Part 1

(:15) K- Yes, thank you very much. Good morning, good day to you. As usual, whenever and whenever you listen to this series of Knowledge Seekers program from Keshe Foundation Spaceship Institute. We welcome you back as usual and we try to add to the knowledge. Very interesting, as I said, I don't know how he does it, but usually he picks something up, even like this, teaching of some 10 years ago, which connects to the teaching of today, how it happens, I haven't found out yet, but somehow Souls link things up. Today's teaching is about plasma connection. How plasmas connect? And how we connect our lives to the past, to the future? And how what we taught in past few weeks, gets an additional extension of understanding.

(:16) What does this mean? We spoke for the first time about Carbon 13 (C13). We have been speaking in the world of science has been thinking about Carbon 14 (C14) and they call it the Carbon dating that it shows what time where the dinosaurs lived, and how many years ago, and the rest of it. And even our Carbon dating is 'Carbonated,' because there is a logic, and there is a system, there is an operation in the life of the Universe (U). How the fields communicate? We communicate in the world of the man in the matter state as voice. We communicate as colors, which is again matter-state. We dream and communicate in C13, which is line of communication.

C14 is the line of transportation. But there has to be a deeper understand it. If we said there is no more teachers, so we have to learn about everything before the teacher is gone and we understand comprehensively the process of the Creation, that no one can cheat us in the Space. We don't get more magicians and people interpreting because you understand, you do. Rick, can I have a white board? What it is and how we have explained in past few sessions, we're going to extend on this knowledge the same as what we did with the children. Now you are those children and you are in that position.

(:18) Ten years later what we saw as explaining how magnetic (M) fields connect and you don't need to go there, ?? times zero. Many of you now use it, now you have access to Cosmic Ray Bundles, you have UBESUS lines and you've seen it in operation. You come to us with the headphone, you just connect us physically to your brain and we take over through Cosmic Rays (CR), through world of plasma, we connect, we get you to dream, you call it, but we take a dimension (D) of energies of your brain to different dimensions. So ten years ago talk, now it's a reality with us. This is what I said to, even, Musk recent announcement that now his satellites are in operation. I thought, oh boy. When we sat with the Chinese generals some times ago, we put the system on the table, we said, "You can talk to other general, you can talk to the president, nobody will know because you need no satellites." So we are even maybe 50 years

ahead of the latest which is now supposed to be communication between everybody and cost millions. But we build a system, in fact you have a system, it's called your brain, it's called your Soul, you can do that. Because once you understand the reality of not cheating yourself. It was coincidence. I was going to go there and coincidentally I thought I've done ?? and then the accident happened. I thought I go and my mom would be there and she was there. It's no coincidence because you have that line of communication which they have made you think is coincidental, but in fact it's a part of reality. And we go back to the history, the king had a dream the guy is going to come and he was going to lose kingdom and then he became Moses.

(:20) He killed everything else. Because the Souls knew the understanding of the time. But go back to the teaching of last week and the week before, we explained in a very simple language if that you all understand that we as people have the capability of extending our knowledge to a different level. What does this mean? Go back to the teaching. We have what we call, Hydrogen (H). We have a Hydrogen as a plasma, we have a Hydrogen as a matter on Earth. How does this plasma converts through steps into matter? Hydrogen, in the Space, Hydrogen above us is a plasma state, has no physical dimension. Something happens to it, which we call, in a way in this process, gravity, or Inertia of the matter according to the point. So Inertia takes place and now a plasma

changes to two plasmas, which is a strength of the observation and the strength of the existence in tangible level. So the Inertia of the space and time changes a plasma to a matter state. This is how we said, it's in the promises (in the holy) Books. When we speak to the world leaders I keep on telling them, this technology, this science fulfills all the promises of past,

(:22) because now we understand how energy is transferred to matter and how matter is transferred back to energy. One on the magnetical line and one on gravitational (G). Gravitational time, place and space, what we call, in the space of time, Inertia, at the time, place and position. But, what happen, when this little boy decides goes rogue and this plasma of Hydrogen goes the other way, interacts, interacts, interacts by the field of itself and in that dimension and position it creates what we call, a Universe. In one level, now, this becomes what we call, the space of itself, C60. And direction of communication of itself to make it C14. But there is another pattern to this because what we said, go back to what we call, understanding of the back of the Book of number three. How, where does this what we called plasma of time comes to exist that, in his direction and in his position we become aware of another cycle of life. What does this mean? This means that we have become educated.

(:24) << Mr. Keshe has problems with the whiteboard.
>> K- ... But we understood that in the cycle of

change, in this position, we have no extension. Which means a plasma without Inertia, but plasmatic Inertia, which is different than the matter Inertia leads to dimension of the size of, and creation of, what we call, Universe. Which we know, which we have, which we consider to be part of our work. Here, originally, where the Hydrogen went through the Inertia into matter state, we saw it as an electron, and a proton, became matter state. So there had to be an Inertia above our Universe to lead to the creation of our Universe. So we have to find out the Inertia, the plasmatic magnetic field of the Unicose, that our Universe,

(:26) the same as the matter state was created out of its interaction, with the interaction of itself leads to creation of what we call, this matter, or what we call, the Unicose. So C14 belongs to dimension of our Universe, which is this guy. But the interaction of our Universe, magnetic fields with the original Hydrogen fields, leads to creation of a bigger strength. What we know, what we call in the dimension of the life of this planet, as what we call, C16. C16 has never been spoken about because we never understood it. And again as we said in C14 to Carbon 12 (C12), we have C13 which is a communication line. Then on C15 we see the communication line of the Unicose. So when man become knowledgeable about C14, then to travel the span of the Unicose, we need to go an interaction of the fields of the Universes, which leads to creation of C16, which itself creates what we call, additional to C60 plus and the rest, which I, few months ago, I

spoke about this other than going higher than C60. So now we understand the level of stepping down.

(:28) From ?? C16 (C60) we talk as a plasma not as electron and protons and neutrons. Electron and proton neutrons is in this bottom level. Nothing to do with the World of Creation of the existence and confirmation of the time and the space. So we are able when we extend to say we saw something it was a strange animal blah, blah, something I saw. Then it comes now, was it connection between your Soul of the Physicality (STP) and physicality (P) you saw a physical image. Then we spoke about the travel of the Soul of the Man (STM) in a dimension of the Universe, which is again on C14 and the communication because of C13. Then you have to ask yourself how much of my dreams, because I'm part of this original Hydrogen connection, is with the Unicose civilization. And as your inner sanctum energy levels what we call, the STM is made of Carbon and Hydrogen, then we see we always have access to the knowledge of the Unicose. Most probably all of us in one stage during our life have traveled to this (Unicose) dimension. But as we are ignorant to the knowledge, we just had a dream. Now as the science develops, as the technology develops, we can create dimension of field of strength in these levels of Hydrogen,

(:30) in interaction of the structure that the Inertia of the Unicose leads to the creation of the Universe. We had the Inertia of the planet, of the galaxy, of the Universe bringing C14 to C12. Now we understand

there is a bigger structure when we talk about the Unicose, what it is. Now we understand the tangibility of it. And this is why in all the teachings for years I said, if they tell us that this Universe is traveling at 1 million kilometers an hour, and it's expanding, it has to expand in something, it cannot be in a vacuum. And now we understand how this creation of the creator of the fields of the structure of the Universe leads to creation of even matter states in our Universe, through the conversion of the Inertia of the Unicose. The way the Inertia of the Universe, led to the creation of what we call, C12 tangibility, field strength. Now we understand better view of the World of Creation. And if you look at the bottom line, in this line here, then you see you to have as much connection to the Creator as the Original Plasma, as the Universes and the Unicoses, which He created. As Rick just showed us, those two plasmas, next to each other on the table, was explained the childish way, 10 years ago. Now you are more educated, we can speak deeper, even though you are still children of the Knowledge of the Universe.

(:32) You understand a little bit more. Within the systems which we have developed, we already unknowing to our Knowledge Seekers (KS), work in a dimension of C16. We have to understand, there is a huge difference between C16 and Oxygen 16. But in the plasmatic condition of the transformation of the Space, then it raises a question how come man, how come this planet works on the field strength of 16 in

the gaseous plasma state? Now we understand the connection. Where I always said, magnetic gravitational (MG) field of the gaseous condition is 16 because plasma is a gaseous, it's the free energy of the Universe, so the Universe works on the same basis. Now you can see how we are connected to the Universe and the Unicose without us knowing. Now we have the knowledge we understand. Then when we go for transmutation, you go for confirmation and you don't see your physicality but you are present, you understand why. Because you have not managed to interact with the Inertia of the environment. You could be in the Unicose, as you don't interact. There is no Inertia level for you to convert, because you haven't understood the process of conversion is in your hand. You cannot manifest yourself in the Unicose. This is why when you came to the, what we call, Linz, I used to tell you, can you go to the Moon. And you all went, but your Moon is not the Moon we talk about, as we know.

(:34) As the second astronaut supposedly land on the Moon, in many lectures has said, "We never went to the Moon, it was all made up." So, we have to take it with a pinch of salt, what this guy is talking about. As you all know, he denies ever being there and even tells us pictures that you can see the cameraman taking pictures. So mechanically we have managed some machines, physically we haven't managed to transport man to the Moon, man to the Mars, because we have not understood the cycle of conversion. It's

very strange, how man will survive in the Space. Would we go and do the communication line of the physicality on the jetliner, or a rocket? Or do we go through the position transformation of the creation the way the Creator has done? He sends his fields, interacts with everything else, creates his own Universes, creates his own galaxies, creates his own stars, creates his own planets, creates its own creatures, by just stepping down by Inertia. Which Inertia in a way, if you talk about it, is the interaction between the matter state and the energy state. Which the scientists of the man have not even understood that part. They just call it Inertia, but how is it created? It's very simple when you talk about the salt. The salt is an Inertial system, it's connection between a metal which is a deeper than a non-metal. Sodium chloride (NaCl), the salt you eat every day, metal, chloride, and non-metal.

(:36) Connection of it creates the salt, gravity. The same goes for the Inertia of the Universe, we have to find the salt of the Universe, we have to find... << Italian translator interrupts Mr. Keshe talk by mistake.>> K- ... Or we have to find the Italians which jump in everywhere. They are different race, God knows where they came from. But they're always nice to have. In this process we have to come, we have to understand where the Inertia comes, what Inertia means, what does Inertia means from the Soul of the Creator (STC) which connects to us as a Soul of us, and how through the connection of the fields of the

transportation through C14 and C16 takes us to the position which is the connection still to the Soul of the Creator. Now we see a purpose for life, we see a purpose in existence of the man and we see a purpose how we are part of and is part of us as a creator. In a way you are the builder and you are the residents of the same building, as you build yourself. Where the building is built by the interaction of fields of the creator in a dimension of the higher strength, and you are the residence through the interaction of the lower level. Then the science of Creation now makes sense for the first time. The question comes, which is we answered in later time when you are educated more maybe in another 10 years when we get to 1400-500, most probably if Rick and me are still here, then we speak about our Unicose being part of the bigger structure.

(:38) Then that topic brings back a new dimension of knowledge. Then we understand the process of the creation and how through what we call, Inertia to matter state as the plasmas of the higher level by interaction of the fields of the Earth, and the sun, and the moon in interaction with the Inertia of the planet Earth converts into the matter gold, silver everything else. This is why we increase volume. The same position is, this is why our Universe is expanding. This is why our Unicose, in a dimension of Magnetical fields of the Creator, is expanding into. Because if there's a Unicose, it has to have a size, it has to have a containment, it has to have something which

confirms its existence. In a way, the man is a cell of, let's say, the kidney, and then this Universe of us is a section of the kidney, and then a kidney is inside a body of something. So, we call it a Unicose, that kidney. What is, which is the holder of that kidney. What is in Micro, is in Macro. Then if you understand this process of conversion, if you understand this process of deliverance of the fields of the Creator, one is direct and one is non-direct in the interaction of the fields of.

(:40) Then you understand when I tell you, and we've been teaching, that if you understood this line of connection from the Creator, by the Hydrogen to the Hydrogen as a matter, then the Creator becomes the Fundamental Plasma. Which from its interaction with other fields in its creation, as we see, we call it a Nuclear Decay, splitting Fundamental Plasma into electron and proton, leads to creation of Universes of its own order, and releases energy which feeds the others. Then you understand how beautiful is when you are a Nuclear Physicist, when you understand the intricacy of the creation through looking at an atom. Through an atom you find the Creator. You don't become, not believing, but you become the true believer in understanding what you believe in. And this is the secret of the Creation. There is no anomaly in it, there is no misunderstanding. Because we do not become without believing in Creator, or God you call it, but we understand the process of the Creation, that then we believe more in what it is the reality, than

what is the fallacy. And this is where once you as Knowledge Seekers understand this, becomes the end of false belief. All the lies we've been indoctrinated with.

(:42) Because now you understand the process. You understand conversion of the fields of the Universe, the Creator in a direct line as a Fundamental Plasma becomes me. And in interaction of the fields of it with itself creates the dimension of the size of the Universe on the C14 and the interaction of the plasma of the C14 again on a higher strength with the field of the Creator becomes ?? C60. But in a way of the dimension it gives you the dimension of communication. So you make it and you communicate with it to confirm the existence of it. Isn't this what we do? We get created, we have no communication, we learn a language, then we communicate, we confirm our existence and then we transfer our knowledge to another through the line of communication. At the end this is the way the Creator communicates His knowledge to us. But man being ignorant has denied everything. And the richest people have paid to the game that you play the fool, we play the master. When you understand this, they don't tell us that God doesn't exist because you become this and that. God exists but we understand the beauty of His existence through the science, through knowledge and not through fallacy. Now with this simple picture, simple explanation, now you understand why I keep on telling

you you're connected to the Creator. But, the Creator has made a place for manifestation of you,

(:44) which is through a process of the higher order to a lower order, which creates what we call Inertia, that leads to the creation manifestation of you. If you don't understand it, go back to the egg and the sperm, why one has got one something extra than the other, that the interaction leads to creation of the man, the child, the baby, the fetus. The lower comes from the Creator, the higher is the dimension of higher order physicality, the interaction of the two needs to create what we call cross point, common denomination, you call it Inertia, which in that process both can come to confirm the existence. Leads to creation of the manifestation of physicality, the child. So, is the creation of the man from the interaction of the physical dimensions of the plasmas of the Creator, and the dimension of the environment, he created himself, which we call, virgin birth life, and there is a virgin birth across the Universe. Because if you understand the process of interaction of the fields, then you understand the totality of the process of Creation. I bake the cake, but I put the ingredients in, how that cake will be, how will it taste. I made the frame (form), how that cake will look. Heart shape, square, rectangle, circle, but it's the same dough. It's me who decides in which pot to put it in. One becomes Earth, the other pot becomes Mars,

(:46) the other pot becomes another Galaxy, and the Universe. Now, maybe for the

first time you understand the ambiguity, and which is being created around creation because nobody ever understood. Now you understand. Now, from now on you'll decide when you manifest, when you transmute, what Inertia I need. Because that Inertia is dictated by the emotion of the man. My Soul wants to be, my energy pack wants to be in New York, but I'm scared to leave my house. I talk big I want to go, but really I don't want to, because going to New York I need to create dimension extension of the energy Inertia of the New York and I'm manifested there. This is why most of you cannot manifest physically. It's a lack of trust, because you have not understood the process of the Creation. Now you understand. The old song says, "Wherever I put my head, it's my home."

Wherever the fields of the Creator goes, makes his own home. It does not matter in the body of the man, in the galaxy, in the Universe, in the Unicose. You have to decide where the home is, and you create the environment of the house to home. When you travel with your body into another position, what you call, a dream, you're a house traveler. When you manifest yourself, you're in a home.

(:48) And home is where the love is, not in the house. Needs interaction with the lover, with the Creator to confirm his existence. This is what we call, Mitra. Confirmation of the Love of the Creator for itself. Now, why I brought these teachings up in past few weeks? Because many of your Knowledge Seekers have stopped transmuting through the Soul, but you don't

know how to manifest yourself. Now you understand why, and now you understand why we teach you about emotion. Emotion is that Inertia. Emotion of trust in the Creator and not yourself, and you will manifest. Detachment from attachment to this planet, this physical life, brings you the emotion which is the Inertia needed for manifestation. I remember talking about this in depth a few years ago when Jon Bliven was sitting in front of me. I explained to him, Jon, why you cannot do. Because of the situation you put yourself in, and that will not happen because of it. He said, I understand and this is the biggest burden on me. Attachment to the emotion does not allow us to go through the transmutation. In a way become detached to be attached to the trust of the Creator.

(:50) If you understand today's teaching, I opened another door in the Science of Creation. I opened this door deliberately because many of you are in the process of transmutation, but you cannot manifest in dimension, because you have not understood the emotion of trust in the Creator, and not in the created, which is you. Then, you understand next time you transmute, when you manifest your... Are you really on the Moon of the man? Or on the Moon of another galaxy? On the Moon of another Universe? And God knows where. But you still survive. You still interact. And, if you create the dimension of the energy of the Creator, and the energy of the communication or transportation line of the Creator, you'll achieve producing what you call UFO. Which in fact, your body

itself is a UFO as itself. But, as an Inertia attachment to this planet. Then, if you change that Inertia attachment, which is the emotion of the creation, to another strength, the Unicose is your oyster. Then you understand the process of Creation. Which is me as a ray of the light of the Creator.

(:52) Because it hasn't finished in me on that Hydrogen, but still in plasma, so I can carry on with. Leads to manifestation of the Love of the Creator. Leads to manifestation of the emotion of the love of the Creation. And then you understand the love of Mitra. Which in fact is the emotion of the Creator which led to the creation of itself in the dimension of the physicality and manifestation of the man, or any creature in the Universe. As man is not the only living things in the Universe with intelligence and with the order of reproduction. Now you understand more about yourself and about the process of Creation, and not what they tell us, this guy is Godless, he doesn't believe in God, we believe in God, but we understand what God is, and what leads to the creation of to confirm His existence. Atheism doesn't come out of not believing in God. Atheism comes from understanding the process of the Creation that no Ether, no ethics can come in between the man and his Creator. Or you call it Ether, the rest of it. We go for a break and I think this teaching of today will need thousands of years for man to be understood. And as more man understand, the more we realize how beautiful the Creation is and how loving the Creator is.

(:54) That with all the beauty and His fields still sits and watches the man to grow, and the rest of His creation. We go for a break, and we come back. And hopefully we'll go somewhere new.

>> BREAK >> 568 KSW December 12, 2024

Part 2

(:58). K- No, no, that's okay, it was perfect. I'm getting used to it. R: I know we're going to have, as you mentioned too, we have a bit of a shorter, or at least we're limited in time today, so... K- We finish by around 11:30, we have to do. What is interesting, if you listen to the first part and then you listen to the, just the first commercial part, it should have brought you a lot of knowledge. We call water H₂O. And if you go in the dimension of the Universal Energy containment which is C16, which is Oxygen, and then you understand the Hydrogen is what you call in the plasma state matter state, the line of Creator. Then you can see how the water runs and how the Love of the Creator runs in His Unicose. In the dimension of physicality it takes tangibility of liquid. In the dimension of plasma is the river of Creator's Love for what is created. Then you understand how He rains on all of us,

(1:00) which is us part of Him, through the river of life, or energy on Earth, we call it water. Without it we can't exist, we are created out of it, and it's the same, the

World of Creation is created out of the same. And you see how correct the teaching of today is, when you understand it is Macro and Micro. Because you have tangibility of it and by coincidence the advertising of the water is there. And then you understand how you elevate yourself through the rivers of life to what we call, the water. Actually the World of Creation is in the liquid plasma of the Love of the Creator, the life of Creator on Earth we call it water, in its matter state and in the Unicose we call it Mitra. And then we understand more. There is no difference. It's just man is ignorant to it. And we open this knowledge today for you, you understand how true it is. It's addition to the knowledge of the man. You have to understand the Love of the Creator, to be able to travel the expand of His Unicose. And according to your understanding and intelligence, you take from this knowledge which is Knowledge of the Creation, is where you land. Thank you. There is a small announcement is that, the Keshe Foundation has entered a new science and technology as of actually today. And with collaboration with the Wellness Centers and the doctors who work with us, we have moved into what we call, ?? de-clustertion.

(1:02) What it is, it means when you have clusters, you can open up, you can tune into it to do. Does not matter what you call it, in the body of the man. And where it manifests. We have started trials in collaboration with the doctors and the Wellness Centers. The new process of ?? de-inertiazizing,

which means changing the Inertia to the position, changing the salinity to not Inertia, in a way going back from the matter state to energy. This has huge implication and application in Wellness. Where you have lumps, you have process of the things which is not supposed to be in the body, and they take a specific way to be created. And for the first time, the Wellness Centers of Keshe Foundation as of today, have started that process, plastic, which means within matter of short time, could some be minutes, some could be weeks, you can degenerate, you can reverse, the what called, the Inertia, the what we call, the calcification, or matter state conformation, within the body. Which means, let's say, if you have a bullet in your muscle, how if it's made of natural product of your own body, we can return it back to its energy. You give it any name you like.

(1:04) So, this is a process which as I said our systems have set to process as of today and we watch to how well we understand, and how well we can change and confirm the transition from matter to energy, and energy to matter within the body of a life. Could be a dog, it could be a cat, it could be a stone, it could be a tree. So those of you who've been waiting for this process to be, what we call, developed. Now it's developed, and it was setup today. And if you speak to the Wellness Centers, the doctors will take you through it, there's not much you need to do, we do things from our end. And it's for you to test and try, if you approach the Wellness Centers for these

conditions, go back to them, because it's a new opportunity as of today. And we shall see how things will take shape. If there are any questions we're trying to answer. And we shall see. Or are there any questions? Q: ... Are there any news on the delivery and production of the Electric Gas Power Unit? K- Yes, we are in the process of doing it. One of the units is going for testing as we speak and then we should be able to do.

(1:06) It's going to be tested by a government. It's not in the hand of the Keshe Foundation. Once it's tested and confirmed, then it'll be massproduced because we have to get these things confirmed by a government. You have to understand. When we launched the gas electric, it was to get this into the market. But you have to understand, anyone who has tampered, or tried to get into this game of energy has been killed, or been, things has happened to

them. I was talking to one of our Knowledge Seekers a few days ago. If you look at it, today, we are pushing for electric cars. And we have Tesla, which I said very soon, I already informed that Tesla we will offer \$2 for the Tesla company very soon. Very, very soon. Maybe sooner than you can think, because it has no value, because it's electric cars. If you look at it in 1940s, 1930s, there were 30% of the market, car market, was electric cars. And 40%, 60%, sorry, 50, 60% was petroleum cars. What happened? Today we are 5%. If we are lucky, electric cars. They are trying to sweeten us that it's a new invention but in fact, go back in the

history of the automotive, 30% of the cars people drove was electric. What happened? Morgan Stanley and the others decided there is more profit in oil, so we shut it down. Now the reason they are pushing the electric cars,

(1:08) is because there is more profit in oil, with electric cars. When you can burn the oil without spending more money to refine it to become a fuel in the tank of a car, you can burn it in the pure states of what we call, the Russian ships, which if you know Russians in some of the ships are still using what we call, tar or whatever else. You make more profit because now you change it to electric, you need more of it, you make bigger profit, and now Morgan Stanley and people like this have decided, we make more profit, let's call it electric. It's the same if you lived in England, a couple of decades ago, if you had a diesel car because there was advantages for the government, diesel was cheaper and then it reversed. Now they want to play another game, diesel is more expensive, it's the same fuel, the same cost, the same thing. So and then you go back to power production on the gas side. The gas was not so favorable. Now it's very favorable in a way of moving because Americans got the hands of the Russians from Europe, and then now they only can rely on the Americans to supply the gas, liquid gas so America can make profit, the sanctions are more heavy on the Russians, they close their things and most of you know if you're in the oil business, as of 20th of

December, in a few days time, no country, no bank can pay ??, or what we call, the Russian pipelines for gas.

(1:10) This pushes everybody to go to America and Qatar. But, I inform you a surprise. Very soon, this will not be a market anymore. And it's because of gas electric power generators with the Keshe Foundation is putting into the market. We had to join bigger boys that Keshe Foundation was provider of technology. And the big boys in petroleum play the games of marketing, and you will see now why we delayed it, because if you would have pushed it to deliver it, it would have been the demise of the Foundation and most probably my life, which they've tried a few times. But this time let the government, let the big institutions do the work. And very soon you will see your gas electric power. It produces energy, it produces gas, and set in a specific way it produces water too. It's not what we're going to develop, it's already developed. And it's been tested by the Chinese Gas Corporation in Beijing last year. And we delivered two units to confirm, the Chinese military have seen it. But the Chinese don't want to play the game because they use payment of the gas to certain nations as a means of controlling the nation. But in a month time with a cold due to come into Western Europe, Eastern Europe, in the next couple of weeks, the world, the European world will be scrambling around for gas.

(1:12) And I'm sure you will hear it from certain nations that they do not need to import any

technology. It will switch to the plasma technology. In a way we warned Americans, we warned Qatar government that say goodbye to your income. But we can't do it, Keshe Foundation cannot do it. But we got bigger brothers who can do the job. And you will see in the ?? big space very soon. In a very big way. And we'll see how it comes. And people who are in the, work with the Keshe Foundation, they know the units. We took the units, three of them, to the Chinese military and Chinese government. And then we realized why they are playing games. Because ?? their loss of the control over what they call political, economical situation. And now this is out of the hand of the, everyone else and it's in the hand of people who can actually do the job. And you will get your systems, and you might even get the refund for part of it because when it was mass produced, it won't be as much expensive as we built it, but it could be prototypes of first, earlier stages will be that expensive. So don't ask it when, it's already, we could have actually given you one, a few weeks ago, a few months ago. But once it comes out, it'll be the demise. It will be what they did with Tesla, what they did with the other guy who came up with the Hydrogen water cars. We are wise to it and the fool makes the same mistake ?? twice. Any other question?

(1:14) Q: ... What is your understanding of the UAP or drones situation going on around the world right now? As of this date, do you believe the situation is going to move us forward in 2025 from higher reality? K- There

is, if you are... if you sit on the news, on the edge of the news, past few hours, past days we heard from the American administration, people who work in it, the new administration coming in, that a large number of drones have been detected over the private residence of the American, New American, elected president, and in other places. And interesting when you listen to the guy who's supposed to be debriefed directly from the top when he goes on the press to it, he says that these are Iranian drones being carried by a Mother ship. And the interviewer asks, "These need to be refueled. How do they refuel it that they are over United States?" And then the guy says, "Iranians have got the technology in collaboration with the Chinese that they carry the mother ship." The link is somewhere on the Internet, watch it, it's very, very interesting. And one of our Knowledge Seekers, who we love a lot, says to me, they are planning to attack Iran again, aren't they? When I saw this when it came out, it was live, it was very interesting. One of our Knowledge Seekers picked it up as well. Is that these drones literally appear as lights. These drones appear as a Star Formation lights, and they disappear.

(1:16) And the guy is very interesting, listen to him, he comes from the Senate I think, he is one of the senators or somebody in one of the big committees. He says, "We have to destroy these drones, but we don't have the technology because we don't know what they are." And I thought, "Ch-chunk!" The guy inviting for attacking Iran for drones, but they don't

know what they are. How do you know they're Iranians? And then they say, "It's Chinese mother ship." This shows the lack of intelligence in the man. How can you attack to destroy, you want to attack Iran? If Iran has such advanced technology, which has come to the agreement with the Americans, with the mother ship to bring hundreds of them. Excuse me, why do you make F-35? And charge \$130 million for it, which cannot attack this? But the interesting thing, as I said, the interviewer asks. Where do they fuel them? Because they need drones, have a time of flight, span with fuel. We don't know, but we're going to find out. And these are Iranians. Get the drone, brought in, where the mother ship goes to Chinese. Now you can see the scene they are setting up for the next move. Because they got rid of Syria today. But actually, Syria becomes a bigger thorn in the back of them. Because in a way, if you understand the political Middle East, these guys who took over Syria are worse than the ones, Taliban's in Afghanistan. And they are not good news for Israel. Everybody was happy. The guy is gone but two days later, he sunk in.

(1:18) So let's destroy as much as we can. 350 missile rockets has been hit at Syria, while there is no army to defend it. But soon there will be people who will stand back up, because they find out, this lot are worse than the lot we got rid of. That guy was trying to support, he is keeping freedom in his way. These guys bury you in the ground and stone you to death. Watch what's going to happen in Syria, if it goes the way it's

going. And the Iranians are going to be bigger involved in Syria than before, and the Russians, because these people find out, they're going to hunt them down. The saddest part with this is that now, the Christians, who actually run the whole structure of terror, through Assad. Now they have become target for days for revenge and the Christians will see hundreds of thousands of them escaping from Syria in the coming days and weeks, refugees. They said the minute the news came the minute Assad left, that European community will refuse any more refugees from Syria because they can go back. And immediately, a few hours later, comes European Community, except the Christians, who come from Syria, because now it's changed. Religious, what we call, refugee will start. We'll see massive amount of Christian Syrians, ??, coming into Europe, because of it. Again, part of this is drones, how they're attacking, using drone technology, into Syria to do and the rest of it. It's a very interesting politic to watch. But it's interesting to watch how they are now connecting drones, coming from mother ship. This guy must have had a very good sweet dreams when he woke up.

(1:20) But on the other hand, Iran has been in possession of this technology, and we ?? shown it ??. And now, if the process goes that, you can carry hundreds of them, there's some, I think 15 or 20 of them over US, and they call them Iranian drones, launched from a mother ship. Is this mother ship a

spaceship? Or is this mother ship another ship somewhere in the world?

We'll watch and see. But drones... as I said with the new structure of the technology, drones with the emotion will not kill. And drones with the emotion, when you use the materials, which produce them, with emotion, which you will see, and you've seen in some of the tests we've done on Fridays, cannot harm. And they'll become part of the life of us, and in a way, some of you, have already moved in that direction, some of you, who became Satellites, without knowing, You are that drone, but in a sense that humanity doesn't understand. Drone with intellect, with emotion, is the future of the science, because that's how we have to go through it. But, drone technology today is as infancy. Once you start producing Chips with emotion, then you understand what this means, and how they operate. But, we always have some steps in between. Man is going through evolution of science and technology, but once detaches self from matter state of ?? technology of energy, and then goes step further of connection between the energy and matter state, it'll be an amazing life. Any other questions?

(1:22) Q: ... Mr. Keshe, this nightmare that is happening in Gaza, do you think that it will end soon? It is hard to see this brutal situation continue. K- We see the end of it, within the next 60 days, hopefully. There are huge moves to bring it to an end, but you have to understand, there is only one person who wants this war to go, nobody else. And it's amazing,

one man called Netanyahu, wants this war to go, that he stays out of prison. Leave it to the Americans, leave it to Hamas, leave it to the Iranian government, leave it to the Russians, or leave it to the God knows whatever, Netanyahu with the backing of United Kingdom, is the only person, who wants the war to go ahead, to keep himself out of prison. And, 60 days we have, because there are political moves, and you'll understand soon, why 60 days. We asked for release of a number of American hostages two or three months ago for part of the negotiation to be opened for us, for the Keshe Foundation for negotiation. And we might see that happening. But on the other hand, yes, there is an end to it. But we have to understand how far, and we have to understand there is no more, what you call, will in the United States to go with the war.

(1:24) You have to understand, we are not Americans, we don't support either side, but whenever Democrats come into power, there is war. Because Democrats come from the poorest side, most of them, and military expenditure makes them millionaires. Because it takes a lot of bribes, it takes a lot of things. ... Republicans, usually go the other way. We put a lot of options to Obama. Obama has killed more people than anybody else. He started more war than anybody else. And he's a darling of Democrats. You look Biden, Biden has done the same. Biden has hidden so much, that he could carry on with the production of the killing machines. But we hope now Democrats, both majority

in Senate and in the House will bring a position of peace. And we will see some skirmishes but this religious war in Israel and Gaza will finish. In 60 days is what we are hoping for and what is negotiations are going on. Because after 60 days we will take shape in those environments, that Trump will create, but Trump needs to solve. If you go back a few years ago, in the teaching, you will most probably find it.

(1:26) When we made announcement through American press made for us, that when we started peace talk, another series of peace talk between Iran and America, I said which senator on the Thursday afternoon, I think it was, which senator in the Senate can refuse 10, 15 and then millions of jobs? Which senator can refuse half a million jobs, which the peace with Iran will bring, oil and the rest of it. And two, three days later in the Senate we got the ratification and we got everything else moved. Trump has a very big problem. He wants to create peace. Now we see even Bill Gates, the biggest murderer, is somewhere there trying to butter it up. But, they have to understand, they need to look for a new technology, a new diversion from the war, as I said last time for millions of people who work in the defense industry. Otherwise there'll be a war inside the United States. And that option, a new technology, is the Keshe Foundation. We're working, we understand what it is, we are getting the Americans to understand. Some of you have seen how in "X" I input directly into what you call it to the Musk. And they're reading it, they understand

it because there are other things going. We haven't taken our position on X yet,

(1:28) but we are sowing the seed. Some of you have already joined as followers, you know what I'm talking about. But we haven't put any title, any topics up. The reason is you cannot offer peace when peace outside US creates a war inside US, because you can't sell guns, you can't sell ammunition, you created a peace outside so you have to do it inside. And the only way is to introduce a new attraction, a new technology which sciences can go into it and develop. And plasma technology is parallel to that, and we are working on it. I work nearly 20 hours a day around it in collaboration with some governments. And more or less this goes back what we can come to agreements internationally, because you have to understand ?? once the Americans withdrawal the Chinese are very aggressive to come in. Because they have spent billions on arms and they want to use it. Now, it's a "catch-22" and how the technology (T) will change. Our Knowledge Seekers of the Keshe Foundation, in the next few days, making a presentation in a military Space Defense on behalf of the Keshe Foundation, a presentation by invitation of the government. And we have to emphasize in this presentation that diplomacy of knowledge has to be next step.

(1:30) And to what extent we bring peace and then we see the reflection of it back on. Just sit down for two minutes and add up. The United States in the past 12 months has put over 25 billion dollars plus we reckon

its about 40-45 billion, just as a weapons missiles into Israel. In the past two years they have put nearly 200 billion into Ukraine, all military hardware. And a very interesting one .. It's an amazing interesting picture which I saw, which in a way, you know, the way I think, and the way I talk. If I find a picture, you'll be amazed. I was, I was amazed when I saw it, but it's very interesting to see a priest blessing guns. This is how shows deep the clergy are involved in killing. When a priest blesses with the holy water, guns that it kills people, I think it's in Ukraine. Then you understand where the problem sits and how our problems come to exist. That most of the wars are led, watered, by the religious people. And once we can overcome that, we have entered another dimension. And we are in that position in the process at the moment.

(1:32) And let us see if I find this picture somewhere on the Internet, it's amazing, a priest blessing guns to kill with. And God's sake's name, where does these people get their guts to do this. But it's interesting, extremely interesting. How things will take shape in next 60 days, if Trump doesn't change position and doesn't retract. And then you will see the change many of us have been waiting for. But then his administration needs total support, absolute support, to come up with a backup, what you call, system, that can support the process of peace, which can exist and last in Gaza and the rest of the world. I think Trump has chewed more than he can swallow with this when it comes. By closing the factories to make arms, then

weakens the position of the United States, unless he can come up with something bigger to create jobs, and internal problems will become part of it's work. R:

... (1:34) I put those three keywords into Google that you suggested, the "priest blessing guns", and so we have a choice. So you, were you referring to Catholic priest? K- Yes. R: Or the Russian Orthodox priest? K- All of them. R: Or Russian priests? Or the Saint Michael's Catholic Church? And so on and so forth. It's more or less choose your religion and you can have them blessing, a picture of them blessing God as you go. This is very strange, but you're, you're right. It seems to be at the root of ... I mean any, any one of these is, it's all about the blessing of the guns. K- Yeah, with the holy water. Who receives that bullet? It's somebody's father, it's somebody's son, is somebody's child? The interesting thing is in the latest communications from, what we're getting with Trump administration going into the war in Ukraine, as you, I don't know if you heard or not, there was a very high tempered shouting going on, in a meeting between Trump, the, the gypsy, and the French President this week in Paris. Trump in no shape or form missed anything to tell the guy exactly what he thinks. And as you heard the American press, how come the guy wears a suit when he goes to beg for money to European community and other places, but when he comes to see the American president he comes in a gypsy suit? Trying to play the beggar and weak and

he got his whack, and he's been given a ultimatum the first week Trump is in position, he can say goodbye.

(1:36) He's already applied for nine countries in Europe for asylum, the President of Ukraine. And the data coming from CIA shows hundreds of thousands, more than what Ukrainian up to now were confirming dead, have actually died. 30,000 Ukrainian soldiers have died only last week. 30,000! We talk about 45,000 people killed in Gaza in over a year. Last week alone, we've got the status statistics which confirm, more or less, to over 30,000 Ukrainian soldiers have disappeared. Son, or father, or somebody << audio very low>>. 30,000, ??. Multiply it, divide it by 3, let's say 10,000 over, what you call it, in the 2 and a half years, 150 weeks, let's say 130 weeks. .. 1.3 million ??? << audio very low>>. R: Mr. Keshe your audio is fading a bit there. I think maybe it is the microphone. K- ?? Somebody don't want us to tell you the truth. But this is... this is what it is. Gaza will finish what we see if... Netanyahu is begging for his life. He's trying to negotiate with Democrats, to stay in power when the Republicans come in. And we are, from the Iranian government point of view, we are washing our hands, it's nothing to do with us.

(1:38) We sit on the side of the peace, and we want peace for Palestinians, and the rest of humanity, disguised somehow. Fighting for his own life and trying to ?? sell everybody else. And it will not happen. We are fully aware of it and... The game is over for Netanyahu. He might get back the hostages, but the

stand for it that he has to step down. The hostages will not be given till he steps down. We saw that, very much with, if you remember the "peanut man." When the Iranian hostages were taken, the Iranian embassy were not given to him, till the next president came in, and the first few days when he came in, negotiation was completed, and the hostages were given as a gift back. And I think we'll see the same thing. One of the conditions that, will come down on the table, Netanyahu has to step down. Or, structure that, when it's done, he will, because he won't become glorified, with releasing the hostages. But we'll see. Once the hostage is released there is no ground for them to be in, and secondly Israeli forces have run out of ammunition and Israeli soldiers have given up fighting. Because they don't want to fight. We've seen some figures recently from securities, over 18,000 dead. That's huge. That's huge. Any other question?

(1:40) Q: ... Good morning, Mr. Keshe. Good morning, Rick. I have a question regarding this time communication. When we... in terms of going to the past and going to the future, the reason I'm asking this question, this comes from experiencing that you see glimpses, you're sitting someplace you see glimpses of the future and you're sitting in it and you're experiencing it. At the moment that you go through it, you don't know what is going on, but then those glimpses that you went through, it happens exactly a year, two years later. So what was happening, I mean it could be You're reading a postcard or you're sitting

and thinking about something and that something, you see a glimpse of that, and then a moment like seeing a picture, a movie, a piece of a movie of your life in the future. So what is happening, that communication. There's two questions I was, you see, that communication, how did it come about? Is it the interaction of the Soul with the physical Soul, that is trying to give a message? Or, another question is, is the future fixed? Because then the question comes, if the destiny, if our life has a plan written already, like a movie and we actually step into it every day, just following that movie and at the end it finishes.

(1:42) So it seems to me it's like this, so how does this timeline come to us, like that? What happens here? What's the mechanism? K- First of all, nice having you back from Iran, that's why we hear you, I hope you had a good time. Q: Thank you Mr. Keshe. K- I know you did. The reality is two things, the past will stay as a memory, or what we have on the films. There is no way we can replicate in a physical way the past. And we cannot go 'back to the future,' except through memory, because what we recorded. Because the plasma is dynamic, it moves. If you look at it this way, if you launch a rocket today from Earth and the Earth is moving 100 and 1,600 kilometers an hour, the images of this in space it will go, it's blurred. That's what we picture, we see in the matter of state of it. So, 'back to future,' to see going back and seeing it is impossible, it doesn't matter who says what. The future is set through interaction of the fields. And part

of it, to us, is a time lapse physical, which means it happens in the dimension of the Soul, but it takes time for it to manifest itself in the dimension of physicality. And we all know this, we call in the French, they call it "Deja vu", or you've seen this somewhere, but it's back there again and you see it for a second time. There is a time lapse, it could be instantaneous, or we see we write something, we see they call it,

(1:44) people who tell the future. Understanding the process of the interaction. One is just a time delay, but in fact the Souls have already played. I'll teach about this in the coming time. And the process which happens, it can be done. And the process is a part of the knowledge we denied ourselves to, but it has been there all the time. Q: So, Mr. Keshe, so is, it's not our future is already everything step by step is planned? K- Partially yes, partially our dimension of the energy is more advanced. It's like, you know, you have an outrider running ahead of you. He sees there's a danger or there is something happening and he tells you, you know, you're coming to a car accident, or try to stop, or whatever, or take a right hand before you get to .. there's a traffic jam. Our Soul plays that game, it's the speed of the interaction, strength of the field of interaction. So, in a way, the players are there to do. Q: << Speaks in Farsi. >> K- Do you want to speak English? They say, what Azar said is, "We struggle. And what's the purpose of all this struggle, when everything is set?" The thing is, everything is

set, because what we do, sets scene for the others. It's not just that it's set for us.

(1:46) We are the tools in setting up other things for the others. And it's the process of Creation... It's part of what we call, time delay between the Soul and the manifestation in physicality. It's in a way we do it. We suffer from something and then we wish to be dead, and then we create our own cancer and we kill ourselves. Time delayed 7 years. Emotion, the Soul of physicality, and manifestation of the physicality. R: Are we here to learn the emotion of the trust, of the trust in the Creator as you mentioned earlier? K- In a way, partially yes, but we are here as I always said, we are that onion needs to be planted somewhere to flower. And this is a greenhouse called Earth. And that seed is the STM. Q: What kind of a flower Netanyahu is going to give when it's going to be planted someplace else? K- Don't think about Netanyahu, think about Obama. If he killed 30,000 or 40,000, one million homeless, Obama has done 30, 40 times worse. The nice guy is just because the media made him nice, because he made a lot of money for their weapon technology. R: I believe he got the Nobel Peace Prize. K- Yeah, depends how you spell the peace ("piece"). R: How you spell the peace, yeah. He sold lots of pieces.

(1:48) K- Yes. Any other question? With the situation coming to an end hopefully in Gaza and Ukraine, humanity now will be pushed towards peace. As I said to our colleagues in the government that we have to

bear the banner of peace with technology, and that will change. As I said to, we have a man who has an audacity and strength and the courage to do things, which nobody could think. You will understand hopefully if everything goes on the way we wish. I explained 2025 the Iranian Embassy in Washington will be reopened and we have made an open gesture for open invitation for American administration to join the Iranian New Year in March. The reason is not by talk, the reason is because a lot of work is getting done. And the image which Netanyahu and, what you call, the present American Administration has made, has brought to make that ?? they are evil. Iran needs to step down from certain actions, which we all know it doesn't help much but ?? we need the understanding of it. And then as I said, there's one way only, when you don't have wars,

(1:50) you have unemployment, military arms creates jobs. Because when you made the weapons you have to find the soldiers, so now you employ both sides and then when they kill each other, then the money made for the Church. So the religions, the military, the gun manufacturing have to come to an arrangement somehow to start making money (somewhere else). And we are getting that somewhere heard. But you cannot tell a guy don't do if you don't give an alternative to it. And the alternative is new technology. Biden continuously hit, destroyed, blocked Keshe Foundation. The same with Obama. I can give you case after case with Obama. Even though we worked

with him, we tried to keep the communication going. No one did more harm to Keshe Foundation than Obama, but we still keep going. The same with Biden. If Biden would have released the message and the report, which was delivered by the Keshe Foundation to IAEA in the early 20s, and then the head of IAEA traveled within 4 days from receiving the report from the Keshe Foundation in the hand of Dr. Grossi to Iran. And he said, "Israelis lied," and Biden could have taken the step, the war would have stopped. Everything about Iran being demonized would have been finished. Biden wouldn't do it because he was making a lot of money. And then we see the consequences of all the wars. Very soon we'll release the early 2020s report of the Keshe Foundation to IAEA with an email to IAEA confirming and the date and then confirming through the receipts of the IAEA and the travel of Dr. Grossi to Iran. Within four days, the evidence we submitted in a report is so strong, IAEA could not deny it. Because it was delivered at the same time to the Iranian ambassador.

(1:52) At the same time, it was delivered to the American ambassador. We have all the emails, the dates. Everything is there. Trump listens. They understand how Biden hide the report to be able to get us to where we are now, because he made a lot of money out of guns. We see a lot of changes. I see primarily Trump will change the American Constitution in so many ways in the next two, three years. Permanent presidency. Altering the presidency that if

you're not American, as long as you carry American passport, you can stand the president, you don't need to be born in America, which allows Musk to become the next president. We see other things, and this needs basis of peace. The huge majority in Senate and the House and President from the same House, they will rewrite part of the Constitution. Quite possible. Would we see the repeat of what happened in Russia? President back to Prime Minister, back to President. This is two term, but it doesn't say that one term ?? escape, or one term gap. Musk will become the next president we'll see if Trump at the end of 90s is still as good as today, we ask his wife, then we'll see a continuation of Constitution. There's a lot at risk with this election but there's a lot to gain for the Americans more than anybody else.

(1:54) We have to wait and see. He is not in the office, still some 50 days to go but he's start changing a lot of things. But he's got a big pitfall. You have to create jobs to replace it, otherwise they'll replace you. And a new technology is the only way to be in. Keshe Foundation and a couple of other technologies will bring that in because we touch everything from farming, to health, to Space, to energy and everything else. And it's all one integrated system. It's the promised technology which was promised by a lot of people now it's there and you're amongst it, you are part of it. You created it as Knowledge Seekers. The message hasn't changed, it's just how you hear it and how much more you know it. We saw with the Intro of

today, to children 10 years ago, 2014. And 2024 it's the same message, but now you understand more and more of it in our system, we can do more of it, then it becomes more clear. As I always said. We are in one classroom like a village, from nursery to university sitting in the same class, teach according to the understanding of the nursery guy, the same thing and the ones which are older, in different way but the same knowledge. But the biggest problem we face, and I've already discussed it with the government officials, is Musk. We know our problem doesn't sit with Trump anymore.

(1:56) Our problem sits with Musk, because everything he's involved in becomes zero, unless he evolves. Evolution of the science through using Tesla cars, using Space X is obsolete, but facilities for it to... bring the scientists on the edge of young scientists in NASA, which is dilapidated, and it's gone, into operation. Musk has to move into new plasma technology. Or Musk become the biggest obstruction, because he wants to protect what he has built. But we see him to be more agile, he understands he has to move. We'll see how the game changes. Any other question? Q: ... Donald Trump has promised more mass deportation of illegal immigrants again. Elon Musk was born in Pretoria, South Africa. Will Donald Trump's mass deportation of everyone who isn't American affect the sale of Tesla electric vehicles? R: I think you kind of answered that question in a way already. K- Yeah, you got to understand he says

illegal, Musk is there legally. He went in illegally, but he managed to get himself legalized. If you know about his life story. What he says, is illegal immigrants. As I said to one of our diplomats a few days ago, we were laughing, rolling on the table more or less with it.

(1:58) If you understand what these illegal immigrants do in America, farming, agriculture, all the dirty jobs, which the Americans don't want to do. So now you deport 20 million illegal immigrants, it's good, but now you create a piece you have 20 million scientists and working in all these arm factories have to do the job of what you call the Mexicans. Then yeah there is a balance you pay a PhD guy wages of a farmer. Now you understand. He takes out, but he has to create in, but he destroyed the job, he can give them a job to it. So, it will most probably most of the NASA people will end up to start farming where the Mexicans have been kicked out, because they need to live there, then they'll farm. And if they're lucky, they become farmers, that Trump will give them and some grants and something else and something else. Yes. He says illegal immigrant, but as long as... You have you have to understand there is a lot of technicality with this election of Trump and the things that's been said. Vice President has an Indian wife. Now you understand why they didn't get most of the votes for the first lady to become president. Why Harris lost. Because supposedly the first, what you call it, lady... I think, but the second lady, vice president has an Indian wife.

(2:00) So what's going to happen to that one? Then we have the president who has Green Card wife who is not American. And then we have a man who runs the White House and they want Musk who not American at all. His grandfather was born in America. So we all know the bed decides the future and the life of the man outside. You don't keep the wife happy, you are in trouble outside. And we got two foreigners sitting in the beds in the White House and next to it. Then you understand. You kick too much, you're out of the bed. So, let's play the game. But we'll see different things. It's the first time we have seen such a position, and in a way, when Trump played the name of the race, and the Indians, or the black, speak to the Vice-President, we know what they say. She's not of American origin, or is American, but of different race. We don't see her much in campaigning. But now going to the White House, and everything else has to stand on the front door. Very, very interesting. Would they deport their own wives? Forget about the rest of it. Musk is nothing. Would they have a bed to sleep in? That's another thing. It's very interesting the politics in United States, but affects more or less all of us. We know how Roosevelt's wife played the game, and how she changed the whole game of the White House. Let's see what this time these two will do.

(2:02) Any other question? R: We certainly live in interesting times. K- Don't forget you Canadians are becoming 51 States. R: That's what Trump is teasing. Mr. Trudeau with... and ... K- You have no choice,

huh? Years ago you had, was it, two ?? you were one point parity and the rest of it. Now you are, you are more or less nothing in the economy compared to the Americans. Trudeau did all the damage. R: Well California may separate from the mainland of the US, and I mean more figuratively than literally. And maybe literally too with the earthquakes. And Canada may be part of that, in a way. I don't know. K- You never know. R: Our policies are similar to California. K- They say, California is the tail of the dog. It's like a tail sticking at the end of it. Depends which way you wag the tail. Any other question or shall we call it a day? R: No, you have to get going soon. K- 11:30, I have to leave, I've got a meeting. Q: ... Can you please explain the benefits of one of the products from your store, the Twinity Sight Gans? K- Twinity Sight Gans has two purposes. Sight as seen, sight as the elevation of the Soul. And it's developed specifically.

(2:04) The new Sight Gans, which is, because we keep on updating it continuously. All the Gans's, literally every time a batch finishes to the next batch, is a slightly different, improved version. A lot of things, the, what you call it, the Knee Gans's are going to be an evolution, the new cycle. The... more or less we will release continuously upgrading with Gans's. Because now Gans's are produced in two, the... what you call it, Gans's you get are produced in two, three different locations. But they're, what you call it, it's sent out from one place. Different locations provide different materials and then we put it together in one

structure and it goes out. So, development is coming from different angles. And the Sight Gans and even the Pole Gans, the Knee Gans, the new ones coming out in the next cycle, next week or two are totally different with an amazing structure results. You have to understand something, most of these Gans's you use is because I use it. And when I perfect it on me, you get it. Like the Knee Gans, when we put the Knee Gans out it was because I had an accident with my knee. They told me I need a knee cap and I said, no cap, no cap. I developed it. I went up about 40, 50 steps like a bullet yesterday, and they tell me on the what you call it, MRI, my bone needs a blah, blah, or my kneecap and there is nothing there.

(2:06) Because they don't understand we create an environment of it, the bone is irrelevant. And it's the same with the Sight. Looking for a sight to see. At the same time the Soul, the sight of the Soul. It's very interesting, we get a lot of things done. I usually let things go as far as it can go and then I find a solution for it and these are the things, the Sight Gans I use. But the new version is much better because very soon, I had this written to me yesterday, I think the day before, by Azar. If you can make man's hair grow, you know how much they love you and everything. We are testing and amazing results we see. The hairs, you know, you could count. Now you can't put your fingers through it. I've watched it yesterday being brushed. And when we announce the Hair Gans, I think we'll sell about a million bottles in one day. But

it's going through the process. The same is with what we call, Gans's for other applications. Understanding what it delivers, understanding what's the process. And don't forget, all these Gans's have a connection with the Soul, have a connection with emotion. You're not dealing with medicine, you're dealing with yourself.

(2:08) It's a main factor. And you have to understand how to use it, how you apply it. Any other question? R: Yes, regarding Wellness in particular, Doug asked what's the best way to contact the Wellness Center, and I was going to suggest is that still the office@de.kfwellness.centre? K- Yes. R: Okay let me just put that on the screen here so people can... K- There are 2, 3, 4 doctors who work support, but Dr. Kern is in charge of everything. R: Ok. So people have their health questions they can address that? K- Don't forget, as I said, the beauty with us is, you as Knowledge Seekers understand, you are the volunteers. Instead of us getting data tampered with to look good, we work it, you tell us and we take it to the next step, through you, there is no tampering with. It is what it is and it does what it says, and we are part of the structure of development. And maybe things change in the next few weeks. I have a lot of, not hopes, but things getting done and there'll be huge, huge changes in the structure on the international ?? level of the Keshe Foundation next few weeks ??.

(2:10) R: Well speaking of international, there's a, in the webinar chat here you might have noticed The last

three entries are from Matharajan, from India, who mentions he has connections with the prominent party member and was asked to provide documents related to the Keshe Foundation technology. And he wants to be guided on how to proceed with that kind of request and mentions he's having trouble at the Keshe Foundation website for some reason. K- If you send to info@keshe.foundation, somebody will respond to you. We structure political and diplomatic works in a different way. A lot of people have contacts, a lot of people have a lot of people know, but you've got to understand politics has layers and many Indian politicians and people know about the Keshe Foundation, but we never managed to structure India ?? under the Keshe Foundation banner. I don't understand how, but it is part of what it is. It's diversity, or the problem, we don't understand. But we have huge number of Knowledge Seekers in India, but somehow in the government, well known, they know about the Keshe Foundation, from your, what you call it, president down to the others.

(2:12) But, or your Prime Minister. But their structure is, doesn't allow anything to move due to its diversity. And we sit and watch. We made many presentations with the Indian officials, many, many. But somehow... It seems when you speak to the Indian politicians, you need anything to move, you have to go with the truck of dollars, and then they might listen. The corruption is ?? too heavy in India with the politicians. Q: ... Hello Mr. Keshe, one of my friends has pneumonia. How

can we help him? K- ... Look into Cup 1. ... Cup 1 and Cup 2. R: Information on KF Wikipedia Shall we carry on with a couple more questions? K- Yeah, a couple more, I've got about 10 to 15 minutes.

(2:14) Q: ... Last week you spoke about the sperm and the egg and of the egg that can become fertile if you change the salinity of the womb of the mother. But what it was not clear for me was when you said that the uterus depletes the sperm and egg because of higher level. I thought the higher gives to the lower not the other way around. Can you explain better that process? K- You see the... you call it uterus but in a way uterus is part of the Soul, and it's the Inertia. Once you create that Soul of the child in the field effect that leads to creation of the Soul, it's the Soul of the mother which feeds the Soul of the child. And uterus is that Inertia which we spoke about today. If you look at miscarriages, if you look at partially people who cannot get pregnant and you change the environment of the Inertia, or the environment of the womb, you will get a condition of stability or a ?? charge to create the first Soul. I explained this to a mother in the past, maybe,

(2:16) maybe it can be understood. The Soul of the mother is like the Soul of the Creator and is aware of the conduct of the Soul within the womb, which it creates. The Soul of the mother is like planet Earth, it's just a greenhouse growing the seed. So if when we say this, the STM is that seed, which then is released in the space of the Universe to become that.

So the Soul of the mother brings emotion, the energy fields to manifest itself in the matter state, which is a child. And in that process you can add to it, you can extend it, you can interact with it, or you can create condition of. And with external field forces, which is at the level of the energy of the plasma you can interact. There is a knowledge which we never teach. I will never teach this knowledge, because man is not ready for it. But we just talked about Gans's. They say, what's the Gans of this and that? But it's in the technology of your Gans's you take from the Keshe Foundation. We don't teach it. I never teach it, because man doesn't understand it. But we produce certain Gans's in one of our positions,

(2:18) that it brings that part of knowledge into the cycle. This knowledge man is not ready to understand. World of science, if I explain it, cannot understand. And this is one of the reasons you think, "Oh, I didn't physically change." But emotionally, you changed. And that emotional changes its physicality. Then this is part of the same process. As I said, when we were in one of our structures to get certification, the guy in charge told me, "My wife doesn't get pregnant. You want, you say everything does your thing does. You want me to get your certification? It's a disgrace, or something like this in our culture when a woman cannot get pregnant. And with all the beliefs that devil sits in, and everything. He said, "If you can help me with my wife by being a child, I will help you with your certification. Because I've seen everything

works, but you talk, we want, I want to see it and then no problem.” Within less than three months, two months, she was pregnant. I provided the Gans’s for it and they've been trying for years. I understand the process of Creation, and I try to put it in the word of the man to understand. There is no woman on this planet, put in my hand, which cannot get pregnant, through the use of the technology. And we can mass produce it.

(2:20) As I said, go back to Keshe Foundation in Belgium 2008-2009, women in their 70s, 80s, they got their menstruation back. And I used to tell them to their husband be careful grandfather doesn't become a papa. Unless you know you're here for another 30 years. It's not playing, it's understanding. And some of the knowledge we carry in Keshe Foundation will never be shared. Because mankind is not ready for it. Understanding how to work with the energies then injections. Today's teaching, if you understood it, covers this question in a very broader way, in a much deeper way. The knowledge is there, the technology is there, but humanity is not ready for it. At the same time we, if we start doing everything with 100% (solutions), we become magician and then technology loses the connection to humanity because then it becomes a magic show.

(2:22) We have, I always said what you hear what you see in public is not even 5% of what we do, and what we have, goes on in research and development, or it's been developed. 95% mankind is not ready for. Shall

we call it a day? Q: ... I will try to be short. I have a question about plasma, a question about ??, we were talking about these things. Is it wise in the plan of Creation that we feel heartbreak when we see the destructions in the life? So, how could we justify not to be sad about these things? What's the wisdom? I know wisdom is not to be sorrowful. How could we justify not to be sad about the destructions? As you said, there is not just the Christians who pray. There are those with the mighty guns who kill the soldiers, who have their hands up in their Syria, they killed him with multitude of balls of the gunshot, and they say, ?? Allah Akbar. So it's, it's just, and this destruction is so painful, all these historical things, and loot and bombings.

(2:24) K- This is the habit, this is the habit. It was, I know exactly what you're talking about. I had this discussion less than 24 hours ago with a Knowledge Seeker. Exactly this discussion. He says, "Why do you suffer when you have all the solutions?" I explained that if I don't understand, I cannot find a solution that the man understands, otherwise it will be a myth, a magic. And with it, it brings a lot of pain and suffering and a lot of other things to it. But it is part of the structure, part of understanding that we, we don't have to suffer to learn, but the humanity has gone in a way that you understand how the man suffers that he can show it to him is the other way around. And this is part of the structure, part of the human way of living. And we see a lot of it. But you have to understand

why man suffers. Would the children of Mitra go through the same thing? They have to understand, those who are connected to this planet, or any other structure in the Universe, what it feels to be on the physical dimension, and how you can change it in the, in the energy direction, what you call the Soul. That it changes the emotion of physicality.

(2:26) We cannot explain it, we cannot see it, but, when you look at past couple of thousand years plus, man has created most of his suffering through not understanding his Creator. The true meaning of what the creation is and the Creator works, part of what we explained today. And once we understand this, we go to the next level of understanding. Once we move to that level, once we, we cross that threshold of knowledge. If you ask someone, I've talked to a lot of people, and one of our Knowledge Seekers very nicely put to the government officials very recently, he knows what I am talking about. "Mr. Keshe, is 66 he is not going to be here that long. We better

do everything we can, or otherwise, you know, we're going to miss something somewhere." And I said, "66 of how many?" But why do we stay here? It's not suffering. It's seeing a solution for the others in the long run not to hurt, not to do. There is a structure, which we see, as I said, the wars, religious wars are more or less coming over (to an end), hopefully with Trump. We will not see the wars which we used to see, nationalism wars are over because no nation can afford doing other things.

(2:28) But sectarian and religious, which most of it comes from sectarianism, from religion, should come to an end first. Because they are the ones who "fan the fire" of hate. And opening the technology, I... it's the way it has to be. I see a beautiful thing in operation, and that's why we opened the X channel of Keshe Foundation, that the teaching, mass teaching, through channels like this, will bring the world leaders and the others to start looking in a new way, and it's easier to teach. And brings in what we are looking for. You have to bring. I explained as I'm very open about it. As we are negotiating with number of governments with the Keshe Foundation. We see structures like American Administration, a power point. We see people like Musk as those who can communicate across and have the financial position or whatever. And technology like Keshe Foundation, a triad, that can bring that change. The power at the high level is there. The people who already use the technology of the Keshe Foundation, different names and they know it themselves like Musk, and the knowledge of the Keshe Foundation and having structures like X, will bring that dynamic which we are looking for to create the world peace. And this is one of the reasons today teaching has to end very early.

(2:30) We are involved in that part of that process. But in that process we can't leave the Russians out, we can't leave the Chinese out. Our biggest problem is the British. If you bring the British in, to understand they don't need, the young boy has a bit of

understanding of it, but he's got that old man sitting still, where maybe situation changes. Then that kind of power, finance and technology work together, we reach that world peace we are looking for. And then man doesn't need to experience. But we still have the accidents, our ?? will go. We lose 100,000, 200,000, 50,000 ones here. We cannot stop these things. But this deliberate killing, civilized destructions, killing each other for the faith, belief, has to end. And it will come to an end, because once we start teaching technology people understand the structure of the Creation. The way it's done in past 500 (KSW) and now teaching, the three pillars of peace are coming together. Power, finance and technology and to enforce it. And one cannot do without the others. It needs time, and once one of the world religious leaders puts a gun down, the rest will ?? do, and we're moving in that direction. Q: Thank you very much sir, I got my answer, thank you. And I put my answer (question) for next time. K- I have to leave, I do apologize, we have a meeting today. Thank you very much for today. And hopefully we see you next Thursday.

(2:32) Those of you who come into the session next Friday, be ready for a very big surprise for your Christmas. You might go in or go out with more than what you bargained to come in with. But I hope you enjoy the bargain. Thank you very much and see you next time. Thank you very much. R: Okay, I've got a quick comment for you for your peace talks, Mr.

Keshe, and a quarter of all the micro... here's the statistic, a quarter of all the microplastics in the world, which is a lot, come from tires. If we can go vertical, we've cleaned up a quarter of all those microplastics, so that could be something that could stimulate people that are into the climate crisis and other such things and it might be part of a negotiation somewhere down the line. Thank you for everything Mr. Keshe. I know you need to get going there. K- Thank you. See you next time. Thank you very much. 568 KSW
