Part 1

(:17) K- Yes, thank you. Good morning, good day to you, as usual, whenever and wherever you listen, to this series of Knowledge Seekers program, from Keshe Foundation Spaceship Institute. We welcome you back and, in the coming time. With what we heard as an Intro (video), and what we see as a next step, in the progressive development of this technology, most of us will have to answer one question. And that question is, "What is my nationality?"

(:18) "Where do I belong to?" and "Who I am?" "Who am I?" And, am I part of me? Or am I part of us? Or, am I part of Totality as all of us in the Universe? As now, as we announced last week, opening the new Youtube channel, and then starting to show the new development in Space Technology, prelude to the presentation in Iran and then in Washington next year. We hope that in the coming weeks, in making it public, and taking away the flight system from the hand of the couple of nations, who are testing and have had some success with it. The technology (T) comes out of the Keshe Foundation, as and the way that we need to establish the 'One Nation' policy. This is important as tomorrow is the birthday of the Universal Council (UC). Some years ago, when today the team of the Keshe Foundation was working on establishing the principles of the Universal Council, and its mandate, to be celebrated the 2nd of August. We were with

some Knowledge Seekers (KS) in the beautiful island of Sanya, and that night,

(:20) as we said we before, witnessed UFOs, massive large structures, above the building, above where we were. And the biggest problem for us today, as we open the new channel, maybe tonight or tomorrow, and start uploading, the same as what we did with the 129 Tesla tests, in how do we run this structure. The heading or the first page when you open the new Youtube channel reads very simple, it says the 'New Space Era and energy for peace.' Energy of peace, the energy of plasma. When man discovered the atomic and nuclear science, with it came the wars, destructions and threat of annihilation of humanity. Now that we go into the structure of the Neutron, Proton and Electron, we discover the energy of peace, prosperity, and freedom of the man from the Earth resources and even allowing humans to travel into the depth of the Universe (U) using the magnetic (M) field and their interaction which leads to creation of Neutron, Proton and Electron themselves.

(:22) So with this new addition to the knowledge of humans, the 'energy for peace' has been gifted to humanity. And 'peace energy' become the source of prosperity of mankind, and the freedom from all these shackles to this planet. In achieving this, and now that we are testing, and independently from any government. Launching the transportation and transmutation system, and as I said with 129 you were witness to it, you'll be witness to failures and

successes, and everything which will happen on a live testing. As we load frequently short videos or information about the test. But this brings one of the biggest problems for all of us. And as of today, we announce the establishment of 'One Nation,' as establish and pre-sync, as we did with a bit with our coins, with 'Keshe Coins,' and then the structure of Universal Council, we start structuring, what we call, 'passports.' Or, in a way, documents in that, on you arriving in a hotel, or in a village, in the United States, or in China,

(:24) Europe considers the immigrant who escaped in, or escaped out, or entered illegally. Transmutation becomes part of the structure, and very much. As I was talking to the head of the Keshe Foundation, past few days, when the Bitcoin came, everybody was against it. And everybody stopped it, and everybody said, there's something wrong with it, but now it's become normal, and it's accepted. And as we know, for example, that one of the biggest holders of the Bitcoin, is the government which opposed it totally, is the United State government, with 210,000 Bitcoins in, as a stock, holding 1% of the total assets. While the same thing will happen to us. We have established this new system. We have established a new technology. So we have to create a condition that those who use our technology travel with a document. Not necessarily in a paper form, but in acceptable form in a 'Plasma Data Technology' that the governments accept. Which brings respect to the

knowledge and technology. Which means when we land you in Washington, maybe a hundred, a thousand of you from every corner of this planet, American government cannot tell us how did you enter, why you entered, and the way you entered. So the Keshe Foundation in the coming weeks is working on the structure of it, that we created database for all the citizens of this planet,

(:26) which we hope the international structure of the governing body of the Keshe Foundation as a Universal Council, and then the Earth Council in the coming time in conjunction most probably United Nations and all the nations will accept this data of information, which means every citizen on this planet has the freedom to travel, and we accept the coexistence of the nations. The border lines will disappear as we have no say in how to control. In the coming time we'll advise the governments in how to finance their structure that does not need taxation the way we see today. It's done on other planets, it's done on other corners of this Universe and it works. Why shouldn't it work on this planet? Which means in the coming weeks and months, we start creating a plasmatic data transfer information, which means no one can break into your data. It is kept by you and only you in the dynamic system of the plasma of the what you call, structure between the emotion, the Soul of the Man (STM) and the Soul of Physicality (STP). The strength field which connects you back to Earth, it is the most important part of this identity identification,

which means if you go on Mars, you can always come back. This is the source where you want to come to. If you go to another part of the Universe, this is the source you come to. When you go to Washington, you want to go to London, it's the source where you go back to.

(:28) But at the same time, we have a data control in the information dynamic structure that every citizen of this planet has identity according to strength field of the Soul. There is no paper to burn, it's no one to hide. It's the fingerprint of the STM. And this needs the development of new computer ?? type memory structure which is already in hand. Many of you have used it but you have no knowledge of it. If you made different part of the Keshe Foundation Technology at home, in the garage, in the kitchen or wherever, you have already known this data information package. The body of the man, in data connection and collection, has a common denominator which connects all living things on this planet. And through that, the variation identifies every individual by his own, being an ant, being a bird, being a man, being whatever you are and allows totality to have access without abuse. What does this mean? This means in the coming months those of you for example who come to Washington through transmutation, or transfer you do not need to carry a passport. There is no need for visa. We're carrying the ID ?? soul confirmed and held by Keshe Foundation is your ticket to freedom.

(:30) Which means the government have no resources to stop no one from transmuting. It's an impossibility. So a new solution has needed to be found, by the government, not by us. To accept a new structure of identity, identification, who we are, what we are, where we belong to. Why are so many people in Washington with no visa. But present ordinary people, I cannot put them in prison. They cannot imprison any of the Knowledge Seekers will go through this path. Because the way we brought you, you disappear from the prison cells. Handcuffs will drop on the floor because the physicality (P) will not be there. Then you understand why and how we're taking time for everything to fall in place that is ready for it to go. If you are knowledgeable about the structure of the political structure of the, what we call, this planet, there is a very similar pattern with all of them. They all run their presidency every four years, and somehow it's 2024, 28, and the rest of it, elections rounds, between the two years in between. That the world leaders can interact with each other and have a same term connections. Many nations around this planet have sequentially has set their Presidential elections and Prime Ministerial elections to fall near enough to the double digit 2022, 24, 26, 28.

(:32) That they can establish a long-term relationship with the American presidency, and we will use this structure. Which means, we bring everything into coordination with the governments, in the time of the

presidency, that allows all the new presidents to bring the new acceptance of the new technology, new transportation and everything else together. I will explain more and more in the coming weeks and months, how this new passport works. How will become the point of peace. You cannot travel if you carry arms. You cannot travel if you have set to harm anyone. You will not travel if your aim in your Soul, in your STP and in your mind and emotion, is to create problem. One of the biggest crime, would be someone who tries to break this code, because the crime is for themselves. They bring separation between the Soul and the STP. This is how strong it'll be. So in the coming time those of you who travel with transmutation or the new flight system now in the hand of the people which will be brought out gradually, will be shown in Iran. Will bring the need and make it necessary for governments to restructure, abolishment of borders,

(:34) abolishing the passport control, abolishing the wealth control. In a way everybody makes wealth and it's right across everyone use. You already know this structure. The pension policy is the basic of this thing. The national health policies are part of this structure. The what we call, unemployment benefits in some nations is part of the same policy. But now become globally acceptable, it has to be. And the new, what we call, passports, or ID presentation, kept by a data that we all accept, will abolish all the things which man has made in past centuries to control wealth, and

who's wealthier, which nation is bigger and which nation is smaller and the rest of it. The lies which we have accepted, even in our geographical presentation of our own planet, all this will come to an end. Europe, Asia has been made so big, that America has been made so big, and Africa in the present plans, were made so small. But, if you look at the actual data, Africa is bigger than the whole lot put together in some cases. White have decided Africa black, so if it shows small, it diminishes its value, whatever it is. As I was talking very recently, and even today with another Knowledge Seeker,

(:36) you go from Rome to Beijing, it's something like 6,800, ... miles, covering Central Europe to the East of Asia, but if you go from two points of the top of Africa, from point to point, it's 7,500 miles. Africa is bigger than the whole of Europe and part of Asia put together. But we've been created that image. We bring that equality in. We bring that equality of human irrespective of place, land and position. As when we go on Mars, we are not from London or New York. We are from Earth, when we go to another position, we are from that star. Nobody cares where that, because they don't know, they are not aware of nationalism sectioning part of land. We start learning the process of life in Space. Collectiveness of a race, collectiveness of the 'Soul of the planet,' collectiveness of the Soul of the structure of the galaxy and the rest of it. So, in the coming months and weeks we'll introduce, we have to introduce, for

those of you who we transmute to Washington, an identity. We ask none of you to carry a visa. Doesn't matter which nation we take you in from. American government has no control over how people enter. As long as we identify you are with us, you are part of the Keshe Foundation structure, and the new evolution in travel.

(:38) Nobody will be immigrant to be deported. And no nation will have over values, over the others, that we block you not to use our facilities. Mankind structures in the coming years, will work to undo what they've done for past decades and centuries to get kingships, to make which nation is more powerful, which nation is more wealthy, to which. Is One Nation. How can we, us collectively do. Because I can transmute from Africa into Europe, and you have no control over it. It's instantaneous. I don't need your nation to feed me, I come with a system which feeds me, I don't need to be a burden on your society, to give me a job, because I can work anywhere in the Universe. These are not a dream anymore, these are the reality and the facts, which will start hitting you very fast. We start working on creation of what I call, field, Soul strength pattern of the Creation. Which means we know who you are, where you are from, what is the pattern of your thinking, and in a way, you work with the same Ethos of the Keshe Foundation. In that process we'll bring new dimensions of work into it. Hopefully our team will start loading up the first parts of the Youtube connection and you will see what we mean.

(:40) There is no, nothing but teaching on this channel. Nothing but extending the knowledge to totality of humanity and with it to bring in the first steps towards the first presentation by Keshe Foundation and not with the support of a nation, the Space Technology, lift, motion, creation of the Soul of the System which interacts with the Soul of every Being that can, allows transmutation at any time at any point. In a way, this is a gift to Universal Council, that they start understanding and setting up the structure for the establishment of One Government Nation, which they in coming time are responsible, in conjunction with the Earth Council to bring it about. The technology has developed enough and technology has spread enough that allows such a release of knowledge, technology, across this planet. When we released the production of the gas when it was burned and you, we explained to you the new energy power supply. We didn't produce that gas for you to burn. We produced that gas to mature man to his knowledge, to his connection, through his, what we call, plasmatic energy, to become a traveler of the Space. You looked into a CH₄ as a methane to burn. We looked as C as connection to Plasma ?? base and H as a connection to the fuel of the man to exist in any position in the Universe.

(:42) You listened to the teaching that in the Amino Acid, Carbon is a connector. So is the Carbon in CH₄, is a connector to Universe, where Carbon in Amino Acid (AA) connected to another cell. There is no

difference between the cell of the man to connect to another cell, and the man to connect to another dimension (D) in the Universe. You take from this technology, according to your intelligence, and how much you understand to decipher from what is taught. I spoke in depth about Carbon 14 (C14), Carbon 60, Carbon 12, what is the connection to the man cell, what is connection to the man Universe, and what is the Creator of the Universe of the man. And, in that position and with this knowledge, who needs a passport? Who needs to be deported? Who needs to be immigrant? And would these words exist in the vocabulary of man in the next 5 or 10 years? Would man get on the boats for a better life in Europe or America, where they can transmute, with no danger, to every point of this planet? We start the teaching, we start releasing the information. Step one to be the presentation in Iran, to build up the trust, understanding. Then, into Washington, then into Moscow.

(:44) And then next, and then next, then gradually in next two to five years, we bring the whole governments around this planet to understand, there is one governing board, and that's the Universal Council and the Universal System of work. Nations, leaders of nations become servant to peace, and not the lie to create wars. We will practice to disarm armies by their own practice. If you want to understand what this means, read the very first paper we released, The Creation of Black Hole. If we can

make a Black Hole to absorb every energy of the Universe into it, we can create a Black Hole which in a way, takes every weapon into it. The fuel they carry, be it nuclear, be it the gunpowder, and every other thing which falls in this bracket. You have to understand, I have set the structure for One Nation, it's you as Knowledge Seekers which will test it, and it will be the world which will follow it. The creation of One Nation,

(:46) One 'Soulport' which replaces the passport will be the key to creation of peace, liberation of the man from every shackles of this planet and bringing equality amongst man. When man accepts his equal to other man, man will accept his equal to every other creature. And when we take man to Space, there is no superiority but equality. When a man sees the color of the man to be superior, when a man sees the belief in the path of God is superior to the other one, when the man sees the superiority comes in wealth, that man better not exist (it's better that man doesn't exist). Because this is not the way man was created to be. The principle with what we said and what we will do is the establishment of the One Nation, One Nation passport, One Nation food, One Nation understanding and comfort for every existing living things on this planet. And we enforce it because we have the knowledge, we have the technology, we have the know-how and we have systems which will deliver it. The 'gun policy' becomes a 'peace policy,' the gun policy becomes a Plasma policy, gun policy becomes

world peace policy, where superiority by gun does not make a nation powerful,

(:48) but makes a nation shameful. You'll understand what this means in the coming time. So today, as is the celebration of the establishment of the Universal Council tomorrow, we set out, we announced the establishment of One Nation Passport. One Nation passport, where your Soul carries your fingerprint. This is why, in past couple of weeks, I was explaining the difference between the fingerprint of the man and the fingerprint of the emotion and the STM. In a coming time, in a very short time, by creating condition of transportation in masses, creation of systems which can transmute in masses, will automatically end to nationalism, end to the racism, end to hunger of the man, end to poverty, in the essence that everybody has what they need at the time they need. And we set up the Youtube channel to show this physically, directly, that every one of you learns and understands. I hope you as Knowledge Seekers and your children, your children's children, and the rest of it, and every being on this planet, will start understanding the change.

(:50) When we released materials, when we released technologies, everybody told us step by step, "Why don't you release all of it?" Because mankind was not ready. But mankind needs to understand that it can be ready. It can make itself ready for the changes to come, and to what it needs to be done. And what it needs to create a condition of equality, through

understanding of the production and creation of Plasma, as what I call, energy for peace. And understanding this process, changing this condition, is not for us, but is for humanity. To understand what is to come, what it will bring that change, what needs to be done. In the first group of people which will transmute, will be those who have been with us, (:52) in the last process of the last Friday. In the Friday session, the first transmutation people, which we'll take with us to Washington, will be those who participated in the 4 sessions of this month, July, August, September and October. We'll provide all the facilities for the transmutation, and we create a condition for transmutation, individually or collectively. We announce, we let you know how and the way it'll be done. It's your decision to be part of it, or not to be part of it. If you feel safe to ask for an American visa, to have it on a passport in case somebody comes and tell you, "how did you entered America? I have a visa." That's your decision. If you're strong enough that you can stand and say, "I came through the Keshe Foundation Transmutation. I'm here. This is who I am. And I can leave if you want." There is no one to arrest you, because there is no part of you there to be arrested. In going to Iran in November, we ask people physically to gather in Vienna, that we go as one team. In Washington, we'll take you all as a Soul, as we call, transmutation, as one team. This is part of the work we set up, and this is part of the structure we foresaw two years ago, to reach to this

point. What happens anywhere around the world, who gets elected, who loses, where is the war, (:54) where is the peace, whatever happens to one government or one president, will be totally irrelevant. We govern as 'One Nation,' and we set the structure for this in the coming weeks, and we have set the structure for it in past years. Transmutation has no physical dimension, and no one in the world has made prison for a STM to imprison it. Even the God, the Creator, does not have such a facility. And someone told me, "If you can transmute Souls, you are a sinner." "You are Antichrist." Because they know, they cannot control us anymore. The fear of God is in them, in how now they have to answer to their Creator, which is their own Soul. Now you understand the game changer. Those of you who join us in the last Friday session, all of you have automatically become part of the transmutation structure for Washington. You don't need to apply, you already applied. And you already been accepted. In this pattern of work, we start in the next three months, teaching you how to transmute from transfer, and how to transfer to transmute. (:56) And the systems to show, gradually will be revealed, unraveled to you, and as I said, the technology will be shown in Iran, as a Keshe Foundation technology, not as a Iranian government or military technology. The same will be in Washington. We are preparing you for transmutation, as we said, two months ago. You had the first run on Friday this month, or last month. You

have a next try, this time. We come in different way, to push, to get you to understand your parameters, and you got six months to get ready. November to March, March is your exam time. I hope you all pass.

Understanding the process of transmutation, with the presentation of physicality, is the end to nationalism, is the end in the old system and the beginning of One Nation future. Nobody can touch us, nobody can build the prison for us, and nobody can kill us, because we are in the dimension of the energy fields, not in dimension of physicality. I hope you understand what the message is today, and I hope if you haven't understood, I explain it to you. Today we announce the establishment of One Nation governing policy By you and not by anybody else and run by the total collective STM in what the mankind is ready to accept and to be equal.

(:58) Not by color and race, not by religion, not by creed and not by which planet, which part of the Universe you came from, as we are all welcome to be as part of the Creator's collection of created things. Thank you very much for today, I hope you understood and in now seeing the establishment of the One Passport policy, as I call it, One Soul policy, One Nation, for the whole of this planet, it brings us to a new dimension, and this time we're delivering through the Keshe Foundation and not in conjunction with any organization or any government. It's for the government to understand the governing comes through the Soul and not the physicality of the man.

But in time we'll see the change. We still work in the dimension of physical life, to support life, but at the same time, gradually we bring the process of transportation, that man sees the new future and the end. As I said at the beginning of today's session, what has come, what will become, is what it says. Energy of peace, the energy of Plasma. Plasma technology will bring peace for man. And will create a condition for peace. And the only way to that, is to full transmutation, understanding work. And to be able to do, and to teach everyone to do it. And then you understand, man will be free from the shackles of today. And I hope, by this time next year, I hope, we achieve to bring new policies,

(1:00) new conditions, that when we, we arrive into October, September time, next year, United Nation accepts the One Nation Policy. And maybe not next year, the year after, we bring an end to all this mayhem which man has created by himself on the imaginary lines, building walls and creating every barrier, which will be 'laughing stock' for those who stand and look at it in a few months time. Build any kind of wall from concrete to mine it, to bomb it, you have not made a bomb for the ?? Soul of the man, then you can do anything with it. When I hear the American government pushing that they're going to make new defense lines over the Mexican border and other lines are mining that no one can cross, it brings me back to memory of the Genghis Khan, and when the man used to use arrows in the castles they were

safe, till they brought in the Chinese gunpowder, and they could fly over, they never needed to use an arrow. And then with the planes and jets, all these walls and castles all became obsolete. And now with the travel of the STM and transmutation, these walls and barriers between nations become obsolete. In a way, it become monumental the way we see with the wall of China.

(1:02) In the middle of a nation, where it was dividing nation. When you come One Nation, all these become a laughing stock, of what mankind did to himself and how he created separation by wealth, knowledge, thievery and stealing and killing to be the powerful. I wonder how many F-14s will be dumped in the oceans in the next few years the way the Americans did with their tanks on every plane they took to war and nobody had the money or interest to buy them after the war. The simple reason for it is just a scrap heap. It will not even be used for recycling as they are so contaminated that no one wants to recycle them. We prepare you in the next few months for transfers and after that for transmutation. And I hope, I hope you understand, One Nation policy, One Nation structure, One Nation passport, One Soul passport is with us, we will issue materials which becomes your passport, will carry your fingerprint, the fingerprint of your emotion and your Soul, and that's all you need to carry, does not matter wherever you are in the Universe, which connects you back to Earth.

(1:04) We have already testing and are in the process of testing the first one in our systems. Connection to a system through blood, connection through a system through the Soul, is already getting tested in Keshe Foundation tests. It's not something it might come, it's already been in process for past few months. You'll feel the emotion of the system when others are no and have no awareness of it. You'll feel the strength of the fields, because you are part of it, it's made with your blood. Nobody else feels it, because you are part of the system. Now, slowly this data becomes every man on this planet. Pain of one become pain of all, suffering of one become suffering of all. And we do not do anything for no one to suffer because we don't want ourselves to suffer. Hunger of one is the hunger of all. I'll explain to you when man matures further, how we'll make this data bank, as it's been done in other places in the Universe. It's not new, but now man has the knowledge to do so. Go back into your Gans's, you've been doing it for 10 years and you never understood. We go for a break, then we come back. And, I hope you understand what is to come. And those of you who were with us in July session Friday, all be ready to be transmuted to Washington coming time, if you wish so. As we cannot do anything that you do not wish.

(1:06) And at the same time, be prepared that Americans have no rights to nothing, that this planet is for its citizens, and we are all citizens of this planet.

Thank you very much, and if we can go to a break, then we come back.

>> BREAK >> 549 KSW August 01, 2024

Part 2

(1:13). R: Well Mr. Keshe how would you like to proceed usually you have some things you like to say, but we do have a little video to play as well seeing that the cat's out of the bag as they say and the world knows that tomorrow is your birthday so we have a little birthday video to play? K- I always get that every year, don't I? R: Yes, whether you like it or not. No, it's always in good fun. Would you like to have that now or later? K- Let's play it now that we can continue with the rest. R: Okay. So this video is from the Brazilian community, and they put together a fourminute video to celebrate Mr. Keshe's birthday tomorrow.

(1:14) So let's have a look at that. << A video of the Brazilian Community for Mr. Keshe's Birthday is shown here >> K- Thank you very much, thank you very much for all your thoughts. Coincidentally, as you all know, the birthday of Universal Council is the same as my birthday. Then in a way, is a celebration for their work, even though I do the talking, they do all the work in the background, through the fields which we, at this moment, don't understand. We always look for a physical manifestation of confirmation.

(1:22) But what happens in the background is the way things work. And as I always say, we are only servant to a master which is the Creator, no one else. And in a way we are servant to ourselves as we are part of it. Our emotion creates His emotion. I hope this coming year will be a turning point for all of us, through technology and knowledge, and not through anything else. And we'll see new frontiers, in science will be achieved. And, but we have to remember, there is a structure which is set by man, and every man who is in power will fight not to lose it. And the only way this technology from now on will proceed, can succeed, is through mass releases. Where the Chinese have access to the same technology as the Americans, the Iranians, the Israelis, the Africans, the Australians and the rest. The South Americans in the jungles of Brazil, will have access to the same knowledge. As you've seen the way we made Cup One so simple, that even the biggest organization could not find a solution, you all help yourself with it. When we release the transmutation systems, I will make it so simple that the man in the back villages of Africa, or China, or Brazil, or Iran, all will have access to the technology at the same time.

(1:24) That no one is superior to the other one and no one needs to live in the, what I call, third class condition, as we all become one class condition. What we take will matter, what we give will matter, and the change will come. You got to realize, that when we release this technology, if we do not come to

agreement with the governments in next few weeks and months, we'll create a mayhem, for all the governments. And there'll be a lot of suffering for a lot of people. A lot of injustices of the past, through misconduct of the man, will come to show itself in different ways. I foresee this, but I hope, mankind will be strong enough to bypass it. The blames, the finger pointing, the trying to share equally the physical things of life, will be priority for many of those who never had, and many of those who want to hold on to. And, the only way to bypass all this, is to bring that, what we call, the elevation of the Soul. In a way you understand, and in a way many of you have already set the scene for it through what you've done in past years. We just bring the tools for it to come operational. And, we have to wait and see, how humanity will control everything from now on.

(1:26) How humanity will achieve peace, by itself, through itself, through understanding. Any questions?

Q: ... How can the Gans ingested into the body be excreted? (He's having trouble with it). K- ... Is this a Chinese? Where is it? Which chat do you see it on?

R: It's in our webinar chat, back at about 12.26 in the chat. He says, "It's very important to find, when I think about negative things, negative things happen. Please consult Keshe for me, this will bring world peace."

(1:28) K- Let me read it please. I am just to lock into it in a different channel. (Just wait ... it's in Chinese ...) I don't answer this question here, because we have to understand much more on this. Please contact the

head of the Keshe Foundation in China, through the channels you have, and ... the head of Keshe Foundation in China, Chao, will direct you and will find out exactly what's happening before anything,

(1:30) we can tell you, what and how, and what has happened. Please contact, or go through, if you know David in Sanya, go through Sanya. David, he'll get in touch with Chao, and it'll get sorted out as fast as possible. Please contact, as you know, Wang Lin is not the head of the Keshe Foundation, so do not go through Wang Lin. Go through Chao, and we'll respond to you as fast as possible. That's the only way we have to ascertain exactly what it is, what's happened and advise you accordingly, by what needs to be done. Next question. Q: ... I would like to reach that day when we can enjoy each other, without the need to solve problems. I had a wish some time ago, to be able to shake hands with you, and in less than one month, there was a conference in Romania. I hope this new wish to be accomplished soon. On the other hand, I don't want to spam, but I need to know what is the status of the Cosmic Rays materials delivery. And happy birthday. K- We're still producing them, and they'll be dispatched, they found the solution for it. We used to have a structure. But you got to remember, all the Keshe Foundation positions are on holiday as of 15, I think 23rd of July, for three weeks. They come back somewhere around 18th, 20th of August. It's a National European holiday time.

(1:32) But, we are not short of producing, we are not short of material. It's just dispatching it. We have no problem with that. And please do not open the, what you call, the material which comes in, it's a sealed pack. Do not, don't try to open it and I'm sure if you open it, you'll find out in no time there'll be not much left for you to have to hold. It will change mass and as you've seen the colors in the Gans's changing from green to blue or yellow or black. You're dealing with a Cosmic material, so keep it the way we have sealed it and use it the way you want. We are not short of materials, it's just the production is continuous. But we use some of these materials for our own use now, for research and development at the same time too. Next question. Q: ... How long of an adjustment period does Mr. Keshe foresee, when it comes to One Nation structure? And has this happened on other planets and Universe in the past? K- The One Nation structure is... doesn't have a time frame. In a way, it is technology development delivery frame. Can we, in the coming weeks, show the weight reduction.

(1:34) And at the same time, can we show the transmutation, next 6 months of masses. Then, the system will fall in automatically. It can take a few hours, it can take a few months, but, the only thing which is holding it back, in how we will release... You've got to understand, the minute we put on the Youtube as a whole, our website will be brought down, immediately. That's for sure. I have even, as recently, past three weeks, four weeks maybe, received a

direct live threat, from one of the, two of the leading nations on this planet, from their securities, if I follow certain path of the delivery of technology, as they see their position threatened. I received a direct, direct threat, which we take it seriously, but there's not much can be done, and you've got to understand, some people like to keep their status quo. And this is why we chose the way to release technology, on the Youtube, and then on the X, which used to be the old whatever. That large number of people become aware of very fast, that runs out of the hand of the governments. But, at the same time, we have to be able to show the technology, in a very, very different way. We have started collaboration with some of the world leading companies, in trying to, for them to assess our technology.

(1:36) And that, collaboration internationally can be set up, for certain parts of the Keshe Foundation work. And this is this pattern of the work we do. But it depends how fast, once we release the technology, the presentation of it, you as Knowledge Seekers can spread it across Internet. This will be the crucial point. When we show the weight reduction, when we show the 'lift and motion,' how fast you, as Knowledge Seekers, will go to, what you call, spread it, that it cannot be stopped. If hundreds of thousands of people, gradually, ?? see it , right across, and brings in the, what we call, the understanding very fast, and then, it'll be... With this technology, if we get it out the right way, transportation or transmutation, which I've

made every effort to make sure it happens the right way, you... If it goes the right way, you have 24 hours before we see mayhem. If it goes the wrong way, they try to wipe it out, that it cannot be seen anywhere. If you, as Knowledge Seekers,

(1:38) systematically post it out, that cannot be blocked on the Internet, and people start making the units like they did the MaGravs, then there is no way no government can stop. And then we'll come to the point when you have thousands of people from Africa, in the tin pots, in Washington, in London and everywhere else. Even with the policy of today, where Germany wants the Muslims out, and British are talking to Africans to go back. We see in America, they ask the Chinese to leave, which is ridiculous. They've been there before, some of the Americans who are there now. And all this will come to a broad end. Where masses will turn against their own condition back to the others. As always said, "My technology will not be accepted due to its pleasure, but through the fear of the demise of it, of oneself." We've seen in America, a group of hungry people gather outside supermarkets, and suddenly raid the supermarket and they run out with whatever they can. This is the reality of what will happen once we release this technology. But it won't be supermarkets, it will be nations. We have abused each other so much, that those who are abused will not go to go what they went with their cousins,

(1:40) and brothers and fathers getting lost on the oceans, or becoming worse off than to come to another part of the world. But they go for what they think is their right to get. This is my biggest fear. How much governments will control the spread of equality of the comforts, not the wealth. The biggest people who lose will be billionaires and millionaires, as they will see their assets will be shared among those who don't have, haven't had. And then the structure of how we can support feeding these people, how we support sheltering these people, how we support their medical need, how we support the energy needs. We saw man immigrating in thousands in every ship, every boat, everything possible to America when America was founded, for the new ?? passengers. Once we release this technology, it'll be 100 times worse. Hundreds of times worse. And with it there will be no destruction, but there will be a lot of releasing frustrations of the past time and this is dangerous.

(1:42) I could have released this technology decades ago. Nothing has changed compared to what we do the only 15-18 years ago in Iran or before that. And this is the biggest problem of releasing technology. How we... I believe March, April of next year it'll be about just the right time to release this technology, that's why we chose Washington. I don't need visa to go to America as I can transmute. I'm there when I want and I'm not there when I don't want. The same with Moscow, the same with the other countries. It's not playing magic, it's using the technology and the

science. And when will it be applied? You got to realize the minute we release the structure, it will be so simple that every single one of you will be able to repeat it. The same you made the Cup of Life. And then you'll have to make a decision. We created the Cup of Life to get rid of the virus of what man was afraid of. We released these plasma systems for transportation and transmutation, then you can understand how man will try to get rid of the disease of hunger and everything else. You got to realize many people might want to come to America or Europe,

(1:44) but they will not stay. And when they go back they want to be equal. And there's a lot needs to be done. The only thing is, once we show it, as we start, we will see when the, we start running the Youtube from hopefully today, tomorrow. You will understand that is matter of time. It's just matter of time. How and who start building, how fast they build these systems, how fast they transmute, how fast they transfer, and what it will be used for. And this is part of, this is part of the problem which we have, and we take a long time to bring it out and to show it, and to understand. There is a simple example of this if you understand. And if you remember about two years ago, we did a presentation, Blueprint, in a deep of the coldest time of winter, in the Cinzano. We showed the fire, we showed the production of electricity and power. But what happened to it? Why didn't we release it? We have this technology in a very, very advanced way.

But, if we do it, we'll create a new mayhem. And, after the mayhem settles, what's next? And create another mayhem with the release of the, what we call, Space travel, transmutation and transportation.

(1:46) And, why we don't do it? Because, foremost, our people were not ready to understand it, to be able to replicate it. Secondly, mankind is not ready for such a huge change. Maybe in 12 months time mankind will be ready when everything is released in small steps and in a gradual dosage. The world leaders have to understand the change before people force the change. Otherwise it'll be mayhem, absolute mayhem. And the people are becoming more and more outspoken and more and more open-minded. We saw it in Bangladesh recently, we've seen it in other countries. More people are creating changes of revolution and changes of government, and pushing government to the wall, than when it used to be in nineteen nineties and eighties by military revolution and coup d'é-tat and the rest of it. We have to create a mass movement with One Nation, that the movement of freedom brings our position. It could happen with the flick of the finger. Any other question? Q: ...

(1:48) Much of our province has wildfires out of control, 95 wildfires have happened over a 24 hour period, is there anything Knowledge Seekers or Universal Council can do to help us mitigate these fires that have been destroying homes and properties lately. Last week Jasper, Alberta burned and before that ?? Lagenna, Hawaii as examples. K- These are

natural processes, has been happening for centuries and thousands of years, and they are part of the process of life of this planet. You can't change it. You stop the fire, stop these conditions, these fires come out of the drought, or a condition of the water supply, and moisture of the air, and then you cause problems somewhere else. There is a moisture ratio on this planet and scientists don't want to talk about it, but there is so much water, and so much structure, and so much space, and you have to have the floods, you have to have the fires, you have to have the others, because it's part of mixing the... it's a bloodline of life on this planet, you cannot change it. You stop the fire, instead of being two hectares to half a hectare, that one and a half hectare will burn somewhere else.

(1:50) You can't stop this. I know everybody wishes, yes we can do. House fire, yes we can handle something. But these kind of bushfires, these kind of massive structure fires on this planet, is part of the process of this life. R: The Aboriginals used to create fires in order to prevent fires the next year. It was always part of their culture to make sure there wasn't too much brush as fire started for next year? K- Managing life is an art. Some of you know... One of the heads of the Keshe Foundation, who'll take over after my passing, very high level man. He is a hunter, but he has his own woods, which means he allows the wildlife to grow in his woods. And then in the winter time or whatever, he hunts in it. But he hunts maybe ten days a year, but I think he spends nearly fifty days

a year, to keep the forest good enough, that the life can exist and flourish, that he can enjoy that 10 days of hunting.

(1:52) And, as he said once, it's a back breaking job, keeping nature good enough for lives to live in. And I said to him once, "Why do you do this?" and then he said, "That's their pleasure to live, that's my pleasure to enjoy. I enjoy making dams for them, I enjoy making woods prepared for them, and make shelters for them to be safe during the winter. But, conservation is part of the work of being a hunter. Not just going there to hunt." And this is part of the structure of this planet. We have to control, but it's part of it, bushfires. The only thing we cannot control, more or less, the tectonic movement of the Earth, earthquakes and tsunamis, which with it comes partially the volcanic eruptions. Those planned billions of years. And we have no say on it. And the rest is part of the structure. We have to accept it. We can manage it. But we cannot stop it. Part of the life of this planet. I said once to one of my children, forest and woods the way they grow and then we cut them, or the firewood's, it's like the hair, the hair of the man in your head grows,

(1:54) you have to trim it, to shave it, to keep it, the way you like. But, in the nature is done, this hair cutting and polishing by the, by the planet itself, through wind, fire, and what we see as other part, the living life of it. We have developed the technology and we have tested in China, where we can create a

massive environment, we've done it in the smaller scale, but it can be done in the larger scale environment, where we produce large amount of CO₂. And nowadays, we are working on what we call, water hoses and spraying water on a building on fire. In the coming time, by placing these units around the fire, you starve the fire from oxygen, or burning condition. And the beauty with it is that if you are inside it, it will not kill you. You will not suffocate with it, but it creates a condition of not availability of oxygen or air for the system (fire) to follow. And with it, it creates life. This is possible in structures to be done. I see maybe in a few years time, the CBC fire brigade with water hoses will be a thing of the past, if the technology is pushed that way. So, very much instead of using a CO₂ foam spray, you create a CO₂ environment.

(1:56) And, it does the job. Any other question? Q: ... Hello Mr. Keshe, is the new Gans for sight to use when you have an artificial eye lens? K- No, don't use it by any chance. Oh, that's a good point. We have to put it on the notice of it. Not for people with eye lens. Q: ... Hi, is the Star of David, the pulse interaction of the North and South Pole? And this is what the baby bee uses to grow within the hexagonal cell of the hive? K- What? ... What's the Star of David got to do with it? R: Well I guess he is saying the Star of David is like the interaction of the North Pole and South Pole for ?? forming the star somehow. Pulse interaction and is this what the baby Bee uses to go within the hexagonal cell of the hive. I ... K- I am lost with this

one. What does star of David got to do with it. R: I am not sure also .. K- ... We will not see much long this symbol carrying on. But I don't think bees have learned from the Star of David how to make their hive.

(1:58) ?? understand the question the wrong way around. Q: ... Is the new Youtube channel for English contributions only? K- At the moment, yes. But it's a good point. Let me ask our IT people, how it can be made multi-channel use, multi-language use. I think they do that nowadays, don't they? R: Well, even in our normal Youtube channel there's different Playlists that you can have for various languages for example. K- Yeah. I have no clue about these things. R: we can release these things in background. K- We have everything released, just that the next day or two, the first part of it has to be loaded up, and then we start gradually adding up and loading up. R: Birthday wishes for Mr. Keshe ... Q: ...

(2:00) Good morning Rick and Mr. Keshe. Last week you said about the health system: "When I leave the system behind and somebody else runs it, we always run into problems. The progress is not there because the effect, the operation, the control, over the system through the Soul, is totally ignored by the world of science, by our own doctors in the Keshe Foundation." So, the question is, does this mean it's still too early, to achieve reliable rebalancing of the fields, through the Headsets of those who have purchased the health systems? Thank you. K- Those who have the health systems, go totally different way

than our, what you call, the system through our Centers. And how they connect it through to them too. There is a evolution in the development of the technology, and the... I think from last week or this week, whatever, the new system has been added on. Anyone who has the Health Unit, for the Health Unit, you have to go through the Center, to connect to, because your system is not on its own, it has a receiver end, and that receiver end has to be placed, and there are materials which puts with the receiver end, with a case applied. And this is important. And no, it doesn't affect your system, your system is totally different way.

(2:02) As then you can work, especially since last Friday test we did, that system comes into operation, it directly works through the Soul. Very, very much different. Now it's more or less upgraded to a very direct resource, resource pointing. And this is what has to be brought into operation after the, what you call, the summer holidays. You directly connect into the Soul of the system and then you will see the differences. It goes one step up in knowledge and technology development. It should not affect your work ... the use of the Headphones, because they are used according to the condition, and the condition has a procedure or materials which has to be put in, to be able to be used for that purpose. Any other question? Q: ... Can X-ray contamination be neutralized using CO₂ and ZnO Gans's? K- I never had this one, what is X-ray contamination? R: I'm not sure what that

means, I guess it would mean if you had too many X-rays, or you were playing with X-ray tubes, and got zapped by X-rays? K- Yeah, if you receive, unless it says, dosage, increase in dosage and contamination, There are ways to do it, yes. But not with the Gans's the way you talk, no.

(2:04) X-ray, gamma ray, alpha rays, everything else, has a methodical system to be extracted or to be absorbed. Any other question? Q: ... Mr. Keshe with the recent assassination in Iran, Will this be a problem for the coming conference in Iran, or will it be handled diplomatically? K- This has become a dilemma since yesterday, and we have to wait and see, what the reaction is. Those of you applied for our team in Iran, is responsible and making arrangement with the Iranian officials, for visas and everything, which hopefully by the end of the August, we know exactly and how. And then it'll be done through the embassies for you to start getting your visas. We had a problem with the, what you call it, passing of the Iranian president, and then the new president was inaugurated one day, and the next day, one of the guests was assassinated, which was yesterday. And at the moment is a total mayhem in that part of the side. But as this is another part, it's has nothing to do with the government. But it have, in a way we have, to do with the presentation of technology, with their presence.

(2:06) We do not know what will be the outcome and the reaction. I know what's going to be (the outcome),

but I can't tell you, very clearly about that one. But, this part is handled diplomatically. It's a, what you call, tourism part, which we, our team is working around with the officials. This conference is fully controlled, around the presence and everybody else .. by the officials, how you come, and the way you come, and where you stay, and where you go. We already have a clue about these things, but they had to inform the Foreign Office, Foreign Office to inform the Embassy and then we do the job in the background for your invitations. And then we tell you which Embassy you need to go to, what time, where, and then it'll be settled. That's our job, just wait till we inform you, but we couldn't do it, because of the present situation in Iran, which hopefully gets settled, next two or three weeks. It's not an easy job, you becoming President, next day one of the guests of your party being killed, and as a guest. So, we have to see how this thing turns out. Any other question? Q: ... The Sun always rises almost from the East.

(2:08) It has been rising from the North for some time. Do you think the change is due to the displacement of the Earth's Plasma polarity? If your answer is yes, will this shift continue? K- No, not really. It's many things effected, it's a line of horizon. If we tilt, we...

Everything has been made so simple and we have accepted it, that the reality has gone through the window. The Earth does not rotate as we see, one line all the time in the equator. It tilts slightly, it goes up and down and in a wave form. In the, what you call it,

in its motion around the Sun. And so, sometime we get these things, depends how Gravitational fields interact, and how it dips. And then, how the other planetary system, in the Solar System, have moved in the position. And, not really. It does not come so... It's not planned, but it can happen, depends on which other stars and what you call it, sorry, planetary systems are in line, they're out of line. When you see they said four or five planetary systems are in one line, you have to see what effect it has in the environment. And this is the way it works. It's just, everything has been made too simple for people to understand, but with it has gone through a lot of facts and been thrown out with a, as we say, 'the baby with the (bath) water.' And for us being simple people we accepted the simple explanation, but it's much more complicated than that.

(2:10) Much, much more complicated. Shall we call it the day. Q: ... Mr. Keshe, a couple of questions, I know there's many ways I could speak to you today, in many different ways and many different levels. First of all, you said that if we release the technology, we'll cause mayhem. Do we not have mayhem at the moment? Wouldn't it be better to have a beautiful mayhem than the structure that we have in place in the present time? K- You never lived. I've done, I've lived in Africa for ?? 20 years. Worked in Africa for some years. Worked the same in other part of the world and seen beautiful structures, beautiful buildings, and behind it is a lot of poverty. It's not so

much that the guy from Africa will come to Europe or to America, is the Americans who are there, who didn't have, will create mayhem for those who have.

(2:12) This is the problem. And transmutation what we release it, will make this ten times worse. When I used to be in China, it's a very interesting thing. You see it sometimes, but it's so hidden. You see this in Europe, it's so hidden, but you know is there. You walk through parks, you walk through very luxury environment and you see people with bags, you see in America too, with bicycles, with animals, with whatever they can. They dip into rubbish bins, they walk the streets cleaning up plastic bags plastic what we call it, plastic bottles. And you got to understand this guy who cleans these bottles does not come from 100 kilometers away, he lives within a walking distance, because that's all he can carry. So beyond these beautiful tall buildings and luxury, there is an area where he lives, where he lives, there are others who live who are deprived. Shanty towns in the big cities, people sleeping homeless in the big cities. These are the people who when we release technology, we've got to be afraid of. This is where the problem sits.

(2:14) This is where the large social structures will fail to do to support. And that's where we have most of the social problems. On top of all, will come from that side. Always, when I speak about these social upheavals, or whatever will come, always reminds me of Iran. In 1975, 1976, year prior to Iranian Revolution, 5%, maximum 7% of the Iranians were educated. And

their education brought new factories, new businesses, whatever. The other 95 were workers, they could see how this 5 live. And they wanted that and everything was blamed on those who used it, against it. They fired it, and that 95% raised to this 5%. And that's what we saw. Because that 95% wanted ?? for the 5%. In the Western world, the figure is not far from that. But with games, movies, this and that, and everything else, they keep people busy. But poverty sits inside. And people will go for it if they get the chance. And, it's not far out, you'll see,

(2:16) a lot of police forces everywhere. And, it's hidden or in open, to stop if these people ever move inside the country, let alone people transmute or transfer or coming in, in different way. World leaders shouldn't be afraid of people coming from outside. They must be afraid of people who are inside, who want to get to those who've been up there. As I said in one of the talks recently, immigration and transmutation will come together, cross borders, horizontally. Inside the nation, they'll be vertical. People of the poor of the nation will want to get the ones on the top. That's where the mayhem will come. And this is the biggest problem with transmutation and transfer, and the others. We'll have mayhem, without a doubt, it'll be a very, very big mayhem. It'll be worse than the earthquake, but how much it'll quake, it just depends. Q: Thank you for explaining that Mr. Keshe, that opens up totally different thoughts. That's where you have the beauty that you know you've worked in

these positions, that you've come to know these sorts of, you know, information that the average person wouldn't know. And it's interesting that you bring forward those sort of conversations. So, the next question would be Mr. Keshe, if I may. When you spoke about, you've had some threats upon your physicality.

(2:18) So, you've openly just spoken today, you can transmute. So, would they be able to touch your physicality, unless you let them? K- We don't change conditions. For everything there is a reason. You got to understand, we have taught too much, we released too much information. Many governments understand this and this is a threat to many structures. Let me explain to you, this is something which we have on our hand today. It's not something you'll be or was. One of the reasons we don't release the Gas Unit and the Energy Unit, is because the minute we do in a mass way, will create a mayhem in the world economical structure. And many countries don't like to see this. There are many countries don't want even to accept to do it, because, it's very simple, and that is, every day billions of dollars is made from something which Earth pops out as gas. And the government's income, your National Insurance income, your hospitals, your schools, gets money to do this, to pay for it through the taxation, through these gas imports or burning gas and the rest of it. As I said before, I've never seen agents of God sitting on the oil wells or the gas wells, asking for payment.

(2:20) What you are taking from us. Man has put a value on it, to control. And man has learned how, somehow, to use this to provide. If our Gas System is released today, to public, and all of you, like a wildfire, start making it and reducing gases, a huge income, huge investments, everything goes. Our talk with the big gas corporations, our talk with the big gas distributors, always has been, "What damage is going to create to us?" So, we release it, they kill it. I was in a meeting, past few months, and because of the structure, the way I work, I was explained by powerful man in the world of... work of today. They said to me, "There is a structure set just to watch you. There's a structure set people, organizations who watch what you do and what you release, and you're holding to a lot of things. Not releasing because we are afraid of what you're going to release, we can't control you." They saw when we released a Cup of Life. One Cup, One Life. And they realized how it affected things. We released MaGravs. A lot of you didn't do anything with it, you can't do anything with it, they did.

(2:22) We release the gas, it will be the same, we release the transportation, will be the same, we'll be releasing the, what you call, transmutation. This is where they cannot touch, and they don't know how to value it. And this is where the threat comes. The knowledge is a threat, not me. And I said to them, "You touch me, your bloodline will not exist, forget about your nation." It's not avoiding it, it's letting themselves to bring ?? (end to) themselves to it. It's

inevitable, it's... you've got to understand, look at every ?? In England, it was very interesting, very recently I was watching something, the military guy standing in front of the police guy and the guy says, "I'm the police from the... I'm the King representative." The military guy says, "That's your King, I'm a King, I wear a crown on my head, he's got a crown on his head." You are nothing, the crown has no value anymore. Nation comes and we are military. We are nation. And, the structure of today, with Keshe Foundation is, we are watched in what we teach, what we do, how much of it is profitable, how much is beneficial, and how much of it will bring change in a slow way, then a fast way. And this is why I announced today, the One Nation. There's no way they can stop, they can resist this change. Then it has... something has to give. Assassination will not solve the problem. They did it in Iran, you think that solved the problem yesterday? It made it worse.

(2:24) You know, after a 100 years, we still write the books of Tesla, new things, find out. If they do that, thousands of scientists, they say, "Why is the reason?" And they go in through the books, technologies, teachings, all that, and it'll be unbearable without control. With us talking to them, with us bringing it in a controlled way, we have the best chance for them, to at least be a bit leaders, for another few years or months. Didn't they try it? Fabio died in it. Is, we don't remember his day, when it happened. He became part of the history of the Keshe

Foundation. Didn't they try it with poisoning? Didn't they try it with the shooting? Didn't they try it with the high speed chase on the motors (motorways) of Belgium? I sat exactly around this time, July, August, in 2012, in the mountains of Belgium, I said to the King of Belgium, he said, "You leave my country." I said, "I leave, you go, you abdicate." He laughed, and after 13th of February 2013, he abdicated before end of 2013. There is a structure set and this structure will be followed. Nobody can break it. No one with no might. And let them try. Q: Thank you Mr. Keshe. .. I'd like to ask you another question on another, on a different level now. So my questions have been so far very physical, with physicality.

(2:26) So now we go into this more of a Soul aspect of... like a Universal Council support member, or a member. I know the Universal Council are all present in this moment, and wishing that all your wishes come forward through the Universal Council, and are present on your birthday. So thank you for that Mr. Keshe. I sense on a Soul level that if the world understood some of your teachings and what you've actually brought forward, that there would be no more war inside. It would cease in this very moment, and it already has. And this is what's not been understood, that on a higher level, on a Soul level, which affects the matter state, the condition has already been set, is present. And we thank you for that, really thank you for that Mr. Keshe, if that is possible as a Universal Council, as humanity and all the created creatures.

Because I know your presence and what you've been doing for your whole life and many lives is present here to elevate all the Souls and ... once you understand this, once you actually accept this and really understand it, it makes a huge change. K- We don't claim anything, we just try to understand what needs to be done,

(2:28) and try to set the system which is. Try to help the situation in a way of... I'm trying to be very... in a way... And... a scene is set, and what I say, the script has been set. And, you know, you have a, let's say an actor which plays a part of the script, and if he breaks his leg there's always a second one to back up, to replace. The script is written for the World Peace. The time, the position, the way it will come. It does not matter if Trump is in power, or the lady is in power, if President Xi is in power, or Ayatollah Khamenei of Iran gets killed, or dies, or in power. The structure is set for a certain point in time.

(2:30) This certain point in time on Earth is not dictated by humanity, is dictated by bigger structure. To change the dimension of humanity. You got to understand how come man suddenly in past 50 years has gone through such evolution in science and technology and communication. The present communication has been one of the key instruments which was given to man that covers everyone. Talking about the radio, television, the mobile phones, the satellites and the future systems of communication. Now we have brought the Soul communication, which

means once man understand the connection, then he can connect to his Soul. And, as I said, this is a thousand years, six thousand years. In the six thousand years of rotating around the Sun, is not in a fraction of our Solar system, rotating in his galaxy and our galaxy rotating around the Universe, central point. It's a speck of dust. The future of mankind, to reach that point, is well set in advance. Doesn't matter who is here, who's not here. It's just change of actors, change of people, because, it's set to change, it's set to bring that change, and there is a reason for that change. It is that magnet on the table, with a lot of magnets, which, it's movement, it's completion, will put the rest of the magnets in new order. Rick has got his table with a lot of magnets on it,

(2:32) he sometimes shows and plays with them. If you move one tiny magnet, the other magnets have to move, to find a position. That little tiny magnet is the Earth and the Soul of humanity. We'll bring the change, because it reflects the change in all of the Creation. It's not just because human. Because it's a small, it can move and it just... Small fine tunes are the hardest, not the big. I was talking to some of the man in Space and the military and the rest of it, before in some of the meetings, and they don't understand it because they're, I call them stupid. Taking off a 100 meter is very easy. Landing that last 5 centimeter correct, which keeps your aircraft intact. That is more important than taking off a 100 meter. That 5 centimeter landing. Fine tuning it to the right time,

right position and letting it go. And that little, little move is more important than the whole move. You can come down a hundred meter. If you get the last five centimeter, you bang on it, you break everything inside. And Earth position is that tiny little thing, which needed to adjust a lot of things, in the right position for the rest. And it's not in the hand of the human, not the government, not the presidents, no, no one can interfere with what is to come.

(2:34) But when it comes, it brings a lot of things, not only for what it does outside, will do within itself. And once people understand this, then they understand why, there is so much emphasis on getting it right here. That little tiny thing needs to be right, that the rest fall in the same place, but, that little magnet you put on the thing, when you move it, all the magnets move. To take a new position is exactly where it should be. It's like, you have a hundred magnets on the table, all sitting next to a hole. None of them falls in. You move a tiny magnet, they all fall in place exactly, and the system start working. This is what we are working with. And it's not done just because of so and so. It's done because it was wrong, and it's corrected, it's getting corrected, and that will reflect in the root of every other. It's that tiny little tooth in the mouth of the Creator, which is causing so much pain, a little tiny hole, called "Earth" and the creation of man. Because it's that, what I call, greenhouse, which is supposed to create flowers to feed the others. And it just creates a wrong Soul, creates a strength through

its Amino Acid. And we are here to change it. No, no world leader, no government, no shooting can stop the process. Too late, too far. Even we speak the Chinese language, about Atom and Plasma, but the target is set. And we are not here to challenge no government, we are making sure that there is no government, but man governs through his Soul.

(2:36) One day, man will understand. One day, your children, maybe yourself, listen to this part of the teachings, and says, he knew what he said. Because we set it to know what is going to be done. And I said very recently to a very high ranking officer in the top board, ?? we sitting across the table. I said, my job is very simple. I'm like a teacher in a little village, which has children from nursery, to the twelfth year, before they go to University. And they're all sitting in the same classroom. I have to teach, and I've got a little boy coming in ABC, and the noises, and the ?? curvature. For the guy who goes to University about Algebra and the rest. We know the whole subject. It's just who we teach and how we teach. And this is the process. It will come .. no. I was on the road in Belgium, in 2012. And a car came to ram from behind, to turn us over, and then shoot in the head, which was their policy. And well trained, bulletproof, for the car, you know, bulletproof ?? car, at that time, they couldn't do, you know, high speed. We were chased from Ghent to Antwerp, and in Antwerp they drove off, because they couldn't do anything. I chased them before they chased us. I saw a gun be thrown out of

the window. Those of you who know Antwerp, Holiday Inn,

(2:38) it's got a side road which comes by it, I lived in that Holiday Inn for a long time, I knew the place very well. And all the way into the Diamond ?? Burrse . They came off in the last minute, I drove in behind them, and I parked 90 degree in front of them. I said, "You come to shoot, shoot." "You threw the gun out." They didn't know which way to go. They went around the car, they went through Antwerp Center, towards Diamond ?? Burrse. And I know that place very well, we had offices in Diamond ?? Burrse, I know the route. And at that time, my ex-wife was online to the police. As you come from, to go into Diamond ?? Burrs , there's a police station, where suddenly the road widens. We were at the traffic light and I was beeping and beeping. And once the green light came on, out of nowhere, the police blocked the road, they got the guys. They put us in a police station, which was there, and they took the guys. And, then I found out through British intelligence, the police never took action. We never heard anything, we spent nearly an hour in the police station, they took us into the room and all the taboo. British Secret Service on MI6, I asked the question, "What is going on with this thing?" They said these two were two criminals. They had a life sentence on them, long-term sentence on them. The police of Belgium gave them freedom if they could assassinate me. They would have not gone to prison, the sentence would have been terminated. And in

going to the police station, they got caught and then they released through the back door.

(2:40) They tried. They tried very hard to bring, but the job is much bigger. And when the time comes, it means the process is complete. And this is the way it is, no fear of, they will do, they tried, they couldn't get me, they got Fabio. No fear of whatever. Their fear is, what's going to happen if anything goes, happen to me, then me fear of what's going to happen to me. Anybody touches me, any blood, will not exist. They tried it, the king abdicated and you see the rest of it. It's not being arrogant, it's knowing the fact. Q: Thank you Mr. Keshe. Thank you very much Mr. Keshe. I wish, and I'm sure many people would feel the same, and sense the same. I wish this movie plays out in a beautiful way. Thank you Mr. Keshe. K- This movie will play a very ugly way, but the end is sweet. That's the truth about it. Because so many people have done the wrong too, they are not like us forgiving, they want 'settling the scores.' And it's very interesting if you listen to Netanyahu in past few days, in talking in one of the public places, he says that,

(2:42) we have killed 12,000 Palestinian terrorists. And when we took this city, ?? or whatever, I asked, I went there because, you know, he's victorious. I asked my people, how many people, how many terrorists did we kill? He said, "They told me we killed 1,203 people," I think he said. I said, "How many civilians?" He said, "None." And... Interesting. The next sentence he says is that, "There were 24 people

killed, when we blew up what you call it, one of the ammunition center by mistake." Something like this. Those 24 civilians don't, he counts as zero. You understand? So the 24 here by mistake comes out that they were killed, shows every one person, 24 have died for. And to him it's no one. And then he says, "Now you understand why we asked ?? (city) to be emptied." That when we start attacking these people there are no civilians to get hurt. Every unjust man finds a way to justify his action. And this is the way it is. But we know the way, we set the way. I said many time, "Touch me and you'll see what I touch." I came off the cross, bullet is nothing. Let's talk. Thank you very much. We'll talk. See you next week.

(2:44) Thank you very much indeed. K- ... Rick, shall we call it the day, if you have no more questions? Q: ... My question is kind of abstract. We have some Soul Connection at 9pm. People can join, connect Soul. One of the things in connection of Soul is to elevate all Souls. Of course, it was to elevate all Souls and also peace for humanity, which on the way somebody has changed peace for humanity through protection of all physicality's. So, the first part of elevation of our Souls, I was just thinking today, we elevate all of Souls and then sometimes I say, I wish elevation of all good Souls. And then I say, those Souls who are here, even though they are not good,

(2:46) then they are vicious. So, they elevate and then they take care of themselves, they punish themselves. What about those Souls which are on the other side of

the wall, on the other side, which are left this Earth? And then either they have bodies are they don't have. So what those Souls who live on the other side which are nasty Souls when we pray for the elevation they get elevated and they feel worse or what? K- This is... First of all there is no other side, we are all on the same side. Some of us don't have the physicality, but the Soul is. When the mother died you still dream of (her) you still are in touch with, and the rest of it. So we got to understand in a world of physical man you have the other side, in the world of the Creation of the Soul there is no other side, it's just what position you have taken according to what you carry, what you possess at the time of the change of physicality. And as I always said in one, or two of the teachings, are you that dust floating nowhere, or have you become star, creator of a new life? Those of who are privileged, are those who become that star. Those who you call the criminals is the dust in the, what you call, embodiment of their, their life.

(2:48) Their life is torturous. You will understand, many people understand, even in time of transmutation, you can. It's not that you always go and see, I want to go to Moon, I want to go to see my uncle, whatever. In some of these transmutation you'll try to become the Soul of you, if you've done wrong. And find out your place and see if it's worth it. In another session, or same session see what happen if my Soul elevates in the dimension of the Creator. And see which one you choose. It's all in the same time,

it's no different. God didn't create a China wall or a God wall. Some people are outside, it's not Mr. Trump to build a wall between Mexico and America, between the good and bad and this, this Galaxy and that Galaxy. So if you understand this, it's very simple. I've spoken on this very, very much in depth. In totality, man has to live with the field he carries in the dimension of his existence. Nothing more and nothing less. Physicality, will be detached, is what you carry in the basket of the Soul, which counts how you lead to, ?? say another part of life. It's very much,

(2:50) I explained this to a criminal once. He said, "There is no God, I pay my punishment staying in prison and that's it." I said, "You do not understand the crime you've done." When you're born or freed in dimension of the Soul, you're like that guy with totally handicapped legs and arms. You see everybody else but you suffer inside. And that's the position of your Soul, because you do not understand. And would you like to be born handicapped with all the things in dimension of physicality, multiplied by a thousand time worse, maybe more, in the order of magnitude, it'll be the life of the STM who's done wrong. See if you like it, then you understand. And this is the fact, that there is no, it's not another side, it's just this one side. But there are two levels, the world of physicality and the world of Soul. And in the future, man will understand there is some other world in between, which man will learn about in the time to come. Man is not ready to understand, it's not there for it to be educated with.

It ?? does not finish in the two worlds of physicality and the Soul, there are more dimensions. But man is not ready, let him get to understand the work of the energy of the Universe, then you can understand the interactions of this field, this ball of energy.

(2:52) Q: So, we are kind of like, Neutron, Proton, Electron and the same law, right? K- Pardon? Q: We follow the same, we are the same law like Neutron, Proton, Electron. They just transfer, create and become part of human being. It's so insignificant. So, so small in the whole thing, which follows the law of atoms. K- Oh, of course, this is so insignificant. We think it's too big, but in fact, it's nothing. And this is the beauty of it. We are too, too busy. We are ?? own appraisal that we do not see the fact. Thank you very much for today. Thank you very much. Thank you all for all your help. Thank you very much for your help. Thank you. See you next week. Is there anything else? R: I just wanted to mention, put up the page here. That there's, there'll be a questions and answers with the Universal Council with Marie, on Saturday, August 3rd, starting at 10pm CEST time, with translation to English. And I'll put the links in the ... Chat here. There's a Telegram link and a Youtube channel,

(2:54) that's the Brazilian Youtube channel. And folks can listen to that or play the video back once it's recorded. Okay, and that's with Marie who's a Universal Council member of the Norwegian language. And they've been holding these meetings

with the Brazilian community since 2020. Okay ... also it's been mentioned in the Chat that there's a joining together of the Souls at midnight tonight, midnight CEST time. That people can get together with their... join with their Souls to form wishes for the new physical year to come, you could say. Okay, I think that's it. Happy birthday Mr. Keshe. And you have lots of birthday wishes, and it's not even your birthday for another 12 hours or so. So, that's pretty good.

K- Thank you. 549 KSW August 01, 2024 END
