never know. You never know. R: Okay, well, we... K- The reason for last couple of weeks, (2:12) or when it happens, I have to make presentations. And when that happens, it's very important to be there for the presentation or research, or which we cannot, so we don't know till the last minute if there is such a situation. That's why we usually, primarily we change the time. R: I will keep it open for that. K- Thank you.
