Part 1

(:10) K- Sorry about this, apparently Rick power has gone out. We start as usual till he comes back in. Good morning, good day to you as usual. He has to start the session but unfortunately we do not know what the position is till he rejoins us. We start the session as normal till we get the Rick back on the power. As usual, good morning, good day to you as usual, whenever and wherever you listen to this series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. We apologize for delay and interference. Today's teaching is on the back of the past teachings of past few weeks as in a way we have connected last week how you can take energy using the energies from outside, within. In the couple of weeks before, if you remember, I tried to establish for you to understand the position and the possibilities of you as Soul, as the Soul of the Man (STM), Energy Center of the Man, are connected to your Creator.

(:12) In the process of the life, in the process of creation, interaction of the higher strength field with the lower strength field, leaves residual and this residual can be anything, can be another magnetic (M) field, can be a ray, can be a Cosmic Ray (CR) and in consideration with the condition of magnetic field, can be collective, can create gravitation, and at the same time can radiate what we call, magnetical. In the process of life, if you go back to one of the videos of Rick some years ago. If you remember when he used

to put magnet on the table. If you have this magnet in the table, on the table, and you have other magnets sitting on the table, you'll see they find their space, their position and if you introduce small little magnets somewhere into the screen, you'll see these moving in different direction to accommodate the entrance of this new magnet. Even though these magnets could be pieces from the same bigger magnet, broken to pieces, but once you introduce it, the bigger pieces accommodate the smaller ones. Going back to what we taught in the past weeks,

(:14) we understood in a simple term that the magnetic fields of all, is connected to the center one and how they accommodate each other, but even the smaller one has a connection to this structure, they have a connection direct. But even though they connect to the others. Or in a way, a field which comes from here, can go through the whole lot before connecting to, or in another direction. And again this itself can be connected to another dimension (D), to another magnet. Maybe the total interaction of all these fields together, leads to creation of what I call, this entity. But this new entity itself to you, its inherited connection, has a connection with the center. Even though it's created by interaction of the others, but still has to find a position in respect to the center one, that it allows it to be in that position.

(:16) I think if you are clever up to now, you understood where I'm going. We see this in a magnet, we see it in a spherical magnet, we see this in

planetary system. So, what really comes down to, if you really want to 'boil it down,' to its ultimate position, ultimate direction, is, this is the Creator. This could be the galaxies, and this could be other galaxies, and this could be a solar system (SS), and this is the planet. And within the planet, we create lives, which they themselves connect to this, and at the same time, by the same principle, have connection to everything else. If you understood this, it's very simple. In all dimensions, in anywhere in the Universe (U), anything created, even the STM, has a direct connection to the Creator. Even though the condition of manifestation of its physicality (P), is dictated, controlled by other factors, in the process of the whole Creation. We never lose, we have never lost, our connection, in the line of the connection to our Creator. All these hullabaloo in the name of the religion, is all waste of time.

(:18) It's a robbery of the STM, by those who have become the "thieves of Baghdad," in the name of religions. In the name of the Creator, fancy words, fancy books, and the rest of it. Keshe Foundation is a scientific organization, we are not religious. We understand the physiology of the Creation. And, if you don't believe what's on the table, go tomorrow morning to a shop, go on whatever you shop from, Amazon and the rest, and buy yourself, bunch of different size of magnets. And put one big one in the center, and play the game. And put on one of those magnets, 'me'. And then you see, when you introduce

'me', how the whole structure of the setting of the magnet changes. Even that little 'me', has a say in the structure. Put one of them Earth, one of them the Moon, one of them the Galaxy, depending on the magnetic field of. And then you see how the game (is) played. No one can lie to no one. This is the end of religions, once you understand how you directly are connected to your Creator. But, you have to understand how. You have to understand, how to tap into this direction of it. You like to go through the, what I call, connection of the Earth. And then the Sun, and then the Galaxy, and then the Universe.

(:20) That's your prerogative. Call it 'Mullahs', call it 'Priests', call it 'Religion'. That's your job, to find your way. But, you as a person, as a dimension of the Soul, have a direct. Because, it's a field has created you. It's energy within you, understanding and recognizing. Am I going direct, from A to B, or would I like to go through a lot of proxies? And you have to understand, and every corner of this proxy, there is a thief, stealing from you, trusting in yourself, stealing from you, the Knowledge of the Creation. Because, you have to understand, most of these Earth, does not see that you have the connection to it. Because, they, you see yourself going around it. Your God has been, how the Sun rotates, and where the Sun is. It's a Spring and Summer and Winter. You alluded that, that Sun is connected to the operation of the Galaxy. We're just a piece of, somewhere in Galaxy. Where in fact, our Solar System has an effect, and how even that

Galaxy, in a bigger scale, doesn't matter, 100 billion stars, positions itself in respect to the center of the system, in respect to the Creator of this Universe. Because, this Universe itself, has a central control with other Universes, which created it. Which again, if you understand it, you even have a connection directly to that center. This, up to now, has been your Universe. This new dimension, this new direction, this new understanding,

(:22) in a way, if you look at it, is the Unicos. Up to now, the teachings of whatever you believe in, has blocked you, has kept you, even to see this (you are connected to everything). Let alone this (you are connected to the Creator). And understand the work of it. And now, in becoming part of Universal Community, you become part of the Unicos. And, it's your responsibility, about yourself, to understand about this. And this, is another dimension of knowledge, not dream. Of understanding, of a bigger field, how they interact. Man, today, has been struggling to understand about his life, even about himself in respect to his planet. But, if you understood this, and you understood the teaching of last week, you understand, very simply, when you kill, you take a Soul, which is connected itself, to all dimensions. Which, itself, has a connection to everything else. And, you have to understand, in destroying a line, you release a Soul, so the whole structure moves. When you learn, that source is there for you to connect to the Creator of the whole lot, which you have a

connection to, why do you bother taking energy from the life, where you can take that energy directly from the fields of the Creator, which lead to the creation of ?? that.

(:24) Today, we enter the beginning of the spring of 2025. And, by the promise of the Holy Books, if you go to the Christians, to the Muslims, to the Jews, and the rest, in 2025, Man will be given the key, Man will understand the Totality of this secret. New knowledge, new change, new understanding by Totality of the Man and the Mankind, that allows Man to enter the cycle of life. 2025 is in all the Holy Books, is the year where the change will come. Islamic religion leaders are waiting for it. Christians in Vatican have been prepared for it. Jews have been banging their heads against the wall, and the Jewish leaders in Jerusalem are waiting for it. And that promise will be fulfilled. That Man will gain knowledge, to access the whole structure of understanding. In the next few weeks, we'll go through the cycle of the new years of every religion, and a new cycle completed, will start the new religion, the new cycle, the new understanding of Totality of science of Creation. This is not just what I say, this is just we fulfill the promise.

(:26) And, those who fulfill it, is you, you understanding, as Man, as a woman, as a child, a new wave of knowledge, a new energy will be released amongst men, that upgrade the level of understanding. It's like that you understand how to be a doctor, not by reading the books, by receiving the

intellect. Mankind gradually, from now on, will enter the phase of becoming part of Universal Community, by understanding the work of the Universe, scientifically. Is not the change will come, from now on the change has come. And, as old saying says, "By hook or a crook, by pulling your ear, by dragging you in, by pushing you in, you'll learn the knowledge." Mankind will understand the technology, and with it, the technology of the Universe, the creation, Mankind will open itself to the whole knowledge of Universe, and the whole dimension and direction of the Creation, in the Universal Community. It will not happen in one second. Every possible way has to be done, will be created, to create that condition. We have started that process, in the past few weeks. And, what was promised will be fulfilled.

(:28) In a way, the Promise is not the wars between nations and religions, the Promise is the peace between the STM, and the Soul of Physicality (STP) of the Man, in understanding the transition and transmutation between the two. When Man comes to peace on that, Man will create no physical wars, because he has conflict with him, he lives as a schizophrenic life, without accepting the other (the Soul), leaves the wars outside the Man itself, because he's already have not understood his own internal creation. In understanding this, is the responsibility of Knowledge Seekers (KS). Those of you who've been brought here, not by accident, you don't listen to these teachings coincidentally, you are here as part of the

structure of the change. Your Soul, without knowing, has brought you here, because physicality is not aware of it, to become the banner of the knowledge, for the rest of Humanity. It does not matter if you listen in a farm, you are a professor in a... sitting at a table in a high office, you are a president of a nation, or you are a street cleaner. And you listen to the teachings, and you become aware of the teachings, and gradually the phase will come, because then your Soul will bring you to that position, to serve Humanity. You heard the voice, today your Soul has already become a servant, to serve the Humanity, and the Mankind, and the rest of the Universal Community. Nothing is coincidental, it's that magnet. And with what is on the screen, if you understand it, you don't need no intermediary.

(:30) Teachers are not the intermediary between you and understanding your science. Teachers are there to show you the path, to enjoy the science. As I always said, "We are Universal Teachers." It's for you to access the knowledge, and science of the Universe. It's for you to understand the process of the Creation, and to understand the Totality of the knowledge. And it's for you to, in a way, bring that Day of Judgment for yourself. When you accept the presence of the Soul, and respect the STP and the physicality, and understand the interaction between them. What's been interesting for me for a long time, has been, that when it comes to our children, we hackle, we fight, we do, we give our lives, to save our

children. If it's a car, it's about to hit the child, we jump in front of the car, we push the child away, we save that life which we created, but we let our lives go. But what is interesting to me, if we care about this child, that we led to his creation, why don't we care about our own Soul, which led to the creation of us?

(:32) We have lost the sight and respect for our own creation of dimension of physicality, which is our Soul. And we have left it in the hand of thieves, in the name of religion, to play with it, to distract us, to take energy from the Soul from us. We give our lives to save the life of our children, but we don't literally care about the life, which we have given life to, as a physical dimension of the Man. And when Man has respect for his Soul, when Man has respect for his STP, when Man has respect for his physicality, which is the dimension of interaction of the fields of the Creator, then Man will have respect for the whole of Creation and his Creator. You don't need to bend to it, you need to stand equal to it. You don't need to 'bang your head 17 times on the floor' every day, or go to the wall and bang it, or use the name of the Christ in every shape or form to do it. But to have respect for yourself, within the structure of the internal structure of the Man, Soul, the STP and physicality of Man. When you respect the Soul, you will not call it a dream. When you respect your physicality, you will not let it injure, as the Soul will look after it. You get into an accident, the Soul will pack it up and present it. You don't go in a state and then you travel and then say, "I

had a dream." As long as you call it a dream, you're denying that respect.

(:34) As long as you let that physicality injure, you deny the respect, because the Soul is there to do the repair. The Soul is there to give it the, what we call, the perfection. And that is your day of judgment. When you judge and respect the whole levels of the Creation, starting from your physicality to the STP, to the STM, to the Soul of the Universe, and the Soul of the Creator. If you understood today, I moved your goal post by a lot. Up to now, you considered the central point to be where the center of Earth is, and there is a creator for it somewhere. Totality of the Creation sits somewhere else, outside this Universe, which leads to the Creation of many Universes. Now you understand what is on the back of the Book 3 for years. I showed you the path through the dimension of Magnetic fields, to be a Creator, and today you understand what that picture means. You always consider that your Soul sits outside, and they forced you to accept it, because they can abuse it. If your intelligence within me, I use it to repair my physicality, I use it to enlighten my STP in dimension of all cells within my body, and then through it, I tap in through the emotion of the dimension of the Soul, to understand the Totality of the Creation. And now the 'goal post' has moved.

(:36) You don't look into the center of the Universe, you look in what led to the Creation of this Universe. That's where your Creator sits, that's where the

original fields and lights came from. Photon is your Soul. That light. And your physicality is that matter. And this must answer many scientists. Is the light, one or the other? Depends if it's reached dimension of maturity of the Gravitational Magnetic field of the time, place and position (TPP), you see it as matter. If it is in travel, and does not field in the strength of the time, place and position, Magnetic Gravitational field, is just a photon, it's just a light. That light, that ray, that you cannot see the pressure of it, you feel it, will manifest itself in another dimension, another strength down the road, in another position in Universe, as a matter which you feel it today, on this planet, time, place and position. This place, this condition, is not the place for its manifestation, according to its field strength. And so shall be the STM. You want to travel in dimension of physicality, or do you want to travel as dimension of light, the Soul of the light?

(:38) And you do not need to destroy the physicality for it to be the light. Because, when you go in the dimension of light, it'll manifest itself somewhere in another field dimension strength, as entity. This is where your Soul will end up, in a position, and a position of the time, place and condition. And you, educating yourself about this point, will tell you, you decide how to elevate, where that Soul will land, in this Universe, or in the much higher strength Universe, in another dimension, place and position, or even in the dimension and strength of the fields of the Creator. This is what I say to you all the time.

Understand the knowledge, and then in the journey from this to this and to this, you will not come across more crooks, charlatans, and others in the name of different prophets and religions, on the path, because you did not understand. We educate you to the Totality, that there is no more 'highway robbers' and "Robin Hoods," and this way in the name of the religions, and the Mullahs, Ayatollahs, priests, rabbis and the rest. Those Ayatollahs, Mullahs, priests and others, once they enlightened and understand of their own path, they will guide you directly to the source. (:40) And they put their turbans and the hats and the hoods and the rest of it down, as they become another man on the path to the Creator. You got to understand, from now on, is you who decides your future in the Universal Community and nobody else. And in a way, you have to educate yourself in the conditions and dress yourself according to the knowledge you have. In the winter, you do not go out with swimwear in the snow. In the Universe, you do not go to another position, when you don't understand the condition of interaction of the physicality of the fields of the plasma of the Universe. You can test, as many times as you like. You can do as much as you like, but you have to understand, from now on, you are responsible for it. You stand for every action of it, and you are nothing but an intermediary between your Soul and STP. In so many ways, Mankind has to be kind to himself, to become kind to the others.

(:42) You got to understand, that the source of the problem of the Man has been from the time when the Man became physical. And those who understood the attachment of the Man to physicality, created religions, to abuse the Man. And those who end up following them, created more problems for them, as such, for the Man, to benefit themselves. And our job as teachers is to show you the path. It's for you to choose the path, not for us to enforce the path. As the freedom of the choice brings a variation in beauty of the creation of the Creator. As a teacher, I can show you everything about the electronics. It's you who makes a sender and receiver, which is more powerful, more effective, with different strength and different attributes. We show you the components, it's you how you put it together, and how you apply to enjoy it, and how to, with it, elevate your understanding of the process.

(:44) It is interesting to be part of human race, to see the weaknesses of the human race to be able to save the human race, from its own dilemma, its own pitfalls, its own shortcoming, and its own dimension of understanding. And, I hope, I hope we manage to strengthen this. We manage to understand this, as part of the structure of the change, which is set for Man. To come, to complete, and in so many ways, to see the future of Mankind, by Man himself. Then, you understand why we gave you the example of the apple, and the example of how you can take the energy from the apple without destroying it, by using

the Magnetical Gravitational fields. Where the Magnetical fields of it, feed you, where its Gravitational (G) field takes from you, what you don't need. Very interesting point, if you understood the teaching of last week. I give you an apple, you touch it. I give tens of you apples, you touch it. And see which apple lasts longer, which apple rots first, (:46) which apple shrivels first, which apple shows different texture, and then, you don't blame it on the environment. It's what you gave it, which gives it that information, that energy. A joyful living life, you give a life, because what you don't, what in a way you have so much of, you give to it, and you give life to the apple. When I gave you the example of the apple last week, that you take from it, what you need, remember one thing, it's taken from you, what you do not need, and what you have extra. And if you gave it joy, this is what I always said, when you touch something, it makes me happy to receive this, if it is within you. It's the same if you give that much to that apple, you'll make it rot, you'll make it shrivel, you make it become much better than it before, because that touch, you gave the kiss of life. You gave the information, you gave the energy which you don't need. And so, if you want to see that apple thrive, and be there for centuries, you have to understand what you give, joy, pleasure, life, that I'm not there to take, I'm there to give you. Because then, somebody else when touches that apple, does the same, it becomes the essence of life. Don't look what you take, look what

you give, and what you give doesn't become the source of the demise of the other which receives it. (:48) That's more important than what you receive, even though you might receive none, but watch that apple, how fast it's destroyed, watch that apple, how long it lasts on that table. Then you know the truth yourself, am I the real giver? Do I, am I there to enlighten, to give life to, or am I just a sucker, to take, and I still play ?? jokes. Ladies and gentlemen, in next few minutes, I'll leave you for about 10 or 15 minutes, as my root seats, within the belief of Zoroaster. And I love and live through Mitra. Those of you who were with us last year in Sanya, we celebrated together, the coming of the spring, the Iranian New Year. We have celebrated this day for thousands of years. The science of Man could measure to the second, when the winter finishes and the Earth enters the spring. And today falls round about one minute past ten, and I usually spend this time with my family. I leave you for a few minutes with Rick, to play an Intro, (:50) while we celebrate the coming of the New Year. I'll come back round about five or ten minutes after ten, when the actual time of the change, is just about round, a few seconds from now. And I wish you all a beautiful year, and a wonderful coming of the new year. Rick, if you would like to take over for a few minutes. Are you back? R: Sorry, I had to un-mute there. Yes, I am back and I will take over here. Thank you Mr. Keshe. K- Thank you very much. Happy New Year to all the Iranians, and the rest of you, believe in

the existence of Mitra from the Creator. Thank you very much. (Rick talks about his experience with some of the early Videos Mr. Keshe made. It's called, "Keshe One" this was the first video Rick was introduced to when he discovered the KF and Mr. Keshe's teachings. This was the first teaching video of 15 years ago. ... It was because these simple videos answered many questions I had ... He plays the video (:54)

>> BREAK >> 582 KSW March 20, 2025

Part 2

(1:04). K- Thank you very much. You brought back a lot of memories, seeing this video. A number of new videos will be recorded in the next few days and weeks as we go. And will be released on the Internet, explaining the new science and new technology, which will back, will be backed by technologies which will be released by Keshe Foundation. We try to release one new technology per month at least, unknown, unseen, starting from next few weeks. We'll push this through our hands, into the hand of governments. And large financial, what we call, commercial organizations, where we bring that change in. This is the announcement of the Keshe Foundation, the change we'll bring in 2025. Some 25 unknown systems and technologies will be introduced on a monthly basis.

(1:06) We do our best to be released in 2025, 2026, across this planet. They'll be released first to international organizations, which can commercialize it rapidly, and to the governments. We have brought in some of the experts, and some of those who are experts in diplomacy and politics, been at the heads of some organizations and nations, to bring this change rapidly through two hands, of the commerce and diplomatic and political side. This will bring new changes. In the next few days, next few weeks, we introduce the first, what we call, groundbreaking change, technology, in the hand of governments. And our principle with the governments is, technology in exchange for peace. We do not go to the top to come to the bottom, we go from the bottom to come to the top. In a way, we share technology through large industrial organizations, corporations which can dissipate the knowledge rapidly, and at the same time, in collaboration with governments, to bring changes for humanity. A lot of things you've seen in the past, set by Keshe Foundation, and a lot of structures we set up, gradually come to work, to bring that change. One of the most powerful organizations in the world of commerce and technology, is set to be established. Everything has been done for it to start processing.

(1:08) The people, some of you know who you are, have already been approached, to bring that change. And, it'll be instrumental to create that condition, of change through technology that forces peace. We will break the barriers of knowledge, technology, abuse of

energy, and everything else. Randomly, we introduce new technologies, to you random, but it has a purpose for us to do. We make sure, before the end of 2025, and in 2026, we take Man into Space, through transmutation and transportation of the Keshe Foundation technology, through governments, through structures which can rapidly dissipate the knowledge and technology across this planet. We bought, we set up, we structured, for this day, over past 10, 20 years. And, a number of new technologies, which changes the process of the thinking of the Man, will go in the hand of the governments and industrial organizations, in competition with each other. Which means, cannot be locked up. All the technologies we'll release, accordingly to governments, and financial organizations, and commercial side, that it breaks through, the what we call, 'those who have been trying to centralize.' I hope, Mankind uses this technology and knowledge to create peace.

(1:10) And I hope, as I said to you, 2025, and beginning of the Spring, of the cycle of Mitra, which starts from the past few minutes, with bringing that change, we fulfill the promises of all the past times, in the coming months and weeks. Many of you who are listening, have been approached by the Keshe Foundation, for the change, and you know who you are. Try to serve in your position with sincerity, as every decision you make, will bring a change, it'll affect somebody's life on this planet and beyond. We are set to bring the change, and we plan to bring the

change. The change will come in the end of religions, in understanding every Man is there to elevate his Soul to serve, and not elevate to serve himself. We'll bring an end to the abuse of energy, to the abuse of what we call, resources of this planet and beyond, where we use the fields of the Universe to create the condition of life. The changes introduced in the first few weeks, will be so radical, that it'll change many governments, will create many enemies for the Keshe Foundation. Record all the teachings, and keep that in case we get attacked, you can bring it up.

(1:12) All the teaching has been recorded and kept in the background, in number of locations across the Keshe Foundation structure. It's your responsibility to be there, if they bring our system down, that you can put your system back up. Do not forget, with the release of these technologies, the oil industry, the energy industry, the material industry, the structure of the power in this planet will change. This is not a talk, as you will understand, you come to see in the coming days and weeks, we set the structure for this, a long time ago. And now, we have put the people we built in the diplomatic core, through the World Presidents, we set the people who we understand and know in the World of Space Technology, in the World of Commerce and Commercial, all in motion in past 3 months, to be ready for the change which comes after 21st of March, 2025. It depends on you, how you stand, and it depends on you, how you dissipate the technology and the knowledge. Keshe Foundation,

from now on, its knowledge has become a Global structure, because we set it so, and in the past few weeks, I gave you many hints about what's about to happen. We bring it, in the back end of this year, or early next year,

(1:14) direct contact and interactions with the Universal Community, through the knowledge and the technology dissipate, through governments, through structures. And in so many ways, you will see an end to a lot of old ways, and start of the beginning of a new cycle of life, where we don't damage the resources of this planet, when we will not kill anymore for, to receive life, and where we are not, we don't allow, we are not allowed by ourselves, to ourselves to be abused in the name of whatever we've been abused for, political name, religious name, and whatever you put yourself under. The first three technologies we release will change and prepare the ground for equality of Man, in access to all resources to live a comfortable life on this planet. The next job after that, is to dismantle the structure of the financial organization of this planet, by devaluing what Man has valued to be valuable to him. In the latter part, we dismantle the economical structure of the financial world, through a structure of interaction of new systems. Later on this year, we introduce directly the first flight system, which uses the, what we call, the field forces of the Universe. Somewhere down this line,

(1:16) you will see the work of many scientists of the past, that you could not understand the technology of. They understood a little part of it, they understood part of the process of the creation of the fields and the energies, and we complete that cycle. In a way, a full cycle process system. Many of you have been waiting to understand the work of the beautiful Tesla. We complete for you, to understand the whole, full understanding of the work of the Magnetic fields leading to creation of energy anywhere in the Universe, which Tesla just understood a little bit of it. We complete the process of release, creation in the dimension of the fields as a matter state, we'll make gold to have no value for Man, as every household will have access to. We'll bring an end to the commercial use of banking system. We'll bring an end to communication system of satellites, where Man can communicate direct. Some of you already have received some of these systems, but in a way, you do not know how to use it. We bring an end to Man being caged on this planet. We move Man from the village of Earth, to move to the cities, and to the planetary systems, where the cities of the Man will have no value. By the back end of this year, beginning of next year, systems will be introduced that'll make shelter for every man, will feed every man, that man does not need to live for (from) handouts.

(1:18) Man does not need to migrate from one piece of the land to another, to just to stay alive, to become the servant of the others. Man become a traveler of

the Universe, and the technology, many of it you have tested, but you do not know how to trigger it. We'll teach all that process, and we'll commercialize it, through the commercial structures, and the governments around the world. All and everything about this structure, has been pushed and set up in past few months. And as we complete it, step by step, we have to be aware of those, which will lose their power. They lose the power of energy, gas, and everything else, power by the electric powers, that many nations in Africa, have fallen behind the rest, because of the lack of power. We'll replace systems, which create fresh water at any point on this planet and beyond. New technologies in receiving energy, through the central energy of the body of the Man, the Man does not need to kill. Keshe Foundation team, in the coming time, will introduce, as part of this structure for Man to learn, App system on mobile phones, which again, your mobile phones will not be connected to satellite system, but connected through a new system of understanding the technology, which will come through the major corporations. Satellites have become obsolete, and at the same time, we introduce systems to bring conservation of energy back on this planet. No more mining, no more destruction. End of building dams, and end of destroying this planet, with accusation of nuclear technology.

(1:20) In so many ways, from today on, we physically set to bring the change. Where, up to now, we brought

the change through the science and technology and teaching. Teaching will not stop, but in the structure we put together, through world politicians, through world scientists, and through the structures which Keshe Foundation has set up in the past, will affect the commercial markets directly, will affect the resources directly, and through it, we disperse the benefit across the humanity, through research and development. Within the next two years, we'll release so many new technologies, new understanding, that systematically makes the old, and not obsolete, but as alternative of another way, as is there, but not beneficial for Man to be. We see an end to oil industry, we see an end to production of batteries, we see an end to recycling and damages Man has done to water resources of this planet. We start the beginning of it, technologies are already under negotiations with number of governments, a number of major corporations, a number of small corporations, that they can bring that change, to bring the change in operation, step by step. We use the commercial systems which is set up in the past, to bring that change. We use political power, we use diplomatic power, we use every steps we can. But we will not collaborate with no religious organizations,

(1:22) and no government which is connected to religions. Because, we open another door of abuse, where we expect these governments, to return back to the order of the, what we call, democracy, and not the abuse of religion to create governments. We open

doors through science and technology, that by Man understanding, will walk away from the churches and the mosques and the rest, and there'll be no one in there to teach, pretend to teach, or abuse. As I said to a diplomat very soon, all the properties of the churches, the mosques, temples and the rest, will be returned to the national assets of a nation, where the nation decides what to do with them. Keep them as a historical value, or destroy them, that the Man does not fall for the same abuse, and hidden in the back doors of the houses and the churches, and the mosques. These are national assets, and has to be returned to the nations. Some of the larger organizations we see, like Vatican, the resources has to be spread across all the nations where they built it, and dispersed amongst all the same. We see the return of the stones of the Vatican back to Coliseum. It's waiting for the orders of those who sit in it. We see the same with the Islamic World, and we see the same with the Jewish World. The same with the others.

(1:24) The only belief of the Man has to be to his Creator, without no intermediaries, as the Man will be knowledgeable in the work of the Universe, and understand the Totality. I welcome you to a new future for humanity, through science and technology, and not in the name of fake religion. You have to understand. And it's your own independent investigation of the knowledge, which has to bring you to the point of your maturity. And that maturity can change even while

you're maturing, because you understand more. Watch what will happen around you, in next few weeks and times. Many of these videos will be released in an advanced way. We use the best way, the present, what we call, communication systems. We'll use the Internet in its full value, to disperse the technology and the knowledge. And at the same time, we use the structures we set up before, to commercialize the technology, for those who cannot do, to have access to be able to do. I hope I fulfill my promise to my Creator, that by the time I leave this planet, I change the course of life on this planet, through science and technology, and no other way. Welcome you to the New Year in the belief of the path of Mitra. And I hope it'll be a wonderful year for all humanity, as I know what is about to be released.

(1:26) Any questions? R: Well, thank you Mr. Keshe, that's quite a, quite a plate full that you have there. And it's quite a buffet as well. Wow! Okay, well, we welcome the new changes, that's for sure. I've been waiting all my life for these, these changes that are coming. I think in a way, my life and many people's lives are dedicated toward this change. Okay, well, I do have, I did find a magnet video, if you want me to blast you back into the past of the December of 2017. You could briefly look at that if you like. K- Go ahead.

R: ... Okay, this is from the 201st Knowledge Seekers Workshop (KSW), December 7th, 2017. And Mr. Keshe wanted me to find the magnet video. I'm not sure if this is the magnet video that you're looking for,

because we've done magnets, I think a few times. But, does this look familiar?

(1:28) Is this what you're looking for? K- Yeah, that's as good as anything else, just let it play. R: Okay. K- Rick, before you start, all of you, pick one of them to be your Soul. And pick one of them to be the Earth, and pick one of these to be the Sun, and one to be the, what I call, the Universe. And see how your Soul affects it, and see if you are affected by the others. Then you understand how we are in this Universe. But, there is trillions of these in the Universe. Choose one of the magnets before he starts the video, and see, that's my Soul. See how your Soul reacts, and how without you having any say in it, in a way, it moves around, and how the others is effected. Don't look at the physicality, look at the interaction of the fields. Which fields could interact, or interest, or, in a way, make you to move? Choose a Soul, and let's play. Go ahead. Do you want to play it? R: Yeah, I'm clicking, it's not playing, it's being one of those. So, let me just try to jog it a little.

(1:30) K- Do you want to reload it? I might have to, let's see here. Oh, there it goes. <<< Rick play the video with the magnets on the table. Below is the transcript of the talk of Mr. Keshe in this video. >>> K- ... You see, these magnets, all have fields, and all collectively have decided, this is the position we take. The shape, the size, the color, is irrelevant. Because, collectively, I have decided, with the other magnet on the other side, that this, the position I take, for him to

be there. Each magnet, as you see, you can compare it to Soul of one of you. If I bring one of these magnets, close enough to a position, near to another, even though you cannot see, the interaction of the fields, because these fields are dynamic all the time, leads to creation of a matter, in the state of the power of the magnets. So, every one of them, is capable to create matter states, at the dimension, strength of the field,

(1:32) of the transition between the two, and every one has a capability of manifestation of physicality. You call one the Sun, you call one the Earth, you call one the STM, and you call the other one the STP. Why do we call it the STP? Because it has a Soul, that in dimension of its existence, in interaction with the fields of the Soul and the Earth, has led to manifestation of its physical dimension. This is exactly what Peter showed us, months ago. The interaction of the fields of the STM, and the physicality Soul, in interaction with a third dimension, which is the fields of the Earth, has led to the creation of physical manifestation of the Man. This is, if you understand, a matter is made, a matter state manifestation of the existence, as we look, exists on this platform. Each one of these fields, each one of these magnets, in interaction with each other, are creating different matter states, amongst each other and between each other. Because, they need them to decay, that the others can use. Collective consciousness of sharing

collectively, the Totality of the energies which is available.

(1:34) You want to understand this? This is the state of peace. This is the state, in the matter state, we can achieve, but in the physical state of the Man, we have not understood. In the interaction of my knowledge and my physicality, with your knowledge and your physicality, we make a bread. That's the physical manifestation of our interaction of the fields. We make a car, we make a pen. In the interaction of, between the STM, in the STP, we make the Human body. In the interaction, in presence of the third dimension of the field, which is the Earth. In the interaction of the Sun and the Soul of fields, and Jupiter and Saturn and Earth, we make other things. Because, each one has a Soul of itself. The sooner we understand this, the sooner we achieve the state of the magnets we see on this board, with the STM, then collectively we have entered into a new dimension, which is a collective Universal Community, collective peace, collective consciousness of peace. Just move any of these magnets, Rick. We all have to move, to accommodate a peaceful transition. Doesn't matter about the size.

(1:36) You see, when he releases it, it moves back and the other one comes into scene. Because, this is where we are all at peace. You make a wrong move, the whole thing collapses. This is what we have to step into. This is what we collectively have to realize. Very much we move in, we create a condition, that does not allow the others to create conflict, and ?? we

move out. Collectively, human race is coming and achieving the position. peace, through the operation of the STM, is the cornerstone of the peace on this planet. And now collectively we have decided, we do not use the foot, we do not use a pen, we decide through the Soul. The most advanced technologies which has been made by Man, to create the tools of war, is perfect. Because, we needed that knowledge now, to transfer it into making the tool of peace. It's just a different application. It's just making a tank, or using the same metal to make a piano.

(1:38) One kills, and one is a music to the ear. As I said in my teachings in past few weeks, collectively in understanding, we're triggering the Souls, to understand their power. Because, up to now, by keeping Man away from the Truth of his own power, through the name of religions and gurus or whatever, that they could gain power, now we give the power back to the STM. That no one can abuse it, except if the Man decides to abuse himself. Another magic by Mr. Rick Crammond. Just move, just move, no, no, no, no, wait, wait, wait, wait. Go back, go back. Pull it back, pull the whole, the big one back, all together, yeah. Bring the other magnets in, the way they were. You will see something very, very interesting, if you haven't noticed. Now, just move the magnet, the big magnet, just a little bit in, which is the STM, just a little bit more, little bit more, little bit more, little bit more, little bit more, little bit more, little bit more. Okay, now try, stop, stop. Now try to move the inner ring in that

thing, towards them. Don't touch anything else. Try to keep the black one solid, and then move that.

(1:40) You see, the STM, is a controller of the physicality. And in so many way, the physicality is a controller of the STM. And, we don't need that intermediary. The little ring, to start with, is the STM, in the gap between itself and the black one, creates a bigger physicality manifestation of the body of the Man. But internally, dictates the position in respect to the others. And vice versa, when the physicality joins the STM, does the same game. Yin and Yang, Yang and Yin, it's all the same. In so many ways, those who think and are worried what is going to happen, they should be confident, that nothing is going to happen, because they can create peace, they can influence. Because, a little magnet as you've seen, dictates the move of the others. [sniffles] The problem with us is, it took us four years to get here. And the problem with us, is taken 6,000 years to fool the Man. <<< The video with the magnets finish here. >>> K- ... No, it's okay, it's just explains a lot.

(1:42) Do you know the date of this video? R: Yes, it was December 7th, 2017. K- Teaching hasn't changed, has it? R: No. You are saying the same things today, in some ways. K- It's the way, because now there is more ear to hear, and more understanding, because of educated. And, it's interesting, in how Man goes, and how we, we understand more, but in a deeper way. That's beautiful, thank you very much. Are there any

questions? Before we start, I would like to share something with you, which is precious to me. Many of you must have seen, or been, through the process of the Keshe Foundation, and understand what we celebrate. This is, what I share with you, is what is called, the table of the Iranian New Year table. This is in my house today, and that's how we celebrate. You put Christmas trees, you put candles, and in the traditional way, we celebrate, this is called the table of New Year. Seven items with S, if you were with us in Sanya last year, you've seen it when the table was set by Alzar there and the others for the New Year. The essence of life connected to this planet.

(1:44) And, it has a lot of meaning, it has a lot of connections, as part of it. There are seven items on this table, which make the, what we call, Iranian New Year table, which out of what they call, 20 million words, in the vocabulary of Persian language, only these seven relate to this table, which is made by Earth. And it's edible, and it's processed by only vegetables, and there is nothing else to it. The eggs symbolize the Earth, the mirror symbolizes the moving of the Earth, when it moves, and it shows the change of time. The fish shows the sign of the planetary system, and the waters and the seas and the ocean, and the apple, is what we know, brings the Man to. We keep this table for 13 days, 12 days, and on the 13th day, we dismantle it. As is the tradition now in Christianity, 12 days of Christmas. We consider the 13th of the month of the Iranian New Year, as a bad

omen day, which wasn't then, but it became, and when Iran became, enforced to the Islamic religion, where on the 13th day, of the New Year, the Arabs beheaded the Shah of Iran, and we took it as a end of the glorious time of Iran. And that's why we, the 13th day is considered as a day, everybody goes out to get rid of the nastiness, which the Islamic world brought to the nation of Iran, to the monarchy and the empire of Iran.

(1:46) And the rest is all to celebrate the light, the ??, and the apple, when each one indicates one thing, the vinegar is the essence of Man using, processing the cycle of life, and everything else goes with it. But there is something unique in this picture, which has never been before. As we enter the new cycle of the Universal Community. Maybe some of the Iranians understand, the tradition is that we put a gold coin on the table, to show the wealth, and connection of Man. On this table there is a slight deviation, which will be from now on, is this item. This is the Cosmic Ray, which carries the Gold of the Universe. And it's put on the table of New Year, as we enter Universal Community, and we celebrate the wealth of the Universe, and not the wealth of the Man. And this is part of what many of you will receive in the boxes, which is on the way and getting completed, to come as Cosmic Rays. When you receive the Cosmic Ray ball look inside it, you'll see the Gold of Universe, and the rest of the wealth of the Universe. And, this has become the tradition of time. As we think, we take the

dimension of the Soul of Mitra, into the dimension of the Universe through the wealth of knowledge, and collaboration. Welcome you to the New Year.

(1:48) And, I'm sure 2025 is the change of time for Man, after thousands of years. Any question? Q: ... Just like Rick, me too, I came to get touched by the Plasma World, with the short and eye-opening videos. This was my very first moment or time I ever got to know Mr. Keshe. I think it was around 2009 or 2010. Bless Mr. Keshe's heart for all his unconditional sharing, in order to free Mankind. .. Q: ... Hello Mr. Keshe, last week you briefly explained how to establish a Star Formation (SF) through the human body to achieve not consuming life. I didn't quite understand how to operate it. Is it done like this? Step 1, use one hand to touch a life like an apple, my head and the other hand. Step 2, place the apple next to my body, slightly raise both hands, and then gently shake them, which will create a fourth point of the Star Formation.

(1:50) Then it will automatically establish a mutually communicative and nourishing channel with the field of the apple? Thank you very much. K- Not really, just touch the apple and understand the emotion of it, plus what you understood today. And there is no religious way to shake it and do it, because Mr. Keshe said. You do it the way it pleases you. You feel, you give life, (rather) then take life and give life which is needed, not because you think you can force it, because you can. Takes a lot of skill, takes a lot of

understanding. And as we've seen many of the Knowledge Seekers, for example, ?? will come with us into the sessions and they say, "Oh, nothing happens, I don't feel nothing." Because your bandwidth, or field strength in that level is fulfilled, is complete. You don't need it because you don't feel it, or you have within you already reached that point. And this is the interesting part of the whole life, the whole understanding. And in so many ways, we need to understand the process of Creation. But, if you go back to the teachings, I always said, "Why the Man is intelligent, why other animals who carry part of the behavior of the Man reach understanding and intelligence?" Everything has to be together. If you look at the structure of the human being, and compare yourself with the other animals,

(1:52) and then you understand why so many things in so many animal kingdom is the same, or different for human being. It's very simple. You consider the Man, and this is the Earth. This is the brain structure of the Man. You live in different dimensions (changing positions with), this brain. It has the possibility of, in a way, moving in both directions. Man has the capability of going this way and that way (horizontal and vertical), the same. But Man has another ability, which this ability allows him to consume variety of things. From a tree, from a shrub, from the oceans of the planet, from underneath of the ground, and collective processes from the surface of the ground.

(1:54) Man has another dimension in it, which continuously changes the dimension of the fields through blood flow in his body. Another dimension is that it creates an energy through his nervous system to control the flow and the motion reaction. This diversity of the motion, being able to do in a rapid way, dimension of motion in all directions, direction of motion in being able to have the circulation, being able to consume from the plants, trees, fish, animals of this planet, has given Man to create a diversity and continuous conversion, which this has led to his intelligence. Because he had to control how to get to the apple, had to control, unless how to catch a fish, how to handle, plus the environmental conditions. A dog moves in one direction, so the only thing moves is (his) head, and is limited in consumption of what can eat.

(1:56) So are the animals. We see intelligence in the animals, according to the structure of the position of their brain, in how it can move, and how it can communicate with the sources of its life, which is created, which sits in the bottom of the furthest point, reproduction. Intelligence of the Man has come through this point. Intelligence of the Space knowledge, what we explained to you, comes from the diversity of the fields. (If I can get it right). It comes from the diversity of the fields in your hands, and what you put inside, and what you put inside. This part before, is the physical interaction. The way through with Gans's, and the way we explained last time, is

just through the energies which you have established within, which this collectively connects to the whole of Universal energy. With it, you can do many ways of doing this. Many, many ways, that you can bring the condition of fields. You use Gans waters in different dimensions of the body of the Man, which brings that position in.

(1:58) You don't need physicality, diversity to bring. Man has created dimension of knowledge, which is, doesn't belong as such other animals don't use. We have brought the knowledge of sight, use of fields of the sight, which allows us to read, to understand, to communicate through different ways, that this on its own, has brought a lot of advantages for human growth in intelligence. All this has led to this. Now, we need to understand the work of the fields. You touch an apple, you connect to another Soul in the Universe, that brings the whole dimension too. Next time you have a dream, seeing somebody, God knows, let's say, another aliens, another Man, which is not something you know, don't look at him. Ask him, "I want to understand the knowledge of your Soul." And see how you wake up educated with the knowledge you never had before. This is what you will do, when you go (transmute) to China, when you learn this. You get in touch with Soul of the Chinese, and through touching, interacting, you learn the knowledge, you speak the language. There won't be any more Chinese languages schools to go to. This is where you were teaching the physicality, now you learn

through the Soul. This is how you communicate in Universe, through the central energy field forces. (2:00) The example of apple, is just for you to start with. And I said, "It's you who makes your own prison." How to touch the apple, where to put it, what does it do? Understand the technology, understand the principle, then you don't make prison cell for yourself, and restrictions. Then nobody can become the one who teaches you how, what, limit you, can abuse yourself, or use yourself, that then they take from you what is yours. Become aware of the knowledge, understand the knowledge, and don't put yourself in a prison of knowledge. And that's where the game changes. Any other question? Q: ... Mr. Keshe, thank you for all your knowledge and love. You asked us if any of us have tried to go through the pain of transmutation. Do our deepest emotions, like a plasma, become a strength field, as food for transmutation, through detachment? K- Depends what you define as detachment. There is a very old joke, if you ever heard of it.

(2:02) A mullah goes on a minaret, and tells his flock, "You're too physical, you touch everything else. The more you give, the more you receive, and give to the poor, because they need, and everything else." He goes home, and he says to the wife, "Can you bring me the leg of the lamb, which such a shopkeeper brought us, as a whatever, that we can have for lunch?" She said, "Oh!" In the sermon he said, "Give your food to all things, to the other people, that wants

the principle." "So I went and I gave the leg of the lamb to the neighbor next door." They had no food. He said, "Woman, I told them to give to us, I didn't for us, I didn't tell them for us, or I didn't tell you for us, to give to the others." Understanding has to be, that just because you call it detachment, does not stand and apply only to the limitation of what you decide, and where it ends. Doesn't come with giving all your wealth and needs, all life to the others. You can work with detachment, in a way of giving knowledge to others, through your Soul. It's bigger detachment than physically you're giving your wealth. That detachment is the most dangerous, the most powerful detachment. (2:04) That no wealth, physical wealth in the Universe can replace it. That is the true detachment. We detach that what I have is a gift, and a gift is given, is a gift to be given. Then you'll understand the true essence of detachment, and then you can have access to all levels of the Universe, physical and non-physical. It takes time to understand what I said. But if you understand it, then you understand the true detachment. This is why I disperse knowledge freely. I have no fear of who's going to copy, who's not going to do, whatever. But I put restrictions in who can do it, because the way they do it, it allows the others to be benefited, to be, become detached in the future, by having what they have. The true detachment comes, and is the essence of knowledge, and not the physical life. Physical life you detach, you give your money there, your cause there, whatever. Somewhere it

comes, maybe more or less. But the biggest, hardest thing for many people, is to ?? detach with the knowledge, and that's why you have created patents, and labels, and restrictions, and the rest of it. This is why we use the patent system, to release the knowledge.

(2:06) This is why we teach so openly, directly, every week, and everywhere else. When you can do that, don't think, "Oh, this knowledge can make me millions, I am going to keep it to myself, and the rest of it." And then you are in true, the truly detached. And I do this all the time, we teach freely, but it comes back to us in a bigger way, which allows us to share more, for more to have access to that detachment. What I showed you on the (Iranian New Year) table a few minutes ago, instead of what we put as a gold coin, this is the currency of the Universe, in how the gold is a symbol of the body of the man, has no value anywhere else. And that's the energy which carries you to expand, carries you to. And the others are the sources of the energies of the rest of the Universal Community, which you give to take, for them to take unconditionally. We have changed the game. Because now we play with the Universe, not in the village of Man on Earth. And if you understand that, the biggest detachment for Man, would be the knowledge. Would be the love of the knowledge. And what that knowledge, what love creates in another Man, that's the greatest detachment. And if you get to that point, then you'll understand, you become true Passengers

of Universe, because then you give the knowledge of the Earth to the others, and you learn, in that process, you might gain knowledge from theirs.

(2:08) Detachment doesn't come with, "I give my food away." Detachment comes that I give the knowledge ?? it is the Creators away freely. And it's not mine, I'm just the intermediary. When you, if you can reach to that point, at any point, then you're truly detached. I was talking to one of the key members, who will be part of the structure of the new Keshe Foundation structure yesterday. He's a close friend, very close friend. And I said to him, "When you meet the President, tell the President this way." And he said, "In a way, Mr. Keshe, how can the President refuse what you put him on the table?" I said, "He's still physically attached." "Give him a bonus, give him a thing, that he will receive the power, which he wants, through understanding this, but through the knowledge." He said, "I'll put something together for the President." We have to understand, we give the knowledge to the President, and the greed of the knowledge, it allows, it'll disperse the technology and knowledge across his nation. But he doesn't understand, that he's just a tool used for dispersing, because he's still attached to what he gets physically for it. Try to understand the total process, and what really means to be detached.

(2:10) Doesn't come by giving you shirts and your food. It comes in how you detach your emotions, to give to the others to elevate. Any other question? Q:

... Thank you Mr. Keshe, my question is, can our thoughts act the same as these magnets, and therefore influence peace in the world? A bit like a spider web, as one section is touched, it affects the whole." K- Yes, that's all the purpose of these teachings. You become aware of your own strength, and how your strength, your thoughts, can bring the change. Q: ... Hello Mr. Keshe, you said our Soul has guided us to be here, you also teach on the Soul level. I still don't understand much about the technology. Will my Soul show me the reason to be here, and the understanding of the technology? Thanks. K- I presume yes, but you have to become aware of your own existence. Then yes. You see, the Soul is very clever.

(2:12) Because it's been with you all the time, you never knew it was there. It's like, you know, these autistic children, they think they don't see anything, and their things are... Actually, they are the cleverest of all, because people think, or people who are dumb, or whatever, people think, "Oh, they don't understand, because they can't do anything, or whatever." But they actually observe everything, and they understand everything, because they already analyzed it, but they can't talk about it. You're in that position. To be... Your Soul has been observer, of not only who you talk to, who got in touch with you through the Soul, that you didn't even understand the physicality connection, of that connection. And it's a memory bank of everything. So, it can teach you, and it's been aware of it, aware

of everything, not when you just saw the physicality of the girl, it sees what that girl thinks, what thoughts, what is done wrong, what is done good. So, when you rely on your Soul, it has a memory bank of both physicality and the energy field, what we call, the Soul of the Universe. It can teach you a lot, but you have to learn, where to look for that knowledge of the Soul. And, in so many way, it goes back to detachment of the physicality. And then you understand more, how you learn through your Soul, and teach your physicality, than trying to learn it in physicality, and trying to teach the Soul, which doesn't work most of the time.

(2:14) Your Soul can teach you Chinese in one go. Your physicality needs a school to go and just learn the words, but don't understand what you're talking about in reality. This is... it's a... The difference between the Soul and physicality, is the physicality is just a word. Soul is the essence of it. I give you an example, very funny one, I always laugh at it, when I remember it, and the person knows who I'm talking about. A person who speaks English, fluent English, and pretend to understand everything. Years ago, standing in front of her, somebody used the word of 'bastard'. And, because she didn't understand the essence of the language, we knew the bastard is somebody, nobody knows who the father is. She got angry, this is... "I know who the father is, he's not a bastard and the rest of it." And, the rest of the people in the room start laughing. "Madame, you're talking

about the word in dictionary, this is the word in essence of saying that he's ruthless. He doesn't understand, it does what is good for him." When you learn the language through physicality, you're the lady. When you understand the language through the Soul, you understand the essence.

(2:16) And, which one is easier for you, or which one is better for you to learn? Go to the language school, never to speak. Go through the Soul, understand it, and it goes back to what I said. You speak, you understand the essence of the language, because you learn it through the Souls, not through the school, language schools. And it's the same for the Man. Man has to understand the essence of the Creation from the Creator, not the physical manifestation of the Man, stars, or the rest of it. Two different point of maturity, and use of the same. Any other question? Q: Thank you. Good morning Mr. Keshe. K- Good morning, how are you? How is the farming in the land of Australia? Q: Oh, very hard work. I picked 400 kilos of tomatoes yesterday, and it's hard work. I've been thinking about, you know, talking about detachment, and maybe another way of looking at it is being, probably in some ways, being honest, you know, and being sincere. So, when we're, you know, I'm saying being honest is, you know, we think one thing and say something else and do something completely different.

(2:18) And so, we need to be honest, we used to say something, what we say, we do it. And, being sincere of course is, be who you are, not, you don't have to

follow anybody else. And, with these two things, honesty and sincerity, that would help detachment, yes? K- Yeah, it depends who you're honest with, with yourself or for the others. Q: Well, if you're honest with yourself, then you would be honest with everybody else, you know. K- No, not necessarily, it doesn't happen that way usually, it's good you think that way. But... Yeah, a lot of people, a lot of people, we call it, they're honest, but they have a second agenda for their honesty. So, yes, in a way, when you're honest, it means you don't, when you're honest, you don't need to think, it takes less energies. It takes a lot less energies. And, we do not understand the process of it. We're honest with ourselves, we do something ourselves, and we think, you know, why do others behave that way? But, we don't understand, what's the reason they behave that way towards us. Till we go into it, and then we see, "Oh, I was in wrong, I thought I was honest, I thought I was correct, but actually, me not knowing being wrong, I caused the problem for them, that it wasn't necessary, I thought I was honest, I thought I was correct." You understand? In a way, it happened to me something very strange yesterday.

(2:20) I pulled out behind, in a parking space, behind, in a given position, which had no sign, nothing, and a van, and not white van, normal van, pulled behind me, and banged and beeped, and everything else, and I thought, "I'm correct, I stand, I park wherever it is." Anyway, the guy got annoyed, ran across the other

side of the street, parked the car, and two guys got out of it. And I thought, "Oh, I better move to the other side, maybe I'm parking on the wrong side." So I moved behind them and I parked, they got out, got a bag, and a box, and they went out, and they went in the same building, in the same shop as I was going. And then, I thought, "You people, you know, what was all this banging and everything else?" When I got into the shop, I realized why they were banging, and how wrong I was. When I parked, it was this white van, the white van is a normal van, no track, no trace, but it was carrying millions of dollars in it, pounds in it. And these guys were wearing normal clothing, usually you see armed officers and things changing back. These guys opened the back of the car, because I just saw back of the van, because I parked around them, there were tens of boxes, all in order. You could see in this back of this van, I've never seen this before. They were carrying, because when I went to the bank, I was there, and when I went to this building, I noticed them there. There were ATM machine officers, bringing tens of thousands of Euros into this shop, a normal shop. And this box they were carrying, was all the notes which was going into this machine. And to my surprise, I stood and I watched them, they opened the system, it was intriguing to see how these things are anyway.

(2:22) And they systematically emptied the old notes and pushed fresh notes, which was what they had to put in this machine. And there were tens of thousands

were carrying this, like to a normal ordinary car, a normal white car. And I stood and they, you know, if it was somebody else, they thought I'm trying to rob them or whatever. I stopped till they finished, they locked the machine, and I said to them, "I apologize, I didn't know." The guy says, "No problem, no problem." I thought I was correct, but in fact, I'm putting them in that position. If somebody knows who they are, they can be robbed and their lives put them in danger, unknowingly, thinking I'm correct. You understand? This is what it is. We think we are, we think we do the right thing, it seems it's our right, but in our rights we think we put other people in danger. And, standing and apologizing after they finish, I didn't go through them, they think I want to rob them, whatever, I stood in the background about five minutes, then they put all the notes in, and they restarted the machine. And when they were going, when they finished, they saw me there, standing two meters away from them, not further. When I told them I apologize, I didn't know that I took your spot. I said, "It's no problem." When we think right, and I was thinking, "My right, I mean right, I am correct." We parked in the right place, not knowing it, it brought me back how we always think we are right, but we are wrong. And this is how, what our position is. Q: The honesty I talk about, Mr. Keshe, is from the Soul.

(2:24) And, my view of that is that if it's coming from that place, then it has to be correct. Yeah? K- In a way, yes. In a way, Souls cannot do wrong, because

when they make a move, everything is, everybody else moves to accomplish and accommodate, that they stay correct. We saw it with the magnet. If the magnet goes too fast, the others, they all accommodate. It's a different life, living in the dimension of the Soul. Energy fields of Creation, than the matter state of Creation. Q: There's another thing that was bothering me today, Mr. Keshe. When it comes to Iran, it seems like the United States and Israel are determined to attack Iran. What's your thoughts? You think that will not happen? K- That's on the cards, 100%, it's on the card. You got to realize, there's a very big structure that a lot of people don't understand about Israel. None of the Israeli Prime Ministers, none of the Israeli leaders, none of the Israeli Chief Ministers, carry a Jewish name. It's all made up name. 99% of the Jewish leaders, Prime Ministers, Presidents,

(2:26) are all Eastern Bloc names, surnames. They have changed it into sound like Mediterranean Arabic name. Netanyahu's name is Czech, I think it's Polish, something Kowalski, or whatever. None of them are Jewish. None of them, Sharon and the rest of it, they all have Eastern Bloc. They're East Europeans who came to Israel, and they fiddled with their names. And they still have that connection through the Jewish community in Poland and the rest of the Eastern Bloc came. It's a very strange thing. I was a few, couple of years ago, in an airport in one of the Old East Bloc, or we call it European countries. And I was shocked

when I arrived in the airport. I was with my bodyguards and well protected. That how many, the airport was full of Jewish Orthodox, you know, with all the tassels, with all the hats and everything. Some barefoot, village people, no education, going with a flight to Israel. I asked the question, "Where are these from?" He said, "These are all from here." Q: I've been to Israel, in ?? K- I know, I've got family there. Q: They're not very polite. I found the Palestinians .. the most friendly people. K- Yeah, but what is interesting is that these people who we see in the realm of Jewish,

(2:28) they're all connected to the structure of the, what we call, money, in the background of the Illuminati's and the rest of it. They're just servants. And the last, last, one of the last two banks left to rob, one is Iran Central Bank and then the North Korea. And the structure is set. None of these are Jewish with the... And the Jewish who went to Israel, they went for money, they never went for religion. It's all fake. If you listen to the teaching of a few minutes ago, and what I showed you on the table of the New Year, we'll produce so much Gold that the Gold will have no value. But many Knowledge Seekers tried to make Gold and it didn't work. They say this. It's because we haven't taught you the full session, the full understanding of how to create. There's a secret in it. And we'll devalue this possession of power. The whole structure is, these people have enough power on this planet. They have baffled Trump with money

that we get the Gold, serves them with it. I don't know if you've seen what's been released in past few hours, that how much each of the Democrats took money from Ukraine,

(2:30) deal from the Ukrainians. It's just been released. I don't know if you've seen it, it's amazing. For creating more. Biden has taken 92 million from Ukrainians side, not from the American side. Nancy Pelosi has taken 86 million kickback from the Ukrainians. Romney has taken 71 million, according to what has come out. They all have taken money, they're all taking money, kickbacks to push these things through. And now Biden has taken 92 million kickback from the Ukrainian president, himself directly. From what has been sold out, what has been given out. And then you have the German president, what you call, Chancellor who's taken money, you got the others who've taken. Americans have taken nearly, nearly one trillion kickback out of the 130 from the Ukrainian side only. Now it's official, it's not something hidden. Romney has taken 71 million. This is the tip of the iceberg, the rest of it is more behind. You have to understand, yeah, there is a lot of kickback, yeah. There's a lot of kickback... Carry on. Q: If Gold has no value in the coming time, how would we do commerce?

(2:32) Would we have like a barter system? K- We will introduce a system of process. Already have introduced as part of the Keshe Coin Technology. The Keshe Coin Technology in the next few months, will

take in new dimension, plus Cosmic Ray materials, plus our stock holding in Markray, plus our other side which is getting developed, it'll be there. That with this, we'll change the position of interaction on this planet. When I set up the Coin, many of you Knowledge Seekers (KS), the Coins are donation. You give us a donation, you buy a Coin, and many, many of you have sent a message back, "Can I buy from my Coins, this and that, this product, that service and the others you've done?" Since when, in which part of the world, in which organization, with what you donate, you buy? Never been done before. Many of you Knowledge Seekers have bought, you donated, you bought the coins on donation, if you read it says a donation, and then you use it to purchase. To the same value, no devaluation. Then, we set up the structure of the, if you notice very cleverly, if you've never noticed it, (2:34) these, what you call, Cosmic Ray materials which you took, you are purchasing, many of you purchasing, is valued as a thousand Euro too. So, without you knowing, very subtle way, in a very subtle way, we have set up the process that when it comes in your thousand Euro, for a donation, your thousand Euro for this material, your thousand Euro for what is to come, in the structure we introduce, all are linked to each other. Doesn't matter where you trade, as long as you trade internally through the Keshe Foundation, as a Knowledge Seeker, with the companies we set up, with the companies we trade, with the companies we have, they accept your money, then the exchange,

the influence of the financial world will be taken off. This little ?? what is on this table will become the biggest pain in the world of the banking system. And every single piece of it is registered. We built around the Keshe Foundation a structure which become the new Universal Commerce System,

(2:36) not a banking system, which allows everyone to go through, to trade through, using their own interaction of the fields of the energies. You will understand this in the coming time. We introduced the Coins years ago, many of you have bought many Coins, and then you come back, says, "Can I exchange it with this?" Some of you ask, "Can I do this with a Coin, can I do that?" We say, "Yes, no problem." But look, you're donating. The same with this material. We give you a field, through these materials you will understand how we're going to use it in the future to feed you, to give you everything you need. Then, you understand this greed of the Man, as a President and the rest, and what they do. You try to get to Central Bank of Iran. Iran gets touched, I release so much gold that the banking system will collapse within hours. There's a message directly to Jerusalem and to the White House. You touch Iran, I release the technology (T) that it will destroy the world economy in one go. Uproot it. Very simple. We do things in a step not to create disturbances everything to be. They go for what they go. We go for technology. We don't fight, we just release technologies after technologies.

(2:38) I was supposed to release this two weeks ago, the new technology. Situation happened, we're developing things to go in the background that everything is correct. But, let them touch Iran, I'll touch the Soul of the children. They'll need more mental institutes than they have banks. You watch this space. You got to understand, the same way as they fake their names from East Europeans to Jewish names, supposed to be, they have faked the control of power. We don't run by fear, we run by technology. But you have to understand, the problem is not one sided, the problem is two sided. The Iranian leadership all the Ayatollahs are Lebanese, they're not Iranians. They are poking. That's the problem, they are paid by the Israelis to poke. Anybody with name of Ayatollah in Iran is Lebanese. The word doesn't exist in Farsi language. It came by the Lebanese who were brought to Iran years ago. And they were married to each other's daughter to keep the bloodline, exactly like Jewish. In Islamic world the name and everything goes to the Prophet Muhammad, through the man.

(2:40) They're the only Islamic structure which goes through a woman, exactly the way they came from, from Palestine and Jewish background. They are themselves inviting them into attack that we take all together. You have to understand the culture of the history of the land. If you're Ayatollah, you never marry your daughter to nobody else except another Ayatollah which is Lebanese itself. Look at the history of the Iranian Ayatollahs and their daughters. You've

got your answer. Because bloodline goes through the daughters, the mother gives blood, which is a Jewish religion. Q: The Ayatollahs won't be happy with you. K- The Lebanese's never been happy with me. You don't know the battles we have with him. But he knows we are end to his structure. We are end to structure of the religion, doesn't matter who. We work closely with Ayatollahs, we have no problem, we are openly work, same as we work with Vatican, same as we work with the, what you call, the Jewish community. I have no problem with him. You remember on the 13th of February 2013 I left overnight from Italy, from Belgium to Italy. Months before I met the pedophile king of Belgium. He told me, "Leave my nation, or we do whatever we do." And I said to them, very simple, "I go, you go."

(2:42) I left in February, and a few months later he abdicated. They touch me they're finished, by science and technology. Nothing else. We'll release so much technology people become aware of the truth. There is no need to do anything else, they have to fight, not us. The same goes. It's the way they are. It's the way they are. You got to understand, if you, if you, at the moment, there is a lot of knowledge on the Internet. You can monitor every flight for past, God knows, months, who flew where, whatever. The last time there was supposed to be attacks by Israelis on Iran, all the private jets, everything which was available in Middle East, flew from Tehran to Dubai and other parts of the world that none of their families flew. Did

they remove any of the Iranians out? No. Just themselves and their families and their money. So, how can you protect a nation when you are not part of that nation? It's very simple. We have nothing to do with Lebanon, we have nothing to do with Middle East, we have nothing to do with Palestinians. But you do when your cousin, your uncle and your family are half Lebanese, or all Lebanese. Look at the president of Iran who got killed, or died, a few months ago. Who his wife was, who his father-in-law is. Ayatollah of Mashhad, and he's called Ayatollah, and see who's wife connected to where, to which Ayatollahs.

(2:44) He was a son-in-law of Ayatollah of Mashhad. They kill each other like flies, but marry each other because they have to. They are not connected, they are not connected by incest, they are connected by ?? intent. Q: I don't understand it, I don't understand why they are so concerned about Iran. They're no threat, to... K- They are not a threat, the thing is there are a few points you have to understand with the politics of Middle East. They put their own people to empty the nation in a different way. Iran has one of the largest gold reserves, collected over two and a half, three thousand years. And to them they have to take, because with it comes the next steps of who is the boss and how we run. And it's all planned in Britain, by the British Monarchy it's part of what they've been after for decades, centuries. And we'll bring an end to this cycle. It needs to be done through scientific structure, Universal structure, not the man's way. And

everything is there. As I said many time before, they left the Keshe Foundation too long, too free, to do what it likes, to expand, to bring, to get, to reach, to bring the change.

(2:46) In a way, they have no way to stop it, because it's the Knowledge of the Creation, not the knowledge of man. So, let's see, they're going to do the attacks, we know that, because they're already prearranged and they organized it, and they all know, and they have to pretend. I was a young boy, maybe nine, ten. I can dig out and bring out the date for you. I was sitting on the head of a lion, it was a head of a lion with the skin of it, it was in the living room. My grandfather and my uncle were sitting, and I was a young boy. I said to my grandfather, "I don't understand, why have the family lost such a prestigious office?" Because it was in the news. My uncle turned around to me and said, "Mehran Jan, you're too little. We didn't lose it, the military didn't come to take it. We already got paid, all the arrangement was made, this was just a show for public." I said, "But it was very important, this was the sign of the family." We were known prestigiously for this structure. He said, "Don't worry, we got paid for it, and they already borrowed the money from us what they paid us for." What you see in the front, is not what sits, what happens in the background. These people, they are Lebanese, they've already been set up, they know how the everything the others come through. But they have to be through a war that they

get it, because then they can put pressure on the Russian and the rest of it,

(2:48) and the Chinese. They kept them for a time, when it's needed, and the time is now. But if they do you're dealing with the pure blooded of the Iranian. We'll show our way. And, that way we'll bring peace for the rest of humanity, not just for Iran. We are observers, but we understand what to observe. You have to understand this, when it's not your home you loot it. And it's not their home, they're there to loot. Next question. K- ... Something, something before you go forward, I want to show you something. You see this table? This is the table which sets the future. The power on this table is amazing. This coin, this ball, which is Cosmic Ray, sits on a Coaster which is made, infused with Gans's. This is the egg, and you see the Coaster is infused with Gans's. Even the structure of that egg is influenced by the next science and next generation.

(2:50) You see, this Coaster, these fishes, again, these are all made with combination of the peace, and energy for peace. The same with the butterfly (blue coaster butterfly). We know what we interact with, you can see the coasters. This setting is extremely powerful, and it's set in the eye of the Man, at the table of New Year. In understanding of the technology and the science we carry we are here to bring the change. You can see everything sits on a Coaster. Apple sits on the Coaster of heart. I'm not superstitious, I know exactly what the technology can

do. And everything is in balance. Just watch, you Knowledge Seekers. Watch the position of this, with the position of this, and with the position of this. A true Star Formation (SF) and within it sits the light. You play, we know how to play. It's the first time ever, a table has been set like this to bring the change.

(2:52) You look at it like a table, I know the value of the table. The table is the light of the Universe. Very simple, the candles are lit. The time of the light to shine has come. We are scientists, and we know what the science of Creation and the world can do. If you look, the left side, all plates are black. The right side, all plates are white. Something very simple, you don't see anything (no coaster) under the fish. We don't touch what is not ours. Now maybe you get an insight into why and how we set things up. If you look, the eggs are set on a honeycomb. How you influence the composition.

(2:54) Everything has a purpose, everything is set. Even the beginning of the new year to bring the new forces, to bring the change. This is my table, this is my house, and my temple. Now you understand. Next question. Q: ... You mentioned bringing the light Mr. Keshe, and that's a good segue to the question that Gail had yesterday in the Keshe Plasma Reactor Group that we were addressing. Which basically had to do with what was the first fundamental particle, and did the light come first? Since, if God is light, did the light come first or did the particle come first? And it ties into what was the beginning of the Universe you

could say. But then we were looking at trying to relate that to the biblical definitions, or biblical teachings as well. And it's on the fourth day that the "let there be light" function seems to happen. So what happens on day one, two and three? The big question comes up, what was God doing when the lights were out?

(2:56) In kind of a kidding way, but it's serious. K- As I said before, he was busy with Mitra. R: I think that's the best answer. K- He's making the new world to be seen. The whole understanding of man is the light. These are all, what you call it, symbolic, what you call it, the first day, the third day and the rest of it and the light. One thing which goes back to all the old scripts (scriptures) and it has to be understood, and a lot of things repeat of the same. Is the light has two meanings in the culture of language. One is the one which brings you to be able to see, and one is enlightenment. Which one came the third day? It took 3 days for that field of the Creator to come to an environment that could be detected, could be observed, and it became visible. The light means being able to see to understand. Or is it in the enlightenment that the man took 3 days to understand the beauty of what fields of Creation is? The two different kinds of it. And why did it need 3 days? Which means the man has still need to understand from the time when he sees the light till where the source of the light is.

(2:58) Even in enlightenment you need that. This goes back to the very first paper which we published,

Creation of Black Hole. To you is black, but it's the source of life where you see the light. And in that blackness, that in dark space, still feels coming through to reduce strength to be able for you to see it to become enlightened. Even the enlightenment for you to become enlightened, even put 3 days on it, how much knowledge is in the background that it has to be, what we call, 'watered down,' that it becomes intelligence for you to understand to be enlightened. The light you see is what I explained today in the teaching. The light you see is that matter state that you see with your eyes. If you go on the energy side of it, is what reaches to your Soul and it adds to it and increases his knowledge and understanding and enlightenment. One is the light of the sight, one is the light of the Knowledge of the Creation. Both brings enlightenment. Depends which one you're looking for.

R: Well, Mr. Keshe, that was pretty much the question that we brought in to AI, because AI kept misleading us in a way. We misled ourselves into the external world, the light. Where did the light come from in this external environment or outside Universe and so on.

(3:00) But then we said, well, we asked AI, the ?? grok, what about the inner light? And what about, isn't it really an inside job? And this turned the whole tables, you could say. And the AI, being what it is, quickly incorporated that and played that back to us and started expounding exactly what you were saying, basically, how there's an inner light and illumination of, is another word that's used, or enlightened. K- You

see, it's a very, very simple. I explained this to, in one of the talks some time ago years ago. The energy of the Sun leaves the Sun, we see it as a light on it. And then it goes in the darkness of Space. And it takes some seconds, 8 seconds or whatever, whatever it is, so many seconds. R: 8 minutes to reach the Earth? K-.. it takes I think 8 seconds to reach the first satellite, or the moon's of one of them. And it takes 8 minutes to get to the Man, or what we call, to the Earth. But in that process, from his light we see on the Sun, we don't follow that light all the way to us. If you notice the light of the Sun is different than the light of the day. The light of the Sun is what comes to us direct. The light of the Earth environment comes from the interaction of that field with the field of the Earth, which creates daylight.

(3:02) This is the same. In the darkness we don't see, if you go outside the Earth it's dark. How come we fly all day in the Sun and we see dark Space? If you're in the Space above you it's dark. So it has to be all lit. And this is the same kind of process. The field needs to touch the environment, that it converts to that energy of environment, that it becomes observable. It touches the surface of the Earth, it becomes the light we see as a Sun. It comes to the Soul, it enlightens the Soul. And then we see one ?? physical eye that it exists of itself. Our Soul sees the light of the Creator. Our eye sees the light of the Sun. The daylight is the interaction of it. The daylight which comes from the Creator to the Man is the enlightenment the Man sees

to be enlightened, to receive the enlightenment, to see the rest of the Knowledge of the Creation. It's exactly the same. That 3 days is that 8 minutes. Because Man considered there is always need for time. But in fact the enlightenment, the light of the Soul of the Sun to the STM is instantaneous. Whatever it creates it emits. Man is aware of, gets his information of. It's the way you move the magnets. When you move magnets all moved. Not just one moved and one you decided to move.

(3:04) It's how we decide to understand. We decide to understand the process of Creation through the light and knowledge of the Soul or we decide to understand the process of Creation through what you call, the humanity. And how it be and how it is and how things can be, and how we process it. It is part of the structure of what is to come and what is to be. And enlightenment has to come when the Man is ready to receive the light. It's just you... It's like when you... We have a Knowledge Seeker who deliberately goes through sessions of locking itself into dark room for weeks at a time and looking for enlightenment. And it's like the same Man has locked himself in a room with his intelligence with the knowledge of Universe in a dark room. And even though there is a light outside, it's you who locked yourself in a dark room, not the rest of the world. And this is where the problem comes and this is where a lot of us have a problem. We have locked that vastness of knowledge to enjoy the dimension of the light of the physical life of this planet.

(3:06) That's what we need to change. That's what we need to understand more than because once we understand it, the change comes with it. And that's one of the biggest points of how we see the light. What we consider the... it's always light. The knowledge is there, everything is there. We have locked our Soul in the darkness doldrums of Space. Because we enjoy too much physicality of a kiss, a touch, a fruit, an apple, an air. We have betrayed our Creator. But that's for every Man to understand. Independent investigation of the truth about your Creator is a job of every person. Some achieve it on this planet, some achieve it in the course of the growth and the evolution in the Universe. Any other question? I just received a note from our team in the background that they just put out new products on the Keshe Foundation website. R: Yes, I think I've got a notice about that, let me get that up here. K- It's amazing how your Souls are. I just received a graph of today.

(3:08) Very interesting. R: Shall we have a look at the store first and... K- Yeah, yeah, yeah ?? R: Okay. Just let me share. So this is the Keshe Gans Handmade Resin Soap Holder. K- These are built to bring a lot of energy. Those of you who bought the Soaps in conjunction with this, you feel the change of energy every time. It's deliberately made this way to bring the change, that difference, and in a way you charge it up, it's like putting it on a charger. And this is part of the structure now we are developing as part of the

process which will be done with new materials in a later date. This is a part of the same as before, series of, as I said, we're going deep into structure of changing you from the day you start, from when you start your day. And it'll be increased to many other products gradually, and it'll be interacted and brought into it.

(3:10) In a way when you put your Gans Soaps on this you just charge up with a new. And it's very interesting the way they have been built for. At the same time it develops a lot of processing for disinfecting as part of the structure of it. Any other question? R: It's a lovely, effective design, like it's... I could see it hanging over the edge of a sink, so that your soap drains properly and doesn't get all over the place. I haven't seen such an efficient design before actually. K- Yeah, a lot of time is spent to do this, but it is something set to do. There'll be more products coming from this range, and variety will come. It's start using, because this is way... all day you touch your hand, you wash your hand, you even wash your hand during the day, you receive new energy. It creates that dimension it was with the apple. Now it's in you, it sits on you. I don't know if you know much about the British way of bathing. British never showered, they always had a bath. And the tradition with the British is totally opposite to the rest of the world. In the world when we have a bath, we come out, we wash, if we wash with the soap, we wash the soap off our body, we shower it off. When I saw it the first time, when I understood the first time, when I

came to England, it was revolting and I couldn't believe it, but that's the culture is.

(3:12) A true British, blue-blooded British, when he takes a bath, they fill up the bath, it comes from the addition, there wasn't that much water, that much heating, and it comes from there wasn't that much wealth to buy soap. So, they fill up the bath, they put the soap in it, bathed soap, and they sit in it, and... oh, they wash their hair with it, if you want, in the bath, and they get up, they never shower (wash off the soap residue), they just dry themselves with a towel. A true British never takes a shower after a bath, sitting in the soap water. And they had reasons for it, because in olden days, there's an old British who says, "Don't throw the bath water with the baby, with the bath water." R: Don't throw the baby out with the bath water. K- Yeah. Because, had a reason. Whenever the Queen of England had a wash once a year, had a bath, the whole nation, it was announcement, you know, the Queen had a bath once a year, even you go to Russian monarchy, was the same, it wasn't something new. But, they were so dirty, that was it, it was a big thing to have a bath. But, if you go to places like Manchester, north of England, and mining areas of England. When the miner came home, when the workers came from the mills, they were so dirty, because those days was all sorts of pollutions and everything, the wife always filled up a iron bath, a tub, they call it, it's a big pot, put water in it, and the man came in and they washed, but there was too much to

warm, you know, heat up more water to wash. So, when he came out they just cleaned him.

(3:14) Now, the wife had a wash, the children had a wash, and the last one, the youngest was the last one, but that time the water was so dirty, you couldn't see there's a baby in it. And that's where the expression came in, "Don't throw the baby out with the bath," because you didn't know, it's so dirty. But a miner washed every day, and it was nothing, but if a Queen washed once a year, had a bath, was very important thing. And now, we have the soap, which all of us have it, and we do it freely, and it's become a normality, then the luxury when the Queen couldn't afford. And now, you're so advanced that it can even touch your emotions and changes things inside you. And this is part of the structure of what is to come. The soap, very soon. Next week or so, I think there is a telephone charger comes up, if I'm correct, I've seen it's getting designed to be put up, which carries in it the Butterflies, which literally changes a lot of things in the, in the Cosmic Ray dimension. That'll be marketed very soon. And there's other products which you'll see will come out. Q: ... The Cosmic Ray Balls will no doubt play a role in the change. Can the Balls be used like Gans for others to sit in between the field of them, as a balance field?

(3:16) K- If you want to, yes. If you want to you can do a lot of things with this. You will feel the change, you feel the motion between. Not one single Ball is the same as the other, no composition is the same.

Everything is different. Every composite, every single Ball is different. Don't forget, these Balls, as I said, are valued at a thousand Euro. Keshe Coin is valued at a thousand Euro. And very soon you'll understand other things which is coming out through Keshe Foundation are valued, because it brings an internal exchange. Some of you who have bought materials with your Coins, you know your material you bought is a few, maybe tens of Euros, or couple of hundred Euros. The rest has been kept to be deducted off. You never lost anything with it. And it's that process will come into operation. And these things have double side, the things we're going to introduce very soon will change the whole monetary structure of the present financial world. And you will understand very, very soon. If you look deep into it you see the shade of gold in the material. And there's a reason for it, because that's Man's connection to his life. He cannot, it's not a, if you open it, it just disappears.

(3:18) Even you break these you will see it melt into you. Never touch these, don't ever open them. Any other question? R: I think that pretty much wraps it up for today Mr. Keshe. Yeah, I think so. K- Yeah, what... I have to explain something which I said that Knowledge Seekers understand. When we speak about this new telephone stands which comes in it's not to charge your battery of your mobile phone. We'll put such a thing out. Is to change to charge the environment of it from a lot of other things, which you know what it does, and why we purposely brought that

in. It's very interesting the new set of products which are we coming into the structure of the Keshe Foundation. These are all artisans, they're made one by one, by hand. It's not something is mass produced. Something before I forget before you say you finish with everything. We are looking, as I said, we received a number of people who offered what they can, what they want to do. We are looking for people expert in Social Media, control and management. We are looking for those who understand of Space technology, and work with different Space organizations. We are looking for those who understand the structure of setting up of productions. (3:20) And we are looking for those who understand, in a way, in the structure of what we call, integration of new technology with delivery systems. Which means the Amazon system is too slow, and we are setting up structures that very soon, maybe in a year, or maybe around, hopefully, the people who work with us, will deliver structures, very much like a microwave you have at home. But delivers products into the system. We are looking for those who understand plasma transportation, transmutation from the present time of matter state. Specialist engineers, we're looking for that kind of people. We're looking for the chemical engineers who understand the process of the chemical production of materials. Where we can add the new technology to bring all the hazards of the new technology, what we call, the old materials out of the system. These are specialists we are looking for, in

the knowledge use and world of science. If you are one of them, we receive many people who tell us what this way can do. If we don't see you to fit into our present position, at the moment we're looking for, please be patient, when we come, when we have, we announce what we need, your expertise comes handy to us in the future. It doesn't mean that we ignored you, it doesn't, doesn't fit into what we're looking for. We're looking for those who are in the world of the stock market and stock exchange, and understand this process across continents.

(3:22) We're looking for pilots who know they do not need the mechanical system, but can become a step higher than the present commercial flights. We're looking for nuclear physicists in the field of plasma. We're looking for Defense specialists with connection to governments and military. Where the new Keshe Foundation Space Defense can be promoted and expanded. I know, there are people in Lockheed Martin, who are Knowledge Seekers, and I know people in Lockheed Martin, who listen to this program frequently and regularly. We're looking for you, if you join Keshe Foundation, for the process of development. Thank you very much for today. I hope we managed to share... R: Before we go Mr. Keshe, there's a couple of things. One is, I'd like to quickly share a picture of someone that's creative with Gans's. This is a work of Beata, and she's interested in coming under the umbrella of the Keshe Foundation. So perhaps, this is...

(3:24) K- info@keshe.foundation R: Exactly, this is sort of an example for people. K- We are looking for artisans, and we are asking if you are producing something, painters, whatever, get in touch with the info@keshefoundation, because there's a structure set up, to bring all those who work with the Keshe materials, Gans's or any other thing to work through this. It becomes what we call, Amazon type thing, you're responsible to. You cannot, you have to follow a strict rule situation set up, and you'll be given the international ground to work in and work with. If you sell one or two items a month or ten items, once we structure this up, we're looking at the fairly regular production and orders with it, and it doesn't go through the Keshe Foundation. It's another arm of the Keshe Foundation which is set up, we have interest, control over, that it'll go in a very big way, but with your products, get in touch with the keshe.foundation and be promoted with the agreement which is been made between you and the Keshe Foundation. We want to see more application of technology, what it actually does, not just because it's there. This is very important. If you do such a thing, there are a lot of Knowledge Seekers making one MaGrav here, two MaGrav there, selling Gans's and what I call, made in the back of the kitchen, but they cannot deliver, actually the product, it bring a lot of regularity into the system. In the, some of the nations we will support to build the structures to support internally the, what you call it, the infrastructure of the financing and the

commerce which applies to the Keshe technology. (3:26) We would like to know if you apply other technologies in conjunction with the Keshe Foundation work, which brings benefit. We're still there to support, we are not there to be just us, we, we all need to be. That's why we made it free for you to add your knowledge into our knowledge, to make it better for the others. So, if you are doing something in conjunction, which is positive, not just because you do it, we're interested to know and we are there to promote you, but it has to be done. A lot of things has to be correct for us to be able to do that thing. And, it's the, what I call, the harvesting time of the Keshe Foundation, every aspect has come. And we are setting up for it to be done. But, it's very, very prudent, because we've seen how the things happens around the Keshe Foundation in past years. We become very, very perfectionist, trying to do the best we can do till we get it right, and then it'll be out. And as I said, we have chosen the path which we've done before, and annoyed a lot of people that time, they couldn't understand our work. Now more and more people understand how we work. The development of technology on a national basis, and I explain this to the world leaders, of the people who we talk to. When we dissipate the knowledge in such a huge way to affect every aspects we are interested in how affects the nation, so we deal with the government. Not just we are bypassing Knowledge Seekers or going to governments. We, when we start in next two years

flooding new technologies in we want to know how we change that nation.

(3:28) So, we need to speak with the government, pre-set it, that we don't need patents. The national GDP affected by us, has to reflect in, in what we call, the transfer of the liberation, whatever you call it, to the Foundation, that we can, what we call, disperse it across to the others. We have a full structure what we're going to do. And, to follow the patents, "Oh, this country has copied that country." No, you all work from the same base, you all use the same technology, the reference is, we cover each other through the structure we set up. This is how the patent application, patent force will be literally demolished. When the knowledge is in the hand of everyone according to equal, everybody can use it, but all get benefit from it. This will stop the spying, the... all the things we've seen with the matter state patent and everything else which has delayed and held things back, buying the patent not to come, that a lot of people can benefit by it. So, you'll understand in maybe next 2-3 weeks, exactly what I'm talking about. We are working on it, and the structure is set. R: Mr. Keshe, is part of the structure that you're speaking of, will it apply to, let's say, the poor farmer in Africa, who wants to spread the Gans technology? K- Yeah. The technology should not be a poor farmer, it should be taught to the farmer how to feed itself and his children not to sleep hungry, the way we taught last week by touching the Gans and touching the food.

(3:30) If you understood what I released as a knowledge and technology in the past 2 weeks, 3 weeks, no child in the world should go hungry to bed. According to United nation 5% of the African children go to sleep hungry in the jungles. 15% of the American children go to sleep hungry every night. We want to help that 15%. And the other 5%, we show how. The wealth of a nation sits in how we look after our next generation. Not how we build buildings on top of each other that only the elite can go on higher that they can fall faster. And this is the whole structure. We'll release technology to the African, you know I've got a deep connections with Africa. We'll release the technology that in Africa the agriculture is better, the life is better, that there is more immunity from diseases which Man has introduced himself to it, than feeding them. Because they feed themselves. The poverty sits in Europe and in America, and in Western nations, where we cannot feed majority of our children at night. It doesn't sit in Africa. Very few children in Africa go to sleep hungry. Even that can be done. I have made a proposition to the Chinese military and to the Tesla Group, or what we call, the X, or what they call, their Space Program,

(3:32) that allow the Keshe Foundation to put on board every satellite launched systems that we can feed the world freely. And we will achieve it. If we don't achieve it we go through the unknown Apps and unknown radio television systems, because it's the same manner of frequency the way we transfer

energy through headphones to you lot we can transfer to anybody through speakers and music's played. We can embed the food in the knowledge of the songs you receive and you listen to every day. Technology is that advanced. So we have to wait and see. Any other thing to say, or shall we end there? R: Just this, what we see on the screen here, it comes from Lissy through the Universal Council, and it's a wish, basically, they have a different wish every day, and this is for the next weeks, and this is a Thursday wish. I'll just read it here. "We, the Universal Council, give through our Soul to elevate all Souls in existence. That science with the Soul is the true knowledge." And that's again from Lissy, and the members of the Universal Council are doing that. Now you did promise us one thing, Mr. Keshe, which was a graph, a picture of the graph. Are you going to... do you still have time for that today, or are we going to let that go?

(3:34) K- Let me see if I have any further updates. Yeah, today's graph is very much, it's on the level of the Soul as expected. And I show it to you in a very, very simple way. Let me go back. I have to go back on Zoom. You hear a bit of voices, don't worry about it. It's just the way the system is. No, what the... I don't understand what's happening. Oh, that's right. Ok. This is the structure of the Soul today in part of the teaching which is a direct connection, if you see it, directly to the Soul. And all of you are benefiting by it in all dimensions. This is what we are receiving, receiving during the process from the Universal

Energy. This is the, what we call, the Soul of the all of you, if you understand it. I go again. And this is the dimension of the Soul of ?? Energy which converts from the energy of the Universe in our process, conveys directly into what we call, the STP.

(3:36) And this is us, in a blue where we are as a whole what we receive. Very much concentrated. What I... if I can expand to something which you might understand in the future. It's beautiful if you understand this. This means the fields, the Cosmic Ray, the Soul of the Universe, is there to support humanity for the change. This is why it's so concentrated, it's directly. We have no connection as such as a humans. This is the level of the energy fields which we operate on Earth. And you see it, it's above us, it's above human race. And it shows how much the change is about to come. Thank you very much for today. A Happy New Year, Happy New Year to all the Iranians who believe in the path of Mitra and Zoroaster. And I hope this will bring the changes which was promised, and it'll be fulfilled. Thank you very much and see you next week.
