Part 1

(:11) K- Yes, thank you very much. Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. Today, teaching goes back into bringing many things together, and at the same time, bringing the knowledge in one way or another, the physical side and the energy side together. Today, we try to explain for you to understand, why we are doing the presentation in Iran.

(:12) Where, at the same time, we are pushing forward with a teaching of development of transmutation. Many of you, I'm sure, have heard about "Beam me up, Scotty". Where a man is transmitted from, or transferred from ship to the place, destination. It's not a "Beam me up, Scotty", it's transmute my Soul, that my physicality take the shape and the position of the place and time. Transmutation is not for man from Earth to go anywhere. If you are in position in the Universe (U), could be on a craft, could be on any system of transmutation and transportation, you want to transmute to a position. The teaching, the knowledge is there for it to be done. Transmutation is not for man today to go from A to B on Earth. You are on a planet, you are in a ship, you are on a position, that you decide, instead of going physically, I transfer. There is a lot of advantages of the Spaceship to transmute. You don't need to enter the atmospheric

condition, you don't need to risk to go through all sorts of hassles of landing. You transfer, is to the limitation of the physicality (P), of the dimension of the position of the place. Which means you stay outside the Earth's atmosphere, and then you transmute.

(:14) But, the knowledge of the man has reached a point that you don't need to transmute a person. As I said many times, many lessons teaching before, when you make a Cup, a Cup has a Soul. You can transmute vehicles, you can transmute systems. The landing and shuttling is the dimension of present physical understanding. And that's why we make movies about it, we talk about it that way, because we have never had a comprehension, that we can transmute anything, at any time. And, how we can, in Iran, we show you the flight system, (physical) transfer. Hopefully by that time we request from American government, to allow the landing of the ship from Iran in New York or Washington. Most probably, with American passengers. At the same time, later on, in 2025, when we manifest ourselves, when we be present in Washington, we will bring in the position of the transmutation into play. Transfer and Transmutation. In the second part of today's teaching, I'll open a wonderful news to you. And is on the back of the Knowledge Seekers (KS), how you support it and how you bring it to be. But, understanding the Totality, understanding how we can transfer, transmute, transfer, transmute, as we like. This is the key and success to a permanent travel,

(:16) permanent residence in the Space for man, or any other living entity in the Universe. Where you cannot manifest yourself in a dimension (D) of your physicality, you take the shape of the position. You're a man, you fall in the sea, in the ocean and you die, because you have not learned to switch the transmutation and transmute yourself to a fish. You don't need to go other point of the Universe to learn this. You are a man, you want to go into the depth of the Earth to find out how it works. You don't need to read how ants and worms colonize or live. You transmute into that dimension. Many of you, in the last week on Friday, tried many dimensions, from the tree to stone. Some of you transmuted and transferred into a fish. Some of you felt different time and positions. So, now it's becoming a known for you. You understand, you have the capability and gradually in the coming months, before Tehran conference, before Iran conference, we'll bring in to position that transportation, transmutation will start becoming part of your life, before we arrive in Iran. The New Age of new science has arrived. And we want the Knowledge Seekers to be part of it.

(:18) If you remember in 2014, 2015, when we did the Tesla 129, we left it open for you, everybody else to come in to see, to watch, to monitor. People from Western Europe handed over to the Eastern, the Americans took over when it was night time, and then the other side, the Chinese monitored, and we went round the clock, 24 hours a day, as the numbers build

up (M field in Tesla's). As we've achieved to show the power of the Plasma, magnetic (M) field in motion, energy, is not dependent on matter state. But, it depends how you play with the fields of the Universe. Matter state has a limitation. Matter state has a condition that it cannot super pass, is a condition of environment. In the matter state Inertia. Many of you, you've seen this, who did the test, many of you who did the, what we call, the dynamic systems, observe, after certain speed, certain field creation, the motor stops. But whatever you do with it, doesn't start, it doesn't need to, it's not burned, it's there, but the Plasma saturation, field of the Soul of the system, has taken over physicality, that's why it cannot operate, because, it goes through the Soul of the matter state of every element in that motor.

(:20) You have seen the power of Plasma, many of you who did many tests, in how the matter state does not count anymore, because the Plasma energy, dimension of the fields of the Universe, is much stronger than the matter state, because, in the stepping down in the strength, in the inner shells, this is what you receive. I've explained this many times in the teaching. You get an onion, a very big onion, and start taking layers by layers off. You see the outer layer is much softer, it's not so firm, you can easily break into it. The next layer, slightly tighter, until you go to the center. Where the field strength is tight, the structure is very tight, and very small. When you look at a Plasma, you look at structure of such a thing. The

center is tighter, harder, and in the Plasma dimension, much stronger and much strength. The outer layers are much looser, they have grown up into a Universe. The layers underneath are different galaxies, different layers of it, and different construction of it. When man becomes wise to the Knowledge of the Creation,

(:22) to the science of understanding the operation of the energy, he will see something which he has never seen before. And today, cosmologists don't even understand this, they see it, but they don't understand it. The Universe of the man is like an atom. It has a single structure neutron in the middle, or a proton you call it, which is amalgamation of many energy fields. And according to that structure in the center, in the atomic structure we call it the rings, you have different electrons on different rings, and number of electrons in different orbits. The structure of the Universe, the structure of the Unicose, the structure of the whole totality of life in the Universe, cannot be any different. So, when we look at the structure of the Universe, our Universe for example, we see a central seed, we see a proton, we see amalgamation of fields which make that central line. And with it, the structure is the same. The orbits and the galaxies are positioned in different orbits, according to their strength. We call them S-ring and the rest of it in the world of the nuclear and atomic. The Universe, the Unicose, has the same structure. There are galaxies,

(:24) and there are gaps between the galaxies, according to the field strength they have, in what orbit

in the sphere of the Universe they possess. This is one of the reasons that I've said many time before, Plutonium, Uranium and the rest of the fancy atoms we consider, in the matter state of the knowledge of the man, is nothing compared to atomic structure of the Universe. Today's nuclear physicists, we talk about so many electrons, totality of it, giving atomic number and atomic mass and everything else to it. The same applies to our Universe. This is why man will find out when he becomes a traveler of the Space, he needs different field energy strength, to go from one layer to another, from one onion ring to another. There are different orbits in the cosmology of the Universe. It's not so easy to cross, it's not so easy to jump from one to another. We have to use so much energy to get outside the orbit of the Earth and use so much to get into it. It's the same with the orbits of the Universe, it's the same with the orbits of the matter state atomic structure. There cannot be any difference in the world of Creation, unless man, due to lack of his understanding, creates excuses and assumptions the way Einstein did, to mess everything up. What is macro, is in micro,

(:26) and what is in micro, is in macro, because they're all created through the same process.

Interaction of the fields, is not a Ford car, or a BMW manufactured in different part of the world, and what is this and what is that. Magnetic fields interact in the same way, does not matter where in the Universe. And then, man needs to understand this, in how to

transmute across these lines, and how to transfer within the lines. Understanding of this, and if our scientists become wise to the Knowledge of the Creation, the way it actually is, and not the way they imagined to make it, mankind will become a true traveler of Space. Understanding how to cross these borders. How to go through this imaginary magnetic field rotation, that creates and allows condition of rotation. Why we have electron and why we have positrons, and why we see galaxies behaving like positron, and some behaving like electrons. Why do we see a cluster of, what we call, matter states, in the shape of galaxies, all behave collectively as a positron energy field, in the center of atomic ring of the Universe. Why and how mankind will understand this, will allow man to break through the knowledge of the Universe, to become the true traveler.

(:28) How to see the structure as it is, and not make structure as he thinks it is, because then it makes him famous. It brings in the Knowledge of Creation, it brings the true understanding of the process of Creation. And this is where, as Knowledge Seekers, we have the responsibility to understand this, to be able to transmute, to be able to transfer, to be able to become energy without either one. Where transfer is the book number one, when transmutation is book number three, when the light is going from one to another. And if you understand this, and if you Knowledge Seekers, bring in that breakthrough, cross the limitation which the present science, through

fallacies of other scientists, have created in the mind of the man, then the humanity is ready to become part of the Universal Community. But the problem is not just for man, the whole of Universal Community is going through the same commotion as the man at the same time. As they are learning what you are learning, as the Knowledge of Creation is way across the Universe, it is not the intelligence for man anymore, it is understanding and intellectual right of the whole created things within dimension of the Unicose. This is why we (are) called Universal teachers. You sit in a class, you teach number of children in the classroom,

(:30) but the other students who are sick at home, they learn on the Internet, they are part of the class, which is tradition now today. So is the same with the man, the Earth and the Universal Community. But this time we use the line of Universal communication to reach the Soul of the ?? created, the student outside, where the classroom is today, here on Earth. The knowledge will become so, that is not exclusivity of man, that when man comes to the Universal Community, as I said many time before, he is equal. Because man will become arrogant that the technology, the Knowledge of Creation, the understanding of Totality came from Earth and he sees himself above, where he has to be humble. Understanding the Knowledge of Creation, understanding the structure of the Creation, understanding the process of interaction of the fields

of the Universe, is not exclusivity of one race, but is belong to the whole of created. This way, as I said before, a new race created in another position of dimension Universe, does not need to go through the whole evolution of the time and the pain of the man. But he will be educated to the final point from the fields of the Universe, that he doesn't need the school, does not need to kill, does not need to get sick, but has the knowledge of the existence from the Universe, and not from his place and position of manifestation.

(:32) In the last Friday session, as we promised, the 'Daughter of Mitra' manifested among you, in one of the sessions only. And those who felt it, they came in touch with the Soul. And in that group, a few felt, and we did not say which group, in the writing we understood they've been touched. We monitored on a physical dimension of systems, we monitored on a, what we call, energy system, and all matches the presence. Which means the knowledge of the Universe can be reaching anyone at any point at a time of the manifestation. Shall not be exclusivity, but it has to be understood, inclusivity means including all the knowledge, not what suits. When we say no one will be higher at a time when the man becomes a member of, the open member of the Universal Community, is that the man does not become arrogant that we came, we were the people who were given the knowledge, but we actually, the only few who attend the classroom, the rest are at home learning, the voice, the emotion of the knowledge. In

the coming weeks and months, you will understand these teachings, you understand what it means, you understand how things will take shape. In Iran, we show the manifestation of the transportation, which means how we create structure out of nothing.

(:34) As I said in the teaching many time before, with the present understanding of the technology, there is no need for aircraft hangars to build the aircraft. You create the craft from the fields of the Universe, and you travel within the structure of the physicality of it, if need be, but you use the 'Soul of the system' to connect and transmute from to, and back to. What this means, the new flight systems which will come into operation, and you will see the manifestation of this physicality in Iran, will come from nowhere, from the fields of the Universe, convert into the matter state system, can fly in the dimension of matter, collectively as many people as they like to travel with it, and at the point of transportation and arrival, you manifest yourself in the dimension of transmutation. There are no doors in these spaceships, because if you understood the transmutation, there is no need for a door, as you can transmute through the wall, through the field strength of the system. In Iran, we'll show a revolution in science and technology (T), that man has never seen. Creation of the matter state, from the empty space of the Universe fields of energy. Go back to the presentation in Eindhoven when I opened the box, the 'empty box of the Universe.'

(:36) We'll come with empty box, and through it we'll manifest the creation of the craft. And, as I said, we invite you all to be part of this, in the second part of today. Collectively, you'll understand the change. And we are preparing the grounds for the presentation in the city of Isfahan, where we show the revolution and evolution in the world of science, where no nation has superiority over the others, and they have find, they have to find a solution for. Where aircraft carriers will be abundant, where the fighter planes has no room to fly, except for toys, where the mankind will find solution, in a very rapid way, to stop the mayhem he has created for himself, to superiority of the knowledge, as this knowledge will be given to every nation, at the same time. That there is no superiority. Nuclear weapons will be made obsolete, through the advancement in technology, through understanding evolution in the science, transfer of the energy, as magnetic fields in motion, and not as a source, or connection to the mass in the matter state. If you understood atomic structure, position of electrons, how they are connected,

(:38) the reason they take different position in the ring of the atomic structure, and why how many per each ring, and it's the same for, if you are a Gold, Plutonium, Uranium, or any others. You can't cram three electrons in the inner ring, and you cannot put 25 electrons in the second ring. Every atom has the same structure. So shall be the structure of the Universe of the man. And man has to understand this.

Understand the gap between the galaxies, and the way they interact. The presence of what we call, 'Twinty Systems,' and understanding of the magnetic field interaction. Understanding why and how these fields, and their interaction, leads to creation of positioning, magnetic field positioning, MaGrav positioning, and then to understand the Totality. Once the scientists of the man, start looking into the structure of the atomic field combination, and not matter state of it, then they will understand the simple point. That you translate this language of knowledge, into the dimension of the orbital motion of the matter state of the Universe, or you work with the energy fields of the Universe, where the matter states fly, move, in a way, live within these orbits. There is a difference between the atomic structure motion, and a plasmatic field motion.

(:40) And where these hit, it creates dimension of the motion of the electrons. Today's scientists have not even understood this part. Unpredictability of an electron motion, in the rings of an atom, it is not only MaGrav positioning, but is the field plasma of radiation, of the structure of the atom itself too. It takes two to tangle. It's not just how that electron positions itself, with its center, but what fields of the center, touch that electromagnetic plasmatic fields, that it creates a dimension and diversion in its motion. This is why man has not managed to predict, the next point of an electron motion, in the atomic structure, because they have not understood the center of

magnetic fields, radiates like a spiral, goes from one spiral to another. It's literally, it's like a monkey jumping from one wire to another, up and down, according to the field strength, according to the strength of the motion, in respect to its dimension. Why does, why do we get, what we call, atomic decay? Or nuclear decay? Where does it come from? Because, it comes through interaction of the fields, from the inner plasma field strength, and nothing to do in a way, with the electrons,

(:42) or the protons, or amalgamation of what is in the nucleus. Because, collectively they interact with each other, and collectively, they create that field, that their interaction, dictates the position of the electrons, within the structure, of atomic structure. Man's knowledge of atomic structure, and the fields, is half cooked, because he has understood only half of it. He has not understood the totality of it. It's very much, like a Weight and a Mass. And then, what comes after the weight? What is the effect of Inertia on the totality? Man only looks at the atomic structure, in a simple way, because he hasn't understood the complicated system, that this atomic structure lives on, created out of, and holds position into. In time, this world of science, has to look, into atomic structure of the Universe, to be able to transfer and transmute within it. You are on one layer of the onion, you need to transmute to the next one. Transfer is impossible. And when our scientists understand this, then you'll understand, the process of creation of the fields,

energy, interaction of them, and through them, the creation of, what we call, the magnetic field.

(:44) The Star Formation (SF), was given to you, but you never understood the principle of its work. The understanding of the process, and the creation of the Plasma. In the coming time, we revisit the Star Formation, and we hope the American scientists, who put a patent in, will understand it, and he gets his Nobel Prize. And through that process, we come to bring man to the next step of evolution. 2024, is the year of evolution in science, technology and peace on this Planet. And with it will come. And the next process, is to start the next step. You have to understand, that the process of Creation, the process of understanding, in creating anything in the Universe, follows the same principle. And if you don't understand it, you get in the dogmas of today, with man, technology and science and everything else.

(:46) Then you have to imagine, make up and falsify everything, to fit the short mindedness of the man and his scientists, because this is how it works. Do we need to create, to show, to confirm, or do we need to confirm to those who are short minded, that what we show is correct, that they have to understand, that they might accept and then become their knowledge, and they are the Nobel Prize winners, as we call them. Nobel Prize should be for every man for himself, in achieving to understand the process of the Creation. That's noble. This is unique, and once you understand it, you have reached the ultimate goal.

Understanding the process of the transmutation, understanding the process of the transfer, is the only way man will get out of this Planet, man will become the citizen of the Universe. Man will reach to the position that needs nothing to be proud of, but to be part of, no superiority and no killing. And everything is moving in that direction. And it's time to reach that point. It's time to bring the whole world to see, to understand, the evolution in science, and that start from scratch.

(:48) That the man understands that no one needs to kill, no one needs to live a harsh life, no one needs to get sick, no one needs, needs, needs, and many other needs, as in the dimension of the Universal Community, every need of the Creator are met by the Creator. To survive and to have all the attributes of his Creation. We go for a break, and we come back. And I hope today you understood a little bit more about who you are, where you are, and you're in one of the orbits of the Creator. And which layer of the onion you're sitting in. Rick, take us for a break and we come back.

>> BREAK >> 548 KSW July 25, 2024

Part 2

(:53). K- Thank you very much. First of all we would like to bring you a news, which is very important for us and for the future of the Keshe Foundation. As you remember, and I mentioned in the first part,

(:54) in 2014, 2015, when we set out to show the production or creation of 129 Tesla, we broke the taboo of technology to be exclusivity and for a few to see and then claim. We put the meter, as some of you saw, still see, and many of you monitored it around the clock, see its operation. We did not go in to show what we can do. We went in to show what the science and technology has achieved. And our pattern of work has been that we have put Blueprints of one way or another to show breaking through technology. We now go through a phase, as of hopefully next few days, that a combination of the Cinzano and Blueprints come together. Our team of scientists have worked and we have achieved a major breakthrough in <audio cut> where in the Cinzano we showed the, what we call, the 129, step by step, over a month or two, as gradually the system built up, the knowledge and technology has reached, is more or less, its ultimate goal.

(:56) We have set out, and it will be announced in the next few days, a YouTube channel, exclusively for promotion of the new technology in Space travel and Space dimension, where you can on hourly basis, daily basis, monitored, how and what we put up and what can be seen. The ultimate goal in science and technology has been the conversion of energy into matter, and conversion of the matter energy, to lift and motion. We have managed and we have constructed the system, that as I said, will be shown in totality in Iran, where we bring you a suitcase. We open a

suitcase and we set up the scene for the suitcase to build its own dimension, of its own interaction, or what you call the UFO, the spacecraft, the ship. We are testing and we have started testing of this system and we put certain aspects of this system on the YouTube, that you can monitor. Initially, some of you saw this, we showed it in the conference in London, the ambassadorial conference in London. Some of you who attended, you saw the scale moving. Now we have brought the system into a position that we build fields in this ?? very system,

(:58) which creates its own structure and then in a way it builds its own dimension, and then it has a dimension of creation of its own center of control, like its Soul, that will create and allows in establishment the transmutation at the same time as the transfer. This system has gone on the construction and it has started, the tests has started. The last final tuning on it is getting done and in next few hours, next few days, we'll post regularly certain aspect of this system. You will most probably be Live seeing the measurements, the way we show. We will not show the system. The system will be kept to be shown in Iran, but you can monitor everything else. We'll start with empty space, and through this empty space, through the design of the system, as I said many times, we don't need aircraft hangars to build what we call UFOs, as you call it, or flying ships. If you have seen the size of some of these, what you call spaceships, they are the size of 20, 30, 50 football pitches (fields). Man cannot

create such a hangar to build such a thing, and the knowledge of the Universe does not need aircraft hangars.

(1:00) This system will be shown in full power on the 16th of November in Iran and a week after to the Iranian Military, to the understanding of totality, inviting the world militaries to test, to see. There'll be no superiority in power. There'll be superiority in who can bring more into the, what I call, the 'pot of knowledge.' You got to understand, we have reached a position. We'll leave you the YouTube links, you can spread it around the world, people can come and watch, what weight is reduced, what weight is gained, what structure could be seen, what fields can be detected and we've been in the beginning of this, what we call, discussion and opening to the world, till the conference in Iran. We will not be flying a UFO into Iran to show you. We show you in Iran how the UFO build in front of your eyes. Technology of the conversion of the energy into matter, and interaction of the fields to create the matter, and then the condition of the totality to create position, position and energy at the same time. Then, as I said, it comes who can go inside. Have you learned the process of transmutation?

(1:02) And then you can move it. Those who kill shall not do. The Soul will not allow. Most probably, it will be club of the world leaders, will be club of the world leaders for the land they don't own and not the king of their, not the president of. As they cannot walk in

through, that they cannot cross the line to the dimension of their own Soul, as it's energy Soul connected. So, next week or next few days, we release on all the channels the link for this YouTube. And as much as we can, we update it to the information which we want to update. Certain videos will be put on that educates people what it is, the people who come new. And then we'll bring everything to connection for Iran conference. Every aspects of this in the process from now until the conference in Isfahan, is the process of learning for our team. Process of understanding the next step. Process of being able to 'shut the shop,' open it in Iran and ?? that will be it. And again, open the shop in Washington, but transmute people across. Those the people who wrote to us after the Friday session that you felt the presence of Mitra, you were correct.

(1:04) She was amongst you, you brought her in and we recorded the interaction as we did the year before. And through that process you will learn the key to the next step in the Universal Community. And to understanding the work of the Keshe Foundation. So, please go on and keep in touch and bring other people to see around the world what we put on this channel. It's purely showing the performance. We fail, we are there, we increase, we are there, we have to change something, we are there. But we put everything on that you can see. Primarily weight reduction, primarily field interaction, primarily Soul interaction, primarily creation of the fields of the matter

state in the dimension of existence. This process has already started, it's not something we're going to do. We were hoping to let you know today, but through the system which is getting set up, ?? it was too late. Hopefully next Friday we'll put a session in a way on a YouTube, releasing a number of videos that you can see the progress in a more rapid way. That will be the gift to humanity on that day. And it's for you to understand. We do not use any dynamic system, we do not use any motors, we do not use all the things which you, you think it might be. Evolution in technology and science of the Keshe Foundation is so advanced that we are scared even to show it in public.

(1:06) But in a way, we are not scared of the knowledge, we are scared of the abuse by the abusers. The dynamic systems which you are used to, is in a way created by the field of the Universe and not by rotational motors, because motors fail and we cannot fail. We have achieved the dynamic plasma condition of the Universe without the matter state involving and creating rotation for it, but it's done by itself. It's a breakthrough in science and technology. And this time we'll go public with it, and we offer it to the world government. But in conjunction with the Knowledge Seekers, that the governing and the governed can dictate the next step for humanity. So please, keep an eye on the Keshe Foundation. We try to put it on the Keshe Foundation website and pass it on for people to understand. We will use some of the teaching, we use some of the videos of the past to

start teaching for those who come in (new) to understand what is happening. And we'll bring in the advanced knowledge and technology, we will show them in Isfahan. And from there we'll see how the governments decide the future of mankind. I can open a suitcase, build a house, close the suitcase and move on. This is a reality which is in our hand and we start sharing it with the Knowledge Seekers. And this time is a progress over next three months on this channel,

(1:08) step by step. We close the suitcase and we show it and open it in Iran, in Isfahan and then it's for public to see. Lift, motion, creation of energy, food, matter, the structure of the construction of the fields of the Universe to create the illusion of the matter state. So, please join us and at the same time support us. This is going to be extremely terrible time in many organizations trying to stop this technology to reach out. Because as one of the Chinese people told us, this is disruptive technology and we don't understand it. For you Knowledge Seekers, is the knowledge you gathered for years and now is to see the fruit of it. We give you all the details in the next few days in different channels of the Keshe Foundation, in the groups and spread it around and explain to people what it is. Because we keep it very secret, we're trying not to show any part of the system. We show the effect and the results, step by step, day by day. And we are and we have started the testing, we have started the preparation of the testing and we've decided to share

this with all the Knowledge Seekers, this time direct, that you are prepared for the conference in Iran.

(1:10) And as you understood, the creation of the matter state out of the energy, ?? leads to creation of the Soul, which that Soul is part of the structure or the transmutation from the craft you fly. So we complete the two sides, on one side in Iran and secondly next year in Washington. And hopefully it'll be the time when there'll be no race difference between, amongst men on this planet. The only race will be the race of knowledge. How much more now we understand we can add to the knowledge of the Creation and the others. Thank you very much for listening and I hope you enjoy the trip in the next three months till we get to Iran. Any questions? Q: ... Thank you for the love you give us through knowledge. The Soul of plants is at the connection point of the stem and the root. When we only use flowers, leaves or fruits we do not kill the plant, unlike an animal that is killed to eat it. Bad behavior is the same. Why is there abuse of another being? Is there a difference when consuming milk and eggs while we are in this process of change,

(1:12) even if we ask permission from these Souls? K- We don't kill a plant but we take a flower of it. We don't kill a plant but we take the rice and wheat from it which leads to its demise. We don't kill a cow till it gives a calf and then we kill the mother, because now it has a replacement. We only look at what it suits us and we only look when it suits us. And would it bring any difference in how we eat, what we eat, the way

we eat? Or would it bring the difference when we decide we don't need to eat but we absorb energy instead of eating energy? That's the only thing we have to learn. Because when you absorb it, it's available for you to absorb. When you eat it, you destroy it to take from it. I said in one of the talks to one of the religious leaders a few years ago. We put a man into prison who goes to the bank to rob some papers, we call it money. But we walk proudly in the same building next to the bank. We rob a life of animal from the butcher, or from it, a supermarket.

(1:14) We buy many lives from it and we walk out of it and no one puts us into prison. Because we have made it acceptable, we have made it known because we all do it, then it's accepted. We don't see that many bank robberies, because all the banks are closed. Now everything is electronic, you don't need to go to the bank, nobody carries suitcases of money and we are all online. We do electronic banking. Why can't we do the same, close the butcher shops, close the bakeries, and do everything online through energy the way the Keshe Foundation says through Apps. We promise you we haven't killed any animals but you receive the proteins. And you all know we are the truth, it's very true because you all created that amino acid on your CO₂ boxes. Did you kill anybody to put their fat on it? So it's how we interpret and how we want it to suit us. But if you live in the dimension of the field of the Universe there is no interpretation. It's one rule, you need, it's available, you don't need, you put

(leave) it there for those who need it. So if you understood that then I think you have found the answer to all the points you raised. It's us who create preferences,

(1:16) it's us who creates what's right, what is wrong. It's us who decide, I take the flower but the plant's still there. Did you ask the pain of the plant when it lost its child? We give back to the child, we leave it, we grow it, we nourish it and we die and it dies. Why can't we do the same thing with that flower? Why do we need to cut it? Why do we need to harvest the rice and wheat? Why can't we just tap into the energy which they make available to us? This is a question, this is what mankind needs to answer in the long run. Eating will be only for those who live on this planet. When you leave this planet there is nothing to eat. So why do you not eat outside and use the field of the Universe but when you come here on this Planet you become murderers? In the land, sheep, rice, in eating you chew to absorb the energy. Why can't you live the same as when you live in Space? Any other question? Q: ... The Knee Gans allows for regeneration.

(1:18) Mr. Keshe, told us that some parts such as joints can at a moment move to find a balance if necessary and with this effort they can be regenerated. Does the same happen with a leg bone that is deformed for many years and can it be corrected so it returns to the correct position using this Gans? K- These Gans's are energy, they're not medicine. They're energy packages, and 'horses for

courses' as we say in English. You have to have the right mixture of energies to do anything. And these are not based on creating condition for Calcium. And these are energy pack Calcium's and this has to be done in the correct way and understood correctly. And the Keshe Foundation, Wellness wise, is going through a massive evolution and changes at the moment. As we said we keep silent about a lot of other things we do, and we're doing. But in essence a number of the sections of the applications of the Wellness of the Keshe Foundation has started the first what we call, clinical trials. It's done by independent organizations and we are just provider of the knowledge and technology. And It'll take the next year or two when the four clinical trials will be completed by the government

(1:20) and most of these materials will be in pharmaceuticals and in prescription by doctors. This is what's long standing waiting to be done now the process started and some of the nations are helping us to do it. And once this is completed in European countries and the rest you will understand that the Keshe Foundation Wellness applications will become part of the what we call normal world of the medicine and Wellness. As I said the clinical trials the preliminary stages has started, and so we wait for many, many applications of the Keshe Foundation at the same time to go through these trials step by step, and you will see it in the Western Europe and the world very, once the full licensing and certification. It

has not been done, not be done by the Keshe Foundation, it's done by organizations who have taken this up to bring this into the world of the medicine. And it's their job, we are just a provider of the knowledge and know. So more detail everything to do with the Wellness will be more or less on prescription and the rest of it in a short time. Once what do we call it these companies and the structures of organizations do their job which is necessary to bring these kind of things to market. But it's a long term and it'll be talking two or three years.

(1:22) But the process has to what you call, the clinical trials for a number of the applications of Keshe Foundation technology, in the preliminary stages has started and takes time step by step, but now we are on it we stay away from it till we announce the products with the full certification. So but each part is applicable to a given thing, what is for the eye do not use it for the head because it's in the head. So you can do something else. What is for this in your what you call it, the structure of the emotion of movement, or called cartilage and the rest of it, again as an energy system and as connection correction to your Soul. Use everything according to what it is, but .. you cannot use one thing to the other. Any other question?
Q: ... After the last transmutation session my fingers changed shape. The fingers are much straighter now, no longer bent over. Thank you very much. K- I hope you're not going through any pain. These kind of changes sometime comes because the body has

taken a shape in a certain way and what you call it, changes if it comes through the Soul it'll be painless, if it comes through physicality you'll suffer, if you have no pain it means the correction is done by the Soul, (1:24) as simple as that. You got to understand I've explained this many, many times before, if you have an arm which has not moved for a month and you want to move it, it'll take a lot of physiotherapy a lot of movement gradually to get to where it is, or where you want. But when you see we do things like with Naomi lying in a bed for a month without any movement. Which you lie somewhere for a week, the nerves cut and you ?? can't get a leg moved, or more, you understand it's the Soul which is moving it. It is not the physicality, not the neuro system. And once you understand this difference then you see the change comes without the pain comes through the Soul. The change comes through the physical dimension always carries ?? .. because physicality has to handle the changes. When you're bent for 10 years 90 degrees, if you stand today you break your back, you damage your leg, you damage everything else. And secondly, cannot be done. But people who use our technology do, and this is the amazing thing about it. Because the change comes through the Soul, the water is just illusion. And we've seen this many, many times and I cannot get people and the scientists and doctors to understand. You have somebody bent for, we see a lot with old age people especially women after age of 70,

80 and many of them due to accident whatever walk bend forward.

(1:26) something up to 80, 90 degrees bent. And when we use the technology within a week they walk upright. It's impossible. that cannot be done in the world of science of today, physiotherapy and everything else which goes with it, let alone some clear water bringing such... Because when you elevate the Soul, when the desire of the Soul is to reach physical dimension, you feel no pain because it's already looked after. Then you understand how and the way these things are done and how working through the Soul for changing the structure of the man is much easier than actually putting man through a lot of other things. We see that many, many times. Any other question? Q: ... For someone that's in pain, say with colon cancer or some other great pain, and they start to hallucinate, they can see things that normal people do not, he says. So he's wondering if the Twinity products, if any of the three new Twinity products that were launched last week, would do any good for the pain or the hallucination.

(1:28) Can they help alleviate the hallucination? Can they help alleviate some of that? K- I can't answer you that. I cannot answer. These are all what we call, energy Wellness systems and another cure or medicine. It's a totally different dimension of the plasma work of the Universe. Then we try to bring in the word of the language, but, that could be understood, but these are not in any shape or form,

for any purposes, and they put on and on the trial systems that we see it. Q: ... How can we help unblock the reluctance of the scientific communities toward developing plasma technology? K- The reluctance is. We face it every day. And the answer to it is the YouTube we put up. We open, and then we pass the agricultural test, medical test, and the rest. We're bringing it, a new technology,

(1:30) and we show it. And this has never, this cannot be denied because the system on its own is there to do, and this is to bring transportation, transmutation all together in one go, in one system where we change energy to matter. Nobody can dispute or nobody can say, 'I cannot understand, this is fake,' because this means their position. Very recently, something very interesting happened to us. We came across, or somebody wrote somebody across to us, that he was supposed to be connected to somebody internationally known with a Nobel Prize. When I spoke with this guy, because now they're partners apparently with a Nobel Prize winner, that then I could speak to, or they could put me, or we could meet with the Nobel Prize winner. And in the conversation, I explained to the guy the Nobel Prize your colleague claims, belongs to Keshe Foundation. And I explained how even advanced we are compared to what they claimed and they got a Nobel Prize for. And the guy was a bit shaky, and I explained to him, I tell you why it is and how it is. I said, Keshe Foundation has had a policy for years from the establishment of the Keshe

Foundation, that we record all the IPs who come to Keshe Foundation,

(1:32) who's come, what they watch, what they've seen and the rest of it. And I said, your Nobel Prize winner's IP appears too many times on the Keshe Foundation website. And the claim of what we show now is becoming a Nobel Prize. Discussion more or less, it was stopped. And I said if you have a problem, we'll send you the copy and tell me if his IP is not there. Many people have played many things and use many parts of the Keshe Foundation technology because they don't let us to be in public. But don't forget that was the whole purpose of opening patents, that everybody can use it. And we've seen again, as I said last week, with a guy in American naval, claiming the Star Formation and saying, the owner does not want to go for a patent. So I did it. We are well known. And as one of the guys in the security told me in past few weeks, is that no government would like to talk to you because you're covering too many and you enter the energy world. And this is a cycle nobody can touch. So the world of science knows. Now, is if one of my concern is by showing the weights, and then the system, and if YouTube will block us, find an excuse to block us for the rest of the world not to see the evolution in science.

(1:34) You got to understand, once we start putting this up and once we show, the richest man in the world will become the poorest man in the world. Musk system is obsolete, his cars are obsolete, his 1 million

project for CO2 capture is obsolete because you're all doing it. Then it comes to even you go for what you call it, the new Amazon system. These are all become obsolete. We have asked and most probably in the next few months will bring this into operation. Because if you understand transmutation and you understood part of the teaching of today in past few weeks, I can put a microwave-sized material in your kitchen. You see on the catalog, you like a dress, you like a cup, you like a car, you like a toy for your child, and the factory has such a system. You remember the fax system, you could fax. Nowadays nobody uses it. Ask anybody for fax, they say, 'What?' You can transfer the product from the factory into your house in your microwave, what we call, 'Plasma Wave' unit. These are not 100 years away, these are a couple of years away, two, three, four years away.

(1:36) And when we talk about transmutation and I softly touched on it about and say, if you make a cup, a few weeks ago, because we know what's coming up, we are researching, we are developing, then who can deny it? We didn't bring this technology for some, what I call, idiots like so many we've seen, stealing and claiming and then going to grave with it. We brought it to bring the change. I was in a meeting, one of the biggest container manufacturers in the world, and I said to them, "In two, three years time, your technology, your system, your company is obsolete unless you play the game with us." Who will ship a container across the world when can do the same

thing in transmutation, or it can do the same thing in transportation, rapid sales delivery. We're not waiting for it. A lot of people are using our technology and now in the next three months, we will show the power of this technology through transfer of energy to matter and transmutation and transportation. They can block YouTube, we go to another system. We can do a lot of other things, but don't look for it, don't wait for it, when they will, they all know, they all know. The world leaders know the Keshe Foundation, world scientists on the top rank who are after advanced technology, they call me so advanced that they cannot even understand it.

(1:38) So I dismiss it. I've heard this 20 - 30 times in the past month or two. This technology is too advanced, is one of the most advanced technologies, we don't know how to handle, we can't understand it, we need it to be explained to us that we can understand. Sorry, I don't have time, go and read the books. The whole structure, you have to understand the evolution in Space Technology has to come from within the Keshe Foundation and not through American government, Chinese government, or another government. Then we'll be finger-pointed as they are this, they are that. This is why from next week we put it in, we run as 'One Nation,' we decide as One Nation, we deliver as One Nation and you are the citizen of it, you're Knowledge Seekers. We don't need to be recognized, we bring it in and we dictate by it. You will see when we brought 129, there was a

lot of blah, blah, blah with it. Now we show, we bring in the flight. We'll fail in many times, or you'll find something goes wrong, mechanically something fails, we fix it and move on. Next step. And in a way this is combination of the Blueprint and open teaching and you will see it, and you will see from next few days we give you the YouTube channels, train people, teach people, this is what we do. We are not afraid of failing, if we were, we were not putting it up.

(1:40) And I hope governments won't go for it, because I go for governments. If you have this knowledge to be able to do this, we can block any means of communication, we can block any means of transportation, but this is not a job to do, it brings hardship to the other people. The technology is there to bring the advantage to bring what it is there. So from what I see from where I sit, many governments don't like it to be. We requested a direct meeting with the American government in the past few days. We requested a direct meeting with the British government in the past few days. We have requested a direct meeting with many governments, and they all are scared. The response is, 'you'll become too powerful, and you will bring changes.' That's the response from the leading nations in the world. They do not want the Keshe Foundation, as they know their position is in danger. Just one second, please. ... Sorry about that. So, don't tell me we'll be known. We are known because in the past handful of days, I've

been told the American government does not want to talk, because they're afraid of what is to come.

(1:42) The same with the British, the same with the Israelis, the same with the Chinese. So, when they don't listen, they don't want to listen. We bring it up. This is one of the reasons that this YouTube is set up, this presentation is set up by the same time. You Knowledge Seekers know that the Iran conference has been on the horizon for over a year and in a way, the rest of the thing is getting ready for it. And we are not afraid of it, but we are prepared for the next step. I said to some influential people, 'What is going to be the answer to your leaders when they tell you, "Why didn't you tell us this before?"' Your leaders already know, but you'll be the scapegoat, you'll be the ones who spend time in prison and the rest of it for blocking the technology, not us. And as we are one, what you call it, One Nation, One Race, we do it our own way. We are not looking at how many people will watch the YouTube, but we put it there to be watched for you who understand it and then to be shown at the appropriate time. Any other questions? R: That sounds quite exciting. Thank you, Mr. Keshe. K- You have plenty of videos of the 129 in different parts of it.

(1:44) We will show you part of the system which has come up, and it will be for your knowledge because we have to share it openly. And in a way that needs to be done that way. It is a privilege to be able to work with such a beautiful team and to be able to bring the knowledge at this level to you as Knowledge Seekers.

And you will see something very interesting where, when I tell you we have started this process, we are measuring the weight loss. We are setting the system up, and maybe this gives you an understanding of what is to come. This is how discreetly it will be played. This is very direct, very simple, but it will be the evolution in the world of science and technology. What this means is that structures, technologies are developed which have to be the property of all human race, not the exclusivity of a few governments and nations to abuse the others. We've done enough of this. And how we will show, how we will see, and what we will see. And some of you have already seen this in,

(1:46) what you call it, in London. But now it's a system. It's an individual system. It'll be in what we call, process of completion, it's going through its final phases, of what you call, final testing. And you will see such a structure. This is... (Rick. I have sent you a video. You can show this video if you like. If you can share it, It is in our usual communication line). We have, what you see on the screen, once Rick puts it up, is what you will see continuously. The same as what you saw with 129 (Tesla), where you will see continuous, on a regular basis, updating the pictures, the videos, the films. And at the same time, in between, the teachings. You see when I tell you the system is ongoing, it's not going to happen, then ?? we'll come. This is the weight of a system, a very small amount of energy, which will create one of the

biggest spaceships, biggest craft carriers man has ever known.

(1:48) These are indications of the kilograms on the four sensors within the system, to show us the lift or the landing, and how and when the system will start moving ?? up. And as you can see, it's a Live system. So every time you come, you check, you see a different figures (on the meters). You know if the system is about to take off, how much it's going to take off. Would that 23 become 10? You try without any propulsion, anything, reduce 10 kilograms by solid-state, no dynamic system technology. And you can check it every hour. We try to post the picture as frequently as possible, a video. And you will see in the next step of it, other videos which are connected to this structure. Once we start building the physical body of it through the interaction of the fields, we'll post you up. And this system, maybe 20 - 30 kilos, will be demonstrated in Iran, where you will see the craft, you will see one of the most important ever presentations in the world of the present science. How many grams in which shape, how many in which way. We don't release the structure or whatever.

(1:50) You will see in the more updated one, the time which is taken, which will be a time accompanied on the side, with the structures that people can understand. And you will see how World Peace will be achieved through such a small system, and all nations will be equal, because this technology will go to every single nation. Doesn't matter if you're African, if you're

United States, if you're American. You all have the same, you can move the same. Doesn't cost more than a handful of few thousand to build it. And as we did, we shared with the governments the key, and then we released it. We'll release the technology in full detail to every man on this Planet. And then we'll see how you travel, how you do, where you transmute. And I wonder, which nation will block this. And then you'll understand much more as we develop. We went in on 129, it took us a long time to build it. It's plasma, and needs time to create. What we do in this system, as you see, it takes two, three million years, and most probably a billion years to happen in the Universe. It's not going to be one second. But once it's established, once it's done, you can control systems that prefer and perform as you wish, as you want.

(1:52) So you see, we don't go for a Blueprint to show. We put this as it brings up, it changes. You might see sometimes figures increase because we add in the background things to the system, because it's necessary. It's upgraded, .. it's adjusted according to. And then you will see the outcome of the results. And interestingly enough, we tested this with you Knowledge Seekers last week, and some groups of you, when they came to operation, could move through your emotion, changing the weight. This what apparatus you see, in the what we call, graphic system, was tested on. Or you as Knowledge Seekers were part of it last week. The headphones were hanging inside the system in the center, in a different

shape or form. So you've already been ?? touched by it. These researches cost tens of thousands continuously for the Keshe Foundation. We receive no helpful support from no government that they can influence us. What you Knowledge Seekers donate to us allows us to perform, to stay independent, and to be able to share the knowledge like this. So raw, so what it is, you see it.

(1:54) The structure, the system is and will be ongoing for until we go to Iran. We need a lot of financial support to bring these things out, to stay independent. We don't ask you to donate to us. We spend it if it comes, is there for us to do. We need millions of dollars to keep independent, to keep Keshe Foundation to able to share technology and science the way it is. And now, governments start collaborating in a different way with us. We can't accept money from governments because then they say, 'You're with this, you're with the Chinese, you're with Americans, you're Iranians,' and the rest of it. But we showed it in their nations: England, China, Iran, Washington, Mexico, everywhere because it belongs to us. We brought this up, we, as collectively, Knowledge Seekers, we build this system, this technology around the creation, and most of the world leaders know. If you see these figures, touches zero, is the time when you run because it means it's gone. The system has taken off. And if you see structures, if you have problems seeing these figures during the test, means the material structure of the fields of the system has

taken shape. Now it is becoming a UFO. There is no what you call, dynamics except the dynamism of the fields and their interactions.

(1:56) If you start seeing these figures blurring up, becoming blurred, it means because these are inside the system. System has nothing sticking up. So it means the walls, the fields are creating that elusive fields. This is what has been in the patent. We are not doing something which hasn't been in the patent 20 years ago when we submitted. Now we're showing how correct the patents are. And I've asked, and I'll ask other Keshe Foundation teams and people around us to start making the small documentaries, the way Lisa does, the ways others do, just about the technology that we can put on the YouTube that newcomers understand, not the political side, plane my teachings. If you can segment it about interaction of fields, about whatever, that we can place it on the YouTube that newcomers can understand very quickly what they're watching and what it changes. And only science part of the teaching. This will help us a lot to bring the new channel. Because the present YouTube channel of the Keshe Foundation has too many documents going back over 10, 15 years and there'll be a lot of claims here and there. We keep, we want, we set up this YouTube that it stays totally focused and millions of people can come and go. And then you'll see who will know and who needs who wants to know and what will be the next step. If you see the YouTube has gone down, use your (own) system to

spread it (the videos) around and let other people know. And then we'll see the next step.

(1:58) This system can be reduced to size of a shoebox and will create the same thing. You remember the Oasis system which we put out 20 years ago. This is the beginning, the outset of the fully operating Oasis system. Shelter, food, energy, travel, health, everything within one system which sits in front of you. Any other questions? Q: ... Today, you know what you're talking about. It was two weeks ago that you said you went to a couple of high-ranked scientists and, you know, you used to go with all the theory. I mean, all the information you had. There was nothing substantial they wouldn't accept. But this time, you went with complete product. Like, for example, if you have a, you went with a cake and you said, 'This is a cake, you should eat it.' That's how it's made. We used to make the cake with the sugar, flour, and vanilla, eggs, and all these balls that held the sugar, flour, cake, they're empty balls, but I made the cake for you.

(2:00) You can eat it, you can taste it. And since they don't understand it, they dismiss you. But why we have to be a slave to them? If we have the system, we have the system that you created that is a Gas Unit. You can create gas. K- We are not... Q: ... hold on a second. If we give this Gas Unit anything we create to every household. You did all this, all these high-ranking scientists. They have a boss, their boss is a politician. When every household has a Gas Unit that

doesn't need the gas from government, they're going to grab these scientists, said, 'Why didn't you understand it? Now I have my gas worth nothing, my oil worth nothing.' So why can't we do that? K- A secret service guy told me recently, they don't even know if they want to kill you with your Gas Unit. You have entered the world of energy, which is so lucrative. We haven't entered the world of energy. We create the energy from the field of the Universe. We don't go to get approval. All the scientists we meet, we go, we sit to teach. I don't need anybody to approve. When they go there, I teach them and then they have to assess what I say. Because if they don't. I said to them many times if you've been with me in meetings, I say, 'How can you ask a man to give you the judgment of the French cooking when he has never even had, let's say, a croissant?'

(2:02) These people have no knowledge. How can they pass a judgment on the thing? We go to these meetings to teach them, to tell them what is coming, what is there. We're not going there to ask them to approve it. It's they think they have to approve it, because they know they have no position. We went last year to the highest academician in the China Gas in Beijing. We took the systems to them. We took our gas meter. They didn't accept it. They brought their gas meter. We went into their most advanced laboratory, you know what the guy did? The guy took a leg and ran. I don't understand this. I say, you don't need to understand. The system gives you gas, your

systems calls it a gas. "I don't understand. I cannot accept it." Because his position as a leading Chinese academician was not valid anymore. We took the material to the most and highest to the highest, the guy has, the presidency of China swears on him, he is so advanced, he's the man who controls, understands, Rare Earth materials and he is god. He sat in front of me with another woman which were appointed by Chinese Military, with two generals there, Then with the presence of three Chinese generals we went to the mountains. We created material in the mountains.

(2:04) 32 materials they tested in their labs, not ours, nothing to do with us. They came back with a report what materials they have found are created in open space. The academician, the first five minutes sat on the table, came with, "No, no, this is lie, this cannot be, this is all lies." After two months of testing, then they evaluating the material, they went to him, he refused to meet. He said, "This is a technology I don't understand, it doesn't exist." They said, "The material, we collect it." We don't go to teach, we go to show, to increase their knowledge, but, they have no control in anything, and the only thing is, the knowledge is getting used, and it's getting applied in different ways, with the different names. But, that was the purpose, we all patented and opened it. I don't go to get approval from no one, because they, how can they approve something if they don't understand? Q: Mr. Keshe, what I'm saying, I say, we don't need their

approval, and then we can provide everybody with that, and then, we don't need, we don't need the government. K- No, no, you have to understand, the game is not a Gans. The game is a Space Technology. We could have released the production of these things, years ago. The whole purpose is to change the Space Technology, which changes a lot of other things next to it automatically. We are not here to govern.

(2:06) We are here to bring a new governance through every individual man how to govern himself. And that's the key. Q: Okay, my second question. This is more kind of toward medical. It's not medical. It's more science related to the body. When we inhale oxygen, our body, I mean, in a medical system, just say oxygen goes to the lung, passes through the lining of the lung and then the blood gets oxygenated, goes to the heart and then the rest, the Carbon Dioxide come back and the oxygenated blood comes back. When we inhale the... When we inhale the Oxygen... So, is the Oxygen goes to the lining of the lung and completely has Oxygen which changes to Nitrogen and what is a Nitrogen bent? K- First of all, the minute air enters your nostrils is not air anymore, it's plasma. Secondly, the most, you know when you make milk, you get the cream on the top and you separate the cream, that's the best part of the milk. The cream of the air you breathe on top of your nostrils as it's going down the back of your throat to go to your lungs, is taken up by the Soul, by the brain,

by the Soul of Physicality (STP). So our lung collects the leftovers,

(2:08) what is lower level for a physical condition. And even then in the lung is all energy. There is no matter state. Cannot be, because is opened up Gans, is changed, its positioned to a Gans state. And then, you have the conditions of increase or decrease in absorption, according to the condition outside and inside. Like when you go deep diving and then they call it, what you call it, ?? bends .. and the rest of it, you have to understand, if you look at it with the present medicine world of science and biology, you're correct. But you have to consider, once you're in the water, you're in a different plasma magnetic field condition. And that condition, does not match the Magnetic Field of the, what you call, sea level, or the water. Above the water. So, you have created a different Magnetic Field, (it) changes different absorption, and your body is not used to it. Nothing to do with the Nitrogen and the Hydrogen, and how much you change the Oxygen level in it. You changed the environment, and you cannot match it. If the scientists understand this, and you send the people diving, with ?? instead of the what do you call it, Oxygen Gans cylinders, with the Gans cylinders of the mixture of the sea ocean,

(2:10) man can be in there and come out and go like a fish. How do some animals live in the ocean, as a ocean animals? And then they can come or live on the land? Because they can convert the pressure on the

outer layer of their body, to create the condition for coexistence. This we don't understand, so we call it the "Bends" (When divers come up too fast to the surface). Yes, because we change the environment outside. We have the same problem when we go to Space. We cannot change the pressure, the fields absorption, from the environment on our structure. And this is the problem, that we don't understand it, so we make other excuses and we make machines to show it, because we lied, so we have to prove it. But if you understand it, water, liquid, has different Inertia Gravitational Magnetic field. And you change it. You change a little bit of what it takes, but you don't change... If you change the cylinders of the divers, into a Gans mixture, they will go come out as nothing. But we don't have the knowledge so we watch. Q: You said sometimes during the operation, people under general ?? anesthesia when they have, they're connected to the oxygen, they can wake up and feel the pain. If you add a little bit Nitrogen to it, we can prevent that. How does this work? K- The science of the pain with the man, you look at the body, we look at the Soul.

(2:12) And this is what most of the Knowledge Seekers don't understand. We look at how we affect the Soul, and the Soul is responsible for the pain, physical growth and everything new in the dimension of physicality. This is, I explained to you, Giovanni can tell you, I've said that many times. When I went to see Naomi, behind the glass, she was there for a month,

lying, physically, body cannot move. Did not move. How come in that moment, as we asked, move leg up, move leg down, we had no tear of the tissues, we had no damages to the muscle tear and everything else? Because when the Soul moves, when the internal energy moves, looks after every application. Where, why, why do you have a problem, tear of a muscle tissue, if you haven't moved and you suddenly move it? Because the program for its elasticity, for its, what we call it, change, has not come from the brain, it's a physical matter sitting there. When we work through the system, even the elasticity information for the muscle tissue, every string to be changed, is already come from the brain, from the Soul, so it's there. This is why I keep on saying and Knowledge Seekers don't understand. Why do you need to work with a foot soldier to get something done when you can work with the General? And our present science works with the foot soldiers, physical body of the man. This is why when I work with the Wellness teams,

(2:14) when I do things with the groups, it works and it is and when I leave it in the hand of the doctors and everything, ?? all (?? problems) crops up. Because, the emotion of the Soul is not understood. "Oh, Mr. Keshe does this." And when I leave the system behind with somebody else, it always runs into problem. The progress is not there. Because, the effect, the operation, the control over the system through the Soul, is totally ignored by World of Science, by our own doctors in Keshe Foundation. We showed so

many successes when I was in it running the system and showing the system, because I work with the Soul, the phone is just a game because they can see something connected. It's the same, everybody can do it. It's not exclusivity, it's understanding. When I give you a bottle of Gans for something out of my hand, I already moved your Soul. That's just the gimmick. Q: Mr. Keshe, if you remember, when Jesus saw the blind man, and just took a little bit of dirt, and told him to just put on his eye and go wash his eye, and his eye got restored, and then nobody else can do it, so that's what you do. So, you became Jesus now. K- No, we've done, you see, you see, I come from generations and generations of medicine men, (2:16) ?? Hakeems. I was talking to one of the Knowledge Seekers last night actually about this. We're talking in depth about something. My great-grandfather went to see the Shah of Iran at that time. Because the family, they were all, what you call it, 'Hakeems'. ?? 'Atars' and 'Hakeems' together. Which means they made their own medicine, and they prescribed as a doctors to their own patients. And they were so good at it, that they had so many, because they're all uncles, and brothers, and everybody in that job, that in those days, 250, 200 years ago, they bought their own villages to grow their own material. And one of the villages was given to farmers to do things, and it wasn't given. So, my great grandfather, I was told this very recently, a few years ago, goes to see the Shah of Iran, for him to listen to his claim, and

return the land back to the family. And as he comes out of the palace, he was executed, he was killed. For the people who took the land, gave a bigger bribe to the Shah and his entourage. I come from a blood which carries this, as most probably, ingrained in my blood, without even actually doing it, is a part of the genes of it. And, as I said once before, I met my aunt 2008 when I went to Iran. And she lost her mother when she was very young, before even being a teenager. And she said,

(2:18) "I used to sit and watch mom, because my grandmother, ?? learned from my grandfather, and as he was a Hakeem and whatever." She said, when she went to one room to get medicine for people who came, I could say, "This (one) is going to die." And if she went to the other room, ?? she said, "Oh, the patient is going to survive." They even separated the medicine, which was for people who had no cure for, but they could help them. Because they understood the world of the effect of the medicine. It's like Chinese medicine. Chinese medicine was effective, and people believed in it, because it was pure, it gave what it was supposed to. It was a Gans mixture. With farmers adding chemicals and everything else, and fertilizers in past half a century, or whatever, to get more harvest, they have changed the structure of the herbs. They've changed the structure of the agriculture. So, it's not as effective as it used to be. So, Chinese still go to get the same medicine, but they don't get the same effect. And that's why their

system was much better, their medicine was working perfectly. But because of these pharmaceuticals and everything else coming up, and now the Western medicine is totally changed. If you go to China, when I used to be there, the doctors ask you, "Do you want to go to a Chinese hospital or do you want to go to a Western hospital?" Even they ?? study by Chinese, Western medicine. We understand the structure of the work. We understand the structure of both matter state, the Gans state, the energy state, the vegetation state.

(2:20) And how you move it, gives you the effect you want. I never read a medical book, I never studied medicine. But understand the structure of the field interaction. It's like alphabet, when you know alphabet, you can write ABC and then you can write the word, sentence and paragraphs and a book. And you have to understand I've written the book. And you've all read it. So it means we understand ?? from it. Q: My, my last question is about, in one of your teaching you said, there is a time comes that, you will see the ?? crucifixion. Actually, only human going to see, visually, the whole human history, from start to finish. And when is that time? K- The time of when you pass away. Everyone is the judge of his own Soul and conduct ?? and his forefathers. Q: So when we die, we can, we see the whole history when we die. K- It's... of course you don't die if it's just that it's a fast movement moving, what do you call it, passage of time as you call it. We don't see, we become aware of.

Seeing is different than being aware of. Q: But you said from the time of Adam and Eve it means everybody who dies, sees from the time of Adam and Eve all the way to the present time? K- Because it's in our RNA. We cannot be here, if the collection of the fields of the past wasn't in it. It's impossibility.

(2:22) So, if we go back to the time of the energy we are created from, so we have seen everything. But we don't, even if we are created from the field of the Universe, it's the same, because they carry, they're all connected. It's that twist at the bottom of the rings I put. We all come from there. Doesn't matter how much we divert and deviate it. The total energy as I said many times. You get a magnet and cut it to as many pieces. The strength is the same. Because it's the same. We are part, we are one of those pieces of that magnet. And that magnet has millions of atoms coming from different parts of the Universe to make it. So we carry all the information.

<< A German Knowledge Seeker raise her hand by mistake >>

(2:24) Q: ... Seven years ago my Gans's were perfect. It has been very weak for six years. May I know the reason please?" K- It is still the same Gans's or you're making different Gans's?

(2:26) Gans's are living things, they give and take, and it depends what structure of it you use. It's like going to a bakery, and having bread, cakes, and whatever. When you eat all the cakes, only bread is

left behind. So, you can't enjoy the, what you call it, the cakes. Gans's are those, the same. You use, through interaction or whatever, certain field strength that you are used to and affects you. Or you could have a connection that field strength with you. You have already eaten all the cakes. You still have what is bread. You have to find who likes the bread and for what purpose. And partially in the World of Creation always said, you know when you see a ?? poison something like a nettle in the field, a few meters away you see what you call it, I think all the cow leaf in that area where when the nettle bites you if you get that leaf and rub it the pain goes, this thing goes. World of Creation is the same. If your Soul needs, your body needs certain strength, when you make the Gans's it's provided. Now you met the demand, there is no need for it to absorb. This is the way the Universe works. You take what you need, not just keeping and holding it. There is no reserve banks in the world (universe). Partially, the Gans's you created, at that time your body needed it, so you created seed for it, and you created that strength. So you don't need it. Now what's the use of it?

(2:28) So I say you have a car, do you keep on driving because you have a car in the house? You have to understand a lot of things about the working of the Gans. Secondly, does your Soul accept to receive that energy because you've done something that it needed something that it needs another energy, it needs another direction for you to learn something from it or

be put somewhere for it? Any other question? Q: ... Does the maturity of the Soul lead to the maturity of the physicality, or vice versa? K- No way. If the man, physical man was mature as the Soul, God knows, this place would have been heaven. Long way to go. Long, long, long, long, long way to go. Any other question? Q: ... Can you tell us how the process of building the town only with plasma technology is going? K- Don't ask, we'll let you know. We'll tell that you know exactly where and how it is. The production of these new Units, especially what's on the screen, will allow creating cities where you decide the world and place, and partition.

(2:30) It's a different dimension of work. There are a lot of things with this picture on the screen you see. We try to educate you to it and see it. And then you learn more. We started this deliberately to bring forward the presentation in Iran, to preparing the world leaders and governments for what is to come. This video is one of the very first videos of the system independently set up and there is a reason for it. We are not trying to hype it. We are trying to bring it and people understand. You, you will see when we go to Iran, when we open a suitcase and we'll build you a craft. On its own. You will understand. This is where we rule, this is where we bring the ruling of World Peace. Q: ... Hi, so what is it when you wake up wide awake, free and liberated, flying in a white light, but still aware you're sleeping on your bed? Because I looked down at my body and saw exactly what's on

your book. Light in a cylindrical form. Although it looked like coils going back and forth like crazy, around a see-through tube.

(2:32) And why did it feel like my back was going to snap in half, when pulled out into this state? K- I don't know, I wasn't there... This is ,we don't know, we don't understand the position and the structure. And because you created it, it's your emotions, not us. And this is one of the biggest problems with this work. You are the passengers and you are the ?? sole passengers. You're the last man standing and you're the first man standing, so you see, we don't see. You have to understand why and how it happened and what's the reason for it. Or is it just a passage of time?

R: Are there any general rules regarding say, for example, seeing colors or colors of light, or different images or anything like that? K- No rules. Not really. There as no rules. The Saturn ?? goal posts you watch as you understand, and those goal posts part with this to do with you, and part of it to do with the interaction of the, what you call, the fields and in general, how the behavior of the Universe ?? works. Shall we call it the day? If you don't have any other questions. Q: ...

(2:34) We have a one more question, perhaps, it's a combination of, both Antonio and Gatua, who are both asking for updates on the Plasma feeding systems in Gaza. And have many received benefits from the Plasma Technology, and are the Israelis trying to stop it? K- That system ... was changed a few weeks ago,

and we are looking at it to change it. We... we made a mistake internally, and I just got to know about it 2-3 days ago. And then we tell you once we restructure it, something internally, which has happened with us, with our system, but we have opened the channels, so doesn't matter what happens. We still know what goes on, we still connect to... You have to understand, once you start the system the way we did, through a specific way, it cannot stop it. It doesn't need a telephone line. And, there is a lot of things which we need ourselves, our team needs to understand. And it's still, it's still the same operations. The systems are there. And it's just the, what you call it. We saw a lot of Knowledge Seekers, having the number, were abusing the system. A lot of Knowledge Seekers went through Palestine number, we told you not to do it. And we saw it by accident a few days ago.

(2:36) And they use it for different purpose, or it was connected for different purpose. We cannot establish, because it's number of people who've gone through this. Where they were not supposed to be online. So, we have to change it and it's gone through the process, it's getting changed. Because now the line is established for us, we know other ways of connecting, as we ask Knowledge Seekers, deliberately and directly, not to use the webinar number. And a number of Knowledge Seekers or 105 have used the ?? System. What ?? reason for, we don't understand. But, we... I'm still ask... I asked for it yesterday before to look into how this is happening. With a line to

Palestine it is a opened up line. It's... if you understand how we work and then there's no harm done. And it's there, they take what they need. And I have to understand how these things happened, that ?? they cannot ?? abuse it (?? and hurt themselves). Any other question? K- ... Next few days, in different channels of the Keshe Foundation, we will release the YouTube, what you call it, connection. Give it on, pass it on, explain to people what it is, and we are not afraid of anything going wrong, because we are there even since we started it, we have found out a lot of things needed to be added, or what you call it, we learned, we changed.

(2:38) And if you see changes in the numbers going up, if it's in one step it means we've added something. But if it goes down it means we've taken something, unless we announce it. We try to make a small video announcements in between that you can clearly understand what is going on, what is connected with. And as I said this is the step towards the conference in Iran and a step towards the 'Unicose system' for transformation and transfer and transmutation and completion. This is a dual system and is created out of, and it will lead to creation of. And we try to expand on this on the YouTube channel, step by step, as it happens, as things happen. And then we'll see where we go. And as I said, we need a lot of financial help to keep this independent. And any of you can donate to us, anything to the Foundation. Do so through the, what you call it, the Keshe Foundation system which

is set up, that we can support these things and keep independence. Q: ... Speaking of, speaking of conferences, Gatua had a second question, if there's any plans for conferences after Iran and Washington. You did mention Mexico but Gatua says, "I wish to propose Kenya." K- We, we, we have to go step by step. If you remember before Corona, we planned out the countries to go. And with Corona everything, Kenya was under a plan, or Morocco, I think, was under another plan. And after Malta we came back, everything locked down.

(2:40) And now, this time we've been to England, we know the reasons why we've been there. And then we ended up in China, in Sanya, in March. We're in Iran in November. Washington in March, hopefully. And then we go step by step, as we set out to do what we're going to do. My priority is to, from Washington to Moscow. And, same, then to, what you call it, other countries. But, we are going there to show the technology, to spread more knowledge, than actually anything else. Thank you very much. And we'll see you hopefully next week. And watch out on the different channels, when we announce the YouTube, that you follow us and spread around that people can watch, that they can see the change in technology. Then there is no fuel burn and there is nothing else. We produce a fuel, we use a fuel, we create lift and motion, we create everything else in the structure. Thank you very much Rick, and see you next week.
