Part 1

(:16) K- Yes, thank you very much. Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. As I said a few weeks ago, two or three weeks ago, we have started a path of teaching the actual cycle of life, which is magnetic (M) fields, magnetic waves. And where they're interaction leads to creation of everything which is in this Universe (U). In a way our Creator is a source of magnetic fields in motion, which is energy, and in the conversion and interaction becomes us, becomes the stone, the birds, the aliens, galaxies and the rest. So in essence we're all connected in a very thin line to the Creator. In whenever it manifests itself, does not matter as a man, a bird,

(:18) another creature in the Universe, it's a reflection of Him. It's not only that, 'I made man in the image of Myself,' I made the Universe in the image of Myself. The galaxies, the way they work, is an image of My beauty, My strength. The way a bird flies is a beauty of Me, I made man and every creature in the Universe in the image of Myself. I can be sensual like a man and I can be an interaction stone with no apparent physical emotion. I can be a river of life in the waters of the planet, like Earth, and I can be a river of life in the magnetic field motion of the Universe, where I give life to those life which I've created from its interaction further down the line. As I said, my job is to teach you,

to bring you to the point that the Daughter of Mitra will take you to educate you in the essence of life in the Universe. We set the foundation, but education, understanding of the technology of the creation, not the technology (T) of the Keshe Foundation. How life is created. The biggest mystery in the life of the Man has been, where I came from, how I'm created, and how I come to be what I am, and how I have become what I am. I set the scene for this education last week (shows drawing of last week). If you remember, we explained with a neutron, proton and electron, with the layers of the body of the Man, with your MaGrav system and the rest.

(:20) But, I made Man in the image of Myself. So, how do I carry this image? How does everything has essence of the source, interaction, and the environmental interaction? One of the biggest mysteries in the World of Science, one of the biggest mysteries in the science of the physics and chemistry and every other science of the man has been, where, how Magnetic fields are created, the energy source, the interaction of, the understanding of it. As I added last week to this image in a very simple way, was that in essence, we showed you in the diagrams of your interaction with our system, if you remember, that there is a interaction of the Soul of the Man (STM) with the Soul of the Physicality (STP) of the Man and then with the physicality (P) of the Man, and in essence, how Man manifests itself. And this brings us to a point of understanding. The biggest problem for

scientists, for world of science of Man, has been to understand the process of the Creation and interaction of the fields. What does this mean?

(:22) In cycle of life of a field, we need to understand a very simple things, which we have ignored, in a big way, because of our ignorance in the Knowledge of Creation. And that has been in a way, that we have not understood the process of Magnetic fields, their interaction, their separation, their existence, and everything else which needed to be known. In the world of plasma we look at the knowledge of the fields. In the world of physics we look at these fields when in their interaction with the environment, they manifest themselves. We have not understood in a very simple way. If we look at a magnet, what are these magnetic fields? And in essence, our knowledge and education about even a piece of magnet and the magnetic fields is half cooked, half thought. In a way we look at a magnet. We look at, they tell us the Earth. North Pole going out and South Pole coming in. This is a fallacy. This is half-cooked truth. That's why our scientists cannot get anywhere. That's why we were fighting with propulsion jets and every other thing.

(:24) Because the reality of the science of the Creation is very simple, the fields move in between in both directions. So if you understood this it changes everything else for us in the Knowledge of the Creation of the Man. Which means we have missed, we have misunderstood, the biggest mystery of the

science of Creation. Which means, in a matter, there are two directional waves. Depending on which one is stronger, dictates the direction of the flow. Newton's law. And this is where most of you and the rest of the world of science has got stuck. And we look where, according to the science of today, in a planetary system, there is the line of change, where we go from magnetical (M) to gravitational (G). where in fact there is no change, it's just the field going through, point of observer. But, there is another piece of information, which needs to be understood.

(:26) In how the magnetic fields, how the plasmas, how the direction of the motion of the plasmas, dictate the direction of flow. What does orientation mean? What happens if we change slightly on having a stronger gravitational field from the north to the south that pushes the system like Earth to tilt. We have not understood these things. We just accepted, Earth tilts by the few degrees, and that tilting creates the condition of life as we see it on this planet. How come Mars doesn't have a life the way we have? How come the other planetary systems, they don't? How come so many planets and stars in the Universe don't show the Four Seasons? Because, they have not tilted, in a specific angle, in a specific area, with respect to their star. If man ever, even in the laboratory system, create a condition of the tilt, in a plasmatic condition, with the energy resource ratio, with the Sun and the Earth, the system will create life. The system will show

a physical structure of very much similar to DNA of the Man,

(:28) and every other creature on this planet. In a way, if Man gets educated more and be able to control magnetic fields and replicate the field interaction of the Earth, man can create another life. It's not just that we create life in a womb of a mother, we can create life in a womb of the Universe. And this is where we have and the teachings from now on, as of past two or three weeks, will go. In understanding the creation of magnetic fields, in understanding the process of interaction of magnetic fields, in understanding the connection between magnetic fields. And to this effect I started last week with very much the process of neutron, proton and electron. And I started the same thing with you in 19, sorry, 2016, 17 and beyond that with the MaGrav system. And in the recent past few weeks, we showed you the operation of the Soul through our system. The reality is that there is no difference in the World of Creation. You need to understand the environment has a field, which you have to interact with.

(:30) Then you have to find a conversion and then you can handle within. And at the same time it's a loop. You have to give to take. Be it a MaGrav system, be it the DNA of the man, be it the structure of the atom. And this is the mystery which mankind has not understood. What does this mean? What is this going to bring for you as Knowledge Seekers? You have an electron. You have a proton. You have a neutron. This

is in the dimension (D) of the plasma, not the matter state. I'm going to turn this in a way that you understand the essence of Creation. This is how the knowledge has been misrepresented to us. There is no difference between the structure of an atom as you see it, and a Star Formation (SF). Now you understand why we taught the Star Formation.

(:32) In the world of physics, they just dotted it around and it's just there, but you don't have the rest of the knowledge. But look at this, look at the structure of these two in the fields. If you understood this? You're a little bit more mature to understand how and why you have different cells in the body of the man. You have different tissues in the body of the man. If I give you this position, you have the cell of, let's say, the brain. If I move the angle of orientation of the connection to this, you get the cell of the heart. And by understanding this, you understand, there's a piece missing, which they never taught, because they never understood, that this interaction of the three fields creates a Soul, central point that connects, we call it the Soul, the controller of the cell. Does not exist in physicality, but exists in dimension of the fields. Where the interaction of the fields here would have given you this, but the Soul would have been slightly in a different position.

(:34) If you understand this, you understand a lot about the rest of the process of the Creation. How do magnetic fields, interaction, position, direction, dimension, dictates the manifestation. So when we

see (the graph of the STM) in the new systems that originally your Soul lines were like this where this was the Soul, the STP and P (3 lines in center like a MaGrav), in changing your position with the systems we put in, we see your Soul to manifest itself or the graph will manifest itself in this shape. Where your physicality moves vertically in position to the STP and the Soul. Now you understand. This is not theoretical because on the graphs which we take from you individually, which we done last week, we see this. We have a scientific confirmation. Where if you remember, a few weeks ago, I showed you this from the graph of one of the meetings. Where individually, you can be like this, collectively with others you become this.

(:36) Which means the physicality of the Man can be affected by the collective essence. This is what was in the intro of today. When you go to China, you take all the habits of it, because the STP and the STM stays the same as the others. So they change it (?? change to Chinese). In a way, I show you a picture of this, later on. Because if I come out of the White Board, I will not be able to come back here. But then, it'll come to understanding further in the composition of the Creation and dimension of the Creation. What does this mean? This mean how does you, as a Man, with the interaction of the fields, are created. And how you live a schizophrenic life of physicality here, in the energy dimension, the same emotional information in the world of the creation. In a way, man needs to understand more about the connection of magnetic

fields. If I can put it to you in a very simple way, is that as the energy transfers, moves down, it goes from energy to physicality. But it's the same energy in the source. If we allow this dimension to go further up in this structure, would it change characteristics, manifestation, and the rest of it? Which (it) does.

(:38) So in a way, we can live in different dimensions according to the field strength and position of our, what we call, physicality, STP, and the strength of the Soul. We control the manifestation, we control the, what we call, observation point of view. At this level you look like a man and at this level you are a cat. And at this level you become a dinosaur. And in essence, the Soul has not changed. The only difference is the emotion of the space time, and the Soul of the structure. In that process, we need to understand more about magnetic fields. But in essence, one thing is missing in this knowledge for you as Knowledge Seekers, is that where and how has this (the drawing of the North and South Pole fields and the ones in-between) come about? As part of the education of understanding, we come to understand a lot of .. . We need to understand a lot of .. .

(:40) What I teach you today from now on, has never been in the history of the science of the Man. But it's part of the Man understanding to become part of the Universal Community. To become part of the World of the Creator. To become to understand the essence of the connection, between the Man, the environment

created and the environment which he lives or can live within. What does this mean? In a simple word, we know that we come from a Ray, which we call the Original Ray. Which this Ray in essence of understanding, if you read the Book number 2, is in detailed explanation of it with the new understanding. This Ray itself is a cylindrical. So, it has that structure of the essence of the Soul, which dictates the direction of its motion. In creating the condition that it wants to manifest itself in the STP, and the STM, with the interaction of the fields of its environment. This is, in fact, the structure of a Deuterium. One thing which you always have to have in mind is,

(:42) when we draw such a thing, there is somewhere the Soul, which comes from the interaction of the 3. It's a Star Formation. And, this is important for you to understand. The structure of the Creation, the structure of the Magnetic field, the reason for its motion, is the emotion within the light. This is why I have said many times, when you look at the star, what you see what it is now, not what 120 million light years ago. Your physicality sees 120 million light years ago, your Soul sees instantaneous what it is now. If you understand this, then you understand more and more, why we always said that Man has a connection with the Hydrogen, which is the Deuterium Hydrogen and not the Hydrogen as a proton and electron. It's a full system with emotion and understanding. This is why it can travel the span of the Universe through non-dimensional Soul of it. This is why magnetic fields

connect instantaneously. In the matter structure of atom, you need 120,000 light years to get to see what is there,

(:44) what you see, but in a dimension of the Soul is instantaneous. This is the transmutation, this is the transportation. Then it comes for you to understand in a way if you are not or have not understood yet, where and how even this magnet is created? How it's connected? Why we have 56 Iron (Fe) on this planet as a magnetic field, as a magnet and anything which in a way ?? color it and collaborates with it? An example of this for you is very simple. I have to find a picture. CO₂. 12+32 (= 44). COHN - 12 plus 16 plus 1 plus 14, (=) 43.

(:46) You need to have a connection (?? 56) to connect everything together. This is, we call it isotopes, an energy level. But the most interesting of all, is this, which man has never understood. Deuterium in interaction, Carbon 14 in interaction by 4 (=56). Then you understand how Man is connected to the Universe. What is missing in your knowledge is this.

(:48) And in the dimension of what we call plasma liquid condition, how Oxygen plays a game in this connection. And this is part of the process of the teaching from now on, which we try to teach, to try to get you to understand this, that you become part of the process of Creation. This is where we are. Even if you understood this part (?? neutron proton electron

which is a SF with a Soul), then you understand why in the world of the matter state you have inert gases. In the world of science of today you speak about molecules and all sorts of binds with them. In the world of energy is different you have two structures of Deuterium (N P E). That in their interaction, they have a common field which satisfies the Soul of the both. A perfect Twinity.

(:50) Now extend this to the next level. Which is, very easy to understand. If you understand the process of the Creation, which this, in its interaction, in its combination of the work, leads you to Carbon 14. In a way you came from here (??) to here (deuterium), here and then the interaction see due to Carbon 60, dimension of physicality in energy and not matter state. The only thing that a man has not understood is that even not stone has a Soul. Even the light has a Soul. The light of the Creation, the light of the Creator, the true enlightenment. And this here (the pairs of Deuterium have Souls) is what the world of science of today has not understood. Then this brings you another question,

(:52) which is what is the difference between the light, Ray and a field, which in the future teachings we'll explain. When we say we are the Light, not in the essence of the man like vision, but the Light as Enlightenment, as a Knowledge of the Creation, which is the Soul of the essence of the Totality. And when you become wise to it, transmutation becomes part of the life in any level, and strength, and dimension in

the Universe. Now you understand where the knowledge and explanation comes from, and how in a way from the essence of single Deuterium, which has Soul, leads to creation of Carbon 14, which in every essence is the line of communication in the, what we call, physical dimension of the plasma of the Universe in the energy level, not in the physical dimension of the matter manifestation. Because, in a way, the Carbon 14 is the aircraft and Deuterium is the speed, the direction and the position of transfer. (:54) In the matter state you travel, you see the light in the matter and it takes you so many light years to go, but in the dimension of the field strength of the Creator is instantaneous, because he is in connection in dimension of the Soul, which is one knowledge beyond the knowledge of the present Man. When we talk about the STM, the religious leaders 'jump up and down.' When you speak about the Soul of an atom, when you speak about the Soul of a Deuterium, you speak about the Soul of the Creator. Dimension field strength. And then, that knowledge of the Soul, is another knowledge which man has no right and the privilege to know, with the presence behavior of the man. That Soul is a Soul of the giving, the love and the Creation. And Man is a destroyer of the life. And you cannot see to that. In the future teaching, the Daughter of Mitra will teach you about this. That's her job and not mine. Even though we fully understand and know the knowledge as we have given it to her. In essence, if you understand as we go deeper in the

teaching of understanding the Universal fields, then, you will understand from this picture,

(:56) how this was created (?? North and South Pole drawing). If I can get it, there we are. Transfer of energy to matter state. Then, if you understood a simple part of this, then you understand why Iron (Fe) is the magnetic field matter state of this planet. And the connection of life, fields to the Creator. And how planetary systems, body of the man, the STM, the galaxy receives energy and transfer of fields directly from one to another. This behavior, magnetic field behavior of the Iron and a Carbon 14 is not coincidental. The Iron is the manifestation of the matter state, magnetic field (is) manifestation of the energy state of the same. And in its connection, you see life. And the difference between here and 56 is your emotion,

(:58) hormones, other materials, and the rest. Then all three connects, and works in the same line, directly back to the Creator. Now you understand when says, "I made man in an image of Myself." Now scientifically you understand. Everything in all directions connected to the same point. Where is shortage? ?? Emotion changes additional material in respect to and the rest comes to connect to two ways, especially when it comes to your amino acid (AA), one to the line of the Creation and one to the line of the Soul of the dimension, position and place. Once the science and scientists

of the Man understand this, the world of Creation, the world of transportation, transmutation, medication, everything will change. And this is the purpose of the teachings from now on, step by step. Understanding this, at this moment of time, within the structure of the Keshe Foundation, we are developing a system which produces this, but in the energy level, in the plasma level. Which means our knowledge has reached the point that we can produce amino acid (COHN) through interaction of the fields and not combination of materials.

(1:00) Which means we have understood the connection with Deuterium, we have understood the connection with Carbon 14, and with it we have understood the connection to the Creator. And this is the part of the process of teaching in the coming time. To understand the connection between the matter state as a man in a combination of DNA, and as energy, as a Soul, as an energy package, which this has an infinite time and this is everlasting. In a way, to your language, even the Soul, or the Central Energy, has a DNA too. Which can fit within the dimension of life as a structure. It follows a pattern, it follows a connection, and if you in a way go back to understanding of the technology of the Knowledge of Creation in your matter state, when let's say you speak about the Carbon, you put it, with your understanding, 6 neutrons, 6 protons and then 6 electrons.

(1:02) But what you have not been taught, what you have never considered is the beauty of the Creator, all this ?? has a Soul, which dictates the behavior of the Totality in respect to the energy. This part we have not understood because we never thought, the Soul is only for the Man, or central control is only for the Man. Every structure has that. And then, if you understood this, that... is this (?? Central Energy of that group), which interacts with the environment, which the other Souls or central energy connection, dictates the radioactive decay, dictates the process of interaction, and the rest. Depending on its field strength and the rest. As every one of these electron protons and neutrons are within this environment a plasma. Not the matter state. If you understood this, now you understand how nuclear decay even happens. You understand the essence of it, the reason for it. And then, if you understand this, with the change of the Soul of the environment, you can change the nuclear decay within an atom. When I explained this to my professors in London University, I was told, "You're crazy." Now you understand there is no craziness in it. Because I can make a nuclear material out of a glass of water,

(1:04) a molecule of water. I can make it to be more effective than a Hiroshima bomb. Because I know what I need to give to create. I understood the Knowledge of Creation and the man is stuck with the knowledge of physicality and it doesn't fit. It's too big a foot to fit into the shoe. Because we understand the

process of the interaction of the energies, not the matter state. You can make a nuclear bomb hundreds of times more powerful than the Hiroshima from Deuterium. But, that when you do, leads to creation of new lives, not the destruction of new lives. Because in the energy impact you create a new environment, to confirm the beauty of the Creator, not to destroy the beauty of the Creator. And all that goes back to this (??), if you understand the Knowledge of the Creation, and then the emotion which goes with it. And in fact when I tell you about the Deuterium and nuclear bomb,

(1:06) you as humans do it to yourself every day of life. You with the blood within the circulation of your body, create such an emotion which in releasing that emotion from outside to the cell of the body of the Man, you create your strokes, you create your heart attacks. You have seen the power of the interaction of the fields from outside. What keeps you alive kills you, because you add the energy of the emotion to it. All I need is an atom of Deuterium, give it the emotion, the explosion of it will destroy the Universe. I have the knowledge. And many times when the Man has made me so angry, I always thought, why don't I use it and just be done by it. You do it to yourself. You bring your own strokes. You bring your own heart attacks. You bring your own cancers.

(1:08) Use it the right way, same energy, brings love, brings care, brings the adoration of the Creator, and our knowledge is the same. You can do the both. And

we chose the later, to give love to humanity, to bring him to understand the totality of the Creation, and not by destroying the man. It's the same heart, you give it the wrong energy, it kills you with the stroke. You give it the right energy, it brings you the same love. But in essence, it's the same ?? love, it's the same Soul. It's you who decides on the emotion. Now you understand why from the very first teachings with Dr. Kostova, I always added emotion. If you understand and add the right emotion, you learn the Knowledge of the Creation. Now you understand the difference between transmutation and transportation. And what we do, we get you to go on a system, you get a headphone and you think I'm sitting there. But we change the hate to love, the destruction to building and construction. On those little headphones on your head when you connect to our system we change you from inside to learn to do.

(1:10) When you do it, you say I changed. You don't understand. We sow the seed. You just follow. If you understood the teaching of today, you're on the right track to become a man of the Universe, but you have to understand how you are connected, where you come from, what feeds you, and how it connects you. Because the line is very fine, you have the dimension of the Carbon 14, and you have the amino acid of the Man. And then if you put this in a 4 dimension which is the Star Formation and the Soul, then you need to add emotion, matter field energy and the rest to create the physicality of the man, in essence, with a Soul and

emotion. That 56 to you, and the 43 to the Amino Acid of the man, is the difference of the emotion, for man to become the man of transmutation in the Universe. As we said, Carbon 14 is a line of connection, and man is short of.

(1:12) These teachings is for the Man who understood today, and for the scientists who research which have been developed for thousands of years to understand even ten minutes of the teaching of today. In the future teachings we go in more detail to understand how you are connected to Universe, and it's you who chooses between the matter state and the energy state. One has a limitation of time for his existence, and one is everlasting as it's connected to the Creator. We go for a small break, and come back, to answer any questions. But I hope, I hope from today's teaching, you understood a simple way, that the World of Creation, if I go around and around, is all connected to each other. And you're no different, who the skin is white, black, green and grey, they're all connected to each other. One is manifestation of the matter state and one is the manifestation of energy. If you know how to play with it, you can make ?? it ?? anything you want. Rick, would you take us through a break and we come back.

>> BREAK >> 578 KSW February 20, 2025

Part 2

(1:18). K- Okay, thank you very much. The understanding of today's teaching is important for Knowledge Seekers (KS). As the future structure and the processes which we bring in, is to create that dimension of the emotion that elevates a man to become, to live in a continuous two dimension of the Souls and STP and the physicality of the man. As we always said, Keshe Foundation tries to create, for you to understand, the field dimension of the existence, even is to bring matter states in and try to influence and direct things. We try to go into more detail in explaining different interactions, different field works and the rest of it. The process of the session tomorrow is primarily set for this purpose. It's the first time we create a condition of transmutation within the structure of the dimension of the systems we have developed and your connection.

(1:20) Please read the emails we sent to you a couple of days ago, that you are ready fully for the session tomorrow. If you don't have it what is sent to you prepared, you will not go through, understand, or feel, or go through the emotion which we set up for you to be prepared for the transmutation in the latter part. This is all connected to understanding how energies flow within you and how you transfer from dimension of physicality to energy and vice versa. We do everything from our side. You are just the players in this act, but you play the game. We create the

scenery. And it will be very interesting to see how much difference in emotion, in feeling, and in transmutation you achieve in the tomorrow's session. Please, when you come in, come with no intention, come with no pre-set mind as we create that emotion in our systems for you. We explain it as usually I don't give pre-set mind to, you know, for you to expect something, But in the sessions tomorrow for each group, we will try to get you into a position you've never been before, but don't panic, rejoice in you being elevated or can elevate yourself to a point of coming to that point. And try to understand that this will become part of your life in the coming time.

(1:22) We just, in a way, as an instructor, we show you how to change the gear, where is the brake, and be careful you don't hit another car. So tomorrow's session is very important, and please read the email, because it's different than before. You never had this before, but it's very simple, and it's the beginning of the bigger structure, which comes later on in the other sessions as it follows as usual. I've just been sent a notice by the team in the background that they have launched a new product which is what we call, Coasters and the instructions is with it on the Keshe Foundation Sales website. These are handcraft and takes a lot of time to make every one, it's getting customized, you can ask for what you wanted in your order, I want for emotion, for Happiness, for Love, and whatever, and for Depression, for whatever you feel the emotion of, you want for whatever, the

combination of these Coasters will be there, I think we can show you. It's already posted on the Keshe Foundation website. Try to understand that the position of the Keshe Foundation in the coming weeks will change drastically internationally. And for that reason we keep the teachings completely separate from the, what we call the other side of the work of the Keshe Foundation internationally.

(1:24) It'll be very hard not to... or keep the two separate, but we try to, what we call, bring this forward in a way that does not affect the what we call, the work of the Keshe Foundation. (You can see the Coasters I think somewhere I can send you the link you're trying to go through it). So in the coming days, in the coming months, we try to, what I call, be very precise with the teachings because what we say can, what I call, affect the outcome of our work internationally. (I have sent you the link Rick for it). You will find out from now on we try to avoid to answer certain questions because it can affect the standing of the Keshe Foundation and our work in the international arena. And we try to be very, very, what I call precisely correct, that does not lead to misunderstanding or create problem for the Foundation and our work outside the Foundation. Which is again connected to the Foundation but political, whatever reasons, we have to stay very, very clear in respect to this. And this allows us to, what you call it, to create a new dimension of work.

(1:26) Which we, as Knowledge Seekers, we are not used to. But, in the world of the Man, we have to obey and we have to follow. So try to be very precise in the questions you ask and we try to avoid anything which can bring conflict between the two interest side of the work and essentially of the Foundation ?? but in two different dimensions. (I think you got the right page, you received it there). This is a new product. We work later on with different versions of this for transmutation and the rest. You will understand as this is, we brought this deliberately to expand in a lot of dimensions of the transmutation in the future. They look like Coasters but there'll be massive addition to this in the coming weeks as especially we go through transmutation and different applications of the Keshe Foundation technology, for Space technology. Any questions? R: I was going to ask if the Coasters are designed to be put under a cup or glass, but I see it does specify that in the description here. K- It's a food safe, it can be used in the future products which they put out, you can even drink from it or put plants in it. Yes. You put one Coaster underneath and one Coaster over, if you want to get it. Or you can put the Coasters in different positions in the house.

(1:28) And I think there is a part or should be a part where you say for what purpose you want it to see if it can be done. (You can specify which purpose when you order). R: Yeah, let's put that link in your chat so that people have that available. K- It's been the same with the Soaps. The Soaps has been a success. In a

way we, a lot of people are putting repeat orders because they've seen the effect of it and it's more or less we are putting orders back to the manufacturers. But we just go further and we increase the orders. And it's the same with these. These are the practical part of the bringing in and doing a lot of other things with it. Are there any questions? Q: ... Good morning Mr. Keshe. Thank you for your beautiful teaching. And I have two small questions. First of all, you said the Ray has a Soul. I have problem, I mean it's very new for me, and if there is Soul, is there an emotion with it also? K- Yes, I think you have to read Book number two. If you read book number two, you don't have that problem. In the in the world of science we have a big problem when, what is a big, what do you call it, dilemma in some quarters, if the,

(1:30) when is the light ray and when it is a photon or energy, because sometime creates. When you have in the matter state of the light, you get the energy, you get the impact. When you have it as a Soul of the light, because it's in a higher order, you don't have that impact or light creation of photon. So, we see it in physical life, now we, we, we understand behind it. Because the energy of the Soul is much higher, it's like neutrinos, it goes through, it doesn't leave any effect. And there's a way and there is a difference when the, when the ray is a ray of light, is a matter state which interacts when we see the pressure of it, or is it as a ray of energy which is the Soul of the material. And then in the Book number 2 we explain

ray of light is a cylindrical version of the, what you call, a spherical shape of the matter state. In a way it's arrowed, it's narrower. That's why it can. And it's so energized that it can be stretched. It's like, I explained this to a child, maybe it's the best way to do it. You get a chewing gum, chew about five or six chewing gums, make a ball out of it, and try to get it through a hole, doesn't go through. Get the same chewing gum and stretch it as long as you can, as thin as you can, and you can get it through a hole. This is the story of the light. But this stretching, one end is to the Creator, and the other end is the observation of your eye.

(1:32) This is sometimes when we look up into the light, into the sky, we get enlightened, because if our Soul is at the level of the absorption of the energy, we receive the enlightenment, because it's within that light. So, if you read Book number two and understand the explanation between now the matter and energy, and understanding that light is itself a plasma, stretched. Then you understand from teaching of today, it has a Soul, it has a central control energy. There is a very big problem. Especially, especially in the Iranian religious community with the Keshe Foundation, where they're abusing the understanding of Central Energy and the Soul and saying Mr. Keshe is coming up with all sorts of things and the rest of it. But they will see the problem they have with themselves, not with the technology and the knowledge. And you will see the same thing very soon from Vatican. And you will see the same thing from

Jerusalem. And it's your responsibility as Knowledge Seekers to explain, to understand. This is why we taught the MaGrav systems. This is why we taught, took the picture of your Energy Center in the past few weeks for this reason, that you understand the difference and the influence of the field, in the structure of the life of the man, and in how you transfer this. And how you bring this about in the dimension of the,

(1:34) what we call, the STM. What you saw with the MaGravs, then you saw with what we call, structure of what we show as a Soul, is no difference. In fact, there is no difference whatsoever, in any of it. I'll try to show you a picture which is very interesting for us. And then you understand how this dimension of the Soul changes, and how we see different characteristics by what we call application and implication of the energies. When we looked at this, when we structured this, we see an amazing data in how your Soul manifests itself in different dimensions. We can tell you how we are, how your structure sits, And, how we see the energy transfers. I try to get you some pictures to see. This is from, what I call, the recent trials with the Keshe Foundation, that you have seen with us. This is not a MaGrav system. This is a, what we call,

(1:36) it is your Souls or what we call your Central Energy systems, which we have through means of electronics have brought it to be able to see. And you see how different you people are and how your Souls

are. Some of you are having a meeting with me who went through the session last Friday, this afternoon, after today's session that we go through the way your Soul looks and manifests itself and in what dimension and direction you are. So what I'm going to do that you all can see the understanding of the technology as your own Energy Center, your own Souls. And with it we can characterize how you are, how you are in the development of the Soul. Let me choose in the right way or I should go the other way. Have a look, we've seen this before (he shows a graph). You see the three lines of the matter state. This is the physicality (bottom), this one is the STP and this is the connection of the Soul (top). This is the energy coming from the Universe. This (on the bottom) is the energy which goes to your body. If I turn this 180 degrees is exactly the same. What's going to happen? (1:38) You come over here from your Soul and then from your physicality and you go from here from Soul, depending on the speed we choose. So if you look at this, in reality, there is no difference than as I said before with your MaGrav system, the three layers. But now look at this one. This is another picture of the structure of the same for the Soul of another person. If you look at it, there is a very, very, very, very little STP in between. This shows, this line in the middle, is the split of personality. Not knowing if you want to be in a transmutation or physicality, because you see the field strength on both ends, of the same strength. This is at the point of transmutation. And what is interesting

when we see this, is very, very interesting for us as a research. This is one half of the side of the body and that's the other half side of the body. And you see it is not in a straight line. It's an angle. In the dimension of humanity, it's a dimension of emotion, where if you seen the other one, is a more or less is a straight line.

(1:40) This is collective Soul. This is a personal Soul. But further you see the same. Interaction of the energy transfers, very much bandwidth connected. You still see both sides. But the most interesting one is this one. Have a look at this. This is what I was explaining to you before. You have a split line. This is the time when you're ready to transmute. This shows a lot of clarity of Souls, we see this quite regularly now. Where the STP and physicality, sorry the Soul have connected directly into the light. Physicality still stays, so, it's, you cannot transmute. These are your pictures not ours, these are taken in the last sessions. You are part of it. Then you see the, how we can define you completely. At what stage you are ready to transmute, not to transmute, you are in a state of what you call it, balance or one half of the body wants to go, one half of the body doesn't want to go, or collectively you're there in balance, half of you stays half of you goes.

(1:42) And then this goes back to the light, the rays, the photons and what you call it, the ray. You see here, if I show you this, because this is a collective picture of many of you, you see one Soul here (down below) is permanently, we see it back there, attached

to physicality. Any other question? Q: Yes, so did this Soul of the ray, the plasma of ray has emotion? K- Of course it has. It has, it has a balanced emotion of the receiver and the source. Q: Thank you very much. Thank you. And then when you were explaining about amino acid and then you talked about Iron 56 and then you put Deuterium ?? flesh (times) the Carbon 14 ?? flesh for which gives 56. So what does Deuterium come into play in here? K- We will show you in the future teachings. It is much deeper. We just open a discussion in the future teaching how Deuterium becomes other elements and how it gets connected to the what we call the structure of the transmutation and transportation. Q: Thank you. Is it because it has the neutron?

(1:44) K- No, no, no, no, no, no. It's because it's a balanced field. It's a transmutation set. If you transmute from, let's say, Earth to another planet with maybe ten times more gravity, it's no use to carry a bone structure and the calcium. Because if you manifest with the body of the Man your bones will crush and that creates your demise. So with it, this is why the emotion of the place is important and what we call, the Inertia of the emotion. This is part of the work of transmutation through Carbon 14. As connected, conversion to Carbon 12 creates the condition of the life on the body, conversion of energy to life on this planet. In another planet it could be still Carbon 12 but different strength isotopes which does not allow this to happen. So, "Thy shall not kill". Soul cannot kill a body

itself. The energy of transmutation cannot. So, it accommodates transmutation to the position and dimension. You don't have no bones in other planet because you don't need it, because it can become the cause of your demise. Q: Thank you. So, just a comment, as far as the religions, in Islamic world, the traditionalist say that in the Koran says, Prophet, they ask you about the Soul, "You answer the Soul is the matter of God."

(1:46) And I think this knowledge is so new, that they still stick to that Koran, which says, "It's a matter of God." K- Now we show the connection to it. Why is it a matter of God? This actually explains the... in a scientific way, what is in Koran is as a word. How we are connected to the Creator. Q: Exactly, but that's too new for them and I'm sure when they see that... K- No, no, they understand it. Their money making is much more lucrative than actually adding their religion, you understand? And power. All our religious leaders are trillionaires, according to one statement from international accounting. Some of Iran Ayatollahs are on the top richest people in the world. Q: So you said that people who are not having the right Soul, they don't... they do not understand... K- They all understand, it's the same, they all understand. I work with couple of Monsignors in Vatican. I go to their homes when I'm in Rome, it's a friendship. And they live, a single Monsignor lives in a three-bedroom apartment, well-furnished, in Vatican. And I've had discussions with them and he was a normal priest,

became a Monsignor, during the John Paul time. Accidentally, he's poor. But coincidentally, his family are extremely rich, since he's become a priest.

(1:48) And since he's been promoted to Monsignor as an advisor to the Pope. All these people, is important for them to have their sides like the politicians, lubricated and they know how to do it. There is no there is no bookkeeping in what comes into religious organizations and this has no limit. Nobody knows how much you put in the pot and when it's collected at the end of the Sunday meeting or how much you go to the mosque and put in the box, collect it. I say I'm a man of God I'm the priest I said it's 10 pound it's 10 pound I don't tell you there's 10,000 I keep the whole 900. You look at the religious leaders especially churches in the European nations look at the priest and look at their families and look at especially the ancient Catholic religion, how the priests live expensive house. I had a very interesting encounter during the Christmas. I was in one of the European countries for a visit, and I was in a supermarket, standing in a queue. This priest with a long beard and long clothes had bread in his hand, a loaf of bread and I had it ?? (my shopping) in my basket. And he says, "Excuse me, can I pass you, I cannot wait for you to get your items, my driver is waiting for me." I looked. A man in a shabby clothes a priest has a driver.

(1:50) Where does that money come from? And we went with a taxi to the, what you call it,

supermarket. ?? says, "So is mine, waiting outside." So, religious people, even knowing the truth, they deny it, because it's a good moneymaking. Don't forget, even we look at the African priests in European nations, they have bought their seats and they are building villages and villas and everything else in Africa. You trace down the villages, the cities where your priest in Europe come from, Africans, Filipinos, from Thailand, from South America, and follow them and see how their families live, how they were before they arrived, how they are after and the people who sponsored them to come. They live a luxurious life. This is why there is no taxation on the income of the churches, the priest made sure of it, they can siphon the whole nation's assets. It's pure profit. They will not accept the technology which explains the work of the Creator. No way. This is why, knowing what is about to come around the technology in the next few months, I warned you last week to be aware, that the actual biggest problem of Keshe Foundation, will know... When the technologist, the scientist, the world of commerce will take the knowledge and run with it. Those who've been robbing the STM will have a big problem, trying to instigate problem. And this is the problem.

(1:52) Q: This is opposite of the way of life of the leaders of these religions, like Christ and disciples and Muhammad and Ali and family, they were not into the luxury, they were very... K- Oh yes, they were... You, you read Koran, truly read Koran. Whenever they

conquered the Jewish... time, they stood the woman, and the top man took the most beautiful one, and the rest was shared among the rest. And the rest, which nobody wanted, were taken to the market and sold as the slave, when the income from it was shared. They all been, they all been. Moses did the same. Read, read the Koran, you... just read, nobody lies about it. Didn't Muhammad, when he captured the biggest tribe, slaughtered all the men on the other side of the wall and took the women for themselves. And they said, the love of the woman. Who said, 'How can I love you when you have slaughtered my father, my son and my husband?' They all have done. Q: There is a word from, they say from Imam Hussain, the martyr Hussain, the grandson of the Prophet, which was martyred, and also the Khomeini, who said, "These people don't understand, because their stomach is filled with illegitimate money." K- Moses did the same, Moses did exactly the same. You see, when you look at the structure of Israel. It's very simple. You have those who are Jews, and there are those who were European who became Jews for the money making.

(1:54) And those are the ones who run the Israel today. Nothing to do with the religion. Name of the religion allows you to make a lot of money. And this is how they run the, what do you call it, the house of representative, the upper house in United States and in the English parliament, and the House of Lord. They buy money with the money. They buy people.

They have nothing to do with religion, it's just a frock they wear to cover themselves. And this is what people don't understand, they say, "Oh, Jews dominate the American policy," because they have the money and they buy it out. Hitler understood, I said before, Hitler understood why and he started a problem of getting rid of the Jews from Germany, because they promoted two things, money laundering, money interest, and prostitution. And Hitler wanted to get rid of both. The rest of this, what happened to Holocaust and the rest is all made up because they had the money to make it up and the people who were there are still there. We see it today. You have to become very, very, you have to become aware of what's going on even today in the world, between the religions and the other two side. We have three groups at the moment, especially since Trump has become president elected, which was not expected, and it changes the geography. And the fourth factor into it which come into play is the Keshe Foundation. You will understand very soon why. We have had the religious people who brought the war. We had the economists who created the war.

(1:56) Globalist. And now, the table has turned since Trump have come into power, the Royalists, the Royalists have come into power. And this is why we see the change. Religion people created the war, even Ukraine and Israel. The globalists financed it to become a war. They instigated it by religion, they financed it, made the tools by the globalists. The

situation, since Trump has come into power, because he's partially not a globalist, but a, what you call it, a businessman, and a Royalist, which means the king of England, the European monarchies, and some of the East Asia people, and monarchies like Saudi Arabia. And at the moment with Trump, the royalists have an upper hand, and people are not aware of it. If you look at the news, if you understand the structure of the politics, the way we do, it was very obvious things are going to change before the election, before the, .. inauguration. And how the Royalists have taken charge. And we saw even past two or three days how the royal families, headed by England which controls majority of them, is set. When, if you remember, you're in France, when the French president invited the American elected president to Paris for the opening of the what you call the church, after the construction. Coincidentally, the Prince of England was invited.

(1:58) And coincidentally, Trump by organization went to meet him. He's the king. He's ruling that Prince. And all the plans how a Royalist come into power is structured. To world of finance, without the globalist, with the Royalist, will bring the thing. And when I saw it, I said we are in the new phase of game. And you saw the phase of game. The British monarchy controls Saudi monarchy. They put them there. They decide what happens in that monarchy. It's a ranking. And what happened? Not to be interfered anywhere. They all going to make a lot of money. Ukraine is split

with the assets beyond man imagination, they met by the work of the British monarchy in Saudi Arabia. What has Saudi Arabia got to do between Russia and America and so cordially, finances are sorted out ... In a way you cannot colonize anymore. It's a way of colonization monarchies at the moment have upper hand and you've seen even they went 'for the throat' of the Rothschild's in past few days accusing of the pedophilia and all sorts. And we've seen how ?? Soras has been getting this literally pushed out the ?? farm .. done. ?? The royalists and the business people have decided to get rid of the what we call, the globalist and we see it. And you have to literally take their legs off that they can fall and we see how the legs are taken off. And the next step for what you call, Royalists to clean the floor is to get rid of the Vatican.

(2:00) See what Prince William has done in UK with the Church of England. He is the head of the church and he literally demolished the church in one go in past few ?? minutes. Colonization through economy has started. Trump is feeding it. The Royalist, the royal family of Holland, which is one of the most strongest one. The British, which are the more influential one. And then with the back of the Saudis. And now, the only thing is left, is to bring China on the order through the Taoism. You will see it. There's more money to be made through the peaceful ways and they literally colonize that way than the wars. And those globalists like what we saw with Bill Gates and others all are in the ?? doldrums today they're going

all half of them end up in prisons with the right or wrong allegations and the rest of it. But these people have got two years to do it before the appointed Prince becomes a King, and the appointed vice president becomes the new president. You will see this is just the structure set. And the religious people at the moment will have a short time to fight with us, because of the way we are going and then they have to handle the ?? royalists because they will take them. Just look at the past few days, how come everybody goes to Saudi Arabia and when they come all the decisions made there is no, even the Europeans have no say because British have already made the decision.

(2:02) Ukraine has become part of the structure of the financialist people with their money need to change without being globalist. They don't want to be globalist. They want to make a mess of, from whatever position. They are not looking to own the half of India, or whatever. Ukraine is a good place now to make natural resources and the rest. And you've seen how they put directly the, what we call, Americans in the mouth of the Danish, what we call, royal family, and the rest of it. Because England is trying to show, you have to understand, President Trump is British blood, direct British blood. He went to see the house of his mother in Scotland when he bought the golf club. The first generation through, and second, and they're all connected to the Scottish Royal family. So, you just got to wait and see, and

how the religious people will change. The biggest problem for Vatican is sitting in England. They gave, they took everything, they took the charge over the Church of England, during the death of Diana. Now, he's taking revenge on, what you call, the Camilla and the Vatican. He is a very clever boy, the way William is handling it. Don't look at the boy, he's 40 years old, but very, very mature, he's taking the revenge of his mother. He gave up the Church. And he's going for Vatican. And he can do it with the financial backing of the Americans and the others. And Royalists will take over in a very big way, the way they are showing, as we've seen in the past, working in Saudi Arabia.

(2:04) That meeting wasn't done by Trump, the meeting was ordered by Prince William. They cannot say no. Q: Thank you very much sir, and we pray for Peace on Earth, and utilization of technology for bettering the life of Man. K- We hope so, we hope so. We are in a very good position in 2025 to bring the technology in a very correct and positive way as front-end technology. You should have seen how we deliberately, through what we organized, we are interacting with these people on the X. It's a strategy which we both sides understand. And if you see especially the inputs we put into X in the past few days, past 2 or 3 weeks, is deliberately set up to create that condition. As you've seen in the X in past 48 hours, when they announced they are going to the Fort Knox to see how much gold is left, we put a note, it was prearranged, if you're short, we can make it for

you, that there won't be any shortage. And it is part of the structure that Keshe Foundation will come into in a very different way, where nobody can interfere with, in a way, through the structure which is part of our work. Any other question?

(2:06) Q: ... Mr. Keshe, when you talk about the tilt of the Earth, when you look at the South Pole and North Pole, okay, so we would say the energy, the field goes in, in the South and comes out in the North. None of we know if we have both come, it goes in and comes out. But for South Pole, we say we have a number 100 going in and 50 coming out, so 100 plus minus one becomes plus 50. So it means the totality is going in, and it's always been going in because the number goes in is always more than what comes out. K- Not necessarily, no, no, no. .. You have to understand the work of magnetic fields. In the house circuitry you have, they talk about the current, how much current you use, yeah? How much power you use. But there is a reversal to it called 'eddy current.' Call it gravitation (G). And in the American system and some European systems, they measure your eddy current, then actually your power. And if your eddy current is bigger, which means you are supplying into the grid, they come and disconnect you. You are producing energy somewhere. And this is the same with the plasmatic fields. You look at what goes up from the North and the South, you don't look at it's a three dimensional and you got the equators. The fields explode outwards.

(2:08) That's why the Earth is not flat, what you call it, is not spherical, it's more oval. It's not as simple as that. Q: So is the tilt is always constant or the tilt constantly changes? K- It will change. It's moving more to the vertical, the horizontal position. Very, very ... It takes millions of years to do. Q: Okay. And then, you know, the, the, the... K- I tell you, let me explain to you. The reason we know this because we have systems and we tested it. And we lost one of our reactors because of it, creating directional field forces. And we understood that very early in early 2000s. Because the system shows. So we understand scientifically why. Q: Because I know I was thinking, I was thinking when we were discussing this, because I said to myself, because of the tilt is constantly changing, so it means, from the time the Earth came to exist, and we have the dinosaurs, we have different animals, now everything disappears, a new one comes, maybe it's the tilt is changing that create different field, create different animals. K- Three different factors. One is the tilt. One is the gravitational pull of the, what do you call it, the Sun, which is pulling us to the center. And at the same time, due to interaction of the fields of the Solar System (SS), with the Inertia of the Earth, the composition of the structure of the surface of the Earth changes. They say, for example, they found material 20 meter, 10 meter, 50 meter below the surface. Where did this material for extra 20 meter has come from?

(2:10) We don't have tankers and trucks delivering it. It's a conversion

of the energy from the upper layers of the plasma, to matter state on the surface of the Earth. So, as the material changes, plus the volcanic eruptions, plus everything else, it creates a different composition of life. That's why we go through deserts, we have a desert line, as I explained in teachings before. The line of the deserts and the angle of the inclination of the Earth, are more or less on the same line, which shows the actual field transfer, with the high energy, where it goes in and goes out. And why it gets bigger in a certain point, central line, where the two fields interact, the ones coming from the North, the ones coming from the South. It's a cooking pot of fields. And then they have to come out at a certain point. Q: Mr. Keshe, maybe this question is a bit primitive, maybe I don't understand it. When you talk about the electron, proton and neutron, you talk about the Star Formation, but to me a Star Formation has always four bases, three on the bottom, one on top, is a planet, but the electron, proton and neutron is a triangle. K- No, no, no, no, no, this is your misunderstanding. You create the three, the fourth is the outcome of their interaction. The center. We put the fourth in to dictate the position of it. You understand? If you look at some of the churches, especially Russian Orthodox churches, East European churches, in the top of the buildings, when

you see these circles, if you look, the structure is a Star Formation,

(2:12) and the biggest stone is in the middle, which is the Soul. When you go to churches in Eastern Europe, in Russia and some places in Spain, just look how these spikes come out and how they've been organized. When you look at it from the top, in most cases you see a Star Formation, and the big dome in the middle is where it receives the full energy.

Knowledge has been hidden in different ways by the man of knowledge and used by the man of knowledge. And Tesla understood this. That's how he built his tower. Q: Mr. Keshe, when you talk about CO₂, you said 44 and COHN is 43. What's the relationship between 42 and 44? I didn't understand that. K- What you inhale and what you put out, where does the conversion comes from? Q: The difference is the conversion? K- Yes... It's a number of factors but that's your amino ... You see you have to understand when you inhale, they tell us we inhale Oxygen. Rubbish. Because 65% is Nitrogen. What is Nitrogen doing in that 65%? You have a Oxygen of 16, you have a Carbon of 12, and then what happens ?? between the 4 between the 2? Where somewhere in between, there is a Nitrogen. You absorb 16, you inhale (exhale) out what you call 12. You understand? This is where conversion of energy comes.

(2:14) Q: So, you know, and also you had the, you had the Sodium Chloride 56, Iron 56, and C 14, Carbon 14, four of them 56. And the Deuterium, how

many is 46? How many is 56? K- It is the difference in combination of, that's why you have Calcium attached to the Amino Acid, to give a structure. You get Magnesium, you get hormones as an energy level, to build to the 56. For .. Amino Acid to become a part of human body, it needs to gain three things, one is emotion, energy of emotion, one is the energy of the hormones which is the field structure of the Universe, the third is a matter state Inertia which connects itself to it by Calcium which is 40. Q: So, .. in fact, only having one element I can actually play and create all the other elements. I can go from Calcium to Iron, Iron to anything I want. K- Yes, but you have to understand the process. In the future teaching I explain how even resonances and frequencies are created. And the purpose behind resonances and frequencies. Man doesn't understand how frequency is created, in true way. The reason for frequencies. And the frequency is a conversion of the energy to matter state absorption. It's like we see with the eye we see at the point of conversion. And if you understand this and then you understand the effectiveness of intermediaries, what we call, the salts and ?? catalyzes,

(2:16) then you understand how you convert. Q: Mr. Keshe when we use the caustic to Nano coat, so what happens? Because the caustic heat is not that much to melt the copper and it is not that much to create chemical reaction. What it does is enough to pass the Coulomb barrier and allow the atom to be released. It's just like the atom gets fat. K- Wait, wait, no. What

is caustic? NaOH? The energy delivered by Hydrogen does what you put a laser beam to glow a god knows, or something or melt something. We use the energy of the Hydrogen to inject energy into the atomic structure, or plasma structure to change, to separate, to break the Coulomb's barrier. Doesn't come by coincidence. And part of that conversion, part of that conversion is not heat, is the direct injection of the plasmatic energy. In the NOH (NAOH), it took me years to develop, to understand, the use of NaOH. It took years. Q: When that energy is released and given to the atom so the atom kind of I call it, it got fat so it gets... K- It doesn't get fat, it gets liberated. .. It's the wrong word. Q: Can it go back to its position and like for example I have a Nano coat, copper, can I make it to copper again? K- Yes if you know what to do. We do. But we don't teach it, it is not a process to be taught.

(2:18) Q: Because you know in one of the teaching you were talking because this is for me is fascinating I was thinking how can we how can we do this, because the body also replicate this you see when you say 2 CO₂ keep their distance, because everything can keep the position according to the MaGrav positioning, because they have a field and the other one have a field, so they keep the positioning. So if you, you said if you introduce the Hydrogen in between, because of the friction between them, I can create light. And if you create enough resistance in front of it, you can create heat. So we

can do this in a very simple way that we can create a spaceship or even in our body, we can create the heat or coolness. K- Yes. Q: Playing with the same thing? K- We don't play, our body does it. Q: No, I mean, I can create light in my body following the same concept. K- You can create anything if you understand the... which Knowledge Seekers have never understood what ?? one day they might understand, the property of the Inertia of the emotion. Power of the Inertia of emotion. Then you can understand more. Q: I mean when I sit on top of the Himalayan mountain I can be naked and be warm. I don't need clothes because my body creates the heat. K- You've seen people jump into frozen lakes and stay there for 2-3 hours. Everybody else dies. Any other question? Q: ...

(2:20) Mr. Keshe, which of the plasma products available now or in the future is able to deliver full spectrum of energies for Soul emotion and body? K- Depends how it's done. The way how it's built. These resin material (?? new Coasters) is partially that way. It's building of that way. You will see and we don't want to do anything till you get it, till you understand it. But what I'll advise you is to when you get this new resin materials, different one of them. Just don't drink the water. Look what's at the bottom of the water. If you collect any residual, you put a normal glass of water, and put these and see if you see any microscopic changes. And then you understand how we can change the emotion and the... into physicality and vice versa. Because when you touch the resin,

when you touch the, what do you call, the Coaster, you carry your emotion into it. We don't teach everything, but its essence sits into it. And in essence, brings into play. The part of emotion, which we've built to transfer yours into the system, into the cup. This is a part, as you said, gradually we're building you up to this point. And everything comes in on its own time and its own process. There is a seminar going in this week, I think, in Austria,

(2:22) where the whole seminar is set, and apparently, they had too many people. They split it now into two sessions. They used a new Twinity system. That's the whole purpose of this session. Every person gets one of their own, and then they go through the process of interaction. In these seminars, you have to watch, what's the emotion of the one you're sitting next to? It's not just you sitting on the top of the system. Does he love you? Does he hate you? He's got no contact with you. That will affect you in a combination of the field transfers because you're in the plasma condition. Then you are transferring and you're receiving. It'll be good if the organizers of these sessions which are going, I think there's one more going in Germany very soon or Switzerland, when you use these in Twinity system put a glass of water on the top and see how your emotion creates vibrations and material in it, or if it does. Because it's in between you and the system. And we are bringing in the knowledge in a... through the back door and to... for you to learn. And soon we'll come to the front door. Any other question? Q: ... Mr.

Keshe, in the last workshop you spoke about the Soul, (2:24) emotion and body like in the MaGrav unit but I don't understand how can you replicate the same energy flow in a MaGrav unit since you use three identical MaGrav copper coils one on top of another. K- Yeah, that's your MaGrav system not mine. Q: Let me finish the question. What makes the Soul the most powerful emotion, or sorry, makes the Soul the most powerful emotion the middle layer and body the weakest? K- The body is not a weakest, actually the physicality is the strongest because has to hold the whole millions of cells together and manifest it, where the Soul connects to whole of the Universe to connect to it. And that, you need that transformer in between, which is the STP. You need that, we cannot get away with it. We see it in atomic structure, we see it in solar structure, now right in front of you. We have told you, I said, I made the man image of Myself in the Soul, and we said, always. It go back to 10 years teaching, I always said, the physicality is a, what we call, prison of the Soul. It's encapsulated in and now you see it, clearly see it. It's not that it doesn't have a power, it's because of this, the way the body physically is spread around it does not give it a chance, and when it gets a chance you call it a dream. Containment is the problem.

(2:26) And as I said if you ever understood the over past few years when we talk about Corona and how effective was in attacking the Calcium, then you understand the wisdom of life in man's life. It's very

simple. How the physicality has created a dimension of field strength on this planet, that matches or near enough matches the field strength of the holding of the conversion of the energy of the Universe to matter state with the STM. If you were in my place and you could understand even the picture (graph of Souls in session) which is on the screen now, you'll be... it's a thousand words in that picture. I can tell you the history of the Universe in that picture. To you it's dots of light and if you see, why is one of the dots more brighter? Why do we see on the upper level on the left more connection and then we see more connection on the right? And why do we see that Sshape in all of them, most of them? This is you, it's not us, this is pictures of you, your energy level, not a physical level. (2:28) Any other question? Q: ... Do time, place and position have to do with the past, present and future? K- We are product of it. Of course. We can change the future, if we can bring the present to the past. Or try to replicate the past, by letting the future of the others to carry on while you reverse yours. What does this mean? You walk with people on a pavement on the street, and you're all walking in the same direction. You stop one second and walk back three steps and let the rest carry on. By being behind them you see their future and you see their past, what they left, who left behind, who passed them. But you have created a new dimension for yourself, because if a car comes and hits that guy, you are next to him. By moving

backwards you change the future. You're not there to be in the accident.

(2:30) And this is the way it works. I don't believe into this, I live by this. Because, I understand the process. If you've been around me, sometime when something was something wrong, I move backwards, 2 or 3 steps, because I walk the same path, but I let that present time to be involved with what is to be present, because I create a the new present, a new future. And if you understand the work of the fields and energies in the Universe you understand this. You can even change position and dimension, as many of you know I love playing backgammon, I play extensively backgammon because it brings me be a lot of dimensions of thoughts. In the backgammon game, if you throw a dice, you can control the dice with your thoughts, 80% of the time. And when it doesn't go your way, it doesn't go my way, which I want to get something, people sitting in front of me, they see me, I throw a dice on the table, not on the board. And say, "Why do you do this?" Because I change the future. What was to come on the board comes on the table so on one step backwards forwards with the game. I used to play with my mother quite a lot backgammon and we used to love... it was a pleasure time to be with her. And I used to do this. She used to say, "Bring a cup." I'd bring a cup. I still get the same. She says, "You are cheating, you're controlling us. Bring anything you like. You throw it for me. I get what I want."

(2:32) She always used to bring a glass jar, says, "You put... you throw it in the jar, you have less control." I said, you get the jar as well. She says, "No, no, I don't cheat." I said, "It's not cheating, it's understanding how to control." And you can control it by emotion, if you understand it. You can change the future for understanding the past, and what you need to be and be observer to the future of the others, because they just pass you. You see their ?? past, and you see what's ahead of them in the future, because you are not there to see it. You are too busy to see what's in front of you. And this is why I always say, if you've been around here, I say, "I have all the time in the world." "So why don't you do this?" And say, "If you have all this, why don't you?" Because it needs to take its course, because I know where the end product is, where the end will come. And we know ?? how . They tell me, "You have the patience for everything." I say, "Yes, because it needs to go through its a cycle." I don't want to influence it, because that, and if I influence it, won't be what it's supposed to be, what I expect. How many Knowledge Seekers have damaged us? You wait and see what happens to them, and how it will go. In the structure of the Keshe Foundation, you remember the Red Circle? Have you seen how much he put and his life ended? With horrible, he died the most horrible way, with Corona. One of the first serious deaths. Why? I saw his future. He was a paid agent and he was doing what he was paid, and he paid for it. His daughter wrote to me, "I

wish my father, he died because of you, because otherwise he would have come to you and you would have helped him with Corona. But because of what he did to you, he had the shame to come to you."

(2:34) That could have saved his life, but he paid his way. In his own conduct, that pays for his own demise. So we saw the future, it had to be done. And you see by making certain moves, change the future, but be observer of the new future, but not what it was supposed to be. Sometimes it's not necessarily the good way, you end up in the right way, but sometimes it is the way it is. You change it, you can do it. This is why I always say, "Don't punish children, pray for them." There's no use opposing a child and trying to force your way. Tell them this is what it is. Don't tell them, "I pray for you. I hope you change the way I want." You pray for what is the best to be, not your way to be. And then you do the same, you change the future, by understanding the emotion of the past. Any other question? Q: ... When you transmute, does the fingerprint change? Or, how can you prove who you are? K- In transmutation, your structure is memory bank reserved, for the place, time and position and the environment.

(2:36) Always has. Unless you want to change it. You can change it, you have the... within the emotion, you can have an emotion of becoming a dog, dogs don't have a fingerprint, they have a paw print. And in a way, you always end up in emotion. This is why emotion is so important. I want to appear in New York

that my daughter sees me because of this. So you travel from London with transmutation to New York, and it's you, she recognizes you because it's what you wanted, you wanted to be recognized by. And that is part of the memory, it's just a photocopying machine, repeat. You cannot change your fingerprint and commit different crimes. No, you will understand, Thy cannot kill, Thy cannot damage. And it's part of the process of balancing of the Souls. If you translate the Soul as an energy, then you can understand. Any other question? Q: ... Do the Cosmic Ray Balls have the same specifications as the new MaGrav Twinity? I would like to order it, but as I am waiting for the teaching on the Cosmic Balls... (I don't know if it is the new MaGrav Twinity). I don't know if the two should be mixed?

(2:38) K- We do mix them, if you ask for it, yes. Especially with the Headset. The Headset we do, and some Knowledge Seekers ask, "Can we have the Cosmic Ray materials in there." It has advantages, it has a lot of advantages, or creates new conditions, that's advantage in a way. Yes, you can ask your Twinity set to, to, to have Cosmic, some of the Cosmic material which you purchased to be added to it, but it has to be laid out from the beginning. It cannot be done later on. It has to be done at the point of production. Twenty Twinity sets has delivered or we delivered this week. Some have already been collected, for this, what you call it, seminar. Nobody asked for it, but if you ask for it, it can be added to.

Then it has, does a lot of different things than the normal one. R: Will there be a teaching on Cosmic Balls? K- In a way, we try to do it through, or we have to do it through people first experience it, and then yes, it can be done, we will come to it. There's a lot of things happening around the Keshe Foundation, just give us time. Because we have the structure for international, worldwide operation. And these things will be all added with teachings, very much like 3 minutes videos on Tik Tok, will be added into the structure as we go forward... Let me say it, if you buy the Cosmic material and you buy a Twin set or the Twin Headsets, you can ask, you got to pay for the Cosmic material,

(2:40) to be added into your set, then it's already there. Because some people now ask for the Twin sets to have to be added, or to the headphones, and then they buy extra to hold in their hand, and brings a different dimension, it actually encapsulates you in, in the fields, Cosmic Rays. So, different Knowledge Seekers are taking different options. You can even ask the resin materials which are coming out, that your Cosmic Ray to be added to it. But it gets embedded inside, and it's a different world of working. If you use the replication units, these, what we call it, Coasters and other things which come, it works that way. You can replicate inside the water with the same. Any other question? Q: ... Keshe said that mankind is, in the previous teaching, said that mankind is not welcome in

the Universal Community or to go to another planet yet. So he says, "Rick, I'm looking at Donald Trump and Elon Musk and their attempt to buy their way to space and I think they're wasting billions of dollars trying. Would you ask Mr. Keshe what he thinks?" (2:42) K- I don't know if you've seen the rumors which is going around the same circle that man never landed on the moon. And they're bringing out a lot of proofs. It was all faked up that, how come we still can't communicate directly and the guy picks up a phone and congratulates these people on the Moon with their home phone? We still got a problem, 50 years ago, in some aspects of this. If we believe in both sides, mankind is ready to go to Space, but mankind is not ready to colonize space. Colonization means being living in as the area is. Colonization doesn't mean going in a, what you call it, monkey suit. And that comes when a man can transmute, can understand, become a peaceful man, then he can live in a society. It's a story of what I call the South Africans. They're white. They live in South Africa but behind bars to protect themselves. And that's not the way you actually live, because you don't understand the society that you live in. But as I said, if you read the X inputs of past few days, the Space technology needs the new technology to be able to truly colonize. Otherwise going there and jumping in the suits and not having a life and being weightless is not living. This technology provides. We expect to bring out huge number of new technologies this year. Which will

bring in Space technology forward by centuries more or less. And this process is part of, as I said before, (2:44) the Gas unit, which is the Energy unit, which is nothing to do with the gas ?? how it ?? work. And then comes the Energy unit of the power transmission. Not the way you consider, we consider, the plasma technology. And now we have achieved the position of production of amino acids as an energy. So we are reaching a, what you call it, integrated system, where the lift, the energy, the food, everything is part of the created within the central system. And this allows colonization and become part of the Universal Community. Because as I said, a few days ago to one of the Knowledge Seekers, we read in the Holy Books, of whatever you believe in the time of when the time comes, the promised time, the lion and the lamb will nest in the same nest. That only can happen when the lion is not hungry to eat and when the lamb does not need to graze. Because that's the time when they receive the energy from the environment, when there is no hunger and is in balance, you have no emotion of what you call it, killing and the rest. Here, there are two points. First of all, that lion with instinct of killing is the man, and the lamb is the Space, citizens of the Space. When a man needs, he doesn't need to kill, then he's in peace to be part of Universal Community. This is symbolic about the lion, but it's actually the man, which thinks himself as a king of the jungle, and when he's satisfied emotionally, and with a hunger, he's a friend to the lamb.

(2:46) And this is how the man will come. This has been promised a long time, but historically you read it the wrong way. That lamb is ... that lion, which is the ?? symbol of killing and better, is the man. And the lamb is the Universal Community. On the other hand, when you feed the lamb with everything it needs, and feed the lion with everything it needs, there's nothing left but the love and friendship. And the Keshe Foundation in the next few days we'll launch a system to this effect. That, when as I said we are taking two different parts of the Keshe technology and the other side of which you will see in the public, that you can put these systems on the streets. You can put them in the cities. No one needs to eat. We have reached the technology level, that we can produce amino acids at the field level, which can float like gases in the environment. And you take, you attach to it what you need from it, from the emotion to the physical. In a way, we feed your lymph in the atmosphere and within your body the same. We have achieved, we have... we know, and actually, a physical unit of it is under production. So, you understand the process. At first of all, the lamb and the lion is the man and the Space, when you become citizen of the Space. Secondly, we have moved to the position, in a way, to make a lamb out of the lion, ?? at the heart and emotion. Any other question?

(2:48) Q: ... In the last two months, there's been a visible water level decrease everywhere. Why is this happening? Could it be related to all the Nano

materials sprayed constantly or chemtrails for so many years and their interaction with salt waters? Where does all that water go? K- Where did the Americans dig all the waters in Texas? Ah, no, this is, this, what you call, geographical situation, is not important. Hasn't gone anywhere. Compression and depression does not mean going anywhere. Ask those people are in the water business, what has the density of the water changed. You'll get your answer. We have a beautiful Knowledge Seeker from Canada. He is versed in these things of water and sweet water at what depth and everything of it. I used to enjoy his talks when he used to be in, with us in, what you call it, Barletta, Trani. He is very knowledgeable, and it's amazing how he ... people understand water different than what we think or what we consider. He's an Italian-Canadian. And the things he used to teach or tell us about the water, and the way the water, it changes the water in the different depth of the ocean. And we have to ask those who understand these things, in more depth of, there is a density change? Because if the compression is there. It's, it's what you call, global warming, they call it or whatever, or we're getting closer to the Sun.

(2:50) The main factor of it, is how you commercialize. It's like, in Europe, we are used to, 5 or 6 years ago, the cars used to be covered under snow, we couldn't even get to the car. This year we hardly had a snow. Haven't seen that you can even make a snowball this year. Up to now, we are in the middle of February, end

of February. And is this due to global warming? Or is a phase, or we're getting closer to the Sun? It's a combination of three. But the more CO₂ we create, the more water we create, the more Oxygen we create which leads to the creation of life. It's a cycle. We need that cycle. What you burn as a gas, you get back as a water. But what happens to that cycle? Read the history of life on this planet. CO₂ is the factor of the creation of water. With the gases from the Earth. When you burn methane gas you create water. It's one of its byproducts. Methane gas, always burned with CO₂, created water. So the gases are in the atmosphere and the CO₂ is there, so it should be the water going which is produced by that interaction which led to creation of life on this planet. Greenhouse effect is Earth has jumped in a few millimeters towards the Sun. The rest is commercialization by the Dutch bankers.

(2:52) We see higher temperatures and on the other side you see worse winters in some states. And this is the sign of closeness to the sun, not global warming. If you don't understand, I think the new American president has come out of this Dutch game. All started by Dutch banker and so it made a lot of money for a lot of people. Any other question? Q: ... Mr. Keshe, is it possible to train the Soul so that when the physical body dies it can travel or transmute to a planet, for example planet Zeus. Thank you. K- Why do you wait to die? If you know to the transmute you transmute that you don't you are not conditioned on the field

strength of this planet. Why death is not I mean separation from physicality you call it death. When you know how to transmute, it's not an option, unless you decide to get rid of the physicality. You just move. You see, up to now, we never understood. Now we understand. Unless you're an American with what has come out this week, which is very interesting, some Americans live 300 years, we didn't know that. And apparently 6-7 million of them live over 200 years or 120 years. We didn't know that. We know it's true because they're collecting Social Security from the government. Somebody's paying it, but are they physically here or are we just paying for there Souls? (2:54) Death, once you understand, physical death, once you understand the work of the transmutation is not an option. "Thy shall not kill." Not even yourself, that's why suicide is not allowed. Because once man matures to understanding the work of his Central Energy, physicality cannot be terminated in one dimension or the other. You embrace it and you manifest it in different time and dimension. Thy shall not kill, how can you kill your own physical existence? That's why it's not permitted. Any other question? Q: ... I bought the Eye Sight and am using it with the glass of water, but it seems to me not too strong. I'm trying as inserting Hyaline quartz crystals in the glass with water, to use for 30 minutes, is this an experiment to continue? K- I don't know what it is. I don't know what you are doing. And secondly, we don't talk on those levels in these teachings... Send

your question to the, to the doctors. And you get answers from them. Q: ...

(2:56) Mr. Keshe, you said previously that the gold you made in Sanya cannot be taken to the shop to exchange for dollars. So, are you going to make a different gold to help fill Fort Knox if it is empty? K- Yes. Q: This is real gold that stays? K- Yes. I have pieces of it if you want. We don't teach you everything. You only know 5% of what's happening in the Keshe Foundation development side. Because we realize a lot of people are using it to misuse it. So we see a lot of people not doing it deliberately,

but not understanding it. They create their own problems, especially those who try to replicate and clean, and they use the Keshe technology. It's the Keshe, it's not... when you talk... when you see what they do, things, it's got nothing to do with it, because they never understood. There are 250 plus companies, organizations, people, commercializing, publicly selling Keshe products technology. Which we know them by the way, they never are then, hardly any of them are ever in touch with us. And they come to these teachings, they listen to the teachings, like you see the Coasters, you say, "How many Coasters will appear tomorrow?" And what they do with it, they just have the CO₂ and the Zn, all it has. That's the worst thing you can do. But you don't understand, because there's much more into technology than others. The Knowledge Seekers who use the Gans's they put in the water, it doesn't, what you call it,

bought from other Knowledge Seekers on the name of the Keshe thing, has nothing to do with us.

(2:58) But they don't understand the procedure of the use. Now we are scientifically in research and development of the technology which reverses creation of any lump in the body. But we understand it from Space technology creation of the lump to you as let's say cancer, is a planet, that is a star, how is it created? How did that lump appear in, in meteorites, or as asteroids, and whatever? So we replicate it, we see it, we see how we can change it. And so, we sit here with that knowledge, and Knowledge Seekers don't understand it, just do. Whatever you get, you change, is purely understanding of you, not the way we work. Not the way we operate. Because I learned a lot from Knowledge Seekers. You go on websites and other things that are sold around the world under the name of Keshe Foundation. Has nothing to do with the way it should be done. This is why very soon we'll bring all these structures people under one umbrella. You don't have the license from us, you're fake. Because we control what you're doing, because our name is on it, has to do what it says. We know there's a lot of Chinese companies, they are in Europe, the guy who stole the Keshe Foundation in Italy, all of them, with the law, with the regulations, within very short time, we'll bring them all under one umbrella, rules and regulations. And they'll be owned by the Keshe Foundation, you watch what's going to happen.

(3:00) We'll be partner, we'll be inside it, and otherwise they can't operate. Because they're... they do a lot of fake things. But you have to understand how you apply it, how you do it, and how you can do conversion of it. Any other question? R: Hey, we're doing good here. We just got a couple more to go, if you can hang on. K- Yeah, we'll give it a few more minutes. I have a very heavy day today. So, we'll give it another 10-20 minutes, and we'll be go. Q: ... Is the scent of the Gans Soap as important as the fields? K- What? The scent? Q: The scent of the Gans Soap, is that as important as the fields that are... K- Yes, scents are created by the fields. If you can smell it, if you can feel it, it means it's converted to the energy that is absorbed by your body. Some Gans's have scent, we know that. And depends how you do it, how you apply it, it can have a lot of beautiful results. We use this in part of the technology development. I used this, ?? a scent, by the past 20 years, many times. Q: ...

(3:02) Can we use the Soap in a way that the Coasters are used under the glass? K- I presume yes you can, but it's different structure we do the Soaps. R: Wonder if you'd have a soapy taste to your water. K- Some people would like to .. You remember when you were young, your mother used to go and wash your mouth with soap? What it do? Did it give you new energy? Or actually the taste of it, it changed you? Any other question? Q: ... According to the Wikipedia, Donald Trump's mum, Mary Anne McLeod, was born

in the village of Tong on the Isle of Lewis, which is a tiny island off the west coast of Scotland. So he definitely have Scottish roots to that. K- Yeah he's he got a Scottish look ?? roots. Have you seen his belly? It's very Scottish. Q: ... Are there Headphones where the Cosmic material is incorporated, and is the Cosmic material still there to buy? K- Yes we're still taking orders. Actually the first batch of Cosmic materials should be dispatched latest hopefully next Friday, or sometime within the next by end of the month we hopefully.

(3:04) Or first week of March it has all come together. It's actually completed. I've seen the first lots, the boxes, everything. We're just waiting for the material which is in the post to arrive in the next few days. And then the first batch of you who order the Cosmic Rays will start seeing it appearing. Q: ... When we buy the Keshe Coin do we get the coin or is it just a financial deposit in the Keshe Foundation? K- I don't... It's... we don't... we don't produce a coin we gave undertaking to the European Central Bank few years ago that no coins will be provided. Because there was talk... there will be announcement very soon about the Keshe Coins. We are moving Keshe Coins with the option, your option, to change it for something else. It will be within the next 6 to 12 months, because we have to follow the regulatory criteria, which is put in by the Central Banks and Governments. And we are moving the Keshe Coins into a, you can decide to keep it as it is, or move it into a different structure, which is still

Keshe Coin, but will have a position to gain value. We kept the Keshe Coin at a 1,000 Euro, with this change in next 12 months or so, you should be able to move Keshe Coin into a different dimension. It still stays Keshe Coin. It's still a donation. But you can play with it in a very big, different way than in keeping it at 1,000 Euro as a deposit, what you call it, a donation. But this gives you...

(3:06) we had to do it because there are things which are happening in the background in the Keshe Foundation that allows us to do it. And then, you can convert it, or you can buy Keshe Coins in that domain. It'll be connected to, to, what you call it, different parameters. And we've done that too, as part of the work of the Keshe Foundation, it's a, what you call it, a Universal system. You can buy Keshe Coin, buy material in a shop in China, the same price as you can buy in New York. But it's not paying dollars or whatever. It's a Keshe Coin. It stands on its own value. We are not bringing it as to change it with the Bitcoin. Bitcoin is totally different. It comes out in a very, very different dimension, very, very strongly connected to work of Keshe Foundation and International operation. In 12 months time or so, we'll announce it, it'll be a batch of maybe 10,000 coins on this bracket. Maybe 100,000 coins on this bracket, or below. But then it's open to all the institutes, insurance companies and the banks to buy. Any other question?
Q: ... Hello Mr. Keshe, we've seen news lately about the alignment of some planets in the solar system and

this week we're seeing a lot of seismic attacks in the Canary Islands. Could you tell us if the gravitational fields of our planet changed?

(3:08) K- I don't know. It just all depends on positioning, creates, fields motion. What does it have to do with the Canary Islands? Is it targeted to the Canary Islands, the field motion of this alignment? Possibly maybe in a very small way but you cannot confirm it. We are dynamic, we are rotating. They are dynamic, they are rotating. We are moving position all the time. It is not a laser beam job, kept on. It could interact, it could have interaction, yes. Shall we call it a day? I think you've earned your keep there today. Mr. Keshe thank you. K- Thank you very much. Before we go, those of you who have a session with us this afternoon, please keep your time, because it's a very long day, we carry on for a long time. And those of you who are with us tomorrow, stick to your sessions tomorrow. Be there prior to time. And it'll be a very interesting journey in tomorrow's session. Don't come in with any thoughts. Let us build up that transmutation in your thoughts. And then we create the environment for it to happen. And the six bottles of Gans's, two headphones, bring with you that we can enjoy the journey. Thank you very much. And see you next week.
