Part 1

(:22) K- Good morning. Thank you very much. Good morning, good day to you. As usual, wherever and whenever you listen to this series of Knowledge Seekers, from Keshe Foundation Spaceship Institute. Yes, we are back, another year in the Christian calendar, and soon in other calendars, the Chinese, and then the, God knows, the Iranians, and the Arabs, and the rest of it. And we keep on celebrating New Year's, and it adds up somewhere together. Yes, 2025 is a very strange year, because when it coincides with other calendars, it brings out some magical numbers. This is first time this century, which we add up as a double digit, square root, square of many numbers and it adds up so many if you go by the square of 1 to 9, total sum is 225 and a lot of people think, it's a square number and a right number, which makes the 9 the completion, and coincidentally, it's the same with other nationalities, or what they call it, cultural beliefs, some of them add up to nine again, which is the completion of the cycle. So we'll see what 2025 brings. It doesn't change the creation of the Universe (U), it's something just in the head of the man.

(:24) I have to apologize for last week, I was very bad, not by viruses but by infection, which was caught somewhere God knows where, but every now and then we get the human diseases where viruses don't touch us that much. It's beautiful to see how the cycle of the plasma will bring us back into many, many

dimensions (D). If you consider plasma the way we describe it as a collection of fields in working in coordination with each other. You'll find a new dimension in the science. What does this mean? If I can manage to separate one field from one plasma, and be able to manipulate it, be able to give it fields energy to elevate the strength, or take from it that becomes part of me, then the science of Creation becomes extremely interesting. What does this mean? This means if we can separate one strand of magnetic (M) field. One line of it on its own, be it coming to us or going away from us, and be able to add to it, or given the strength, or take from it, in a way that we control what we take from this line, then we understand the process of Creation. This means that we understand how to create.

(:26) The creation does not mean observation, detection. Creation means that affecting other fields, other conditions and creating your own environment. In a way we manipulate the field strength, but at the same time to manipulate it we need to bring additional energies, additional magnetic fields in motion at the strength that can interact. This is a cornerstones of man capability to travel the span of Universe. Why is important? When it comes to the 'end game,' when it comes to the time when we want to travel from Mars to Earth, from Earth to Moon, we don't need collection and collective fields. We need one field which interacts with the place, time and position on a specific point in that target. Which lands us exactly

where we want to be. Because it has its own fingerprint of the strength. That's why it's that position on that surface, on that environment. So the next step of the knowledge in the coming time for Knowledge Seekers (KS) to learn is separation of fields. Individual fields.

(:28) And then manipulation of it. To travel on it, to come back on it, to take energy from it, to give energy to it. Singularity of the fields. Up to now when we speak about the plasma, we speak about collection of fields. Now we have to understand the singularity of fields. As we know every line of magnet is connected to another end magnet. Identifying the strength, which one and to what limitation we want to use that field, is the 'name of the game.' Now that we understand more of. In a way, you want to go from, let's say, London to Manchester, you have one motorway, which links you direct. You have to find that motorway, for you to go from Mars to Moon, from Moon to another point in the Universe, and land up in this place where you want to be. You don't want to get on any motorway and end up in another city. Your destination is a certain point. We have to find these highways of the Space. We have to educate ourselves that we don't end up in the wrong place. Separation of the magnetic fields and understanding the communication line, is one of the crucial part of the technology (T) which will be upcoming in the teaching of this year. Which means I want to land in such a building, in such a room,

(:30) in such a city, and not on another planet. That position is like a fingerprint, it has a specific strength. How do we detect it? How do we know where we land? And how do we know that in landing we will have everything which we came in with? Do we become another carriage on the bandwidth of the fields? Or do we become a field ourselves attached to that field? You have to realize, the information of the life entity, has to be carried on a single line information, single line magnetic field. And that is the secret of the Space travel. Otherwise, you're an object, you'll have resistance, and then in having resistance, you have to overcome it means you have to tap to other energies to be able to keep up to where you want to be. And if you understand this process and if you can analyze it to reach a single line of energy containing all what is needed then you understand the process of the Creator and the Creation. This is why we speak about God being single. Because everything else along that single line is carried, then its interaction and division leads to the creation of life, the Universe, and the rest of it. In the process of transmutation, in the process of transportation,

(:32) man has to become aware of the dimension which he works with and within. As we always say, transportation is a condition of the matter state, transmutation is a condition of energy state. And both are right, and man has to decide to understand both knowledge, energy and the matter state. This is one of

the biggest problems of today for man who cannot understand the science of plasma, because they cannot distinguish between the matter state which is the same fields but in the point of observation, and the energy state are the same. What does this mean? And how much man can manipulate the energy state in a singularity, will show the intelligence of man. Understanding the process of Creation. The way in the matter state man manipulates to create different systems and computers and materials. Now man has to learn how to manipulate energy lines. Magnetic fields particles in motion, where you can bend it, where you can divide it, where you can bring it to interact at the point and dimension you need. This become important for Knowledge Seekers or travelers of Space. Go back to the patents and read how you make a wall, how you make a partition, how do you make a craft without actually single brick, with single piece of atom. The process of Creation has to be understood on its both matter state and energy state and manipulation of each and both at the same time. (:34) Energy defined in the plasma or magnetic field, is magnetic field in motion. Does not matter how man translates energy in the matter state, the potential, kinetic energy, and the rest of it. Because then he has to confirm the condition of the matter manifestation, where in the dimension of energy, magnetic field in motion is only one. It has no kinetic and it has no potential, because it's always constant, but the elevation of the amplitude, and the frequency is a

matter of the matter state. How you bring close each other, the Gravitational and Magnetical fields of the field of rays, then dictates the power of understanding of the Man, about the knowledge of the Creation. Where in matter state, you understand respect to position of. Energy state, is respect to strength of. When we did tests in the laboratories, when we are within a plasma, as we explained before, we don't see any waves, it's always constant, it's zero, it's DC. The minute we go far enough that we have to interact with other fields in trying to confirm the interaction, we see waves. Confirmation of the interaction, confirmation of existence.

(:36) In the process of the knowledge, in gaining the knowledge, then you understand that in that DC inside a plasma is a spectrum of energies, it's not just one, and depending on which one interacts at the boundary of the field with another field which creates a wave, dictates what we call, the salinity, the Inertia, the confirmation. It all has the same meaning. Then, once you understand this, man will be able to manipulate space time as a field and energy, and not as a matter state condition of the, what we call, wavelength. Inertia is the sign of interaction of the fields, at a given specific field strength. Once you understand this, you will understand how electric current is created, how, what we call energy transfers are done. And this is, at this moment of time, lacking in the vocabulary of knowledge of the Man. When you give Inertia of the field energy, you create electricity. This is what Tesla

understood and the world of creation and science up to now is baffled by it. He didn't understand any more than that.

(:38) You give Inertia, you create gold from the plasma fields. But, at the same time, energy, magnetic field in motion has its own Inertia, which creates what you call the current, flow. And this has never been explained and defined in the world of science of today. And maybe as a breakthrough in the world of science, for the first time mankind has the opportunity to understand and be able to convert between one and the other. Inertia of the matter and Inertia of energy. Those scientists who become wise to understand this will break into new science and technologies of the Creation, far beyond present man's understanding. Every manifestation needs its Inertia, every manifestation needs its salinity, which means the interaction between two field forces of different base strength. Once you understand this, you have broken into Knowledge of the Creation, transportation, transmutation and how to reach the ultimate goal, the center of the Universe. Once you analyze to understand the creation of the Creator, depends on this. Even light needs Inertia for it to manifest itself. In the body of Man we call it salinity. The confirmation of one dissolves the other. In the body of the man, we always look at the wrong side of the process of the Creation.

(:40) We call it, alkaline and acidity. Where acidity creates confirmation of collection in bringing together, and what we call, salinity, it brings separation in condition of fields, determination of their own position. That's why they say if your body is more alkaline you can't get cancer, which means cells cannot come together. It's the same with the energy of the fields of the Universe. Inertia, collection of the interaction of the fields, dictates the strength of the fields and the position of the fields, and for world of science, this has never been understood. And if you understand this, then you understand why you have different colors in the Inertia of the materials, the lights we observe. Man has not understood that the color range, color spectrum of the plasma or the light is Inertia dependent on the field strength of the magnetic field energy transportation and nothing else. Colors are created due to salinity, what you call the physical body of the man or Inertia, of the magnetic field strength itself. Then you understand how the spectrum of colors are played in the dimension of the matter state and how they have so many different effects on the body of the Man. As we spoke in the last teachings, how the tools of Carbon will give us different colors, that is added to the food of today.

(:42) Go back and understand why, that Carbon has a given Inertia field strength that it allows it to manifest itself at that strength. If man understands this and translates it to Inertia and not just the color spectrum, then man has managed to understand how to

separate the fields of the Universe and in which fields to travel in one direction and one dimension and in one position as the Universe is a colorful spectrum of the Inertias which man has not understood. Inertia of the magnetic fields which manifests itself as an energy of light, colors of light, is the secret to man's transmutation and transportation in the Universe. Where in a matter state you count it by speed of lights, kilometers per hours, and God knows how many tons. Knowledge of Inertia in the dimension of the energy, magnetic fields in motion, is the secret to man's knowledge in understanding the totality of the World of the Creation, and why and how you can transmute to a given point specific through the color range Inertia, the fingerprint of the time, place and position. Many of you do not understand, it's hard for you to grasp this concept. But for those scientists who understand the Inertia of the energy of the magnetic fields, they'll find breakthrough, massive breakthroughs in 2025 in transferring energy, food, man and everything else and opening the span of the Universe to the World of Creation.

(:44) There is a technique in how to create this Inertia. There is a technique in how to separate this Inertia. And there is a technique that will bring in the knowledge of man to understand what you call magnetic field energy radiation. In the coming time, we'll open this door of knowledge, Inertia of light, Inertia of magnetic field in motion, Inertia of energy. Where man is only used to Inertia on planet and a

matter state. Understanding this process, understanding the separation of the field Inertia, magnetic field in motion, is the secret to a precise delivery of any matter or energy to anywhere in the Universe. But once you go in that side, once you understand the energy of light, now man will have to understand how to convert the energy of the matter to energy of light. That Inertia is the key point to understand the process of Creation. This is how the Soul of the Creator travels the span of the Universe and the Unicose. And this knowledge now is in the hand of the Man. You will create light in the sky, and the color of that light, according not to the observation of the sight of the Man, but the observation of the field strength of the Inertia of the energy of the man will dictate what you are facing. Is it life? Is it collection of the fields, position of it, strength of it, intention of it, emotion of it?

(:46) Understanding the Inertia of the light or magnetic field in motion is the next steps in the world of science and technology which will bring in breakthroughs in the science that man could never imagine. In a way, by looking at your aura, understanding the Inertia of the light of it, I can see where the light comes in from which organ inside you, and then what condition it has, and then how interacts with another one opposite to it. Your emotion, dimension of understanding, your cancer, dimension of observation and the rest of it. Inertia of magnetic fields or light will become part of the structure of the teaching and understanding and

opening of the new doors in the dimension of the Space travel, transmutation and the rest. We start explaining this by manifestation and confirmation. There is a technique in producing Inertia of the energy fields. We already have achieved this in the laboratories of the Keshe Foundation and we dictate how it's done, how fields what we call, radiations are created out of the matter state without involving any other condition. And once you understand it, then you learn, you in a way sequentially find out which fields, which radiations you can transfer your physical body in a direction of the Inertia of the field to be able to transmute the span of the Universe. Where in matter state you receive resistance, and then in that position you have a limitation.

(:48) Where in transmutation to Inertia of the fields of the magnetic fields, man has no limitation in speed, time, space and travel. So in the coming months we'll start to understand more and more about Inertia of magnetic fields, not Inertia in a matter state, even though the two are entangled and work within. But it's the knowledge of the man which separates it if I want to work with Inertia of the matter state, point of observation, or Inertia of the energy point of interaction of the fields of the Universe. Once Knowledge Seekers become wise to this knowledge, the Inertia of the magnetic fields, the Inertia of light, then you understand the fallacies that the light can never bend. Light bends, magnetic field bends, if you can create the Inertia of it. Any magnetic field, any

light at any frequency of man point of observation is bendable. Man cannot bend it and it comes with so many fallacies which we have heard from God knows scientists that why doesn't the light bends and some places bends. Because man has not understood that the light itself has Inertia and if the light comes across environment which carries Inertia, it will bend. And this is how the Universe is created and it bends to a spherical shape, flat spherical and whatever shape you like. Because the Inertia at a point of what we call, deformation has been reached. This is how Carbon 60 creates the physicality (P),

(:50) at the point of Inertia of the energy and not matter. And that is why it's always can be created, dictated and transferred and transmuted. So, where the energy fields of what we call, Carbon bends to create that spherical shape of the plasma, is where the Inertia of the light or magnetic field energy in the direction and in the measure of the fields has been reached. You can bend the light in any direction in the space, and you can bend it and it does not travel the full length from the center to the outer edge of the Universe. It has been bent and it will bend so many times, because at different points, different Inertia field strength of the magnetic field with the interact with it which dictates how to pull and how to reject it, and how to divert it, and how to bend it. And this becomes a point of knowledge because then by creating systems, you can create walls, you create structures without any bricks. Where you learn how to bend the

magnetic fields. As I said, in the laboratories, when we create the, what you call, UFOs, there is no bending. We create the Inertia of the magnetic fields within our system. It is the energy Inertia and not the matter Inertia which we know how to play with. And if you understand this, you can create collisions, you can bring divisions, you can create any magnetic nuclear field radiation.

(:52) You do not need uranium or plutonium to create gamma, x-ray, beta ray and the rest of it. Because if you know how to bring the fields together, then you create that interaction, magnetic fields, what we call, sequential ?? pattern, that leads to the creation of given strength. In the world of x-ray we make a high current, and we get a target and we hit and we say we create x-ray. X-rays are created in the Universe without any target, by interaction of magnetic fields, plasmatic magnetic fields. You do not need a target, you do not need a high voltage. It's done in the ambient temperature, in the ambient speed of the travel of the magnetic field in motion. This is how I always said, I can produce the effect of the nuclear material without a single gram of nuclear material. Because we understand the interaction of the fields and the Inertia which is needed to create that. Our Knowledge Seekers have been taught the knowledge how to create this, how to create Inertia of the fields by interaction of magnetic fields, and not by targeting and by what we call, X-rays and gamma ray machines and nuclear reactors. We play with the energies and

not with the matter. We play with the Inertia of the energies and not with Inertia of matter.

(:54) This technology is a cornerstone of man's development, understanding the work of the Universe. And once you understand it, the key to transmutation will open up. You can control it by emotion, you can control it by field strength within the dimension of the plasma. Then, when you allow the fields in the plasma, what we call, 'non-potential dimension,' to interact with the environment of 'potential dimension,' then you create what we call, the radiation. The field, the specific length and dimension and the strength, without the amplitude, but with a frequency. This is a game which man needs to understand. And then you will understand the opening of the Space. The knowledge of transportation and transmutation in 2025 is where man will understand the Inertia of the energy, magnetic field in motion. And once you understand that, the way you play with Inertia, you play with gravity on this planet, man will play the game of the Universe. The Inertia of the energy, magnetic field in motion, is the game of Gods, the Creators. And for man to reach that level, he has to be detached from the dimension of physicality to be able to understand the process of the Inertia of the magnetic fields in motion. Months ago, when you go through the teaching, you'll find out that we spoke that within in the plasma is a DC, there is no frequency.

(:56) Now you understand why we start the topic then. Now you understand in that strength only Inertia of the

magnetic field in motion plays as it has no frequency because it's within the strength of its own elements of the fields energy. Now you understand the game and the process which has started. I have hidden this knowledge in the teachings of past ten years. And then it's for you to unravel, to understand. Our Knowledge Seekers who work with us in laboratories have been taught and they've been playing with this for past year or two. Now it's time to become common knowledge. How to play, how to create the Inertia of light. Then the question of the light doesn't bend, you cannot bend it, and it bends sometime near a star, it's all resolved, because now you understand that light has an Inertia. And if within the star its balance or its what we call, counterpart is created, it will affect it, because the only thing which bends a magnetic field is another magnetic field. It gets attracted or it gets repelled or it gets positioned. Then, if you understand this in the later stages of the knowledge, then you can see within the Soul of the Creator, as He has no Inertia, and has no dimension of frequency. The Inertia of light, the Inertia of magnetic field in motion, (:58) the Inertia of magnetic fields in the dimension of Creation, is the secret of transmutation. It's the secret of what we call traveling the span of the Universe as a zero time. Inertia of magnetic fields, once understood, it opens a new dimension to the world of the, what we call, Man's Knowledge of Creation. And it will change many, many things. Man will never touch a nuclear material, man will never develop nuclear weapons, as

once you understand, is we can change the dimension of the fields of the radiation. And in a very hidden way, this is what we did in Fukushima, this is what we do in absorbing radiation. We don't create gravity to absorb and hold material. We create Inertia of the fields of the radiation. It's a different principle, it's a different understanding, it's a different knowledge altogether. I hope I open your eyes into a new science of Creation. Inertia of energy, Inertia of the fields, Inertia of light. And then, once you understand this, you are already familiar with it, a new manipulation of the transportation, how to get on high speed waves, magnetic fields, to travel the span of Universe, becomes a child's play. And then, how you interact it, will lead you to manifestation of the matter state at any point, time, and place (TPP) in the Universe.

(1:00) Then you understand why your Soul travels the span of Universe to a given position, and that position it creates the Inertia of the fields of your Soul, which leads to creation of the, what we call, a star, magnetic field in motion in collection in respect to its environment. So your Soul, your creation of the Soul of the Man (STM) is that Inertia of the fields which has a given what we call, salinity in the matter state for it to manifest itself to lead to creation of the new time, place, position and entity in the Universe. You become that Inertia, you become that Inertia of light of the plasma and then according to its strength and the position you understand even why you travel, your Soul takes a journey to that point in the Universe,

that's where its salinity allows the creation of the life, manifestation of the physicality. So in a way, your Soul is an Inertia field force, in the dimension of magnetic fields. Now you understand the purpose of your Soul and nothing but collection of the field strength and a given Inertia fields, magnetic fields of the dimension of what you have created within the physical structure of the man. And then you understand how to elevate your Soul. Then you understand how to attain new position in the realm of the creation. This is the secret of life, understanding the Inertia of light. Light being the essence of the Creator, with no dimension of physicality, but energy in transportation.

(1:02) Then if you understand this, you understand how Hydrogen (H) becomes Carbon (C) and then becomes Carbon 14 (C14), becomes Carbon 16 and then it becomes Carbon 60 (C60) or combination of the elements of 60 to create the Universe, which itself is the Inertia, interacting with the Inertia, interacting with the Inertia of the light itself that leads to elusive dimension of containment, what we call, Carbon 60. But in the matter state you need the Inertia of matter to confirm the tangibility and physicality and confirmation of existence. This is the Knowledge of Creation and the secret why the change will come in 2025. Man will understand for the first time the Inertia of light. The Inertia of a magnetic field in motion. And once you understand this, there is no need for cars, or UFOs, and nothing else. The Creator Soul does not travel on a UFO for it to manifest on the Earth or

anywhere else. And the embodiment of the physicality of the man or the Soul of the man. Now you understand the secret of Creation. Inertia of light, Inertia of the magnetic fields in motion where there is no frequency but consistency and zero time travel, zero time positioning as every point is zero time on his own. Now you understand how every magnetic fields can bend, can turn, can do everything you need because you never understood that light has his own Inertia. And that's the secret of the knowledge man needs to learn which Inertia fits into what Inertia on Earth, in a given strength to become gold,

(1:04) and another Inertia given strength, to become Iron and another given Inertia in the non-tangible direction of attachments to become gases. Now man needs to learn Inertia of the magnetic fields. Then, by controlling it, he can create the gas, the matter, the water, and everything else in the Universe. In a way, this is what, in a very hidden way, your glands, your limbs, do in your body. So, it's not a hidden knowledge. You never understood how to change the magnetic fields into energy, into the light, and then into matter Inertia. I hope I have opened your eyes into dimension of the, what I call, creation and creator, and how what you call Carbon 60s, and light doesn't bend, where everything is bendable, if you can create its Inertia, even magnetic field. We go for a small break and I come back. And I hope you have opened your eyes to new knowledge, Inertia of the light, Inertia of energy, and how to create it, and how in

creating it, understand to manipulate it, and in a way, by interaction of it, create new dimension, new materials, and everything else which the man might desire in the Universe, as it's done, every second, in millions of ways, in every cell of your body, and what man never understood, for example, in your ?? lymph's, in your kitchen, or your body, you eat meat, you eat vegetables, all this is converted to, given whatever vitamin C, is converted into Copper and everything else.

(1:06) This is how your body works. Your lymph's are in that position of zero place time conversion, energy conversion, and then manifestation in a field plasma of the matter, then you call it a Copper and blood and Iron in your body. So, what we see in Macro, we see in Micro, what we see in the creation of the conversion of the fields into matter state plasma of your body, is the essence of the Creation of the Universe, where Inertia created through the light. Inertia of light by itself, by interaction of its own dimension, leads to creation of the Universe. Then, you can be Carbon 12, 14, 16 and 60 and the rest, and fit in anywhere dimension and position in the Universe. We go for a break and we come back and I would like you to ponder on this for time to come, and then you might find out the secret of Creation. The Inertia of magnetic fields which man never understood. We go for a small break Rick and we come back. Mankind needs thousands of years to digest past half of our teaching.

...

(1:08). >> BREAK >> 571 KSW January 02, 2025

Part 2

(1:12). K- Thank you very much. I do apologize. I still cough. I have not recovered from the human disease. As you are aware, just before the New Year or Christmas, we launched the new systems. These systems are very important. For

those of you who join us in what we call, dimensional Space travel and everything else, and learning how to communicate in the dimension of the fields and energy. These systems, especially the two Headphones, will bring a major breakthrough for Knowledge Seekers, who are in, what we call, dimension of transmutation and transportation and field transfer. As I said, in next sessions of upcoming time, on a monthly basis,

(1:14) we start teaching you how to absorb energy and how to break up the energies into what you need. Either way if you look at the picture which is on the screen, you have the orange, you have the carrots or apple, these become pictures in the memory of the man, once we start learning how to use for example the process of the Headset, where you place the Headset on the orange and you take what you need. If you don't need it is there for it to be you do not interfere, you do not destroy life. You learn how to use transfer of energy. And what we taught today with the what we call, Inertia of magnetic field you break it

down to your emotion to what you want it to be. In a way in the Universe we do not have of apples and oranges, but through dimension of the fields you learn how to absorb what you need, and it gives you what you need for confirmation of existence, dimension of physical life or energy side. The understanding of the field transfer is important and that will be a part of it. And you will come to understand more and more how this process works. On the other hand we have... we wait till next week maybe. Keshe Foundation will have a major announcement in our operation in international work. And we will announce by end of January a major breakthrough in collaboration between the Keshe Foundation and some of the world leading nations, directly governmental level, where the Keshe Foundation technologies will be promoted, negotiated, through government, than through the Keshe Foundation.

(1:16) We have set this up and we thank those who have collaborated on helping the whole structure in the background for it to be achieved, where we will break through governments what we call, the essential lines of life, like the gas supply, like water and decontamination, and many other things which will come through collaboration of the Keshe Foundation with governments. We were looking for such a collaboration for some 30 years and now as the lines are established, a number of leading world nations will collaborate together, to spread the knowledge and the technology, on an equal, fair base

with everybody else. You will hear about part of this, in the coming hours, through international channels, where we operate, where we choose how to operate at this moment. And later on through governments, where, for example, as of yesterday, European nations are facing a gas crisis. Keshe Foundation with the cooperation of the governments will remedy this or bring solutions for this, for governments irrespective of their position, time and place. We collaborate with governments to reach to nationals, to reach the humanity. And the process is set to roll on and I hope a lot of you what you've been waiting for you will see in 2025 will be achieved in sharing the knowledge that will become common across the planet, across that every man can use. And this process will be more and more evident in the coming 6 weeks, 8 weeks as you will understand the doors of and knowledge opens up through collaboration of the governments, and the Keshe Foundation.

(1:18) And the Keshe Foundation has done for the past 20 years. I hope you enjoy being a Knowledge Seekers from now on, because it's a pleasure to see it developing and taking shape in different ways and different manners. We answer any of your questions if you have, and we'll see how far we can go. Q: ... I had a sort of a general question about giving us more examples of how the magnetic field in motion manifests and so on. But I'd like to refer directly to Stefania's question. ... So, let's go back to Stefania's question in the chat here, and perhaps that can shed

some light. So, she says, she's asking if the line of the magnetic field to travel is similar to how the meridians of the body operate. She makes the example in the foot. You can decide which organs of the body to treat by touching a specific point of the foot. So we know that if we can learn the position of each point, we can decide where to go to have an effect. These points usually in the body or on the foot, the head or another part of the body. And are the same points found in the Universe, to travel to specific place of the Universe?

K- ... According to, I am trying to understand what she says. I used to have a long discussions with one of the Knowledge Seekers,

(1:20) who is a doctor and works on, do some work on this ?? and work on these meridian points. And she always said, you give me any part of your body, I'll work it to work with your kidney or liver or whatever. It's you who decides in your emotion. It's not just the foot. She says you can do it on your tip of your fingers. Each section of the finger will have the same characteristics where I touch you, touch your liver, where I touch another point, touch your, what you call it, kidneys. Because I decide through the field emotion of my body, that's the field strength I produce, and that field strength is equal, or parallel, or in power with the liver. So, I can point your forehead and pressurize it or touch it, and because I create emotion of I want to reach your kidney, that is your kidney point on your forehead or on your tip of finger or your toes. So, this philosophy of your replication is everywhere. It's you

who decides what it is, and if you can produce with true emotion, the field strength of that organ, you get in touch with. You don't need arm, you can even do it in the air. In... On the other hand, you need to understand... If you look at the picture on the screen, it's fantastic. It's when it was taken and when I looked at these pictures when they were doing them, then putting them up, I said when would people understand? This picture you take the writings away and look at the background, look at the actual picture. What do you see?

(1:22) You see an orange, you see an apple, you see ginger or you see cucumber or you see a ???. This is in physical matter condition. And then you see the tubes (Gans) which is the same thing in energy. We look at the fruits, but we have not understood that what's in the tube (Gans) is the energy of that fruit. I don't need to eat a hundred apples. There are millions of apples in that tube. Energy. Because once I tap into it, that tap itself taps into Universal energy to bring in. It's us who has to understand the knowledge, and the understanding truly what it means. When you buy the 'Gans fruits' of the Keshe Foundation, is tens of hundreds of different Gans's, materials, brought together as an energy level. It's the operation of one of your lymph's in a tube, conversion of energy, and your intention decides what you take from it. And the intention of lack of what is short in your body decides what to take from it. In a way if you look at this tube, is going back to the teaching, always said, "You take

20% of the energy, what you need daily need, by eating the other 80% comes from the Space, from environment." In these tubes, we bring that environment in your hand, at your reach, instantaneous, that's all it is.

(1:24) Would in the future we make a system that you go inside it and everything is needed, all the fields energy of what you need on this planet and the Universe, and you being the center, you get absorbed, you come out, you have your food, you have your energy, and next. So we have to understand the meaning of the knowledge. And not just looking at it, and just walking away from it. So look at this picture. The fruits are manifestation of the matter state. And in the tubes is manifestation of the energy of the same, does not matter what you call it. And once we understand this process, we enter new dimension of existence. New dimension to work and to live. Would you like to have that apple, which in a day or two rots away, or you have that tube next to it, which carries apple and everything else, for hundreds of years in your hand, it never rots away? Is understanding knowledge. This is what I said, the new Twin Headsets. If you ask us to embed in your system, the what we call, Cosmic (Ray) materials, which you brought into it, then you connect to the Universal fields, Universal energies. You connect it to an apple, you get an apple. You connect yourself to the Universal fields you receive through the Soul which feeds the body. And our data shows this clearly, we

take from a Space and we bring back in and we give to our physicality through the STM.

(1:26) And I showed that picture (graph of STM) to you last week. How directly in one dimension and we always feed the dimension of the heart where it carries the Soul of Physicality (STP). If you looked at the picture of last week you should have seen that. It'll come in from Space, feed the Soul and through it, in another dimension, directly connects to the left side, where the heart is. Feeds the STP and the STP feeds the physicality where it's needed. So, we have to understand the bigger picture of the Creation and not what we have been narrow-minded to, by those who like or not like but they didn't have the knowledge to understand it. Any other question? Q: ... Here's my question from the last Knowledge Seekers Workshop (KSW). Now the longest night is over. On Earth I realized how day and night comes about. In an earlier Knowledge Seekers Workshop you once said, Mr. Keshe, that there is also a cosmic day and night in the galaxy. How does this come about? Where does the shadow come from? And what are the effects on the Earth? K- They hardly ever create shadows on top of each other.

(1:28) But we see them sometimes. In some pictures taken from Space, we see the shadow of galaxies. We see shadow of Solar Systems and galaxies. Depending the direction of the lights from the central point of the galaxy itself. The... we... we call this fallacy that... you have what we call, the Black Hole.

But this Black Hole, in interaction of the fields, creates lights on its own. Which that lights, expanding across the Universe or the galaxy, will create shadow on the background. So, it's us which we have the wrong frame of mind, thinking only there is a Sun and light. Where actually, even going back to the first paper of the Keshe Foundation, which we sent for publication, Creation of Black Hole. The whole pivotal point on that explains when the material goes or star goes into interaction with the field, it creates light, and that light only can be, or can show, that energy comes out of the Black Hole, and not everything goes in, because we would not see the light, if we do not, what you call it, do not observe the interaction. And, this is the cornerstone of understanding, that, even we call it a Black Hole, itself is a star, it radiates magnetic fields, which at certain points with interacting with this galaxy or whatever, creates light, which that light reflects the existence confirmation of the Black Hole.

(1:30) So the light exists, in a way, for the whole dimensions to be seen. It's an interesting point in the 'philosophy of light.' And the interesting point is, is what I call, putting a "spanner" into the work, if you understand how to analyze it. We see the sun, bright light. They say you go to Space you still see the Sun. If the Sun is creating so much light that we see it creates us daylight, why then Space is dark? So, the light of the Sun is in the position of the observer dependent, and it's field strength dependent. If the Sun is so bright and burns and creates the light we

talk about, how come our Space is dark when you travel on the upper level, when you go into 30,000 feet more, 10 km above Earth, we don't see the whole, what we call, the solar system lit bright, it's dark. So light from the center of Universe is the same, they call it a Black Hole, but why is the Universe, what we call galaxy dark? It's translucent because of the interaction of the fields of Carbon 14 and Carbon 13 and rest of it.

(1:32) But, why is the Space dark? And why do we see light on Earth we call it daily light, or even the illusive night light? Its Inertia field strength dependent. Why we are only... we observe heat in the first few hundred meters from the surface of the Earth, and above it is cold? Because, again, is the field Inertia interaction of energy, and not a matter state of the planet in respect to its environment. So, light is only observable to the point of observation, of physical observation of the visuality of the man. Or the field strength on the body of man when you feel the heat, this push. And this is the understanding of the Creation, of understanding how light comes. Even we say the light of the Creator shines upon us, why the Space is dark? What happened to its light? Then you understand you only see the light of the Creator. We call it the burning tree on mountain, we call it "bushfire." Whatever Moses or Muhammad or whoever came across, is the interaction of the STM with the Soul of the Creator which manifests itself as a light.

(1:34) There is no bushfire. This is how I explained before. So we only see the light of the Creator, when we are at the strength to interact with it. And it's the same with the Sun. Sun is shining all the time in the center of the solar system, but why the Space is dark? But when it comes, interacts with the Inertia, feel the strength of the Earth, on a magnetic field level, it manifests itself as a daylight, or visual for us to see the rest of the environment or surrounding environment. And, once you understand this, the puzzle of Creation, becomes much, much easier, untangled and understood. So, the light, the shadow, is a point of observer, dependent on the field strength. And if you miss it you doesn't receive the light of the Creator, because you don't have that Inertia created within the Soul, at the strength of your own observation. Is this why we see a bright light at the time of death, where our Soul travels and in that position interacts with the Soul of the Creator, and the field strength of the interaction? Why don't we see that light every time we close our eyes and sleep? Any other question? R: Perhaps some beings on Earth do see that light when they close their eyes. K- Oh yes. Count sheep's.

(1:36) Q: ... Question: at the point or after death at the point of death or after death a matured Soul or the good Souls are expected to continue to create but the not so matured Souls will be part of another Soul until it matures. How would these not so matured Souls learn and what's the exact process in that dormant

state to be able to mature and continue to start its own creation? Do you understand the question? K- There is no point of maturity and there is no point of process to be matured or dormant. It's an ongoing structure, ongoing interactions. And with what you have created, you have positioned, and you position yourself in respect to. And it's, there is no dormant condition that you wait there till it comes, you still interact, you still interaction of your field of your Soul with its environmental dimension is always there. It's just that how closer you come to understand the knowledge of the Creator and the Creation. That's the heaven and hell. Not burning a fire in, and the rest of it. Knowledge of understanding the process of Creation and your own created. And that's what you call heaven and hell. And then you understand where your position is in respect to what you have gathered. It's the richness of the Soul, in the knowledge, not richness of the Soul, in what you gather on your ?? backbone. The enlightenment. Any other question? Q: ... In Italy and various parts of Europe, the spruce beetle, LPS Typographis, I think is the Latin name, poses a serious threat to spruce trees, causing them to dry out. What applications of plasma technology could provide an effective solution to protect these conifers and all life in the forest from this pest? K- It's extremely easy to look after this things, but then you have to create a condition of it. You study in what environment it cannot survive and create the fields of that environment and they just move on.

(1:40) It's not creating Gans's, it's not creating and washing, what happen if you miss? What happen to it? And something else might happen, changes something else. You have to understand the environment it exist. A few years ago, you know, we all of us, habitually buy in Europe what we call, Christmas tree for this festive season. But in the countries like Austria and some of other Nordic countries, you buy the Christmas tree, you bring it home and you enjoy it. And some of us like to buy live tree which means not cut and then you plant it the next year but with this comes you put it somewhere that the tree can survive till March and you are faced with something very interesting. One day you wake up and you see your house is full of ticks. You didn't see it on the Christmas tree. It was not in the house during the festival time. But as you .. changed the condition of the environment by keep them somewhere or maybe watering the plants or the tree for a while till March comes when you can plant it, these animals wake up and they're killers. They create massive problems and you find your house full of ticks. Then you ask yourself a question, nothing changed, it's been the same environment. Just the environment outside to the slight warming of the weather or whatever, has given these animals a call to wake up.

(1:42) And a lot of families in, especially in Europe, get hit by bringing these things in the house, without them knowing. You change the environment from outside, the spring comes and they wake up and have

nowhere to go. You change the environment of the forest. It doesn't come by making Gans's, it doesn't come by washing the trees, how are you going to get to the top of the mountain when these trees are dying because of these animals? You have to change the environment. And we have developed such a technology you can. You can cover massive areas to a new, what we call, type of technologies with the Keshe Foundation. Making Gans's and farming is over. It was a phase which we thought you learned, you seen the effects. It's the same with changing environment. And look into the environment they live and understand how you can change this environment that they move on, they don't exist, that's all you need to do. And what we call, it's the part of the knowledge that you need to understand and to be able to, to deliver, um, such a thing. It's, um, it's something we know very well and I've shown this before, some years ago in China. With this technology you don't kill. With this technology you change the environment. And by changing the environment you get rid of the pests. And the process is, don't look in how, see what has changed which has created this condition for them to .. thrive. And the plants, the trees, will survive with no problem. Find the process, the change in the energy of the environment. And they will survive. All the plants will survive. Just one second, and I explain exactly what it is. I think we have shown this before some years ago I tried to share you some pictures. (1:46) Okay, now let me share. You will understand

what I mean. I'm going through the reverse process that you can see. This is the picture of pests in the farm in China. Chinese ?? call it, our friends of ours know exactly what is because it was brought up by them. You can see the infestation, you

can see the pests on this plants. Two days later, a few days later, you see no pests. We changed the environment. We didn't kill the animals. As I said before, I wondered where did they go? Did they go to the field next door? What happened to these millions of pests in this, what you call it, in this farm? You can see how extensive it is. In a matter of couple days, they are gone. So we didn't go to kill, we just changed the environment. You have to understand what the environment was created, or is created that these pests, these whatever, survive and change the environment. Otherwise they survive. We cannot spray every single spruce tree, the roots or whatever. (1:48) You have to find out and create that change. I always say, (when) it's 'too hot to live,' they move on. That's the secret of new technology, not using pesticide and whatever you've seen. One of our Knowledge Seekers, very recent, in the past 2 or 3, 4 years ago, we had this problem with wild, what we call, deer in Austria or Germany, if I remember correctly. They were getting their respiratory problems and dying, and all sorts of problems. And it was solved by changing the environment and introducing Gans's in different ways into the water or whatever. You just change the environment. You see, it's very simple if

you want to understand it. We are coming into winter time and you get a chest infection. If it's a virus, you take all the... because you get all the lung respiratory problems and they give you all sorts of medicines. You are the Knowledge Seekers, you know and we taught many times that pneumonia, or the water in the lungs comes from the change of the magnetic field pressures in the lung. Use water Gans's on your back and the front in a Patch, change the environment and you'll find out the pressure, the pneumonia and everything else resolved itself by itself. Understanding the change of environment. Isn't this what you did with Corona? Because it was a virus, you washed your body, and you changed the environment of the lung, and the virus could not exist.

(1:50) When we had the problem last week, the doctors or whatever, it's a virus, put through a virus tester, but there is no virus. No sign of virus, it's a physical infection, because my body does not stand the virus, it just sort of resolve itself, and if I get a problem, I know how to use Gans's, and change the environment. It's a physical infections, which takes different dimension, you have to work on different ways. And, the change of environment is the same as we see on the screen. We just changed the environment. Any other question? Q: ... Can you talk about the post that was made on Telegram, about the new pandemic that could happen in 2025? R: I don't know if you've seen... K- This post... This post I put out and it was this, you know, put out to the

Knowledge Seekers. ... If (we) had such a warning before Corona and... when he came it was too late by the time, it was moved on and done things. And now the same people, the same structure is talking about another one,

(1:52) but trying to work on children. And they keep on directly speaking about the polio connection to it. And they speak about they're going to test it from South America and Brazil and Mexico. And once you start taking hold, it goes to the next step and then the rest of it. This is criminal way of thinking. And it is... we know who he is, he's behind a bunch of these things. And works on the, what I call, the old Jewish path of belief I call it, which is a sinister. Moses did this, this sinister job when supposedly he asked all the male species of villages or tribes he got hold of to be destroyed, because that way you have to understand there will be no more what you call, children. And when you cut number of the children, you cut the number of the expansion of the society in the future. You just need to take one part of it out, so the next generation has no male in to live with. So you terminate their life or reduce the numbers. What we call it, birth control through massacres. And this time this genocide by this man is targeting children. Because if you kill 10 million children this year,

(1:54) you reduce the population by 100 million in 20, 50, 100 years. Because they're not there to multiply. And this is why we're seeing this, is what is playing, because this guy spoke about the same thing in 2014-

15. And then we saw Obama orchestrated the same thing with him, and then we got the, what .. we call, pandemic of twenties. And now we see the same thing, trumpeted by the same man, and he's seeking position in the new administration which is a lethal weapon. And this is part of what we brought Knowledge Seekers to be ready, if happens, whatever, coincidental, accidentally deliberate, Knowledge Seekers to be ready and we gradually start teaching you to not to get to the pandemic if it comes and then try to find a solution. We try to teach you how to be ready that if this criminal organization leads into this what you call, ?? mass as they did with the Corona, we are ready for it. We don't need to. We have a stockpile of materials ready to handle. We know how to, what do you call it, handle this virus and what they're talking about. It's the same preparation as what you did with Cup 1 and Cup 2, with addition into couple of things into it, that does not bring the effect to the muscle tissue and uses that side of excruciating pain and death for the children.

(1:56) Excruciating pain which it creates through its muscle spasms as we see in polio with children, it touches the muscle tissues and the bone structure and everything else with it. And we are preparing for this to be released sometimes in March. That you have all enough time, ample time, to be prepared if it comes. If it doesn't come. If they don't succeed, we'll see the next step of it. You got to understand that a lot depends on this. It depends if Trump allows this guy to

come in, or as he promised, will uproot any funding for WHO. And if he does that, it will delay these people's problems. This man's symmetrical work (gets) delays it, and it all depends on how Trump reacts to this. If he pulls a plug on the WHO, which he has put the head of, which the guy has got the record of killing 2 million of his own population, where he came from. In a way, I call him the Hitler appointing, what you call it, his own man to carry out the executions. .. He did it with what do you call it, the Corona. Now, both are speaking about what it is. We've seen it. It's a topic in the background. But if they have made all the vaccines ready for it. Then it comes to .. You got to understand this man has a crazy mind. And there are two things, two ambitions he has. He thinks he can control the population. We saw what he did in India and in Africa. And secondly, by selling more vaccines, he wants to become again the richest man, which he lost his position.

(1:58) It's greed. And I think somebody somewhere has to make a step to issue a warrant for his arrest, for genocide. It's jumped from computers, into viruses with no knowledge of any of it. He stole technology in ?? 1979 . But we have to be prepared for it. We have to be prepared for it and it needs the time of the winter to do a lot of damage, or a summer time to do a lot of damage depends on the cycle of the virus and we handled the Coronavirus, we handled the swine pig flu in China summertime so we have a good experience of how to handle it. And we inform you

how to be ready for it if this lunatic does what he's doing. Because from what we hear a lot of vaccine companies is connected to it too are producing the vaccines for this. He wants to make his billions and at the same time his second part is uprooting the children and the generation. You don't need to kill 100 million, you kill 10, 100 times. This is not there to be done. (Over time it adds up to 100 million). Hitler did the same, in many places, if you are familiar with the history of what Hitler did in Europe. If anybody killed a German soldier and they don't introduce (give him up) them in the village, he killed all the male species in that village, even the dogs and the cats. That there will be no more generation who kills one of the German soldiers.

(2:00) I used to run an office in Holland, in a village which, which actually had a statue in the middle of the village. Those of you who are Dutch, you know where it is. Not very far from Amsterdam. And he uprooted the village. And, this is the same way as this guy is up to. But we are prepared for it and we make you all ready for it by March, April. Then you have a stockpile of materials the way you did for Corona. This time we'll be ready, you know that it hits you by ?? October of next year. They need that much vaccine to become billionaires with it. Any other questions? Q: ... Is the CRm, that would be the Cosmic Ray material, enclosed in a gas used in the gas reactors? K- No. Q: ... Can the CRm, Cosmic Ray material make a battery similar to the Alex beads, but instead of titanium, use

the CRm made as a stacked layer battery, using aluminum and Nano-coated copper wires, created...

K- You will not be able to reach the material. It's contained in a glass, sealed, and has a resin, 1cm resins on it.

(2:02) You will not be able to do it because these things have a potential after a time to react in different ways of creating fields. So, it's well, well protected.

You will not be able to do anything with it. R: You can't

use the fields from it that way? K- Yeah you can use

the fields from it, but how you organize with one or

two balls is a different thing. R: You couldn't make a

battery with one or two of the sealed units? K- I don't

think so. Q: ... In one of your teachings you said you

referred to plasma as plasma, because the light it

gave off in your experiments. On discussing plasma

Science, one of the immediate challenges,

is to overcome people's conventional understanding

of plasma, as the fourth state of matter. Can you

please clarify the relationship between plasma as

energy, and plasma as the fourth state of matter?

Thank you. K- Actually, plasma as a fourth state of

matter, is energy. It is the plasma we talk about. But,

we visualize it in a matter state, where we cannot

physically touch it. Where with the plasma we talk

about, like a Gans, is a room temperature controlled,

can be handled, you carry the Gans's in your hand.

So, it's more or less the same thing, one is, is in the

energy, but Man gives a visuality, because we see it,

we call it a plasma, but otherwise it's the same thing.

(2:04) It is manifestation through fields, not manifestation through tangibility. You see a plasma by interaction of the fields of it within the environment, with the light it creates or whatever, and you see the effects of the Gans as a plasma, where you burn yourself and touch the water, which is where the Gans of it, where then the pain goes, which transfers the energy. It's the point of observation and detection, otherwise it is the same. And then the plasma you have the, the ones which create massive interaction of the plasmas together which creates a heat. And you have the massive transfer of the motion of the Gans's which create no heat. It's the picking up half of the knowledge and applying it the wrong way, confirming you are right. What does this mean? We run reactors, we have run reactors for space dimension, lift and motion, gravity, for decades now. We don't see any rise in temperature. This was one of the first things I did in Tehran. In creating the reactors, the double reactors for lift, observing temperature. There was no temperature. You'll see in some of the reactors we have, there is a probe into seeing if the temperature rises. There is no rise in temperature. So, but the scientists don't understand this. Especially the ones who are working in CERN and astrophysicists have no clue.

(2:06) They don't understand the science of Creation and they come up with all this rubbish and they're spending billions and billions of dollars on projects like CERN. It's idiotic. One day you as common

Knowledge Seekers will laugh at these people. Explain to you why. As I explained in the first part of this teaching, we have a plasma which is mono energetic, not mono energetic, but there is no frequency in it. Till it touches the environment fields which then it has to penetrate, or confirm, or contain and then we see waves, frequencies. Depending on how we change the field outside, this plasma inside is more or less room temperature, zero. Now we have bunch of idiots called scientists of CERN, which is idiotic. Which is, they don't, they don't understand half of the technology, they don't understand the process. So they're seeing something outside, and through their ignorance, connecting it to inside. Inside the Sun, inside the Earth, is more or less zero temperature, ambient temperature, pressure. We have the reactors, we are not talking theoretical. And these fields, through the Inertia gravitation of the plasma, have gathered to themselves a ?? mass of the elements, which has the boundary, we call it, let's say, the Carbon 60 of the Sun,

(2:08) in interaction with the matter state of within the last, let's say, 100,000 kilometers of the matter state, liquid state of the Hydrogen, with the fields coming from inside which has no frequency, creates a heat which could be thousands, tens of thousands of degrees. In a way your blood is not boiling in your veins, but when you rub your hand together you create heat. That's, they see that heat and they say, "because of this your blood is at one billion degrees in

the center of Sun.” It's idiotic, it doesn't exist. So now we have this fallacy of making fusion with the billion degrees and the center of Sun how many millions of degrees and we are... Guys rub your hand you get the same heat doesn't your blood is boiling inside. And this is the lack of understanding of the knowledge. In a way, they don't have it. How can they confirm it? So, the fields inside are constant. Most probably, as is plasma, has no matter state. Where before we said the center of there is the Iron core, which I wrote a paper about the creation of the Earth. There is no ?? since you read the papers, and then the scientists confirm the center is a hollow as well. Later on we had a confirmation of it through sound waves, or whatever they did with the Earth. So the center of the Earth is a plasma. You call it the hollow, because it's not the solid Iron which we were told. And different Inertia gives it different layers.

(2:10) The interaction on Earth you have lava and everything else and water, so we get this light interaction as we see the light from the Earth from what we call, daylight ?? to the heat of it. On the Sun it's mono material. So, you have the plasma of Hydrogen (H) and a matter of Hydrogen. And when the plasma field interaction dynamic hits the matter state releases heat, we see the flares on the Sun and the rest of it. So, understanding the principle, producing a system which replicates it confirms the correctness of the science. And we have our scientists now in CERN building high temperature to achieve

fusion. Fusion is a dream which will never come true, to sustain. Even though we are spend billions on it, I can create Helium, I can create Hydrogen in a laboratory with a thousand dollars. I told you there's a news coming up very soon you will understand by the governments. We use this knowledge to create energy and matter and as part of the work of the Keshe Foundation. We will show this and we have shown this to government's officials in past few days. We have managed we have achieved to produce the condition of the plasma which leads to creation of life and matter.

(2:12) And for that reason we can confirm scientifically and show that there is no heat involved in creating matter. There is no heat involved in fusion. Heat involved, the matter is created out of the Inertia of the fields, not amalgamation and pushing of fields together to create elusive fusion. Yes, you create it when you create so much heat. You create a plasma, plasma joins with each other. That's inevitability of some of the fields matching. But it's idiotic what we've seen in CERN, because does not happen in nature. I'm sure, in the next coming time, when these reactors become common, then people start laughing at the certain people. And now we see Chinese spending billions more, in what it can be done, misrepresenting the knowledge, misinformation, and getting bunch of others to agree because we say, you know, "If you don't want to show you're not an idiot, you join them, they're all idiots." And fusion doesn't exist. Fusion

does not, even at the CERN and high temperature of what they create, they loosen the plasma, the plasma together. We can do it without the temperature, without all this 'jumbo jumbles.' We create matters, we create gases by the same principle.

(2:14) We don't have... Our reactors are made of plastic. Our reactors are connected with copper wire, they melt. It's the misinformation, lack of knowledge and then trying, confirming, trying to do, what you call it, fantasy work with a lot of money in it which keeps a lot of people busy. For sure, the center of the Earth is hollow. For sure, the hollowness is not hollow. It's a plasma, it's a fields, interaction of fields, which they have no matter state Inertia condition to them. You know they talk about when the fossil fuel ends when the oil of the dinosaurs now we know it's all fallacy. It's created a bit as same fallacy came that center of earth has a Iron core, because Iron was something which could create magnet. We're dealing with the same fallacies, and now with the science we know it's all false. You look at the creation of the materials which is done what you call it, in the Keshe Foundation Laboratories, the Cosmic Ray materials (CRm), we don't have furnaces and millions of degrees creating matter. We understand the process of Creation. And this is part of understanding the knowledge. And they don't, they do not understand. I have a beautiful picture which you know I don't know if you've seen it on the Internet, we have heard of hundreds of white

sheep's, and one black sheep in the middle. These are the black sheep's,

(2:16) and they stand out in the fallacy they have created in the world of knowledge, in the World of Creation. And with the, with educating us, ourselves, now we understand, all these things about the fields and energies and matter are connected, depends on how and which Inertia field strength you consider, or you work with. And this is the problem for a lot of Knowledge Seekers and the world of science to understand this, separation of the two. And this is what you have to become aware of and not allow games to be played by the ignorance of the knowledge, but because we all say so, we are all right. You know if you've been to mental institute we have bunch of crazy people and they think everybody outside is crazy because we are all okay, because we are all in the same mental condition in the mental institute, and this is the shape of the scientists of today. And this has to stop somewhere by educating people of the knowledge, the Knowledge of Creation. And you do with yourself. You make the Gans's, you see the plasmas. If you look these pictures, these are against all the laws of physics. Creating pieces of gold in atmospheric condition. Where did the fusion comes in to produce such a thing? And you can see it, all the specks of gold in it. (Shows pictures of gold they created from the fields).

(2:18) Where did the fusion come? If you need such a huge fusion to just bring 2 Hydrogen to create Helium to create fusion energy as CERN, what mega trillion, trillion tons of electricity do we use to produce this (these specks of gold)? Science is wrong. The knowledge set up is wrong, because the educators were wrong to start with. You tell me, very simple, you have a Hydrogen, you want to bring it together to make a Helium, to create fusion and you need some megawatts of energy. And (then) you tell me how we make so much gold. You can see (gold) dust everywhere, with no fusion. Today's scientists are working on such a huge fallacies and most of it has come through Einstein and his wrong work and people like him, which has misguided our knowledge, misguided our research. If we take so many megawatts of energy, and so much finance to produce one fusion reaction, how did we fuse all these atoms to make gold? Now you understand. We have, with the knowledge in our position, now we understand the World of Creation the way it is, not the way it was made by a bookkeeper and God knows a charlatan. You have it, you've done it, you, you create the Gans's, some of you create all sorts of things.

(2:20) Any other question? Q: ... Thank you very much for completing another year of much love and shared knowledge. I hope that more people will be able to connect and interact with these fields in 2025. He says, I would like to understand in a simpler way perhaps, about the Inertia at the point of manifestation

of the desired fields, with the limit of the gap from point A to point B, would it be the limit of the gap from point A to point B? For example, in the state of matter we have a frequency of 50 or 60 Hertz, which would be energy manifested as a sine wave, measured from a positive to a negative limit. This reminded me of a teaching in which you said that the magnetic and gravitational, positive and negative, north and south, are all the same, but man doesn't understand it. How can we identify and understand the strength of the field of Inertia at the point of manifestation. Thank you very much. K- It's not easy, but needs understanding of interaction of fields. I explained this once in a child's language. You, we all of us, have played with paints and different color paints.

(2:22) You have a green, you have the red, you have God knows what. And these are the colors you have. So this is the Inertia. Then you mix the red with the green and you get a new color. So you've created a new Inertia. And this is the knowledge of the light. Because colors are the light detectors. The color, the definition of field strength. So, this is what it is. This is how we will build this knowledge up. Interaction of the certain colors with another. What color it gives and that color manifests for what purpose. It gives you a new Inertia strength. The world of science has to understand this and somehow in the future calibrate to creating the color most probably first and then through that new color finding the Inertia by the interaction of the fields of what you mix together to create that

Inertia, that color. And it's a process. We already do it in a different way because we never understood the knowledge. We looked at one side of it. We produced the colors in the food as I spoke about it before. Now we have to understand what Inertia, not the bandwidth, creates that color. And that's a new science. Then, if you understand that, then you go to the next step of about understanding how to manipulate fields for the elevation of the STM. Not going grabbing colors, but understanding the Inertia you need to, in a way, to give than to take, to elevate to receive.

(2:24) Any other questions? << In this part Rick shows images of a painting made by a Knowledge Seeker with Gans's >> Q: ... Rick my question on Inertia of light, does this mean that all light is Inertia at different strengths or is Inertia like being detached? My apologies for I have very little understanding of Inertia and how it can become an emotion.

(2:26) K- Inertia is another word, "salinity." Inertia is a given specific field strength of gravity. A magnetic fields interaction. That's all it is. It's just in the scale of the atomic field strength, where with the light is in the strength of the magnetic field strength. Otherwise it's all the same. Same word. Inertia is a tiny little bit. A bigger, bit bigger of what we call it, gravity. That's all it is. Inertia is gravity but in the atomic level. Nothing else. But in a bigger level planetary system has a gravity. Atomic level we call it Inertia. And if you change it slightly the Inertia of a plasma, it goes, you

have to understand how it works, how you can do it. You change the same plasma from Copper to Zinc. That's what your glands do, this is what your thyroid does, thyroid does or lymph's do. This is why you need B12 which is a massive targeting field radiation, to be able to supply adding or taking to the energy of the plasma in conversion to the energy of the matter field strength,

(2:28) for example, vitamin C or vitamin D you need in your body. And then, at a given strength, you need a lower to be able to open up and break it up, that plasma. You call it, what you call it, B9, folic acid, and then you go on it, nourishing level, you don't need to divide it, you call it B6. Again, radiation fields, absorption or expansion, or division. Any other question? Shall we call it a day? We've been here for more than two hours. R: Yes I know you're having issues with your voice there a bit. K- No I've got to go to another meeting later on. R: Right. K- I have a meeting with another group later on. R: I'm sure you have a K- Back to back it. R: Full itinerary and probably booked out through 2025. K- This year is going to be a fantastic year. It started with most beautiful message yesterday, and in direct collaboration with one of the leading nuclear governments, accepting the technology as a breakthrough. Our team has been working with them very hard. And in supporting the technology to become public. It was the biggest gift we could receive as a New Year. And receiving support from

first time we were looking for the support we needed 25 years after what the Belgians did with us in 2012. And we reached a... well, in a way, confirmation of technology,

(2:30) has brought that situation and now we are backed by a major government in development. And all they want from us is spreading the technology, and they do the rest of it for bringing the nations into working with it. And we will see the change when it comes to. Knowledge Seekers in the background, who has done a lot of work to get to this point. It's a fantastic year for the world of science and technology. Everything has come together, the political situation, the economical situation, the social economic, and now the science. All has come together, it's just time to mix it and see how the game is played. A lot of people would not like, a lot of cartels will go bankrupt, because of, there is no need for it, and people will walk away from it. A lot of energy cartels will be destroyed. A lot of drug cartels will be destroyed, by their own people not using, but not... there is no need for it. What we see, the financial structure will crumble, in... under his own, what you call, itself. And, a lot of scientific world will change, because of the new direction. And it's amazing how people will jump into it so easy. The easiness of the transfer. Okay, let's have one more question and we call it a day. Q: ... (2:32) Well, we had another question about whether you have any insight about the recent drones or UAP (UFO) sightings in the sky, that have had quite a bit of

attention and speculation. ... K- Now we just watch and see as we explained before last time, watch and see how this game plays and who's behind it? Q: ... Do we just hold the Food Gans containers, or take the water from the top above the Gans? K- It's your decision, you Knowledge Seekers you're quite versed with this. Doesn't matter what we tell you. We tell you, put it in a alkalizer. You lot open it up and use the Gans water on top. I know a lot of you don't listen. It'll be interesting how the Knowledge Seekers when they receive their Twin Headsets will tell us what they feel about the ?? exercise with Gans's and with the fruits and with each other and each other's emotion. And it'll be interesting to understand the whole process. It'll be amazing once the technology develops a stage where, for example, sitting in front of someone and talking with them, you, putting the Headsets on, they don't feel anything but in questioning you know what is the reality, what is the truth and what is not. As a friend of mine said,

(2:34) "Do you know these Twin sets you brought in? It's a very good interrogation system without harming no one." You ask a question, you're wearing a ?? helmet , you're wearing a Headset, and you know, they feel the energy, the transfer of the emotion, if it's the answer correct, lie, or truth, or whatever. And there is no need for injection because the Soul speaks. And it's amazing how things will take shape with this new technology and the way it's taking shape. You'll feel the emotion and there's no way it can be lied to

through the Soul. Those of you who bought this Twin sets you're going to have a hell of a lot of time. It's your most pleasurable time. I think a lot of you get addicted to these computer games. You lot will get addicted taking these Headsets with you to different places. Can I feel, can we talk, would you like to put a Headset on? Asking a child, did you have the orange? You don't need to wait for an answer, huh? The answer comes from the Soul. These new Twin Headsets are different ballgame in the World of Creation. Would you feel the emotion of an apple before you eat it? Would you say no? Would you say yes? Do you need to eat it? Thank you very much for today. And I hope we opened a new chapter in the world of science.

(2:36) And one day man will understand.

Thank you very much. And see you hopefully next week. 571 KSW January 02, 2025 End
