Part 1

(:21) K- Hello, good morning, good day to you, as usual, whenever and whenever you listen to these series of Knowledge Seekers from Keshe Foundation Space Institute. As usual, we're back here and we welcome you back to be with us. And we try to share some more knowledge. It's interesting how things work, and how things connect to each other, without you actually connecting to it. Prior to the teaching, I started, Rick asked a question, which past two days I've been thinking of how to teach this to man.

(:22) And it's interesting what we think, it comes in to come back to us, that the other Souls are aware of what is, what is needed, what is missing. As we always said, in the life cycle of the man, suicide is forbidden. You cannot commit suicide, you cannot leave a book half read, you cannot let the engine run half cycle. It has to perform it, to find its position and place, its natural progressive development. If you go to the patent, the original patent, as I've said before in this patent, especially in the latter part, I battle with Dirk in putting this in. It was put in, and I found out he's taken it out, and then I said no, it has to be in. And at the end we put it in, but in a way it's hidden in two ways. And is the "death code," how you end the life. In the life of the man you take a bullet, you jump off a cliff, you do all sorts of funny things thinking okay that's I leave the physical part behind and then the rest goes. But in the patents of the Keshe Foundation

we talk about the plasma. At that time we could not talk about the death of a Soul. Ending a cycle, again even suicide in the level of the Soul is forbidden. You cannot end life, it is not yours.

(:24) It's a progressive development as part of the supply of the energies to the others that one day they might need it, and in one place they might depend on it. When we talk about end of a term, or in a way trying to. We put this in deliberately in the patent because at that time we could not explain the teachings how deep it is and when it is needed and when it comes to. The term of what we call, ending a cycle of the plasma is to do with the point will come in the history of the cosmology, we call it Supernova, Red Dwarf, and everything else we can think of except actually touching the truth. We cannot, we are not allowed to on our Souls and the outset of its birth is aware of this. This cannot be touched. It is like emergency button there, but it's forbidden. It's not that by ending your physical life or trying to bring a demise on the cycle of the Soul of the Man (STM), you got to understand you are part of the Creation. It's like creating an hemorrhage, in the brain of the man, at his maturity.

(:26) In the physical life, suicide leaves your physical body behind, but that Soul which is created it is still half cooked, is half done, has not found its maturity. In the case of the STM, it's totally different. You're talking about the fields. You're talking about connection, interaction with the rest of the Universe. This is why

suicide in the cycle of the Soul is forbidden, and up to now, in the cycle of the Creation, has never been used. Even though all the Souls of the created are aware of his existence deep inside. Never used because you cannot harm the others. Never used because you cannot create through your own action to change the course for many others. It's that magnet ... on the table of the magnets. You put a magnet in, they all have to accommodate. Now you take a magnet out, the rest have to accommodate. But in the process of you going in, all the magnets have taken new position but then the interaction of the others, they have changed their position, so you can create the demise of the others, in a way for them to be removed from the table, wanting it or unwanting it. Now you understand the wisdom of what I call, termination.

(:28) When we wrote this in the patent, if you read it, understand it, not in the terminology of the physicality (P) but the terminology of the plasma fields, you understand, it's one of the easiest, but one of the impossibilities. It's not that you open up and all your fields will be spread across. This is so simple minded way of thinking. You got to understand we call it, 'MaGrav positioning.' What happens to the fields we are interacting, creating the gravity to go in. How many of those will collide? And what about if you bring in the destruction of the gravitational field and let the expansion of the fields of the MaGrav positioning to come in. You push things beyond. The others have to move to create space, time and position. "Thy shall

not kill, thy shall not steal." These are only two Commandments which ever given, which stands by the Ethos of Mitra. This is why even the Creator with all the horrible things in the Universe, is still there, watch, feels, detects and understand, but never bring a termination. If you as a Soul in that dimension and size, decide on termination, and can create such a havoc. Imagine what happen if the Creator decides to 'pull the plug.'

(:30) Where would all the fields go? Where would go all the essence of the Creation? In the books and science of today of the man, we always talk the fallacy of the "Big Bang" and the things started. But we never talk about what happened if the Creator decides to pull the plug. What happen to all created, what happens to all these fields, which have led to creation of, or is the life and the creation and created just a mirage, imagination of our thinking? And then you ask, even that imagination needs fields, so where those fields come to create the imagination. The 'doomsday' of the Creator is beginning back to nothing, and there's never been nothing, as it's been the creation of life. Understanding the process of the Creation, and why the, what I call, termination of life in the dimension of the physicality in the Soul is forbidden, is because there is always another point, another dimension, another place, where there is a beauty in what is not seen to be beautiful at the time, place and position, which bring the man of physicality to the demise of their physicality. But in the dimension of the

Soul, the other Souls, see, feel, the emotion of the, what might call, the ?? , or not needed, or irrelevant, irrelevancy of it to the point.

(:32) That they give from theirs, to bring life back. Bring a purpose back. Bring a point of reference back, to the Soul in the contention of its own dimension and direction. Even at the deathbed, even at the verge of the completion of the physical life, man is not allowed to speed up the process. Man has to go through the process. As where one gives, and the other one takes. As one completes, the other brings balance with the others, in the dimension (D) of the fields of the Universe (U). How can you bring an end to a cycle? The gravity of such a move, such an action by a Soul, is so horrendous, and it's so profound that can affect every being things, every existence of every star and planet into disturbing, to be disturbed, to be brought in a different dimension and direction. It's an enigma of the 'Black Hole.' And that never exists. There is always a light even in the dimension of the creation of the Black Hole which man never understood. Maybe you understand now why the first paper ever written is about the creation of Black Hole.

(:34) In that paper I refer you see lights when the others go in. There is the light which comes out which leads to creation of life, the energy, the cycle of the processing. And one would understand in the future of expansion of the STM. One Soul does not need to end, one Soul needs to join. One Soul needs to transfer energies in all dimensions to all those field

strengths which is needed. In a way you become part of (them), but you never create the demise of (them). And when you understand this, you understand by what we call, the liberation of the STM to its expansion point and connection point, then at that point you're given the gift of life. You've become the interconnecting point with all the others who received from you. This is hidden in the teachings as we call those Souls the 'Satellites.' Many of you volunteered to become Satellites, but now you understand what it means, you have not even understood about the position of your Soul. Connecting, bring into operation the beauty of the Creation, bring into operation the beauty of existence. When you volunteer to become a Satellite, in the world of the physicality, you confirm, you have already committed your Soul. It works, it expands, it connects, and in a way, your Soul is not yours, as your Soul has become the Totality of the Soul,

(:36) of connection of those who are, be, and shall be created, connect to, and through. This shows the dimension of the gift one gives. As I said many times, you give the totality, but in essence you hold on to the reality of the existence connecting the totality. You become that glue, you become that what I call, the string that every other thing is attaches to and they all jump up and down with it. It will affect everyone and at the same time gives pleasure of the existence. Suicide through the dimension of the STM, or any existing thing in the Universe is forbidden. Even

though we teach it, even though in the ?? word of the man we put it on a patent. Because in the dimension of expansion of the Soul, in the dimension of his demise, it creates a contraction. You got to realize the life of the man in the dimension of Soul and the Plasma, is magnetical (M) and gravitational (G). It has to be a compromise, it has to be a balance between the two, in how you contract it, and the way you bring contraction of the fields of the STM, to be in comparison and in parallel with the expansion of the Soul. A Black Hole, which gives life.

(:38) In a way, at the point of when man goes to the demise of his Soul, he actually becomes the essence of gluing, connecting the other Souls in all dimensions. Because now, the flower has opened, and his beauty sits within it, which opens up. Now you understand, there has never been and there shall never be a suicide in the cycle of the Creation of the Creator. So, why should it be in the dimension of physicality of the Creation. When you stand correct in conduct, you never wish for the demise. And the same in time, the love, the energy, the giving of you can become part of another life. Even if it's in the last seconds of the physical dimension. How you expand the STM, is at the point when you deny yourself, not to be you, but to be all. The position of the Prophets. But not the Prophet of man, the way he has been created. In a way, the dimension of giving, without any need to receive, that's the cycle of the balancing of the Universe, we bring that point on its own.

(:40) Never in life contemplate on suicide, be it in the physical dimension or a dimension of the Soul. As is damage and what it can cause, can create a mayhem that is beyond the dimension of understanding of it. You create a Black Hole, then in the physical life become the pain of the father, the mother, the child, wife and the husband. And in the dimension of the Soul, becomes an enigma ?? for destruction of the Totality. You can contract, you can pull aside, you can go in ?? solace and take position. That, what comes out of me is what I can give. But in time I will be back. I'll be there to give, to become part of Totality, in a giving way, in a loving way. The way the Creator does, the way the love of Mitra sits amongst all created. As Mitra is all that's been created. And emotion of love is what it receives from the Creator. As fields, as the dimension. And even in the distance, is still close and close by. The reason we teach this, the reason it needs to be discussed, the reason it's been written in the patent, is that as we go through the position and dimension of transmutation many of you will find yourself landing in the wrong place.

(:42) You'll find in a point of transmutation you have come to the point that you do not see the point, the place and the dimension, and the position you were hoping for, you were listening for, and then what you call it, in the term of the man, the loneliness brings the position of the thoughts. And it's that point that you have to go within. Within the Soul which transmuted you, within the energy fields of the body of the man

which have created you. In the next Friday session we bring you to that position. In the next session of the August of the Keshe Foundation meeting, we'll bring you for you to understand your own ?? imitation and the generosity of your Soul. We bring you to the point where you have to decide between the STM and the Soul of the Physicality (STP), and love both the same that both confirm the existence of you and the same time creates an emotion, the emotion of the confirmation of 'me,' and the unity of the two. Teaching of today will take physicality of shape of understanding next Friday. As you noticed in the last month session we told you in different way to position your headset. And this week will be much closer for you to understand the position of the transmutation. And the emotions which create within.

(:44) It is not going to, is feeling to, what this feeling means and what am I responsible for. Because is the emotion which dictates the position of the STM in transmutation. I'm in danger, I don't want to be here, the emotion of feeling of here is, I'm happy to be as I give. Test of emotion is the most important part of the existence, a man without emotion is not alive. So is the Soul. The Soul without the emotion does not exist. Now you understand why you as Knowledge Seekers (KS) and for humanity and the rest of the Universe to understand the 'emotion of existence.' Just because I don't think it exists for me, I bring an end. Because in the dimension of Soul, as I don't think it exists for me, I'm there for the others to find existence. This is the

behavior of the Creator, and it's embedded in every Soul ever created. Not selfishness, but detachment. And it's the job of you as Knowledge Seekers and those who come after you and those who learn and understand, to understand the point. I am part of, but I'm not all of. I'm the accommodator and not the controller.

(:46) And if you understand this, then you know in what point and how to open the expansion of the fields of the giving. And in ?? what position and what, create the condition of attracting the fields, that continues the life of you to be able to give. But this time you receive as you wish, according to what you wish that you receive. You create the fields, you create the dimension. In the body of the man, as I've said many times, you eat the food, you bring that seed, that 20% to be embedded in the body of the man, that through the conversion of it into a plasma, attracts the other 80% of the food, for your physicality to live, to exist. The food of the Soul is the emotion. The emotion you create is that seed which brings the rest of the fields of the Universe to satisfy that emotion, to bring it to balance. In the dimension of physicality we eat. In the dimension of the STM we create the emotion of, there is no difference. Now you understand, as long as there is an emotion, there is life, and as long as there is life, there is respect for his existence. "Thy shall not kill, not even his own Soul." It's the knowledge of Creation and understanding the emotion that you create within. Is the emotion that you

receive from the other Souls, which feels the same, to create, to satisfy,

(:48) and to be there to justify the existence of all and not just one. I hope you understand and you understood the gravity of the teaching of today, as you become the travelers of the future. As your generation, your future generations, abides by the law of the Creator. And the knowledge is embedded within the DNA and RNA of the man and every other creation. That "Thy shall not kill, not even his own Soul". You can become philanthropist in the dimension of physicality. In the dimension of Soul, there is no philanthropy. It's understanding the emotion of existence. As your emotion is in dimension of the fields of the Universe, so every other Soul connected, interacted with your Soul, is aware of your emotion. Now you understand. "Thy cannot steal." "Thy cannot kill in the dimension of the Soul." But why man does in the dimension of physicality, when he's aware that the position and the confirmation of it, in the dimension of Soul, will find a balance of it, for the existence of the man, in any point in the Universe. As we go to the strength of the dimension of transmutation,

(:50) Knowledge Seekers have to understand this, when you get lost, is not an end. Creating emotion of home, brings you back home. And once you understand this, you become part of the progressive development of your own << audio cut >>. Now you understand. You're responsible for it, but you transfer

that emotion to responsibility. And Emotion of Responsibility is so deep, that it's connected to the Creator, and not to the man. I hope you understood the message of today. And I hope no Soul in the Universe needs to use the death code. As the death of one is the end for all, and no Soul has the right of doing so, even the Creator. There is always solution in both dimensions of the physicality and in the dimension of the Soul. And now you understand why suicide is forbidden. I have talked about this in other teachings and today we have to face it as we go to the dimension of transmutation. And I know in transmutation many of you would end up in the wrong place, you receive the wrong emotion,

(:52) but it has to be that point to understand the position of giving that brings you back to the dimension of the position of understanding why and how you ended up in that position, and what is the way out of it, is not by fighting and destruction, but by giving, understanding. I've said many times to elevate the Soul of the world leaders, but you have to understand what that elevation to them brings them in the dimension of physicality. It's the same with all. Thank you very much for today and we'll take a break and we'll come back.

>> BREAK >> 550 KSW August 08, 2024

Part 2

(:58). K- Yes thank you very much. We try to open dimension of expansion and understanding in all aspects. And you cannot just teach on the physical dimension and or on this energy dimension. And we need to understand the Totality. As those of you who'll see the new Youtube channel of the Keshe Foundation, we emphasized on energy to be defined as a plasma level, as a magnetic field in motion. In a way, we have to understand the principle of Creation. And as the first fields move, their motion creates their energy. And fields do not have mass. X-rays do not have a mass. They don't contain it, they don't have it. As they are themselves part of the magnetical motion of the Creation. We cannot measure at any point in dimension of Creation, a size, a mass for the fields of the Creation. Mass is a manifestation of, interaction of lower field in respect to the higher field,

(1:00) field strength movement or position. And when we start redefining the mass, which if you read Book 1, I tried to explain the Mass and the Weight. And then bring in the term of plasma, you understand in the world of the Creation, the hypocrisy of the energy, called to man, mc^2 , does not work. Energy is the speed of the field and has no mass. Mass is creation of the matter state confirmation of existence. We feel the fields of the Creator, we don't feel the mass of Creator. He doesn't hit us bloc .. And once the world of science understand this, the transmutation and the

confirmation and operation of the Universe understanding will become much, much easier. Because then we distinguish between the two. What is the energy of the Creation and what is the energy of manifestation of the Creation. And this is where this "little chap" ($E=MC^2$) with his ignorance has created so much problem for the world of the science and understanding. There is no mass in the dimension of the fields of the Universe.

(1:02) So the energy of the fields is the speed which can be traveled. And there is no limitation on the speed of the fields of the Universe. Now you understand why we have specifically put this in the information about the new Youtube channel. If you understand it, if you understood the reason for it. Once man becomes aware of this, man understands the totality of the Creation. And how you reduce, or increase, or interact, or you compress, or you open the fields in respect to each other, and in parallel with each other. There are two different points, one is in respect, and one is in parallel. And one is the creation of gravity and one is creation of magnetical. In time, man will understand, and in time will bring change to the understanding as man moves into the dimension of what we call, transmutation. This is why in many teachings I keep on telling you, there is a Transfer, and there is one Transmutation. Transfer is for the mass, transmutation is for the fields. Man moves his body with the mass in comparison to another position time and space.

(1:04) Man moves his Souls with energy of the fields of the Universe, has no mass. We got to understand this to be able to go into the next step of the development of the technology, and for others to understand. The only thing stays, if you still want to make it relevant in the dimension of your present understanding. Energy in the dimension of the plasma, according to the emotion given, brings the speed, not only c^2 , c^4 , c^{10} , c^{1000} . And this is why you understand, we say, the speed of light is the lowest of all, depends how you bring the fields to, or you travel in a dimension and space, that there is no limitation of the resistance of other fields. You can travel with millions of times the speed of the matter state of light, within the center of the Universe, as you can do on the boundaries of the Universe. There is no limitation, there is no restriction, it's understanding the position and the need. A light energy travels from the center of the Sun,

(1:06) from the surface of the Sun, and within minutes and hours of the man reaches the boundary of the solar system. It converts, transfers, becomes that phantom energy we call it in the body of the man when he comes to the point of amputation, or what we call the boundary of the solar system. And then in gaining mass, it takes it billions of years to go back to the mother in the shape of the planet, meteorite, asteroid or anything else which man might have made a word (for). A few seconds to go, a long time to come back. Depending who you share the shoulder of the

field energies, and what path you take to come in. Does not take much for the moisture to go up, but it takes a long time to gather to become a cloud to rain back. It takes longer in time for the rain to drop back in, than it took it to evaporate to reach the position ?? and time. And this is what we need to understand. How you speed it, how you compact it, and how you give it the signs of life, for manifestation.

(1:08) Be it the man, be it the matter, be it the vegetation. Without that sign, it cannot exist. It cannot manifest itself. And one day, when man understand the sign of the Creator, he will see it with his own physical eyes, understanding of Totality. But the physical eye of the Soul, and not the physical eye of ?? man. That's the time when you meet your Creator. As it's within, you find out, it's part of the Creation ?? you see. Any questions? Q: ... Those who have committed suicide, what happens to their Souls? Is the natural path to a new cycle for them blocked, until they elevate their emotion? Thanks. K- We call it in English, wanderers. Those wanderer ??. And in the, in the world of the man, we give praise for those who are dead, for life, or whatever. This is the field we create in the dimension of their Soul. Because we are of the same Amino Acid (AA).

(1:10) The Amino Acid of the Soul is totally different. It's the creation of manifestation of its totality. And in a way, when you commit suicide, that glue is not there. That connection of the line to be part of, to be connected to, does not exist. Because you cut it off,

you... you haven't cut it off, you have diverted to another position which has no connection to. When we pray for our dead, we give from our energy of the fields of the emotion, that as they receive, they find... It doesn't mean they jump up, but they find the strength in the position where they are, to exist, to confirm. And this is, then it's balanced with everything else. In one of the teachings in the past, I explained the man who shoots the bullet, he is payable, he is responsible, for the physical and the STM who he has shot. But, it goes down the line, the man who made the wood to make the gun, the steel, the software, the man who designed the gun, and all the way down the line you're responsible for. Because you knew, this is one day it's going to be used. So, now you understand, when a man shoots himself with a gun, all those Souls have to respond,

(1:12) have to accommodate, have to pay for it, to put it in the word of the man. And you look, and I said many times, what happens with, what you call, in American history, the veterans? What happens to the people who have committed a crime, by taking another Soul, in the name of the war, in the name of a soldier, in any name you like. And then you see they come back, with all sorts of nightmares and diseases. That's the balancing of the Soul. Is that a nightmare? Is that a sleep when you dream to another? In the level of Soul they are responsible for that man they took the life of. As we say in English, that's what is haunting them. Because they have to pay for it. This is

why wars are forbidden. And the same is the killing. Any other question? Q: ...

(1:14) Does the deliberate ignorance for a period of time, of those who constantly abuse any lessons or corrections or gifts, means or leads to this topic of suicide? K- I don't understand what you mean. ... repeats ... Not really, if I understand what you're trying to say. We get to the point, of not being able to handle the emotion of the time, place. You walk from that point in ten minutes, half an hour, you say, "What a stupid thing I was doing." And why I got to that point? There's always another point, there's another solution. Maybe I need to ask for elevation of my Soul, energy from within me to bring me different emotion. Whenever you get to that point go within, and then you find out within, and giving out, finds you a solution. I do that quite often, quite often. When I see a problem, I don't go, I have to find a solution. I'm aware that within me there is a stronger, bigger collection of Souls, which are there and the energy they provide.

(1:16) The fields of their existence will create a different emotion and brings a new position. Many times even with the Keshe Foundation, it comes to me. Because I've taken too much burden doing it, trying to get it done, but at the same time the others are part of this structure. So I go within. Those who are there, create a new condition that I move on to the next step. As they have taken the responsibility of changing that position that I got into, because of the

Foundation. In a way, you share Souls, you give from inside. And it works and it is the secret of existence. In the world of politic, you love your outside. In the world of the Soul and Creation, you go within the strength within you inside. Because you know that, it's like as I said, you take 20%, another 80% comes from outside. When you go in it's the same, you put in the emotion and they give because you are not doing it for yourself, you are doing it for the rest for the elevation of the Totality. This is how it works. So, you don't need to make the frame of it. You create the frame out of the, what we call, the sharing of the Souls.

(1:18) In the presentation, when you will see in Iran hopefully, we come in with a suitcase. We don't bring aircraft, we don't bring a UFO, we don't bring anything else. I open a suitcase and by interaction of the fields creates the craft. As I said many, many times, in Knowledge of the Creation, we don't have any aircraft hangars, because even the body of the craft feels the emotion of the other Souls. The need of the emotion, this is why I said, world leaders will not go into this, because the Soul does not match, the purity of the Soul of the craft. Is not a car you get in and because you have the key, you push it and it has to go. You created the key with your conduct. And that's the key to get in, the elevation, the balance of the fields of the Soul. And if you understand it in a deeper way, going back to the holy books, maybe now you understand what it means the boat of Noah (Noah's Ark). Noah is

"you -ah" and how you bring yourself to that point, to be part of salvation for yourself. Any other question?

(1:20) Q: ... Can you tell us a little bit more about some of the applications of transmutation? What man can do with transmutation? K- Everything you do in the Transfer. Go and see the uncle, go on the beaches of the Universe, or the planets, go inside the Soul of your partner and see if there is a true love, or there is just love because of your pocket. Go shopping, but when you go Soul shopping, you're the giver, you cannot collect. It's in reverse. When you go out with the young children, and you try to teach them, how the world works, and then they try to repeat it back at home. You try this, I used to try it with my children, it's amazing emotion. You go with a child, but you have to bring it up from the childhood, from outset. You say, you want a pack of sweeties? This is the money, you pay the man. And you see they give the pack and they give the money to the man. And you tell them, you got to get the change. They get the change and give the change back to you and they keep the pack.

(1:22) You bring them home, or they come home and they give you a pack and the money when they play. And they say, "Oh, I want to buy." In a way, they don't understand the exchange in the dimension of physicality, reality of outside and reality of home. They give you the money and the package is for you, because they do that in the shop. And then you understand the difference between the man in

dimension of physicality and the Soul, because they are pure Souls. They don't see value in why you give papers or something to give back what you gave them to them to give back to you. It's the same with the man confusion between the Soul and the physical dimension. You give, but the package is not yours, it belongs to, because I don't want it. I pay you to take the package. We're in the shop, they pay you for me to take the package. And it's intriguing how you see the behavior of the Soul and you see the behavior of physicality. And then how they value it. And then the abundance that is there if you want, is not there because you. Do this with your children, because I always brought up the children this way. Make everything abundant.

(1:24) Sweeties, chocolates, whatever is to their like. And give them a place and a position. This corner of the table is yours and all the sweets are there. And you replenish it. They don't need to come and ask. Continuously change every time, something new, something different, different taste, different other things. Then you see your child when it goes out, never asks for anything. And when it's in the house, eats everything. You don't find a child with nick nagging with, "I don't like this, I don't like that." The fruit sits next to the sweetie, the sweetie next to the chewing gum, everything else, all sorts of fruits, all mixed up on the table, this is your corner, this is your table. And then you find the child because it tasted that, it tastes the other one, might not touch, but it

takes next time, you share one, you give him one, and you take one, and you find out you expand the Soul, you expand the experience. You never get a child who cries on the street, "I want this, I want that", or in the house, "I don't eat this, I don't want that". Because you have given it the totality. This is how the Creator works. He provides everything. It's you who's the choosy one. The Universe is abundant with the gift. It's you who decides what to pick. But if you are open to receive whatever it is, it always goes back because you learn to give.

(1:26) In this part of the structure, what we see in the physicality and what we see in the dimension of the Soul, it's no different, it's that innocent child. One we force the dimension of physicality, one is within the essence of it. Generosity. Any other question? Q: ... What happens to those who kill themselves because of, or kill themselves after torture, or they were given drugs, or some other situation that was out of their control? And does the same thing happen to those people? K- It's all the same. It's all the same. Q: ... Hello dear Rick, I want to thank you for asking, two weeks ago, Mr. Keshe, my question about a health problem. In the answer of Mr. Keshe, I realized the problem with my question. So, now I want to ask again, this time the right question, I hope.

(1:28) Mr. Keshe, could you release a Twinity like product, that would expand the Soul, and by doing so, to encapsulate the entire body, so that all the wonderful things, that come with the full Soul

expansion, would come to life? Thank you. K- Cosmic Ray Bundles are supposed to do that. We built Cosmic Ray Bundles especially for that purpose. For the dimension of expansion and communication of the Soul. How you interpret it is in your dimension of physicality. Very recently I was talking to one of the scientists in Keshe Foundation and I was explaining to her. The Knowledge Seekers do not understand the amount of knowledge we have given. We have taught... You know when you go to school in the first year, they teach you alphabet, and then you learn how to make a word, and then sentence, and a paragraph, and then the book? In the teaching of the Keshe Foundation, we gave you the book at the beginning. And this is why so many of you have a problem to find out where is the A, and what is B, and what is their place. When we taught you how to make the Gans's, when we taught you how to make the MaGravs, when we explained the connection of it, I gave you the end of the book at the beginning of the story.

(1:30) But because in a way you are illiterate to the Knowledge of the Creation, you got stuck with it. And you think this is the beginning. And it's the same with the Cosmic Bundles. Cosmic Bundles are the beginning of the Space technology in transmutation. And it's on the Keshe Foundation website. You were given a Twinity by the Cosmic Bundles from the day we put it out. And, if you understand this, you find a way of communicating, connecting, to the rest of the fields of the Universe. All the Cosmic Bundles have

connection to Universal fields, even people who make it, they're not aware of what they're making. But when it was designed, when it was put in, as part of its work, it was set that way. You want the physical Twinity, you can go to, buy in the, what we put out. But if you really want the Soul Twinity, the Cosmic Bundles. And it's one of the most complicated one. It's extremely complicated, you have access to the full spectrum of the fields of the Universe, and you can connect to anything anywhere. But the problem is when you put it, "Oh I had a dream, I went somewhere." You don't say,

(1:32) "Oh, I did not understand that it brought me what I needed." It's a big difference. If you one day understand how to use the Cosmic Bundles and understood the way what I said earlier on about the 20%, using the Cosmic Bundles the right way you can feed yourself in the dimension of the Soul that it feeds you in the dimension of physicality. And that means there is no fault. You have a pain in the shoulder, understand how to use the Cosmic Bundles, you'll see what happens to it. A few days ago I was sitting in front of a scientist, what you call it, an old man of medicine, because of the explanation of what we were going through. And I explained to him something very simple, how this works as a field. But he said, "In the matter state we see different." I said, "Your system does not see the field, we create the environment. You look at the matter. And then the matter takes over." And this is what you understand, you have to

understand. These Cosmic Bundles are not there, I want to communicate with my cousin. You do, we show you how and need to be. But it's primarily the first Twinity system. The Headphones individually switches with a twin in the box in front of it. At the same time, each Headphone,

(1:34) each side twins with the Soul. Within it, connects with that part of the brain and emotional part, the other left is different but at the same time they connect, they connect with each other. And those of you who know how to use it, you can transmute with this Communication Bundle, because it's not a physical communication, it's not ?? instead of calling, "Hello" it's your ?? self saying "I'm here". In the future, these Cosmic Bundles, even the ones which are already present and you buy, are the backbone of your transmutation. You have, some of you, took the Communication Bundle. Some of you took the Glasses which we put out. If you understand how to use the combination of these two, if you have it, you can create a condition of transmutation at any point. One of the Knowledge Seekers recently has started doing it. You .. then you have to distinguish between if you are working in dimension of the Soul, you're working in dimension of physicality. I have given you everything to go through transmutation in past years, but as usual, as a Master, I have hidden everything everywhere, because you don't understand so we put it there when you understand you know what to do with it.

(1:38) If you think of it, if you... it's hard for you to understand, those of you especially, who were with us in the past few months of testing and you are there. If you look, you have the headphones, your earphones, and we ask you for two phones, to make a second one, in a different position. Isn't that the work of the second one, the Glasses, the Goggles, which we put in the, for sale? You close the circuit. It's you who decides elevation of Soul, what you receive from outside. The twin set has been in front of you for a long, long time. And in the process of understanding this, if you had... if you bought those Glasses and you put them somewhere because you went that way, if you look, the Glasses have two pieces front, which covers the eyes, and on the back of the head on the ?? ribbon, there is another piece which connects, and isn't that why you put the Headphone in the front and in the back. It's all been there, it's just because you're not knowledgeable, you don't connect it. Now you understand. The Cosmic Bundles and the eye set, if you understand how to use it, you can train yourself gradually for transmutation.

(1:38) But still you have to understand, "Thy shall not steal." And then, then try to see if you have a cancer, then try to see if you have a pain somewhere, try to see how emotionally in different position and see gradually what you achieve. Another question. Q: ... At the last Friday meeting, I tried to change from a white to a black person. That didn't work. I can accept this black look, but I can't love it. I see this lack of love

as the cause of the failed experiment. Next Friday, I would like to make another try. This time, I will choose Avatar Blue. I feel a strong attraction here, and I love these beings. Could you please give me some additional tips, to make the skin color transformation a success? Thank you. K- Ooooooh! You cannot become a chameleon. But, you have to understand the satisfaction of the Soul. The creation of the emotion. Is not a magic work, .. you are not a magician, (1:40) "I want to be black and blue" and the rest of it. In what environment you want to manifest yourself and what's the purpose. Is the Soul happy to manifest itself in that direction, or is it just your physical wish? It will not work. You got to understand, in transmutation the emotion of the Soul counts. In transfer the emotion of physicality counts. You cannot bring the emotion of physicality if it's not understood, or balanced with the emotion of the Soul. We are not playing, "I found the box, I can be black today, blue tomorrow." Just to see if I can. What's the purpose of the emotion in it? Then you will achieve. It's not anymore, if I can jump off a cliff, or I can pick up a hundred kilo weight, because I've done the training for it. In the dimension of the Soul is if I have the strength of the emotion of it. Any other question? Join us in next Friday session. A lot of you will learn a lot. Doesn't matter if you've been there before or not. But it's part of structure. And try to start using the Headphones and the eye covers which you had together, but understand what you are doing.

(1:42) And then see what new dimensions you open to your existence. And how much your emotion changes in a progressive way. Any other question? Q: ... The question is the Cosmic Ray Communication Bundle allows transmutation and feeding the Soul from within. Please explain this in layman's terms. Thanks. K- In layman's term you cannot do it yourself so we give you a helping hand. It's like when you are little or when you recover from an accident or whatever and they try to teach you how to use your hand again to feed yourself. How to use a spoon. And this Cosmic Rays and the rest are that spoon, teaching you how to use a spoon to feed yourself, even though you knew before.

(1:44) These are tools like you buy a car to go from A to B, now this Cosmic Bundles and other bits which is around the Keshe Foundation, gradually we teach you why we put them out years ago, months ago whatever, is part of that tool. It's that part. It's about you to understand about yourself and to understand by yourself about the abilities of yourself and nothing else. And what emotion you put in it, and what emotion you get back from it, but without the expectation. When you have expectation from these systems it means you are still ?? human. When you make it available for the others then you start learning. When you use the Cosmic Bundles, when you use the systems, never ask what I want, don't create the emotion of I want to, create emotion of, "It will please me if I get." You want to go from London to New York,

it pleases me to see my son, it brings the pleasure to my Soul, brings the pleasure to my existence. Not that I'm going to see my son, take me there. If you remember the story of the guy with a cup in what you call, Barletta (Italy), sitting and pushing it. You have to understand the way you run this car.

(1:46) The way you create, hasn't got a steering wheel, but it steers itself to the wheel of man. Then this is what you have to learn. And this is the problem with 99% of you Knowledge Seekers. You push it. You don't let it to be given what is good for you. Any other question? Q: ... Could you speak about Palestine? Ismail Haniya assassination? Thank you. K- This is a very touchy point and I have a very strong view about this. Because I know the emotion of the feel of it. I have made my point very clear to Iranian leadership, especially in the past, and to the officials in certain governments in the past few days. If Iran by any chance goes to the phase of attacking Israel,

(1:48) in retaliation for Palestinian guy, or whatever, for the first time in my life I warned two governments I would change my passport and my nationality. The reason is very simple. When one of my students was killed in Iraq, a couple of years ago, all Iranian leadership could do was, instead of finding a solution, bombed a few places and did something and they thought that was retaliation. He was Iranian. He was pure-blood Iranian. And he stood for the nation and the science of the nation. You know exactly what I'm talking about. Why should a nation of Iran, with all its

beauty, go under hammering destruction for Palestinians who were stolen from their own nation. I support Palestinians, I always done. But bringing one of the most ancient nations to verge of destruction because you are Palestinian, you're Lebanese yourself, and fooling a nation to do so, is not my nation. The gentleman comes from the Palestinian bedrock, but a billionaire. Stealing from his own nation. Why should Iranian blood, Iranian nation, historical places, our infrastructure to be destroyed, (1:50) by the killing of one man, who he was, whatever he was, it's judgment for them. Unless our leadership is Palestinian and Lebanese themselves, why us as Iranians are getting pulled into the Lebanese affair of Ayatollahs? The word Ayatollah does not exist in the vocabulary of the Islam in Iran, it's made up only for the Lebanese who occupied Iran. And I made my point very clear. For the first time, if this happens, I will change my passport. I don't denounce the Iranian nation but take ?? petition to bring back Iran to glory through another way. So why thousands of Iranians have to be killed, where we did not respect one of our own leaders, but for their leaders we have to give a nation. I've made it clear to those who understand, none of my technology can be used in aggression against any state. This is what I signed in 2008 with the Iranian Parliament when I transferred technology. My agreement is with the Iranian nation, Iranian Parliament, not with no

Ayatollah. And does not, I don't support Israelis, I don't support Americans, or the rest.

(1:52) But why should we go to destroy the nation when it has nothing to do with us? I always said, it's very simple, you understand, very clearly, when you go in somebody's house, you break into, you have no value for, you ransack, you do whatever you like, because it's not yours. And this is what Ayatollahs do to Iran, they are not Iranian, they've come to ransack a nation. Since past 500 years they've been at it. And I don't see why a nation has to go under such a horrendous condition, because they are abusing another person ransacking a house for their own, to steal the ?? things. According to the Forbes, this gentleman has 9 billion dollars in assets. Now you understand. We still sit, support the Palestinians as a people, but not what is set to come and will be there. I've made that myself towards ?? two most powerful nations on this planet in past few days. And then it will be very hard for those who take the next step. We have a very good saying in Farsi. It says,

(1:54) << Farsi language >> “When there is no Iran, why should I be an Iranian?” It is destroyed by these hooligans in the name of Ayatollahs. If they wanted to use such a force, why didn't they use it when an Iranian general and highest ranked one of my students was killed in Iraq? It is not a Palestinian is... what Israelis doing is wrong, we know everything is done by them is wrong, but they are the tools. You see, there is an old school of thoughts. The thieves

and the robbers and the criminals fight on the street in front of the people and they eat together at night. One is Israel, one is this lot. In the front because what they've given in the back is so huge. And it cannot be at the expense of a nation. I even recently through some security records, we see, the way that the president was killed, this was an inside job by themselves, to create this new condition. This is why nobody's been arrested after a week in Iran.

(1:56) It's an inside job, but the ?? jobber themselves did the inside job. It's a very, very detailed and I try to keep very much in past few days away, but we made our point very clear to one of the most powerful nations on this planet. I will move. And we have taken all the steps to move. Any other question? Q: Could you please advise what role is to be played by those who are participating in the Plasma Mobile Experience? K- What do you mean the Plasma Mobile Experience? You mean by Friday (sessions). You mean the transmutation sessions each month? It's for you, not for us. We just open the ways for you to understand about your capabilities. It's not about us. You don't come in on the Thursday sessions and what do you call, the Friday sessions every month for us to. We learn how to make more better system to cover most of you, your desires, but it's about you, not about us. You are learning about yourself, your capabilities.

(1:58) You cannot go and run a marathon if you do not train for it, and you don't realize your capabilities that you can do. You take a coach, you learn, you go on

the Internet, how to do things to be able to run a marathon. What you have to do, what exercises and the rest. This is the same. We provide the grounds for you to learn about yourself, what you can do. You know when you go, you want to learn driving, you go and register, you take a teacher, he puts you in the car and you take it for drive and you start learning, you call it the school of driving, this is what we do. We take you for a school for you to learn about yourself, how to drive your Soul, how to operate your Soul. If you remember, a few years ago when we introduced the Vertical Unit and the other Units we explained about. You can go and see where you're going how you look, it's like a fish tank. Where you're going to end up, with what creatures in what position in the Universe. Because we understand what gravitational magnetic fields is in that environment. What field pressures they are. We replicate it so you go in there. This is how you come out. It's like you get a liquid metal and you put in one die comes a cup, you put in another die it becomes a plate.

(2:00) Because the shape of the plate was decided, if you put anything in this it will be the shape of a plate. If you put anything in this it will be the shape of cup. Instead of that press machine we create the pressures of the magnetic field in a Cosmic level. So it's not a fairy tale. Now you understand we have capability to create that condition. And this is how you're going to look. And now with the Cosmic Ray Bundles, with the Glasses, we create that condition. It's you who

decides if it's going to be a cup or a plate. It's about you to understand your own capabilities. And it's about you how many times you fall and you get up to perfect it to be in that position to get where you want. There is no room for failure because nobody can fail. It just take according to your strength, according to your understanding. And this has been the behavior of the Keshe Foundation, because we understand the bigger structure. How many of you have been to teaching classes and whatever? Any of you received a certificate, graduate from class one, class two? You join these structures for you to elevate your own understanding. There are no winners and there are no losers. What you understood is your win. Any other question? R: Jonathan was referring to the All-Purpose Plasma Flight Simulation Mobile Experience.

(2:02) And I note that the first quote at the top is, "You decide where you go, you are the captain of your flight." That was the quote. K- This we don't do anymore. This is finished. This section was when we had the Units in Austria. When people used to come in and go in the Unit. These sessions are nonexistent. Maybe we have to introduce them back and people go to where the systems are and pay for it. And test it. Maybe it's a good idea to bring it back and allow people to go into the centers and like they used to come to Linz and go through the systems. Maybe we bring this back and we bring these systems into operation. Then we can go and test it. Any other

question? Q: ... Why do we have both nightmares and beautiful dreams? K- Why? Because you've decided.

(2:04) You decide. And it's the Soul which takes you to a position of what it is. What is nightmare to you, what that position could be enjoyable, standing in on the other side of it. But, it's the same as life. Why do we get sad and why do we get happy? What makes you happy, what makes you sad, what makes you cry? R: One man's dream is another man's nightmare. K- Nightmare, exactly. Depends where you're standing. This is a story of one man's dream, you know, another man's nightmare. This is what happened to Edison and Tesla. Dream of Tesla, actually Edison somewhere talks about this. Within the Chicago Fair, was his dream to show the power of his technology, and it became a nightmare for Edison. That he was rejected with all the work he did, and set out to destroy Tesla. R: Good example. We have another... K- He talks about it. You know Edison, Edison says, one of the last words they say, historically written, the biggest mistake he made was what he did with Tesla. Because he knew he did wrong.

(2:06) And that became his battle. Any other question? Q: ... During transmutation it felt different being a part of the whole universal structure, as opposed to being a singular plasma, where I felt separate. Can you speak to the difference? K- It's you who decides in transmutation. When you go through these phases of transmutation, when you travel through the energy, not physicality, you have to be aware of the emotion

of the Soul. This is important. It's like, I go to a party, but I want to be alone on my own. Why do you go to a party, if you want to be on your own alone? You see a lot of it. I want to enjoy the atmosphere. When you do take the transmutation, you have to decide, I don't see myself worthy to be with the others, or I have nothing to give, so I stay alone, you see yourself in that position, or I'm equal to the others, so I can enjoy the totality. This is part of the behavior of the physical life and the dimension of freedom of the Soul. This is why I always say in all the teachings, is when we take man to Space we take man as equal and not subordinate. And this is the... many of you will feel this way when you go through transmutation it's normal,

(2:08) because you have to learn till you're invited in, you are equal, you have the same position as us and it's you who decides to be part of, or to be a side of. And always remember, in the dimension of your Soul, always said, we take man into Space as equal partner, and not subordinate. And if you understand this, you understand it's you who decides to be a loner, or be on the side. Because you do not see the value and the beauty within yourself, which is equal to the others. There are no kings, no presidents, and even the Creator is amongst you, and you don't see it, because it's within you. And every other Soul sees that. One thing which you learn in transmutation, and if you learn this you'll enjoy your trips, is that every Soul is aware of the beauty of the Creator within it, because it's part of it. And that's why they don't do

wrong, because you do the wrong to your own Creator and it's not done. And when you see yourself as a lover the way the Creator is, which is within you, you'll never be alone, you don't stand outside. This is where the emotion of physicality and emotion of the Soul has to, to come to understanding, to a balance. Any other question?

(2:10) Q: ... Hello Mr. Keshe, I remember once you said that the Flight Enhancement, Navigation Plasma Spaceship with auxiliary systems is literally Orb technology, that I can transmute into an Orb with my Soul? K- What is Orb? R: An Orb is ... it's usually a... like a round ball of light. K- This is the Soul. You have to understand the condition and position of plasma. Going to the new Youtube, which is hopefully will start up. It's all done, it's... the first 2-3 pieces should go on till the team which is putting in, and we start putting data in, and... Look at the... I think it should be the second or third videos combination. The third one is the one which Rick has always has with the fields becoming a Plasma. R: Do you have the link to that site? Or is it... K- It has to be released through Rafael. He's in charge of the new Youtube. When he has everything on as usual, through all the links, will be released. R: Okay, we don't have it quite yet, do we? K- We have it, it's all done, everything is there, it's just that they have to load up the things which should be done, and then once it's done, we start loading on the back of it the Flight Test Weights and the rest of it.

(2:12) We're trying to, this... this, the Youtube, was set up a couple of weeks ago, as we said, it's going to be. Now we finished the first part of it, which is gone in, now, once Rafael changes everything, because he's in charge of all this and, slowly, slowly, they start loading up the teaching and you see it, step by step. He will release the link, connection, in all the chats and everywhere else, you can share it anywhere else. Put it on the links, if you are in X, what used to be, what you call it, before this guy takes over. R: Used to be Twitter. K- Twitter. Put it on the Twitter everywhere. And the people come and learn. Take the link and put it on Twitter, to learn about the newest space, Plasma Technology, Plasma for Peace. And then you write (spread it), like I said, everywhere you can. Because we start bringing the changes, as I said, in a very, very, three dimensional way. Any other question? Q: ... Hello Mr. Keshe. I ask this question from Iran. My question consists of three parts, and is for the use of plasma fields in industry. One, how to create different plasma fields of Potassium or Calcium, or both together in a large volume of water? For example 30,000 liters, in the fastest way. K- Keshe Foundation has this technology, you don't have it, you won't be able to do it.

(2:14) This technology is already with us, we have it, and we can produce it in millions of gallons, we can provide it. But this is a special way. It's a technology know-how. R: Is that proprietary or is that available for sharing? K- Yes. No, no. We keep it. It's more or less

part of the other developments which we use. We don't keep anything proprietary. We just keep it that other people cannot abuse it. But, it's not something to be developed, it's something which we have already developed. We know how to control it, and how to, what you call it, create that. It's the way, the Calcium doesn't exist in the Universe, it's created. We know the process of Creation. Q: ... Do you suggest using scalar fields in this regard? And the third question is, is it possible to get help from the Keshe Foundation in Iran, to implement this? K- Speak to Yousef, but at the moment, I don't think we can do much, and what is the purpose of it? What's the purpose of, what is it for? This technology it's very, is the next process of the what we call, technological release by the Keshe Foundation in agriculture and the rest.

(2:16) We have a dilemma in Keshe Foundation, sits with us very deep. We... Let's look at the agriculture. We can push with increasing harvest. This is why you don't see much work with Keshe Foundation in agriculture, especially in past year or two. Because there is a dilemma, and the dilemma is very, very clear. In... when I was in China one Chinese guy said, "Our people are used to eating." I said, "Yes, but they can get used to not eating, going through two phases of eating and not eating and then not eating." In agriculture, we do increasing the harvest, blah blah blah blah blah, we do in making the life better for the animals, blah blah blah, and then we kill them. To get

their energy. It would have been a beautiful thing. Yes, we can increase the harvest. Yes, we can do. Or we create a condition that we feed energy instead of the animal to people through radio stations, through Apps. And this is what has put me in a dilemma for the past 3 years with Keshe Foundation and agriculture. Do I push to increase the harvest or do we get gradually over next year, is to get the government to see you can feed your nation without anybody being hungry through the telephone channel. Is this what was done for Palestine?

(2:18) Isn't this what you lot (came) in and take (took) from us in the systems? And this is the problem.

Technology is there. But why should I go back and start put Gans on the water, under this, this, this or just whack? Man does not need to kill, let's just feed them through the, what you call it, the structure. And this is one of our plans, to start doing this. The biggest problem for us is Multinationals, and people who just work on the 'rhythm of the money.' When I was talking to CIA people very recently, "Listen Mr. Keshe, your biggest problem is, you have touched energy, and the people don't like, because you're taking a lot of money from them. This is where your enemies are sitting. You've shown you can produce gases, and you're going into the delivery of the gas, and the generator, like you see, this is where your problem is." Now, if that's the problem, energy and the gas has to be used by somebody who's alive. Dead people don't heat themselves up. So, who's alive needs feeding. And

who you feed, kills for it. Why don't we change the structure that we feed our people through new technology, understanding, everything they need they take from it? You can't have overdose of vitamin D when you're with a plasma because the body doesn't take what it doesn't need. So, do we go in the path of increasing harvest, increasing more animals much healthier, and then we kill them, we eat them?

(2:20) Or do we go on the Universal way of providing energy, the way you're taking the other 80% and let's just give you the other 20% and stop this mayhem. Then man becomes a passenger of Universe, then you don't eat another guy on the Moon. This is the dilemma, which sits, would I increase the harvest? I was talking to, with our Knowledge Seekers this morning. The same way. Can we? I don't have, I don't see a need for increasing harvest. Because technology is there, we can feed the nations, without killing a single thing. Why do we do it? I can produce every Amino Acid in the body of the man. Why do I need to do all the elaborated things to do it? The knowledge is getting there that we can produce every hormone in the body of the man. As I tell you, you Knowledge Seekers only see maybe not even 2 or 3% of what is developed is developing and is there. I am scared to show what is the capability and the machines are there to do. We need a One Nation structure. And this is why I've put request to many Knowledge Seekers. We need funds, urgently need funds, to be able to operate and keep this going.

(2:22) I asked for a donation last week from Knowledge Seekers and you all paid a deaf ear to it. Keshe finds a way, he does it. You'll pay for it when I don't do. I made direct appeal to many Knowledge Seekers, we need support. Keshe Foundation cannot carry this burden anymore. It's for you, it's for the change to come in the future. Why do I have to create food, to create, to feed an animal, to kill the animal, to eat at the end? Why don't I, that energy which I've put for the food to give into the animal, directly to the man without killing? This is the gap in what is available and what we can do and multinationals and things won't let it happen. We got to make it happen. We got to put in it what we have. I have put everything in my time of my life, everything I said I had, to bring you to the point it is today. But, now on it has to be us who's going to do it, not the government. We have to make that government, One Nation policy. And this is where it sits. You want to put Calcium or whatever, we already know how to do it. We have shown it to the Chinese military last year when we were in China. I can produce any element.

(2:24) But what is it going to serve? What is it going to bring for us, what's going to be the essence of it? In changing the position and the condition, why do we have to still show in agriculture when we have it? At the of the agriculture is what you eat. Why can't I give you the energy without you eating and killing? I give you the way I look at it, you know that I said earlier on about the guy who makes the gun and the guy who

makes the bullet and the guy who makes the material in it, the powder and the rest of it. They're all responsible. I'm responsible the way I see myself. Why should I give more to produce more to kill more where you can? And there's no other way left but to go into One Nation policy. People who follow our work, you want food, we provide it. You dial the App, you get it. This is the dilemma and the problem I've been sitting with for past times in why should I become part of the tool of killing? That cow you eat, that rice you chew, we have the knowledge why it's coming ?? .. . But why should some people have some few imaginary bits in their accounts to show who they are. And they get shot and blown up with a bullet with nine billion in their pocket.

(2:26) This is the problem. This is the serious problem which we have, which I face with, and I try to find a way to, what you call it, to find a midway, at least interim way, to be able to justify my work. But the governments will not allow it to happen, because there are people who make money. And they bet in how they make money. I contacted one of the richest people in one of the most advanced nations in the world. In the very recent past. And I asked would you be... They're Knowledge Seekers. They're not outsiders, they are close to the Foundation. Would you help to set up a structure that we can provide energy freely, in a very cheap way, to all the ones who need it? And the answer I got was absolutely

ridiculous. What do you take back with you? As I always said, even to my children, the day I die, (2:28) what is on my back is what I own. I haven't gathered properties, and investments, sitting around and doing things. Because everything goes to the Foundation. You see, when you look at this, see what you see. The elements. Iron, Zinc, Silica, Chlorine, Nickel, and you see the stamp from the Chinese military laboratories. These materials are created in the open space. Do I need to mine and do I need to kill for it? So, can we produce Calcium and blah, blah? Yes. As easy as this. But can we change the course of humanity with it? It's a different question. And this is why we need One Nation policy. Then we make it available for anyone, anywhere. It's freely there. We have shown this. We have done this in Keshe Foundation again, and again and again.

(2:30) We're run a tight ship, but when it's needed, we open the doors to be benefited. Within Italy, if you remember a few years ago when there was an earthquake. We opened the Keshe Foundation factories, whatever we had, ?? to the property of nation to help the nation. Then the Knowledge Seekers went everywhere trying to help the earthquake disasters. Why? With the knowledge we have, we have to do this. Why do I have to increase agriculture, clean up the pollution which other industries keep on putting back in? That when you create the condition these are not there, with the knowledge is there. Who's stopping us?

Multinationals. Because they want to have more figures, they are more richer and we have more Bill Gates and the rest of it. It doesn't stop for me and this is the ?? dilemma I have at the moment. Any other question? Q: ... It is always an honor being present and talking to you. In your amazing book, number one, the Universal Order of Creation of Matter. If I may, in a chapter referring about interactions of pmtics, you have stated, "Magnetic fields in essence, (2:32) are created out of the potential difference in position from their source. A Keshe principle of..." that was end of that quote. This Keshe Principle of creation of magnetic fields and magnetic fields strength are explained in full in the paper entitled the creation of magnetic fields. Could you please elaborate more about this paper or where we can buy it? K- The creation of magnetic fields is book number eight, and it's in there to be published. R: Is there an ETA (arrival time) on that, by any chance, or do we have to wait for World Peace? K- It's written, part of it is written. Part of it is written. Since we left Belgium, I stopped writing books. In the book about the Soul and its pieces, that time when we started teaching about the Soul some years ago, Sandor was collecting all the teachings and putting it as part of it. (2:34) And it's in our possession, we have that. But in essence, the, in some of the part of the teaching I referred to this, but... The origin of the magnetic fields brings you back to the Creator, and the process of Creation. And I wrote the books according to what

man could understand, could relate to, and to be benefited by. And at that time, and even now, I don't think mankind is ready to understand this knowledge. I'll become that guy on the stick. But, when you speak about the origin of the magnetic fields, you have to understand the process of the Creation and the Creator. And as we come from there, we know it. But man is not ready to understand it.

(2:36) And as simple as that. And in the books, I always set the basis for the future teaching, future understanding. You got to realize these books were written nearly 15, 16 years ago, 2009, 2010. And I always said, I write, I finish the books, publish the books, when I return back to Belgium. And there is a reason for it. We don't stand ?? intimidation of the man's kings. As the King who made the man is with us. One day you'll understand. Any other question? R: I was wondering if you could make a comment on the Bangladesh situation. Mosfeq has been talking about that because he is from Bangladesh. And it seems that the poor people, or at least the common people, have basically taken control of the country,

(2:38) and are bringing in a different government. They've kicked out the previous government, and from this sort of a grassroots organization, they're now cleaning. The students, primarily are responsible for this revolution, or evolution, or whatever you like to call it, but it all happened within about two weeks, this incredible transformation, or maybe transmutation. Yeah, what can you say about that? K- There's not

much to say, you have to understand the culture of Bangladesh, where it came from, how it came about, and the way it's structured. The biggest problem of Bangladesh is not its people, is its geography. And as long as the cycle of life on an annual basis guarantees on a regular basis destruction, nomad-ness, you have the people who will do this, create continuous poverty, continuous evolution in this part of the world. And when the Indians created Bangladesh, this was a part which nobody wanted, and that was the time we put the Muslims in it. You have bit parts, which they... that's what we call, normality. And when you have this position, you always have abuse. And changing the power, the people come into power, they put in power in 5 years, 10 years time, they revolt against them again.

(2:40) Because this nation has no resources, as such, to support such a large population. This is a colonialism of the British, when they brought this thing in, when they split India into two part of the... If you remember, going back into seventies, in that time, there was a East Pakistan, and a West Pakistan, and a East Pakistan changed the name to Bangladesh. Because, even the West Pakistan, with the wealth, and whatever they had, they ?? were inland... what you call it, a structure, could not support the others on the other side, with India in between. And this needs restructuring, this needs One Nation policy, that the Bangladeshi and the Indians and the Pakistanis all go back to the structure and have the access to natural

resources, or as a structure of Keshe Foundation we create natural resources, that if the people's intellectual mentality is there, to develop the country in a different way. Biggest problem of United Bangladesh, you will see this, we had this, go back on the history of Bangladesh in past 50, 60 years, you'll get this. Every 20 years, whatever, you get people who get corrupt, and they are corrupt, and they bring in, the students do things, the others do things, and they go back onto it, and we see it. Bangladesh needs a resource-based industry, where they have natural resources, where they can support the, what you call it, the population.

(2:42) And poverty brings corruption. They change it now in 10 years, in the years with... How many times we had... Didn't they get separation from Pakistan? And they thought they can do it better themselves, with (then) one president in two places, thousands of kilometers apart. Go back on the history. They should have stayed as part of the bigger Pakistan, where natural resources around the other side, they could support it. You have a low land area in Indian Ocean or whatever you call it in the, in the sea front. And this gets hammered every year with cyclones. People have no security guarantee and these people always go back. And this reflects in all the way up in their structure. They didn't give the best part of India to the Bangladeshis. They gave the worst what they knew, that will bring un-stability, or instability. And this is part of the inherited physical structure, geographical

structure of this land. In years ago, I don't know if you can go back to nineteen nineties, one of these cyclones and floods hit Bangladesh. In those days we had businesses, big businesses, which we used to bring clothing from Bangladesh into England, into our warehouses. And there was a cyclone and there was a huge losses and everything else. The shipping company managed to ship our goods, after quite some time, to Manchester.

(2:44) And we never seen this. The container arrived about 3, 4 o'clock in the afternoon. And I could hear shouts and panics, from all the staff from downstairs. We went down, and they opened this container. And I've never in my life have seen so many different color, shapes, size of cockroaches. And we were wondering how the heck. We had to call the, what you call it, we have a special structure in Britain at that time. That they come for infestation. We had to inform the government we've been infested. It was very serious. And we started collecting these in jars. Some of them six, seven inches long, some of them two, three inches long, different colors. And after investigation, because we had to respond to the government, they couldn't stop anything else which came from Bangladesh, that time, other places of England. We don't want these animals in the country. It came that the containers due to the flood were kept on the port of other shippers. And the water seeped in and with the heat and the temperature, in the boxes, cardboard boxes, were infestation of cockroaches, and they just

grew in it. And then we start looking in the structure of the, how we stop trading with Bangladesh, because this was too frequent. And this brought... That time we looked at why and how we could... The price was good,

(2:46) but the problems were big. And then when we looked is the structure of the nation, the country is too low level. It's the flood lines of India, made into a nation. And then this keeps poverty. They don't have natural resources. They have labor force, cheap labor force. And this will happen. This inevitably will happen. The students are getting educated, but there is no work for them, because there is no... unless you're free labor, you do. Everything is seen with computers, and they become programmers, and they travel to America, and become the rest of it. There's not much you can do, but it's there. This is inevitable. We'll see it on regular basis. Every 15, 20 years, 15 years, they go at it, because the guy gets in there, he's too comfortable, makes... get money, mainly by support from, what you call it, Relief Funds and the rest, and they put in their pockets, and then they become too cozy, and then the students go on the street, and they do the rest again in 15 years. The problem is that these people don't have roots. Bangladeshi people, many of them don't have roots. It's the same with the Pakistani people, don't have roots. Because, in nineteen forties, when they established the... Pakistan which "Pak" means clean, "istan" means the place,

state. The, which means, it was clean of Hindus and Buddhists, or whatever, they had at that time.

(2:48) So, it cleaned up and the two part called East Pakistan and West Pakistan, it means it's cleaned up any Hindus and the rest is clean, it's just for Muslims. That's what it is, that's how it was a British divide and rule policy. And these people, lost their culture, they lost where they came in India, and the other part of India, where they were originally from. And they haven't rooted in this land. They don't understand the geography and topology of the land. How to live and how to do, and the government doesn't do. It's just millions and millions of them in ?? . If we bring the policy of, what I call, a policy that you pay, you feed people, on the basis of the mobile phones, as we should do, and then yes, it can bring the change, permanent change, because people don't rely. People do anything to have one food a day, to suffer the physical body to be alive on this planet. And this is one thing I never understood. Be the poorest men on the street, the richest men in the palaces. And Bangladesh is a ?? prodigy of British ruling. We see the same ruling again you if you are wise if you understand if you go back to the history of the Palestine and Israel. You see change the Bangladesh to West Bank and change Pakistan to the Gaza Strip. On the other side.

(2:50) It's the same British policy, British established Israel. Because nobody accepted the Jews. Europeans they wanted nothing to do with the Jews at

?? end of Second World War. British negotiate with the Palestinians bring them in and now they're in you see the problem. You just change, turn it around. One side is Bangladesh, one side is Pakistan, one side is Israel and then you have West Bank and you have the Gaza Strip and the rest of it. This is policy, British way of doing things. Because in the future when they grow up they still serve. They still operate. And Bangladesh has left no proper resources except cheap labor, that people are ?? . And they live on, most of them, on the poverty line. Because the, the cyclones hits them on one side, and this is a big part of people. They get hit on a frequent bases and then you have inside no resources, you have a poor nation struggling inside. And they have no roots. All of them, most of them, it's the roots to go back to India. If you met many Bangladeshis, I had a pleasure or the position to be in touch with these people, during my student time in London, because if you came to London, a conference, where you walk down, it's the place where all, most of the Bangladeshis came, where they came from, that part of the world, this was their area, and it was, we were a lot in touch with them, as part of the students we crossed, we see, and they had food cheap. What your cheap food for students, we came to know a lot.

(2:52) Any other question? I wish you all the best, but this will repeat itself again, because government, the structure, financial structure, for nation, to be self-sufficient, resources and the others is not there, and

the population's too big, and topography is totally out of line. Any other question? Q: ... Dear Mr. Keshe, as an upcoming religious leader, entrepreneur, and having private merchant banking capabilities, focusing on funding the Keshe Foundation, can I contact you directly, by way of email or letter? K- What? R: They want to contact you regarding funding or some sort of... K- ... You go, the usual way is, info@keshe.foundation, and then they put you through. R: Right, I'll just put that in the chat. K- I think it's info@keshe.foundation. Or if you go on to the Keshe Foundation website, there is a link to contact somewhere. Somebody who wanted to contact us recently, found a cheeky way to do it.

(2:54) He went and he purchased a very small cheap item, and where they had to put ?? there, I don't need the goods, I just want to contact Mr. Keshe. That's another way. Then the sales get in touch with us. R: Okay. The back channel. K- Back channel. But go on the Keshe Foundation. I think it's info@keshe.foundation. And there was one, I think it was, the secure one was the Spaceship Institute. I don't think we use that that much. Q: ... Mr. Keshe, for your information, I asked the above question about creating Potassium and Calcium plasma fields, in the fastest way, only for using in the oil industry, not for any other purpose. Does the Keshe Foundation in Iran cooperate in this matter? K- Yes, if you can pay them to build the systems, we send the material through. But I don't think you'll have much oil industry in next

few hours, if the things go the way they are going. But get in touch with Yousef and then we can organize something through Yousef. Q: ... If I feed myself with plasma fields, how can I stop the oral gratification? I mean the desire for oral gratification by eating.

(2:56) K- Oh, that's the biggest problem, isn't it? It's...

R: That's it in a nutshell, so to speak. K- I met a guy, years ago, if you were Chinese, you know who I'm talking about. He used to do most of the translation of teachings, originally, years ago. He start using Gans water, not Gans's, but Gans waters. And he said about 7 months, a lot of people in Shenzhen, used to do this at that time. And he stopped eating food. And I said to him, "I see you eating", he said, "I eat out of the shame I'm sitting in front of you, that I don't eat, it'll be not polite." I said, you should have kept with it, forget about the politeness. This is what brings us to, you know, what, why do we eat? Why do we need to eat? And do we eat if once we have this do we eat because we have to? And why do we do things like this. This has been brought to in very different ways. When we used to live in China when you don't see this anywhere in the world. This is a typical behavior in China. You go to restaurants and the restaurant inside for example has got 50 seats. But there are 100 seats outside. Little, you know,

(2:58) stools and they put drinks, water, snacks for people sit to queue up to go in and eat. And then they give you a number and they call. 78% of the restaurants in shopping centers, in city centers, have

this process. It's not something to a few. It's a very large number. You have a seated restaurant and you have you put chairs outside, people sit in the queue to go and eat. And, many times, I thought, what about if I put a system here and feed these people without (them) knowing outside. They go on and there'll be no one, nobody sitting on the chairs. Would they ever know why they left? And would the shopkeeper ever find out, how come I have no customers? Our Knowledge Seekers from China can send you these pictures. It's very normal in, what you call it, shopping centers, big centers, or anywhere, there are restaurants, you see this even on the street, they put chair outside for people to wait. There are more people waiting outside than people inside. And they wait for hours to be fed. And I always said, "Wouldn't it be nice to just put a couple of systems on this, either side, without them ?? knowing, just two suitcases, and release the fields and see how these people walk away. Are they still hungry?" And when they go home, would they eat anything? And do we need to eat?

(3:00) And then we need ones ?? .. then we don't, the ones ?? do we need to worry about eating. It's going to happen to us when we go to Space, there are no cows, there are no beefs, there are no chickens, there are no carrots. We feed you with these things, you lose your mouth, it'll close. Your stomach digestion will not exist. And partially because you lose your stomach, and secondly we cannot give you air all the time to breathe because we provide you energy which

is you inhaling it that you receive it directly into the system. Do you, would you have the mouth even to speak? And how fast do you go to through this evolution? And this is the reason why I said transmutation is better than transfer. This is one of the main principles that I brought the transmutation so forward. My plan was to teach transmutation 10-15 years back. There is enough knowledge to be taught in next 10 years, 15 years to come to transmutation. But if we're going to bring, we saw necessity to bring the technology and education forward, was to bring the transmutation in. Do you remember when I started teaching about the Souls, because we're planning to bring it in, in time. "Oh, he wants to control your Soul and he is this and that." They never understood. Now you see the headphones, you see how you interact, and now you see how much garbage they talked about. Creating fear.

(3:02) And, this is what the next step is. For man to be a long passengers of Universe, physical body of the man, is a burden on his existence. You have to transmute. And take the shape and the condition of satisfaction of the Soul, STP, and manifest yourself in the place dimension of the existence as it is. There are no cows on the Mars, if you want to go and live on the Mars. Unless you take cows, how many cows can you take? You wait for the next shipment, you're living in Africa, you go to a shop today, there is the cucumbers, the next three weeks there is nothing, because there is no shipment. And when the

cucumber comes, they'll buy all of it, because it might not be for another three weeks. There is no need... Let me explain to you in a very different way. 100 kilometers, 50 kilometers above Earth, there is no government, because the Earth rotates and you're up there. You belong to no nation. You are from Earth, but without what you call, nationality. Because there's no nation. You are national citizen of a nation when you got your foot on it and you're in it. Earth rotates, you have no nationality. You have no banking, you have no food store. And if you become a passenger of Space, you have no need for shopping.

(3:04) Maybe you can buy Yves Saint Laurent suits or Nike shoes, if you still use the physical body if it fits, because you have no fat, you're a pencil size. Then what's the next step? If we can live in Space without killing, without abusing, why can't we do it on Earth? This is one of the questions which I brought up, even with the Chinese authorities a few years ago. If we are planning to go to Space, and we are producing materials and energies for food and everything else, we can live there. Why can't we live here the same? What's the disease with the man on this planet? Then do we need the mouth? Do we need the digestion system? They tell us you'll bleed internally if you don't eat. Knowledge Seekers tells us other way, hundreds of them, and tens of them went through this process, ?? none of them bled. They lost 20% of their weight, and then they stabilized, all the fat gone. You want to lose weight, perfect, use the Gans way, you

never feel hungry, get all the vitamins, minerals, everything you need to it. And no more drinking Gans, but energy of the magnetic field of the elements.

(3:06) And this is the beauty with this new understanding, this new technology. And, as I said, I read you last time, when we found nuclear atomic, it became the curse of killing, destroying and annihilation of man. Going inside a Plasma, we have found energy of peace, where with nuclear we found the energy of destruction. And if we understand this, is not just peace as a peace, no gun. It's peace within the man. Peace for man, for himself. You can feed yourself through it. You can even clothes yourself with it, once I start teach you how to do it. You can create the most fashionable items ever without mining, without destroying the planet, without killing other people. So do we need to eat? Do we need the mouth? Because we don't need it. 20 floor up. Another, God knows, 10, 20 kilometers above. We're freeze ?? to death. Unless you create a false environment like the Space now, all your food are frozen food as it comes. Shall we call it the day? R: Yep, you've gone into double, triple over time here, so thank you Mr. Keshe. K- Thank you very much. And hopefully we see each other next time. Be prepared for an exciting trip next Friday.

(3:08) And again come equipped with two pair of headphones. And if you have the Communication Bundles, and you have the eye system, let us know, we connect you differently to the system, that you

don't need headphones, and you take a trip of your life. You have to have both, the Headphone and the Eye Glasses, to be able to experience this too. And we create a totally different environment for you. And please don't forget, we have set our path to create the One Nation structure. And Keshe Foundation is in need of a lot of support. To be able to bring this to become part of, as the governments and the, what we call, multinationals, don't want this to happen as they can abuse everything they want to do. And everything needs a step to start with. I've put all my resources in, and we lost millions in past few years. Whatever we had again, we put back in, and we're restructuring it, and we need support to be able to do it. It's not one man's dream. It's the reality that the man has to face if he wants to have a dream of peace. Thank you very much, and see you next week.

(3:10) R: Okay, very good. Thank you Mr. Keshe. Thank you so much for another Knowledge Seekers Workshop here. This has been the 550th one of the Knowledge Seekers Workshops. Here on Thursday, August 8th, 2024. Thank you everybody. K- Did you notice something? Something you noticed. Last week was 549, which is 9, and this week is 1. So, we started a new cycle of life and Technology and Knowledge. 5 on 5 is 10, and 10 is 1. 549 is 9 is the end of one and the beginning of a new cycle. Let's see what we achieve. Thank you very much.

550 KSW August 08, 2024 END
