Part 1

(:13) K- Yes, thank you very much. Good morning, good day to you, as usual, wherever and whenever. You listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute.

(:14) As usual, we are back and we try to share more, and we see, gradually, the festive season is upon us by the Christian belief, and hopefully, next week, this time, we are on what is known as a 'Boxing Day,' the day after Christmas. I hope those of you who live in this dimension of belief, have a wonderful day, a wonderful week, and the week after for the New year. We'll still be here hopefully, and we still try to ??
cuddle along, see where we see and what we can learn. In the Intro we saw is actually interesting, it's part of if you look at it what we were teaching last week, and what it was taught some 10 years ago. It brought back a lot of memories, good and bad, and it brought back a lot of how these plasmas interact, and how they do. And it brought very harsh memories of those teachings. On the table you saw where the presentation was done. My son was poisoned to be killed, by the toys, by the tools which I was holding in my hand. And it was done by the mother, and the people who are supporting her. Life was irrelevant. And when we came out to understand, it was harsh. To understand how people who you think you love using the emotion of the fields can kill their own child.

It is on the other hand knowledge. It is part of understanding of the process of Creation.

(:16) In the talk, in the teaching of last week, we try to explain how the fields are, what we saw in the ball. How a field in its motion creates its own dimension, and its own dimension is the same dimension. Last week, we tried to explain how the fields are, what we saw in the ball. How a field in its motion creates its own dimension. and in losing fields or interacting with other fields creates what we call vortexes of fields of interaction and then these vortexes have according to their dimension need to bring about a dimension (D) to themselves, which means a while a bigger cluster is created by the actual original field, other clusters are created by interaction of the field by themselves, to themselves and (so) forth. And this leads to the creation of body of the man, stone, tree, a galaxy and the Universe (U). And depending on what the outside environment fields decide, these plasmas take shape, manifest themselves. You put the interaction of these fields in a condition of the field Inertia of the plant and then as a seed of it in a planet, depending what field forces are created around it by the environment of the planet, dictates if it's going to be a shrub, it's going to be a tree, if it's going to be a root. And then the extension of it, how and the way, how tall is going to be. And by changing the fields in interaction of the environment, what we call seasons, decides when a plant will have leaves, when it does not have a leaf, (:18) but is still alive, and the rest of it. The same as

we do. We don't feel the same by the interaction of the fields of our environment during the summer, or during the winter. Even the, what we call seasonal fields, affects our emotion. The planet is still the same. The magnetic (M) fields of the Earth is the same, the Inertia of the planet Earth is the same, we are still in the same room, in the same city, in the same environment, but as the fields of the environment changes, our emotion changes. We see direct sunlight's, we receive different field strength, we become happy, we become outgoing, we become cheerful. We see the fields not being there, we call it a dark time, the night time, we have a different emotion. Does not change the color of our skin, it doesn't change the color of our eye, it doesn't change anything around us, it's just the interaction of the fields, of what the environment has introduced, brings different emotion. So we can see, by changing the field strength of the environment, we can interact with the field strength within the plasma, creating different emotion. Because emotion itself is, field strength it's a plasma condition. It has a source, a given point in our brain creates that field source, where we feel happiness,

(:20) where we feel joy, another spot in our brain creates a condition fields where we feel pain, where we feel happiness with the Sun ray, where we feel happiness and other plasma fields with a touch, with a kiss. And then you see these plasmas integrated inside each other, create that spot of the brain which

has created its own material condition and confirmation, the part of the brain which feels emotion. Change this to galaxies, this is how we see the purpose of the stars in the galaxy. We just say there are a hundred billion stars in one galaxy. Every one of them has a position, has a job, has an identity. But man has not understood this. Man has tried to break the position, the emotion side of the brain and which part does what. But, it's the same in the galaxy. And then when you look, collection of galaxies job is to create that emotion of happiness for the whole Universe and this is how we feel in that Universe. This is why the structure of the humanity has to be changed. From killing and destroying because it has entered in that part of the emotion of the, what we call, the Universe, that can affect the others. The Universe will interact with the other Universes the same, with anger, with peace. Now you understand why the structure of the Man's emotion had to be changed, had to be elevated. We set the ground of the knowledge. It's for you to understand the extent of the knowledge.

(:22) Then you see how the interaction of these combination of the fields of the emotion. Let's talk about happiness in a specific part of the brain. That structure, that happiness has sub-structures within its plasma field strengths, plasma of their own, happiness with touch. I love to be touched. But at the same time, I don't like you to touch me. I like somebody else to touch me. I have a different emotion in respect to

different touches. And then I decide how this touch comes in. Is it an emotional touch with the material? Is it an emotional touch with a person? Is it an emotional touch with an animal? So, little by little, these plasmas are created within, and the collection of these plasmas create manifestation of the brain part. Structurally, how it feels, structurally, how it positions itself, in a given position, that why do we see the position of the emotions, certain emotions, in a given position. Where, for example, the nerves, the structure on the physical part of the arm comes, the skin comes, because it needs to be near to interact to rapidly expand and impress and leave an impression. Our body has created these dimensions of different fields within itself. So, in a way, one field of a touch becomes that principal touch, going into the body, getting absorbed by the gravitational (G) field, the rest of the fields within that structure near to react, manifests itself.

(:24) Fields in interaction transfer, becomes a plasma of the emotion and what do you do? A man touches you in the wrong place where you are not happy with, voila, you react physically and a slap on the face. And another man touches you in the same place, another person touches you in the same place, you kiss and cuddle, and show affection. But, in fact, how the fields are, how the fields enter, how closely they are, it's all patterned how our brain is structured. In a way, a field converts into a plasma, and itself takes shapes, builds shapes of itself, and manifests itself as a reaction.

Does not need to be an object, does not need to be a Universe. Reaction itself is a sphere, which interacts with your physical body and you manifest yourself in behavior, which is another dimension to it. Then we understand the fields, the plasma, the interaction of the field with themselves and with others. how creates the cycle of life. Then we understand the connection between the emotion of the physicality and the emotion of the Soul of the Physicality (STP) and the emotion of the Soul of the Man (STM). Where at different strength they interact but of the same source.

(:26) If mankind understand this and be able to connect to dimension of the interaction of the fields of itself, you will live like a chameleon. In respect to the body dimension we create different physical interactions and physical manifestation. If I touch a spot you go shy and all red. If I touch a spot you get angry. If I touch the same spot with a finger you get different reaction. If I touch it with the lips you get different reaction. If I touch it with a kick you get different reactions and you change, but the emotional change not the chameleon change, it's emotional chameleon. If you understand this, then there must be a part, a section, a spot in the structure of body of the man, when you touch, you can in a way disappear the physical manifestation. It's a field strength and every man possesses that field, that spot. You have to understand, you have to understand how this spot works and what pressure it needs to create what. And the spot is not a physical spot because then you

cannot trigger it on the Soul side which is the field only. I made man in the image of Myself, I'm the Soul, I created the man. So if man has a spot, has a field strength, that he can in a way make balance itself with the fields of environment to become invisible, then Soul has to have the same.

(:28) Once we understand this process, once we get in the detail working, every man will have that position. Every man will understand himself, every man can transmute, every man can make itself invisible. It's not impossible. We have to understand the strength of the fields, the interaction of the fields and most of all we have to understand our own emotion. I want to transmute but I can go, but I've never found the field strength that allows me to bring to a point, that I do not have a physical dimension. I live in the dimension of the energy. It's that moisture in the room, I'm always in the room, but depends if I hit a cold window, a glass, and I manifest myself as a drop on the glass, or it gets cooler and manifest myself the same me as a frost. Physical manifestation, translucent manifestation and no physical dimension of manifestation, but still the same drop. It's interesting, man has made so many systems if you understand the system, if man could ever understand the connection to his Soul, the operation of his body,

(:30) it will become so easy for all of us to be able to go to understand to whole process of manifestation and transmutation. I always define it like if you know

this humidifier machines and the dehumidifier machines. You put the machine, there is nothing in the room, and you come and you collect liters of water in the tank. Where did it come from? It had no existence. Created a condition for it, that you can change its manifestation. And you are not in the room as a vapor anymore, but you are in the pocket as a liquid manifested. And if you understand this, it should be no problem for man to translate the knowledge, the understanding to himself. I'm visible as a water and I'm invisible as a vapor. And when I'm vapor it doesn't matter where I go in the house, where I go in the environment, because I travel there is no dimension to my what we call, limitation to my manifestation. Then we understand more and more we should be able to collaborate this with our emotion to be able to transmute, to be able in a dimension of transmutation to see the reality to be pure, to be perfect. Do not commit a crime, do not destroy another life, do not interact to what does not fit into field strength of the others. That's all it is. This is for you to understand new dimensions of yourself.

(:32) As I said before, and I know many of the religious people, belief people, believe in Methi, believe in reincarnation of the Christ, believe in all that. But, the what we call, the Promised Day, that promised is the day when you understand about yourself, that Methi is not a man, it's the knowledge, which that knowledge understood by all become the savior of all. One man cannot create to help an ant, or

the lion, or another man who kills. But in understanding the knowledge, understanding the emotion of him by the Soul, doesn't matter if you're a lion, an ant, a man, will be elevated to understand the process of the absorbing fields from the Universe. As we come to the festival time, as we come to understand the birth of what we call 'virgin' child, we understand it reality is you, is your Soul. It's you understanding the process of the creation, of yourselves and nobody else. In interacting with the fields. And doesn't matter how people play with the words, when you understand the essence, you can understand the totality. I don't want to commit a crime to kill, to eat, to survive. I want to tap in the fields of the Universe. We did that last November. We do this tomorrow. Those of you who come into the dimension of the teaching of tomorrow, in the sessions you will feel a totally different dimensions of life.

(:34) We set up that you feel the dimension of the energies within the cell of your body. You feel the change in the DNA of the man's emotion. Tomorrow session, for those of you who join us, is the principle of the manifestation of the fields of you, by you, in changing you, by yourself. That, in the process of time, I don't need to eat, I don't need to kill, I don't need to absorb in the physical dimension, another life. Many of you experienced last week, last month in the sessions of the November that. How you are not touching food, how you stop eating food, but you still feel the energy is coming to you. How your appetite

for destroying another life has changed. In tomorrow's session we create this dimension of the manifestation of the fields in the dimension of emotion of the matter. What does this mean? I know the field strength of an apple. I don't need to eat the apple. But if my body needs the essence of its energy for survival, it knows how to get it, directly from energy wise. You got to understand, all the plasmas of the Universe are connected to each other. And there is an apple somewhere in the Universe, always there for me to connect to, to receive, because as an apple of the field strength is connected to the other apples. These are not fairy tales, these are the facts that you have ignored and you have to understand about the process Creation.

(:36) And then you understand, when you reach that point you become what we call the "Day of Judgment," you become your own Methi, you become your own creator of the Creation. In that essence, once you interact, once you understand the interaction of the fields of the emotion with the environment, then the different dimensions of life, different emotions which man has no understanding of today, would merge. And I've said that many times, there are so many emotions that man has not have word for it, because he has never experienced it. And in coming to the dimensional transportation, transmutation and the rest, you feel it, and you have to explain this emotion to another man, to another creature. In the dimension of physicality or in the dimension of the

what we call essence of the fields. The dimension when you come, you manifest yourself in the dimension of the emotion of the joy, but as a field, but not as matter. How do you explain this? We have to create words for it, we have to create new dictionary of the emotions, to explain the new phenomenon of the field strength interactions and manifestation of the man. Now you understand how the teaching of the past comes together. You have to create a field strength, that, within your brain, creates a new emotion, which in dimension of physicality doesn't exist. But when he appears, you know this is dimension of the fields.

(:38) So, sorry, physicality don't show any emotion, because it's got nothing to do with you, is the energies, to do with the Soul. New education, new understanding. New process. New decoding. New way for man to understand. Then, if you understand this, you understand the word of Messiah. Which is you, in navigating your life, not just on this planet, but in dimension of fields of the Universe. Because you interact and the interaction of the fields of you with its environment, with another environment, shows a reaction. And that reaction is always positioning. It's like that little ball rotating, holding hand to the mother. The mother is the field emotion of the Universe, the Universal Community, and you as a child, that little plasma, which always follows the same. And then we understand why we teach the man the new laws to understand itself. Because then every child in the

Universe, does not matter where it's from, every Soul in the Universe, follows the same process. "Thy shall not kill". Because once you understand the process of the Creation, you don't need to kill, because you can tap into the fields of the Universe which is given to you as a gift. As I always said, "If I kill you, I'm a murderer. If you kill yourself, it's a suicide. If you give me your life to serve for me to live a better life, then that's the process." As I always write to the Knowledge Seekers and it's the headline on the title of the Keshe Foundation:

(:40) "We are here to serve." Now you understand the meaning. We give from the fields, which what you need, but you may not even be aware of. I bring you the cup on the table, it's you who has to have the thirst to drink it, the need for it. You don't drink it just because it's on the table and somebody brought it. This is how it should be the behavior of the man. This is how it should be the behavior of man in respect to the field plasma of his life, his creation. And once you understand this, how it works, find the field strength of the body will allows you to tap into the fields of Universe, you'll find the physicality has no dimension. Your Soul is that atom which can fill the whole Universe. Then you understand what it means, "I made man in the image of Myself." Because I do the same. So, man can do the same. We haven't seen the Creator appearing in a slaughterhouse, or in a restaurant, "I'm the God, serve me I want meat." That's the behavior of the man. Many times, many

times I walked the streets, many times I have been to the places that you see the most luxurious environments to eat. And many times I said, "When will it come that these buildings are all empty?"

(:42) There are nowhere to serve, there is no takeaway, and there is no restaurants, and there is no supermarket to buy collection of other energies, we call it the chicken, the lamb, the potato, and everything else." In coming time, when this process comes into operation in a way by the man itself, I think humanity will stand back and laugh at itself. We've built supermarkets, we have places that we could take other fields. We built prisons, we built apple ranches. Then we understand how life will change. Living in the life dimension of the fields is not far away. We are bringing technologies to introduce you into it. We're bringing out systems that it gives you the confidence I can do. Today in the second session, we show you new products which Keshe Foundation has brought out, which will shock you. Which brings to the point of you do not need to kill, you do not need to destroy another life for you to survive. It's a training and once you're trained, then you go to the next step, then to the next step, then to another step, where you gradually learn how to match,

(:44) how to become Twin to your own field energy, where for the first time we introduce systems where man will walk away from killing. Where man walks away from destroying another life to give energy to his own life. You take life if it's given and if you do not

need it you don't take. But that life, that energy comes with emotion. The way you feel full I don't need to eat anymore, I just need what I need, that comes to you and it's the same field as when you're so thirsty and you take one sip of water and the whole body fills with the satisfaction of receiving it. Understand the teaching of last week. And then understand what happens to you when you take a sip from a glass of water. And how it satisfies every cell of your body. I spoke about Hydrogen (H) and I spoke about Carbon 16 (C16). In the matter state, Hydrogen is the line of the creation connected to everything. And C16 what you call an Oxygen in matter state, fills up delivering the energy. If you are clever enough, you can hold that water in a specific position in your mouth, you don't need to drink anymore. The other 99% of the energy of the Hydrogen and Oxygen you need to lubricate, to water the cells of your body, will come into it.

(:46) The principle of the 80/20. Now you understand how the process of the Creation works. Now understand how you manifest yourself in the dimension of energy, or a matter state, and then how you can change this, in the field strength. I want to see how my cat feels. You don't become 'shape shifters,' you become knowledgeable about the process of Creation. I said this once to a man, very close to me, who was in love with a blonde and he lived with a beautiful woman, was a black hair, literally black eyes. He wanted a with blue eyes, which was

his first love, and he wanted to change every woman to become one. And I said to him one day, you change yourself, you understand yourself. You don't need to change the woman in front of you. Creation of emotion, that it satisfies the dimension of the existence. And if we understand these new dimensions of emotion which are connected to our Soul, to our physicality (P), to our Universe, to our environment, creating new understanding, new words that it make sense to us in the human race, then we'll find out everything is possible.

(:48) Then we find out how man can live without killing, how man can love without destroying, how man can transmute without burning. One day, in the totality of understanding the process of Creation, every one of us will mature to this point. It's not exclusivity, it's (inclusive) of our own understanding of ourselves. How we communicate, how we understand the line of connection, and how we understand the dimension of the connection. Hydrogen, Carbon 13, Carbon 16, Carbon 15, Carbon 12, Carbon 14, and the rest of it. I explained this for you to understand the dimension of the fields which we spoke about last week and just now. Go on the Internet. Try to find, to understand how different colors are created from Carbon.

(:50) Color red is a carbon with such a frequency, with such a strength. Color pink is such a strength. 99% of the colors we use in the food today comes from Carbon. Just look into the process, that's why they can give you exact color orange juice in the same

bottle, doesn't matter how many bottles they produce. Then go back to the teaching of last weekend today and understand different frequency, different field strength, different bandwidth creates different colors, then you carry the same. Then you understand how much fallacy has been in the dimension of the fields of even a chameleon. All a chameleon does through emotion creates a field strength that matches that color in its Carbon structure of its Amino Acid (AA). And us as man have not understood this. But you touch me I go red, you touch me I go angry, blue color, field strength, frequency, blah, blah, yellow color, the same carbon in different field frequency. Now you understand. Then can you create a field strength that in that instance your eye sees the blonde hair even the black hair stands in front of you to satisfy your emotion.

(:52) Then every woman on this planet with blond and blue eyes, and you are satisfied. You do not need to torture another Soul for it being black and not being what you wanted. Now you understand. Knowledge of Creation is that Messiah, and not the man. The savior of the man is the Knowledge of the Creation, not the return of Christ, and not the Methi. Once you become wise to it, you become that Methi of yourself. And once you can teach it, you become part of the structure of the Creation. Next time you go to a shop and you buy a different color drink, imagine what color that will be in the bandwidth of your Carbon, which is your communication line, to be the color of your skin,

you pick up the color. I don't know if any of you remember, and this product is still in the market, in a very different way. A couple of decades ago they came up with juice for children, orangish color. And it was so nice, it was so delicious, that children could not get enough of it. Two, three, four bottles a day and the parents, it was so natural they said, that they were drinking. The children's skin started becoming orange. But the scientists didn't understand that the field strength of that orange just by accident,

(:54) by coincidence, matches the frequency strength field of the connection Carbon of the body of the child. That's all it did. So, if I could just match that color I can change my color from brown to orange. Go on the internet, find the company. My children went through it, it was a fantastic thing we saw. Now you understand knowledge. Then if a drink can change our color of the skin, is part of the Carbon 14 structure, Carbon 12 and in communication with Carbon 13, which matches some of our emotions, then we can become a chameleon. If a drink could change the color of the child's skin, by matching, where a scientist went chemically to explaining it, not understanding the process of the Carbon line of communication, in the Amino Acid of the man, the way we do now, ooh, you could see the child green today, orange tomorrow, but happy he was orange today, and green tomorrow. Change the sense of emotion. Every man will be black and I'm happy, every man will be white and I'm happy. Racism goes away.

Nationalism goes away. And then, we become that man in the Universe, that we sees everything in the same dimension as the beauty of the Creator. Now you understand how deep the teaching of last week has been, and how deeper we go into it. To understand about yourself, is not the birth and is not the resurrection, it's understanding the process of the Creation.

(:56) Then, all of us will be able to go to any shop, have any food, we look black, we look white, and we keep. Why do we use all these chemicals? Because we never understood the process. Then you will understand how to switch certain fields in the Carbon 13, in the Carbon 14, and then you change Alzheimer's, you change Parkinson's. You don't need to do anything. We go for a break and we come back, and I hope I open your eyes to another dimension of your own life. And in a way, if you understand this then you understand, how can I match with another Soul to create a new Soul, interaction of the fields of dimension. And then you understand about the virgin birth. And then maybe in Christmas I'll explain to you how little man knows about himself, but not knowing how those who understood part of it abused man. In the next couple of days, we come to Winter Solstice. We come to the Birth of Mitra. But understand what that birth means with the knowledge you have today. Then understand the process of the virgin birth.

(:58) Then understand the process of resurrection. Understand how our ancestors hid the knowledge in

different way in mysticism. Understand the Sun and the work of the Earth, the planet, and the cycle which needs to cover itself for a reposition of the cycle. Understand, in the world of Christianity, difference between the Son and the Sun, just changing an "O" with a "U". And how religious people have abused this, to create a mysticism, about the creation of life of the planet itself, the manifestation of fields of the Creation. When there is the lowest sun, the longest night, needs three days to move in the dimension of the field strength, which is the time of the processing of the fields to match the cycle of the Moon and the Earth, and then the manifestation and resurrection, which you celebrate on 25th. (1:00) All the clergy did, changed the "O" instead of "U". And they fooled the rest of the world with it. And then you understand how emotion of the word, has changed emotion of understanding and prejudices of the man, in respect to the simple process of the Creation. We don't have one birthday but we have two birthdays in the next seven days, and Mitra came first. And the rest are just translation and understanding to fit the physicality of the man by 25th. We go for a break and I hope you have a wonderful Christmas, in celebration of the birth of Mitra. Rick, would you like to take us for a break?

>> BREAK >> 569 KSW December 19, 2024

Part 2

(1:06). K- Yeah, it'll be nice to do. This is part of the teaching, this is part of the process, our work and these 3 new products is part of the Cosmic Ray (CR), it's expansion on your work and your understanding of the Cosmic Ray's. This is part of the Cosmic Ray Bundles and they're introduced and some with already pre-sold, to bring you a new dimension, new dimension of understanding and a new dimension of process. We have introduced a new system which is very much you can see it with 2 Headphones. These new, this new product which is 2 Headphones and not a Headphone and 2 units that's a different thing. The new unit with the two Headphones.

This is one of the most amazing products Keshe Foundation most probably ever put out. We have a limited, what you call it, structure of production on this and it's a Twin System. You don't need any MaGravs or anything else. You cannot connect to somebody else. You can use this system in a very simple way.

(1:08) You carry one on your head, touching your Soul, and the STP, being in touch with your physicality as it is the head only self, and one to your loved ones, one to another person, Where you communicate through Souls, one to one. Where word does not need to be spoken. Where a spectrum of the fields will be covered by the man's emotion and Soul. You're hungry, if you want an apple, you don't want to destroy an apple. Put a Headphone over an apple. You

receive the energy of it, you don't need to destroy it. You get the emotion of having it, you don't need to kill it. Then you see we have entered a new dimension as part of what will be marketed in the future. You connect your Headphone to an App which is connected to an apple but feeds millions of people. This new system, the two in hand set, is not just for Soul to Soul. It's for you to start learning how to, and one ?? set, "change the dimension of life". Needs training, needs for you to understand my emotion, even there is an apple there,

(1:10) I have to have the emotion of understanding the field strength, that next time I don't even need another Headphone for an apple. In a way, it's a new system to feed the Soul for the Soul to feed the physicality. Many of you who joined us last November, you already felt this, felt the energy. Once you learned it, it was embedded in you to do so. Then we have introduced a second parallel to this, which is with the Headphone and two units to hold in hand. This brings a different dimension for yourself to know yourself. But you can give it to another person to hold and feel the emotion, change dimension and in the process how to go through the process of transmutation. Then you can do a lot of things with a handheld unit with this. There are no MaGravs as I told you months ago. We are reaching a point that the advancement in technology allows us to bring these new dimensions into process and now it's here. Then we have introduced a new system which has nothing. It just

looks like a MaGrav. It's just a system on its own. This is when you have a Twin system. In a way you embed all the needs in that single unit. And this will give you, literally, everything you need. You learn to communicate, it's a Twinity. This will come in different dimensions and directions, will be produced to give every need of the man within it.

(1:12) This goes back to when I told you many times, many, many times. I gave you the MaGrav system and you plugged it in and looked at the energy of electricity, but you never looked at the fields. This time we give it to you directly as a Twin system. In a way it's me in you, that I learn to be me within myself. We originally developed this and some of the Knowledge Seekers (KS) in Europe wanted to test it, and now it's already pre-sold. And it's a new product, but as you can see it tells you, it's Twinity MaGrav system, Cosmic Ray, which means connection to your fields, to your energies. We will embed in this new technologies that satisfies a lot of needs of the man. Then we move you away from that plug-and-play MaGrav, to plug yourself in, to play with the World of the Creation. We put a limited production on this, and then on the back of it, a goal for mass production, where you need. Those of you who say you're a vegetarian, you are vegan, now you become plasma people, which you don't need to kill anyone, But you have to train yourself how to log in, how to match in, how to become, how to change cancers, how to change emotions, how to change everything in your

body according to balance between the fields of you, and the emotion of you, within you.

(1:14) These 3 products will be under limited because they are very heavy to produce, they take time consuming and we start delivering in January, our factories are just geared up for this, for next month. But those of you get especially the Headphone unit, try to understand, you give it to your lover, you give it to your partner, don't need to talk, see if you both like to cuddle, see if you both feel like going for a walk, see if he feels my emotion I don't like what he's doing. Then you'll be walking around with the Headset on your head and they say, oh, look at these two. But then you understand the environment changes because the Souls find a balance, the Souls find a peace in the house. You have conflict with your partner, try it. Your child doesn't understand you, try it. And then you'll see how we change the physicality, the emotion, and the essence of the creation. It's time to move in a dimension of the fields and not in the process of the, what I call, matter. These 3 new products will bring a, in a mass production, bring a huge change to all of mankind. Those of you who join us tomorrow in the session, you will see part of the application of this technology, but in different way, because you cannot wait till Keshe Foundation has another session. You want to do it at home for yourself. And this brings a massive change in the world of technology, Space technology, feeding of the

man, and this is what I call, the very first stage in that bigger change.

(1:16) Then you understand, do we need satellites? Because there is no satellites, there is no communication line between the two, there is no frequencies of Bluetooth and the rest of it. Only the one who matches is you, if the other side matches with you to be. And then, would you find that energy level of invisibility, energy of the, what I call, transmutation, to be with your lover, while the lover carries the other Headset. Now you understand. And this has huge implications, and applications in the world of science, food, industry and the rest of it. And then you understand when I told you, Mr. Musk, is spending a lot of money on a lot of satellites, where actually we show it's obsolete. There is no need to satellite. The Creator has not got a satellite to communicate with man and transfer his love. How come man needs satellites to do so? This is the beginning of the change in food, in transportation, transmutation, and even energy transfers, which we teach you in a later time. Now we brought you the Cosmic Rays Bundles, now you see it's children, and the development in the technology, which will change every one of your lives in the coming time. As I wrote, those of you who follow my Chat, 2025 will be the year of the change. When people understand that they are the Messiah of themselves and they don't need the Messiah.

(1:18) And you just need to learn to understand and then you see the rest. I hope you enjoy this, because I know what the pleasure will be. And I hope you understand the process because as it's massive change in the world of everything we know from today on. You wanted a Soul to Soul talk, you wanted not to destroy an apple and an orange, and you want it to be there when you want it. Now it's possible. We would like you to report back to us, how you feel. Like many of you, you are doing. And as one of our Knowledge Seekers says, "Tomorrow session I want to put the bread on the table and see if I can taste it." Because last time I had the apple and I don't feel good to eat it, because I'll get to see ?? whether I like it. And the Knowledge Seekers went through the same process with different things. One day, in one of these systems, which these cannot do, we teach you. We show you systems which can lead to the creation of the Children of Mitra. Which is you, with you, and it matches to be you. Because you need this if you become passenger of the Universe. You leave this planet as a bachelor, you (?? don't) want to be traveling the Universe, as a bachelor for thousands of years. You want to share love, to give love, to create from that love, what the Creator does. And then you understand the purpose of these new systems, which now we bring it as Cosmic Ray. I hope you enjoy it, I know you'll enjoy it. And, this is the beginning of the change.

(1:20) And, in a way, those of you who bought those Cosmic materials, which now, coming to you, hopefully Ukrainians will do the delivery of their boxes and other things arrives on that. We show you how to connect these together and then tap into Universal Energies. It's part of and within the collaboration of the understanding of the knowledge. The Promised Day has come and it's the biggest Christmas gift we can give to all of you. Are there any questions? Q: ... With Mitra's children will we soon have an alternative to having children? How can we then free ourselves from the male sexual drive and be detached? K- You can never be separated from that drive. It's within us to create, and it's within our Creator to create. That's why we are here. You call it a male or a female. We call the emotion of 'confirmation of love.' Which is giving. Which we can give when others to survive. But, with the Children of Mitra, there is no condition. With the children of the man the condition is that if the mother is not there,

(1:22) the child dies because you have to feed it. Now we find something else to replace it. But in essence no one can replace the love of the mother, not the breast of the mother. And that's the essence of Creation, when you have the Children of Mitra. If you don't have that testosterone, or the other part for a woman to have it, it means you are not created. We are a piece of... even the wood wants to create part of itself. That's why you get mushrooms out of it. So it's not a shame it's understanding the truth and the

purpose of the truth. Propagation is part of the structure of the Creation through the, what I call, channels of love,

which is giving. If the Creator doesn't give, would there be a Universe. And that's the essence of it. I always say to those who understand, maybe it's time for you to understand. We call them the father, we call them the grandfather, we call them the great grandfather. We call it the Earth. We call it the Galaxy. We call it the Universe. And we call it the Unicose. And is inherited in all to the dimension of below. Which means, when somebody looks at you and says, "Oh, you have the color of your great grandfather." "Or, you have the smile of your father."

(1:24) Change that to the Creator, and different stages of the Creation, it's the same. Then, it's not a drive, it's a pleasure to be able to create. Any other questions?

Q: ... Good morning Mr. Keshe. K- Good morning. How are you? Q: I'm always good. Always good. K- How is the Aussie land? Q: Yeah. It's good things happening. So I'm very positive of the future. I'm in the fruit season at the moment so I'm picking a lot of peaches, nectarines and plums. It's a very busy time for me.

(1:26) And using the plasma of course with the ?? sprays and ??. So spreading the love I think. K- Through the fruits I presume is the best way. Q: Sorry? K- I said through the fruits. Through the stomach of the man is the best way. Q: Yeah.

Hopefully that carries something positive energy. I have a question on the Twinity Gans. If you have two types of Twinity Gans, would you be able to use them in the same time, like, like, you know, within a half an hour of each other? Or would you have... K- Yes. Yes, you can. We have advised. It's just to understand. We will introduce new Gans's, as a process of the system we are going ahead with, that we advise if they use on their own or try to finish with one and then start with the other. We are processing now the system for, what you call it, you know, a lot of us get mature and we go a little bit whitish or grayish. We are testing on that, to hold the color of your hair, in a way to hold the emotion on it. You don't need to go grey and white. We are looking at the results on the test, in... because it's emotional. And that we can ?? create ?? and ask, once it's launched, do not use it with something else... for a period.

(1:28) But most of the Gans's as a Twinity can be used in conjunction sometimes, and by time separation. If you do, for example, one in the morning and afternoon, or in the evening, do one in the lunch time, but you still get the same effect. But it's the last, the system last, and then they lock into each other. We... I better... while you're on the line. We have achieved the knowledge of being able to balance the DNA with the fields of RNA. In a way, in the future, if you have any genetic defects, all the genes by themselves. By introduction of fields we'll balance finding their own place. Then we should see the end

of genetic defects. We are in the process of developing technology (T) where for example with the cancer, creation of collection of the cells become impossible, the body will not allow it to happen. It's not a medicine, it's understanding the process of Creation. These are all Twinity Gans's. We'll introduce it in a due course and with it will come another equipment to fit to do. Or you go through the Wellness Centers to get to achieve. What this means, it means the knowledge has moved to the next step, that in the future, there should be no cancer by a factor of medicine, but no cancer by a factor of the emotion.

(1:30) We are putting these into test and we should see the results, we are seeing some results in the background with what we are doing. And so, in a way, if you... when you have these ... annual contracts with the Keshe Foundation, even if there is a seed of, let's say cancer in the body to come, when the systems are introduced, when you go into system automatically, whatever has been lumped to become, it just is matter of days, in a way it goes back to what it wasn't. It's a knowledge and we're working on this, and I hope and my deepest hope is, that we'll come out of this from major universities in Iran. And then we spread it around the world. With understanding in a deeper way, how the things come. But these are all part of Twinity, has to be Twin system for it to be able to do this. Q: I do have another question. When you spoke about, you know, we don't really need to follow anyone in particular, because that divinity lies within,

that kingdom of heaven lies within. But just following your teachings is like following you. And I have a question for you. And I'm a bit torn, but I'm listening to you. You know, I think that's different to listen to someone as in, I'm following you, as a devotee or something like that. You know, I think there's a difference to that. K- You see, you don't need to follow. (1:32) You need, just because you have a teacher, you don't follow the teacher. You learn in that teaching what applies to you, what you understand according to your understanding, and you move to the next step of using the knowledge. This is the difference. It's... this is one of the reasons I clearly always repeat. Keshe Foundation is not a cult. You understand. It's understanding a knowledge. Understanding a knowledge does not make you a cult. It makes you to better yourself. And, a lot of people have a problem with this, that you become wise to be independent, and you become wise to understand. Q: It's probably why the churches don't like... K- We have no churches. Q: Yeah, the religious groups probably... You know, like in the past, they persecuted the people that were looking in a little deeper? K- You see, it depends what suits where. I don't know if any of you know, I don't want to mention. There is a group very much like the other ones who do the, what you call it, the dancing and dancing on the ice and everything else. This group is originally based in New York, but they showed the manifest, and they do something like 600 shows a year around the world. It's an

organization, but this organization does five thousand years of Chinese culture... in their dances.

(1:34) I know, I'm sure you know who I am talking about. And... but this... this behavior, this thought of line of thoughts of, what you call it, knowledge is... cannot be shown in its birthplace. And the people who follow the path of belief of what they believe in, they're prosecuted, but in outside China, they're free. We can actually, they're one of the most expensive shows on Earth on the regular basis. They sell their tickets to 1, 2,000, 3,000 people per, what you call it, per show. They are around about 150, 180 Euros per ticket, around about \$200. And they're full, you cannot find any of them. And they come back every year, and people follow them. Millions of people go to these shows. And, but they ?? (are) considered as a cult. And this is one thing we try to keep away from the structure of Keshe Foundation is this knowledge, belongs to every nation and every person. It cannot be a cult. It's the way of living, it's the way we live ourselves with ourselves. This is something which I kept Keshe Foundation from this line of thinking even though when you speak about it to the people around you they consider you as becoming you are following the cult.

(1:36) Q: Yeah. Yeah that's my understanding is that we don't need to follow anyone. K- You take from the knowledge according to your understanding. Q: Yeah, just you know there's a beautiful saying in the temple says, man know thyself. And that's how I look at it. I

think we have to understand ourselves. And as you speak and I gain a little bit more understanding, and I can connect that understanding. So, you know, I'm always grateful that you speak about the Soul and all those sorts of things because I can understand that in my own way, you know. K- Yeah, well, we all take... It'll be interesting, you are a what you call it, agricultural grower of fruits and whatever, you eat one of your let's say plums and then put another plum from the same tree in between the two what you call it, Headphones and put the other Headphone on your head and then try to understand if you can feel the taste the plum without you actually eating it. You know what I'm talking about? You know, the new system we introduced today with two Headphones. You put one and then it brings a question. Would we need farming in the coming time? Would we have farms in the Space, or can we take one of your plums and other people put their Headphones or connect with the lines to your plum and one plum feeds thousands of people in the Space? You understand?

(1:38) Q: Yes, I was thinking that I could take a plum and project that somehow to say to you and say this is what it tastes like. You know? K- This is the purpose of the Twin Headphones. If I eat an apple would you taste it? Because I enjoy the taste of it and I want to give to share with you. There's a lot of things you can do with these new Twin Headsets. And it opens a new door. It cannot be controversial because you test it yourself. And the next step in the coming time will

introduce visually that you can see even the plum. You understand? In so many ways, but step by step. Step by step. Q: Okay. Thank you Mr. Keshe. K- Thank you very much for all your support. Q: I can do more ?? now. K- Thank you very much. Now I see the master of questions, Azar, is standing there. R: ... Azar and Selena and then Ed's just joined in too. But before we engage them, I'd just like to run through a question that might be a good segue to them ... Q: ... Mr. Keshe, thank you for everything you have been teaching us... I would like to know if it is possible to communicate with Beings from another planet when we use the Gans's.

(1:40) I told a friend to hold the CO₂ Gans with her left hand and the ZnO Gans with her right hand as you taught us. She simply saw a Being who spoke to her and told her not only to hold the Gans, but also to put her feet in a bowl of water, with a lot of coarse salt and one drop of iodine, because her body needed it, as our planet is very charged with dense energies and bad particles. We did what she heard, and her body began to work in an incredible process of regeneration. So, the question was, I'd like to know if it is possible to communicate with Beings from another planet, when we use the Gans's? K- You call it, "Being from another planets," if you rephrase it, "from other plasmas," because you got to understand, you yourself are a Being from another planet for the others. And this is not something that we can do. This is something we've done all the time. We call it, all

sorts of names, premonition, enlightenment. I saw something in my dream, but who... what did you see, who brought it to you? Was it an alien, or was it in transfer of energy and knowledge? Or, was this alien the grandma who knew what to do, but now you see (her) as an alien, because you don't recognize it was a Soul of the grandma?

(1:42) We have to understand totality then ?? to individuality. This is available to all of us, this is open to all of us. In every shape and form. And, is not color, race and religion and creed and which part of the Universe we come. Any other question? K- Let me say something, the more you lot are testing with no new fields, the more you test with different combination of fields, the more you understand connection of your Soul with the energy fields of the Universe, you all experience new things. And would it... does the same thing happen if you give the same container of the CO₂ and Zn to another person to hold? Would they see the same person? Would they see another or nothing will happen, it was just a fairy tale? This is important, how to Twin with, how to match with. In a way you scan to find the field which matches yours, your desire, or that specific emotion. And this is something we have to learn, and this Twin new Headsets, and the new ones we introduced, is the beginning of that process. I'm sure in next, maybe, 10, 5, 10 years, you'll find a Sony brand of this, you'll find a Musk brand of it, Tesla system of it, and the rest of it.

(1:44) We already have the knowledge to produce the Universal system of it. But man is not ready for this, it's a big leap into knowledge. And some of you already have the structure in your hand to do it. And once we show it to you how to do it, you go crazy a lot with it. It's not something new, it's like exactly what we saw in the introduction of the teaching today with the children teaching of 10 years ago, and the topic and subject are the same thing today. You have the knowledge, but it needs to be understood and it needs to be developed. 2025 is the year of the change. And according to some people who believe, it will happen after March. So, still got three months to go. The ground is getting laid ready for it to become. Any other question? Q: ... Good morning Mr. Keshe. Good morning Rick. I have a few questions, but before I go to my question, I want to make a comment on that gentleman talk about, you know, we are supposed to get to know ourselves, but then we listen to you, it means we're following somebody else. I mean, a lot of people make this mistake because even in the chat, sometimes I have to grab my head and just say, "My God, what are they talking about?"

(1:46) Because you make a sentence and people want to exactly say the same sentence. Just, that's not the point because you're just like a little, you know, the mother bird trying to teach the chick to fly and we're sitting on a branch and then once we fly the excitement about flying is so much they don't go back to the mother, you're just maybe flying the moon, your

mother is in Africa. But then if you're a chick standing on a branch and don't want to fly, so the mother is trying to make any tool possible to make you not to look down, get scared so you can fly. So that's the whole purpose of it. I mean, it's not about playing with the words or saying Mr. Keshe said this, Mr. Keshe said that. Once you get the grab of it, you're done. The whole Knowledge of Creation comes to you. So we never follow Mr. Keshe. So I was thinking about sometimes when I see in the chat people arguing about what you said and I said to myself, my God, if, God forbid, if Mr. Keshe pass away, we're going to make a book like Koran, sit down and then make a statue of him and say, "Mr. Keshe said this, Mr. Keshe said that." It is not the point. The point is just fly away. Don't get scared and fly away. Okay saying that, I go back to my question. When we get, when we are in this world, we have connection with so many people. Our parents, all the people come to our field. And then we have certain responsibility for them. But then, when you have this responsibility, how do you manage to fully be there for them, for each of them, and be able to handle everything at the same time, and not be torn in different direction? K- Can you explain what you're talking about? Q: So, for example, say you have a brother, you have a sister, you have a parents, you have a friend, you have community, (1:48) and you suddenly see everybody's needs. And then you want to help out, but you cannot possibly physically be able to help everybody. So, and then

you get caught up in this struggle, how you can being three places at the same time. Emotionally, physically, mentally you want to help people, I mean how you can manage that? K- Oh, find the way the Creator does is the simplest way. You have to, this is one of the, it's a way of learning, it's a way of understanding. And in a way, that each one, you want to be in three places, and it uses different fields, has different emotion field. And you, once you learn what I call, even, transmutation, you can be in three places, at the same time, for them to get the fields of presence, but not necessarily the presence. In the near future I'm sure some of you will say I have I want four of these Headphones because I want to be in touch with my wife and the children, but we all want to be in, this not exclusivity. And we should be able to do that. Then you understand the process that you work through the fields, energy fields, not manifestation of matter. And you can be with all three and all three get what they want. And then how they feel about it and how they react to that.

(1:50) We know we can do it. Yes. Q: Mr. Keshe, but you know, I think I'm odd, because... K- This is the problem, you think you are odd, but you're all the same, with the other people, they all have the same, but you speak it. Q: No, you see, because I'm odd, the reason for saying that is this. Because, if I see you in trouble, I come to help you, yes? But then, once you're good, I don't contact you, like... because I know you're good, you're doing your things, you're playing

around. Then, but when I see some people, like, when I see somebody doesn't feel good, they're not good, I want to help them to get them to a point that they can fly, you know, they're doing fine. So, for me the problem is now, you know, some people like to go and have friends who can have fun, which maybe, I don't know what is fun, but I just move around it, but then suddenly, If I find myself with a couple of people in trouble, I don't know who to help, because then I get caught up in a point that the time, and the timing, matter, location, everything is impossible. K- This is the pitfalls of physicality. And on the other hand, if you gather the knowledge to travel through the fields, energy of the field, it can be in every dimension, and every position. It's just expectation to be present in physicality, and then what your presence will bring to them. Q: Also I noticed another thing too.

(1:52) You know, like you know if when you when you try when you use the fields you give them from your Soul. But then sometimes when you give and you see, the person doesn't want to take it, because they like to be in that situation. Is it also correct? K- Yes, you cannot force, this is the beauty of it. Put the magnets on the table and paint one of them red and then you be the red magnet. And then paint one blue and one yellow and the other colors, and see if you position yourself between two other colors how each one reacts. Even though they're the same magnet from the same production, one jumps maybe two centimeters more than the other one. Because the

other one connected to different fields of that, what you carry in you in that magnet. People .. this is the freedom of the interaction. Q: I also notice something else. You see, when you put five magnets on the table, you move one, the other move accordingly, the other one doesn't move to the other one's field to interrupt the other one. But I noticed a couple of times when I walk into a room, there are ten people, if I sit some place, I find my location to sit some place, yes? And I'm sitting there, and I see people go to different people and interfering with the field. I mean, because once somebody enters, if I'm sitting, I'm not bothering anybody, but why are the people come in and bothering me, because they're not so... because the field has changed but then I realize people because we have a will we enforce our field on others unknowingly maybe. K- That's what we want. You know what is interesting?

(1:54) Go to one of these meetings of what I call, ministers in places like Dubai. In the West, or in most of the world, when you want to see a minister when they're sitting in public, you go, you get the time, you go, he's sitting in the room, you make time, maybe he is with a couple of advisors, and always one witness, because then he says, "The minister didn't take a bribe." If you know the system of the meeting with officials internationally, there's always somebody present, that you cannot claim,

"I gave a bribe to the president," and say, "There's a witness there." You always have very official

meetings, there's always one or two people, but actually they are witnesses. This is the norm of the West. In the Emirates, the pattern of work, when you go to see a minister, it's totally different, it's an experience. You enter a room which is a circle, and there are chairs all the way around to the entrance door and to the minister and his advisors, if there are any on the top. You enter and you sit at the position of the first. And then as the guy who's come earlier or was told to be there, a certain time, sits, gets next to the man he wants to talk to the minister. And it's very open chit chat, but everybody, if you want, if you had a microphone you could listen to, he tells his problem or whatever.

(1:56) And then you see every time somebody enters the whole emotion of the room changes, it could be 30, 40 people in this room. Some they know each other, some they don't know each other, some are curious who you are why you're here. And it's a different dynamic of emotion, than when you go and see what you call it, somebody a high official in the West, we are used to. But this is what you call, as people come in, you don't know each other, but the dynamic changes, some of them, you see when they come in, they are high ranking people from the government or somebody famous in society, the whole room changes, the conversation changes, the dynamic changes. And I've been in these meetings and it brings you an amazing feeling of how emotion interacts. And you watch the man, the minister, how

he reacts to who enters. And it's very interesting how they plan things. I went to meet one of the highest ranking ministers in the cabinet and we were delayed to move to the position to be able to talk. But prior to, just prior to our talking, he had to get the confirmation from a German and a British ambassador before he talks to me, it was amazing. And then when we got to the position of discussion, he had to get okay from two ambassadors. And I was observing it, it wasn't just something because when the ambassadors came they just went sat next to him directly.

(1:58) And they came before we get and they literally left after we left. And it was amazing how the dynamic changed when the two ambassadors came in. So we create interference, we create interaction, and we create dimension in the fields of emotion when we enter or when we leave. And it's not just with you, it's with every society it's the same. Q: Mr. Keshe, what was noticing is this, we kind of, sometimes we force our fields on others, which we shouldn't do it, because we should give them what they need, but I think when I'm standing in a room, when somebody comes and talks to me and I feel they're enforcing something like I don't want to talk to them. K- You, you, you have allowed. It's a different dimension of understanding, that's a social behavior which brings the emotion. And this is how we observe according to our own understanding of the environment. Maybe the guy came in to be nice and you saw it as a threat because you don't like the guy with two eyes on his head. It all

depends on our emotion. Q: Okay. And my last question is about the urine. A lot of people know, they advocate that if you drink your urine it's good for you. I know there is a kind of distillation with the kidney, but why is it good for us? K- Oh, it's different path of belief. Q: But do you think it's good for us? K- I don't make comment on this. But, what's his name,

(2:00) Gandhi used to do it. Q: Oh, Gandhi used to do it? K- Yeah, Gandhi used to do it. R: John Wells as well he was an advocate. Q: Who? R: John Wells. He passed a few months ago. K- He passed. In Argentina. Q: John Wells passed? I can't believe it. My God, oh. K- Yeah. We lost two Johns in less than a month.... For those of you who don't understand why, we heard that way, John in Farsi means life. When we love someone we say Azar "John." So in English it's a word, when you add it to Farsi, it becomes very funny, because sometimes you have a friend called John, and you call him John-John. Q: Mr. Keshe, do you know, do you know what happened to me in Iran? I went to get my passport, you're talking about John. And I'm so natural seeing John to almost everybody. In the passport office when you go, I went to the new passport, they were like these three separate, they're young guys. And they're really like very shy, you know, they don't look in your eyes, they don't look at you. And I had my cover and everything on. And then a guy says, "You should do this." And I did and I said, "What does he mean when he says to do this?" So I said, "John," and the other guy, his friend, look at him, he

looked down, he moved away, he went, actually he left. The other guy was smiling while he was looking at the ground, and then he took over, he looked and said, "Oh," he gave me the instruction. And I said, "Oh my God, I made a mistake, I shouldn't have told him John." He became, he became all red and then he looked on and he moved away from the desk.

Because he couldn't stand it, as I told him John. K- Yeah, it's... I know what you're talking about. I've been through that. When I went to Iran the first time, they allowed us to be in,

(2:02) you know, live a social life, to be outside. The first thing I did, I went to a chemist and I walked in the chemist. Highly educated, a very smart guy. And I just said one sentence to him, he said, "When have you come back from outside, we don't speak your language anymore." They identify you as a foreigner, because they don't speak the way we speak outside Iran, the Farsi. And one of them is John, it's not used as, as much as he used to be. In a way in English is darling, in that you can't say to a man you don't know, darling. Thank you very much. Q: No, like for example if you go to Iran and tell a woman, John, they, you're going to really get their reaction very heavily, especially if they're covered. K- Thank you very much. As we had today, and in the past few days, there will be huge changes in Iran in that respect. Thank you very much. Q: ... Hi, hello Rick, hi Mr. Keshe. You partially answered my question but not totally, but I will ask the question again everything. Mr. Keshe I had, I

have a lot of experience like a small fragment of like a movie.

(2:04) I see a lot of stuff and sometimes feel a lot of stuff. So whatever I experienced, I all gather and calculate like a puzzle. I try to fix the puzzle. So In my understanding I understood, I talked to the Bengali teaching and sometimes I appear in North American Corona team and very rarely in Rick's show, or for a few minutes maybe sometimes. So in my Bengali teaching, in our Bengali teaching, when we talk, I talk sometimes, I say I feel the Creator, the Universe, ?? whatever it is, where everything started. I feel everything is like a big computer or is like a big brain. When the neuron ?? starts, and then stuff happens from there, or from computer. There is a lot of icons and then everything, the whole structure, the ??, planets and we are everything like inside that. So it's not, I don't know it, I feel sometimes that way. But my question is, today, the eating part, you partially answered. I told before. I was trying to ask you when the baby born, when child born,

(2:06) we saw a lot of time the baby after born a few minutes after he or she is ?? her finger, because she need to eat or she need to drink, she need mom. I feel the eating programming is happen right away. And then, why the baby after born they want to eat? And I know our Soul is not... K- No, no, no, no, no. Let me... let me stop of you there. The child does that in the womb of the mother. And world of medicine, world of science has different explanation. It doesn't do it when

it comes out and sucks the thumb. It sucks the thumb because it's been doing it for past months inside (womb). But partially scientifically they explain in different ways that this is the beginning when the child is in the womb of the mother, the child starts triggering the cycle of digestion because we've seen it, we've seen videos of it, that this process is not unique to after birth. And when it's sucks they take different nourishment, different things to the stomach. They train the stomach in receiving goods, or whatever through suckling. So the child does that. Most of the time, I've seen many videos of this. They do this, (2:08) and in a way it's triggered, because when they do, they start the process of the, what you call it, digestion. And so when they come out it's just what they did before. And this, the body does that in the womb of the mother, by taking the embryonic liquid in, to test run the stomach and the guts working when the child is born. Nothing just comes to work in one go, and that's it, the first milk goes in. And this is the same cycle. But they get the nourishment through the umbilical cord, but as the child grows further in the womb of the mother most of the nourishment it needs in the form of liquid food, goes through the digestion system to train the body, for body to learn what vitamins, and what minerals and how acidic controls. It's a very pre-test run to get everything working. It's not that you... child is born and you put it on the breast of the mother and the body... the stomach of the child knows what to extract and what not to. He had a test

run in the womb of the mother. This is one of the problems with the children born early. This system does not, is not pre-tested. And we see a lot of problem with the, what you call it, premature children in digestion system, because of this, because they haven't had a test run for everything to adjust. So, it's part of the habit, and you'll find that with the Children of Mitra, they tap in a different way to absorbing energy,

(2:10) especially those who are born with Universal Energy. So, is not that they do it when they are born, they already had a pre-training. All it is now, instead of the thumb, you give them the breast of the mother. And this has a huge psychological effect on the rest of the life of the children. When it's born. A child, why they suck their thumb and how they take to the breast, the emotion of the mother has a very much direct effect on what... why the children don't take to suckling and they put them on the bottles or whatever. And it has a lot of emotion established in the womb of the mother. And ... we understand quite a bit about this, especially if you read research papers and, what they call, psychological papers of the infants in the womb of the mother and their behavior after birth. And their feeding pattern and then their social structure. I used to read huge amount of these documents, the research. Huge amount, I used to spend days and days. To understand the Keshe Foundation Technology, you have to understand the essence of the Creation, and the behavior, and the emotion.

When we give you something or we put something out, we study in every direction of it, dimension of it. You become the guinea pigs of confirmation of it. In the... We can change the pattern of the behavior of a child in the womb of the mother, by just changing the field strength of the liquid,

(2:12) what you call it, ?? liquid, the fluid. We know this, because in the trials we did with patients with connection lines, in the hospitals, in the trials we did with some governments, people around bottle feed through the stomach, they cannot swallow anything through the mouth. And, through that pipeline not even going to the food, we just interfere with the pipeline from the bottle, what we call, astronaut food, to the stomach of the person, we can change a lot of things. Even we change conditions. We've done quite a lot of research on this. Which is never released in Keshe Foundation. It's done with conjunction with doctors. They monitor. And we can even observe the change in the emotion of the person even in that condition. So, it's umbilical cord, nothing is swallowed, nothing is taken through the mouth. You interact with it, in the, what you call it, in the line of feed. Q: But where is it started? Like, what emotion is... K- It's not an emotion, it's a process of making an engine and doing a test run, before you put it on the street. It's a process which the body has made as part of the process of creation. You can't just give a birth to a child and then blah, you put something in the

stomach. You test something, maybe you don't know, maybe you know.

(2:14) The easiest way to, to ... kill a man who's, hasn't eaten for, let's say days, is to feed it a solid food, stomach is closed. You start with few drops, liquid, liquid, till the stomach gets opened up, and then you give it a solid food. It's the same process. But our system, as part of its mechanism, in its memory bank, instead of waiting for you to come out and go through the pain of the, opening your stomach, it already starts in the fluid of the body of the man. It's a process we... it's set as part of the program of the genes of the man, making ready for the next life. It's the same as you get to the old age and you become less and less mobile, and then because more energy goes into the release of the Soul, and then you are prepared to move on as a full complete structure. And it's the same we do that in the old age we gradually prepare the body to mature the Soul for it to be to take its position in the Universe. It's the same process. And when we get there, we already know how to feed ourselves and how it is. We just don't get thrown as a Soul, as a collection of the fields. And that's it. Now you try to find out what to do. We have the training, that's why we dream. This is part of the training to get ready to connect, to be ready to live without attachment to physicality. It's an interesting, cycle of the life of the man is the Book 1, 2 and 3.

(2:16) Book 1 is your physicality, Book 2 is the field you transfer to, and Book 3 is the position of your Soul

when he lands. And then when he lands there, he goes back through the same 3, 2, 1, to create from it, manifestation of a star, and then from a star to planets, and then most probably a different type of lives. And he repeats back itself again, this is what you do with Gans's. You get a Copper, you make a Gans of a Copper, and then you take energy from it, and then you do something else with it. This is a process of the creation in dimension of fields, and not the physicality we are attached to. And the brain prepares you, the body prepares, in a way mother prepares you. She doesn't feed you from her breast the minute you're born. She feeds you inside her womb, from the liquid of her life, to get your system going, the way she teaches you how to take the first step, how to take first talk, say words, the first everything, she does that already in the stomach in the womb of the mother. And the whole body works to synchronize, that when you are born, you are ready for it. It's the love of the mother. She's ?? unique. Any other question? Q: ... We have two questions, one from Danielle from the Brazilian community and one from ?? from in German,

(2:18) and it's got to do with this so-called invasion of UFOs or drones that has been taking place on our planet, especially in the USA. Do you have any comments on that? K- Not at the moment. But yes, we'll make, KF will make a statement about this in due course. At the moment, we stay on this because there is a lot of controversy on how you talk on the way you

talk. And it's strange they appear only at night, it's strange they only have certain characteristics, it's strange that the Chinese shown system like this just a couple of months beforehand, and it's strange that American government says, "We cannot detect them and many people can see it, but we cannot detect it." And there's a member of the government, or somebody in the higher ranking and said, "We have to destroy them, but we don't know what they are." So, yes, there is a lot of things going around it, but go back to the teaching. And, I think I can clearly tell you, the Keshe Foundation, in the past 72 hours or so, has made a presentation on not to be detected through military defense, in one of the leading nations in the world, by the request of them as a presentation. I hope... with... we... you have to understand the technology, doesn't matter how you do it. You call it the Aliens, you call it Americans, you call it Chinese, and... this is all part of the same process.

(2:20) You see the light. If you remember, we've shown this because we... had to go through this with government officials in the past few days. If you go back, I'll try to show you this video which was taken by what I call, our team. And then we announced, I tell you exactly where you can go, because we had to analyze it with some officials in the government about this question. Let me find it, then it's easier to tell you exactly what it is. On the 4th of June, two thousand and something, on one of the Thursday teachings I explained this phenomena. And then on the following

Sunday, on the 7th of June, we videoed the phenomena, where we could see, and where, what we call it, they could not be seen. And then this became a phenomenon now years later we see in New York and other places.

(2:22) And the government confirms that, what you call it, they have seen these objects, they cannot detect it. Because when we took this video, strange enough as I explained to the officials, we lived in the South of Italy and I videoed it. Some of you have seen this video I think, that we saw the same teaching. We saw what we said in the teaching in the skies. And then exactly five years ago in November of 2019, when we landed in Brazil, in Brasilia airport, we followed, we saw the same phenomena. Even our... the car we were in, pulled to side, we videoed it. We went all the way to the hotel in Brasilia, and it was still there. It's all videoed. The same phenomena in the daytime, as you see in New Jersey and the rest today.

R: Mr. Keshe is there a video you're trying to show or... K- No, I cannot send this video forward. I show you the picture of it R: Oh, I see. There is a picture there now. K- Yes. I had to take a picture of the video and this is what it is. We see the same thing. What is the strange about this, when I took this video on Sunday it's the 7th of June, if I remember correctly, it's got a date on it, because we had to forward it to government officials they see because they ask for, there's more into this.

(2:24) When I took this video on the southeast coast of Italy on a Sunday, we went home and I had a discussion with our neighbor about it. And he said, "My son-in-law is a helicopter pilots in Italian Air Force." And while we were taking this we could see a number of high level helicopters above this flying. That's actually the number of helicopters attracted me to see this. And he said, they've seen something, people could see. But they went above it, they couldn't see anything. And they were monitoring it from the above where it could be seen. And this we saw in the daytime. And those Knowledge Seekers which, who were with me in Brasilia, they took the video of the same phenomena. It just followed us from the airport to above the hotel we were in. We were supposed to give the conference. And it was very strange. I think some of the Knowledge Seekers can give you a full video of this in Brasilia. And this is the same phenomena now they see it at night. The strange thing about it is this, what you call it, this video was recorded in, what you call it, June of two thousand and of... I tell you because I got a video. I've got a video here 7th of June, 2015. If you Knowledge Seekers go back on the teaching on the 4th of June, 2015, we spoke about this. And now you see it in, what you call it, in,

(2:26) at the night, where the Italian Air Force confirmed, we got a confirmation of it from their pilot that they could not see anything, it doesn't exist on the radar, but people or the military were telling them

above that people are observing this light. It moves, it doesn't stay steady, it's stationary. And this is one of the things. So we are talking to governments about this is very clear, the structure. The technology is well known to us. And I had to explain this to people who run a nation in respect to this. It's very easy if you understand the plasma technology. Go on the 4th of June, 2015 teaching you'll find the answer. So that's why I said, we don't want to enter discussion in this with something and now it's taking a political angle when in fact it's different things behind it, and I'm sure some of you will understand how and the way it comes, why they can't detect it and they don't have the technology of it. You Knowledge Seekers know the technology and the teaching of that time. But they do it at night. But the night version has a different structure. But it's the same principle. R: Ok, thank you. We'll wait for further information about that later apparently. And I'm sure people continue to be curious about those.

(2:28) K- It is, it is a, it is a change in the course of humanity. If people understand it and the way it's done. But it's a change in the knowledge. It has certain implications, it has certain applications. But as always, I have the recording of it, there. Ooh, just wait one second. I just seen something from one of our Knowledge Seekers. Can you send this to Rick, to show it please, Rafael? Rafael was with us, from Brazilian community that day and it's been videoed, and he just sent me the video. Rick, if Rafael can you

send this video? Oh, I'll send, I'll take time, it takes on my bandwidth. Can you send this to Rick please, then Rick can show it? R: Okay, I've got it now, I'll put it up. K- This appeared when we landed in Brazil, Brasilia airport. And as you see, we were in a car, we videoed it. I ?? even went to the hotel. It was still with us in the hotel. << Rick show the video of the UFO >> K- I think he might have a second one to show you from where we are outside the building.

(2:30) This, we understand this phenomena fully. And this is 4 years, 5 years later, than the one we took in South f Italy, which you saw the picture. The center, the light it sits in the center, and depends how it's organized. You cannot detect it. The physical material sits inside, which creates this condition. But from outside, it's not detectable, and the ring you see is the interaction of the fields of it. It's very much like a Black Hole. It absorbs everything, that's why it cannot be seen. And you see in this sphere around it, the darkness compared to the light on the edge of it, which is again, you see, like a cloud on the edge. The, I don't know if I can annotate on this one, but, you see the brightness, it's on the, it's like a, the, the mist over the Sun we see, that the Sun flares, on the edge you see it, this shows interaction of the fields, this confirms confirmation of existence of UFO's, what we call, plasmatic flight system. Because, you have that darkness between the center which is the center, and then when you put three of these together, you get the, what we call, the Universal Systems, the structure

of the flight system. And on the edge, that misty cloud confirms this is a Magnetic plasma system. Because it interacts with its environment, and it creates its position. Jalal just put it up, 64th Knowledge Seekers Teaching it's in there. But, this is what we took, when we entered, what you call, Brasilia. And the same four years before, we seen it in South of Italy. And you can, scientifically as a plasma scientist, I can explain and you can see. This is the building, now the second video. Still following us to the hotel room in... to the hotel where the conference used to be, in Brasilia, literally on top of the building. We are messengers of the Space, with us goes our message very direct. This is video taken by Rafael. You can see the interaction, you can see the fringes, the change in the color, and the mist around the edge of it, confirms plasma interaction. It's like the Earth, we just have that cloud on the top, and we see it on the layer of the Sun. Thank you very much. R: There's one more Mr. Keshe, let me share that. K- That's at night again in Brasilia. R: It's a video that doesn't want to play, but I'll just scroll through.

(2:34) K- This is not the Moon at night. You see the same system. The Moon does not shine over a night like this. And again, if you look deep inside, you see the same circle of the fields and the interaction with the ?? sides. (Rafael, can you send both of these to me, please? I was looking for these but it's not on my recording). Now you understand, you don't need to go to the Americans to find out what it is. Go back 15

years ago, 10 years ago, it's been taught in the Keshe Foundation. And then you don't need to make a system to find them, to destroy them, you just explain to them this is the knowledge. As our friend Jalal has already written in the Chat. You might get his, what you call it, his chat. He says, it's on the 64th workshop. Starting at 1.03 minute, teaches about this technology. Knowledge Seekers are 10 years ahead of the Americans, who don't even understand it now.

(2:36) Any other question? Q: ... I have two questions but I think they're the same but what is the difference between Carbon 16 and Oxygen 16? K- Huge difference. Huge difference. Q: Yeah, you said that last workshop. K- Yeah. Oxygen is a matter state, Carbon 16 is an energy state. Q: Is it just the difference of environment? K- No, no, no, no, no, no, no, no, no. It's the structure. Field, magnetic field structure interaction. Totally different. Totally different. It's different understanding, it's a different concept. It's a different, what we call, phenomena. Q: Okay, so that leads to my second question. Is there an aspect of energy that is different than what you have always called the strength? You've always taught us about the different strengths of energy, but is there an aspect of energy that is different than that strength? K- One is the Inertia of the Universe, one is the Inertia of the planet, totally different things.

(2:38) In a teaching before I explained about Universal fields, Universal Inertia and... Q: You called it a plasmatic Inertia? K- Yeah. And man does not have

that knowledge in his what you call, arsenal to be able to replicate it. In the future in the teachings I'll show how it's done and I'm sure very soon we show this to what you call it, a government. We are pushed into this position at the moment. Q: Is it an aspect of emotion? K- Hmm. You, when you put aspects of emotion to it you call it dreams. To the energy of the body of the man, this converts and you call it a dream. To transfer energy of the field of the plasma, let's say, from your mother to you, it's like the transfer of the energy from the Sun to the Earth. It depends what Inertia hits what package it becomes a gold, silver, or whatever, and you recognize it as a silver fell from the sky, or the powder, or gold, or whatever. In our brain, we have certain Inertia levels for the emotion of the mother. So when that field comes, the Inertia, the field strength of that, converts, oh, or this is mother. You understand? This is how it works. This is how and what it is, is what we create in the Inertia, the love of the mother, the field of the Universe. When it comes to us, in our interaction of the field of our Soul with her,

(2:40) it converts it to ?? a body of the man, in on the Earth, with the gold, but to your brain, because it carries the field strength of the mother, you see the mother. That's exactly what it is, that's all it is. And scientists have not understood this. We're entering a world of new science and technology. And as I told you a lot of us will not even look, the matter state of the things, because it's literally impossible. In next few

weeks you will hear massive change in this position, in respect about World Economy. It will destroy a lot of things which we are used to habitually, by just understanding the truth about our own creation. As I said to one of the World leaders, officials very, very recently, man adores gold. With the knowledge we have, we can create a condition that man sees gold, (he'll) just walked away from it. It becomes the biggest thing man will hate, because with it he has seen a lot of possession of it, has created a lot of pain and suffering for the rest of the other humanity. The time will come that when man sees gold just wants to throw it away because it's a bad omen. And we are reaching that point. When material, materialistic things have no value. To wear a gold, to have a diamond and the rest of them. We are reaching that point, partially through technological transfer, partially through understanding more of the creation. You just look at the diamond. Diamonds, 10 years ago, you paid a fortune for a diamond.

(2:42) Now with the new diamond created out of Carbon in systems, you can buy shoes packed with diamonds for less than a thousand dollars. True diamonds. Because now we understand the conversion of the Carbon. Very soon, you paid 1 million dollars for a diamond on your ring, I can make it for 10 cents. Then it become devalued. The same thing will happen with gold, the same will happen with a lot of things which we got attached to. In next, very near future, we will literally annihilate the petroleum,

not just by fighting, not just, not by introducing, but by you understanding yourself, how you can make it in the kitchen. If you can produce a liter of gasoline in your kitchen for less than a cent, and you don't tank at the petrol station, do you think they're going to work? The control of man through energy has come to an end, we just need time. Just need time, for the World Leaders to understand this, control of the man through finance. Q: ...

(2:44) Thank you very much. Mr. Keshe, my question follows on from a previous question I asked some time ago about the Soul of creation, the Soul of totality, and the Soul of existence. The fields of a plasma rotate in all directions simultaneously, right? Is that correct? K- Depends what direction and what you're expecting of it. Planets usually have on the outside appearance one directional move. But inside does not mean they're the same. Q: Hmm. Okay. When you have a dynamic triple layer of a spaceship, for instance, it's interesting, because of the videos and the pictures you showed earlier on, it's interesting how the synchronicity of them is related, I feel is related directly to these questions that I wrote down at the beginning of the week. How does the dynamic triple layer, the ultimate manifestation, rotate in the way that it does? You have a triple layer. You have... and they're not... they're working... even though they're going in opposite directions, the middle layer. How... why are they... how are they working consistently and not working against each other? K- The fields decide.

(2:46) The strength of the fields decide. And as I said, we have not taught you everything. We have not taught everything that you can. Rick is showing you the dimension of the poles on it. If you go back on some of the NASA, what you call, Universal fields, you see this. In a way that NASA has recorded galaxies, which are collection of galaxies, which are rotating opposite direction of the rotation of the Universe. The fields, the size. The strength of it dictates that. This is why half of your brain is different size to the other half. And one works in one direction gives you the left arm and the one goes the other way gives you the right arm. Q: Would you say that the, so the outer layer is magnetical, the middle layer more gravitational and the inner layer uh magnetic... K- No, no, no, no, no, no, the field balance decides, the field balance decides, not anything else, nothing else. It's how the field balance in the structure of the body decides.

(2:48) Nothing to do with anything else. Nothing to do with anything else. Q: The dynamic triple layer of a spaceship, it provides significant protection to live and move around the Universe and the Unicose. So why are space viruses dangerous? How are they using the manifestation of energy packets and energy transfer to prevent the dynamic layer from providing protection for the totality of Souls within? K- It all depends on the field strength. All, all depends on the field strength and nothing else. And that field strength to you might be a different, or creates a different emotion than to me, depending on the field strength of me. Q: All right, just

lastly, just quickly, as related to what you were talking about, the one about the water holding it in your mouth. Could you possibly just expand on that little bit, as I've run out of water and interestingly enough even though it's one of the things that's going to keep me alive it's a very long walk to go and collect it from a well and for some reason I don't feel like taking that walk. I don't know why it's not suicide, yeah. I'm telling you now, it's not suicide.

(2:50) But I just don't feel like I should go and get it. So with a very small amount of water that I've got left, could you explain how I can use that to last? K- Depends what you understand on the creation of the field. Because the water is not in the well, the water is literally in you, inside you, around you. Because that's what the moisture is, we got a humidity everywhere. And so, you have to learn how to create the demand, or a need, or a field, or gravitational pull at the strength of the water. Even on what type of water, you want a sweet water, you want a salt water? And this goes back again on the teaching of understanding the process of the Creation and the need. We've seen Knowledge Seekers who been with us in technology, in sessions ... with technology in Linz, which they received so much water they could not swallow, it was literally choking them. So, but what is that water you're feeling in your mouth, is the water you want to wash your dishes with? How much can you spit? You understand? So, you have to find the essence of it, or put the laziness aside and walk to it. Q: Well this is the

thing, right? This is what I find interesting. I don't... I don't understand. I... I kind of do... It's about trust, yeah? Because I trust my totality of Souls. Because I trust you. Because I trust the Knowledge Seekers...

(2:52) K- You see, the trust is different than knowledge. It reminds you of, as I said many, many times, of the couple in Barletta. And I said, "If you put a cup, you can move it." And the guy was shoving his head ?? and everything, the cup is going to move. I said, the guy hasn't understood. Show the love I need, I will enjoy the satisfaction of. And you get it. But it's a world of give and take, you have to give to take something and what do you have to give for it? And you never work on the work of, oh if I give I take, it is, what I give I don't care what I take, because my job is to give. Q: I'd like to be in a position that... put to the test. K- I'll read you, I'll read you something... I'll read you, this is from one of our dearest Knowledge Seekers in the past. Maybe past few days. We try to help, when we help, a very critical condition. And we're talking about a professor, a very highly educated person. He, the person wrote back, "Dear professor, thank you so much. Words cannot express my gratitude." And my simple response was, "We are here to serve."

(2:54) If we understand the logo of the Keshe Foundation on the front page, in true sense, then you have ?? understood why the Keshe Foundation is here. You don't serve to get, you serve to enlighten. And this is where the problem comes, with most of the

Knowledge Seekers. And this is what we have done this. This is why we introduced these new Headsets and new systems. Those of you who come to receive these new systems, especially the Headphones and the Handset phones, it'll change your world. It will change everything you ever considered. It is important in life or existence. If you to tune into it the right way. I don't want an apple, but it gives me pleasure to receive that I can survive. Two different things for the same, but I have put myself out for whatever I don't need to be taken. Any other question? Q: ...

(2:56) I'd like to understand more about the eyes, the eyeball and the eyes of the Soul. If you look more closely at our physical eye, we can see it as if it were a Universe full of stars, colors, and her pupil like a black hole. You explained about the eyes in the 489th Knowledge Seekers Workshop (KSW), but I still lack understanding, and if you'll allow me, I'd like to return to this subject. I don't know if this is exactly the best way to ask, but I'd like to understand more about the importance of our eyes and how to use them to help us to transmute, how to make better use of the white and colored parts of our eyes, and how to open our second sight, and how to practice looking at life with the eyes of the Soul. K- Ah! Look at it with the eye of the Soul, eye of the energy, and not the eye of the ?? matter. We really don't need the eye, the way we are used to it. We can see physical world exactly as we see with our eyes, if we increase the strength and change some things in the structure of our

understanding of the World of Creation. When you're traveling in the plasma, when you're transmuting, you have no eyes,

(2:58) but you recognize everything about the person, the taste, the smell, the texture, the intention, the emotion, everything else. Why do you need the eye?

R: There's a school now that teaches kids how to go about without their eyes. They put a blindfold on them and teach them how to read, how to look at play cards, and tell what the number and suit of the cards are, and to be able to walk around in a obstacle course, and to do sports and other things while they're blindfolded. And it's a... K- It's this woman who does this, isn't she? R: Yes. K- She's... this woman is ??.

I've been watching her, how she's doing it. It's amazing. But you have to pick them up when they're very young. R: Yes, that would be it, before we get programmed to believe that. K- To believe the eyes, yeah. She's doing an amazing job. I watched a lot of her work. It's doing... but the perception of the children are very different. These children are totally different in attitude. R: Yeah, we would have to undo a lot of our attitudes and programming in order to get to that state. But is that not sort of what we are trying to do?

K- More or less, expand beyond the dimension of visual. And the interesting is this group of children, have totally different social behavior. Because they're studying (teaching) them in, just by not being able to see, but they're studying them how they behave in

society. And in their family condition. It's very interesting.

(3:00) If I remember correctly, when the parents can't find the key, these children find the key for example in no time. When something is misplaced in the house these children, they don't look, just go and pick it up and say, "Mom, is this what you're looking for?" With the eyes closed. Yeah, I've been watching this, it's very interesting how this lady is doing this thing and how it's expanding the field strength, I call it. Any other question? R: Yes, that's right, and I've also heard of a case many years ago of this yogi or guru that came over from the east and lived in New York, and apparently he could drive a car in New York in and traffic with a blindfold on. And that always impressed me as something that maybe we could all achieve, ultimately. K- With the Visual Units which will be added to this system in the coming time, most of Knowledge Seekers will be able to do that. R: Some people already drive like they have a blindfold on, but they don't do a good job of it. They're practicing blindfold driving. K- Blindfold driving, yeah. I think some of our world leaders run in their countries that way too. R: Yes. Sometimes they think the more they're blindfolded, the better off they are. K- I think you got one of them in your country, huh?

(3:02) R: Oh, he's got a situation on his hands. Finance Minister resigning on... just before she was about to announce the annual budget. So, this is a big

message. She's the most important person in the entire government and she resigned right before her big speech. K- Yeah, but it's part of the way. There was a topic that if we bring the face recognition and ID that no one can cheat in elections in US. And yes, but can you bring that to the rest of the world, all the countries do the same? In some countries elections, we get 110% votes. Even the dead who died two years ago is still voting. So, it depends how your nation voted for whom to come into power is. And this is your problem in Canada. And most of the world. R: Yeah, the whole election process is defective basically. I worked out the stats and the leading political party only got in with 16% of the people of the country voted for them. If you include children and other people that don't normally vote and even the voters only voted 33%. So one third of the population voted and they get a majority somehow government even though only 16% actually supported them. So that's doesn't make sense and they give you two parties to vote for in almost every country now... (3:04) K- This is democracy. R: Yeah. But I think that's is about to change, especially with the Elon Musk getting involved, it'll be more of a bit chain type operation, where things get recorded and there'll be permanent records of such... K- There is a big flaw in this, depends what they record. They... he's trying to bring in the process of the Bitcoins, that everything has recorded, cannot be erased. But it depends what is recorded and how it's recorded. And ?? what is

recorded. ... It's good for them as long as they are on the winning side, when they start losing with it, there's something wrong with it, that's their pattern. But there's a very big question talking about this, what is the purpose of election? And the other question will come and man will answer this in next 50 years we have no choice, because of the connection of the communication, everything else we'll see, how you say 16% of Canadians voted to get this guys into do what they like, the other 85% do. How would we vote for a world leader? Somebody that all the leaders of the world will listen to. The kings and queens and the presidents become part of structure to world government. And what prejudices will we bring to choose such a person? Is it black, will the blacks vote for him, if he is white, or do we vote for the Soul of the man who is elected?

(3:06) R: Maybe we won't elect a man, maybe it'll be an AI that'll give us direction. K- This is what I said to them. If you give emotion to AI, will you still have the same condition of AI? This AI has no emotion. The present AI is just repetition. Copy. What happen when you give it the emotion? This is on the card. In the upcoming time, we'll open this Pandora box of emotion with AI. And how, what needs to be done to bring the emotion, then you get something near reality of the befitting man's behavior. A beautiful life is starting in 2025 and let's see how it'll change things. There's a lot on the horizon for the change. Q: ... What's the Keshe Foundation's vision for the year

2025? K- According to those who understand the Holy Script (Scriptures), this is not my ?? saying for it, those who understand, have been told in the manifestation of Messiah, that they believe in strongly and they have taken steps for it. Be it the Islamic world, be it the Christian world, be it the Jewish world. The... those who understand the scripts, are marking 2025, as the year of the peace, the 'Year of Manifestation of the Messiah,'

(3:08) or what you call the Knowledge. And many of organizations have already planned for this. We know this first hand, it's not just something to talk about. And I know Vatican has taken huge steps for this. In some directions, mass resignation of the priests, or people who lead the faith according to their belief. The biggest problem has been up to now that anybody came out with anything was imprisoned, killed, and the rest, because the clergy could not accept that it's the end of their term. And now most of the leaders of the different path have believed that the time has come, we needed to bring that change in this time for it is there. They refer to scripts and manuscripts and everything else which are there. So, if their, if their belief as a religious leaders is true, and they've taken a step to do it, then we should wait for a massive change in 2025. But, again it's their path of belief, with what they recognize. And there are talks then, between different religions, how to react when this happens. They're preparing interaction between religions, because once one announces the position

of the what was promised is getting fulfilled, the other one cannot say, because the other one can prove. So it brings the religions into conflict, and they are doing it that there is no conflict.

(3:10) And essentially we'll see Changes in knowledge. We'll see changes in the perception of the knowledge and addition to the knowledge, not breaking the old. In 2025 we'll see emergence of the Universal Community amongst us, because now we understand, we are prepared to change. We'll see changes in leaderships, more collective leaderships than dictatorial leaderships. I think we've seen the last of the wars, there is one or two left which I know is going to pop out, especially in Middle East and in Far East. The... there is a need for evolution in science if, for example, As I said, the American administration, the new administration coming in, cannot deny the new technology, if it is set to bring World Peace. Because, World Peace means elimination of arms. World Peace is not to make arms, spend the money on the citizens than in killing the others. And to do that, you have to put an alternative on the table. And that alternative has to be viable to satisfy, not only the financial need of the man, but the intelligence of the man. You cannot put a professor in Space, into the farms to do the farming as I said before. So it needs a lot of tactical moves to be able to deliver, otherwise it will be hollow. And AI does not bring that.

(3:12) And weapon technology does not bring that. New weapons does not bring that. And as I said to

one of the world leaders very recently in the communication that you develop the most advanced thought system, advanced satellite system, and I put one plasma system next to it, it's worth nothing. Because you can jam it, you can block it. As I said, we were supposed to give a presentation to a military part of a nation this week, about the start ?? of the technology. So it does matter. We have to bring. This is one of the reasons we have introduced these new systems even today. The beauty with the thing is, I wish, and it appears. And it appears on the time it has to appear. Not a week later, not a week sooner. And it is the way it has to be, and it comes to be. We have to have these Headsets on the table. You wanted it, this is it. You want to feed your nation, this is it. It's done by knowledge. You Knowledge Seekers do not know what you have done for humanity with everything you did, the little Gans's you made, the little system you tried, the system you bought from us too, you've done the clinical trials, now it comes, this is it, you are there to give the evidence of it. We had it this week with our Knowledge Seekers.

(3:14) We did some work months ago with a group of people, extremely, under supervision of the one of the international companies in the world. And this week we went to see what happened. We went to the people who went, were part of the process. And we saw the change. Something we did 4 or 5 or 6 months ago. And we saw the result is still there, people living a different life, they have better life, less pain, less

everything else. And what I said to our Knowledge Seekers is, take these videos and go where you go, because they want evidence this is what they've done themselves in your country. Because the evidence comes from you Knowledge Seekers. It's just like a few minutes ago, when I explained to you what you see in New York, we have explained such and such a date. It took Rafael few seconds to come up with the videos, what I told you is there, is there. Now we can explain this to the people, we can explain this to the governments, and then you understand there is no mystery about it. But the mystery with it is that, when we tell the government is that we tell them, do you want to know? Because we know the secret, we know the method, we know how it's done. And this is the game changer. Now we have to become wise and the World Peace, change of the world is still there but we have to, we have to...

(3:16) The biggest problem for us in humanity to reach World Peace in 2025 is not the technology, it's our world leaders and their egos. That's all it is. That's all it is. The fear of what they've done, the fear of what they might do to them and the ego, what they expect. And we will see, we might see, what I call, skirmishes for some leaders who want to prove they're now they are in charge, but they don't understand the charge is already gone, they have nothing to charge, to be in charge. And how they share, how they destroy other for them to be in charge. We are monitoring these world leaders. You have, you have to understand

these people are slave to what they've done in the past. Does not matter how much they change today or want to show the change, but they're a slave to the behavior of their past. And doing the world leadership in certain areas, or do we need to bring new changes that the world leaders change with. And does one opinion counts more than the other, or we (all) are equal? The biggest problem for our world leaders is nationalism, and using it to create separation. Once the religion come to accept the end of the term, nationalism will go with it. You will understand how when the time comes.

(3:18) 2025 could be a huge game changer, but it's taken centuries to get it to. And what we saw, what's happening in Middle East in past few weeks, past few months, in past few years, in Far East, what China is building up to be. Can we ask President Xi of China one simple question? I know they're going to block it, I know they're on the line. Can we change spending money on weapons, missiles, cruise missiles, and put that capital in feeding 28 million farmers living on the poverty line and below? Can the American government, upcoming American government, put the guns away, and the money which is spent on armaments and military, to kill others in other countries, to feed their own? Do we need to make, to build concrete walls to separate nations, than bring the bridge of love and caring for each other that there is no borders? And these are the questions we need to answer. Over 1 million people have been killed in

Ukraine in the past year, two years. Only Ukrainians, we do not know the numbers on the Russian side. Estimate around about half a million. Officially we know 580,000, 90,000 soldiers on the Ukrainian side have been killed and plus,

(3:20) put one to three soldiers, to two civilians, gives you another 1.5 million people. In one country in two years, on what basis? Claim on land? Claim on what? And why Biden's team has to line their pockets with billions from the killing of 1.5 million. It's simple, it's our world leaders we have to change and our own in ending racism. 2025 will bring a lot of these things down. When you don't need to get the Brazilians to make grains for the Chinese, where the Chinese can link into a system and get their food. What you see on the table, what you see on the screen, is the future of the humanity. This is the future of where we land. Do we need to put slaves for other nations to work to feed for them to get you something for you to eat? Would you get rid of the currency? That's definitely on the card. How do you value me as a doctor for 100,000 in Europe per year, the same doctor doing the same job half a million in the United States, and the same doctor in Africa for 3,000 a year. You take a gynecologist from Africa who's earning 3,000 a year working in conditions not good for humans, or 5,000 a year into England the same doctor doing the same thing in teaching English and he has 100,000,

(3:22) dress him up a bit liberal, and what we call more free and take him to America and he gets half a

million a year. Shouldn't be that we value our doctors the same the one in Africa, in England and in United States or get let's say hundred thousand a year. You think the African doctor will leave Africa to suffer and go to America? Or will learn from the American, what you call, the African state in the past few months, how the leader decided we are not going to get dictated by the others and he paid 4.8 billion debts by the nation to the world citizens says, "Take it, I don't need it." Just go and read. They don't tell you that much about it, but he went internally, a military leader. They first wanted to put pressure on him to do what they wanted him to do, and put him on the burden of debts. And they put him on the sanctions says, "You sanctioned me, you sanction my nation." He went to the nation and said I want to borrow from you, instead of borrowing from IMF, to build the roads, to change the country, to pay the debts. And the nation raised 4.8 billion plus and they paid their foreign national debts without commitment to no nation. And now they want to kill him because now the West can't control it. What happens if the next African nation does that in the next year? Monetary control has to be equal for everyone. If the road sweeper, if the cleaner is not there to clean the hospital, you die of infection.

(3:24) So, the doctor can do his surgery but there is no cleaner to clean, disinfect. So, it's the job of the cleaner less than a doctor because actually no more important, because that disease can kill you, the doctor can just do operation, a little thing. How do we

value ourselves? Do we connect ourselves to monetary funds? We are becoming people of Space in 2025, how much wages do we pay to our people in the Space, which there is no bank and there is no shop to shop? In the harsh realities which technology will bring us, we may have to face it. And 2025 is a... is the change, is the Messiah of the years in a way, the technologies, emergence of new technologies which they had no say because they were scuffled and put down, will bring change. We will see the end of Musk, the way it is in next 5 or 10 years, because one are his technology, unless he changes his ?? to the new technology, ?? are obsolete. The obsolescence is here in front of you. Do we need satellite? Do you need a headphone to speak to the other one when you feel the emotion? You show me one single telephone line which you can feel the emotion of your partner. You have one satellite that can tell you. You send the other Headphone to New York and you are in London and you feel the emotion of your child across the world. And you don't need to speak, because you speak in the... Is there ?? any satellite? There ?? any satellite? It's the end of 500, ?? 1,000 satellites in Space. And how do we connect to each other? The system is there, we just elaborate on. You look at the cars, in the new system, which is on display, it'll be tested in the next few days, in one of the leading nations in the world, from the Keshe Foundation.

(3:26) It will bring the end of fossil fuel. We are going into bed with the world leaders. Then what happens? What's next? Do we need monetary funds? Do we need to pay to live? Why do we have to live 24 hours a day, worrying about when the next bill comes? Then, actually we enjoy to live, there is no bill to come. But we accept the commitment to. This is what the change is. And it's us not getting fooled and us not misreading the position. This is the biggest game in 2025. And this is what 2025 will bring. And we see the beginning of the end of the religions and 90% of the wars. Then it's the kingship, which goes with it, because most of these kings have connected themselves to a religion which gives them an income. They uproot themselves. We don't need to do anything and the process has started. The biggest economy in the world will... has to find an answer for some 40 million jobs. If they want to give them World Peace, or they create wars. And new jobs means new technologies, and new technologies means new opening, and then it needs education. And then, there is educational systems, like, what I call, like 'X' and the rest, become platforms of teaching, international teaching, and we are building into it. The platform where we teach, and the world listens, reads and follows.

(3:28) Everything is ready for that change of 2025. We have the right leader who wants to press with Peace, we have the right people who put all the systems in for educating it, and we have the technology to be

educated with the demand changes. It's going to be a changing world in the next 10 years but, how much will you recognize, how much will you resent, and who was there, to resent or to see a loss of it? 2025, is an amazing time. It's a completion, if you understand it different way. Two and two makes four and a five makes nine. And then, we see what happens to the next step. Shall we call it a day? Q: ... In the Keshe Foundation Store there's a Microplastics Gans, will you ask Mr. Keshe to explain what is this for and how do you use it, please? K- This is for microplastics because we all carry microplastics, we had teaching on this and that's why we launched it. This is set to be able, this is (for) a trial case, that we can transfer energy,

(3:30) the plastic in our body is not in the shape of plastic, in the shape of a plasma, but when you open the brain you see it as a plastic. So, this is what we have to understand. And, we don't have islands of the plastic, we have islands of the energy of the plastic, which condition creates, it becomes the seed for cancers, or everything else. So, we developed a technology, to transfer these energies at that field strength. The way you taste the apple, we have delivered the technology which we can move these out of the body, as a field, not as parts. And how they manifest themselves outside the body, that's depending on the Inertia of the environment. And then we want to see what emotion changes it brings you, because now you don't have short circuit of the

Carbon of the plastic. Do you feel. This is where you see the change, you... your emotion, your habits of eating, your interaction with people. That is the evidence of the depletion of the, what we call, extra C-H bond. And you just use it as a... as you know these are all as a... the water containments which we sell with it. And you use the water of the, what you call, field transmission transfers. And, this is what you will see, how you change your habit in eating,

how your breathing changes. This is a clinical trial. And then once we do this, we promote in a very big way, through the other direction, of the work of the Keshe Foundation. Is not that you will see buckets of plastic next to you, as the energy changes in plasma, you see their behavior. And that's what we are looking for.

(3:32) Q: ... How about the Heat Gans, some confusion about its purpose? K- The Heat Gans is about the... usually when you have a (burn) damage to the skin, or to the body, you feel a heat pain, and that's... that's for, what you call it, understanding that part of the work. It's not for heating you up in the cold. R: So would it be good for inflammation for example? K- We don't go into the medical terminology, it's for transferring energy. Energy creates fields and with it creates emotion and it's more or less for the purpose is done. Q: ... If you buy the Twinity MaGrav, do you need to use or buy the Twinity Gans's anymore from the store? Does the Twinity MaGrav give you what you need, the body, Soul and the STM. K- Twinity

MaGrav is a platform test for you. It's educational and then other parts are added to it. Everything is called "Twinty," which means it needs two sides. What we call it Twinty, it means having two that the field motion between the two creates an effect. All the Twinty systems we introduce is creating two different field balances that their motion between the two moves the energies which is within that field from it. It depends what you created the motion and energy to be in. There is no other way to call it.

(3:34) You have a, how can I explain it, you have the field difference if you understand the principle of the plasma, and the motion between these you can fix it to a certain field strength that only that attracts. It's not like if you put a Twinty, let's say, love on your leg, your legs start dancing loving. That field strength is done for the emotion of the heart. That's where you feel the love. So it's very specific, but you need, Twinty means you need two to tango, as you say in English. When you put one patch, where does it interact, where does it go? You put other patch to show this is a confinement, this is what I expect from it. That's what it's called, Twinty. Look at the headsets you have, it's a Twinty but in a way field strength is dictated by the one in the middle, actually the two Headphones are the receivers of the energy from the center which sits in your brain. Those of you who buy these units, do the test which I told you years and years ago. By a Twin. You have a Headphone, adjust it till you don't listen, you don't hear any more noise in

your ear, but you hear the music or the voice in your head. Then you adjust, you put these Headsets on in the same way till you feel it. You feel the click, you feel the energy transfer, and this is where you want to be to get the full benefit. It's a, it's an amazing system this.

(3:36) I want to know those of you who buy, as I said, it will be a limited edition of these, we can't ?? bid, it takes too long to build this. And I want to know, what do you feel about your partner? And what she says, what she felt, do you need to communicate (talk)? Or would it increase your affection and love for each other? Because now you understand and the Soul level is totally different. These are not the Cosmic Ray Bundles which is connected to our system. They are connected only to each other. Would you... if you feel like a steak, would you put it on a cow you have in the farm and then you feel the taste of what you wanted but the animal is still standing? Would you have a cat and you put it on the cat and the pain of the cat goes because it's your love to it? Would you put it on the plants and you get the essence of the fruit on the plant without picking it? As I said, when you kill you're a murderer. When I kill myself it's a suicide. You need the apple, you take the energy off. But it's the apple tree who decides to get rid of its apple, it is not yours and what's the purpose of it. And this technology today on the table what you see on the screen will change the humanity, we know exactly ?? where. Shall we call it a day? Q: ... How about one final

question, a quick one. Is there any status update for the Cosmic Rays materials delivery which can be announced? K- The Ukrainian company has posted the first batch of boxes out yesterday or today.

(3:38) And once it arrives and we start doing it, yes in January you start seeing it, it's coming in. The, it's a very international affair this thing. The boxes comes from Ukraine. These will deliver in a sack, in a cotton sack. It comes from Romania. The material is made in one place and the machinery comes from another place. And it's literally an international collaboration to get this out that you literally enjoy the existence of it. I held them in my hand. I took them with me to China. I had two balls. And what you taste, how emotion changes in you when you hold them is amazing. But yes, in January we will be waiting for the Ukrainian company to deliver the boxes, they should be here by the first week of January after the holidays and I'm sure by the second week we'll receive the packaging which they go in from Romania and then we are set to go to start delivering. We have the materials to do and we're still producing the materials. Yes, it'll be done in January. Thank you very much. And wish you a Merry, Merry Christmas and a happy one. And foremost, I celebrate the birth of Mitra, which is with us on the 21st, and the rest which follows to copy that. Have a nice beautiful holiday those of you who believe in the path of Christ,

(3:40) and a Merry Christmas to you.
