Part 1

(:12) K- Yes, thank you very Good morning, good day to you, as usual, whenever and wherever you listen to this Knowledge Seekers from Keshe Foundation Spaceship Institute. We welcome you back, and as usual we carry on with the expansion of the knowledge. There is a lot of mysteries around our historical data's and materials around us, which, like the intro of last, what we heard today, from last week, When we speak about the churches, you have to understand, if you go around Europe, if you look at the church, as we said before, and look at the top window of the church, all the churches have a window. You see it from more or less four sides. There's a pattern to this and none of these are the same.

(:14) You, if Rick goes and pick up some of the big churches and show us, we see there is a secret in these windows. And if you live in some cities in Europe, you see one church within a few hundred meter of another church. And some churches are literally built next to each other. But go back and into the history of these cities. We don't see such illnesses in these cities, in these villages. I used to live in a small town, village like, in Italy. And in such a small village there were four or five churches and always said, because, okay, we live by the sea, people were very religious, they go to fish, come back, they will come back alive and they gave a third of their income or whatever to the church that they, you know, have a

good fishing and come back alive. But if you look into the structure of the churches, the windows of the churches, you see something very, very interesting. Let me pick up. This is what we picked up by... if you... go, go back up. Go back. Oh, go down. Go, go, go down the way you're going. Go down, go down, go down, and stop. There. Have a look at the third picture on the right, or the fourth picture on the right with two circles, two different circles, one black and one white. Pick this up and bring it up. Or there's some others underneath of it.

(:16) Just screenshot it Rick and put it back up. R: Which one are you looking at? K- Any of the right... Yeah, ?? things. Then the one next to each other and the one in the bottom. Yeah, these two, yeah, and the one underneath of it. Pick these pictures up and... no, no, go further down. Pick that picture up and there was a little picture in your screen. Anyway, just pick these up that we can talk about on the basis. Yeah, that's the one. Just pick these pictures up. If you look at these in the churches, people never understood what this means. Is the science knowledge? And yep, the one beneath it, these are all churches, church of windows. We go and admire their beauty, but If you understand the science, none of them were built for beauty to show you. These patterns, these shapes, were ?? correlated to matched with the bell. All the bells from the churches were taken away by the order of Vatican and then the other churches. Early last century because when it came to Rockefellers and the

Rothschild's they understood, they bribed, they paid Vatican to take the Bells out of churches. Why?

(:18) Now we have the knowledge, Now man... knowledge, advanced technology, has advanced so much that if you take these pictures, copy them, then put a pot of water or a flat surface of water and add frequencies to it, it match every single one of these shapes, according how you created the frequency. Frequency is a magnetic (M) fields in motion when it needs, meets, resistance, and he has to go through it, and he finds his wiggle around. That's what the frequency in the world of science, of the cosmology. So, when you tune a frequency to a water, you get these shapes. And you find out each shape matches certain illness. Which means when the church bell went, it cured its citizens who could hear it. There is an old saying in English if you're a Londoner, they said the true Londoner is those who can hear the 'Bowl' bell. 'Bowl' is the bell which was in East London, and you're a true Londoner, it's because you work in the docks. But, you find out that churches were the healing points. The frequency that the bell created, shows in the picture, was for certain illnesses. That's why we didn't have such illnesses now. Today we get pharmaceuticals injecting us. The churches, those who were the ancestors of us, found the secret, know the secret.

(:20) You see the same construction in Egypt. Pyramids create certain frequencies, bring certain emotion and in early last century Rockefeller and

those who understood, they took these out, the bells were taken out, new bells have no relationship to the pattern which is on it and if you make a frequency on the water which matches this it tells you which illness, which emotion this will touch. Then, this comes to much deeper understanding, that you have to understand how to handle this, how to understand this. There is a secret in the world of pottery. One of my companies years ago was involved in these kind of things. But, just stop there, on the right hand side you see this green, multi-color one. If you're antique collector, or if you understand your home, not the new cups and ?? saucers. If you go to churches, you see they used to use specific glasses for drinking, or giving water to. The new silver things are new. The royal families, the rich people, never drank in the same cup as communists did.

(:22) Especially look into blue shade, look into the green shade cups, look into the red cups which the royals were given. Even the children at birth were given milk or water or whatever out of these glasses. Reason, they knew the science. And now we bring in the same science back in the cups and what you call it, soaps and everything else but it's not far from what has been done for centuries when the man. It has been erased from the history of man. If you see a green cup made two three four hundred years ago, buy it, hold it. These cups, these glasses they didn't have colors the way we have today, they're made by natural minerals which created this cup, these colors.

Green is a uranium-based nuclear-based energy, you don't contaminate yourself, you get so much excess energy that does not allow no illness in the body of the man. When you hear about a Cup of Life we created and all the mayhem people tried to cover it, is the knowledge of the universe. This knowledge was given to man thousands of years ago. Why the men of medicine of the kings always carried certain glasses of whatever? Because they were told, they understood, when you drink from the green cup it gives you this, when you drink from the red cup it gives you blood circulation, increases the red blood cells.

(:24) To you, you just drink the water. To man of the medicine of the time, they knew the secret of Creation. The same, what you see on the screen in the different color shade is what you see in Space. You see light you don't see a man, you don't see a creature. We see the Soul of the Man (STM). What is the intention of that light? Go back to the teachings of four or five years ago when I explained this, now you understand it. What emanates from the Soul tells me what's the intention of physicality by the color. But understanding what it carries, a green to me is the energy I need to survive any, whatever you call, viruses in the Space. The red is for interaction, for increasing the dimension of the fields of the higher strength. This is what the man needs to be educated. This is why we I told you from a few weeks ago, the new cycle of teaching is to bring man to understand

how to interact with Universal Community. The talk of today is the world order, new world order. The teaching of today is the Universal order. As I said to one of our very close friends from Australia.

(:26) She said to me, "Globalists are taking over." I said, no, darling. The Universalists are teaching to bring man to community of the Universe. This is the purpose of the teaching. Rules of the Universe as we take man out of his globalist village of Earth. And the secret of knowledge has been with a man, has been taught to the man and over time has disappeared. Because man did not create the level of communication of today, that every man will be equal. Villages, cities, towns, or whatever, kept it to themselves and made it a position of power through what they call clergy. The biggest enemy of the man has been those who hide in these buildings, because before it was where the refuge was. Next time when you pass a church, next time when you listen to a bell of a church, you know what you've been stolen from. What was supposed to be, which is on the mirror work and what you hear which is taken from you to reflect it. In the dimension (D) of the Universal work, when you travel the span of Universe (U), the intention of the light, the intention of the observation of the light is indication of your existence. When you see the pure light, it's indication of the Creator and His dimension. (:28) Because it's what everything else has been rejected, and what it stays pure. The color we see is the color which has been rejected. What things comes

out of. Goes back to the teaching of last week, when, and the teaching of the week before, When I put the three layers of the skin, the three layers of Neutron, Proton and Electron, the three layers of the STM, the MaGrav system we gave you, there is no difference. Now you understand, the Totality of the work, is in understanding the work of the Creation, not just for Man to be, and to take what he likes the way he likes. Man will only understand, see, feels, and everything else, to do with the dimension of the Creation, and nothing else. And in fact, you cannot do anything, if you are not, you do not understand, you

do not work, within the dimension of the Creation, and what it brings you that dimension. You have to understand, the totality of the system, which is in front of you, indicates what a Man will see, and what a Man has to see. What a Man needs to share to see. And this will bring a new dimension, to what we call, the Knowledge of Creation.

(:30) You got to understand, in totality of the knowledge of Creation, Man needs to, Man has no choice but, to work within the structure of the Creation. On the planet Earth, you consume matters, you consume materials of the air, the water, and everything else, to keep your life going. In the Space, you need fields, you need to understand the work of the fields. You need to be able to connect with the field of the Universe to exist. And for you to understand that you have to look at the dimension of energy, magnetic field in motion, than the matter state

of manifestation. When, in the dimension of the man's world, we speak about the electron and proton and neutron and atom, in the dimension of energy, we speak about One, which is the common denominator energy which all three can exist. Which is the light, because it has no physicality. Interaction of the fields within a proton, with interaction of the fields within neutron,

(:32) and within proton creates a new dimension, which is the energy, but with no dimension. But in interacting with each other they create a new dynamic cell, which we call it the Star Formation (SF), where the base three are made, and in interaction of them, base four is created. This is where in the knowledge of the Universe, as I said in the past teaching, that fourth base is the light, where the other three are matter entity. This is why the world of science does not understand the difference between the light, photons, and matter state. Why sometimes light is a photon and sometimes light is a ray and the rest of it? Because when we see that nothing left, there is no energy, is the time when the common denominator fourth level energy, which we call the top of the Star Formation, is operating. The field is so big that the Neutron and Electron and Proton are inside it. And when the field is weak, you feel the energy warmth, a target that it releases energy. And when the world of science understand the difference between why sometimes is photon, and why sometimes it's particle, the way I explain now, then this opens a new

dimension. This is why on the dimension of matter state you are a UFO, in the dimension of the energy, you become that light.

(:34) With the UFO takes you according to those 10,000 lights years, in the dimension of energy, Instantaneous and continuous. And this is what as Knowledge Seekers (KS) you have to understand, as the world of science have to understand. And then once you understand this, the colors make sense. Speed. Why suddenly you see light in the dark? How come Earth suddenly has a light on it, and we have a daylight, but the whole Space is dark? In the Book number two I explain this in a very clear way, speaking about translucent light, but you can see through, but has no tangibility, has no dimension. You look in the dark you see the stars in the distance, we look at the galaxies, but there's nothing there, it's just a mirage. When we see a star, we see it as photon when we observe with our telescopes we see its matter state. In that photon is instant. In that matter state when it comes out times it needs space and time and why it's a ray, and why it's a photon, why creates different dimensions. And sometime we partially see both at the same time because part is matter state information in the matter state of brain, and partially is the energy state of the Soul. Looking at the same object. This is how when you stand in front of the person, you see the Soul through your Soul, but you see their physicality through your eyes, and say they

got the wrong intention, you feel it, or they are sincere, because you have learned to match the two.

(:36) And then you understand in deeper state of matter, then you understand in a deeper state of energy, then you understand why we brought a MaGrav system into operation from the beginning. And I kept on telling you, "You're looking at the crumbs, the cake is on the top." You're happy to collect the leftover what is there, but you don't look at the top one is there. Out of you all Knowledge Seekers, over years you've been playing with MaGrav system, only one person came near to understand the power of it, and it was Jon Bliven. The rest you look for crumbs. And he showed you again and again. He walked between the MaGravs. He sent somebody outside, 200 yards away, to measure the fields. He stood on the fields and levitated. And you never understood, it was the Soul balancing, that created levitation of the body. As Knowledge Seekers, we've given you enough tools to be able to survive the span of the Universe. As a humans, you are lousy. In the field of the knowledge of Space, you become very clever if you understand how to handle it. I was told, "You know, Mr. Keshe is humiliating, keep on telling us, you don't understand." Because, is not that you are stupid, because you don't understand the work of the Universe. You only understand the work of the planet Earth, the physicality (P). Look at the churches, (:38) and try to unravel their work. And one day man will study. Pick up the churches with these windows

and study the illnesses in the distance their bell could be heard. And see what diseases they didn't have. I've put the glass work and the bell hidden in the Coasters, hidden in the Soap, hidden in the MaGrav system, as you don't understand it, the Totality of the knowledge. When you get one of these Soaps, when you get one of these Coasters, when you get the Gans's from the Keshe Foundation, you have to match your Soul with it, not take the physicality of it. When the Japanese scientists, much earlier on, in the last centuries, showed how the intention changes vibration in the water. If you had good intention, the water showed, if you had a bad intention, the water showed. And he's put it down graphically. And Man as a Man is made of 90% water.

(:40) But Man as energy is equal to the energy of the Creator, which can convert that energy into the dimension of water of physicality to change the Man. Now you understand, why, as I said before, we started teaching this way. We start explaining about your Soul. Now we start for you to understand the work of the Universe, and the knowledge is not new. And I've said many, many times, go back, past 10, 11 years of teaching, we've given this knowledge to Man many times. But those days was just the village and the town, and while they could give to another, they became the next magician in another village. So, I take some of your income because I showed you the trick. Isn't this the way Vatican works? Isn't this the big mosque work? We show you the trick, but what you

take in your parish, some comes to us. Licensing through religion, by the name of the Church, by the name of the Holy Place. Look at the scripts, look at the tree of Adam, look at the tree of everything else in Torah, in Islamic world, and everything else. It's one big magic show. The ones who couldn't understand it, they have added other bits to it, to do it. And the ones who understood it, they changed it. Knowledge is free, understanding it, costs a lot.

(:42) How you interpret, how you understand the knowledge is the key. Not that the knowledge is there. As my grandfather used to tell me, there is no difference between you and a donkey. You see donkeys, because in olden days, when we were young, they used... donkeys used to come with a big sack on their back, on two sides. One side was newspaper and one side was salt. You had papers or newspapers or books you gave to the man, he weighed it and he gave you an equal amount of salt. And he said, "There is no difference between you and that donkey. That donkey does not understand what book is being given to, carries on your back. And you carry it in your bag, going to school. You have to understand the essence of what's in that bag, what's in that book. Not to remember it, because it's there." And it's the same with the whole of humanity and just a whole of Universe. Understand the knowledge. Just don't carry the knowledge like a donkey. Those days used to be books, now is microchips and Apps. But the same donkey.

(:44) Understand the intricacy of the knowledge in the energy level, you become Man of Space. Work with the dimension of the matter-state, you stay man and you fight for every breath. The technology (T), the knowledge of creation, has been given to Man, centuries ago. Thousands of years ago. But, as I said, it was the Man who understood village to village. Now we give that knowledge to every Man, because now the line of communication is open across the Universe. You are people in Brazil, some people in Africa, some of you in Australia, in China, you're all getting the knowledge at the same time. There is no franchise called churches and mosques and the rest of it. This is the reason why income of the religions are never taxed, because the Man who made the governments and the Kings had to pay to them to find out about the secrets of Creation. And most of them never understood and they created green cups, yellow cups, and the rest of it. Make yourself a small homework, find these churches, find these glasses and then go on the Internet and look for the highest diseases and lowest diseases in the area of this church.

(:46) Then you understand what Rockefellers and the Illuminati's stole from you when they took the bell out. They took your health, and with it they took your wealth, wealth of knowledge and nothing else. This is part of the structure of you in the Universe, interaction of the Man in the Universe. Look at every single

one of these pictures. It has a center. Always comes to a center and depends on the dimension of that center. That center is the Creator. And whatever you see, is the light radiates equally amongst men. That's the meaning of these. And this is why when you make the frequencies in the water, the center always comes to the radiation of the fields and the rest is matter state to show how it's been radiated. When man become knowledgeable and looks at the Universe, you will see the same patterns. And from the pattern of the Universe you know what kind of creatures live in these structures. What to expect and the closeness of that according these structure of Universes or from fields, how close is that mentality type of life in that Universe to the Creator. Behavior of the man. You find the most disturbed churches, the most disturbed mosques,

(:48) people of animal behavior but trying to be religious, is where rivers, waters runs on the churches and the mosques. And you find men of war men of anger, men of conflict praying in these places. Running water on the churches create disturbance in the emotion of the man and not the woman that much. Now you even understand, how the interaction of the fields of the Creation, with the STM, creates that infested behavior of the Man. You find yourself disturbed in house, you find a disturbed house, always conflict and war. Doesn't matter on which floor you live. Look what's beneath it, what created. 99% there is a river running under. And it affects men more than

women. Why they built the churches on the top of hills and mountains? Those who lived in Italy understand. (:50) Those who live in Germany and Austria and others pay for it. This is where those who understood in what we call the Roman time, and before the time of whatever, you'll see that wherever you go in the world, cities, villages, are made by the side of rivers, creating disturbances continuously. Rivers will run into these rivers, and everything else. That's where the water is and where you live. Italy is the only country world which builds its villages and cities on top of the hills and mountains. To keep away when the people build these places they understood when you go to any city in old ancient time of Italy, they always said they build their cities on top of the hills and mountains that they can see what's happening around them, but they kept away from any rivers that it doesn't touch emotion. Look where Da Vinci worked, which villages he went from city to city to serve. When you travel next time across Italy, see why all the castles and everything and the villages is on the top because they drilled a hole two, three, 400 meters down to the waterbed, that it doesn't affect them. Those who build the churches on top of it, monasteries on top of it, understood the knowledge of fields.

(:52) And the man looked at the place of the building. In a way, when you hear that bell, not now, but in the past, being on the top, the whole environment was purified from certain conditions. Then you ask yourself why there is always had 2-3 bells, big one and the

small ones, and they rang together, they were purifying the fields of the STM, and not the physicality of the man. The man heard the noise of the bell, the Soul received the energy of the bell. Man looked at the food. The Soul receive the energy to become the food. Now you understand how the teachings of past years come together. Up to now, we taught you about the dimension of the physicality. The Books, the MaGrav. Now you have to learn about the dimension of energy. One cannot live without the other. I hid this knowledge in a form of Cup of Life's, to interact with the fields, but in fact if you look at it, the interaction of the Nano material with the matter, Nano material gives the radiation, the matter stops it, so it creates a resonance and creates a field that matches, the virus, (:54) that is the Twinity to it, that it drains it. Try to understand the science of the Creation. And then you decide, you want to work in the world of energy, or you want to work in the world of the matter, or you want to bring the two together, there is no coincidence and there is no dream, it's understanding one to apply it in the other. Understand the difference between a photon and a ray. Where you are the light, when the matter energy felt. And then you can explain this to the scientists of the top universities of the world, this is the common denominator light, goes through you. You cannot, you say that it behaves like a particle, or like a photon. Then, you don't look for neutrinos, because, you change your emotion, your body receives the same energy, you see the flash of light. That's the

neutron of enlightenment. But you say, "I had a dream and I think that way." Then, you understand the purpose of the teaching. This time we don't hide anything. You have to be clear in separating the two dimensions, manifestation or transition.

(:56) Manifestation is in the matter state, transition is an energy, which one day will manifest itself, but at this moment it's just traveling. That's why in the matter state you travel, in the energy state you transmute. Because somewhere down this line of transmutation, you're going to manifest yourself, and in that point, is the destination. And if you're clever enough, you can change it and move to another place, if you go to its energy. Once you understand the separation, once you understand the totality of the knowledge, then you understand there's a lot to learn, about the Universe, about the behavior of Universe, how these lights interact with each other, what's the outcome, what's the responsibility of you bringing the yellow light to the green light, or the whatever other color you see in the Universe. To teach you about the interaction of the lights is my job. To teach you the Ethos of the interaction of ?? life is Mitra's daughter's job. It's you who have to wait for his manifestation. She's beautiful, she has the knowledge but she will not teach you with the word of the man, she teaches you through the Soul of the Man. Then you have to understand what means what, in which dimension, energy or manifestation.

(:58) Try to understand the separation between the two and do not call one dream and one reality. Which in fact, the true meaning of it is, your dream is the reality. Because the energy comes through it. And the physicality just manifests what's come through. I made Man in the image of Myself, as I am the energy and the light. Not the physicality of the Man, otherwise I'll be the whole lot, solidified. It's not that you don't understand. It's that you decided that I deliberately ignore it, because it suits me better in the physical dimension. Then, you understand more about dimension of existence. In how, by the interaction of the fields, you create a vibration, which leads to manifestation of. When you interact, emotion of love, and you get the same emotion from another emotion of love, you fall in love.

(1:00) Lead to creation of better life, between the two. And if you understand that, your Soul is one lover, and the Creator the other. How you nourish this light, how you nourish this emotion, this energy, brings you to be closer or further. For you in respect to Him, not for Him to be to you. In a future teaching, I'll show you the dimension of interaction of the fields in the energy level. And how you use these to transmute. And you use these to manifest. You've got to understand the dimension of totality. You have to understand the dimension of reality, you have to understand the dimension of movement of Man as a matter of state, the dimension of movement of the man in the energy state. I saw a picture from the meeting of last week in

the, what we call, the session in Austria. And I saw one of the Knowledge Seekers, one of the participants had a jar of something on top of the MaGrav system, which they had a Twinity system. I wonder what happened to that water? Was that water drank? Or did you wash your face and head with that water?

(1:02) Drink it and see what energy you feel, wash your head, which contains your Soul within it, see what enlightenment ?? you receive. Don't forget that water comes from intention between you and what you absorb, what you decide to receive. In reality, nowadays it's easier for us to explain. You, in the dimension of physicality, are in the new cars which is becoming fashionable. You sit in the passenger seat and there is nobody where you call the driver seat and the wheel. But you decide where to go with the voice, and the car takes you to the destination. The physicality of the passenger seat is your physical life. And that emptiness on the chair which takes you around is your Soul. It's you who decides the destination. And the Soul will take you to that, because that's what you deserve, that's what you decided to be. Very soon in these vehicles you will not see any more dashboards and you would not see any steering wheel because none of you knows how to drive anymore, you don't need a driving license to be a passenger.

(1:04) You have to understand the work. You sit in the car, you think I want to go to the place you don't even need to talk and the vehicle will take you to that point

in place. Systems are getting developed to that effect. Now you have to learn in the dimension of physicality you are that passenger, in dimension of Soul is the vehicle will take you to destination. You have to decide. It has no steering wheel, has no clutch, has no brake, and if it breaks down, you're stuck. This is you who breaks down in understanding the Knowledge of the Creation. That's why you got stuck as man on this planet. In the coming time as we develop in technologies, you will have these dynamic, plasmatic, what you call microchips, which have no dimension, have more liquid, and then they have emotion. That's the time when man will be a slave to those. Because, your brain is locked into confirmation and the features which it has as a matter state. But that computer is dynamic and is liquid, and it can change to any position, dimension it likes, according to the emotion of Totality. Maybe you understand. The picture I've put in the book, where you see different layers of Gans's and I said, you see they stack different, but the information is the same.

(1:06) The solidity rigidity of the brain of the man has its limitation and in dimension of the emotions which man doesn't understand. And when you go in the dimension of fields, when you look at the Gans's, when you look at the new microchips which will come, which no physical dimension of soldering but connection through emotion, then man will become a slave to computers, unless you work through your Soul. In a way this is what we do with you with the

introduction of the headsets. The way we work with you with introduction of the microphones and the headsets of your Apples and others or the Cosmic Ray bundles and the communication systems we provide. Again, with those earphones from Apple you work in the dimension of physicality and the energies of it. All are problems but this you are learning. You work through the dimension of the headphones which you give, there is no limitation, you are connected to any dimension. In the coming time, I'll show you how you are emotion works and how you have ignored that emotion and how your emotion brings things in the dimension of Totality in your own operation, in your own dimension, in your own understanding and Totality of the whole structure. I'll try to show you something very interesting which it might bring you some knowledge.

(1:08) And we used to show you magnets and MaGravs and the rest of it. I'll show you something very interesting this is a data from you lot in the last Friday session, one of your groups, and then you see how we even see your intentions. It's very interesting if you understand it, and then if you don't, you're in trouble because you need in the future to understand it. If you go into what I call, dimension of the work in the past few weeks, which we showed you, you see very interesting points with each one of you in the session received different instruction, you received different orders what to do, and not two were the same. But interesting enough, what is for us very

interesting is how, what you call the Soul of Physicality (STP), we call it to you, what we call emotion, dictates the reaction. And in a couple of occasions in the session we clearly see who and how you bring things in and how you play it. And how your emotion dictates the condition of your physicality. What does this mean? It means you panic and you get a downfall. You work and you understand it,

(1:10) it brings you very, very easily the next process, which is you in the reality of the dimension. And in a very much how you lot, in your, whatever condition, your emotions controls your, what I call, physicality. What does this mean? You lot together, you're in the session, one of you panics because can't accept what is going through with. And then you have, or you as we say, hit a problem. What does that problem mean? This problem means that you have, or you entered, or you feel the what you call the others. So when one of you panics, the whole lot of you go into panic. Or you get a disconnection. Let me explain to you this way. You... I have to find this that I can connect to it with you that you can see it because this is part of the knowledge sharing and part of, that's what you have to understand. This is one of the unique features or cases which we had,

(1:12) and it's interesting how you as Knowledge Seekers respond. Let's play the game. By now you're familiar with this (shows a graph). To you is just bunch of lines but I open this for you. The green, which is on the up, coming from the top, which means now you're

going into the dreamland, it's coming up, the red or purple is the STP, yellow is your physicality, the blue is the average energy you're taking from the environment and what you give out so your imbalance. What's interesting about this is, watch this. You lot, or people in this group, panic at this point. The emotion puts you on a nose dive. But your emotion, STP is still in control on top. Even covers your physicality which is this line. So, the whole commotion of you coming out of the,

(1:14) what you call your dream, or transmutation is this panic point. If you go further into this to understand, you see this regularly in the sessions which we have with you. One of you panics, everybody else pays for it. But what is interesting is this what we see usually as pattern of your Souls, energy of the Souls. The STM, physicality, transition between one to the other. This is what you receive from above. You're connected to, and what you see feeding here feeding your physicality. In this session you see it, they are everywhere, but two clear points. What is interesting is this session, let me clear it out that you see it. For the first time, we see this. And we see concentration. And other pictures of this will give you a very nice indication.

(1:16) What does this do? Why you have this? If you're in a session, you're all going everywhere doing whatever you're doing. Here. Here, is where I came in and said, "Come and meet me". I gave you reference point. And within seconds, we saw the manifestation

of receiving fields. And this is one of the reasons in all the sessions, if you look, my phone is totally disconnected, that I have no interference with you lot. In the past, when we had the Daughter of Mitra with you, this will be totally different, because this moves to here intensively because you receive through the Soul. In the future I'll show you the pictures. Now, connection of the fields of the Man to physicality of Man, is a science. Is not anymore talk. In, in understanding this, have a look at this. If you understood the other one, you can see how every change in the motion of the man, the group is strong, can hold, can override, and what do you see? Again. The minute the emotion comes into it,

(1:18) you see the panic and the change and you see it. STP and emotion of the Man which is a connection between the physicality and the energy, dictates the manifestation of the physicality and how much Soul needs to give to it, to be able to maintain the physicality. But, there are one or two interesting points, which, if you look at this graph, if you understand it, it actually sits in a point where we know, you have transmuted. How do we know you have transmuted? In some of the graphs which we'll show you in the future, is this. This point, if you look at it, is the most important point, where the STP and the STM interact, or STP reaches to be within the Soul, this is the time you have no physicality. This is the how we know how many of you or in which group has gone through transmutation and this last session we saw it

clearly in two, three occasions. This is a reach out to go, this is holding on to fear. If you look at this, you see something in this very first picture. If you go there, you see it.

(1:20) At the point where the STP and the STM meet. And we know you transmuted. Look at the struggle in going through transmutation here. And look at this. We know some of you achieved. Always said in the teaching, when you transmute the STP goes within. When you have physical transfer the STM is within the Soul of .. , what you call physicality. Now you understand, now what we said for past teachings, you see it and this is from you, not from us. This is the picture of your energy, it's not us. You see here, you clearly see the position of STP and the STM reaching each other. So, we know some of you have transmuted. Then, the reality is, the whole purpose of these teachings is, for you to understand, how to live, in both worlds, this and this, and know when to switch.

(1:22) If you understand this in more detail, it's very simple. You come in from a dimension of totally physical, and now, you go into the dimension of the Soul energy. With you, you call this, the dream land, and to you, this is a reality. Try to understand the science and don't get baffled by the energies. Try to understand you live both lives. You just only need a little bit of direction. In the next session of the February, sorry, March we try to take you into that position. You have to understand how fields move, what's the purpose of the fields. And if you understood

this picture you go back in understanding very clearly why I kept on telling you, your emotion controls everything.

(1:24) It's not just that gives you love. If you can know what energy of the emotion you use in the dimension of physicality, you can transmute. Emotion of transmutation is unknown to Man, but Man lives with it, call it a dream. And it's our job to teach you how. And this is where, as I said many time before, there are new emotions that man is not aware of because has not got, has never been given a chance to understand or come in touch with. Emotion of transmutation is one of the most important emotions man will carry... is much stronger than even the love. Because, it's the love between your physicality, your STP, and your Soul. Nobody can buy it, nobody can change it except you. We are not a cult, we are not a religion, we have no temples, except the temple of the knowledge of the Creator to be created within the STM, or any creature in the Universe. We don't build our temples on the street, and we don't give them vibration and belt, we build it in the STM. And that's the Church of knowledge, Creation and the Universe, nothing else.

(1:26) We go for a break. We'll come back to answer any of your questions. Rick, would you like to take us for a break?

>> BREAK >> 579 KSW February 27, 2025

Part 2

(1:30). K- ... Yeah, normal. We never keep anything on the mind, do we? We go through a new phase of teaching on knowledge and this will reflect in the work of the next year, two years, where we bring a new knowledge in. A totally new and unknown knowledge, which helps to bring a lot of things in focus, especially for governments, for world leaders. And we expect to see the beginning of the end of the religions within next two years where the knowledgeable will come to understand and Knowledge of Creation and there is no need for fake intermediaries,

(1:32) does no matter whatever you call it. The ground for this is already set and we're just the tools of it. We are not the instigator of it. In a way, it allows the faster, or what I call, the latter part of the phase to come in to establish itself. It won't happen overnight, it won't happen tomorrow, but it needs to go through the phase to reach to that point. And slowly, step by step, we will see this in the work of the Keshe Foundation and what I call, if you call it from the teaching of the vibrations which create, the churches created, the vibration through the bells just for a village. We create vibration which touches the whole humanity and beyond. It's the vibration of knowledge of the Soul. And you will see more details, step-by-step amalgamation of what it is, what it's been and what it'll be and we cover this on the different ways in our work, on the national level, on the governmental level

and international level. But we will see a surge in the knowledge gained and Knowledge Seekers, you call it internationally, as this side of technology develops and as more and more people become aware of it. You don't need to be a Knowledge Seeker. Knowledge is shared and we see more and more of it coming in. It's very interesting if you listen to for example to the President of the United States. He, in one of the first talks he did, he said in his time there will be cars which fly. And last week we saw.

(1:34) Actually, X, or Tesla, is working with another company which is working on their flying cars. And it looks very nice. Till the car hits the dust and you see dust coming up. Which means they are using displacements of energy of wind or in a way they have hidden the what you call, the drone features inside the car. Because we know when you travel with a Plasma MaGrav System there is no creation of dust. You see the light. So we have to bring that transition to change that car which creates dust to car which brings the light and that light of enlightenment to change a car from one to another is in progress. It's part of the work which is gradually coming in and gradually one will see. And so, what we do is what is promised, what people expect, but totally in a different way, because now we go into the dimension of the delivery of technologies enlightenment and everything else together. Be aware, when I keep on reminding you in the past few teachings, don't become arrogant with what you see. Start to become wise into how you can

share that the others benefit by it. Share the knowledge and let it be understood that it is not yours, it belongs to the Creation, the Creator. You're just a tool that you know a bit of it, you can share with it, that they can share it with others. And in a way, as we had experience in the past couple of weeks, the knowledgeable people see the shallowness in the knowledge, if you pretend to be yours or you pretend to know you understand it all.

(1:36) And Knowledge Seekers, when they come to professionals, you have to understand the Knowledge fully. And not just be reading books, with no understanding of, because those who understand the Knowledge, dismiss you, and you discredit the Technology, and all the work which is done around it, due to your ignorance, by lack of knowledge, pretending or thinking you know most of it to introduce. Try in teaching to refer people back into the Source, into the teachings. That it reflects your strength, it reflects that you know, what you know, it's for them to judge and understand according to their understanding. And step by step build your knowledge and don't stick only to Gans's and the rest.

Understand the energy side than the water and the Gans inside it. In the coming weeks and in coming months we introduce to more systems which brings you more to see the effect literally of the fields and how to connect between you and what you call your Soul and the systems that we build up this what we call, invisible dimension of the fields between all

Knowledge Seekers. And as you saw in the graph, when one of you shakes, the rest shakes, because you are in one. So when we share the Knowledge, it's shared amongst all. It just depends what you can take from it, and how confident you are in what you've learned about yourself. Are there any questions? Q:

(1:38) Thank you very much for your efforts to teach us something. To elevate a little bit as a whole. And I have a question, it's very simple, naive question. One, how does a person know the moment they have been elevated. Do you feel it? Do you... yeah. And is it kind of it last some time in their life, this elevation? K- Depends what you call elevation. Depends what you consider as to be elevated, or just because you get enlightened and understand a little more about the world of the Creation, you consider yourself to be elevated. Or you receive information, or knowledge, or whatever and you see it as elevation, as being better than before, understanding more than before. The process of elevation of the Soul is very, very clear. Extremely clear for those who receive it and go through it. And if it's in the, what I call, big steps, massive change, you feel it in your physicality.

(1:40) Even when you're transmuting. You might transmute and when you come back you say, "Oh, I understood something." But that's the knowledge you created through the fields of the Universe. The way you do it in your dream. But this time you instigated by going, suddenly came across another field, which added to that you see higher energy order, what I call,

information ?? or life. But if you receive it in the back of this space in one go elevation you'll definitely feel it, I tell you'll definitely feel it even with your physicality. Soul elevate, physicality has to match and God forbids it takes time. Your own physical body is a stranger to you. Because now you see a different level, now you have to bring the physicality to see it. And then it takes time, and then you get used to it and then you get another time it gets worse. Because, but you're already used to it, I've been there. It's like when you've broken the leg, when you've (broken) something, I know how this feels, I broken a leg before, I know this is broken, it's broken. It's the same way. It's how by experience you understand the elevation of it. I was telling this to a Knowledge Seeker very, very recently. When I was younger, I used to be very busy, unbelievable ADHD triple times. And when you are that busy, you create mayhem for yourself. And I used to have a lot of cuts and bruises, and cuts on the head, was very normal, because you play football, you do everything else. You think your head is part of the football and the rest of it.

(1:42) I became so expert that I used to go to the clinic, and tell the doctor how many stitches I need. And he used to laugh, he says, "Mehran, you become an expert." 3 switches, I said to him, he said, "Yes, it's exactly 3." And it's how we gain the knowledge, and what we learn from it, and what we use it, when it comes as the Enlightenment, to understand it, and we feel it, definitely feel it. It's like the way you feel death,

That's part of the elevation understanding the journey has started. Q: I mean... What I wanted to say, when we transmute during session, people know at that moment when they transmuted? K- Yes, especially this last, last Friday, a number of people had a clear, clear transmutation. The problem is the panicking in which brings back and most of these panics comes from the people who are in transmutation, or reach transmutation. Because when you do it in the sleep it's nothing, I'm not here, body does whatever I like. When you do it yourself, now you have to get used to it. That it's me who causes it, not wherever it wants to go. And that's the difference. And we see it. We saw it in the week before, in the graphs of some Knowledge Seekers. The emotion which affects both the physicality and the Soul. And we show it in the graph. (1:44) You can build systems in the future, you will see. Again has to be made, through energy levels, not the physical matter, we are ?? converting the physical matter. Where, with instruments, we can say, when a person is ready to transmute, "Beam me up Scotty job." You have to reach energy level. But can we give that energy level to your Soul that dictates a manifestation of control of emotion to the physicality and you transmute, or you bring the STP within the energy of the Soul? And then there are other steps to it. Q: And so, that's the physicality of the person, or a state of mind, or he's just waking up, or hasn't eaten, or feels pain or feel it has... K- You see, when you do that in sleep, .. you feel a pain or whatever and you

wake up, It's because half of the brain is working, the other half is in transmutation, it's opened up, it's going somewhere. What you feel is on the physical side. It's like when you're dreaming, you call it, you're in transmutation and something happens and you start kicking. Because that information is transferred into the physical dimension and physicality shows kick. Watch if you have young children, 3, 4, 5, 6 years old, because they haven't mastered it in a way, and sometimes even the adults do it. Watch your children after 2 or 3 hours of sleep, and when they start dreaming. How they kick,

and they shuffle, and they turn, and they laugh, and their eyelashes click,

(1:46) because it's the pure, they haven't managed to say, it has to be hidden, cannot be shown. Training in sleep, what you go after Soul, to be hidden from physicality. You all do it. We all have done it and we still do it. When you're holding your partner in bed, see how ?? frigidity it is. Oh, he had a dream. From the smile, from the shakes, from the cuddle, hardness of the cuddle, you can gage what emotion is going through, if it's a nice dream or is it a frightening dream. I usually wake the children up and I see these things, as wake up, you are in the other world." And they look at you and they see you and they get the confidence that Daddy is there, and they go back to sleep again. Q: Thank you very much. God bless you. K- You're welcome... We have to learn how our energy fields, what we call, dimension of the Universal

fields, in contacting or coming in touch with our physicality, manifest itself. In the dimension of the Earth we see the Sun fields interacting with the field of the Earth. We see the warmth, we see the light, we see the reaction of the summer and the winter. It's the same with the body of the man. When the Soul interacts with the STP, you get the kicks and the motion of the body. It's the same, there is no difference. Earth still has emotion when it gets those things and so does the body of man. It's just us, because we don't understand it, we don't... We just put them into different pigeon holes, but it's actually one hole and one pigeon.

(1:48) Any other question? Q: ... Mr. Keshe, when you talk about the churches, few questions I have here. Jesus didn't make the churches. So, who made the churches and who brought this knowledge? That's one question. The second question is, you know, if you remember the Japanese guy, the scientist, Emoto, he .. collected water around the churches and then he took it, he showed us the shape of them, become like those flowers you see in the window of the churches. And then when he went and he collected the water by some industrial areas, they were like milky and dark, there was no shape into it. So when these bells went into a circuitous sound because we are more than 75% water, we are made of water. So the water in the body clearly got those shapes, those shapes are like the windows in the churches. So the body organized itself in a crystalline

kind of way, so the body became healthy, there's no diseases. Now, when they made the, that's another question, when they made the houses or cities in Italy on a mountaintop on the hillside, away from the water, was it because the effect of the water, if it became, (1:50) because you have no control over it, whatever the water shape became, it affected the body and the water in the body, that's why it created a problem, so they try to stay away from the water, am I correct? K- A number of things. I'll answer your first question in a different way. We see the people are a way, certain ways and thoughts and whatever. Look for someone to be there, the leader, and then they bring their own essence into it, of the work. Jesus didn't bring the churches, but those who understood, who can use his name, built the churches to bring the old knowledge to control the man the new way. That's the difference. Because they saw it in the, what you call, Jewish religion. How synagogues, in the combination of making the light, the candles, and everything else, could hide things inside. And they perfected the art. It's like bringing pagans to bring the Knowledge of Creation and putting it into their religion, in the name of the Christ. That's what they all, they did. If you go to England, you still find pagans, original pagans, and their surname is pagan. And some of them hide within their religious Christianity.

(1:52) Especially in some part, if you go into the dictionary of the surnames in England, you find pagans. Because they never changed, and they kept

themselves that way, and they live in a different way and they have a different path, they're very close to the Zoroastrians. And I had the pleasure of having a couple of close friends, pagans. They live like nobody knows from outside, but even the features are slightly different than normal. It's like we have a black and white people. Pagans have a very specific features. Just go on the list of the names in England, they carry that name. But those who understood the knowledge, given the knowledge of the past, and how they wanted to use it to their benefit, they made the churches and their subsidiaries, and giving to another church, and I collect some (money) of you, what you get and the rest of it, it's a business. The name of the man (Christ) was used to open the shop. And some of them carried the knowledge, or learned the knowledge from the past, and then they brought it forward. So, it's not that .. Hidden in the middle of churches, people use his name to do what they did. It's like, we talked about this before, why all the pharmacies have a snake as sign outside the door. In each country you go you still see them, one version or another.

(1:54) Because the man who had a snake at home didn't get the black plague, because the snake ate the rat. We have to understand this, and we have to understand separated knowledge from the physicality, and what is hidden and in the ways of it. It's not that hard, it's just being wise to the knowledge and seeing much more in depth than what's on the surface. Q: So you didn't talk about the water cities on top of the

mountain top that's away from the water because of the effect of the water on the human body? K- Yes. You see, I tested this, if you ever came to our residence in Italy. It was a... it's a single house on the top of a hill. And it had substantial land around it. And the houses are built on this ridge. It's literally a ridge on one side, It comes up there, like a slope to the house. The closest water is about 180 meters deep. And there are three deep wells which were dug centuries ago as part of the land.

(1:56) And they're all 200 and 220 meter deep in different locations on the land. And you see a stability. We used to live in a house which the water flow was a few meters below and you see the chaos. You can change the motion of it. A lot of buildings are covered by this, when it was built. As I said you, you have a disturbed child in bed. You have two choices, you can go for the dimension of physicality, or bring peace to the Soul, which gives peace to the dimension. If you go dimension of physicality, make a copper wire in Infinity Loop and put under the bed or on the pillow, where there is no metal, metal mattresses interact. And then you find change in position. But the modern version of it is put a cup of Gans under the bed, the Infinity Loops of the Keshe Foundation, the Butterflies, you see the change how sleep pattern changes, because you interfere with the fields which come from the earth side. And then you understand why we behave different in different seasons, in different positions. Every few centuries and you see the

violence increases, then look at the position of the Earth, where it was when we see huge violence's and everything else. Always in the same area of the Universe or Solar System.

(1:58) It affects us from above and that affects us from the underneath. And it's a very simple because it's like a blood flow. You change the blood flow, you go to deeper sleep, you go change the blood flow, you awake, you change the heartbeat and the blood flow, you get different emotion. When you get excited, your blood runs fast, your heartbeat goes up. Is there any difference between you and what happens on this planet? The rivers are your veins, and the speed of flow depends how much rain is on the top, and what you created, more rains and more flow. This is the difference, this is what we have to understand. We just call it things. There is no difference in reality. Q: ... I'm confused here because you said knowledge was given to man a thousand years ago so they use it in churches and the bell kind of got rid of the diseases and then the vaccine and Illuminati's they removed the bell so the churches were a good thing or a bad thing? K- Depends if you're the church who abused the children inside it, or you're there to heal the others outside. It all depends on the man inside. .. Q: Okay. So you know when at a certain point during your life suddenly you could be sitting or mostly sitting or could be any position but then when the heartbeat is heard, but there is no breathing. What is happening in that situation? There is no breath. You are not taking any

breath, but you can hear your heartbeat. So if you are not breathing, you are not taking Oxygen or nothing, but why your heart is beating?

(2:00) K- You know some whales, the big ones, Blue Whale and the rest, they have two heartbeats a day. Sometimes. Do we need a rapid heartbeat when you see what body they move? It's just a way we bring things to ourselves according to the energy and the flow of the energy. Which is a lot to do with emotion.

Q: So, is it because of the same reason? Because the water changes with intention or words or sound. Is it for the same reason somebody who is constantly angry or agitated, After a while you see they have diseases, because the water in the body constantly changing shape, and if they don't have the crystalline shape, they have the murky no shape, affects the body in some way... K- Oh, it's part of it isn't it? It's like... But we control it. We control it, we are, we have, we are fully in charge of it. Have you ever seen when a mother sits on a table, or a mother is with two children, both call her a mother, but one is adopted, or one is from the husband's first marriage. And you see how the mother reacts, speaking to one child. And how mother reacts, speaking to the other child.

(2:02) And look at their behavior, in the long run towards children. You understand exactly how man controls his emotion and the outcome of his physicality. The same word, the same blood. Even mothers with their own children. I sat on a table and I watched a woman many times with anger speaking to

one and with love and tenderness to the other and the one with love and tenderness could never do wrong and the other one was always wrong whatever he did. Our emotion reflects our thoughts and reflects our physicality and reaction. Why do some parents, why do some parents show so much love and care to one child and they demolish the other one? And what's the reason? Isn't one imaging the misguided reflects of their lives, the one which the encourages, the one which matches them. Even the other one is perfect. Q: Thank you Mr. Keshe. K- You are welcome. Sorry if you hear a lot of noises in the background, if you hear, we are on the move. And so there are a lot of noises in public. Any other question? Q: ...

(2:04) Good morning Mr. Keshe. I have some seeds of vegetable plants from 1955. R: Which happens to be my year of birth. Q: What type of plasma water should I use to increase the germination power? K- Depends how you want to water it, huh? You want to water them with the love and care, or they might not even grow, because they have already spent all their energy. This is... it depends what you get out of it. And how you change things and how you make your Gans's to do. And what is the purpose of. And would any of them grow at all after so many years? This is part of the knowledge you have to gain, and you have to decide what you do with them. It's like poppies, poppy seeds, fights for centuries, and then suddenly, if the condition is right, it grows. Otherwise, it doesn't show itself. Any other question? Q: ...

(2:06) I had a question about our agreement in the private teachings so something becomes clear for me because I've read a part and was confused. One, can we share just the knowledge which is taught in private teachings to the others, or we have to teach only the public side of the knowledge? K- Private teaching is mainly done by the Knowledge Seekers who knew a little bit more, or they had some expertise, so it's part of the public knowledge but it is in private. But we don't allow public teaching to be coming out because sometimes the knowledge is the wrong way, or misunderstood the wrong way and can affect, because comes from the teaching of their foundation the wrong way. And we've seen that many times. Knowledge Seekers totally misunderstood and then misrepresented and then those who are there to catch and say, "Oh you see this is what they teach." But it's actually their own reflection of their own understanding. Could be right to them, but could be wrong to you or the others. And that's why we say public teaching is .. ?? private teaching is kept that way for you to assess your knowledge on it and base your knowledge on what is there, because it's from other than Knowledge Seekers. Q: ... Can we teach the notes and writings we have written from that private teaching? K- That depends on how you understood from it. Yes, yes. But you have to understand you are correct. We had a call from one of our Knowledge Seekers, very recently, past few days. That they invited a Knowledge Seeker to give a talk to

some professionals and the knowledge carried was not correct, or could not be answered the way because they just read a book, they have no depth of knowledge.

(2:08) And it brought difficulties for the listeners and the person who organized it. Because the Knowledge Seekers, they thought, knows the knowledge, actually knows nothing, he 's just reading books. And the knowledge was conveyed totally the wrong way, which can cause huge problems for the Knowledge Seekers of the future, or for people to actually understand the technology. And in the next few weeks, I'm going to correct what the Knowledge Seekers, they thought knows ?? about, created so much mayhem. And what you're asking is, this is a current in the past couple of weeks. And we see this a lot of Knowledge Seekers don't have in-depth knowledge, Knowledge Seekers have, cannot explain to especially professionals, the depth of the knowledge, and then it gives the wrong image, wrong information, wrong credibility to the whole work. As I said, like last week, the week before I explained, this guy knows how to make a battery that runs, a car runs, with a frequency. But then we have another one who does something in the world of medicine, but he has no clue about the guy who does in frequency, because there are two different things, and nothing to do with each other. But now Mr. Keshe you have a computer. No, because we have a central knowledge which feeds into everything. And it's what you have to understand. Which part of the knowledge

you know, and which part of the knowledge you know, you know well enough that you know all ins and out of it. Whenever you start teaching, you say, I don't know all of it. This is what I've learned, this is my understanding.

(2:10) You go and search, but I tell you what I understood and it could be 100% wrong, but this is what fits me, it suits me. And this is important. I think I've said this a few times before. In early times of the Keshe Foundation, we were becoming well known in Europe. I was giving many lectures, one way or another we had a meeting with the United Nation in Brussels. The head of United Nation were asked to come back in the afternoon and the rest of it. I went there with Dirk Laureyssens. And the head of the meeting from United Nation explained something, or he was trying to explain to us, in a way he said. I've said this before, don't take the figures, but generally what we're saying was that we have like I said 10,000 people who know specifically in their fields of work. Being mathematic, but they are good in that line. Like let's say if you know viruses you won't know anything about bacteria, but viruses you're perfect. He said, we get those all the time. Then we have about at any time about a hundred scientists or so, who are good in physics, in every aspects of physics, but they're no good in chemistry, or in biology, or whatever, but in depth. At any time, every cycle, 20, 30 years, we have maybe a handful, 5 or 10 people, who can go from one subject to another, they understand physics very

good, they understand chemistry, but they can join the two together. And so they can talk and relate, and they can explain to the others.

(2:12) He said, every hundreds of years, we have one, which can go from one to across to the other. From chemistry into biology, and science, math's, or whatever. And he said, the last one was da Vinci, and this is what the United Nations is aware of your work. You teach chemistry, what it goes with chemistry, with physics, with medicine, with cosmology, with Space, with everything else. He said, "We will not get another one of you, and maybe thousand years. But we understand your position." Even with all the knowledge I have, I don't know everything. But when is the time, when is the correctness of the time, we deliver. We are just a vessel, not the water, to satisfy the thirst. But we know where to get the water. And this is from the head of United Nations in Brussels. The reason for the meeting for the United Nations was that if you go into the guidance of the Keshe Foundation in its mandate, 50% of the managing of the Keshe Foundation goes in the hand of the United Nations, so we had to sort it out how it's set up. In the near future, it'll be handed to Universal Council and the Earth Council. So when you go into teaching, when you go into explaining, always explain this is what I understand. And let them decide by themselves.

(2:14) Let them gather according to their intelligence and use the public teaching, private teaching, but

understand the teachings for the time and place. And in private teaching, I had (heard) a lot of rubbish in private teachings .. but I sit there, I don't go assaulting, insulting whatever bla, bla, bla. This is what they understand. Maybe to what is (if someone says something) wrong it brings somebody to see a better side of it in the future, that the cause of another development in the future. Those of who work with me and work with me for years in research, they know I always give a general concept and they come up with the solutions. And they say, "Oh but this is not..." I say, "If it is, even if it's wrong, let's try it." It's not a regime, "Yes, I say it has to be done." What you bring from your understanding, that's what it is. Even if it's going to be not the target we wanted, but it brings the knowledge in the future for something else. This is why research is always beautiful, because you don't stick. "I say so, it has to be so." When you get to that point, it's the time when you fail. And, has been all the time, from the first time we accepted Knowledge Seekers, has been the same. And it's been open. And it's been shared. We open the door of the knowledge and then we open our labs. But people abuse it, or use it, or in this part of it, and they use part of it. As I've said this before, when we started the Keshe Foundation,

(2:16) first time bringing Knowledge Seekers, they all came with their own reactors, Space reactors, everything. The cores, they built it, they came with such a thing. And one of them in the beginning after

the first 2 or 3 weeks his system didn't work, he says, Mr. Keshe I came with this to ?? learn and it doesn't work so I don't know what to do. I said come with me because my lab was next door. I said, come in there and I took him to all the most secret technologies which again they never understood. I said, choose one. And then the other Knowledge Seekers came and as you see all the reactors which

are deep research were given to each Knowledge Seeker to work with, and it became part of the public knowledge and teaching. Till then, nobody ever saw what we built, except governments, except officials and scientists. But what have we done with it? What has it been learned from these units? If you come to our offices now, all these reactors are against the wall, they've been refurbished, all look the same, They lost the originality but of the framework, but the knowledge and the systems are inside it. But what you understand on it, when I explain to Knowledge Seekers, what this is the purpose, it's been there about, now they understand what's behind it. But a knowledge is a knowledge, depends for what and how you use it, is it coming private, if it comes from public teaching, if it comes from another teaching, somebody else's do. It all depends on you how, but always in your teaching, whenever you teach tell them, "This is what I understood, I could be 100% wrong. These are the sources, you go and check them. You go and study and take it according to your understanding." And this is part of the work. We set the guidelines, we

don't set the rules. And that's important for Knowledge Seekers to understand.

(2:18) Any other question? Q: ... My question is related to the last drawing that you did last teaching about the C14 and Deuterium around. And I was reading an article from Keshe Foundation about the conversion of C14 into Deuterium by our glands. So, first question is that gland that you are mentioning is in our head. And how can be aware of these directions of the magnetic fields by the Deuterium's if, during the transmutation, we only see the light? Thank you. K- You see Deuterium, what we call Deuterium, is a complete structure. If you put 3 Deuterium's as a Star Formation (SF) base and then put another 3 Deuterium as another Star Formation base. Each one creates... (We got told that your (white) board is very difficult, I know. We got to get used to the new technology). You see,

(2:20) if you have Deuterium, let's say, two sets of 3 Deuterium. They create their own, what you call, Soul, or their Central Energy. And then these three, these three create one. And the interaction of these two creates the seventh field force. Because these two and this is a combination of, this thing is behavior of Deuterium but you see as Carbon 14 (C14). Let's do it this way if you didn't understand it. One, two, three, four, five, six, seven. This is Carbon 14 as energy, not Carbon 14 as matter state. And the body of the man works in this dimension. And in the future we teach you how, if you change any of these in any shape of

confirmation, or modification then you end up with, you end up with different properties.

(2:22) Remember one thing, if you understand the knowledge behind it, of what I'm trying to tell you. Is that if you play the lottery you choose 7 numbers out of 14, 9 numbers and you have 14 (what happened to it. Oh, I lost my screen. Very interesting. Oh, there you are. Sorry about this. Amateur in working with this board. What we're trying to do, why don't I go back, okay, go back). Now if you choose 7, which is this, in a combination of 14, you have 14 million combinations to choose from, out of 49. Then you understand how, if you understood this, in the interaction of the Carbon 14 in dimension of Universe, which gives you C60, what this figure goes up to.

(2:24) And that's why you have so many different cells, each one characteristics of a specific performance, in trillions in the body of the Man, and one is not different, is totally different than that one. Simple mathematics. This is why (?? not) many people win the lottery. It's the same 49 numbers and the whole European Nations, millions of people buy the tickets and not a single one get it, so the price goes to next week. It's the same with the body of the Man, but this time the combination is more, so one cell, specifically in field energy, only takes place and is produced and maintained in a specific part of the heart of the Man. And the next cell is a slightly different, another combination. And this is how the Carbon 14 works, and how the Carbon 60, leads to

the creation of the Universe, and the next level up, is the creation of Unicos. This is a different Carbon. In a way, we call it a Carbon in the matter state, but I call it, connection and communication. That's what it stands for from plasma energy point of view. But it's convenient for you as Knowledge Seekers, that (as) Carbon 14. When we speak about Carbon, we speak about field forces.

(2:26) When we speak in energy condition of the connection, when we speak about direct H in the energy term, is the source. And as you Knowledge Seekers, understand more and more, this is an interaction of itself, leads to this. And then, if you go slightly higher, interaction of these, which leads to Universal field forces. And, in a way what you call to you, as a Carbon 60. And then there is a higher level than this, which Man does not understand, which leads to the creation of the Unicos. And if you go another level higher than this, comes the creation of the Creator. Man at the moment is struggling with the existence of this. Let alone to go any further. Go back into the teaching in the past, always said, when you speak about ... , let's say, Iron, 56, energy of this is 20-30 below. But when you understand it, it's about 40-45. Because this looks at counting, this looks as an energy.

(2:28) And you have to learn. Q: ... But the direction, how can I know for example if I go to China or any place is the Deuterium that give my directions? K- It's not the Deuterium, it's the field interaction of the

environment. Q: But I have a desire for example, an emotion. K- Yes, you see, it's like you learn and gradually by experience you know which way you want to go. I decide to make a trip weeks and months before, because I set that emotion for it to be done. And then it's not booking a ticket, is setting the fields for what is right to be arranged. Even when .. I go somewhere and it looks failure, but it has a reason for it, because it's a setting for another job in the future. But you go to China I expect to see this is two different approaches. And then you go to China, would you understand what they talking about? Because you know the language, but you can sit there and understand exactly what they are doing. I studied many meetings in Chinese, I see their Soul, I see their cheating. And I see the lies, but I never tell them anything, I just watch. Because there's a reason they are doing this. And I've been told many times, "Why do you allow this to happen?"

(2:30) Because it has a dimension for me and it has a dimension for them. I don't need to understand the language, I see the Soul. But I still 'go with the flow' and many times, many times, Knowledge Seekers say to me, "Why do you allow this to happen? And you know, you know it." Then it becomes dictatorship, this the Soul's decide. And I rely on that, than the other, even it might create hardship for me physically for in my life, it doesn't matter. If you understand it, if you see it, you just see what is the outcome of it, what it's going to bring. And they tell me, "Why don't you stop it

from the beginning when you have it?" I said, "This is the reason, it has a reason." I spoke about Dirk, we called him the 'Red Circle.' The guy, I got to know very early on, was a patent officer, and he stole people's patent. That was his job. Stephen Hawking did the same. Einstein did the same. Dirk used to work in the patent office of the British, it was Belgian government. And he stole patent, that was his job. And the people who were supporting him. And one of them is, he had a patent, submitted to the patent office like others, (2:32) was a three-dimensional jigsaws, which you see in the market. The guy was given a patent, his patent was refused, and he registered patent in his own name and so on because he was there, leave you ?? there. But the patent was written in the name of the wife, that is not him. So I knew he was going to steal the technology. It was very clear to me in the first week. Now people tell me, why didn't you stop it, everything else. But there was a reason. The end of the first book, they thought they got everything. Two copies I went to just reach going that said the pictures was done, book was complete, and the what you call it, the last touches had to be done then the book would have gone for publication. And they thought that they got everything now, and the beginning first book was actually foundation of it, then you have a second, third and other books. And I went to toilet because we did it in a cafe near his house all the time, and while I was away he knew I didn't coffee, he ordered coffees. And something happened, he had to go to toilet

whatever came back I picked up the wrong coffee cup, wrong for me. The one which was supposed to be mine, he drank, and the first thing he said, "Mehran, I see stars". I was a target to be killed, poisoned. Because now they had it, there was no trace of the book, everything, They would change the name to, their name and everything else.

(2:34) And the stroke, I had to get him out of the hospital. I had to feed him with my own hand, the hand which came to kill me, I fed. Because he was paralyzed with the stroke. I put the spoons in his mouth. But I knew. Later on, you see what he did, he didn't do any different. Last time he gave me the poison, this time he poisoned the Internet. But, look what he's done. The ones who listen to this, and they overcome it, they understand it, how devious it is, they look at the knowledge. That, things on the Internet, is not for me, it's a test of the man who understands, is he looking at the knowledge, or is he looking at the thief? This is the way things has been. And this is the way you have to understand the knowledge. And the rest is the course of why they're there. The biggest test for me, is the ones who read all the rubbish he put in there. And he died because his daughter called and wrote to me, that my father died because of you, because if he would have come to you, with your 'One Cup One Life,' he would have survived. But his pride, because he cheated and lied, it wouldn't allow him to do so. Because what did he write? Just couple of weeks before, he wrote everything about, Cup of Life,

Keshe is blah, blah, blah, and the rest of it. And he died because of it, and so many lives were saved. He did it to himself. But what is left on the Internet, is the best thing for us. The one who sees the knowledge, (2:36) understands the fake, and the reasons behind it. We always said, it's in the writings, we test the heat of the fire with gold. And then we test the greed of the Man with gold. We test those who are ?? through knowledge, understanding knowledge, with Red Circles and all the rubbish on the Internet. And then if you are one of them, you stick, that's what it is, you are not ready yet. The ones who see above it, with the knowledge, you are tested. This is what (why) you have to understand the knowledge. And not, whatever is written around it. And according to what you understand, you do what you do with it. In the past few weeks, the technology, Keshe Foundation technology, was supposed to become public internationally organized by world leaders. And through an incident, it was stopped. Those Knowledge Seekers who listened to it, they know what I'm talking about, what we're talking about. I didn't see it as a bad thing. I saw it as the man is not ready, the technology has to come out on his own merits, not dependent on governments and what they want to show. Televisions were lined up, world leaders were set up to be shown and the rest of it. Through one incident, which now I thank for it what happened,

(2:38) because the Soul was not there, because there was a problem and I could see the problem if the

Keshe technology comes out through this channel. Hundreds of people, thousands of people were invited to see the magic of the knowledge of the Keshe Foundation in presence of the world leaders. And I'll give you some hints about it, if you go in the past teachings. And if it was anybody else would have gone crazy with it, I always said, I said to Knowledge Seekers, there is a reason for it. I know the reason. The reason is Knowledge Seekers were not ready for it. We spent months, weeks, we went through all ?? rignmas to facilitate it to be done. But the Soul wasn't there. It was not supposed to come the way ??. I look at it back at six weeks later or so I say that was the most beautiful thing happened to us. Because the knowledge has to stay independent of the government, and world leaders that they use it that their magic show, to show their power, to show their whatever. So always learn, there is a reason for it, there is an energy for it, and it has to go through its own sequence. When the Soul of the accumulated totality is ready, it will emerge.

(2:40) And it's not very far. Any other question? Q: ... Mr. Keshe, so, what you're saying is, when you sense somebody is lying to you, and you can see the intention, you allow it to happen, because you want to see... K- How many times you told me that? Q: No, and Mr. Keshe... K- How many time you personally said, "Why you let these people do things?" Because... Q: No, I know, that's for them, that's why my question. So, if I sense, okay, so this is my

question, I know that's was my problem, always with you, that you allow this to happen, I know it's my fault, but this I want to clarify this. So if I say somebody wants to cheat me or anything I should allow it to happen, because what I notice half of humanity's life is spent on not to allow the peoples to do something wrong to them or this and that, and then spend their lives... K- There is a difference between me and you. Q: Why? K- We accepted this when we signed to it. Q: You mean you, because you as a messenger wants to teach. You accepted to do, people do things to you? K- We accepted all the ups and downs. Q: But I have to accept it too because I'm also human. K- Not really, you decide. Q: So I should stay away from difficulties? K- You decide, you see, you deal with one situations I have to deal with seven billion situations and everyone is different. What it looks bad to some is good to the others, and how much it will change. (2:42) When I received the message when I was 19, I refused, I said I'm too young. When it was put on my table at 30, I said again I'm too young and I knew how to get out of it. By 40 I'm matured enough, I said, I accept. I took the clothes and the frock of businessman out of my body, never attended any of my companies, overnight I disappeared from business world. Because I accepted the responsibility and I knew what would come with it, the harsh time, the good time, the betrayals, and everything else. And I knew I don't deal with 7 billion, this is just the humans forget about the rest of them in the Space. And when

you accept it is when you're in love. Your lover hurts you, kisses you, buys you a flower, kicks you in bed, takes your things away from you. The love stays as love, because there is the ???. With us it's not the love, it's the acceptance of commitment to the Creator. Doesn't matter what they call, it doesn't matter. Poison us, they kill the people around us, insult us, everything else. At the end, we win. It's not a time to go and behead. It's not a time, Alzar. It's not a time to go and behead, because it's not, doesn't fit.

(2:44) Q: Okay, but isn't it because you have to let this happen, because if you allow this happen, so you get 7 billion different experiences, this, that you can carry this to the Creator, that it's going to wear, it's going to wear, like... K- No, it's for them to understand, to elevate and change it. And then bring a structure, system, whatever you call it, that it benefits all the same. You read it in the books. You read it as a mystical things, but we make that mystery or mystical to become reality. You read in the books as I said last time, the lion and the lamb sleep in the same nest. You read it there. I create the condition for it to happen, through knowledge. And when you do that, if you know this now, why didn't you do it 10 years ago, that less people would have died? Less lions would have eaten the lambs and the rest of it. But, it has to be collective that whole lot, Man, the beast, the animals on this planet and the creatures on the others, all elevate to the same level. This time the teaching is not for the Man only, it's Universal

teaching. Which means those are in the Universe, those who are in the cloth of the Man, are here to take that across to the others, through their Souls. So, when you see people, they cheat, they do this and that. Let them do. They will change, one day they change. Q: Okay, Mr. Keshe, another question I have is this, with the... I don't know how to put it together. K- Go for a cup of tea, It is early in the morning... (2:46) It's 4 or 5 o'clock your time. It's a bit too early to be awake. Any other question? Q: ... Hello Mr. Keshe, how can we have confidence, how can we practice not to panic during the transmutation? Thank you. K- I don't know, I was thinking about it last week, it was very funny. Because we see it live, you see pictures here, we stand on top of the machines, and we see when you panic, when you give up, when you all shut down. It's interesting. Let me see if I can find. I've shown you this. Let me see if I can find out, shut down a new lot. You literally shut down all. One of you panics, the whole lot of you panics. Or this is... I want to share. Let me go into Zoom and share because that's the best way to do it. R: Some people might be thinking you're exaggerating or something about this panic thing. (K: but I can... It's an emotion). I can attest there are times when my physicality is just, it just freaks out it, it can't handle the pressure or it becomes just really irritated due to the Soul trying to connect with the Soul and it's not sure what, you know... K- What to do, where it's going to go.

(2:48) R: Yes, it's dying and or, you know, the whole body gets itchy or other manifestations. K- It's the fear of unknown. It's actually the fear of unknown. You see, I show you because we have these pictures. These are offline live. Some of it we just freeze to see. Let me do it this way. It's the best way to do is you see this and then I can... This is amazing because these pictures come sequentially and it comes out of the interaction of your Souls it's not mine. This is from the sessions, and what is interesting is. This is very, very interesting, because you all are working in the world of your own transmutation, and then one of you panics, or... and because all your Souls are connected to each other, you all panic. And I laugh sometimes, because I see so many things, and I can't even say who is panicking. This is you lot, in your last session. One of your teams, of your groups. This is you lot, you're all transmuting, you're all busy with your own thing, And it's very nice, you see there is no panic, there is a...

(2:50) if you understood the last session. If you understand it more, is you see here even, somebody's going into transmutation, STP reaches the Soul, but doesn't cross it. Once that pink line crosses the green, you transmuted. One or two of you have reached that point but you panic. And if you look at it, this is you. There is no panic, there is no emotion, you're all of you in it. You see here, the spikes which is trying to reach the Soul. But something funny happens with

one of you. This is the next second, look what happens. (Let me get this out, because otherwise it'll be on the others. Okay). Now this is the next session. Somebody panicked and look. We know it's panic because, look at it, look at the peaks, it's shifting the Soul. Somebody panicked and what do you do? Like chickens, all of you, what did you do? Look at it. You all jumped into physicality because you feel safe here. This is your STP, or you emotion of panic and you see what happens. Half cooked, you went back on again, and then you panicked again, somebody panicked, and a whole lot of you, like chickens, panic, gone back to physicality. (It's like) waking up in bed, "Ooh, I had a bad dream". You see this? And then what happened? Somewhere, somehow the one who panicked and caused the other ones to panic, (2:52) and decided in next ten minutes you had the time. What do you do? You go back to work again. And have a look. Every time you see a sign of panic or change of emotion, you see this guy. You see why does it come at the 10 of each one? It's the emotion which affects it. And when they're mixed, is you are physically awake. You become conscious of doing it. Otherwise the Soul is doing its trip. The science is not anymore what it says in the God knows Holy Book. The science is you sitting there creating the knowledge of it. You understand how it is, you understand how it works. And so, from one trip to panic, back let's carry on, let's go and dream again. And then you see how exactly they work. How exactly

panic points dictates the position and the change. .. Then it all comes through emotion, STP. But the beauty of it is, as we teach you slowly, slowly, if I open this up, if I open this up, you look for the blue line. You see the blue line, which is the average energy from what you take and what you give to your environment from the top, it stays within the frame of physicality. (2:54) And when we see this blue line being empowered with the Soul, is then when you have taken a full charge of transmutation. When it's on the same side, you see the blue is the next one is green, so there is attempt to change. And then look at here, how emotion has dropped the physicality, what you call it, the transmutation, down to. Now, it's a science, it's a knowledge. It's not anything I say so, because it's there. And we're getting better and better at it. And you will see more details as we develop this technology, that our Knowledge Seekers understand. And this is only your Soul. The green guy there, is here. As you all learned, you know by now. This is where you get from the Space, comes through your Soul, diverts into your physicality, STP, and it goes. But there is the same reversal process too. You cannot take all the time. As you don't need, you give. And you understand the cycle is always. And then if you literally look at this, these dots in this area shows how you're transferring and you're transmuting. In the future, we will show two different colors for the energies received and for energies to go out. And then

you see it. And then you understand it, in a much more detail.

(2:56) And then this will show us, dictate to us, that if you are ready to transmute. And then you see if this is actually sits in the parameters of the man's work. If you look at it, here in this figure more or less if you talk about it. Here you're all in a condition of physical. You go into the Soul level, you panic, then you go in, and then you panic, and you go back into physicality again. As long as you are above this level, what's above this level, it shows what is actually happening to you. What is below the line is actually what you're going through. And then you see the shift. And then you see in some of the graphs that the green is huge it means you spend a lot of time in transmutation. And then sometimes you see the green below, which means the physicality is dominating. And sometimes you see this here which means, there's a panic I don't know if I can do or not, but it's 10, 20 of you in this session. So who panic, who's not and then which field stronger which one of you carry the Soul that says, no, we go this way, and the sheep follows. Now it's a science, is not a talk anymore. Now it's an art, it's a know-how and this is what you have to learn by practicing and practicing and practicing more and more.

(2:58) And it's very interesting we had a large contingency of Chinese this time and it's amazing how the upbringing, how the Americans and the East, West and world people behaved compared to the European

Central. This is what we are watching, it's amazing. We... the way we set it up, we have a couple of people outside the line, but Europeans are in one group, Chinese are in one group and then Americans are in another group, what we call Western, Canadians and American and Brazilians are in one lot. And you see changes of the emotion. Americans are very confident group and they do things we have to do it. As a Ukrainian guy said, pray that you never fall in the hand of and watch the Americans fight, because they fight with everything. Us we "chicken out." Europeans have that behavior they chicken out very quickly. But the Chinese it's amazing how they deal. They are very Yin and Yang trying to keep balance in their own side and they produce a different graphs. I've asked for all the graphs to be made of the last session in hard copy. Because now we can target you to bring you to transmutation and group of you. Because some of you did the individual sessions, we know which is capability of who in which group we can take out. And maybe by April, that we take a group of, maybe a couple of Chinese of these couple of European, Americans, whatever, put in one and get them all transmuted in one go. Because they have the confidence, they know what they can do, and they're not panicking because they want to get there.

(3:00) We have a husband and wife which are there continuously but they cannot do the switch. They need the help from us. We have people in China who are ready for that switch, we have Canadians and

Americans who are in that group. So, after March - April session, I make a group out of those who we see. That's why we ask you if you want to take a picture of your Soul, was to see if we are correct in and the people we wanted came in. So, we know how to place the leaders in... Okay, if you panic, I don't ?? . It is what I showed you in the in the other picture. We are looking and we wanted to test if the leadership dictates concentration of field forces. So what happened? I show you what happened. This is what I just explained to you in that last picture. What was the reason of us doing this. When I came in and I said come and see me, we were... I want you to come, try to come and see me. And we get this. We're looking for leaders. Go back to the teaching of eight, ten years ago, when I said when we come to a point that you give your Soul to one man to deliver you don't have, what you call it, UFOs. And you see it here and you see the energy level. I can show you the pictures before and after. And in you lot we have found pilots who you trust to give your Souls. But this changes amazingly, in a way the cluster becomes very different,

(3:02) when this becomes heavy. This sides become totally nearly white. And I've seen this one, when we brought the Daughter of Mitra into session, because that's what I told you, she's, it's her job to take the whole of Universe into a new dimension. You see this ?? line? It becomes all white, when she's with us. And we've done that a few times in the last year. And

this is what is important. I prepare Man to become ready for her. I give my life for her. It's the essence of the fields of the emotion of the Creator. And that's her job. The way the Creator fell in love with Mitra, and that is the love of Creation of it. Any other question?

Q: ... In the 534th Knowledge Seekers Workshop, (3:04) I asked a question related to the creation of the envelope to cover the physicality. And in sharing the knowledge you say that in order to achieve transmutation, we need knowledge of what we call the pineal gland, which you say is the neutron of the Soul. But at that time man was not ready for it. Could you teach us in a specific way how we can connect with the neutron of the Soul for expansion and transmutation. Can you expand on this knowledge?

Thank you very much, Mr. Keshe. K- Man is not ready for that knowledge. But man knows the knowledge. And in past half an hour, I explained that knowledge. That is the whole secret of it. That's the whole essence of it. It's understanding the totality of it. Just one second please. Sorry about that. The whole... the understanding is there, the knowledge is there. It's just that how you concentrate in bringing it forward.

(3:06) I have thought about this. In a number of public sessions, before starting of these teachings, in partially to the Space Defense people, and there's no difference. You have to learn in trust and putting a space ahead of you, than you. This is why we ask for people to become Satellites, and they say, "What are we doing? What's our job?" You've already been part

of the process of the teaching without you knowing, because you are that target. That target for those who want to... When you want to send a message, you use a satellite and then you send it to. Those of you who became Satellite, without you knowing, you're already part of the process. In a way, some of you are Satellites, you might dream something, what was this for? You are not dreaming yet, you are carrying the dream of the others who you are just a tool of. And this is the part of the process of allowing the others to elevate, that's what the job of the Satellites are. They create that point. Without them knowing,

(3:08) you put a satellite in the Space it's an information to go. Now those who became Satellites are that job, that you're that target at that point of reference that what needs to be. So, how you do it? Can you teach us? You already know. Years ago when I started teaching. I used to give a lot of conferences around Europe, Holland, Belgium, Germany and other places. And in one of these sessions in Belgium, a very thin guy, very, whatever you want to call it, came to us, says, "Mr. Keshe, I have a problem and I suffer from such and such a thing, and five minutes work a day, it takes me a whole week to recover, even getting up to brush my tooth, in the morning to just make a coffee, was the whole day, that I can't do anymore, can you help me?" I said, "How did you get here?" He said, "Whatever, they brought me here, they..." And I just wondered, I said, "Yes, I can come." Because he was near Brussels. And those of you who are

Knowledge Seekers you know who I'm talking about. And that time I helped him in a way and within two or three days he called me, he said, "This is miracle. Since I start understanding and using the technology, I have all the energy in the world."

(3:10) And he was a guy who everybody knew about him, they knew his suffering, he was suffering like this for 15, 20 years. It wasn't something new. He said, "You mind me bringing 2 or 3 people who suffer like me?" I said, "Yeah, why not?" So, I said, "Okay, I'll come Friday, because that's the only time I have during the week, I have to do other things." So, I went to see him on the Friday. He said, "Do you mind coming in, and explaining this to other people, as well?" I said, "Yeah, no problem." "Okay, can you come Friday again, next Friday?" And in 2 or 3 weeks, I went back again every Friday, three, four people, came ten or fifteen people, and then it came the whole house. And this was going week after week. And I was teaching one-to-one, we're sitting on the tables, on the floor, and the chairs, in his living room. And, in one of these meetings, there was a guy, well known person in his field, He said, "You know something, you come and see these people here, you come Friday, earlier, to do these things with them. I can give you my office, I have a spare room in my surgery, you can use it." I said, "It's okay, so we teach on Thursdays, but these people have a problem, you can help, what we can do, we see in the surgery." He said, "I'm a doctor, you're covered by me, because you are under my

license." And then, it became so busy. We... he said, "Now, I'm going to a bigger place. Do you mind coming with me?" Then it became, the Ninove, the center of the Keshe Foundation in Belgium.

(3:12) And then, audience of 100, and then the world leaders, ambassadors all invited to there. And, all it was, we set the seed for the knowledge and the Soul followed. Started with one man, ended up every Friday till two, three o'clock in the morning, I used to get home sometimes, five, because I was too tired even to go. I used to park on the side of the road and sleep in the car, because I was already in the session for eight, ten hours. And then, you understand it does not need to be the tool, it's the intention you set. And you say this gland and that gland, it's the intention. You use the gland of the Universe. But you have to know, you have to understand how you do it, the reason you do it, why you're doing it. And when we opened Ninove, you know, people used to come from all over the world. Flying just to be there for that session, for just to see what. We had people in a wheelchair, came 20 years from age of 19, 40 odd years old, in a wheelchair. They walked after a few sessions. They came with a wheelchair in a car because it couldn't fly. They came and flew in and out with flights walking themselves. And then what's next, what? Because the intention is there. You think about yourself. Think about the bigger structure, then you see a bigger world.

(3:14) You have to understand the final point, the concentration of energy towards, counts. It could be inside your brain, it could be the tip of your toe. It could be whatever, Whatever, as long as you know where your Soul is, what you're committed to, what you want to do with it, you'll achieve it through emotion, through understanding the feeling of it, not through the physicality, walk into a place to do it. And this is the process which we continuously go from one to another, in different dimensions, all of us. We focus that point to a prostate, we get a Cancer of prostate, we focus that on finding a Love, instead of ?? out of nowhere somebody appears, and we love them for rest of our lives. And this is how things are. Take it out of the physicality, if it's a ?? pineal gland, if it's my... God knows what gland or whatever. You are the energy, you have to dictate the position and destination, and you create it. It's like putting so many laser beams in one point. If the intention is correct it gets achieved. Any other question? R: ... Well actually, maybe we should show a couple of things from the Keshe Foundation Store. I have a... K- They have launched a new thing again. << Rick show the new products on the screen. >>

(3:16) K- .. This is the resin. ... Yeah, this is the Cosmic Ray material (CRm). It's finally made. This is the final version. You all going to receive these. There is no way... and never try to crack the ball. It's... if you expand the picture. It comes, you've seen how long it's taken. I was talking to somebody earlier on. The

material is made in one part of the world. The cover comes from another part of the world. The box comes from another part of the world. And the wallet comes from another part of the world. It's taken us a year plus to get this the way I wanted it. And in next few days, few weeks, as everything is getting ready and is done, you will see this is what you're going to receive. Those of you brought the Cosmic material, this is actual, the final product. And it took us a year, plus, to get it the way we are happy with it. And hold in your hand and put it,

(3:18) drop it in the environment you want to be, put two of them and make something from it. The energy that fields connects into cosmic rays. And it's amazing that after holding it and I think about 30 or some more will leave very soon, now that everything is coming together, there's a lot of finishing of the ball, needs to be done. This is the final product and thank you for your patience. And then you will see the beauty of this thing if you can realize it. And it's amazing the energy releases is so powerful. If you are at that level to feel it, and it's amazing. Really. They came from different part of the world, and the material for the pouch was chosen by me. Material for everything else was step by step, to be there, to actually process it. What's the other one? So what we promised you, you... many of you purchased. This is the final version you will receive. R: Very beautiful, for sure. It has a magnetic latch as well, I see there. K- Yeah, it's just holding it down. Don't leave it loose around, always keep it in

his own package. And if you use it, take it out. Those of you who you'd go on the Transmutation sessions, we tell you what to do with these, once you start receiving them, how to use them. Then you understand, what is going to do to you.

(3:20) Was there something else? K- ... You know that pouch you see in the back, everybody goes in? I've sat for nearly 10 hours to get to, to the person who can make it. Just that pouch. I've been a journey of 10 hours drive, just to get this pouch done the way it is. It should be. When you touch it, you feel it, you understand the beauty of it. What else do you have or is that it? R: ... No, there is a... K- You see the material in the ball goes with the box and the box goes with the pouch. R: Here is the other thing that was sent a link about, which is the Coasters which we saw and are in the background image today. We have different images. K- This one was last week. Now they are set, I know that. These are in a pack of 4 and they go with a stand. And you can choose 4 items for a stand for one thing and 4 for the other. Is there a Coaster line in a pack? One of them must be, one of the pictures. Am I correct? It should be showing in a stand. Next one.

(3:22) Yeah, this is the holder of them, when they sit together. It's one holder and there is another vertical holder, I've seen. And yeah, they all go in one pack and this combines them. You can use one on top, one on bottom, or 2 different packs. And you say how you want it to be filled for what purpose you want it. And

people are choosing different colors. A very interesting one was a green heart. We didn't know what the green heart is for. There's another stand. Do you see it? There's a flat one, like a rack. Yeah, that's the one. They... if you expand it, you see it, they stand in a rack. And it is being given a color combination and... yeah. And the materials in what you want it for, it's a change of environment. Or whatever you drink and the rest of it. It's very nice things, range of products which start coming out. Anything else? There is something about these, once you receive it, once you receive it, leave it on the stand to absorb and be part of your structure for 21 days and then start using it. These need 20 days of settling in the room to balance out themselves to be solid. R: To keep it like in this picture in the holder for that? K- Yeah. But every time you use it the same. And there are options how you want mixture you want what color you want there's a mixture there because these are made handmade individually.

(3:24) Any other question? R: I know it's pretty much time to wrap up here. There was one thing you had as a suggestion, let me get back here, about Amazon changing their terms of service from the 26th, which was yesterday. K- Yes, you forgot about it last week. Isn't it? R: ... That it's about anyone who has bought a digital version of the books should download them from the cloud before that date. Anyone buying or holding the book after the cloud, or on the cloud after the 26th of February, can only access the books on

their Kindle device while they keep their account. K- Yeah, this came to us by one of the Knowledge Seekers. So we passed it on. It's supposed to read it last week. Q: ... Can you explain what "pact with the devil" means from the energy point of view? K- Oh, no, don't go there. Next one. Q: ... How can we understand from your teachings today that many men and women who were closely linked to the church, we call them mystics, left a legacy in the field of spirituality and theology. Could this still be a contribution to our search for knowledge and elevation to serve humanity? K- Of course.

(3:26) There's no exclusivity. Enlightenment can come at any point, any place, anywhere. Even a dog can be enlightened, let alone man. Enlightenment is about the Soul, not about the physicality. What do you do with it? Enlightenment is the knowledge of Creation and the Creator. The rest of it is to know how to apply it. There's something I wanted to ask. I know this is the reason, because in all these communications, we have, we lost the connection with couple of people which I would like, I know one is in Germany. Those of you who've been in space development technology with NASA, with X, with German or French Space, with British Space, with the Chinese or the Russian Space, we need to, or we would like to contact you as a matter of urgency. Send a message to info@keshe.foundation.com and write for attention of mtkeshespace. We don't want somebody who has read something. We want those who have actually

been involved in any part of the Space industry. Apollo 1, Apollo 2, there are some old people there. I used to know one of the chiefs of Apollo program. She has died now. Miss Hardy, very close. I had a very close connection with her. So, we are looking, if you have been in any shape or form associated with any of the nations Space technology.

(3:28) Does not matter language you can't speak English and the rest of it. There is a reason for this. And as I said, 2025 is the year of break-in technologies. And we are looking for those of you who are specialists or have been or been part of any of the Space programs anywhere in the world. We are color blind, race blind, language blind. We are looking for group of you who been in gas and oil refining or in that kind of bracket. We are looking for those who are in energy. We want people with experience and quality, not just, just the talk. We are looking for those who are metallurgists, material specialists, and those who are in environmental programs. We are looking for the people who are, or have worked with CERN, or any plasma technology developments around the world. We're looking for nuclear physicists who are specialized in radiation transmission. We are looking for doctors who are specialists in certain fields, not the normal doctors, we want specialized people in the world of medicine. We are looking those who are, understand the work of the fields and cosmology, or magnetic field development.

(3:30) We are looking for those who understand the work of the water dissemination, and if you cover any of these just send a message to info@keshe.foundation and we'll get back with you. We are looking for experts with years of knowledge. We know a lot of people in NASA are disheartened, we know a lot of people in X at the moment, even though it looks very good, they have given up on the work of, what do you call it, the work of X. We know Russian Space Agency, I used to have a lot of contact with them, come back in, we have a big target for the Space technology development. The same with the Chinese in Chinese Space and Defense. We're looking for those who are expert in nuclear industry on the field transmission. They know who they are. We have two or three of them I know, they can join us. One of them is one of the Iran eminent scientists working in Brazil. We are looking for those of you who understand, have a good grasp, of environmental cleanup. We don't believe in global warming. We're looking at people with water treatment, environmental change, city atmospheric conditions, pollution. Write to us and very soon we'll make international announcement about this.

(3:32) And please, no knowledge is not good enough, it just depends if your knowledge fits into what we want at this moment of time. Thank you very much Rick for today. R: Will you make an announcement on X for that, Mr. Keshe? K- We will make announcement on X on Twitter, on Facebook, on YouTube. Yes.

Thank you indeed for today. We'll see you next time, next week, next week hopefully.
