Part 1

(:15) K- Yes, thank you very much. Good morning, good day to you. As usual, whenever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. As usual we welcome you back. As usual we try to extend the thread of knowledge of man, not just about what is about our body and our physicality (P), but our connection to other dimension (D) and what we call, structures. One of the biggest problem for present science and technology, is that we have got used to the energy resources of this planet.

(:16) And in a recent past, in the history of man, we have extended our knowledge, into using a little bit from what is not connected physically to this planet, but a little bit maybe what comes from outside. What we talk about, we, for thousands of years, as a human race, relied on the wood and something else, and then coal, and then something else, and then became man of oil and gas and became the dominating force, for the man, in how he will progress, and how he'll develop technologically or socially, and the rest of it. And a little bit, in the very recent past, we realized, oh, we can use the... what is not attached to Earth, and we make a system, we call it a windmill, or what I call, 'bird catcher.' And, so we became windmill guys, we're putting a lot of them up everywhere, some work, some they don't, and we get something out of what is not attached, physically to Earth, but it floats around.

Then, in the... in for the recent past, we started learning about Solar Cells, We call them the energy supplies, and a lot of us putting these mirrors everywhere, and we are very happy with what we get, we call it a 'free energy,' and the rest of it. But, what happens when we go outside the Earth atmosphere? There is no oil? There's no wood? Unfortunately, solar winds are not on the way here to blow you up, and then blow fans for you and get your 'bird catchers' to do the job.

(:18) And definitely, in the depth of the Universe (U), solar panels do not work. Especially when you are between two solar systems (SS), and in the Universe, in the galaxy. So man has to come up, with a new understanding of using Universal energies. Using systems, which utilizes, which brings in energies of the Universe. Some places we might have, so what we call, the Cosmic fields floating in the rush somewhere, but not much use to you if you don't have a system. And in some other places, we have to come up with systems, God knows how, in the dark place of Universe, to come up with some answers. To be able to support life. Or we take a new, what we call, not very new, recent past, and we put nuclear reactors in our, what we call, satellites and everything else, and like submarines, that we have an extension of life maybe 30, 40 years, 50 years, in the Space, tingling, dangling a few (electric) currents for our system and hoping that the system stays operational. So for man to become man of Universe, for man to become

passengers of the Universe, in both physical dimension and Soul of the Man (STM), man has to look into a new resources.

(:20) In new ways which he never managed to do so. In a way, that as long as we stay attached and connected to resources of this planet, man cannot become, take long-term excursions into the, what we call, Universe. Even though we hear, our cosmologist tells us it takes 10,000 light years to get to another place. So, with the present knowledge of the fuel, of the man, the Universe and the Space, is a distant dream. Unless we come up with new fuel, new method of energy, new method of creating energy, new methods of using new energy in a way that allows man to become Passengers of Universe. What does this mean and where does it bring man? Anything we do which is not use the physical materials or the sunray and the nuclear according to the ignorance of our present scientists is not valid. So as President Xi of China said, his Excellency, that we are imprisoned, we are literally taken hostage by the scientist. Because of the lack of understanding, because of the limitation, because of the arrogance of their position.

(:22) And those who come with new concepts, new ideas, new energy systems, systems which work, all be what we call, rejected, because it does not fit into the matter state of the life of the man. In a way the scientists who bring the new technologies to make man to be able to live in the Space for long term

conditions, which the laws are against the matter states become all criminals, like M. T. Keshe, like many other scientists, because we bring in a new technology (T), in a way breakthrough technology, and so to this effect we are alienated, because our present scientists are thieves, bunch of bandits and criminals, who to keep position and to keep their prestige name make the others criminal. So what is the new? What we have to look into and in a way to bypass the present dogma of people who take us as hostage. The limitation of man getting out of this village of Earth now has been kept hostage by a bunch of criminals called scientists or fake scientists like we've seen, Einstein, we've seen Stephen Hawking, and we've seen the others. And nationally promoted for their position of the nation and the rest of it. Now we see this more in China. Chinese government, Chinese scientists are kept hostage by their, what they call, academicians. Bunch of bandits, thieves, in the name of a nation.

(:24) We have the same in Iran, we have the same in England, we have the same in United States, and the rest of it. So, what can be done? What and how and what do we have to look for, that in the passage of time, the introduction of new technologies, new energy resources, new way of thinking about the present, what's available to us, has become a challenge for many scientists. And as usual, the trick the scientists show, like the religious people, when they talk about the Methi (Messiah), he'll never come

because if he comes, I'm not (really) a (truly) religious (person), religions don't exist, and (then) I have no job. And we see the same thing with the scientists. If they accept a new technology, then their title is worth nothing. And ignorance, and as the others rely on their decision prevails. We had this in China Gas Corporation last year. We showed the production of the gas from a simple system at the highest laboratories of the Chinese government Gas Corporation in Beijing. And the academician, seeing that he's expert, and his job is in the bin, he says "I don't understand. What I don't understand does not exist." But the beauty of what is created is not a gas. This is the short-sightedness of the man. But as a gas we can show the confirmation of the new technology. And in every other form we can show the next entrance, next dimension in the world of science and technology, where we rely on resources,

(:26) on the energies, which is common across the Universe and not only on this planet. In the teaching of last week I explained and the week before in more details I explained, the man has two life, part of life, one connected to the Universe and one connected to the Earth. Matter state conditions of the creation of gravitational field of the energies in interaction with the atmospheric condition of the Earth, creates what we call, the matter state condition Gans of it, which is the Calcium and everything else, and as itself is made of the parts of the other side of the Universal energy connecting together, like Hydrogen (H) and the

Carbon (C), brings in the dimension of the Universe, Universal energies, Universal condition. So, by now you as Knowledge Seekers (KS) should have understood, if on this planet, Calcium, Iron, Potassium and everything else you call it, in combination of interaction with Universal energies, leads to creation of life, leads to creation of conditions, which creates the cell of the body of the man. Now, if we use the whole thing of the Universe, we should achieve the same. The fact is that Hydrogen, that Carbon side of the amino acid (AA), is not just there to make the Amino Acid (COHN), to create manifestation of life on this planet, as a joint collaboration of the Earth and the Universal Energies, which you call Amino Acid.

(:28) If we learn how to burn, how to create energy and in more depth as we look, everything which we create energy out of, is connected into the Universal energy, which we never considered. In the body of the man we burn sugar, Carbon and Hydrogen, which means we receive our lives from the essence of the source of the Universe. We were created out of the interaction of the first sugar, fundamental structure of sugar, which is CH_3 . You see again, Hydrogen and Carbon. You burn gases, you burn oil, you burn wood, you use the wind, you use the solar system, which is the field energy of the Hydrogen. All comes from Universal Energies. Matter state condition of Gans cannot, in a way, bring in energy resources, unless breaks down to the fundamental interaction of the fields, as it is in the Universe. So, in a new

understanding of the science and technology, now that you understood about the splitting energies in the structure of the Amino Acid of man which is half Universal half planetary, then you understand in the Universe you still have that Hydrogen and you still have that Carbon and you still have the structure of the universal shape what we call, our Universe through Carbon 60 (C60). We create the condition of containment by the dimension of field strength of the energies of the Universe. It's not somebody has put a cap on it, the cap is on it because of its own strength.

(:30) This is how the dimensions of the fields of the Earth is dictated. This is how the dimensions of the field of this solar system dictated and the rest. But there is one thing fundamental that man has not even understood in detail. What is one of the joys of the man on this planet when you walk in the sunny and rainy day, when the interaction of the fields of the Universe with the planet Earth's magnetic fields creates what you call, a rainbow. The explanation of the rainbow by the dimension of the physicality of the man's scientists is so ridiculous that they do not even understand what rainbow means. You take the structure in a gravitational magnetic field of the Earth into another planetary condition, into another dimension of the Universe, your rainbow it won't be the colors you see. The rainbow of the planet is the color of the interaction of the fields of the Universal energy, rays of the Sun, and energies of the Sun, like that solar cell, with the fields, magnetic (M) fields of

the Earth. Why does it always have the same shape? Because of the horizon dimension. And now you understand. If you haven't understood that, go back and look at the ring of the Saturn. There is no difference between the ring of the Saturn's and the rainbow on the planet Earth. Read the book about the creation of the ring of the Saturn, which I've written years ago. Then you understand how much our scientists are misguided. If you analyze the shape, the dimension, the curvature,

(:32) the expansion of the light and the horizon with the rainbow, its dimension and direction of the thickness of the colors in it, you will get a very good idea of what's underneath beneath that rainbow, within the structure of the planetary Earth. It opens the line of the light, it just explains more, but man does not understand. In the world of chemistry, we say each color of the flame represents a material. If burns blue, let's say it's Hydrogen, if it burns green, it's Oxygen Hydrogen, if you burn another color, is that material. This is part of the work in the dimension of the, what we call, pharmaceutical side of the knowledge of the man. So the same applies to the rainbow. If world of science understand this, and can understand how the energies, how the fields of the Universe connect to the dimension of the physicality of the man, and his life and his dimension of the what we call fields of the Creation, and then we understand the totality of life on this planet. Then we will understand the dimension of the work. Then we

understand the dimension of the, what we call, how life has changed, how life will change, and how new dimensions will come into operation of the work of the man.

(:34) In fact, mankind will be devastated to understand how everything around him has changed. And how the knowledge of the Universe can be added to the knowledge of the man, to bring in a new dimension of knowledge. How in Space, in the deep Space, in combination of the fields of the Universe, in interaction with the fields of the any planetary system, any condition, not necessarily planetary, but field interaction, will create its own energy, its own, what we call, rainbow, its own conversion of energy, its own manifestation. If you understand this, if you comprehend the depths of this, the what we call, knowledge, then you understand how come you have different skin colors, how come you have different structures, and how come every organ in the body of the man has different colors and structure and work. Then, as I always say, there is no difference between "Micro and Macro." And, this brings us in a much more closer way, to understand the work of the Universe. To understand how to bring changes in the world of the science, and the energy of the man is used, and how man can use these lines of energies, these fields of the Universe,

(:36) to create motion. To create energy, to create life. And how much we can extend this knowledge to a point, that can bring change in the life of humanity on

this planet. I'm a nuclear physicist and I've been more or less for 50 years. And to achieve this new understanding, in the structure of the knowledge of the man, we have developed a technology very much like a nuclear reactor. But this nuclear reactor of the Universal dimension does not release a neutron to create energy. It creates condition of the release of the energies in the state and in the condition of the Universal Energies. For the first time, you understand what this means, once you understand about the transmutation and transportation and everything else the way the new knowledge has to say. Mankind, nuclear reactors, even the ones in satellites, has a time, life, time span because it has uses, it uses dimension of the matter state, energy release. The new reactor which we have developed and undergoing tests, is another nuclear reactor, (:38) which produces energy in the dimension of the Universe. Which means, man become independent of the resources of this planet. Man now uses the same technology, as used by what you call the Aliens, the man of the Universe. This is one step beyond the system, which we developed in Iran and for lift and motion. This is more or less the ultimate energy system, which man has been waiting for to become independent, what you call, the 'free energy' structure. This technology will bring change to humanity. Where through this new technology. Not only you can transmute, you can use energies of it to live at the point place and position does not where you land.

Does not matter how you manifest yourself. The development of the new Universal energy systems which is a breakthrough in the world of science, will be disclosed in a very near future, and it'll be shown to number of nations. This system is not to be developed, this system is already developed. This will bring a breakthrough all the dogmas we have with what we call 'clueless scientists,' call themselves academician and professors and the rest, which have taken humanity to hostage.

(:40) I have asked the Iranian government for past 6 weeks to allow this technology to be released and with the wisdom of Ayatollah Khamenei of Iran we are waiting for an answer by 12 o'clock tonight. There on it will be released to the governments, first by the British government in next 24 hours, and then the other government step-by-step the way we released 'the Key' (USB stick with patents). It's the responsibility of the Iranian by tonight at 12 o'clock to answer in how the technology based and developed in Iran by Iranians will be in public, bring an end to nuclear warfare, and end to energy resources which has kept humanity to ransom. This new reactor, this new technology, will bring a change beyond imagination. No more need for burning fuel, no more need for electricity production by all the, whatever .. has been. This new structure is in operation today. It creates a combination of fields which connects man to Universal energies, which by the interaction of creates 'fields motion' and creates 'fields energy.' This is the way the

center of this planet Earth works. It's the way the Universe works, is the way the structure of the whole pattern of life in the Universe and Unicose is connected to.

(:42) Go back to the teaching, go back to what we said. We define energy as magnetic field in motion, and this does not obey the Newton's law, this obeys the Creator's law. This obeys the way the fields interact and then if you understand this there is no so many light-years as the light will be in the what we call, maturity of the man to be enlightened with the 'Knowledge of the Creation.' We can take this knowledge, we can take this technology to a point of taking man to ransom as has been done by the oils and the rest, or bring man to the point and to the dimensions of working with the Universal energies. It has taken 40 years of research, as a nuclear physicist, to change the production of the energy as heat, as a nuclear reactor, to a system which creates the Universal fields, and in the appropriate way to Universal energy. And then it's for the man to decide, if he uses this energy, for burning, for heating, for food, for whatever he likes. Or he uses energy to transmute across the Universe,

(:44) in the dimension of the physicality, and in the dimension of what we call, as you call it, transmutation. The new technology goes on the back of what we've been teaching for past few weeks. Creating fields, creating energies, in a dimension and in the structure, that can take a man to his Creator.

Depends how you understand to use the new technology. And if need be, in next few weeks, we release the technology, on what we call, as you are aware of it, a 'Blueprint Day'. And we'll change the course of humanity. Creating energies at the level and through the process, that allows man to be able to be free on this planet, and in the Universe, will become a new challenge. For the world of science and technology, and breaks all the taboos and restrictions which has been put on man, by fields, by scientists, by materials, and by limitation and control of it. What this means? As we have shown to the Chinese scientists, and military, and the Space people. We produce all materials the man needs, in time, place and position (TPP). Which means, the restriction that the Chinese have put on Americans, on what we call, 'rare earth materials,'

(:46) as of today, is obsolete. Americans can have access to as much material that nothing is really 'rare.' The limitation of British Petroleum (BP) on fuel, on gas, trying to get access to oils, and bringing wars and everything else and the mess we've seen with oil industry comes to an end. As the scientists and Knowledge Seekers like you, release this technology worldwide and show its use of it. It costs less than \$20 to make a house self-sufficient, and the way I taught you how to make Gans's and the MaGravs, I can teach you how to make yourself independent of the energies and resources of this planet.

In doing so, we create another chaos. So the governments have to be involved. The Governments have to be part of this knowledge release. We are not looking for financial rewards, as we never did before. We wanted it, we came to you. But it brings a change. You made the Gans's. You brought, you fought the Corona into ?? . Many of you saved your lives. Many of you use Gans's for pains and everything else. Now we show you how you create energy of the Universe and you can travel by using it in the matter state, in the dimension of matter state of man, or to use the same to be on the other half of your what we call, Amino Acid to become Passengers of the Universe. I put this proposition to Ayatollah Khamenei of Iran for past six weeks and it's too hard for them to decide to keep the religion, or to bring the science of the Creator.

(:48) To take revenge on another nation while hiding another technology. And today is a deadline for Ayatollah Khamenei of Iran by 12 o'clock tonight. The same as of tomorrow British government, the same Russian government, the American, the Chinese, the Japanese will be given the technology. And they have time to understand, to bring it in order and then the Keshe Foundation, as you've seen, as usual, we release this technology to all of you. A five-year-old child in a kitchen, as we saw in China years ago, making Gans's, will be able to develop this technology. And then we show you how to use these fields to transmute, to receive energy and everything

else. But you have to understand the structure of the first reactors, which I developed and I showed you. You need to bring the total knowledge of the Keshe Foundation together to be able to become part of that. The beauty of it is, it is very simple. As you create the dimension of the fields of the Universe, your Universe, central points of it, which is your Soul, will connect to it. You feed from it and you feed your physicality, you feed from it and you decide the dimension of transmutation, or you feed from it and you do the transportation. Now you understand the teaching I gave you about MaGravs, what MaGravs capability are, and how they have to be used, is no different in the knowledge.

(:50) Go back to the teachings over years, I always said, "When you feed the STM, the STM will feed the physicality in any time, place and position, that it does not need to kill, to destroy." This is the way this planetary system receives energy through the same way from the mother, that can transfer and transport and have motion on this Universal part of its life, around the Sun for billions of years. Earth is continuously, without fail, has been 'breastfed' by the Sun, through the magnetic field interaction of the fields of the Sun to the center of the solar system of itself, which is the center of the Earth of the man. And we have seen him in his ?? tribe, he has created life, supplies and energy and feed us for billions of years. How did this come? Collaboration between the 'mother and the child,' in the central fields of the

Universe and understanding the process. It is not, if you understood, the gravitational magnetic (GM) field position of the Earth and the Sun. The gravitational magnetic field interaction, is like an umbilical cord which the mother feeds his child through, while the child is still in the womb of the mother can swallow some of its, what we call, liquid of the womb. Man in the physical life sees an umbilical cord between the mother and the child, line of feeding. In the world of cosmology,

(:52) astronomy, we call this gravitational magnetic field positioning. Forever, what are these fields which coming from the Sun to the Earth, what do they do? They bring food, they bring energy, which feeds the center, which seeds in the interaction, the life on the surface, and at the same time, what does the umbilical cord do? Releases what it doesn't need, back to the mother, for it to clean up, to feed back. Now you have to understand the operation of gravitational magnetic positioning, the interaction of the fields of two objects, receiving and giving, the umbilical cord between two entities. Then, in a way, if you understand this, in the future, the scientists move that ?? mother, surrogacy of life. Which means, you connect to, instead of the Sun, to another star. By creating the magnetic field structure, the way we did in the Iranian first space reactor, we have the capability to change the magnetic gravitational field, to find a new position in respect to Earth, lift and motion. You extend the understanding. Now you change the

surrogacy, you change the Gravitational Magnetic field inside your system, with the new energy system, with the new materials, to another Sun. Then you get on the track, instantaneous transmutation. You change the Gravitational Magnetic field in the Iranian reactor, and you ?? half a meter, two meter up, you move forward, backwards. With the new Universal energy, (:54) you change the energies inside, by the Universal field strength, then you become surrogated, to any place, point and position, in instantaneous transmutation. Now you understand the purpose of the teaching of past few weeks and months. Keshe Foundation, in releasing the new structure of the fields of the Universe, and having a system that continuously can produce it, has opened the hand of the man and from the shackles of this planet. It's your choice. To stay or to leave, to transfer or transmute, to feed your Soul from the source, that then the energy, the sun of itself, with its cells, it feeds its cells, that man shall not kill. Now you understand, while we've been busy, while you've been coming into these tests with us, every Friday, what you have created, confirmation of the technology. In this process, in this understanding, we release further technologies. New technologies unknown to man, in the coming time and weeks. Once we start a first leg of negotiation with the British government tomorrow. And then following on with other governments in the coming weeks, then it's the decision of the governments how this new technology will be released to humanity. New energy

source, but Universal energy source, not 'manmade' condition. And further on, materials will be introduced, technologies will be introduced, that it makes man independent of any resources, but learns how to tap into the Universal energies, anywhere in the Universe.

(:56) In this process, we bring in the change, we bring in the next phase of the Keshe Foundation. 2024 is the year we promise we'll bring the change, scientific, economical and every other aspects. We're trying to negotiate with the Chinese government on this, but they're trying to steal, which is the habit of the Chinese. Sitting with the Generals, we realized that the ambition is, to get access to knowledge, and then use it to destroy the Americans and Western society, as they see themselves superior. We speak to the Americans, they are worse than the Chinese. So, we decided we speak to the father, or we call the ones who structure everything in the background, which is the British government. And we have already, as a long-term resident of the United Kingdom, know how, and we have access to the structure of the government. It would have been easy for Keshe Foundation to take technologies to the Russians, and create a further mayhem. In the process of Ethos of the Keshe Foundation, sharing knowledge, as we've done before, the knowledge will be shared accordingly in a short time, If we reach understanding with the British government in the next few days, we'll try to release this technology Worldwide by the end of this year. That is the decision of the Knowledge Seekers,

the way I did with you in 2012. I gave the Key to the government to be able to go, and then released it to you Knowledge Seekers afterwards. And then when I released the knowledge of the MaGrav system, first you, you all got,

(:58) whatever ... It doesn't work in the rest of it, because you never understood the principle, what was sitting there. How many times I told you to look at the energy above the MaGrav, not the winding of the energy into electricity of what you need. When you learn to use the energy of the system, which is going to be released, By feeding the right energy through your Soul, you heat up your body, you don't need to burn and destroy the others. You create a further interaction which allows you to be able to live, without killing another animal to have its skin on you, does not matter in the North Pole or deserts of Saudi Arabia. The new understanding, the new technology of the energy, Universal Energy, which will be released in the coming days, worldwide, to the governments, will bring that change. Does not need 'peer reviewing,' does not need confirmation, system is on the table. 'Show me I believe it.' We show, the governments have to do something with it. The Space Nuclear Reactors, what we call, man was using, is obsolete. The new Space Plasma Systems, developed and will be delivered, will bring that change to the governments. There will be a chaos, economically, for many nations. But if we see resistance from the governments, I promise you very soon, you'll have a

Universal Energy Blueprint Day. And then, we leave the 'cats amongst the pigeons' of the nations and the governments.

(1:00) You have to understand, there was a reason, in the past few weeks, I headed towards explaining, how you are connected to Universe, and how you're connected to Earth. How I explain the division of the Amino Acid of the man, half Universal, half physical. Now you get a system, then you decide which half you want to travel, which half you want to exist, and which half you want to use together, to create life, sustain life on this planet. Now you understand the next dimension. Now you understand the next condition. Now you understand what is on the table. I insisted for past weeks on a continuous consultation with Ayatollah Khamenei directly in Iran to allow this technology to be brought out. It was a plan to bring this technology on 16th of November in Iran. We wait till tonight. And if Ayatollah Khamenei of Iran decides that we go through Iran for introduction of this technology as a breakthrough technology, we shall do so. And if we do not get an answer from the Iranian government by 12 o'clock tonight, the lines are drawn and the technology transfer to British government and through their Knowledge Seekers to the rest of the world. It will not be easy for many of you to understand the way we work but Keshe Foundation has always work on the basis of creating a knowledge,

(1:02) and creating a knowledge base that every man can use. The new space energy systems is so radical, is so simple, that will force man to bring change. If you are those who sits and do not like to kill, you sit near your system and you have to understand how to adjust it with your system. If you understood the teaching of last week, that the system is made to feed you, to your Soul, that is connected to your physicality. This was the promise of the Prophets of the past, and we fulfill. "Thy shall not kill" and with this technology once understood and completed no man needs anything else but Universal fields to feed itself, its physicality, anywhere in the Universe, and "Thy shall not kill" to sustain life. The word of killing will be eliminated from the dictionary of the man. And as I said, I worked extensively for past few weeks, on a continuous basis with our operation and our people in Iran to change the position of Ayatollah Khamenei of Iran and the Iranian government. And one person, through the spies they created and the profit of their pocket, tried to stop the process. Mr. Nazif, you're dead. You're finished in the world of the science and technology and your diplomacy.

(1:04) We explained to you in detail how the position has risen and we have forced the hand of Iranian government to make a decision on the release of this technology. It has to be understood, it has to be understood that this new technology will be free for every man. No man does need to kill and be worried about the energy bills which cripples the man to do

everything to survive. As I said, "Why should man work all his life just to take another breath? Why shouldn't man to take breath to have a joy of living?" And this technology, this new technology will bring that change. And then you understand the teaching of past 2, 3 weeks. Understand the Universal energy, how your other half, is there, that it does not need your hand to kill to feed, but it brings energy to feed what it created as amino acid of the man. It has to be understood, that the technology is based on the work of the Universe and not on the work of the man, and on how we have perceived and what we call, the academician has taken the man to ransom to keep man in prison. In a way, I give the key of freedom to President Xi, of China, which (who) said that the academicians have taken the Chinese nation to ransom.

(1:06) Now he has a free hand to bring restrain on this bunch of criminals as academician in the Chinese structure. As they have, as I said to them, no scientists to evaluate this technology, led to be academician. The same goes with the world scientists across. The advantages of this new technology is, many diseases will be eradicated. As we understand the structure of the energy source, as we understand the structure of how they tap into the fields of the Hydrogen (H), and how they create life in the dimension of the, what we call C60. Go back to my teachings, last few years, many times I referred to the structure of your skin, and how it's shaped, out of

what we call C60 structure. Now you understand, even the Carbon in your Amino Acid, which you think is part of you, is the creator of your dimension, your physicality, And that's how you take shape, in how it's changed, in how it takes shape and how it operates. So, even you look at your skin, your skin the way C60 has dictated the structure of the higher field order, with the lower field strength, the dimension of this Universe, the dimension of a galaxy, in a condition of the gravitational field of the Earth, has created the, what we call, your physical structure.

(1:08) Without existence of the Carbon in your Amino Acid, you will not have the skin, you will not have the shape of the hand, the fingers and the rest. And then, if you understood this, understand how we regenerate the arm and the leg, which is amputated. How we structure the brain, the way you have seen in the case of Naomi. How we change conditions, but you have to understand, people have to understand the process, it's not just, what we call, frisbee (free-be) and just giving you the knowledge. Understand the Creation, understand the tools you make to create that condition. You can chop an arm and within a few hours have the arm back, because you know how to do it and how to speed it up. It's not a difficult job. You have seen it, how layman like Giovanni, with understanding and the guidance of the Keshe Foundation, built a system to build a brain. So, the same process, the same understanding, once you understand the Universal energies, will be there to

enlighten, to elevate your Soul. Not to build a brain, but to build the structure of a Soul that understands the Totality work of the Universe. Now you understand, why we changed course a few weeks ago, and why I brought you to this point. My call goes to Ayatollah Khamenei of Iran, I know Iranian leadership is on the line in, you have till 12 o'clock tonight. We announce, we process, we go through the Iranian government, or we do it with the British. Either way I'm home, lived in England for 30 years.

(1:10) The change has come and we have put a change on the table. It's for the government to bring that change to you, and it's for the government to accommodate the change, and then as it's been the tradition of the Keshe Foundation. You might have to wait a little bit, but the final goal has been achieved and we are on course to deliver the totality of the feeding the STM. That in the spectrum of the fields of the man, man will feed his physicality and thy shall not kill, because thy has provided a feeding that you can feed your Soul and your physicality. Then you understand the change on the horizon, and what is, will be delivered in coming hours, to governments and nations. I hope we find a wisdom of peace on both, and I hope a lot of you will understand the process. There is one thing I have to tell you, that you might have not known. In the last week, Friday sessions, we tested this technology, on the STM. And when we did, the results I saw on the graph, was a confirmation that the STM is ready for elevation to become Universal

Passengers. Even though we had some few pieces in there, which did not need and closes down the operation of the physicality to keep the Soul safe. You will understand this in the coming time. But as I said, (1:12) another hurdle in the knowledge of the man is completed. I built and supported the British government building British nuclear reactors. And now we go through the same process building the Space reactors, Space Energy reactors. And hopefully I do not have to go back and work in the 'cowsheds' I used to work as a nuclear physicist. But we work in the open space of research labs that allows man to open a new horizon for mankind. We go for a break and we come back and we'll take the next step in the world of science. Rick, would you like to take us to ?? the break?

>> BREAK >> 561 KSW October 24, 2024

Part 2

(1:18). K- Thank you very much. As following of the last week test, those of you who were a part of the first group, two or three groups, we could not disclose to you, as we saw the data and the result, in the other groups, especially after the Chinese group, because we tested something very interesting with the Chinese. We asked you participants to join us tomorrow for a special session. We'll delay this to next Friday, because those of you, or when we couldn't tell you in the first 2 or 3 sessions, that we are taking, we

would like to do one another additional session, next Friday at 2 o'clock. This is part of the last week session, and this will bring us more, what we call, knowledge and structure of what needs to really be done, and then the rest of it. So those of you who were participating in the last Friday session, you're all invited to next week at two o'clock, Central European time, in one group, all of you. So, don't make too much noise, we are not going to be spend the whole day, we put totally all of you for another session, for you to have another chance, and we create a condition, the background for that condition.

(1:20) The other announcement is that, on the back of what we just explained this morning, and on the back of what is been developed in the past few months, we have set up three sessions for November, December and January, that is exclusively to feed the STM. And specifically, to create conditions for his physical and what we call, 'Soul Wellness.' We have already put this on the website. This section is entirely how to teach you how to connect Knowledge Seekers to start feeding themselves without killing, without depending on resources of the planetary system. It's not going to be easy. It's like when we did the test with addiction with you. This time we concentrate. Some of you Knowledge Seekers who signed for these sessions might receive two cylindrical tubes with material in it. We don't tell you who and how, but before the sessions you will receive a tube, like a 10 centimeter long, 1 or 2 centimeter diameter, that we want you to

in the sessions of the next 3 months to hold these, we tell you which hand

you hold it in, how you hold it and if you have Communication Cosmic Bundles how to do it. It's a limited number of these, it's not that everybody's going to get it. We will tell you how to use this. It's the way I explained to you, if you remember, if you hold your hand you create a light in between, years ago. That light is not just a light, it creates a dimension to bring fields of the Universe,

(1:22) into your field energy, that you can use it, it's the way you feed yourself with. A lot of people made a mistake in thinking that, then they will create a light, but the light was exactly the purpose, that that light become the transmutation of the Soul. It feeds your physicality through the hand, let man feeds himself, and to his Soul. This is important for us, as the next step of completing transmutation, and now, how you feed yourself. Understanding what was explained in past 2-3 weeks, how the Universal energies connects to the physicality of the man, to feed the Soul and the physicality. Now we go more on the dimension of feeding your Soul, that it feeds your physicality. If you remember when you came some of you to Linz and you sat on the chairs we gave you two hands to... two handles to grip if you remember, we're hanging on either side of you. It's a continuation of that but wireless. But this wireless this time is not connected to another system. Connects you through our system which we set up to Universal energies, we would like

to see this, and we would like to understand this, and to see what we can do, and to see how we go about this way.

(1:24) It's important to understand the whole structure, and it's important to understand the whole meaning of the structure. (I have to answer this call, sorry, I'm going to be come back. If you can put a small commercial for a second please. Okay, I got the answers, it's okay). As we said before, as our, the Iranian governments are listening, they just send us a message that we will have an answer from the Iranian leadership tonight. I hope it's what we are waiting for. And in a way, we have set the scene, a pattern for the World Peace through Keshe Foundation way, not the normal way. And I know the Iranian leadership is listening online and they heard our first session and we got an answer. I direct it to you, Ayatollah Khomeini of Iran, the path of peace is through the Keshe Foundation, as you know. Technologies which are in the hand of Iranian nation. It's your discretion to bring man to the world of physicality, or find peace through new technology. We respect your decision as a leader of Iran and we respect the Iranian nation. Going back to the teaching, the new system, the new understanding, the new structure, we bring in or possibly,

(1:26) the way the Sun gives us energy on a daily basis, in the coming time, by placing, drones, satellites into orbit, we can feed the mankind through the same structure, in a way creating intermediary,

that everyone irrespective of wherever they are, they are fed, that they don't need to kill, and they do not need to destroy. And, the process will become much simpler. In the tests coming up in next three months, we want to understand, in delivery of the technology and system, that eradicates cancer. We want to understand through the Universal energy, to eradicate all illnesses, be it Alzheimer's, be it whatever. We would like to understand how to feed your Soul to eradicate anger and war. This is what you're coming in for next three months. And we will put a limitation on this, because this is going to be very extensive and it's part of the rapid development in technology. I foresee in the last session or the last month or the last two months, the test will be done with bunch of governmental scientists watching and monitoring the process, every aspects of it. So we bring it out of the hand of the Keshe Foundation for us to monitor, it's for the world scientists to monitor.

(1:28) To see what strength will become the banana, what strength becomes the anger, what strength becomes the transmutation, and then we'll bring this in what we call, universal dimension and direction. It has to be understood that we were supported all the time by you Knowledge Seekers, throughout the years. And we will go through the same process in transferring knowledge and technology through these teachings, that everyone gets at the same time. It'll be interesting in how the, what we call, the structure will change. In many of you, how will this bring a change

to all of us? And, how we use this new knowledge, new technology, to find a way to become part of the bigger structure, in a way you become 'guinea pigs' for humanity. And I hope, my deepest wishes we get the Iranian official scientists, and the British, and the Americans, and the Chinese, all on the same table, to see and to understand the next step of the move, and the condition. And this will... This is the game changer.

(1:30) New energy resources of Universal level, that man cannot does not need to destroy for and to kill for. And gives every opportunity to every man to live a perfect life. When you say, "Thy shall not kill," you have to provide a facility for it, that he doesn't think about killing. When you say "Thy shall not steal", you have to create a condition of the wealth that no man needs to steal to survive. And this is the purpose of this technology to be released now. We see if Iran takes the condition of, otherwise than what we have recommended, the path of war especially with Israel in the coming time and it's crucial for us at this point to be able to change the course. This is not done to defy, this is done to unify. And we do our best as we have always said, to bring that change in a very collective way. We have battled with governments for years, and we have battled with the scientists of the governments and the governments for years. In the coming months, if the governments go through what they're going through, you'll find out that Tesla cars are obsolete, the burning of the fuels are obsolete, the luxurious life of the West will become the luxurious life for the rest,

that every man enjoys the freedom of the energy, life, and transmutation.

(1:32) The cost of such a process is so low that no nation can be taken to ransom. Does not matter if you're a child in New York, in United States, in Africa, or in China, or in Middle East, no one will go to sleep hungry, as we feed the STM, the child and it feeds his physicality. It's not a dream anymore, as we have the system to deliver the technology for. In the coming time, we will see the change in the dimension of what we call, the life of what man has chosen to be, and at the same time... Then you understand the changes, and what it needs to be done, and what needs to be changed, by us, the governments, the rest of it. As I said, world leaders, governments, have their ears to the teaching and you've seen the response. Within minutes from the first session explaining directly where we go, we get the response from the world leaders. This is how the Keshe Foundation has been and hopefully it will stay to be. Those of you who join us in the November, December session,

(1:34) we will close this session very soon because we know we what we are looking for and how many people we are looking for. And we try to bring this in that we start teaching you through our system and your system what you receive to start teaching yourself how to tap into Universal energies directly within you. That you do not need another ransom, but in a way you need to be able to know how to access the energy fields. As I said, especially the last group,

the American group, last week, we put you through some beautiful tests and we saw some beautiful results and it was interesting to see on the graphs how you reacted. We looked at the Chinese response. The Chinese group come in a specific time and it was interesting to see how they reacted with our system, and how we saw. The first group the first time we seen the transmutation. Somebody in the first group managed to transmute in the whole system as we saw in our system. And I explained that to the second group that in the first group we have received, we have reached transmutation. This process is ongoing, is gaining knowledge, is not the end every time we reach a point. It's adding to, understanding more, and in a way, man has spent millions of years, thousands of years, to understand more about his environment, more about what it needs from its environment, what it needs to cultivate, how to use it and the rest and build machinery for it.

(1:36) Now the same processes started, but understanding the work of the Universe, Universal systems and man to make systems, to make advantage of the Universal conditions and not the Earthly condition. As with this technology we have completed the promise of the past. "Thy shall not kill" and there'll be enough for every man to feed the time of the what we call, "honey and milk", and that honey is the what we call, the energies of the Universe and the milk is the energy of the Creator. And now you get access to both and it's for you to make your own ??

into the sweetness of it to your own taste. And hopefully, hopefully our leaders now that they are directly involved in this structure, make their own decisions, how their nations will do, and would the Iranian leadership use this opportunity to offer their 'milk and honey' to the rest of the world and walk away from the war in Gaza and Middle East in the next few days. We will see. We shall see how this will bring the change, or man will carry on with his behavior, that will bring the change on the ?? side of. Are there any questions? Q: ... We did have a question in the Plasma Group regarding the neutron, (1:38) and the fundamental neutron and the energies that are given off when the neutron becomes the proton and electron.

And you mentioned today about the neutron nuclear reactor is basically old school now, and it's earth bound because of its release of the energies of the planet. But the new way of going about things is with the, you could say, Cosmic Rays Reactor, dealing with the energy of the Universe, so-called free energy because there's lots of it. So could you explain a bit, is the neutron basically nothing to do with the newer type of reactor and or how could we relate to that with your previous teachings on the neutron and so on. K- There is no difference. It's the state of the Soul or the state of physicality. The... but in common both, in essence, come from the same interaction of the fields. When we speak about the neutron, we speak about the physical manifestation of the energy. When we

speaking about the Universal energy, we put no measure and dimension to it. When we speak about the neutron in the physical dimension like a nuclear physicist,

(1:40) and in nuclear reactors or whatever, we speak about the measure of the plasma, which that measure is equal to one neutron. This is where man has to understand. When we speak about Universal energy, is one continuous line of feed. Does not gather, does not interact, to become a plasma, but is the feeder of the plasma in a continuous way. And once this plasma is created or condition of it, it carries on, it's like a reserve tank which has got a continuous flow from one end and continuous leakage on the other end. But it's water in that tank. That water in tank in your measuring it is the neutron. The flow of the fields coming in and going out is the Universal energy, the ?? tank fit. And if you read, it is part of the Book 1 and Book 3, if you understood it, the size of the neutron in this Universe is dictated by central gravitational field forces of the Universe. What we call, the fundamental size. This is, I explained to you, it's like very much you make a dough, a big ball of dough and you roll it long like you are making what we call a, let's say a French roll. Okay, but, you decide to cut this dough in given equal sizes.

(1:42) Each section, which is equal to the other one next to it, is one neutron. This is the size of the bread you're going to get from that dough, from that part. That is more or less equal to everything else as it's

been cut in pieces. That part is what we call neutron. The size of neutron on Earth, not Earth, but in this Universe, is dictated by the chef, which is the central gravitational unit, central line of the Universe. There is a slight variation between neutrons on Earth and in the Universe, but that is fundamentally not far from each other. And when we speak about the Universal Energy it's that feeder line. When we speak about neutron it's a chunk of it which is cut by automatic machine which is all the same. That automatic machine is the gravitational magnetic field strength of the central gravitational line of the Universe what we call, the central Black Hole. And that has dictated the size of this Universe. You got to understand, all the Universes are not the same. When we speak about the Unicose. It's the same as all the Solar Systems are not the same. And this condition dictates a lot of size, magnetic field, packages strength, and then the division of this in the environmental condition dictates the release of the electrons,

(1:44) or the creation of the electrons. So there always has to be a Twinity condition depending on the environment. In the Universal condition, Sun has a twin. In the nucleus, we have an electron and a proton as a twin. Sorry, proton and neutron as a twin. Then this structure has to have its own twin system with outside it, which is the electron. This is what we call the fundamental element. You call it Deuterium. Balanced structure. Then you look at the same structure in the Universe. The present theory of

physics that the neutron splits and then releases some energy, and then you have a proton and electron, is on the matter state condition, which separation dictates that. In a plasma condition, in a field dimension, we don't have such a thing. Here we collect energy from the split, there we split into new fields strength. This is what we see interaction of the field of the Earth, gravitational magnetical, with the solar system and with the rays of the Sun, creating plasmas of, let's say, Copper and Zinc and Gold and the rest of it. So, you have to understand the definition,

(1:46) and understand that we speak about two different dimensions and directions. Matter state, energy state. Matter state has divisions, which releases heat and become second. Energy state, which releases fields, which in their motion becomes secondary plasmas completed, or created, which leads again to the condition of central gravitational field of the Universe, that then we see it as a plasmas, and then the condition of it. One of the most important parts, which has to be understood, how stars are created, how your Soul become the center of that star, because now you are that catalyst to bring the rest of the fields of the position of the Universe together, how your Soul become the center of that star, is already created as a Magnetic field composition. And then, this takes it to a further step, that we understand the neutron, the split of a neutron to electron and proton, is the matter state condition of this plasma. In the

energy (state), which is a field dimension, such a thing doesn't happen. And you can create certain friction with this field to become the feeder of that neutron. That creates a condition of the split into whatever it becomes. This what happens in the nucleus of an atom, when we call, nuclear decay. That's on the energy level. But it needs a source of energy for it to become.

(1:48) If he receives it from outside, it will decay very fast, because energy tap into it. If he relies on the loss of the energy from all the electrons and protons in this environment, then it has a fixed time how much it receives. That's why in nuclear industry we call it a 'half-life' it's so much we can measure. In the Universal fields, energy of the Universe feeds the whole lot. When you made that cluster, when you made that atom, when you made the number of electrons, protons and neutrons, the additional glue which is the neutron, which is come part of the structure of holding the Twinity together, becomes itself a gravitational field to absorb any energy, which is released by electrons and the protons in that structure. And once it receives that, it reaches the point, it's like a division of the cell in the womb of the mother. It receives an energy, it splits into two more. But the energy, because it's confining, when it splits it creates a splitting of the atom. Because it dis-balances the Twinity sets of the protons and electrons and the neutrons in the Twin packages. Which is one is between proton and neutron and one between the

proton and neutron to create their own cluster with the electron. This is why we have orbits, and we have, we can get so many electrons in each orbit. It is not just by random. It's by the energy which now this solar cell creates and absorbs and this is what will happen to our Sun. When the field forces gets to a position of the balancing, the Sun will explode because it has to divide, its own energy conversion becomes so efficient that it feeds itself.

(1:50) Plus, the energy is absorbed from the environment of it, then it dictates the condition. We have to understand, there is no difference between Micro and Macro in the structure of the physical side of the Universe. The same there is no difference in the energy transfer on the energy side. The physical side is that half of DNA, the energy side is the other half, the Universal side of the energy of DNA. You got to differentiate between the matter state and the energy state, and then what happens in the matter state dictated by the energy central line, and then the energy central line of the cell, solar system, galaxy, Universe, is dictated by the energy fields of the, what we call, the Creator of the whole. It's very simple. I'm a child, I have a mother, my mother has a mother, and my mother, mother has a mother. It is the same. Man, cell of the man, solar system, the galaxy and the what you call, the Universe. There is no difference and then you understand when we speak about neutron, their splitting of the neutron, energy of release, is the energy which held brought in by the system itself and

at the same time it gets spent by the others. The... when you have an 'orphan neutron' in the nucleus, the... to keep that orphan neutron in its position, (1:52) the interaction of the gravitational field, magnetic field, MaGrav Positioning of the electron, ?? the protons and neutrons in that nucleus, in conjunction with other pairs to keep the distance, is collected by the additional neutron. That's why when you receive that, it goes through a transmutation of change, what we call, nuclear decay. And fundamentally, the size of the energy for each one is decided by the central line of the Universe, in that Universe. The size amount of the fields in the plasma of another Universe is not the same as ours. Depends on what created it, what condition it was created under, and what is position in respect to the other clusters of the Universes. This is exactly what happens to your kidney, your liver and lung. It's the environment that decides the size, the shape of it. This is why if you understood this, we created the brain of Naomi. And if you understand this, nowadays we have this what we call, kidney transplant, dialysis machines, with the new knowledge which we hope now we're releasing as energy, and trying to get the Universal Community to understand, ?? not (now) the scientists of the man to understand, is that if I create a condition, understand the field strength

on the kidney, on the another side of the kidney, you repair the kidney, or you can create a kidney, if you

don't have a kidney, you can create a kidney. This process today is going on with our a clinical test,

(1:54) for the way we develop the brain for a kidney in one of the Middle Eastern countries. It's been going off for about 3-4 months and hopefully the test starts tomorrow. And we see how much we have managed to bring back a totally lost kidney back to operation. And even the doctors are puzzled in how this has been achieved and under observation. That we, same we done with Naomi, now our doctors said 60% of the kidney was lost. Both kidneys. And now we have managed in the first six weeks to gain back a lot of the operation and the test is due tomorrow, to see how much of the kidney we have reconstructed. The person's a young girl and we are with a lot of doctors are monitoring this. It's another breakthrough in the world of science. We have seen the data confirming, we are waiting for the next batch of data, which starts tomorrow in the 24 hour session. And then, we see how much we have repeated what we did with Naomi, total loss, part loss. This time doctors have confirmed 60% loss of both kidneys. And we have shown the reversing, because we understand in creating condition of fields. No medication is taken from the Keshe Foundation side. We just create the environment.

(1:56) And replication of environment connected to the brain, creates a dimension of the kidney. So, you can create a kidney, anywhere in the body of the man. If you know. This is important for the next cycle of the

work, which will come into operation to understand. It's the condition, which dictates the size of the neutron. And then how much energy is absorbed from its environment, and it leads to splitting up itself. What we call a Fundamental Plasma. One is matter state, one is energy state. Any other question? Q: ... In a way, you were talking earlier about the mother of mothers, etc. And that leads into Trevor's question, he had a question that he was investigating about... K- Whose mother? Q: Well, you mentioned that the next Prophet is to be a woman, and he was kind of focusing on that, and he's wondering, Does that relate to Mitra? And how would the daughter of Mitra get here, and when is the time for her to come? K- She's amongst you already. It's not to come. And she's recognized by many people who come across her. And it's the next cycle of knowledge. The birth of the Daughter of Mitra is not a physical event of things will change.

(1:58) It is a continuation of the cycle of the knowledge, which brings man to understand the more workings of the Universe. More or less has nothing to do with dimension of physicality of the man. And she's amongst you. And she has already influenced many things since her birth. It's not what it's going to be, how it's going to be, it's already there. And in time, you will understand and you will see the knowledge. It's a birth of new knowledge, birth of new understanding, not only for mankind, but for the Universal Community. Any other question? R: ... Well, even

Trevor had come, more or less, to the conclusion, after going through "All in One" transcript, searching for the word 'Prophet' and so on, and he says, toward the end, and I'm not sure if my thinking about the daughter of Mitra, as a person, is a reality. Maybe it's the gift of the emotional side to not hurt ourselves anymore. K- We shall see. Q: ...

(2:00) Thank you very much Mr. Keshe, for your decision and what you did today. It's really great, even I cannot talk about it. First thing that's come up today, and we were talking about it, is Naomi condition. God Bless Fabio's Soul. And we were talking... The last movie I saw from her, she was a little bit like she didn't have a balance. She didn't have a balance. Is that because the brain of her is like a baby? And she's like a baby. When baby is walking, like it doesn't have a balance. And will find the balance soon. And we will be like completely normal. And she is normal now or not. Like, first thing is, first question is this, how is she? K- The situation with Naomi standing came on later on. It's to do with her ligaments, not with her balance. And, they had to do an operation, to release that. There was a need for an operation, it was nothing to do with her brain. And, she's going through a normal process of long term gradual rehabilitation. You got to understand, after a while, the process of using the technology for Naomi was stopped. For reasons we know, we understand, but it's a family decision. Or the decision they made.

(2:02) We as usual guide the family to the extent needs to be done, but they have to take the steps the way they took the step to create the brain and the rest of it. She has a full understanding of a normal life, the last videos we've seen of her, but her balance nothing to do with her brain. It had to do with the foot ligaments, which the doctors decided, there is a need for operation, to release some ligaments. You got to understand... When you go through these kind of shocks, a lot of muscle tissues cease, a lot of ligaments tied up. And, if you do not create the condition for it to release through technology, then you have to go through physical operation. We have provided a full technology backup, as we did at the beginning, with Naomi and Giovanni. So there's no shortage for her to live a full normal life. But, her leg, where was standing, is nothing to do with... Actually, this came a little bit later, after she starts walking, more than that... It was a manifested, later on, it showed itself. Because, you see her in some pictures, she's standing, or whatever. But, ... it's like a ligament seizure, and they had to do something to release, which is, the doctors usually think that's the only way to do. While you're there, I have to mention something. We lost one of our dearest friends, John Wales from Argentina, in the past few days. I give as best of my Soul for his elevation to his new dimension. He was a great teacher and supporter of the Keshe Foundation in South America.

(2:04) What's your next question? Q: Next question that come up now in my mind is, the thing that you talk about the thread and string, and like the create a link like between that string and how it works. We have in Koran, << Farsi Language >> and that ?? "habl" in this quote means "thread" ...threads exactly, like respond or ... a string. Like ... is that like ... the ?? new verse last week you talked? Is that a link, like is that a ... I don't know, like you have to ... you? K- I don't understand, I don't understand, you have to explain yourself. Q: Pardon? Like... K- I don't understand your question. Q: ... In Koran, it's a verse, it's written in the Koran, << Farsi Language >> It's in English means, "grab the thread of the Creator" and not be like separated. This is the way, like this is things that way to create, like it's a thread, is a string,

(2:06) like that's the word that they use in Koran, exactly the string and thread. K- Yeah. The point is, if you listen to the teaching of, even I think, last week, the week before, where we drew the ?? circle of the line of the Creator as, for example, into a ball, we are all part of that thread. We cannot be anything separate. Even if we separate as a plasma of physicality, we still have the connection of the line of the fields that what we call, MaGrav positioning. So we are never ever separated from. And it's, it depends what strength that become. And are we on the main line or are we a fraction of the division of the line? It's what you call a thread. You know in Farsi we have what we call "tree of life," and it's well known around

the world. In tree of life, you get a lot of Iranian carpets made with what we call, tree of life, where you have a tree, you have a base, center and the tree comes up and then it divides two branches and then you have different branches, and then the branches have their branches, and they're what we call, three of life. This trunk is the line of what you call, the Creator.

(2:08) And then by division of the plasmas we get subsidiary, the trunk does not change, the main does not change, the main stream, the main strength does not change. As it grows it divides, and this is the tree of the Creator. Which one is the strength and which one is the cord? And in either way, in some cases, when these interact, they create the same strength fields as the main branch. When we speak about tree of life and tree of Creation, they're both the same, it's one stream, one Creator, one base come in, the Mother, Soul. And then it goes. If you look at the I said this in some teachings in the past. When you look at the tree, rooted in one position and it branches out and it doesn't kill, it creates a condition to use the environment to live. The life of a tree, a vertical entity is very much similar to the Creator. Anchored to the Unicose. Feeds through the dimension of its, what you call, Universal light. And in the tree of life, what we see, we get branches. But with the, what we call, the Tree of the Universe, you have a spherical shape, because you have the principle of what we call, the C14 and the division of the fields.

(2:10) The growth, the shape of the Unicose allows the shape of the Universe, the same as a tree. You have a short tree, you have a tall tree, but at the end, you have that, what we call, tree of life of man, you have the tree of, what we call, the life of the Universe. Which one do you call it a thread? The main branch? Or which one do you call it a string? The sidelines? Which the interaction of the field of the two strings can... might lead to creation, connection to the main string. This is the beauty of the Creation. But in the World of Creation, this is due to dynamism of the field interaction, usually

ends up to be oval shape than a round shape. Where on Earth the trees go up that way. The Universe... When we go back into the Universal conditions, we will see something very interesting, is that our Universe shape is not necessarily the same as the next Universe shape. Because these Universes have other Universes which are connected and dictate forces on them. It is not all the same shape and structure. So the tree of life in the life of the fields and the Universal Tree is more spherical than the vertical as we see, in the planetary system. But in essence, if you look at the life of a vertical life, is very much the life of the Creation. Anchored, solid, does not kill, but it takes from its environment what it needs. Any other question?

(2:12) Q: ... Third question is, you said in 559th Knowledge Seekers Workshop, that from the source, energy like the light or energy in motion, it tries to find

the balance between its own magnetic and gravitational field, according to it's, like respect to it's position. What, exactly, like, sets that position? Like, when it reached to that position? Because it bonds back, it reflects when reached to that point. It reached to the, the gravity. ... K- I don't understand your question. I don't understand your question. Q: Sorry, I'll just explain another way. When the matter is created, the crystal structure that you explained, when the light reflects in the point that it reflects to the source, to the, like when all the fields come together in the center, when the crystal structure is created, when this light travels, like a distance from A to B,

(2:14) to find it's like MaGrav balance, and it's a point that it exactly becomes like a source, and then it reflects. K- It becomes like a... It's very much like a proton and electron. And it has a limitation of the travel. It's like the... It gives a dimension of physicality at the point of return. And this is what we see in most of the structures with light. This is how we create laser light. We focus back the lights in, and concentrate it in one dimension. But in the plasma condition, the point of the field in MaGrav positioning, reaching a point in the... in a way if you look at a fountain, where the water goes up, it goes to the point when it can go according to the field strength which is coming up with, and reaches a point and then it breaks and it falls back down. That's the point, that tip point of the change does not come back down on the side of the water. It splashes over. That point of change is a

balanced positioning of the gravity and the field pressure of the water. It's the same with the creation of the neutron. When it splits you have the proton and the creation of electron at a point where the field cannot go any further and the others accommodate it to be in that position. Other field forces and this is exactly what it is, with the light, with the fields you have certain strength which goes.

(2:16) This is what I said in the past that needs to be understood in totality, the creation, the size of our Universe, is dictated by the fields, which come from the center to the boundary of the Universe, in what we call C14, which converts in the structure of balance of the point, that it diverges and converts back in. And, if you understand this, that all the fields of the Central Universe, continuously maintain this field force, to keep the shape and the boundary of the Universe, then you understand the Love of God, the fields of the Creator, passes through all of us. Because these fields have to go through you, me, my Soul, my physicality, to be able to reach to the boundary, to create that boundary. It doesn't zigzag around me. So, at any point I receive the beauty of the Creator within me. As much as I receive food, I receive energy from the Sun, that central field force of the galaxy, and that field-Force of the Creation, and the Creator, it is within me, it passes me. So, I'm never left alone. This, if this is a central line of the Universe, and the field from this goes to a position that continuously keeps the shape of the Universe, does not matter where I branch from

another line from there, that lead to a galaxy, Earth, and then me, this field still comes, because it has to confirm the dimension and the position. So, I receive the Love of the Creator at any point, at any time, I'm not left alone.

(2:18) Because, if it was not there, then it would have been a hole in the Unicose, in the Universe. You understand? So this is what is the position of the... we always say, you know, "We are alone." We are never alone, because as long as this planet exists, as long as this Universe exists, the fields from the center have to dictate to dimension of creation, and at this point, when the field goes of the Universe is... the Unicose is there, then it flows like in back, as I said, like the fountain, which then itself creates new dimension of life. In the future I will teach you how to understand where the fields are coming from. Are they from the reflection or are they from the center? And which one you can use to reach to the center, to the Creator? So, when we're alive, we are always... without that field coming from the center, the Universe cannot exist. And if we have the Universe which we see daily, every day, it has to have a field which is balances with the center, and just doesn't happen. It has to be a reaction and interaction with the environment. And in that position we always, does not matter where we are, receive the Love of the Creator, the energies of the Creator. This is what I call, the Hydrogen (H). And then, you have all these reflections, which is C14, And then you have the reflection from the surface which

creates the C60. And we are never left alone, because we always receive as part of the spectrum.

(2:20) This is what we always say, we eat 20%, 80% comes from the environment, and part of that 80% is the energy from the Creator, because it has to go through us, to confirm the existence of the Universe. So, we are always receiving from the Source. And if in understanding of our knowledge, we reach the point of the maturity, we can get back on this track as it goes back, and find our way to our Creator. And then when you come, we become part of the total Creation. I hope this answer your question. Q: ... Was the lift and motion achieved in earlier times in Persia by the so-called old magic of flying carpets, similar to what was developed in Iran by Mr. Keshe and his team. Was that real or just myths and legends? K- I don't know, go and ask the people who flew it. R: You haven't been on one recently? K- No, I haven't been on the Persian carpet for a long, long time. R: You probably had the rug pulled from under you a few times,

(2:22) and taken a trip that way, but... K- Not really. I haven't been on the Persian carpet for quite some time. But the knowledge... you got to understand, when we look at the flying system in Iran, I returned from Iran on, I think, about 6th of October 2008. We achieved flight in September. September, October. It was... day of the flight was on 28th of Sha'ban. On that day, around about 5 o'clock in the afternoon in Sharif Tehran University. The dimension of the fields which we created on the matter state, in the reactor

which you've seen, now it's done in much simpler way. As I said, that reactor is a matter state, and this new technology is the energy state, which is a totally different. And in that technology we needed nuclear sources, and in this new technology we create radiation as we feel, as we need. Which means our knowledge has gone from being user to creator and that changes the game. And this is the beauty of the new technology. If we see, if we get an agreement from the 'green light' from Ayatollah Khomeini of Iran today, I'm sure the course of humanity will change very rapidly,

(2:24) by dispersing the knowledge through Iranian education system, through Iranian television channels, through Iranian announcing worldwide what is being achieved, what has been hidden by the governments, for what reason. And now we wait, to see a decision which way will go. Any other question? Q: ... Hello Mr. Keshe, a Knowledge Seeker in China community wants to ask, you said that the human heart is a magnetic field generator, how does the magnetic field of the heart, how is it created? If someone uses an artificial heart, what will happen to his Soul of the Physicality (STP)? K- Not much, it operates on the physical condition and what condition it is created by it. You got to understand, you have the physical structure of the Copper, which is part of the Amino Acid connected, that it makes what you call, the physical structure, and then you have a fast flow of the fields, which is the Iron which is passing through

charged. This is where the STP, the energy of the environment comes, then the matter state. That's where the charges of the, what we call, electric charges in the body comes from. The heart does not just create a heartbeat. It creates a continuous electric current. By... it's like a dam, if you look at it.

(2:26) The waterfall comes, the pressure of the water, which is the blood, comes, is dynamic, full of both Copper and Iron, which is part of your blood. And then it hits, or gets trapped in a vortex, which releases that energy by interaction, creating current in the heart, which sets that heart, that current for the rest of the body. Our heart is not just a pump, is a generator of fields, the way we generate electricity in a dam. And that energy is not connected by electric current wires, but as a pulse of the field energy like a Soul, spreads around to feed, the, what we call, the physical dimension needs. This is how it works and our world of science has no clue about this. We just look at the heart, and we say, "It does the pumping." The energy, the blood comes, and in a way of

coming in, already absorbing energy, especially from the environment, through the wall of the lung, in hitting the physical structure of the heart. It's a generator, it converts the energy of one form to another, to a plasmatic energy, which is, energy has no need for dimension of wire connection. It spreads across the body, and this is how our body receives its charges. The heart is a combination of the pumping, which is interaction with its own material, leads to release of

the energy. This is what we do in a way, if you hold that physical dome, which you've seen in your... most of physical labs, and you see the light moving when you touch it, this is how it works.

(2:28) We always consider the heart as a pump, but the heart is an energy ?? generator converter. This is why the energy of the lung comes in to, with the blood, hits a wall, hits in a way, hitting it, it releases its energy and that energy becomes what we call, the STM, STP of the man, because it's is the energy center. And then if you understand this, then you understand the whole operation of how things work in the body of the man. Don't look at the heart. And just don't look, oh, it brings in, and the blood oxygenated goes to the every cell. Man looks at physical. But we don't have electro-mechanic, what we call, people to understand. If you have this energy, you just tested yourself. You bring a pump, you bring a water into a wall. What happens? Make a hole in it. If you put the blades on it, it rotates it. If you put a energy converter on it, it shows you electric current or energy. So where does this go? It comes in. It has to go. Even when it goes through the chamber from one part of the heart to another, that chamber behaves and reacts like an energy converter. It has a function. So, then you have two chambers of the body. And then you have the lower, which is coming back, consumed, one is the higher, which is coming in just being fed energized. And then the interaction of these two is violent, so very violent, because that's why you have a heartbeat.

All these come together. And look at the heart as a energy generator in a plasma condition, which means the physicality of the man.

(2:30) And then you see why the STP we say usually sits within the heart, but in a way it has a second sense because that's the physical dimension and then you have the STM. Then you see two ?? pumps , two energy centers working together. And then we call one, the STP, and one, we call it the Soul, and one we call the Spirit. The Spirit of man sits within the heart of the operation, most of it there, because other parts of the body have the same kind of functions like in liver and kidney, and the rest of it, but in different strength. And collective interaction of the organs and parts of body creates the STP. But in essence, majority of it sits within the heart. Any other question? Q: ... Thank you Mr. Keshe for revealing a new horizon for humanity. Is there an opportunity to advance Plasma Technology, now with the BRICS nations that are together in Russia this week? K- This is a "brick in the wall" as I call it. You got to understand, it was interesting to listen to part of this conference of the BRICS in the past couple of days. But this is all part of the same on the matter state. On a physical state it's different. I was looking at this... you got to understand exactly 2019, five years ago this month we had a conference in Brazil.

(2:32) We didn't know at that time, that BRICS were having a conference in Brazil at that time, and then you know the rest of it, that we were asked to stay and

we stayed in the same hotel, Brazilian team can tell you, they are here. And we stayed and I wanted to move the hotel, and I was told by the permission of the Chinese and the Russians, the Keshe Foundation is only outside, structure was allowed to stay in the hotel where we were because the Indian Prime Minister and the Indian delegation was in there. We, the day we were supposed to leave, we had all our suitcases downstairs and then, we were told to go back, we stayed because the, what you call, the world leaders decided the Keshe Foundation can be a part of. And some of you met were with us when we met with the world leaders, ministers and some hidden communication and meetings we had with them. We understand this structure. But BRICS to become an opposition, or balance with the West will all be there. It's very healthy. It's one of the most healthiest thing to have. Not the combination, but two balanced chambers. Dollars and the BRICS on the other side. Where, for not to go to the extreme of dollars, has done for past decades. It brings a good structure into what we call, the healthy economy. And this was needed. Euro tried to become, but because the Euro is very British-American, what you call it, based originally and then brought to on its own,

(2:34) they had the control ... over the Europe. The way British set up the Germans and the French to create an opposition or a balance with dollar, (but) it did not work, because the British were in it and they were controlling it. And they set it up, they were

initiators but outside they were controlling it. Now with the BRICS, there is no such a thing, at the moment at least. So it will be a healthy composition of the maybe three economical forces. Europeans are too weak, Euro is too weak to stand BRICS or the Dollar. But it will bring a healthy balanced situation. But if the split of BRICS, it will be kept for what we call, betterment of world economy, yes. It's a good thing. And it has a Soul, it has a Spirit in it. I heard the, the, what you call it, the talk of the Iranian President, for the first time in BRICS, because now he's a member inside. And I listened to President Xi in the side meetings. We are watching the side meetings. It's more important than the Conference meeting. What is said, when is said, how and who's meeting who. There is a certain amount of division, for benefit of some, but in Totality, is good for the health of economy, world economy. We needed it. Europe could not do it, because British, they had their hands in it. And the BRICS is a healthy, what we call, balanced field. And with it, it'll bring a lot of goods.

(2:36) And it's part of the work of the Soul, which it carries through that. You've got to understand the work has physical side and energy side. And we look at the energy side of it, what it creates, and it's all good. It's very good. Q: ... My question, Mr. Keshe, is going back to the information you just shared with us about the heart, which literally manifested this thought in my head. When the central energy of man expands, encapsulating the totality of the physicality, does the

heartbeat of the man then have the opportunity to synchronize with the heartbeat of the planet, or the heartbeat of the solar system, the galaxy, or the Universe? Thank you. K- Can you repeat that? Q: When the Central Energy, the STM, expands, and as you've put it in the past, the jacket is flipped, and it is then the central energy, the STM, that is protecting the totality of physicality within the magnetosphere it creates. When that dimension manifests, does the heartbeat of the man, whether it be plasmatic level or physicality level, does that heartbeat ever synchronize with the heartbeat of the planet,

(2:38) the heartbeat of the Solar system, the galaxy or the Universe? K- I don't understand your question. Q: ... I know from having experiences in the past, that the... Basically, in the past, the Spaceship that I interacted with, it had a heartbeat. I now look at it as it being a heartbeat, that was coming off of it. And all life, in whatever dimension it manifested in. K- Let me explain... to you ... Q: It has a heartbeat. K- Let me explain to you something which must be understood. Does not matter in the physical dimension or energy dimension. Motion only comes by differential in field strength, or by position. And for that reason, every structure on its interaction of the fields, needs and creates a condition of differential positioning. We call it the heartbeat of the man, we call it the heartbeat of the Earth, we call it the heartbeat of the Solar System, the galaxy and the Universe. They all have a heartbeat because it's due to interaction of the fields,

differential position. It's very much potential difference energy. And, this heartbeat is resonance across the, (2:40) what we call, World of Creation. The heartbeat of the STM is synchronized with the heartbeat of the Magnetic field of the central position of the Universe. We have not understood, the same as our heartbeat is conditioned to matter state of this planet. And how much we have, how much we absorb, and what heartbeat, what rate we take from it, and what material we take from it, and what heartbeat we create. When you run, you take a lot of material from this planet surface. So, you have to use it, so when it goes in the lung, it creates a faster heartbeat. And then is the same with the Universe. Depends about the speed, the STM is in dimension of motion, and what it creates in between it, and what physical heartbeat it creates. There's a heartbeat between the STM and the Soul of the Universe, and there is a heartbeat between the STM and the Galaxy, and the same as with the Earth. Because they are two fields, they have to interact, and somewhere for them to interact, has to be a balance, has to be positioning. Q: When humanity interacts with Universal Family of any kind, that differentiation in heartbeat, that's a synchronization there, yeah? Where it may not be consistent, but once the interaction between the two Totality of Souls begins, there is a, some sort of synchronization of the Universal heartbeat... K- You see some people have a... Some people have their

heart missing every few heartbeat. What happen to them?

(2:42) Why do we have irregular heartbeats? And what does that do to the emotion, as it's connected to the STP and the physicality of the man? It's... you cannot look at it in one dimension. When you look at these things, you have to look at the whole structure. What comes from outside, what's the effect inside? And what does it mean? Not just to fit our understanding, but really what it means. Each cell has a heartbeat, but collectively it connects to the heartbeat of the STP, because when it connects to the heartbeat of the, what you call, the heart, and then it has at the same time connection with the STM. And the combination of the three is a balance of the life of the cell in the body of the man. And if you understand this, you understand why cells live so long and they have a life span. You heard about the race between the hare and the turtle. The turtle sits in the bone structure and the hare is the fields of the skin of the man. Q: That's a really interesting way you've put that. I think .. K- it's what it is. Any other questions?

(2:44) Q: ... Humanity is in a hypnosis state from watching TV and needs to hear and see the TV to tell them what to do in their daily life. TV spreads fear and lies for the illusion of control. People seem weary to believe beyond TV. If we as a group hold positive intent for humanity to see beyond the TV programming? How powerfully can we affect the collective field to create this reality? In what time

frame? In other words, if we do not have Keshe Foundation tools to use, what is your view on holding intent for change? K- There is a few things when you speak about TV. The young generation hardly ever watches television anymore. Those who stick to watching TV, or whatever usually are over 45-50. the young generation does not bound itself to one position and place, it's dynamic. And it's connected to all these what we call mobile phones, and Apps, and the rest. And it depends if you consider a TV as a source for you to be there to understand. The last time I ever sat down watching TV is years and years ago. Don't have time for it.

(2:46) I sometimes make time to watch a movie or a, what you call, a documentary. I can do it, same on the mobile phone. Then, timing myself to specific time on TV as somebody else has arranged it. That part is more or less television structure with a young generation of people who are dynamic like us. It doesn't exist. I cannot remember when I sat to actually watching a TV television program. I did, I tried actually in Manchester to see what it is and after about 5 minutes I got bored because they were the same people I left in ?? England 24 years ago, but they're older faces, no new faces. I thought that's boring. But in general, what is controlled in the framework, has gone out of control with the Internet and the new medias. And the only thing is left, if you don't have access to those, just hope that mankind reaches that point. The only thing is left for man is the

hope. It's a lot of people who don't even watch TV to be in control of, or be controlled by. Any other question? Q: ...

(2:48) Question is, how is the neutron created? K- Very simple. It's the field of environment. When they gather in a strength to certain size, they manifest themselves according to gravitational field positioning of the central line of the Universe. A neutron can be created in the middle of nowhere, in the space when there is no matter state. It does not need a physical position of atmosphere, but atmospheric conditions create that condition of environment and the Universe which gives the size of the neutron energy. You have to look at a neutron as an energy pack, which with the interaction of the environment manifests itself as a package. And it's mainly, it's what we call, in a plasma state, has no physical dimension. If we all looked at the, what we call, the old system, looking at an atom, we assumed that there's a proton and electron, and neutron. We only could see the confirmation of the electron because of its fast movement and what we call, MaGrav positioning and then interaction of these fields with its environment, the light buzzing everywhere. So it's the environment, but the size and energy of it dictated by central light. It's as I showed you the light of the Creator, the love of the Creator ?? cause everything, so in that going it dictates everything on its way to create the C14 effect.

(2:50) And then in interaction with its environment of itself as a C16 gives its physical manifestation. Shall

we call it a day? R: Sure that sounds good Mr. Keshe, thank you very much. K- Thank you very much. Please... I hope... Join us in the three sessions of November, December and January. And that we can expand our technology and knowledge for our scientists. That we open a new horizon for mankind. And at the same time... I hope... And I have... I hope... ?? you Souls and people, listen, that we get a positive result from the Iranian leadership today. That we can take the path of peace. Thank you very much. And see you next time. R: Thank you very much for your hard work in the background there Mr. Keshe. I know you're at it day and night, and it is making a difference, that's for sure, and there's lots of Knowledge Seekers, and lots of good energy, from that whole field, that's rooting for you at the same time, so, good luck with it all. K- Thank you very much and there is something I forgot to mention. The Keshe Foundation, we call it, just sent me the notice about the soaps, and they're launching a new patch for children for, what we call, soaps for juniors. If you are interested so I can tell the,

(2:52) what you call it, Keshe Foundation team, I've done my job, I announced this. You are in the... what is coming in. Thank you very much, and see you next week.
