Part 1

(:15) K- Yes, thank you very much. Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers, from Keshe Foundation Spaceship Institute.

(:16) Today, pattern of understanding of the knowledge of Creation, as we always said, for each one of us, is according to our own intelligence, according to our own understanding. According to what we carry with us, as knowledge, when we become, or come across, the new understanding and technology (T) of the plasma. We are doctors, we are scientists, for decades, trained, worked, in certain fields, and we come across the plasma technology. The biggest dilemma is, how do I fit into what I've done, what I've educated, what I've been told, what I accepted, and what I confirmed? And, how do I merge this into a new thing, that I can create a new dimension (D), a new structure with it? How do I match or collaborate the old and the new into my circle of knowledge, understanding? One of my advice to those who even been here and have managed, and kept the knowledge of the Keshe Foundation separate, then what they do, because they cannot merge it, and they accept it as a new thing. But, with what is going on, and what is, will come up, we have to find a way to merge these, not only in the structure of understanding, that we have a Soul inside our physical body,

(:18) and we accept it to dimension, we have to imply and apply this new knowledge in the physical world, in the dimension we live, we share with the others. How do we do this? How do we come across, in a way, that now we accepted the Soul and the existence of the body, one lives in dimension of energy, one in dimension of physicality (P), how do we bring the cycle of life of every day to this position? How we transfer energies, foods, in our daily life, it's not with communication with others, it's every aspects of our life. Do I pick up the apple and chew the apple? Or do I hold the apple without destroying its life? I take from it what I need, and I transfer the energy of it into my body, and it can take from what I don't need, and is useful to the apple, to take from me. What do I do with the cat I hold? How do I transfer the energies as a love, as a emotion of caring, to it, and I find its affection and love for me, what I take from it? Do I find ways to share the two, without interfering with my ethos of not trying to harm, to be part of the Space, to be part of their life, in the Universal Community? This is where your dilemma starts as Knowledge Seekers (KS), and people who come into this dimension.

(:20) Today I open a new door to you, as Knowledge Seekers, which has been the biggest problem, to accommodate the ?? both side. Slowly, slowly, in the pattern of life, it becomes part of us. We don't need to destroy any more lives, we don't need to eat that apple, we don't need to kill that lamb, we don't need to destroy another for us to survive. We have to become,

to understand the knowledge, and become that mother who gives her life, that father who gives his life, to save the life of a child. The Universe is a child of the Man, and we had to become up, understand with that understanding, be it in the level of energy or physicality. We should be the givers of lives, and not the takers of lives. And as we do not know, we destroy lives, just because we don't understand. We never been told, we never been explained. We never had the knowledge, and now, in the short term, long term, long run, we have to understand, we meet a friend, a new entity, do we take his life, or do we learn to touch with the energy of the Soul? It goes back to the beginning of the teachings, years and years ago, and many times I have repeated. When we live, we take 80% of our energy through atmosphere, through Cosmos, through the environment we live, and the other 20% we chew, we bite, we swallow, we drink. There are no water fountains on the Moon and Mars, and there are not sheep's running around, and the cows on the grounds of other planetary systems.

(:22) We come across, we go to the ?? on the Moon, or Mars, or another place, and we have no grass, we brought with us no steak, and there is no tomatoes. What is on the land is your food. What is accessible to you is your food. And the energies on the Moon, due to different Gravitational fields, which was created in you on Earth, does not get everything it needs to be able to match, to survive in the new environment. What do you do? How do you attain that physical

energy to match the planetary system? There is one point which I'm sure most of Knowledge Seekers never understood, but maybe make it a little bit clearer. What we breathe, what we take from the environment, is what comes to us from Cosmos, from life in the Universe (U). What we eat, is what converts us to attachments of this planet. This is why when we start taking from this planet, we physically separate from this planet, we die, we call it starvation, we call it whatever. We cut the supply from the planet, so the energy leaves the planet, as a Soul. That's all it happens. When the energy of the, what we call Cosmos, matches and overtakes the energy of the planet,

(:24) is the time when we separate, it's the magnets we create energy for it and it goes flying. In the flying system, in the, what we call plasmatic condition, we create the Gravitational Magnetic field of the Moon, and the system flies to the Moon, because it has no matching magnetic field to the Earth, even it has connection to it. This is what happened at point of death. We stop consuming energies of the planet. So, the separation comes, only the energy of the Universe, which is part of our Soul, left, and then it has a new position, and it finds its position. As long as we consume the energy, we breathe the air of this planet, we are attached to it. Then, it comes in a matter state, we kill for it, we destroy that apple, we kill that lamb. We have to learn, the point of separation of killing, or taking energy in a way of

mutual respect, not to take energy to kill, is to understand how to transfer of the energy of that apple on the table to you, without touching it. That apple, if we do not destroy it, do not eat it, can be there for decades. But, how do we do this? How do I come across a new knowledge, new way, that I don't destroy the apple, but I make a condition and gradually learn to adopt (adapt) to do it? One of the first things which we have taught you, and you have learned, but do not understand the process of it, is Gans's.

(:26) When you produce Gans's, especially CO₂, and especially CH₃, and you touch it with your hand, and you touch the Amino Acid of it, you create a common denominator between you and the apple, because it carries the CO₂, it carries the CH₃, and that Amino Acid (AA) is a combination which it carries too. If you've been with us, in those of you who use the Gans's to rub on your body, or part of your face, or use it whatever, and you've been with me, I always tell you, never wash your hand. Wash your hand before you touch the Gans's, but once you touch the Gans's, don't wash your hand. Because, when you take and drink Gans water, isotopes or whatever, it goes in your body, but it's going to flow. How do you create a circulation in it? In a way, your hand is your savior. Your hand is part of the structure of understanding the Totality of the work, in energy level. What do you do? You eat an apple, goes in the mouth, and it sits in the inner sanctums of your body. That's all the body has to do. You now put the seed of the energy of what you

need to give to the others, which allows, in a way, that apple with the energy, now in the energy level of plasma, to attract fields from the Universe.

(:28) That's where the 80% come. That seed of that apple is a trap for absorbing energy from the Universe. So, it has a circulation. Whatever comes in one dimension, in one direction, comes gradually in, and the strength of it gets absorbed and gets distributed in the body. You do this with the Universal energy. You take 80% of your energy this way. But, when it comes to eating that apple, you forget about it, because you never understood. Now, you put the apple here on the table, you touch it with your hand, you carry the magnetic (M) field of the plasma of the apple, with the common denominator of the Carbon, which is part of CO₂. CO₂ is not just something which comes out of your body. It comes to connect you, what is the latest with me, with the atmosphere, what I need to pull in. But, what do the scientists say, "Oh, Carbon, is something CO₂ you breathe out." No! The Carbon you breathe out, it tell the environment, which goes around you, which covers you, what I need from the atmosphere, what is that 80% I need? You play the same game. You touch with your hand, you eat the apple, which goes in you, and now you create a local feeding station. The difference between the energy which is on your hand, and what's in your stomach, or what you took to your stomach, allows the circulation to create a local exchange area.

(:30) So, now you have another dilemma. You don't want to eat the apple. If you touch the energy with the Gans's, we know, Amino Acid of CO₂, with the CH₃, which is the sugar of life. That's how life started on this planet, with Carbon mixture of Hydrogen (H), which connected the Universal energy of the Creator, to the transfer of energy of the Universe. That's how life started. Scientists tell us that we carry CH₃, the initial sugar. The CH₃, one is the line to the Creator, and one is the line to Universal energy. This is what they never understood. This is how chemistry separates from plasma Technology. So, in a way, with touching this with two hands, with the combination of Amino Acid, you have created the cycle, to absorb the energy into the body, without actually eating the ?? plant. If you become good at it, while you're holding the apple, you will taste it, you'll see the energy transfer. This is part of life, which Man needs to learn. Then you don't wash your hand. This field, now you have taken the field into the body, because now it's not just the stomach which takes it, and you have two moving things, which continuously changes. Your hand is on your head, you touch your face, you touch the other hand, somewhere else, you created a Star Formation of three ways. One is your body, and these two shake in like a leaf, creating dynamic motion of the plasma. In a way, you start learning to transfer energy into your body, without eating. In Space, in condition of the understanding of the creation of the Amino Acid.

(:32) This is why, world of science has never understood. They call it a fingerprint, it's not a fingerprint. That fat, that fingerprint, is the connection between you and the object you touch, to give information, to take information, and to take energy. But, you have not learned to tune the Soul with the same system. You have the technology, you call it, you touch anything. You leave a fingerprint. That fingerprint is Amino Acid, is the connection of you, in giving and what taking. But, now to start with, if you learn how to mix this fingerprint with a combination of the CH₃ and CO₂ to connect in both dimensions of life on this planet, then you start, not needing to eat, not to consume, but you take energy, because the apple says, "What you need is not me." You need another apple. The red apple gives you the energy which you need for the cells, because the cells, by level of understanding of magnetic fields, tell your body, tell your Soul, "What I'm short of." This is, this is how you feed your physicality through your Soul. And then, gradually, your body starts adapting. And then, your Soul's central energy starts adapting, to what you need to feed the 20% of physicality, that you don't need to kill for. What's the reason, why do we even make fingerprint?

(:34) Yes, to let you, not to stick things to yourself, but, it allows you the transfer of energy. It's you who did the biggest crime, eating that apple. She fooled you. You could hold that apple, enjoy its beauty and life, give to it life and take from it, what you need, that it's

prepared to give you. Then, you understand, in the coming time, gradually and step by step, as you work more and more around the knowledge of the plasma, you don't need to eat. I don't eat. Of course you don't eat, but you learn how to transfer the energy of the physicality of this planet, to your Celestial body, that does not need to die. You'll find out, when you start using this knowledge, the way of transferring energy, you live thousands of years, not mere 40, 50 and 60. Cancers won't exist. You get hit by a car, on, by 120 kilometers an hour, and you walk off the accident, because your body has learned to use even the energy of the accident, for it to transfer energy to life. How many times in the present new life, you've seen somebody get hit with a car, crashed over with a train, with something else, and they just get up and walk. This is part of the structure of our Soul,

(:36) to change dimension of the fields to what it needs, because the Soul has not finished its job. So, physicality takes the energy of the environment and walks off. Self-repair. It's not something we don't know. We look at it as a magic, when it happens, how on the guy hit with 120 kilometers car, and he just walks off, because we haven't understood, the part of the knowledge which I just explained. In the present life of today, we take 80% from the Space and 20% by eating it. In the time of the survival of the Soul, the Soul takes that 20% directly from the environment that it carries on. It's instantaneous. This is why I always explain, going from here to Mars, it's instantaneous,

you do it and it's done. Because the Soul dictates the transmutation, not the Man by his emotion. Matter state emotion, not physical state emotion. Because we have never understood the three layers of life on this planet, which is part of our physical dimension's energy pack. Now, you understand the next step. This is why, in so many ways, we introduce many of the materials, Gans's. You use that Gans water, wash your hands with it, wash your face with it, and then you see what happens. Take a part of it, washing an apple and eat it, because you carry it in, you have created dynamic condition that locks into that apple. It's the last time you eat apple, because you don't need to eat apple anymore, because now you left a fingerprint all the time.

(:38) If, as Knowledge Seekers, you understand the power of the transmission of the fields, there is no one can ever stop you living anywhere in the Universe. Originally, when Man became a citizen of this planet, in any shape or form, any animal, carries that fingerprint, it's partially for transfer of energy. It's not for you to leave a fingerprint behind. The consumption of the energy allowed by Man to do without killing, is the law of the Universe. Man has crossed the line. Man has crossed the line by killing and consuming. For it, he has created stomach, for it he has created liver, for it he has created kidneys, for it he has created everything. When you come to this point, even you have a bone structure, you have stomach empty of any, what you call, bits, which the body has

created to clean up the bits you took from the physical part, to clean it, that it converts into energy, that you can transfer it into energy, for the Soul to survive. If Man understands, if Man matures to this level of understanding, then the Man stops killing.

(:40) Part of the transmutation system, part of the Headphones we put out to you, is doing this job, without you knowing, to train your brain, to create the fields and the pleasure and the levels of the apple, what it likes to give, and then you stop eating. This is why some of you have totally stopped eating and get panicky. Try and test. Understand the process. And then you see, you don't say, "I don't eat food anymore." Yes, I take from the energy of the physicality of this planet, what my body needs. You remember that song? "Hello happiness, goodbye loneliness." The happiness will come, when you tap into the energy of this planet, through its energy level, and not through its physical dimensions of consumption. And as I showed you at the beginning, you understood, you understand. Then you find out, because you are not taking the wrong things, with the energy which the cell of the body of the Man needs, you don't get the cancer. You have no complications, because gradually there is no need for the stomach, to process. The processing has done with the fingerprints of your hand. Conversion of energy to what you need. It takes time to learn, because you have to put behind the process of taking, the love of

Creation. And that's the tricky part. I don't touch your apple, because I need your energy.

(:42) I touch your apple, because I want for you to take what is needed from me, to make me survive. I depend on your generosity. I covered this in a very simple way, in the recent teaching. When we introduced the two Headphone system, if you remember, where you have two Headphones, and two heads. I said to you, you take that one of the Headphones and put it on apple, and it gives you all the energy through the other Headset in your body. Feeds your physicality, you don't need to kill an apple. You can't put the Headphone around the cow unfortunately. But if you understood this, with this process coming up, with one apple we can feed the whole humanity. Because the apple is live, and knows what everyone needs to take from it, and it gives to everyone. Goes back to the teaching of last week, where I explained to you in a very simple way, that... One magnet, one sphere, has many lives. One connects to Tom, one connects to George, and one connects to somebody else. Because every single line, the need of every being on this planet, is within that. Because each one needs a different energy level, has his own magnetic field strength. There's only need for one apple, without destroying it, to feed the whole humanity with that apple.

(:44) Change that apple to the knowledge, is exactly the same ?? . This is why in the teachings I said, "When I teach, I teach for the whole of Universe, and

not just for the Man." The Man has a ear to hear, to understand, so you take the energy at that level. The one in another part of Universe, uses the emotion of understanding of the knowledge, has access to what is taught. This is how it works. And this is how Mankind will come to bring an end to killing. Because we had to show you how your Soul travels, with all the teachings. We had to show you how to make Gans's, with to how to make connection, and now it comes to physical manifestation and life of the Man. And now you see how everything comes together. Every step of the teaching by the Keshe Foundation, in past 10, 15, 20 years, has a reason. Because it comes to connect it to, it comes to be part of. It is the steps of a ladder that it can, if you don't put your foot on the first step, you cannot go to the second. And then as you learn, you understand. In the further stages, when we come even further, we teach you how to use the Soul of the Man (STM) for feeding from the apple. You learn at the moment, how to work with Gans's. Creation of the emotion, dimension of existence.

(:46) It's an old saying, "Give a Man a fish, you have to feed him for a life." Teach him how to fish, you don't need him to give him any more fishes to, to survive. He knows how to survive. He learns how to catch a fish. And this is the same story with you, Knowledge Seekers. I taught you fishing, now go and catch. Not the life, but give to receive. Don't become the one, "I take, it's my right." As you do, everyday life of today, "I can afford it, I can put it in my hand, I can eat it,

because I can." Then you find the cycle of life changes, your behavior changes, now the emotion of the Soul of Physicality (STP) and emotion of the STM becomes one. Because the STP is trained to kill, to destroy, to keep physicality going. Now you see how your STP in not killing comes in line with the STM. The point of becoming a Universal Entity in one matter, not two. But, confirming the existence of one in the other. The secret of life in the Universe is not to be there present. The secret of life in the Universe is there, to be there, to give. Then you'll find out, the cycle of life creates bigger and bigger, more interesting cycle of emotions and dimensions which Man has never known. The worst word ever made in the vocabulary of the Man is sacrifice.

(:48) Should have never been there. When you love, you don't sacrifice, you give unconditionally. And this is the way the Universe works. I give unconditionally and what comes to me is what's given to me as love. There is no room for fighting, there is no room for wars. I always said to my children, "When you have to fight for something to win, you have already lost." What is to come to you, you don't need to fight for, you give unconditionally and if it's there, it comes to you. It's the rule of the world, you can never hold a woman, unless the woman wants to be with you. She is your love and through her love, can give that love to gives you confirmation of your existence. This is how the Universe works. And Man has not understood. And it's time for Man to understand, to become part of

that Universal Community. This teaching, these words have been said from the beginning of teaching 10 years ago. Maybe now you understand the meaning. Maybe now you understand how to work with it, how to extend life. And how to transfer energies, which is there in the matter state and with everything else in your hand. Don't rush and go and get that CH₃ Gans, don't rush and get the CO₂ Gans, mix it and try.

(:50) Mix the energy in your Soul, in your physicality, before you touch the physicality to see if it works. You make a wrong connection, because the intention is wrong. Then you understand how comes, the love comes. You don't kill what you love, because you give it love, for it to exist. You will not eat that apple, because your Soul, your energy is there to give it life. Understand the teaching of today. I have opened and I have unraveled the secret of life in Space and the end of killing on this planet, to live. Those who create wars, use a different energy, tapping to the different dimension of the fields, that creates wars. In time, very near future, I isolate those, I teach you how to isolate them, that they do not receive. We've seen that in the president of Ukraine. That body is a killing machine, for it's own. And then you ask me, "What happened to the Souls of those millions killed, because of his greed?" We show you, he's ?? their final destination. And make example of it, for Man to understand, would you like to have that ?? station? Then, it comes for Man to understand, how even we call, the transmutation. Because, this understanding of

this process, is the beginning of the full understanding of the work of transmutation. It won't happen overnight, but you have to learn.

(:52) You transfer to a new environment, then you have to touch yourself to physicality of it, to be able to manifest yourself and all of you (are) missing that part. As we say in English, "That grubby hands, tainted with the energies of the Universe, is missing." When we did the test in Linz, if you remember, go back on the teaching, one of the Knowledge Seekers came in, sat in there, he said, "I'm on the Moon." He says, "I'm picking up Gans, ... stones, I pick up the stones, I pick up sand." I put him back in the machine again. I said, "Now I give you a bucket, put it in the bucket." And we've watched him physically, picking things up, putting in the bucket. The only thing, which we didn't have, in reality of bucket, was a Gravitational Magnetic field of the Earth, and the stone would have manifest itself. This is how you transfer energies, plasmatic energies, but create a condition of the Earth by your own energy, not by another. You don't need another machine to beam you up. You create that condition of the manifestation of the place and position, by the interaction of the fields of your own body. Connecting condition of the, what we call, the STM, and the STP of the Man, to create the physicality of the time and place and position (TPP). You create the point of manifestation, by interaction of the two fields of the STM. This is the secret of life, this is the secret of 'Beam me, Scotty'.

(:54) You don't have a machine on Mars, for you to transfer from A to B. You create the condition of that machine, according to the time, place and position, through the interaction of the fields of yourself, the way you gave to the apple. The planet you want to land in, is become that apple. You touch it with the fields of the energy of the STP, and it gives you manifestation. This is the secret of life, transmutation. Understanding the process of life in the Universe, is so simple, but Man has decided to deny it, because it gives him the greed position of possession. It doesn't become detachment, it's part of the attachment to the Universe, letting the attachment to the planetary system of Earth, this village to go. It's very much like, you go from the village to town, but every day you call 'Mom, Mom, I miss home, I like to smell the ?? cow shit there'. This is what Man has to learn. The way, the Rays of the Creator, at what you call the Hydrogen level, in interaction with itself, and the dimension of emotion of the Creator, created the Universe, becomes the way you create your Universe, to manifest yourself in the matter state. We are not teaching something which is fairy tale. Confirmation of it is you, energy of the Creator, through span of time reaching here, transferring through the love of Mitra, to become you, as a human.

(:56) God didn't send a human and made you in it. Interaction of the fields of the emotion created the condition of life. So, you have to learn how to do that. It's the fields of you, in interaction with the

environment, creates you as you can survive in that environment. You don't need no machines, you don't need transmutation system. I made Man in the image of Myself, as Man I make the image of myself in another. Because I know how He created me out of Him. Going through the line of the Hydrogen, Carbon 14 and Carbon 60, to give it dimension of physicality. Now Man should understand how to go through the process of transmutation. At the same time using the energy of the, what is given to him, according how to use it. The secret is understanding and applying it the correct way, otherwise it's there and it doesn't work. The only thing it doesn't work is in, what's in your brain doesn't work. Not the truth and not the way the Universe works. Find out what is wrong with your understanding, with your transfer of energy that you cannot do and correct it. Tune it and then you'll achieve it. I told you today, the secret of life on any position in the Universe. Comprehend it, understand it and you live a life without killing. Killing an apple, a grain of rice, stone on the sea, an animal, a creature in the Universe.

(:58) Then understand the concept, the principle of transfer of energy, through the line of Universe. You call it Carbon 14 because it's easy for you to understand. Energy of the conversion. The biggest secret in life of Man up to now has been revealed today. It's for you to understand and for you to apply. And then you find out if you do this, you understand it, do you need religions? Because you have become

part of the Creator itself, in the Totality of whatever it is. And not a sect, but you become a scientist of the Universe. We go for a break and we come back and try to answer any questions in dimension of physicality which is interesting to you. Rick can you take us for a break?

>> BREAK >> 581 KSW March 14, 2025

Part 2

(1:04). K- It's like a Pandora box, isn't it? My great grandmother, when I saw her, she was in her 90's, always had a scarf around her head. And, I was using a knot at the end of this. And whenever we ask, "Can we have this?" She opened the knot and it was in there. We used to call it a 'magic scarf'. Now it's like that, see what comes out from the scarf. Then, as we said to you last week, many of you have responded, we are looking for your expertise. We look if your expertise fits into what we are looking for now or we are making the archive, what we might come back to you later on. We're looking for experts in Space Technology. People who have been in Space Technology. People in what we call, industrial side of setting up factories, managing factories, making blueprints. We are looking for people who understand and are maybe, what I call, familiar in social media. Managing social media. Bringing the, what we call, knowledge to public in a very rapid way, using the

social, present social media. If you know how to operate, how to manage, and you want to work with us, we are looking for ?? sort of a team. People who can make a team, they know how to go around and generate large number of views and everything else. (1:06) We are looking for people who understand how to connect the social media and AI (Artificial Intelligence) together, in bringing up a rapid expansion in what we call, technology transfer knowledge. Keshe Foundation is looking for those who know how to run International management. Different cultures, different races, but understand. We are looking for people who have or understand, deep understanding of the World of Medicine. Doctors who understand the process of Creation. Research laboratories, what we call, researchers. Past week I spent my time looking for scientists who can transfer into computer science, digital, into work of a plasma. If you are on that caliber, we would like to know you. Can transfer the energy, the knowledge, into what we call, computer analysis data, that we can run systems with. It's not anymore switching on, switching off. It's understanding what's the effect of that switching off, on the condition of energy transfer, because it bypasses the mechanical. Creating new microchips, which have emotion. If you are in a microchip industry, we would like to hear from you. One of our targets, at the moment, the biggest target, is those who are working with social media. Understand social media,

and how to operate, right across the 5 or 6 platforms which are available.

(1:08) If you have the knowledge to do, info@keshe.foundation. Every single entry is read. We see many Knowledge Seekers coming up, "I can do this, I can do that." By experience, we are not getting involved. We put you in the position with people who are involved in it. We are the lousiest managing people, with ?? forming companies and factories. So, we are looking for experts to work within the team of experts, or set up experts seem to do, ?? devise. Now, dissemination of the knowledge, in a rapid way, 2025, is our target. You understand AI, you understand social media, how to bring them together, it works thousand times faster. Making short videos, with the full information in small sections, that's what we are looking for. If you are understand it. We see this in the young ages, between 14, 15 and 20, 25. Because, we passed that age, these things have come up very rapidly, even in the past few months, there's been evolution in this science. What we are looking for, is to dissipate the knowledge, across this planet, that everybody get access to, but at the same time, brings the whole technology together, that it becomes a new structure, or social structure. It's not just teaching the knowledge, it's more important to understand the Ethos of the knowledge. When I speak to an old Knowledge Seekers, they say, "The first thing brought us back to understand technology, (1:10) was the first videos you put on the Internet,

years ago, standing next to a fireplace.” It was simple, it was direct and it was effective. And we are looking for the same thing, to explain the knowledge, in a short way, directly through and bypassing all the restrictions. Social media is the biggest tool, and now we are looking for you. If you know how to, just put on the email you send us, social media. I spent a lot of time with one of the most leading organizations in this matter, last week in London, and they have no clue what we are looking for, because they become too entangled with the old system, which was successful, and now it doesn't work. But they think they are the leading edge. You have to be able to understand, if you're youngsters, you want to try it, work with us. Understand, Keshe Foundation is going to a transition 2025, that this knowledge become reachable by every man on this planet. And is owned by every nation on this planet. Black, white, African, Chinese, English, American, there's no borders. We try to explain this, in a way that it brings cohesion between all parts of the Keshe Foundation, being on the teaching, on the industrial side, on the commercial side, and everything else, that it feeds back to support the humanity, and bring the change about.

(1:12) If you have any of these talents, or a talent we don't know, that can be used, let us know. We're always there, ready to learn. Are there any questions?

Q: ... Mr. Keshe, last week you mentioned Italians building houses on mountains, etc. and we live on a rocky outcrop with streams beneath. We also have a

5G tower nearby. Would the Cosmic Ray Balls balance the space?... I have your Butterflies, Gans and Mirrors. Would the Cosmic Ray Balls create a protective dome, or balance out possible geo-pathic fields from underground streams and radiation from the cell tower? Now George says in the Q&A, "Mr. Keshe, you spoke about canceling the effects of running water under the house. You advised us to put a Copper Infinity Loops under the bed. Should they be Nano coated by fire or by caustic, or left as they are?" K- ... First of all, when you use the Infinity Loops, doesn't matter if it's a Copper, Nano coated in any shape or form.

(1:14) Copper does the, what we call, the matter state fields, and the Nano coated does the Energy fields. You can use both, or if you have the Infinity Loop with a Nano coated, doesn't matter how you Nano coat it, it's creation of understanding the knowledge of Nano coating. When you Nano coat, you create that Black Hole. That's all it is. When you put a Copper, it's just what is with the matter state fields. But when you have a Nano coated, you have the Copper inside and you have the field outside. In a way, the Soul sits outside the physicality. And it'll do the same thing. Put it under the carpet, you have such a strong field, you don't just... you have carpets, put it under carpets. Table you eat on, stick it under the table. You'll see, even the discussion on the table will change. You change the environment. You have such a strong problem. Because I lived in such environment, and I know how

well it does. Put Infinity Loop, Nano coated under each chair. Convert it, if it's... if you live near a, what you call it, mast, communication mast (cell phone tower), just place, wash, paint your rooms with Gans's in it. On the ceiling side, on the above side, on the side of the walls. When you're making, when you're painting your room, just add some Gans's into it. You'll interact with the field, you change the fields. To me, I laugh when I see these people, very, very smart. (1:16) Nowadays they've learned, what I call, to put the... the tusk of elephant into their ears. I've seen them, they're walking around the street with little tusk of elephant in their ears (earphones). They are very modern, very chic. I see you in five years time with different cancers, different emotional problems, and the rest of it. Because, you bring things directly in touch, cooking your brain. You connect yourself to the 'elephant' of Universe to kill yourself. You watch how your social behavior changes with these little elephants in your ear. Always chic, now I have wireless. Yes, you wire disconnected yourself from the whole structure of understanding. And see how your behavior changes. Understand how you interact with the environment. If you are... you got paintings, we brought this before. If you got paintings, you have Gans's in cups or whatever. If you are near the mast, see which side the mast comes. You convert, you paint even the roof of the house with Gans. Just wash it, you shower it once, twice a year with the Gans water. It'll sit. Even if you put Gans's on it, it'll sit, it'll

protect them. In a way, it changes, it doesn't destroy it, it changes the field strength to what it suits. You have to learn how to apply the technology. We have shown you the basic. There is a test going on with a construction system, that we add Gans water into the construction material, in cement or whatever is used, as part of the structure.

(1:18) And watch the social structure difference of the people in the house. Originally, was given to a construction company, to see how it changes the structure of the concrete. But as it stays long term, it affects the emotion of the people in the house. You created, we gave you the knowledge, you become intellectual part, and see what it works, and what it works for you. Years ago, when we started this research with G5s and post, and the new system coming in, and G4 and masts, creating headaches and everything else. If you go back to one of the teachings years ago, I explained this. A guy came in, in Belgium to us, that masts bother him. He was living, I think, in the city of Ghent. And he was near, living near a mast. I changed system, I built system for him. And then he said, "It's a big community of us." And then we found out the connection is this community, we ask for all their blood tests, is the Iron. They have a specific characteristics of Iron in their blood. And that Iron in the blood, as a plasma, become receptive to the fields of G5. And we found out, in a very small way, how people are affected, through the, what we call, energy packs in their body, which is near to, what

we call, Copper and Iron. Doesn't mean you make Gans's of Copper and you wash your ceilings, or put it into the structure of the house. That depends on you.

(1:20) But, this is a research we've done, we spent months and months trying to understand why so many people are allergic. High percentage of Iron in the blood, was causing this group of people. And they had to move, there was nothing could be done. Many of them moved homes. Understand, don't become prejudiced, and then use a logical way for it to, to apply it. Any other question? Q: ... Can you please offer us more details about the social media and AI? I'm working in IT, also I have had access to different understanding about life, the Universe and Matter since I was a kid. Therefore I may be suitable for participating in this project. What is the aim of this project? And also, what is the email address again? K-Email address is info@keshe.foundation. The purpose is to bring a massive social awareness of the technology. Rapid awareness of the technology, in a way that then society now works. There's an AI team in China which is working on this. I know there's a group working between Brazil and China, in other part of the connection with teachings and other things.

(1:22) We are specifically looking for people who understand how to log in, to increase the traffic, to bring a massive social awareness about the technology. In every aspects, we have a reason for it. It all connects to the other part of the structure of the Keshe Foundation setup for past years. It's

awareness, product awareness, social awareness, and change of the position of the people to go. We've seen this in a very recent past few days. As you hear from around the world, everybody buys a Tesla, they have no problem. But now if you are an American and a Tesla owner, through the social media, the way they structured this thing, people leave their Tesla's on the street and walk home, because there's so much, what I call, resentment, towards the owner, what you call it, the owner of the Tesla cars, for their social structure. And this has shown clearly, social media, the structure is used has a direct effect on behavior of people. And, and this is in past few days. It's not just for the news, you have to see what is said in social media in the background which we are watching, that creates this position. We want to use the same structure, but to bring a peaceful society, by ?? dispersion of the knowledge, the technology, awareness of it. And, if you are in that position, you can, we welcome you here. Because we have our own IT team, they are too old for this, they don't want to touch it. And it needs a new understanding. As I said, I spent a lot of time last week with different groups, universities and the rest in London, to establish this.

(1:24) It's not just something we just want. We know exactly how it has to be structured. So, if you are in that world, you know how to, you don't need to have a degree in it, you know how to work in social media. Just come in, we make a team out of you and we tell you the purpose and how it goes and, is to bring

awareness and with awareness brings new society, new condition and composition of people. We see what we call, social media groups, we are not looking for that. We want to bring a technology, that it becomes part of this structure. It's for the benefit of all, but in construction and awareness of Totality.

Conversion to different languages, but carrying the same meaning. And that's the purpose.

info@keshe.foundation. Any other question? Q: ...

Hello Mr. Keshe, are there any news on the delivery of the Power Generator and Electric Gas Unit? K- Yes, watch the space. Very, very near future, extremely near future. We are far into it. And this needs, the way the Keshe Foundation has structured itself, it'll be coming out as a, not just for you, but internationally, worldwide. We have no problem in the gas production and conversion into burning for what we call, energy.

(1:26) And this is set up to come out very, very soon.

You've got to realize, when we put this out, in a way, we put it for Knowledge Seekers to bring out, but now will affect Geo-economy, the way we have done it.

And, we'd like to keep it this way for the next few weeks and then you'll understand why. It's not that the technology is not there, we haven't completed. We have completed this technology. One system was shipped to one of the world leaders, a few weeks ago. And, it will create a dilemma for a lot of people.

Economically, for world governments. But we have to be through, we have become aware of what we can, we can do with it. And it'll be done through a different

way, in next few, near time. It's not, not having the technology. The technology is complete, it's just, once we put this out, we have to touch the whole infrastructure of the economical world of energy. It's not just yours. When we came out, when we put this out, that wasn't target, but now it has become a target. And we have solved the situation, it just needs time to put it in the right way out. You got to understand, Americans went into war and they blew a pipeline between gas pipelines, to stop, to control. This way there is no gas pipe lines, but there'll be targets of my life and the rest of it. But we have dispersed it, that it doesn't come into that, for those points.

(1:28) Energy is a very big game, and it has to be handled the way we set it up. But your system is there, it'll be. It's not a matter of delivering it, it's a matter of putting it out, that it brings a change. It needs in one go. In a very, very short time. You'll understand. Q: ... To achieve the condition of transmutation and dislocation in physicality, do we need a higher frequency vibration and more purity for our intention and will? K- Let me explain to you how far wrong you are, from the reality of life, Creation. If you go and look at the frequencies of emotion, different emotions, they're all in lower hundreds. When you look at the frequency of the cancer, it's in hundreds of thousands. This is the mistake of the man looking for bigger and higher. Look for lower and more insignificant, that's where the foundation is made. If you ever been in pain, physical pain of, let's say,

muscles and tissues, and you go to a chiropractor, or to a physiotherapist, they all tell you about these muscles, that's and this, and you look at the big size, big muscle tissues, and you keep on going back, and keep on going back.

(1:30) Find yourself, physiotherapists, chiropractors, with work with the small muscles underneath, and you find out you just need to go once. If you understood the logic. You go to a chiropractor, he cracks you and he shows all the thing. You go to what is known as experts of physiotherapy and chiropractor. They just put a finger on the smallest muscle, and they take the finger off, and your pain goes. They just give you the tiny little massage. The logic is, the big muscle relies on the small muscle underneath, to hold itself and function. When that is wrong, the top plays games and gives you pain. The same goes with the frequencies. Go on the Internet and look at the frequencies. Which higher frequency change, because you haven't understood, habit of the Man, bigger is more powerful. In the World of Creation, I always say, look at the lowest common denominator, you find the path to the Creator. That's where you gone wrong, and that's where, need to understand why you went wrong. Any other question? R: ... Well, that's a good question. Is there any other questions? I don't see any more right now, actually... K- Fantastic, can we go home earlier today. R: Unusual circumstance, for sure. K- Yeah, no problem.

(1:32) The... what's something which I noticed from the beginning of the teaching, the picture used on the screen. These materials are made in a specific way, to transfer energies which touches emotion. They are not the ordinary Gans's you got in the soap and the rest of it. These are made to create a different dimension of emotion. And, if you look at them in the light, you should see dots of Gans energies in the waters, and they're amazing. When you hold them, you feel the energy transfer. You got to understand, even when you look at these small fishes, these fishes are made individually with different Gans's, to create the dynamics of the, what we call, Star Formation (SF). You always see three fishes. So, try to understand how we try to reach you in the dimensions, in the different operations, and different ways, which we release pieces and parts and technologies for us to test. Next Thursday is the Iranian New Year. We just coming to it in the first few hours of the New Year. We celebrated last year in Sanya with all the Knowledge Seekers who were with us. And, hopefully we try to celebrate the Iranian New Year with you, next week, next Thursday. And, part of this is the fish. The fish in the water is the symbol of Iranian New Year. Life in the Universe and the Man as a fish inside it.

(1:34) And that's why these were promoted, especially for that cycle, and it's got a different application. We try to bring joy to life in 2025. And, the combination with what comes, will be a game changer for many

people around the world, through technology. By reducing wars and stopping the wars, what we see in the American administration, it gives a chance for peace, and to keep peace needs new technologies to divert the attention of Man. In a way, give a new toy, that they forget the old toy, but the new toy has to be so good, that the old toy does not bring that much joy. And, this is part of our work, and it's part of what is coming up. And, what will be on the platform of the Keshe Foundation teaching, and that's why we're looking for everything in the modern communication in the Western World, that through it, we reach those who are not so fortunate to have a physical, what we call, facilities to do so. It's nice to see we have no more questions, and if you like we can happily stop teaching. I think we taught too fast, too much, and they haven't catch up yet, they're still 'staying tomatoes.' So, we say goodbye, if there's no more questions, and we'll see you next week. R: We just have one thing to reveal here, which is from Lissy. They have now have a daily wish that, or invitation. And part... sorry I've got the wrong image up here, just a second of... There's... different ones for each day, and I got the wrong... the wrong day here, just...

(1:36) bear with me a second while I... Here it is. K- Somebody says, "I have a question." ?? there's a hand up. R: Oh, okay. Well let me just show this first here... So, I'll just read the wish, or the, we call the wishes for today. Which is, "We, the Universal Council, give through our Soul, to elevate all Souls in

existence, that science with the Soul, is the true knowledge." ... Q: ... I wanted to ask if the animals, like the example of the cow, the cow that we get the energy to ourselves, do they know how to take energy from other plants, and other beings as they need it? K- Yes. If you... we don't take our dogs to school to teach. We don't take our cats to teach them what to eat, what not to eat. If you have a dog, because I've watched this happening many times.

(1:38) When we don't know the dog has a problem, in digestion or structure, whatever. You take a dog for a walk, and you see it, it goes for specific plants, and chews them. They have a full knowledge of world of medicine for themselves. And I thought once was coincidence, but I noticed, every time this dog has a problem, certain problems we can't give it medicine, we're not even aware of it, it goes to certain, or take it for a walk, it goes to certain plants, and start chewing them, eating them. Nobody told him, nobody took him to university, there are no dog pharmacists, or dogs who are pharmacists, tell him what to do. They carry, they know the energy, they see the energy of the plant. If you, most of you have cats, I presume, or dogs, and especially long hair fairy ones, you see they go for certain type of grass. They don't eat any kind of grass, they actually physically eat bunch of grass, they just uproot it. And you say the dog eats grass, no. It knows that type of grass, combination with its hair, going into the stomach, will not be digested. And it makes it to vomit, and all the hair which is swallowed

in the stomach, comes attached to that grass, as a ball out, I'm sure you've seen it with your animals. (1:40) The animals which are kept in the house, behave totally (different than), the animals you keep outside, you take for a walk. You see the animal literally standing and vomiting, you think it's gone sick, but then you see bunch of hair and the grass eaten. They have full knowledge. You put 3, 4 different grasses, they choose one type which fits their digestion. It doesn't get digested, but it irritates and it does to clean up. They are their own doctors. They feel, they see, they smell, they receive the energy and know what it fits them. And they choose different plants, every time, it's not all the same. They pass the plant they were touching last year. This year is the one with ??, it's a different thing, because they have a need for another things in their structure. Yes, they do. They see the energy, they don't have names, this grass, that grass. And they know what matches with their energy. Don't forget, the (their) brain is closer to the ground. The Soul is direct in touch with what is in the Soul of the plant. Q: Yes, and just thought about this kind of formula you said about Carbon 12, Carbon 14, and this formula which works for this planet. Does it work in the Universe also? And if somebody learns it in here and transmutes,

(1:42) can they use this knowledge, any part in our Universe? K- It's when we learn in the dimension of the Soul, it's different than learning the dimension of physicality. Memory of what we call, information bank

of the Soul, is very, very tiny. But, it has access to all others, it's the way a magnet works through the fields. The human DNA carries all the information which needs physically to be replicated in it. The Soul works opposite, it hardly holds any except emotion, but through the field strength it carries, it has connection to everything in the Universe, every dimension of knowledge. That's the difference. That's why you don't need a huge space, you say, "Oh, how come Mr. Keshe says, is that little dot Soul in the brain and all this?" Because, let me say in English, it's not the quantity which counts, it's the quality. This is how the Souls operate. This is what I said in the early teaching, part of today, that when we teach, we connect to everything, you just need a small dimension of teaching. In Keshe Foundation we developed the technology, it's going on the test, that we transfer energy directly through plasma, across the Universe, it's going through the test. What I transmute as emotion and voice, will become part of the energy of the Universe, and changes everything. It's actually made, this is implanted in the system to be tested.

(1:44) I don't need to come to you in the session and tell you, "Now would you like to transmute or would you like to go to the Moon?" I put my wishes in the system and your Soul reaches it and then you go somewhere, "Oh, I went to the Moon." Yes, because you didn't hear my voice, but through the energy I transferred, you receive the information to go. This is how it works, this is how the Universal System works.

Q: Thanks, and what's this emotion line between us and the others? Whatever it is, God, angels, beings, is there emotion line? K- Emotion line is a connection line, we call it emotion. It's a word we say, how we connect to certain behavior. So there's a field strength, we now, for example, we know the frequency of it, but in a fact, if you know the energy of it, you don't need the frequency of it. It takes a longer time to go through a wave, than going straight. And emotions go through the straight line, with a peak of changes in time. We showed it last time, last week, how one emotion stops everybody or changes the direction. Once you understand it, you know how to apply it. It's just understanding how it works for you.

(1:46) Carry on. Q: And, like in the session of 14th of February, you said it's a session for love. And it was short, it was about an hour. But, it was, it had a very, it, later on I found that it had a very impact on my affection side. I think I told you. Did you use another ingredients, another waves or... K- We play with a lot of things in the background. You lot just sit there and think, "It's a headphone on my head." Sometimes we change things, but you need to give it time. If you change things too rapidly, it creates confusion, mayhem with the people. But yes, we play with things. We play with the position and position and the direction. Q: And the emotion of love or... K- Yes, you're talking about the Valentine's Day, yes. Q: Yes, yes. K- We have a very good knowledge and in a way I was in a, what you call it, meeting with bunch of

doctors last night. And I was in a way telling them, "We know everything, we know how to play the game." But people are not ready for it. And this becomes magic or it happen accidentally. The whole purpose of teaching is for you to understand there's no magic, it's you who initiates it, and then it happens. (1:48) And then you learn this is how it's done. And you hear many time, I read all the reports you lot send to us after each session. "Oh, I happen to go there." But did you happen to go there or was it your wish to go there? You initiated it. You haven't start learning that, "I made a wish" or "I made the thoughts, I created the fields and it took me there." But then you say, "I went there, I saw this and that." But who took you there? Why did you end up there? I can't take you to a cinema if you don't want to watch a movie. And it's the same with your Soul, it's the same. It's the sub-consciousness of Soul that it brings you to there, that you instigated it. This is the whole secret from... Once you understand the rest is just a painting on the top.

Q: Yeah, like it was feeling an empty space. It filled that empty space, which I was looking for. K- You enjoyed it? Q: For me it was like that. I mean, I'm very happy I've done that. And I thank you very much for giving us the opportunity and everybody else. And I'm very glad of all the things new happening in Keshe Foundation. K- Thank you very much. The 28th of March session will be very interesting one. We're going to play a new game with you lot. And I hope you enjoy it. Be ready for a little bit of joyful time, because

that's what makes us, what we enjoy we do. And you'll find out we'll play with your emotion in a very rapid way. We totally try to confuse you. It's not that, we just want to know how effective we are to do that.

(1:50) We take you from laughter to cry, from cry to emotion of love, and the rest of it. It'll be very interesting, because you need to know that, it doesn't affect your transmutation, your emotions. You have to get, become in touch with it and control it. I hope you enjoy the 28th of March session. It'll be a fantastic 'rollercoaster' for you lot. Q: Thank you very much.

God bless you, sir. K- Thank you very much. There're no more questions? Shall we bring the session to an end? Q: ... A quick question on animals, as you were speaking of them. When they eat a poison and it kills them, is that the Soul knowing it is time to go? K- No, it's the enforced condition. It's enforced condition and is overtaken by, that detaches physicality from the Soul. And the people who poison, in the long run, they have to answer for it. Q: ... Any status update for the Cosmic Rays materials (CRm) delivery. K- I think they should go out this, or they've been out this week.

Large number has been made, everything is there. I'll inquire, but you should start receiving them, or they should start going out. Large number has been made. R: I think you said everything was ready to go last week. K- Yeah, I was somewhere else for the past couple of weeks, trying to do other parts of the Keshe Foundation work. But, I'm sure you'll start seeing them through your post this week or next week. It should be

at this time, because everything arrived, everything is in,

(1:52) what you call it, there's nothing to stop it...

There is some of the Knowledge Seekers, who bought other system, asked for them to be embedded in their systems, for the Headphones or whatever, that is to come out. We just delivered, I think, or is completing it, 20 more of the Twinity systems, this week. Because there's a session, I think, on tomorrow, with a group in Austria, which uses the systems and they picked up theirs, this week I think. All things, we are not far behind, and there's a couple of things, products, which we, we got involved in, and on the side of the

international work, and we have to be very careful how we launch it. But Cosmic Ray materials, I've seen them, though a large number of them has been made. Any other question? R: No, I think that's it Mr. Keshe, we can let you go now. K- Thank you very much for a short break. Please, listen to what we requested, if you can help us, if you are in the direction dimension, we will tell you why and how, and we are bringing all the forces of the Keshe Foundation, we plan for years, to come into operation in the coming weeks. It needs to be done correctly. Thank you very much. I'll see you next week. R: Okay, very good. That completes our 581st Knowledge Seekers Workshop, here on Thursday, March 13th, 2025.

(1:54) And we'll be back again next week, with another Knowledge Seekers Workshop, at the same

time and place. Our next public teaching workshop will be the One planet, One Nation, One Race for Justice and World Peace. That will be on Tuesday, March 18th, and that starts at the 4pm Central European time. With members of... K- One thing which I want to... I just received something interesting. If you want to see how has been the Soul of the teaching, and how has been, how you lot have connected with us today, what you call, I can show you the graphs of your emotion, and your Soul, and how collectively you become more or less, one in one side. You're receiving huge amount of energy direction on the Soul. I think it'll be good from now on, we show the emotion and the feeling of the, what you call, the session. If you don't mind, we have the time for you to do it. R: Oh sure. K- Let me see if I can pull it up. It just came to us. This is the session today. There it is. If you can interpret it now, enjoy. The interesting part is this, if you remember last week, you had two lines 90 degrees. In a way, when you look at this, the vertical side is the Soul interaction of the Man, (1:56) and you see how concentrated the Soul and STP of the Man has come to physicality, bunched up in the middle. It means a lot of you learned a lot today, all with it. And when you look at the other side of the emotion with the, what you call, the Soul and the energy of the environment, you see the green line, totally separate. It's a lot of digestions for you lot to do. That's a four minute span of the session, part of the session. It means a lot of you still battling with the

emotion, and physicality. But it's very interesting to see this graph, if you go into detail to understand. If we bring last week's, if I can go back and dig it out, and if I find the right one, I think this was last week, and the second one is this week. You see the two lines. If you remember, I explained about how you're connected in a straight line, which is, you see the Soul, the STP, and the physicality, and they're connecting. And this week you are totally different, because the teaching was what you were looking for, how to feed yourself. If you open it up, you see it's very much, it's like you've all been looking for this answer.

(1:58) There is no physicality, there is no STP, it's just the Soul. Which means the teaching has reached most of you. Thank you very much, and we'll learn as we go along. Okay Rick, call it a day.
