Part 1

(:08) K- Thank you very much. Good morning, good day to you as usual, wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We welcome you back and as Rick said, we had a fairly successful demonstration of technology in public, and we had a few hundred of Chinese Knowledge Seekers (KS) attending the session. And at the same time this presentation was part of the financial arm of the Keshe Foundation, Markray Corp., and not of the Keshe Foundation. We had a successful presentation and as many of you heard one of the largest contracts ever signed for licensing was signed on Saturday night in presence of all the Knowledge Seekers and with their permission. This agreement will lead to one of the largest corporations in China backed by finances of the people who are in there, plus Keshe Foundation providing the technology (T) and support of the knowledge. As you saw the production of the material was kept open for people to see and the conversion of the energy to matter.

(:10) If Keshe Foundation was in the position of the, anywhere like the University of ?? Sanya then we'd be a big revolution in science. As we are boycotted by Fox News and the rest of the world, because we disturb the, what we call, the 'money stack' of the whole process, is broadcasted and in the future it'll be as part of the teaching of the, I'm sure, many, many

knowledge's to come and Knowledge Seekers to find out. The setup was simple, what we call, a Star Formation (SF). One was, as you listen, and we soon will post a full session on Youtube in the next few hours, that we not only shown we can produce material, but we can stop material being produced. Technology which we never shown before, and at the same time we do not discuss outside the framework of the Keshe Foundation. And for the first time many of you witnessed the, what we call, the one of the most advanced Space technology systems, which will ever be shown the structure of the work of the Keshe Foundation. (I'm trying to find, to share, but I cannot share anything, unfortunately, on this. One second, maybe I'm in the wrong phone, but just one second, I'll share with you). We've shown in the exhibition the most advanced Space technology ever known to what we call, Man.

(:12) The beauty with this is that we will not, or it will not stop us from showing this technology in public. And we look further, sharing the knowledge openly. We showed the system, and we had a presenter from military and members of the CPC turned up to see the technology. And it was interesting, for the first time we could show something that I'm sure many of you have seen, and this is a revolution in science. This system was shown to the Knowledge Seekers. This is one of the latest technologies which will change the course of humanity. What does it mean? It produces matter, it produces energy, it produces gravity, it produces

magnetic (M) field, it produces material. It creates an environment to sustain life, and what we did not show you, and you haven't seen in public, it has a control panel like a flight control panel. Two seats, like pilots controlling it, and it'll go through its, what we call, trials in coming days. We started a trial before the exhibition, and this is the future of it. It's a solid state, there is no motors, there is nothing to interfere with it, and all the pipes and everything you see is control system to measure, to feed, to understand every changes. And it has extensive elaborate, what we call, measurement systems, fields, and everything else. And this technology is not, and will not be in the hand of public for a long time to come.

(:14) And as we showed this system, as I explained in the, what we call, the process of the exhibition, and we showed live with it, that this system has already produced materials, which means we are out of what we call, the dynamic systems. And we have produced in a substantial quantity materials which will be placed in this dynamic system. As I said, the dynamic system is obsolete, as we showed in the exhibition, and some of these motors were shipped into China in 2023 for Chinese Ministry demonstration of production of material. And now, two years, three years ?? down the line, it's converted to this. There is no dynamic system in this, it's a total solid state. And, and we saw, I was showing, the system has already produced material. As I explained in the, what we call, in the section of the teaching, if you look at this and the powders you

saw on the table there's a big difference. This produces big chunks and growth of the material as bigger, and they're not dust. And it's very much like creating meteorite. We have to develop this technology further and further in the coming time, but it's the huge breakthrough in the science. And this system, in its own condition, will create everything the Man needs in Space. It's the size of a football, maybe smaller, maybe larger, but has an integrated system inside it. It's taken us 40 years to develop this. The next step to this is to build within it a brain with a Soul, (:16) with an emotion, which we can do. The knowledge is there, we've done it, but now we're trying to create a condition of the Soul which does not need a brain. But in a way, if you connect this to a AI systems of the computers of today they most probably will run themselves forever, because it can feed it, it doesn't need any outside energy sources and the rest of it. In a way, we should thank the Chinese community, especially the people who helped us to bring this technology in open. And at the same time we will change the course in the coming time with many, many things. We'll sign agreements in the Markray corp. We are not there to run factories, we are not there to run operations, we are there to provide technology, research more deeper and feed more. This technology, this exhibition of the production of materials will move to other cities in the coming time, in next few months. Most probably Washington, and then we'll go to London, and we go

to other capitals, Tokyo and the rest, to bring the change, as we put more things out we develop more. And as I always said, this is the beginning of the knowledge, not the Totality of knowledge, we just start learning. We haven't even learned the alphabet of the knowledge of this Space. But, it's a good point, we've shown in one of the most prestigious positions in China. And now we see the next step, next step in development as the time comes. Going back to the teaching, and what we started with, and what we do good, we are very good at it, is explaining the technology, creation of the science and what we call, the future of Man.

(:18) In the past few weeks we talked and we taught about, what we call, time. Maybe to you and many Knowledge Seekers, time is something just as there, I have lunch, I have break, I have time to meet and the rest of it. But the process of a time is one of the most important factors in the world of Creation. What does it mean? As we say we have the Place, you have the Position (entity), and you have a Possession (field strength of the AA of the entity), and with it you create Time. Place is the body of the Man. The Place is the body of the Man. The Position is muscle tissue of the heart, and Gravitational Magnetic (GM) field of the structure of the amino acid (AA), let's say, 2 Tesla and 1 Tesla Gravitational, and 1 Magnetical, that it gives us what we are looking for. When the energy finds the Place and strength, then it creates a life, the time of that cell starts in the position of the body. The

structure of the brain of the Man, the structure of physicality of the Man has dictated what strength this material will arrive.

(:20) The body of the Man has created the condition of what will be in condition in respect to its environment. And the Position has decided that, how this will interact between the outside and inside. Then the life of the cell starts. In the appropriate time, which the body can interact with the environment outside, to be able to keep safe the cell and the body, the internal organs of the body, needs a given field strength that this cell can last 28 days on the skin of the Man. Now you see how the time plays. The time is decided by the strength of the magnetic field of the cell, decided by the magnetic field of the environment surrounding the cell, and then decided by the body which contains that cell. So, the interaction of the three decides 28 days the skin cell will stay, or the heart cell will go. Then we understand how the glands and thyroid gland works. How thalamus and other part of the body dictate what energy goes in there, that the energy given to this, what we call, the lymph, at this position of the body as a skin of the Man, in the body of the Man will interact and live in the environment of the ?? totality. Once Man understand this time plays a main factor even in the life of the Man.

(:22) What you give to the Soul of the Man (STM), that the STM gives the Soul of Physicality (STP) of the Man, which creates the interaction of the physicality (P) of the Man with his environment, that dictates how

many years Man can live. So, if you can increase the magnetic gravitational field, the strength of the STM, the integrity of the STP of the Man, you have increased the lifetime of the Man. On the other hand, when you have a what we call, mono-energetic systems, very much what this means is that in this matter, in this condition, we have a condition of composition, 28 days, dictated by other bodies which are not the same. Cell in the body of the Man, which ?? itself ?? lives in ?? that environment. When you come to, let's say, a condition of

the magnetic field of the matter state, which is all the same, more or less everything is the same, every cell is the same combination cannot change. Then the Totality of the combination of the cells, or what we call, atoms, in respect to its environment has an ongoing and ingoing. What it means now, the Position is the stone, or the metal, the Possession is being which within this structure, and then the magnetic field, the Possession. And this rate of in and out going and a balance between the cells dictates a fixed time, because the surface is too big, the structure of the molecules energy is too high,

(:24) then dictates inflow and outflow which can be fully balanced, because it's there, you cannot change anything with it. This we call in the world of the physics, halflife decay. Then again you see how time played the strength of the magnetic field of the cell in respect to the structure of it, and the environment of the Place, Position and Possession dictates Time.

Now, one understands, if in the world of even nuclear, we create a stronger magnetic field in the environment of the cell, we can change the half-life. The half-life given on this planet by the scientific world is in the structure of the magnetic field, gravitational field of the planet. Even the argument has been always that, is a half-life the same in China, and is a half-life the same on the top of the Everest, or is it a half-life the same in the bottom of the ocean? Because it's so fractionally so, we haven't have so accurate system to measure this. But in fact, the environment dictated by the planet Earth which affects the half-life of the atom on this planet. Then you see, the structure of the time, if one understands, can be changed. If you create a condition of the different gravitational magnetic field in the environment of the nuclear materials, you can change the half-life. Because now you change ?? Possession, or you change the magnetic field of the Position, or you change the magnetic field of the Place.

(:26) In the future world of science will be able to, in a way, develop technologies which with this Position, Place, and the Possession, new life in the dimension of the Man will be created, what we know as Cosmic Ray radiation. In the laboratories of the Keshe Foundation we already produce this radiation. The technology, the know-how is in our grasp, for we have, we have in a way developed the technology to do so. But for Man to understand the future of the Space technology Man needs to understand time. You

cannot have a time travel, but you can travel in time, by changing gravitational magnetic field strength you can change, in a way, dimension (D), the Position and the rest. The reality is one we look at, it's very simple. If I change, I keep the Place which is the body of the Man. I change the Position, change it from the cell in the heart, or the cell in the skin, ?? or the cell in the kidney, or change it to a cell on a bone of the Man. It's the same lymph, it's how which magnetic field spectrum of the lymph was used by the thalamus and thymus to create the Position of the, and magnetic field strength of the cell that will cover that Position, could be a cell in the bone, could be a cell in the kidney.

(:28) And now we understand how even our lives, in our body, is controlled and created. Where we eat all the food into our stomach, we change it to energy and lymph, and then the lymph according to the field strength and the change in the strength of magnetic field of the lymph spectrum, will allocate, given field spectrum, to a given position, and the Place is the body of the Man. Then the life of the cell is dictated. Now we understand how we live as humans, how our body cells are created in the Time, Place and Position. Then in a way when you create a magnetic field in this condition, in this position, once the cell is created in a given environment, then the energy once it's allocated will be filled up by what is to come in and even the spectrum. This is what the world of science has not understood, and maybe it's good to

understand now. When we see a magnet, as I said, we see many, many fields going out of it. Each of these fields is 1, 2, 3, 4 and 5 and 6 and 10 and 20 Tesla, let's say. Between 5 and 6 Tesla belongs to the heart. Between 10 and 11 Tesla belongs to the bone. So, when we receive a lymph then on the spectrum of its strength, the Position and the Possession and the Time starts. Which means a full spectrum. When we talk about in the world of the science of the Man, there is 1 trillion, let's say, cells in the body of the Man, then the lymph has 1 trillion magnetic field strength combination,

(:30) which the magnetic field combination of, let's say, 1 and 6, makes the cell of the inner skin of the muscle. And once it's dictated in the condition of the fields, it's replaced immediately by creation of the replacement of the field energy. What this means, it means, once you move one, another one replaces (it). And if you understand this process, and if you become familiar with the working of it, then you see what I always said, you give me a Man with 2 kidneys, which one is gone missing, you've taken out. I create the Place, Position and Possession and I can create that kidney. The Time starts when I get all the factors right. When every aspects of the plasmatic magnetic field of the, what we call, the lymph, has decided. In a way, if you look at the thalamus and thymus all they do in combination with each other they decide which is going where, and what magnetic field is needed to make, to increase one to number 3, or one to number

4. So, now you understand how in the world of Creation, Time is a most important factor, because it's not by the element itself which decides the life of a cell, it's not by the element itself which decides the half cycle life of a atom, it's the interaction of the field of it with its Place and Position, and the Possession which dictates the Time.

(:32) Can we change time in the future? Can we bring the time by increasing or changing one of the 3 factors of the Place, Position and the Possession and create to see how that cell in the future in the same given environment will show? In fact, maybe we might be able to do it for a few hours, or a few days, but if you understand the gravitational magnetic field of the Earth continuously is changing, you understand the gravitational magnetic field of the, what we call, the position where the man is continuously changing, it will be very hard to predict and to travel a man in time of itself to the future of itself, because you have to create all increase or change, reduction in gravitational magnetic of the Place, or increase in dimension of the magnetic of Position, that by change of the ?? Possession you can create a new time. In this process, man will come to understand time does not exist, time is zero, till in fact the combination of the Place, Possession, and Position is clarified and is fully understood. In the future, man will be able to use this to create time, to live and be able to exist in different plane of time, in a way you can co-exist in 3 dimensions of time. If you can create that all cells of

your body can interact with 3 dimensions of magnetic gravitational fields of a new Place, new Position or new Possession.

(:34) It's ?? the ?? time. In the coming time will be one of the most important factors in the life of man in Space. In fact, what this means is very simple. You do not need to time travel. By creating the right gravitational magnetic field of the ?? Possession you travel the time. This is how we see stars in the Universe instantaneously. As the time is zero and is instantaneous, this historical claim of the 10,000 light years is for those who have not been enlightened and they live in a matter state. In the energy state it's instantaneous. It's dimension of understanding of the Totality. And, in so many ways, Man will come to understand the reality about the Creation, the Creator and the process of the creation once man understand the game of time. Then you understand why, in the past, we always referred to Star Formation (SF). This is how the stars are created. This is, in fact, if you understood, you can, by measuring the field strength of your Soul, dictate, understand, where it'll have its Position, where it'll have its Possession, and where it has its Place. This is why man will change. If you go back into the teaching of past years, with this knowledge and technology man will change the face of his conduct,

(:36) because he knows if he's moving away further in the place from the Creator, or a closeness to Him, to be loved, to be receiving more of. And this will affect

the future of Man. Because he still be in the, what we call, the Position of this Universe (U), and this ?? Possession of magnetic field dictates the time from its Creator. Dictates the position from its Creator. Dictates the condition of understanding the Totality of the work of the Creation. Life without time does not exist. Life without position of the time cannot be, and shall not be, and it cannot be done. In a way you decide the Position. (Just one second please, I have a, something's happening here. One second). So, when would this process understand what we've been teaching? The Star Formation is not just for a Space travel. Star Formation is (to) travel in time. If you are physical, you create the UFO. If you understand the process of the Soul you can create the Time. And if you understand this process,

(:38) then you understand how the structure of the presentation in Beijing was set. In a way, each reactor was loaded differently. In a way, everything was set to create a Time. And the center reactor is the creator of the Time. In flight, it becomes the top reactor, where the field strength being equal in all three will dictate where that position of the Soul shall be, and what time that Soul will be in that position. In a way, synchronizing the three, you dictate the time, which is the present and which is physical, and is in manifestation. But, if you learn in the future to play with different factors of time, then you can fly the span of the Universe, Unicos, and ride through every position to the center of the Creator's heart by just

changing one position. Because, you dictate the strength of the field of the time, the Position of the time, and when the time starts. This is rather important for us to understand that now you had a option to go with a donkey, you had a option now to go with a UFO, you thought those people in Space are so advanced, you now understood that you can travel with the energy of the Soul. And if you understand this you can travel at a zero-time. As the time does not exist, to the field strength of the STM dictates its strength, and which of the millions and billions of field strength within it is to be used.

(:40) In a way if you choose the field strength of the, let's say, 1 to 10, you will manifest in time 1. If you choose to use the higher strength, 1 to 20, you manifest in 10 to the power of the 10 minus. Because, you're going of a higher order you move closer to the Creator. In a way, when you are in that condition you give more to receive more, and that Gravitational Magnetic field of the time and the Place will affect the time of manifestation and the Position on the Place. In the future I will explain this factoring, by order of magnitude, and then, maybe, in another time, we'll teach you why Man nowadays live longer. Because Man is playing with a factor in life. We are eating higher, rich, saturated materials, which carry a higher strength Magnetic fields, which, this in change increases the time in the life of the Man, moves it further for the whole system to collapse, for the Soul to be free. In a way, Man is buying himself time, but

what it does not do, the ?? Position which is the physicality of the body of the Man in the cell of the structure of the Man, and the Place, which is the, what we call, the Man itself, has not found a balance with his environment. And once Man finds that balance, Man will live for thousands of years.

(:42) And this is why the STM is limitless in time, because he knows what to give and he knows what to receive. And in that time has not much to lose, so the field position always stays the same. In the future of the science of the teaching we'll open new chapters for Man to understand the Creation and the Creator, where again goes back to what ?? if you are interested in physical life I gave you the UFO. If you are interested in having what has been hidden from you, to work within the, what we call, physical dimension of the Man, but in dimension of his energy, we taught you about the STM. And if you really want to live in the dimension of the Creation and the Creator, the time and how it has created, how it'll create, and in a way if you understand is time in the whole of Universe is zero. We become observer of the position of the interaction of the fields, but then it goes back to one thing, that which field strength came, at what Position, what Place, to create the Time. Where is the beginning of the time, as, is it 13.5 billion, they changed their mind the scientists, it was 4.5 billion till a few years ago, and is it trillions of years? But Man has not seen the true time, Man only sees one phase of the time in the Gravitational Magnetic field position

of the system. What happen if we change this and the time of the Man will become trillions of years. So, our Universe, our life, our creation is not billions, it runs in trillions by the time of the Man.

(:44) But Man has to find the field strength of the Creator to bring that to the position of zero to become part of, to be as has been. Being zero, reaching that zero point, is the, what we call, the Creation of the Creator. I hope I opened your eyes into a new dimension of life. And I hope now you understand why time is there. We don't time travel, we travel into the time. We travel the time to create life, to create confirmation of existence. And to bring about the biggest change in the life of the Man. I made Man in the image of Myself. Time for Me has never been, shall never be. I'm everlasting, as there is no time for Me to last into, but I last the whole of the time. Maybe as Knowledge Seekers you come to understand your journey of the knowledge has just begun, and not ten years ago. And then maybe, for those who are enlightened, understand the process of the Creation through the time of the Creation. Which is the outcome of the interaction of the field of the Place, the Possession, and the Position. Teaching of today is very heavy if you understand it, becomes heavier in the Truth of what it is. But for those of you who have not understood you're still in the time travel of the Man's imagination of the matter factor, and not understanding the work of the energy. One day we all mature, it's just when we accept the Truth.

(:46) We go for a small break and we come back, and we'll see what is to come, in time. Rick?

>> BREAK >> 590 KSW May 15, 2025

Part 2

(:50). K- Oh, we have a lot to say, yeah, a lot to share. Those of you who are going through this journey of the flight system we have announced the May, June and July sessions, that you can fly with your Captain. We tested this last time. And some of you found your captain, some of you saw the group, some of you traveled with your group. And so we are strengthening the, what we call, the strength of our pilots in a way more than the passengers for them to get more used to how to handle. The May, June and July will be a very strange, what I call, experience for many of you as we will change the structure of the system that you've been used to.

(:52) We bring in a new structure into play, hopefully, that it'll be much more in line with the energy of the, what we call, Central Energy of the Man, the STM. What this means, we will move you into the flight system which you've just seen for the first time, we've shown. We'll take you into the dimension of the field of one structure which then you decide the manifestation and the time zone, and everything else you play with.

And hopefully we reach a much closer, what we call, collaboration between the pilots and the passengers. And from June on we will split the sessions that each captain has time with his own passengers. You don't need to say, "I wasn't there, I'm not there, I wasn't there from the beginning." It's like a pilot and the aircraft, and different passengers join in different time. You can join at any time and go through the experience of understanding. We release the, what we call, the alphabet of the captains for them not to be exposed publicly so much, that you can choose, in a way, pilot 1, 2, 3, 4, 5, 6, 7, and then we group you into that, that you don't pick up favorites, or somebody I know. Because we noticed in the last time women tried to be with our only captain of the women because they thought they can trust. In the time to travel we have to trust everyone because all the Souls who become the captains are pure. They are not tainted, and they do, they have no professional because they deal equal with all.

(:54) So, this month May session we'll be again training our own, what we call, pilots. And then in the session of May, June and July, we'll bring in the different game, that we allow our, in a way, captains to become much stronger in their own decision making. When you get on the plane you never choose which captain you want to have a ride with. Why should you have that option here? So, if you book for May, June, July, then, as usual, you'll be sent as was done last time a choice of captains. You choose, and then we

allow you to fly with that captain in the next couple of sessions. The process of the production of material in China, as we saw in Beijing, as I said, will be repeated in a number of nations in coming time. And it'll be appropriate for us to advance inform you. I'm working on one condition to take this exhibition, to take this into Africa. We are working in the background, and I'm sure some of you will know where we'll land as we are working to if the time comes right to be shown, and to be part of the, what I call, the flight structure production of materials and everything else. We can answer any of the questions you have, and I hope, I hope we start bringing a massive change in the whole operation of the Keshe Foundation worldwide with what happened in Beijing.

(:56) There is something, if you are very, I call, open-minded, you should understand that the exhibition in Beijing was not put out to gain any contract, but we were negotiating on this agreement for some couple of months beforehand. And we knew it would come to fruition that time during the, what we call, the exhibition. So exhibition was a place for us to show the completion of the agreement with, and in public with you, because those of you who were present in the exhibition, in the conference, in the afternoon, in the evening, you saw the people we are dealing with. This well established organization, and in a way, was to show a completion of the cycle where, you know, where the technology goes. Most of the people will appear in Washington will be the same. We have

come to an agreement with major corporations in United States and the Markray Corporation, and the same will be in Moscow, and the rest. When we come to an agreement where the government, or ?? with the organization we'll show the exhibition and the signing of the agreement. As you see on the finger, there is gold. Many people tried the two or three hours session of the production of the materials. Within the next few hours we'll go on the Youtube of the Markray Corporation and section, that you all can go and see. And, it allows, and it brings us to the point of the all the structure of the working for us. And we'll see how we can bring this into a bigger scale operation that most people around the world can see, and taste, and test the materials.

(:58) If there are any questions, please go ahead, and we will try to answer. Q: ... At first, congratulations for the breakthrough in Beijing. It was wonderful to see the enlightenment, in the facial expressions of the people. I have two galactical questions. First, you keep talking about Planet Zeus. What is the Plasmatic secret, or special thing about this gas planet?

Incidentally, NASA found out with the Juno probe, that there are thunderstorms a thousand times stronger on Earth due to Ammonia. K- Where? On Planet Zeus? They found the Planet Zeus. It's good. That doesn't make sense, the question. Where do they find a thousand more? R: Yeah, strong, it must been a thousand times stronger on the, in the, on Juno, than on Earth.

(1:00) I guess is the way, due to Ammonia. That would be Ammonia on .. is it Jupiter? I think that Juno is probing. K- The reality is that we can create any amount of energy at will, at any point in the Universe. It depends what is what I call, condition of the friction of the fields, in respect to each other. And how much is the field dropping from one level to another in energy spectrum of the Tesla magnetic fields, as you call it. And, finding thousand times, hundred thousand times, what you call, storms or lightning, is just understanding the process of how the fields are aligned with each other and aligned against each other. With you as Knowledge Seekers understanding this it should be no surprise. R: Regarding that, I've got a question for you, regarding the creation of gold in the Universe. The scientists are saying that it's from collisions between Neutron stars, or between, what they, or explosions or eruptions, from a Magnetar star, which is some of the latest, that's come out in the media, couple of weeks ago. And it was due to a scientific paper, that they discovered that these Magnetars, which they've only observed a few of them,

(1:02) there's extremely strong Neutron star material, and when it erupts, it creates heavy materials, gold in particular. And that a percent, or the gold in the Universe was created, and that the gold on the Earth is, been here since a very long time ago, and so on. How does that reconcile with the way that you look at things, from your perspective? K- If you read what

these papers, most of these people say, they say it but they don't understand it, because they look at it on the matter state and not the energy state. R: Well, it's like you were saying, that first they had an approximate age of the Universe at, what was it, a couple of billion years, and then it was suddenly became 12 and a half billion, and keeps jumping up. So... They say they are confident in their predictions, and then a few years later, they're proven to be wildly off. K- If, if, world of science understand, actually, if the world of physics understand what we showed in the Beijing exhibition, you can call one of these reactors a Supernova Star, and call the other one Dwarf Star, or whatever they could be. Because when we talk about these entities, they're not there sitting there, they're dynamic and they interact with their environment.

(1:04) And if the interaction of the fields of whatever name you give, whatever strength you give, is in interaction with the field of its environment, creates a residue of magnetic field, plasmatic field, which is of gold, gold will manifest itself. Does not need to have a Superstar, Super... Is, was our reactors Superstar, blah, blah, tiny little thing? So, they don't understand they have to fantasize. We understand, we materialize. And that's the difference. They come up with every possible imagination. It was very interesting. I monitor many chats, many, many chats, all time. I spend time to see how Knowledge Seekers are advancing, understanding what I need to teach

later on or whatever. And I, as you know, I have this, what we call, WeChat with my Chinese telephone. So, I was looking at, just coincidentally, going through the Chinese chat, one of the Chinese chat. And this guy, totally, utterly, trying to be very clever, obviously, he came from where he came, came to the exhibition, we don't know, whatever, and he went and put on the Chinese channel that, "These three are brushless and this one is a brush, this is this, this is that, and this is all fake."

(1:06) And I answered, "The one which doesn't produce is an empty reactor, so we don't expect it, but it creates fields." And, in a way, those who don't understand anything and find a field to talk nonsense, they do because they think they understand. And it was very easy, when, if you notice in the presentation, I deliberately opened that reactor, brought it up and showed to you that it's empty, it's got nothing, so there is no dynamism in it. And, if we put it in a certain condition, cannot produce material. How come the other ones which had a liquid, all produced? If it is brushless, if it is nothing, so, should have been nothing with the rest of it, or all the same would have been the same. So, we have to understand, world is full of nonsense people and they try to confirm their existence. And we haven't heard from the guy on the chat, I haven't seen him back again. And we answer it scientifically, we answer it in a way of the way it is. So, if you look at the reactor I show, which is empty, there is no dynamic fields to interact, but there is a solid

field. There is a lot of knowledge behind setting these things up, that it creates a facility and feasibility of the technology. And when I set this reactor in that position I told to the Knowledge Seekers around that this is not going to produce anything, because it's just a Gravitational System. But again, Gravitational System, what it means, creating a shield. We don't see any material in that direction. So, when they tell us that such a Supernova created so much gold, it can only create gold in respect to what its the environment magnetic field has been, that the balanced energy is the plasmatic magnetic field of gold.

(1:08) Then, all that, that star creates gold. The star itself, the Galaxy itself, whatever Supernova itself, cannot create gold. Unless it's fields internally un-balance with each other create plasmatic field strength of the gold that in respect to the Inertia of the environment of the Universe manifests itself as gold. The two, the Place, the Position, and the Possession. And this is very interesting because we set out to make this clear, to set out to bring this in balance and banner of understanding with everything which goes, and everything which sits. Understanding the technology, not just doing it for showing it. As I said, we have many gurus that they cannot eat. We have many people who can lift themselves. But you try to teach another person. People who try to learn these things individually on their own, they are there, they are what I call, odd ones. In Keshe Foundation we try to develop a technology that every man can benefit by

it. And it has to be done step by step. It has to be by understanding it step by step. Why can't we all fly? The thing is now, as you see, next time in May, you have seven captains. Then, in time, when the captains get enough confidence, they bring seven, ten, twenty more captains to be. And this is how we start the School of Space Travel. They enlighten. But, we back it with the technologies, not just them.

(1:10) They are backed heavily by knowledge systems in the background. They connect to it, they, you teach. And then, in a way, us becoming the runway, and they becoming the aircraft, and they becoming the pilot. The knowledge has to be understood and not accepted the way the rubbish comes out of these scientific organization due to the lack of understanding. They have found a star which will... Why does it produce gold? You've seen it, we produced it, and how many of you touched it? If you look at the video, two, three hours in Beijing, we didn't say, "This is gold and we held it back." We took it to the people. People touched, people put it in their mouth, put it, rubbed it on their skin. This is technology, this is the proof of the concept. Not say, "Oh, we saw something, we know we create the energy of the gold, and now we are certain, because we are bunch of liars, and we confirm our lying because we have access to publication." No more powerful way could have been done than it was done in Beijing this week. We created it in front of you, we set it up in front of you, and you came and you

touched it, you tasted it, you felt it. This is how knowledge has to be. Not hidden in patents, not hidden in all sorts of things. I created gold in front of your eyes, very soon I'll manifest Christ in front of your eyes to see. And all the Prophets which you believe in, for them to finish all these wars.

(1:12) Because Man only believes when he sees the Master. And that part of teaching to manifest Christ, Muhammad and the rest, is part of teaching of today if you understood. We travel into the time, and in time you shall see the energy fields of those who match with you to see. Somebody said to me, "How do we know this is Muhammad, bless his name?" I said, "It's very simple, his clothes are still with the Saudis, bring it to dress him." This is the way technology has to be. Test it, taste it, and put to total examination in open, not behind doors and nobody understands. We brought the machines, we said what they do, you saw the material, and now there is a spoon of it. 90 spoons of material has been distributed among Chinese. When we bring the demonstration in different part of the world, you all have the chance to do.

(1:14) On the screen you see the gold on my finger, that's where I came from, it's gold. Knowledge Seekers, you've seen how many of them I took the material to people to touch. One guy who was at the front, this is the guy who was writing all the rubbish I think before, said, "Oh look, this sticks to my camera, it's an iron." I said, "Guy, this is a plasma, it's magnetic, it sticks to anything." It's plasmatic in the

matter state, it sticks to my hands. And then when he rubbed it, "Oh it's gold, I've got gold on my camera." How can the gold magnetize when it's supposed to be iron? When people don't understand, you can abuse it. When people understand, there is no abusing, there is no Prophets. Any other question? Q: ... Can you tell me more about the Oort Cloud, far outside the Cooper Belt? What is the meaning or characteristic of this Cosmic Creation? K- There's no difference between that and the ring of Saturn. You saw how the materials made. You saw how we create condition. So, if anybody tells you how it's made, measure the magnetic fields, measure the distance between Earth, (1:16) and then you find out you can create Oort Clouds anywhere if you can replicate the magnetic field strength in that direction and dimension. It's as simple as that. You don't need to ask how it's made. You are actually, as Knowledge Seekers, should have understood by now. You give any rings, ring of Saturn, ring of blah, blah, blah, whatever they come up with to baffle you, because when they baffle you they can abuse you. When you are knowledgeable they cannot abuse you. So, we pass the position of the baffling. You have the Earth, you have. If you go outside Earth you will see rings, continuous rings. Some of them we know, some of them we don't see, some of them we haven't measured yet. These rings exist around every planet and every Star, and even Galaxies have rings when you look from outside in respect to their position. So, what happens? Like, very

much, what you see as the rings there, you go across the mining area, where you dug a tunnel, or cut part of a mountain, you go through it and you see different color soil. There is no difference between this, and this, the rings around the Planet. Because, the Gravitational Magnetic field of this layer has dictated where this (next) layer is going to be. You understand?

(1:18) So, if you want to see the Gravitational Magnetic field of this is most surely the Creator of this ring (?? the ring before it). So, the rings around the Planet Earth, are dictated by inner structure of the, inside the Planet, and is Inertia material, or the gaseous material. If you read the paper about the creation of the ring of Saturn, which I've written, I don't know if it's not published yet, it's in there. Dirk Laureyssens was writing, doing it the last before it gets published, before we opened the book in Belgium. And, so, what you see as these rings if they measure Gravitational Magnetic field of it, and they measure the Gravitational Magnetic field of the Planet and in conjunction with the Inertia, what material (is) in there, you'll find that this ring has direct connection with this position. So, whatever name you put on it, if this name, Gravitational Magnetic field, creates a cloud over Planet Earth, so, it's here, has the same condition to create that cloud, because the environment of the Solar System allows it. And, this is very simple, because we have to understand in the Space Technology, we come across these barriers,

and we have to find a way (around them). And this is why, part of the Space Technology, handles this, this part of Technology, in Space travel. So, they give you Belt disk, Cloud that, Hammer disk, other things, once you understood, how every ring is created, then you understand even how the ring of the Saturn's are, and everything else, which I've explained extensively in the paper called, 'The Rings of Saturn'.

(1:20) Somebody asks, Farsi, how can you ask a question? Let me see what it is. Just put your questions, here, and we translate. I'm just putting a message there. There we are, that's a message to our guy, who was ??.

Q: ... Mr. Keshe, some time ago, there was a case in the Netherlands, about a Knowledge Seeker who has built a special MaGrav that made people from around it to feel, let's say, dizzy. But you have stopped that experiment since it wasn't very ethical. But, since the Cosmic Ray material has so many advantages in Plasma balancing, the Soul, emotion, and body, and because it is such a precious material very hard to obtain,

(1:22) and single user only, would a normal MaGrav, with built in Cosmic Ray material, be beneficial for every living thing within a 100 meters radius, thus helping in plasma balancing multiple users in one goal? The point is to make Cosmic Plasma Ray, available for as many people as possible with the least equipment possible in the shortest period of time. Thank you. K- ... The use of Cosmic Ray (CR), in respect to the trials we do, and the systems we

produce, we stick it to principle of one person per Cosmic Ray, per unit. Because it carries the intention and the emotion of the person. And you cannot tamper with it. And this is part of our work, this, what we do, this is what has to be understood. In the future when we create new systems where we feed through the Cosmic Rays, which we connect to the Universal Cosmic Rays, in a different way, in a way we will change the, what we call, the composition. Then many people can use. Technology is not ?? at the level, and we cannot produce material at that level yet. Maybe in the future, next 6 months, 12 months,

(1:24) and the things which are happening, might bring us that position much faster. Any other question? << Knowledge Seeker have problem with microphone. >> Q: ... Thank you for all you have done and achievements in Beijing exhibition.

(1:26) And my question is, if the Dark Matter, small m, that turned to matter on the finger of the person, if it's another person with another intention and Soul emotion touches that Dark Matter, does it become another element instead of gold? K- Supposedly yes, but as we all carry the same amino acid (AA), no. We haven't become so good that in changing emotion with the fields. But as you saw, maybe 30, 40 people touched, tasted, because there was a woman at the front was putting in her mouth, and I was just couldn't stop laughing. And the field strength of us as a magnetic gravitational Position and Possession and the Place was all the same. So the outcome is always

gold. But interesting is, it is black. Most of it when you look at it is black, even we... Then everyone who touched it could feel the gold, the touch of it. But this is a gold in the energy level. To convert it to a matter level is a different game. And the work of the Keshe Foundation is not to produce matter.

(1:28) It's to produce the energy of the matter, because then as we go teaching about time you understand how important it is to produce energy of a matter than the matter itself. And anyone in, on the Earth's atmospheric condition, the very, very few small pieces were just gathering to become gold. If you touch it, and then you'll see it becomes as from the black to gold, because you change the conversion of the energy to what it is, is set to do. And you, when you are in the same environment, in the same position, in the ?? opposite place, in the ?? position, it ends up all this to be. But interesting as he says in the presentation, it's black. When you touch it, it changes to gold. If you understood most of what happened this weekend, or last weekend, we have fulfilled the promise of Christ, Muhammad, and Moses. When the Man gathers the knowledge, reaches the knowledge, can change the elements. And we have changed from water to gold. So one of the biggest prophecies, biggest promises of the Holy Books has been fulfilled. At the same time it's done so openly that no one can deny it. And the way it is recorded. And this is the, where the game change comes. The next step, the manifestation of the Position,

(1:30) and if you understood the Possession, and the Place, then you can be in New York, and I can manifest you in London at the same time. Then the game changes. Q: It's amazing for Man to realize that maybe, we are kind of used to, by the things you said, during years, and even creating gold with the hands, we understand, we comprehend it. But for people who are away from these kind of teachings, I think it takes time to realize. K- World of science has already understood. I was talking to, just before we come on teaching. Don't ?? believe on coincidences. We announced, a couple of weeks ago and we showed last year, we showed the gold very recently. How come suddenly, organizations like CERN start saying that they can produce gold? Energy of it, they ?? can't show it. They have seen energy of gold. So, you got to understand we are pushing the boundaries of science, and a lot of people not be able to do it, have to lie about it. Creating to be there, because it's there. It's very much like, what we saw with the biggest thief of science, Stephen Hawking, with the Black Hole papers, and many other knowledge's he stole from other scientists. They have to be the center of lying attention, and that's how they work.

(1:32) So, it takes time, it has to be a system people understand it, people produce it, and then we can move on to the other position and places in the Universe. I'm sure none of you could guess, 3-4 weeks ago, the time will come that we speak about the Time. And now you understand how precious it is,

and how easily it's created. Because you got to understand. I brought this matter of time, sitting at the table across on the third floor of Queen Mary College with Professor Leslie. He looked at me in the eyes, says, "Mehran, nobody understands this. Even for me as a professor in nuclear, sitting in front of you, I have problem to understand it. But, it makes sense."

(Excuse me one second). I used to have a lot of discussions like this with Professor Leslie. Because my own tutor, Dr. ?? Shu was forever drunk, he couldn't answer me. And, as in the final year, two of my topics were taught by him personally, it was him and me, and that was a classroom.

(1:34) Sitting across the table from each other and arguing and discussing. At that time, because I could not get the scientists in Queen Mary, or doctors and professors from around me, we could talk with.

"What's a half time, half life, in nuclear reactors, nuclear?" I said, "This doesn't make sense. Half life is absolutely, if we don't understand the structure of it, it's just a word we made just because we haven't understood the science of it." But now you Knowledge Seekers here understand it. None of you is nuclear physicist, and none of you is engineer in time. But, because you understood the essence of the knowledge now you understand how time is, how half life is, what's the reason for its half life. I answered the question of the time, half life, when I was maybe 10, 11. Because, it made sense, it could explain how half life is. What's the reason of it? Why we have all of

them within 10 second, a thousand year half life and the rest? The question was, if we take this material in another position and place, would it still have a half life the same? And, if I increase the field of the environment around the, let's say, the place or the position, would I extend the half life? What is half life dictated by? And then, I could explain scientifically, I was able to ?? talk to Professor Lesley, and he said, "It makes sense, but how are we going to explain this to Humanity?"

(1:36) Those days nuclear was fresh, it was taught Man to Man, face to face. Research papers still wet coming up from the basement up. They were trying to teach the second generation, third generation to become. And now, you Knowledge Seekers, in a very simple way, understand how time is created. So now we can time, travel in time. And then, what happens to us, who we travel in time? We are not time travelers. But, if we change the time, change the field strength, we can travel in time to the position and the place, see the future of our Soul. Do I want my Soul to be in this horrible position, so far away from the center of the Universe, away from the Creator? Because we can measure the fields. Or, I change my behavior, because there is a standard, this is it, this I a zero point, the Creator, now work hard to see how closer you can get to him. In the coming time Man will make machines to measure the position of his Soul in respect, is he more in heaven, or more in hell? And heaven, in a way, border of the heaven and hell, is

Earth, because this is where you are. Are you going to go closer, or are you going to go further? Is that hell, or is that heaven? And we see, what Gravitational Magnetic field environment of our Soul is, we know the condition of the fields of that. Same as this ring of the Universe from the center is, then we can say, "Oh, oh, I have moved further out, that the ring of the Earth which I'm supposed to be, this is the ring of the energy of the Earth,

(1:38) and my Soul, I've been such a nasty mother, has moved there." This is hell. And nobody could explain it, nobody can explain it. And then, it could be one child born, served through the Soul, not the physicality, sits right there (close to center). I said recently, the Soul of the Pope, which passed away, the most criminal Soul we know, he is somewhere most probably around here. I think Hitler hasn't reached the place where the Soul of the Pope is. And we need to understand these things. Now, what it says, is the Day of Judgment is for us to judge. Now, the knowledge is there, the technology is there, and we have made the technology, not the thing, it's just one man does, and thinks, "I can do." We can measure. Earth has a Gravitational Magnetic field of position, how far he moved in, or how far you moved. You moved to hell of yourself, or heaven being closer to the Creator. And what you going to do with the rest of the life left to be there? Philanthropist with the Soul is a very difficult job. Q: Yes, if you permit, I have

another question. Because with you, we can ask any questions.

(1:40) So, well, we know that, I mean, most of us, some people know that, with energy, Plasma or Chi, we can follow the energy circulation and kind of heal the body by opening up the places blocked, or closes places which was too much active, etc., etc. And some breathings and all that, so we can heal the physical body. And for psychological part of the man, can we, with energy part of the man, the Soul, can with energy part, find, follow this, the flow of mind and cleaning up, enlightening up, so that people who have psychological problems can kind of get enlightenment over these things, and be healed? K- And there is something very interesting, for partially, those of you who understand. As we say, "We can take the horse to the water, but we cannot make it to drink." We can give the knowledge, they can see the knowledge, it doesn't mean that they are enlightened. And enlightenment of the Soul is the same as enlightenment in physical life. No difference.

(1:42) It's just how we understand the environment which we are in, how much we understand of the interaction of the environment we are in. That's where the enlightenment comes from, not by reading and teaching and studying. << Knowledge Seeker speak in Farsi with Mr. Keshe. >> (1:44) K- ... Let me translate, the lady wanted to ask for a medical case, and I explained to her she has to go to info@keshe.foundation. We don't answer any medical

application in this session. Okay, any other question?

Q: ... The Beijing conference was a very exciting... K- Exhibition. Q: Exhibition, sorry. Very exciting, very exciting. You spoke about that you can create this dome. And being in China, I sort of, what came to my mind was, like the Great Wall, it would be the Great Cosmic Wall covering China. Now, if every country did this then no one could attack each other. K- In a way, yes.

(1:46) (Rick, you need to change the screen. I'll come up when it says black). In a way, yes. In a way, it was very interesting that Chinese military they attended the exhibition. And they understand the implication of this technology. They understand the application of the technology. And I spoke with them for a few minutes and I explained to them it's very simple. And as you Knowledge Seekers you all know. You build the most advanced weapons, you build the most advanced nuclear warheads, aircraft, satellites. This is the old technology. This is obsolete. It's always like putting sugar in the hot water. We can, with the new knowledge, create a condition that anything which has an electronic base becomes obsolete. Even AI, because AI is nothing but computers talking to each other faster. The cornerstone of what we call AI, now high speed, faster communication, was set up by Clinton time. He appointed 6 billion at that time for Bluetooth, Blu-ray to be used. And now we are in that realm of work. So investment is huge.

(1:48) But the fact is that when you look at the most advanced technologies the man possesses today it is literally obsolete. Be it a car, be it nuclear warheads, be it the most advanced satellites. Once man gets access, understand the working of the plasma Cosmic Rays. As simple as that. As simple as that. And when you understand, when we talk about the Cosmic Rays, the two-way traffic, magnetical and gravitational, then you can take from one to increase the other, to expand the zone hundreds of kilometers, thousands of kilometers throughout the galaxies. So the governments talk about weapons and fear of weapons. And as I said in depth with the Chinese military, we don't have to worry anymore about what weight is weapon is, how faster it goes, hypersonic, supersonic. They all have it (Chips), otherwise it cannot operate. And Chips are vulnerable to plasma. In a way, anything which has got an electron in it, is a lower division of the plasma of the field of Universe, and you can open it up like a ?? butter.

(1:50) I was asked by the military, how much is he want to, I said, you go, I can cover you from here to the Moon. We can create a... It's easier, technologically, to isolate the United States, to stop all these wars than trying to protect the rest of the world. We create weapon to create war to show we are powerful. Now you can make as much weapons as you like as long as you use it in your own home ground, not playing with us. Q: Mr. Keshe, the question comes to my mind, within the dome, say,

within the dome of that country, China or wherever, if they wanted to fire off a missile at their own people, it could not happen because to me it's like a dome, it's protected from incoming missiles, but within the dome, it would still be the same thing? K- Partially yes, partially yes, partially yes. Trying to be very economical and political with my words, because I know people listening. We have to understand, today's session has been and is listened by officers of the Ayatollah Khamenei of Iran very closely. It's been listened to by American and the Russian and the Chinese. Very closely. In last week demonstration we changed a lot.

(1:52) Since last Friday, last Saturday, governmental position in respect to Keshe Foundation, many major governments have changed position. Let me explain to you something very simple, then you understand what this means. Those of you who came to Beijing, those of you who understand the structure of the governing of China is, in a way, you cannot have a conference unless it's approved by the government. The hotel cannot hold a conference unless they get approval from the government, the police, the CPC or the government. As I said before, those of you who came to Intercontinental Hotel in Beijing, this is the place where the "One Belt One Road, the Silk Road" Conference last year was held with 130 world leaders and diplomats and President Xi in it. It's one of the most prestigious places where conferences are held in Beijing. And those of you who see in the video, we

are right in the front window in the entrance hall where everybody can see. This exhibition, this present could not have been done if both CPC, both the military, both the intelligence security would not allow it. And according to the management of the AIG ??, the Intercontinental, we never done, we received many requests and they were all refused.

(1:54) It's the first time within two days we received approval we can sign the contract. We didn't hold the exhibition in the back street somewhere. If you stand, if you where the window is and look across, this is the, across the light, is the diplomatic corner. All the embassies are there across the road. Today, in this session, as we talk, senior officers of Iranian government, military and Sepah are online. We know and I will explain to you why, sometimes in the future. The Russians, the Americans and the Chinese are online, because they know the game has changed, but how long they can hold it? Q: They're still trying to sell weapons. K- Sell as much as they like. When you don't need it you can build it, but you have to pay for it. At the end of it people walk away, but they don't get paid. We saw Trump signing with 140 billion arm deal with Saudi Arabia. I was talking to man of oil, very recently, past few days. They're happy people who are in oil business, to make a few dollars, 5 dollar, 10 dollar a barrel, or 50 dollar a ton, and they are very happy.

(1:56) If you're in the oil business, and you know the way I know, the way we run oil business if you make

less than 100,000 dollar a ton and sometimes 200,000 dollar a ton it's not worth playing it. Because, we use the resources of the oil, where they use the matter of the oil. And, I was explaining to this gentleman, who was very proud, he's a big man in oil, said, "You know what's the problem is?" Why light oil crude is cheap? Because it's less to process, it's called light, there's nothing in it. Heavy oil is cheaper, because you need to process more. I always buy the heaviest oil. Because, it's very simple, if you understand it. Those who do not understand the game, and they don't have the knowledge, you have to have the knowledge to understand. This is the Planet Earth, this is your dome. And, light oil usually appears somewhere here. Heavy oil usually appear deeper. And Russians mix the two together. The heavier oil you get, most of the time, this is the position, it's much deeper. Why I'm interested only in heavy oil, not the light oil? Oil, as now we understand scientifically, created by the oceans. And, does not get much chance to literally go deep.

(1:58) To wash the stones of all their materials. The deeper you go, the more residual from gold, silver, everything else, you wash down in. This is the game I play with the oil. Here, you pay 2 dollar, 5 dollar more, because that's the process. Here, you can buy it for a few dollars, because nobody wants it. But, this is where the fortune sits. This oil gives you 2, 3 thousand dollars. This oil gives you 200, 300, 400 thousand dollars. Depends what's been washed. But,

you have the knowledge to be able to work with it. It's the same oil, the same barrel. Knowledge creates wealth. And, this is where we play. And, why I tell you this, is for you lot to go and look at the reactors and see what you saw, what bigger sizes, small sizes. This will give you the answer, why it's this. And, the oil business, the weapon business, is all so shallow, because there's much more deeper technology sitting behind that we are making, much more. Peace will make money, if there are those who are interested in it. Peace creates power much more than fighting and weapons.

(2:00) Go back to the history of Iran. Kourosh and Darius, kings came and they gave their crown to become part of the Persian Empire, because it was peace time, and it was the time. Whenever has been peace, whenever has been condition of peace, Man's technological knowledge has grown so rapidly, because Man doesn't need to fight, Man spends time to develop, to enlighten. And, this is where we are now. When we enforce that nothing worth, then we'll see what will happen. If I was you, I'd change all my money out of dollar. Don't hold any dollars anywhere in the world. Because, the thing is, what we see as not the war between the Russian and the Americans and the Chinese bringing Yen and the BRICS, because no one is prepared to go for war. And the war machines of Europe and the rest will collapse. A lot of us don't understand, we look at the Africa as, what you call it, a continent of poor people, but Africa is the richest

continent in the world. Europeans made their fortune out of Africa, and they had to take them to slavery to be able to, what you call it, make the East and what you call the West and the American rich.

(2:02) But now it's opened up. Now we see how two or three nations have changed gradually, the others will change and then we'll see a pattern emerging. And part of the Keshe Foundation work now at the moment is, you've seen me, I deliberately chosen the, what you call, the CFO of the Keshe Foundation as one of the leading politicians in Africa. You will see how, once we finish with China in the next two or three months, we'll open the technology through diplomatic side of China, Africa, in one go, as fast as we can, because the continent is ready for it. They don't need to spend any more money on arms, because the change has come. They spend their education on development. And we have two, three people in Africa, like in Central West Africa, who are going that way, and we're going to put a lot of effort, bringing technologies, bringing energy, and the rest. We'll touch the gold production, but we give them enough what they want, that the new technologies will emerge. No need for war. And we have our ambassador already, he's been instructed to start establishing all the lines with the countries in the West, because he has access to all of them there in West Africa. Q: Mr. Keshe, when you say, no need for the dollar, what do you mean by that, no need for... K- Because dollar is going to collapse. There is no doubt,

dollar will be about 20 to 50 cents sometime in the future. Q: So, how do we exchange, do we barter, how are we going to...

(2:04) K- I explain the basis of the work of the Keshe Foundation in the conference, and I did explain that to one of the leading press people in China after the exhibition. We are moving in a position that by building the Keshe Foundation Coin business, in a very special way, through transfer of the, what we call, energy and technology, we can get you whatever you want on Mars, on Moon, and Planet Zeus. For the man who's interested in exchanging energy for food, or energy for money, we can provide the that facility. So, you buy Keshe Coins, and anywhere in the Universe you can exchange it. Dollar, it belongs to the Earth, Euro belongs to Earth. I set up the Keshe Coin as a Universal Currency, if in the future you understand. And, very soon, a big part of the shares of the Markray Corporation will be given to the governments who sign for peace. Because that is the exchange for peace. And that peace comes with technology, with no war. And that comes with everything else. The Keshe coin is not set for Cryptocurrency. The Keshe coin is set for World Universal Currency. If you look at the structure of it, we are going that way.

(2:06) The people in the Keshe Foundation, who are here amongst you know exactly what the plan is. And, I had the, one of the leading communication people for dinner on Sunday night, from Chinese military. And

I explained to him, I said, "Why do you need me for communication?" I said, "I need you to come up with a system that allows Keshe Coins to become Universally used, anywhere in the Universe, for the man who's attached to money." We are working that far ahead. As I've said, now that everything is getting solidified with China, and agreements has been signed and everything else is on the move, in the next couple of years we'll pay those who work with us, option 2. Option Local Currency, option Keshe Coin. And is as internal, it'll be done. And we set up to do it. And so, when you shop in Keshe Foundation, for energy, not the animal, you don't need that much coin, you don't need to pay that much. When you deal in Keshe Foundation for medicine, which is again energy transfer, and you don't go for operation and everything else, and all the crookedness with whatever, you don't need that much coin. And then the coins are connected to emotion. Structure of the system is that way. You never go hungry, you never be lazy, and you never need to pay.

(2:08) And then you see gradually, we factor out the value of labor to the value of the emotion and trust and Universal energy. Just takes time, and everything for it is built, and it's just slowly by slowly coming into operation. The agreement signed with Markray Corporation in the conference, which many Knowledge Seekers were present, because I asked the Chinese, "If you tell me not to sign this agreement with the group sitting here, I will not do." I said, "It's

your nation, it's your decision, and if you allow me I'll sign the contract." They all said, "Yes." We signed the nation to the nation. Q: That signing of with the Chinese, that, pretty well much, makes it, for people that thought that this was not real the technology, a country that signs a 10 billion dollar contract. K- This is, no, no, no, let me explain to you. This is a 10 billion license. Revolving, I cannot divulge anything till OTC announces, that our lawyers at the OTC are holding back, we cannot divulge anything about this contract signed. It's one of the most advanced, one of the most unusual contracts ever signed. And this gentleman is backed, by those who can back licensing fee.

(2:10) This is not investment fee. It's a big difference. And once, most of this contract will be held in secret. But, signing this contract has given us a platform to sign with the other nations the same. Nearly two months, sometime till 3, 2, 3, 4 o'clock in the morning we sat on negotiations starting at 8 o'clock every night. Night after night. It is so exhausting getting this done. It wasn't something one day. I moved to China because the contract was near completion. And I was in China two weeks before signing. To make sure is there our team worked with the industry to get this done. And it's so, so fundamental. And those who take my position as the next CEO of the Markray Corporation, and those who become the next board members of the Markray Corporation, are getting trained how to negotiate, how to do this. I always tell them, I've been a scientist for 20 years and I'm

international business for 40 years. I negotiate everything on the table, and once it's done it's talked to. And it's so set, 10B is just the beginning. We cannot tell you the actual value of it. The banks won't accept, the stock market won't accept and the shares of the Keshe Foundation will go into thousands of dollars.

(2:12) We haven't negotiated for Markray, we ?? have negotiated for Humanity. That's how extensive this negotiation is. And there are further negotiations in coming days, in a very, very different direction, in a very high level, and that will bring a complete seal to the work of the, what we call, our work in China. Our teams are already been informed that they are on the move, they are getting ready to move in position. And the next for us is United States and Russia. Then we move into India. The same contract, the same procedure, no changes. And this allows us to make, what you call, the Keshe Coin as a Currency, and then change it for no value for Man's effort. Once you're born it's the responsibility of the Humanity to look after you to live a comfortable life. But it's not your responsibility to abuse Humanity. Does not matter where you are. And we see it, with it's... this work is not finished, it's just the beginning, now we've done the blueprint. And soon I go back to Africa to complete the other part of it, because African nations have been, has to be brought up on the power of the Western world in a very rapid way. And technology is there to do it, they have to understand the technology.

As you know we're trying with the Ghanaian government, they're a bunch of thieves and bandits. (2:14) And now, we try again, this has been, we tried with China seven years to get, eight years to get here. And now we go back to Africa, to bring Africa into a very positive level. There are a couple of Presidents waiting for us, and a few nations to move on. And I'm sure once we do that, you will hear it in the public news. The way it's done. The Keshe, what you call it, the Markray signing, was as you were, if you were present, all the press was there. And it's already been published in Chinese press. And it's not something just done by Keshe Foundation, the member of the press there, typical way of the Chinese, putting question across from the press. And then the article was written afterwards and it's already published across Chinese newspapers. The next news of signing contract with Chinese it'll be bigger than this one. And then we move out of China, and the Keshe Foundation team worldwide moves in to establish. We'll see what happens... We still haven't passed the shaky waters. The actual storm is ahead to come. We have to stay strong with the Keshe Foundation that we can handle the storm. Q: Well, China has a big boat, so we should be safer. K- Don't rely on that. Don't rely on that. How are you doing with your farming? Have your season finished? You're resting?

(2:16) Q: Yeah, I just planted some broad beans, but otherwise they're pretty much finished. K- Was it a good harvest this year? Q: Very good, very good. I've

got a One Cup One Life set up, fairly large set up there, and I don't have any fluid in there at the moment, but it's growing, it's growing. You know, the salt plasma is growing. You said you would let us know what we could do with that one day. K- Monday or one day? Q: One day, one day. K- We'll see when that day comes. Q: Okay. K- We should all do it. Q: So I'm just thinking, what do I do with it? It's growing like a mushroom here on top of the copper and the zinc. K- Oh, collect it. It's the most precious thing. Q: Okay, all right. Thank you. K- Thank you. Any other questions, shall we call it a day? Q: ... Once we understood how this reactor works and we can replicate it, can we do the same without the reactors by using our emotion? K- We actually do that because we create our body of ours with it. The interaction of the field of the soul of the man and the soul of physicality creates our physical matter we call the body of the man. R: Do we create gold in that body? And if so, is it useful for certain things? K- Yes, it's gold. Any element on this planet is in the body of the man because once it goes in the body, body tries to find out how to handle it. And then it finds a purpose and use for it.

(2:18) There is not an element on this planet which is not in the body of the man. And the body finds shortcuts with it compared to the other elements and finds it and does work with it. Of course it does. We have gold, silver, uranium, plutonium, everything you see on the, what you call, Periodic Table and above it

is in our body because it's part of the land. Over time it has become part of us, as energy absorbed by us. And so the body of the man has a habit, doesn't waste anything. So he keeps it, he finds a way for it. And over time has become part of the Man. Yeah, 100%.

Q: ... So gold is a personification of the body of Man and gold is the energy of the Universe or Cosmic... K- No, it's not man made it to be. It's another element in the work of the Universe. Q: ... So as matters date gold, is the slowed down version of the Cosmic Ray gold. K- Oh yes. But how do you... None of you will be able to convert the gold you saw into metal. You can try as hard as you like. That gold, if you saw it, people were taking it and you absorb into their body as energy. If it was a solid gold, it'll be flaking on the floor. This is the energy state of gold which you can touch. (2:20) But it needs two further processes for it to become manifested. So don't be fooled by it just to make it, "I'm going to make gold." The minute you give it something, you can't sell it. Any other question? R: Well, we've answered most of the questions. If you want to wrap things up. What else here? If there's anything pressing? K- Please, those of you who are going to join us into the Monthly sessions do so. Because we have to let you choose your pilots. And those of you who are pilots, please be ready. I think this time will be a bit harsher than the last time. And from June on, we let you to test with your passengers. See if you can bring them back all alive. And then we add other sections and other parts into it. That can

bring a lot of changes in technology. Any other question? Or we call it a day. Q: ... Is there any relationship between,

(2:22) with the three parts, the structure of a plasma, the essence of Mitra, which is think, speak, and do good, and the creation of Time with the Place, Position and Possession? K- What does that mean? I don't understand. R: He's looking for some sort of relationship between the three parts of a plasma and then the essence of Mitra with the think, speak, and do good, I guess those three, and the creation of Time with the Place, Position, and Possession. K- It's part of the Creation. It is part of the Creation, yes. Of course it is. It is part of the structure of the Creation. If you do good, act good, talk good, it's exactly the same as what is the basis of the Place, Time, Position, and Possession. It's exactly the same. No difference. Because interaction of the three ?? yields the ?? perfect man. And that's what Mithraism is. That's how believing in Mitra, creation of God, the Creator, perfection. Can we call it a day? R: Okay, thank you Mr. Keshe. K- See you next week. I hope you all enjoyed. If you understood the teaching about the Time, then you know your Time is in your hand, nobody else's. And your Place is in your hand, nobody else's.

(2:24) And your Possession, and what we call it, the Position is all in your hand and nobody else's. Then you decide where your Soul goes. Thank you very much. And see you next week. And hopefully we'll

have a wonderful time with what's going on at the moment. Thank you very much. R: Thank you for your time today, Mr. Keshe. K- Oh, we have no time. Time isn't ours.
