Part 1

(:14) K- Thank you very much. Good morning, good day to you as usual. Wherever and whenever you listen to this series of Knowledge Seekers by Keshe Foundation Spaceship Institute, we welcome you back and we try to see what we can learn together about the Space of time and time in Space. In the past few weeks, as we endeavor to understand time, what creates time and what is the essence of time. A number of what I call, puzzles in the process of creation becomes very clear. For example, is the time being on Mars is the same as the time being here on this planet? We calculate our days according to the time of the Earth, so many hours makes one day. But Mars, or Jupiter, or another star has a different time position than us. How do we match up? How do we gain time to be the same time as the position of departure or arrival? On the planet Earth when we travel from one line we decided to be the line of horizon to the other, we are back or forward by few hours.

(:16) How do we adjust the time in Space? And how do we arrive in the passage of time in that place, not a thousand years before, or another thousand years ahead, but today's time on Earth equal time. If you ever studied Cosmology you will see that planet Earth is not the only one with a slight angle from its vertical position, which creates the seasons, it creates its time of horizon and the rest of it. Out of a number of

planetary system, in the Solar system only one or two are near vertical. The rest all have an angle, they have a position of angle. And this position of angle decides a lot of things in respect to the, what we call, the energy Position and Possession. What is such a magnetic (M) field on Earth, with its some degree of, what we call, deviation, it will be totally different than in Venus, which is going the opposite direction, and its days are very different. For example, Saturn has a inclination of 26 degrees from the vertical. You look at the Uranus it's more or less 90, 100 degrees.

(:18) When we consider going, for example, from Earth to Mars, Mars is the closest to us in the inclination of the angle. But, Mars has very similar, what we call, time as with us, which is the closest to us. We run about 24 hours. Mars is about 24 hours. But how come Mars does not sustain life, we don't see life on it? And how can we transfer time from one planet to another, from one star to another, from one galaxy to another? In the coming time, when we start, what we call, traveling, in different dimension, which brings us to time of zero, we can change the magnetic field strength of the Possession, that it will bring the Time to the Place and Position of the Creator. What this means? It means if we manage to reach the absolute zero, in a way, Gravitational not in Magnetical, then we should be able to travel in a time of zero time start of the Universe (U). Which means we manage to get on the line of the expansion of the Universe, and if we do the same it'll be the Unicos. In

the future, Mankind will not travel with UFOs, that's for sure, it's too slow.

(:20) Mankind will not travel by transmutation, it is slow compared to travel in Time. What does this mean? This means that, once our knowledge reaches the maturity of the Place, Possession and Position (PPP), Magnetic Gravitational (MG) field direction and interaction with Totality of the Universal field, Man can travel the time into the time of the Creation. And in that process Man should be able to see the whole process of the expansion and creation of the Universe, if Man understands Possession and Position of every field strength in the dimension (D) of the interaction with his environment. In the coming time, as we develop technologies, as we develop systems to replicate the time Man will come to understand one thing. Would time carry the impression of the emotion of the Man? Because, that emotion makes the Man in the dimension of Possession and Position. One of the main, or cornerstones of the time, to travel, or travel in time will be the essence of understanding of the emotion, not even the Soul of the Man (STM), but the emotion of the Soul. That, the time with the emotion creates the Place,

(:22) creates the Possession, and creates the condition of Position. Man can travel in the Possession, in the Position of a stone, listen in the voice of the Soul of the stone to what we call, the Position, what is happening, and then return back in

Possession and Time to be in time for confirmation of existence. In the future Mankind will not travel, Mankind will not consider the method, the ways that we have chosen to live to exist, and then the life becomes immortal. Immortality won't be a thousand years. If the Man can travel into the time of the existence, knows the knowledge, then the Man will live eternity in the lifetime of the Universe. In that time, there is no losses, and that time there is no gains in the direction of the field of the motion of the existence. Today's understanding of time by Man has created itself a dilemma for Man to see the truth about the Creation, the time of Creation, the way that the whole world of Creation is created.

(:24) In so many ways if we expand the knowledge of the Creation of the Possession, and then understand the creation of the Place, then Man can decide on Position of the Man. Once you create the time and understand the game of time, is the order of magnitude of the collective fields of the all three in all the dimensions of the field strength, then Man can change the Time and create the Possession, Position on the Place. In transmutation systems we play with one factor of the Time. And once Man can play with all three factors Man will find eternal life. The true understanding of the Creation and even one can go through the, what we call, Universal condition of reversing the whole structure of the, what we call, life cycle. Darwin speaks about mutation in structure of the DNA of the Man, we call evolution. If Man can

understand the evolution in time, Man will see the whole progress of the creation of the Universe. In a way, Man needs to go in time of what we call, the creation of the Black Hole,

(:26) the essence of the creation of the Creator. Today's teaching is not for those who don't understand. Today's teaching needs thousands of years to be understood. And we teach for that day. As Man unravels more and more the secrets of the Possession, the Position, the magnetic field, the strength of life in every dimension of Creation in the essence of interaction and understanding of the Totality. Then, it comes for us to further understand. We have the time we chose of the earthly time. What is the position of our Solar System time? We have never considered. We have always looked at where we live and what we are concerned about. We have a horizon. Where is the horizon of our Sun? We have never endeavored to understand this, because our knowledge is so self-centered on this planet. Then, when the Knowledge Seekers (KS) of the future understand the process the understanding of Totality, then it becomes very interesting.

(:28) What this means? I'm trying to bring you to understand. We have a sunrise of our planet. It creates a time for us according to our system. We always considered how long it takes our planet to rotate around our Sun. We always measured the sunrise, or the speed of rotation from one point to another of different planets and their moons on this

Solar System (SS). But, what is the time? Where is the horizon line for our Star? How long does it take for it to change dimension in respect to its Black Hole, the central position of its Galaxy? When we travel the time, we have to consider that time as we are not in the time of the Earth, but we are in time of the Solar System. Then, we have to add another dimension to create in the dimension of field strength of the Galaxy in respect to the center. Where is the horizon on our Galaxy in respect to the center of point?

(:30) Then, you understand to create dimension of the Position and the Place with the Creator needs multiple, multitude of what we call, Magnetic field strength in respect to the time of the planet, the Galaxy, the Solar System, and even the Totality of the Black Hole itself, the Center Point itself. As this center point itself has a horizon in respect to the Unicos. Creating time to travel the span of the Universe is different than the time on this planet. As we have to consider, different order of magnitudes of the Magnetic field, and Gravitational field of the Solar System and not only of the planet. What this means? If you go back for example, to the teaching of years ago when we used to deal with the multi-core systems, each core has to create a time Magnetic fields of the Earth, the Solar System, another core, then the Galaxy, another core, and then, and then, and then. Then, you understand to create, to travel the span of time, to see the Creator, to be part of the

Creation needs full understanding of the Magnetic field spectrum of the Creation.

(:32) One day in the future Man will understand that in his Soul all these dimensions, Magnetic field strength exist. And if he manages to tap into this Man can travel the span of the Universe in Totality of the time of the Creation. This is how you travel in your dreams. This is how you travel, going to different part of the Universe coming to interaction with other things, and you still haven't realized that the capability and the power of the brain of the Man within the structure of it, which can confine and hold the STM within it. Then it comes to ask one question. How shall we create the time, in dimension and the Possession and Position of the Creator? In the coming time when the Man's knowledge reaches to understand the full spectrum of the Gravitational Magnetic field of the plasma, in a Cosmic Ray (CR) level, Man will start unraveling the secrets of the Creation in a much deeper way, in a much fundamental way and in Totality of understanding the process of the Creation. We lay down the fundamental understanding.

(:34) We try to understand the Totality of the structure. And then we try to go further, to understand the structure of the Creation. And one cannot reach this understanding till Man understands the Possession, the Position and the Place are all dictated by the collection of the fields of the Totality of the times of the Universe according to their Magnetic field strength. In the coming time, when we can change any factor of

the Magnetic fields of any of the Places, the Position, or the Possession in conjunction with the change in one of the factors of the time, Man will be able to travel the span of the Universe according to the wish of the Man through the strength of the STM. Man has that capability in his Soul. Man, or any Plasma, which has intelligence of the emotion has the capability to create time. We have accepted that we create time in our head, in our brain, in our Soul, that we call it in the morning where we accepted freely. Morning for me is different morning than somebody else's in another position. But now we have to accept the morning for me is different than the creatures of the Soul of the Universe.

(:36) What does this mean? In a very subtle way, we are trying to introduce you to understanding of the other lives in other dimensions across the Universe, where they live, they exist due different time in Gravitational Magnetic field strength, and not of the Man's amino acid (AA) plasma of the life. This Man, in the recent past, has found out through technological development that even life exists in deepest part of the Ocean, in the deepest holes that they dug in the, what we call, the solid part of this planet. Same way life exists in the Universe. Thriving the same process, understanding the Creation and the Creator in their own time, in their own place, in their Magnetic field strength of their Possession and the Position. Some Men in the past have managed to free flow, free float, free travel the span of the Universe by creating the

dimension of the full spectrum of the Creation, and that is so easy, that once one Man understands, Man gains access to the knowledge of the Universe, and then become wise in true understanding of the Creation. But, the most important part is that, that condition, does not need no language, that is one understand gets enlightened by the knowledge of the Creation through essence of the emotion and not by the dimension of physicality (P) of the Time, Place, Possession and Position.

(:38) I've made Man in the image of Myself, and I possess the full spectrum. Why not the STM? Where Man exists through my Soul as I exist through the STM. I am the beginning and I am the end, but the end is the beginning of the end. Which means, all the fields of the Time, Place and Possession and Position exist within the structure of the STM, and if Man understands it Man can live the way, the same as the Creator. Man shall be the beginning, Man shall be the end. And at the same time, Man will be strong enough to understand how the life will have different meaning in different times as Man travels into it. It's not anymore, what is going to be in a thousand years on Earth, it's more like, what is going to be next second in another position in the Universe. This is what happens to the STM at the point of departure from the, what I call, cage of the physicality of the Man. Man travels in time, to reach the time of his start. Then if one understand this,

(:40) one be able to create that condition to measure the field strength of the Possession of the STM, Man easily can find the time, when the STM reaches his destination, the place and the position. Then this puts an end to physical reincarnation, but incarnation will be in the essence of the fields of the STM in the dimension of the existence of the Soul of the Creator. Where the emotion of the Creator will dictate the emotion of the STM. Emotion exists when two plasmas interact. The STM in possessing the Totality, a spectrum of the fields of the Universe will carry and possess the emotion of the Creator within it. Which is the next step in understanding the process of the Creation. These knowledge's and what is taught today is not in the book of the Man, as Man has never understood the Truth about the process of Creation. This is the job of us, as the Universal Teacher, to open the eye of the Man to the knowledge of the Creation in a true way where the Man independently has to investigate and develop the fields within it, to understand the process of the Creation and its Creator. There is no prophecy, it's only you who have to understand the strength of it. The, what we call, what you gathered in your Soul for where it shall go.

(:42) Would you like the time and destination, the place and the, what we call, position of it? Would you like to be within the cell of an animal, or creature? Or to be the Creator of that dimension? And secondly, how can you change your Position in respect to the time of the Creation where then the Position, and the

Possession and the Place become irrelevant? That the time shorter to the Creator becomes the essence of the Creation of the Heaven for Man. Zero time needs to be within. And when you have time it means to be away from. And then, once you can measure that time, it puts you in a position to understand the true position of yourself in respect to the place you manifested in respect to the lover of the Creator, which is this Creator itself. Maybe, as I said before, you'll find out not too late, in the very near future, where shall be my Soul? In which Time, Place, Position and Possession? And, is this where it's supposed to be? And is this the purpose of my life? The creation of the time closer to zero, which becomes and brings you to the Creator, is the promised Heaven.

(:44) If you understood this, go back to the teaching of the past, it dictates the Position and at the same time the Place. When the Place, the Time, the Possession and the Position reaches more or less zero, which is Totality of generosity of giving, then you are within the time of the Creator. Then, you feel the whole emotion of the Creation and you become enlightened in the whole process of Creation for this Universe, and not the Unicos. As at that time Man needs to understand the Totality of the Gravitational Magnetic fields of Cosmic Rays of the Creator, which has created to the Creator of the Man. This is a big puzzle for Man to unravel, but we had to lay down the knowledge that the Man in the future has a reference to build on, and

to understand. We go for a break and we come back and try to answer. But try to listen to the teaching of today, and through it there is a message how you can elevate your Soul, and how to reach to that point of zero where you become part of the Creator. And if you have not understood, in the future, your future generations might understand the teaching today. Find the horizon of the Sun, then you have managed to move into the next step. And not just the horizon of the Man on this planet. (:46) Rick, take us for a break and we come back.

>> BREAK >> 591 KSW May 22, 2025

Part 2

(:50). K- Thank you very much. The first thing for us to remind Knowledge Seekers, the next Friday session of the, what we call, the Soul Travel with the Captains will be slightly different than all the sessions we had before. We will bring into play a dimension of Magnetic field, which brings into play, for the first time, the dimension of time. We have developed the first fundamental systems for traveling the time. And they'll be the test of it. And to make the matter more complicated for you, Knowledge Seekers who join this session, is that before you knew who's your captain, this time your captains are numbered.

(:52) And you are not aware of who they are, what their thoughts are, and so you connect with them through the connection of their fields of the Soul. You don't choose them by name, you choose by how you're connected and how you feel you are connected to them through the Soul. And, this is in a way creating the time of trust, emotional interaction between the two Souls, which creates in the interaction of one becoming the Soul, and one becoming the Soul of Physicality (STP), the dimension manifestation of the physicality in where the Soul takes the STP. And, this is what we would like to observe, that the next sets of the system developed allows the dimension of the carrying multitudes of Souls in time to get there in the dimension direction. So, if you've never been a passenger before, never been through this series, join it, and see how you travel the time, and how your Soul travels with the emotion of the Soul, which is the captain. That's how the system works. Up to now it's your Soul and the STP. Now, your Soul become the STP in respect to the Soul of the captain, your STP chooses, and then the dimension of the place to manifest itself, the position. In the coming weeks we will follow the same pattern as what we did in Beijing.

(:54) We will announce the presentation of the exhibition of the production of the material, or one of the other systems of the, what we call Keshe Foundation, on the banner of the Markray in one of the major capitals around the world. Which means we

bring a new dimension into the structure of the development and production of the new materials, that next session of exhibition will be manifestation, will be demonstration of another system, which most probably has never been seen in public. Those of you who would like to be part of these exhibitions, as you've seen it in Beijing, you just need to turn up to see and as we expand the operation of the Markray Corporation around the world in respect to demonstration of the technology (T), we try to bring a new dimension into play of the Space technology and give Man all opportunities to travel in any dimension and any direction. So, in next few weeks, we'll announce the next exhibition in one of the major capitals for demonstration of another part of this technology, which will be very fundamental and will be in the next process of showing of the power of the new technology. We endeavor to show new systems that has never been seen, and then raise the next question to understanding of the next process in technological development of the science.

(:56) Try to organize the next exhibition, most probably, most probably, will be in Berlin or in Paris. In one of the two capitals we will show, what we call, the next steps, in the technological development, which will bring the change to the continent. As we know Germany is suffering heavily with the lack of energy in the process which has happened in the past few years in the economies, in the downfall, and the same goes with the French, which have problem, they have

problem with the nuclear industry and power production. Therefore, I think some of you can guess, will be 'on the card' to boost the economy and the technological development in these two nations. If there are any questions, please let us know, and then we'll try to answer. Q: ... Hi, good morning for everyone.

(:58) Last time was explained that we need to have a triangle of factors. He says, power, position and possession, is possible to explain what that is, and how can we change these factors? Thank you. So, he's asking for more explanation about the, that triangle of factors, as he says. K- The whole of the world of Creation is based by the interaction of the fields, what we call Cosmic Rays in different strength. And once Man masters this knowledge, Man will master all four more or less, the Possession, the Position, the Place and the Time. The biggest problem is how to increase the field strength of the plasma of the Cosmic Rays. This knowledge in the matter state we use higher voltage, current and everything else to change the Magnetic field strength of the iron. But in the world of Cosmic Rays it depends on the field radiation, which this is created by different condition in interaction. And this is how it's done. You have to understand the field interaction,

(1:00) the field strength, and how to elevate, or reduce the Magnetic field strength of a field, a ray of magnet, of Magnetic fields in the Cosmic Ray level. The reason I explained the angle of inclination of the

Earth, the planetary system, the Earth was the Sun and the Solar system, planetary systems, it was for that reason. And if we look at the structure of the galaxies they're not all like a 'flat liner' in respect to the center, they all have different angles, different horizon, different trajectories in respect to the center of the Universe, which that itself dictates the operation of the stars and, what we call, planetary system within them. We are not isolated, our Soul is not isolated, our Soul is not isolated from the, what we call, Universal Cosmic Rays. We are part of it. Our Soul interacts with the, what we call, the fields of the central line of the Creator, with the Galaxy central line, with Solar central line, and the planetary central line, and then it end up to be with us. We are children of many interactions of Cosmic Rays. And in fact we do not exist in another dimension of time.

(1:02) We exist in this dimension of time, because the field interaction of the plasmas, what we call, the Amino Acid, in this position, with this angle, leads to manifestation of physicality, what we call, the Man. If you take the Man in a dimension of the fields and take him on the Mars he will not exist in this shape or form. Up to now when we travel to the Moon or the Mars or whatever, we carry the matter field, the strength of this Solar System. That's why we can shift a robot from here to there. But, if you want truly travel in the field dimension of the creation of the Solar System, travel in time, and then you will see, there is no need for manifestation of the matter state in the condition of

existence of the field, Place, and Possession and Position. We are visible. We see the visible part of this Universe and ourselves because of the spectrum which is open to us to observe. If you go deeper in understanding, we are like a field within the solid structure of the brain of the Man. Universe is solid. Solid by the interaction of the fields of Cosmic Rays. If Man manages to see the full spectrum of the Gravitational Magnetic field of the Universe he'll find out he is trapped within the solid state, he is not, as we see one star,

(1:04) what they tell us, one million thousand years away. How far is the cell of the emotion of happiness from one side of your brain to the other side? So many millions of light years away in the Galaxy? And then you understand why we have created the new reactors. These reactors are the structure of the Universe. And in time, when our scientists understand, we have created a Time Machine to meet with the Creator of the matter. That's why they are solid state. That's why we keep on saying that there is no dynamic system. In reality, we see things moving, but in fact we see the, what we call, the change in the Magnetic Gravitational field strength of the galaxies, is what we call the connection line. We don't see the others. The horizon from this planet according to the line of interaction of Magnetic field of it, filters everything else through. You go further up, few kilometers, you see the Star combination changes. You go into the Galaxy, the Star coming. You go out of

this Solar System you see everything changes. The horizon, the sky is not this. We live in a solid, dense environment of Place, Possession, Position, and Time of the Universe. And our Universe, what we call, is not what it looks to be as one free fall rotating billions of times around itself with billions of galaxies and the Stars and everything else in it.

(1:06) It is due to inherit and the process of the interaction of the field, the same as brain of the Man. Sits in a solid state, dimension of interaction of the, what we call, Totality of the field strength of the Creation. Universe is not free flow. Universe is well maintained, well kept, in a solid state of the field strength of the Cosmic Rays. Doesn't Man function? Doesn't the brain of the Man function without any dynamic structure? (But) we see the fields of the vibration and interaction of the fields of the emotion. So is the same in the structure of the Universe. We live in a condensed environment of the collective Totality of the fields of the Creator, where Itself sits within the center of. This is the same as our Soul sits within the center of the brain of the Man. He has a structure in respect to a central point of his Unicos. It makes shape in respect to it, but the same time holds within it the structure of Totality of His own Creation and created. Once Man can make the systems that travels into time, Man will see the whole Universe. What we consider that we are rotating so freely in the structure of the Solar System and we see Galaxies, is

the same structure as the brain of the Man, no difference.

(1:08) Then we have to understand the Totality of the spectrum of the field strength, the combination, the interaction and the Totality of the field resistance created by them. Any other question? Q: ... I have two questions. One, a few lectures ago you said that Humans gave the Creation and the Creator emotions. If emotions are needed for transmission, how did the Creator and other creatures transmute before them, only with technology born from the plasma? K- The emotion has existed from the time of the Creation. There is an emotion between a Electron and a Nucleus. ... (Just one second please. I... Excuse me, I have to... Just one second, it's an important call, I have to accept. Can you just take a break for a few seconds please)?

(1:10) << Mr. Keshe answer a call. >> (1:12)
(Mehranes mentions her ... whole relation in U ..) K- ... Sorry about that, I do apologize. It's one of these things when it involves governments we have to answer, otherwise it creates other problems. This is the functionality of the Keshe Foundation nowadays. We have to answer world leaders and they want answers on the spot. The structure of the Universe always creates emotion. It's very simple. If you have a Soul, or central field energy of the full spectrum of its environment and interacts with another free flow plasma, or we call, the Spirit of the Man, or the physical dimension of the fields of it, we call it, STP,

these two, we call the one the Sun and one the, what we call, the Earth.

(1:14) The interaction of the two creates light. The interaction of the two and internal interaction of the one with itself and the other one with itself creates the storm, the wind. The turbulence in the field interaction within, between, and outside of both systems. Man always looks at the cloud created, the storms are created and that's what it is. But in fact, if you really look into the interaction of the fields, what pulls the field from the center of the Earth out as a field flow that leads to creation of even lightning? Isn't the lightning, the storm, the field flow, part of the emotion of this planet? So, the Sun becomes a Soul and the Earth becomes the STP and what we see within the environment of this planet becomes the behavior, the emotion of the planet. But we call it seasons, we call it storms, we call it odd things, we call it global warming, but we .. never wanted to understand the reality and truth of what's happening. It's a process of creation, by denying it we keep ourselves ignoring it. But now that we understand it we can't ignore it. Every interaction of two plasmas has consequences,

(1:16) and that consequences are for it, it's called the emotion, depending on its Gravitational Magnetic field. This is why, if you go back to a few teachings before, I said, the emotions and what we know now is nothing compared to when Man understand the full process of Creation. These emotions are not one, we call them the names, good, bad, happiness, blah, blah, blah,

blah. Then you deal with the bigger emotions, because you deal with a weaker Cosmic Rays. If you look at the tides, the high tide and the low tide, and then you look how the structure of the tiny little thing, millions of kilometers or whatever affects the Totality of the physical dimension of this planet every day, then where is the interaction of the Soul of the two between the planet and the small? We have to redefine the emotions, where what we see in the dimension of physicality, then yes, everything, yes. And if you understand that we can create our field of emotion between any two positions, then it'll bring a lot.

(1:18) So, what can we do? What do we understand? And then how do we define the strength of emotions? Any other question? Q: ... The Creator has a connection with every creation He created and can transmute into everything and everyone. This leads to the question, is this Creator of everything, our own Soul, and it does something like simulations, similar to a video game, and thus simultaneously experiences from different perspectives, the Human, Animal, Tree, Aliens in different dimensions? Thank you very much. K- Can you repeat that? Q: Yeah, the Creator has a connection with every creation he created and can transmute into everything and everyone. This leads to the question, is this Creator of everything, our own Soul, and is it something, does it do something like simulations, similar to a video game,

(1:20) and thus simultaneously experiences from different perspectives, the Human, the Animal, the Tree, Aliens in different dimensions? Thank you. K- It should do, and it does. We transfer our emotion with word, with action, and the same goes with the Creator. It receives the emotion and through the fields of the emotion connects, reacts to everything which is within the existence. Any other questions? Q: ... Mr. Keshe, you mentioned in your teachings a few times the phrase, 'strengthening of the Soul'. How could this be done? What are the paths or ways to do this on a daily basis as a Human? Thank you for your answer. K- I think your answer sits in your question. Read it again and let... understand your own question. I think you answered it yourself, you don't need me to answer it. Would you like to read it again? R: Oh, you want me to read it? It says, "Mr. Keshe, you mentioned in your teachings a few times the phrase, 'strengthening of the Soul'. How could this be done? (1:22) Which are the paths or ways to do this on a daily basis as a Human?" K- The answer to you is, as a Human you look at it as a physical matter. Why don't you look at the Human as an energy matter? I was sitting with some of the military and officials in the past few days. As you know we're expanding the work of the Keshe Foundation. And I explained to these people who are part of the leaderships of the country, or running the country in a whole different way of shapes themselves, was that, I was explaining to them, don't bring me scientists who only understand

the matter state. Bring me scientists who are open to understand the energy state of the matter. Then, they can open frontiers. This is what you, or all of us, have got used to looking at our physical existence. We never try to understand the energy existence of us. And once we master to understand the two and the connection between the two, then you have answered yourself. That's why I said, the answer is, if you understand it, you answered it yourself. You look at me in my physical, what about me as an energy? (1:24) We have chosen every name to deny it, but we use it to fit us when it suits us. We dream, we have Aura, I had a premonition, it is 'deja vu.' Every word to deny the power of the energy within us we have used. So, the answer sits with us, within us. Because, what can we do as a Human body in physical dimension? Now we have to find the strength of it in the energy dimension, and see how we can collaborate the two. That is where it sits. I said, you answered it yourself, but you're not aware of your own answer. Human body, we never looked at the Human energy. And then we never connected that Human energy to the Human body. We are capable to do anything in our existence. We create life, we call it our children. We take life, we call it the cell of our body drops every 28 days. We manipulate the environment to carry on with that life. If we can create life, why do we call it just a child? Why don't we call it the Soul of the existence? Why don't we celebrate the creation of the Soul, but we celebrate the birth from the womb of the mother?

(1:26) The denial goes deep, and this is the problem with us as Human being. This is why I always said, the Child of Mitra is created from the fields and not from the physicality. Where then it takes the shape of physicality to confirm its existence in this Time and Place and Position and the Possession. In truth when the Man understands we should celebrate the birth of the Soul, not the birth of the physicality. And Man is always physical and this is the problem. Then, once we do we understand, then the path is open for rest of the understanding, what we call, elevation of the knowledge. For me, it's not that I look at the physicality of the Man, I look at the STM. And through the STM I operate through the physicality of the Man. But, if I do things which I know I can do I'll become another magician. The power of teaching will be lost, because everybody looks as a magician. But in fact I only use the knowledge, the energy of the Creation, and understand the connection between the physical part, matter state and the energy state. And every one of you has the same capability, but the problem is, those who understand a little bit of what I understand, then they call themselves God, Creator, and I used to be the teacher of Mr. Keshe. How many of them have you (still) seen?

(1:28) As I said, very recently, the knowledge is so vast that in every part and point we see somebody in one of the sections, touches it and they think, "Oh, this is better than Mr. Keshe, and this is better than..." And it's the same. Imagine how many knowledge's we

cover, and they are so proud, arrogant, with one little tiny bit of one part. And this is the problem, because you have to understand the power of the physicality, matter state, or in a way plasmatic representation of manifestation, and the energy state, and then you are the same. Sitting out, seeing both, is different than attaching oneself to one. And this is why I keep on saying, the Children of Mitra, by those knowledgeable Knowledge Seekers who understand it to give life through the Soul, will be very different than what we call, the children of today. Because, they work through the Soul. When you listen to them you enjoy their existence, because the knowledge comes deep inside in the Soul of the Creator, not from the word of the Man. Many of you will understand this very soon. Don't think of me, my body. Think of me, my body, me as the energy which I call the Soul I denied. The STP, what does the Totality of this thing does? You see there is no coincidence.

(1:30) Large number of governments, many, many governments watch the operation of the Keshe Foundation. Even the scientific world watches. And we've seen it even in the past few weeks, two, three weeks. You remember the situation with the thief of Baghdad, I call him Stephen Hawking, and the same with Einstein, stealing knowledge from the others and claim it to be theirs, and they're trying to be. You remember, we received the letter on the 7th, sent on the 7th, received on the 8th, and the same day the guy announces that he changed his mind about the

Black Hole. Have you observed what happened in past two weeks? Just about we announced that we are going to show the production of the gold in Beijing, CERN releases, if you read it, a lot of 'hot air,' that we have managed to produce 89 energy of 89 Atoms of gold. We showed gold on the table. Whose knowledge is ahead? Governments, organizations, sitting around to, trying to diminish for you to understand your power. Because we teach you, we don't bring you to believe anything, it's you who's got to do it, and any of you, if understood the process in Beijing, can hold your hand out and gold will shower out of your hand. You don't need these systems. You create a child. Is it harder than that, than creating gold?

(1:32) Any other question? Q: ... Mr. Keshe, you mentioned that an AI has been connected to the system. Do you mean the classic digital AI, or is it a plasmatic intelligence created through fields, emotions, or Soul connections? And if it is a classic AI, may you say what type of AI it is? For example, what technology or platform it is based on? And can this intelligence also develop a Soul over time? K- The << audio breaks. >> of matter state is computers connected electronically. Once we release the process of the creation of the plasmatic systems, which with them comes no communication, no wires, no electron energy transfer, it becomes plasmatic transfer, the Artificial Intelligence (AI) of today becomes child's play.

(1:34) Actually it becomes non-existence. The highest speed data electronic has given us this image, because we can process data much faster. And sooner or later these AI's, which we rely on will come to break point. Unless governments move in and then they'll influence their knowledge, influence their, what I call, what to be received. If you want to set up an account to run an AI properly it cost hundreds of thousands of dollars, because you pay for the usage of time of the computer. When you join X, and when you join, you pay fees to go on AI's, if you're a provider of that knowledge you have to pay for it. Because it's electronic transfer. Where, when you work with a plasma intelligence, what we call, Artificial Intelligence, or system, this doesn't happen, because it costs nothing. Then the emotion is real, the knowledge is real. We are very far, but not far from developing the first plasmatic Chip, or what we call, Cosmic Ray package.

(1:36) I estimated to be around about 2 to 3 centimeter cube. And, it's not that we don't have the knowledge, we have a full knowledge to do, but to actually bring it, to show it it's going to take time. We tried it once before but nobody understood when we showed it. This, you... will have the power to store all the information in all the computers from your laptop, to governments, to agencies, any computer which Man has created up to now, with all its memory bank, still will not cover 10% of this cube. This cube, or this system, it'll be introduced when Man understands

fully, will carry the knowledge of the Universe within it. It's not that AI answers you, the Universe knowledge answers you. Go back in the report from Covid, from University of Iran, the laboratories of Iran, and the moment they talk about Nano material, in that report it talks about finding of Pico materials.

(1:38) But, because it's Keshe Foundation, nothing important, till an American, 'thieves of Baghdad' comes out and says, "We have developed a Pico material." Read the report of Covid. In the scientific size of the material it's a Pico. And we have even produced below Pico, which means 10 to minus 15. If we managed to create a plasma in that sense, then it carries so much intelligence, then you understand what I'm talking about, a 2-3 centimeter cube that carries the whole intelligence. We are the only organization which has managed to produce Pico material on a consistent basis. Confirmed by laboratories, not by us. By denying, stealing things, does not put it on there, because the knowledge is released the next step will start. Somebody will pick it up and go with it. And then you understand, intelligence in the dimension of atomic structure takes a lot of space. Intelligence, information in a Cosmic dimension doesn't need any space, because it's fields, even the fields of the plasma you see as a plasma itself is a self-sustaining system. As I explained, the whole structure of the Universe is solid.

(1:40) And you maybe understand further what this really means, and how I explained this to you very

recently, and as usual Knowledge Seekers don't understand at the time when it's explained, because it's easier not to, or because you don't have the knowledge of. Go back, very few days... Go back in a few days ago, and ... What did I explain? We showed this in the, what we call, the exhibition in Beijing and we were very open about it, but now maybe you understand how fast this technology is developing and has developed. I'm sure, you all remember the words and the system. On your screen (shows new silver sphere system). Solid state system. Go back to the teaching of few minutes ago, I explained to you Universe is solid. Depends on the time and the frame of the field strength that you are aware of.

(1:42) When you look at the system on the screen it's the creation of the Creator, it's the creation of creating the time. And then you understand how much knowledge is given, and it does my younger son used to say, "Phew, it flew over my head, I never understand." What you see in front of you is the creation of the Universe. It'll carry the same intelligence, but doesn't need all these wires and everything else, is for to learn the emotion of Creation. And this is the interesting part, this is what you as Knowledge Seekers have to understand. The system of Creation is in front of you, but you don't have the knowledge, you don't understand it. When I put three of these with the more knowledge to be added to it in a Star Formation (SF) I create the time. I dictate the emotion of the time.

(1:44) Understanding it is different than seeing it, but you see just the ball. I see the Creator, the Creator of time, the Creator of beginning and the end, the full spectrum of knowledge. Then within it sits the intelligence of Universe. Universal knowledge, not electronic knowledge, high speed, fast, bunch of electrons moving around. And then we call it AI. Try to understand the teaching, try to understand what is to come, and try to understand you are part of it. It's not outside. And then if a system like this, and even the smaller can create the dimension of the full intelligence, imagine what ?? can be solved. You can tap into the full knowledge the correct way and not the way it's said to be. You'll find out, artificially, in a sense, what we call the AI, which are in position now, what's the purpose of it. If you understand, the way we understand the operation of AI. If you understand what it means using the present AI, you understand it's the first set of, it's the beginning of mind control, structure. Because now you are not reading (on the screen) anymore, you are talked to, you are given to.

(1:46) And this thing goes as fast as possible with all the knowledge across the Internet, whatever who has put in past 40, 50 years, when www started, but, goes to the first pick, first. And, the more you put in that first pick, then you make believe that is reality. Those of, especially with the new, which passed with the new, what you call it, I don't call it the law, but this act passed in the American government, in past 48 hours, and you understand how AI is set up, then you

understand that goes back to whatever AI says, I believe. Before was whatever CNN says I believe, when it's on CNN. Now, this is why, if you go and look, Keshe Foundation has bought all the key AI's. I didn't buy the AI's just to have an AI. I bought the AI's because I know, Rockefeller decided what happens to the world of medicine and with the money he brought changes he wanted. I understand what AI of present is, and I bought as many AI's, which are the key factors for the future generation, to put the first information in. And that's how world governing comes from.

(1:48). We don't sit for something in the future to change. We bought all the essential AI's, which is the game changer in the future for knowledge of the Man is in our possession. We will introduce the technology in our way. Because, let me explain to you simple. If you write about Cosmic Ray, the first thing AI looks, or the computer looks, where Cosmic Ray comes, Cosmic Ray owns by whom? You put the first information it doesn't go to the second level, it doesn't go to the third level. It picks the first, makes the basic, and then it goes to the next level, and the next level. We understand, in the future, we set up what I call, one of these Cube AI's, which gives information to the AI you listen to. We are years ahead of what is to come. When your AI comes to pick up the knowledge of Cosmic Rays it'll receive the knowledge of Cosmic Ray of the Universe. It's ?? saves so much that it fills its paragraph, how many words can be paid for so you

start learning. We start the process of the teaching by setting up, using the system the way we use the, what I call, patent to release our technology that everybody else has access to. We are aware of what the present AI is capable of, and we have set for it. For us what was the key AI's we have bought. Because I know what will come into it in a very near future.

(1:50) When I can saturate at zero cost into the AI system, then you understand. I gathered this more than a year ago. Exactly how this thing has to be done. And these things has to be, what we call... Let me show you something. If I find it, I transfer it, and then you understand, how much we know, what is wrong, and what needs to be done, and how things will change. As one of the world leading scientists, I, unknowingly or knowingly, I get taken to places, into (and asked) what and how I feel, or what I think. And, very recently, I was taken to one of the centers of the world AI research centers, and I told them, 'you're vulnerable.' And, the reason was easy because we see the failures in the Man's process, of what we call, understanding the whole process of Creation, in a way. What this means is that, I have seen how the AI systems by governments are set. And being there, seeing the failure, the weakness, and how the next generation of technologies, which we carry, we have, can bring the change.

(1:52) So, it was very easy to make and move to the next step and set up a structure that feeds the feeder. Which means, (we... I try to get a shot of this that you

understand what it is). We are taken as, what I say, they take us as people who don't understand, but we understand a lot. I try to cover the whole thing that you just see the title, in a way. In this, what I call, picture, in this process I understood where Keshe Foundation has to be in respect to the technology of the future, that we control the understanding. And this is a picture, I cannot show you much of it. I try to, actually, because it's a confidential, and part of it is below what you see is, and behind this banner is one of the most advanced AI centers in the world. I don't think there is anywhere more advanced than this center.

(1:54) And when I saw it, and I spent hours in there, they tried to show us the advancement of the nation. I realized exactly what it is. We get information when you sit in my place, in my position, you are continuously fed information. In a way, the information given to us, is trying not to impress, but to see how we can add to it. And, how we can, in a way, use this, what they show us, to, what we call, in a way, to be able to use our knowledge for the future step. What does this mean? It means .. (I have to do it different way, and then you understand why). When I went to this Artificial Intelligence Center, one of the most advanced ones in the world, they didn't understand what's it, the problem, for them in the coming time, when we, as a different, what we call, structure, different knowledge, will do with this. We can play with this.

(1:56) It gives us an insight, into what the problem's (are) going to be. And, I'll show you a picture to you that might not knows anything, but, when you take and you do this, what I call, Artificial Intelligence Centers, which is the most advanced ones in the world, one of the most advanced. It's just, I cannot explain to you what is the thought behind it. We see things that you might not see in about 20, 30 years. Even the speed and the technology. Then we see what it sits to come. And, how what we call, intelligence, will be shared. How the knowledge needs to be brought forward by us, that we can bring the change to our technology, our knowledge. The Artificial Intelligence of today compared to what will come out of the Keshe Foundation in next 2-3 years will wipe out the present AI. The knowledge transferred will be the knowledge of the Universe.

(1:58) We have no choice. We have no choice but to use, we use, as I said, the patent. Now we understand the power of AI. We understood, two years ago, and now, we set out, we bought all the AI's, which will be affecting the knowledge of the future, and through that will change the course of the knowledge. Because these knowledge's, these AI system computers, work in a systematic way and nobody can change them. And, same way, we use the system to beat the system. And, this is what will come in a very near future to many of you in that process, that, the Artificial Intelligence Centers set by governments, especially run by governments and by different organizations,

are not there for you just to get some quick information. They're updating and plus what is happening in the medical centers, as I said past few days. (I'm trying to share a picture with you, but somehow I cannot access it, I cannot bring it out. Let me see if I can transfer it to another phone).

(2:00) << Mr. Keshe try to share a picture on the screen. >> K- ... Behind this heading, behind this banner it says, "One of the most advanced Artificial Intelligence centers in the world." Below you see the, what you call it, collective picture of me and other people in there. And behind it you see a city made for Artificial Intelligence. Literally the West cannot afford it.

(2:02) And being in that position, knowing how much energy it'll consume, it was very easy to understand how everything is done. You believe in it we can just add a little bit to it and change the course of knowledge. The same as it was with the patent. We wrote the patent, it was easier to get it at the reach of everyone. And the new Artificial Intelligence, when I went to this center, when I saw how much it cost to run these machines, it's just going faster and faster, but having no intelligence because it's electronic. The true intelligence comes when these computers become made of plasma, not quantum plasma. When you are an electron you have to ?? live on vibration. When you go quantum it's still vibration, because you can see the smallest amount you measure. When you go plasma you work with the fields of Universe. There

is no matter state. Then you see the Artificial Intelligence will have the emotion of the Creator, you have the emotion of .. the knowledge of the Universe is in your hand. And, I showed you, the system is already made to go in that way. The Universe is solid, is dimensional in motion, in respect to the point of the observer's Gravitational Magnetic field strength. As we see only what is in that position. It's very simple if you don't understand.

(2:04) An atom is made of electrons and protons. Electrons and protons are all plasma and in dynamic condition, they are not solid state and locked. So, this is why they can connect, they can link up, they can make molecules, they can make atoms, they can make everything else solid and life. Man has not managed to master use of the fields and not vibration of the matter. Then you understand how advanced this technology which we are bringing out is, because it has to be understood. Any other question? Q: ... If I see the horizon of the Sun means I have changed my position and place as the creator of the Universe? I am become the Universe and my Soul is the Sun now? K- No, you just stand somewhere outside the Solar System and watching the Sun. Or you're on the Sun itself and you watch the horizon in respect to its center. The interaction of the fields of the Earth blinds Man to see a lot outside the Earth's atmosphere.

(2:06) And Earth is a very weak creator of Magnetic Gravitational fields. The interaction of the field of the Solar System with this spacing, Galaxy creates a

deeper filter. Again, cuts off certain fields that we don't see beyond. Then, it's the same with the Galaxy in respect to the Universe. We are aware of the horizon and the point of where we are. That's what affect us. That's where we measure from our point of existence. Man has never seen the horizon of the Sun, because he always considers Sun is the Sun and everything is ?? it. But the Sun itself has a horizon in respect to its Galaxy. Q: ... Is there a factor or formula to calculate the Solar horizon or the Universal horizon or the Unicos horizon? K- Yes, there is a very direct way you can do. We teach in the future, yes. Part of development of the Time systems is that,

(2:08) to be able to create a horizons, or the time factor of the horizon. Yes. Q: ... Is the center of the Black Hole zero time? K- Not really, no. Because that Black Hole you see exists, because it's amongst other fields, so it cannot be zero. Very recently, past few days, they have released a double Black Holes interaction. And there's a lot of rubbish written about it, if you are in that kind of knowledge. And they try to show the interaction of two Black Holes upon each other. And then you still see the Universe still exists, doesn't matter how they try to elaborate on the existence or ?? collision of interaction of two Black Holes. Time exists irrespective of central position, in so many ways. But then it comes to the point of the Creator and the Creation, when you reach to that point time does not exist, it's zero time. But still you have the interaction of the fields. The biggest question

for Man will be, one day it has to be answered. And we answer it before our day is over. Where did the original fields come from which led to the creation of Unicos?

(2:10) How the Unicos was made? That is interaction lead to creation of Universe as Galaxies and the planetary system and the Man. It's in the book you read, the origin of magnetic field. Man is not ready to listen to it, doesn't have the knowledge. Why? Why do we have magnetic fields? Why do we have Cosmic Rays? Why? And why one travels in opposite direction to the other? What made it to be created this way? What is the mystery about the Creation? Before I leave this body I will fully teach you to understand. As you become, your Soul becomes the passenger of the Universe, needs to know to choose his Place, Possession and Position. Any other question? Q: ... Should we have activated 12 stranded DNA when time traveling, or does it not matter?

(2:12) K- Doesn't matter. DNA is the dimension of physicality. Q: ... Good morning, are all Souls born in same time? K- No. R: Are Souls, do Souls, are they born and die? K- ?? They ?? don't. Those are collections of interaction of the fields. I create, I bring some of my fields, you bring some of your fields, we create an interaction of new plasma and then it creates the physicality of the Man. Of course not. It's like the, I don't know if you heard, there is a rubbish on the world of science about the woman, they say, "A woman at the point of birth carries all the eggs, which

is .. she is ever going to produce in her ovaries." It makes me laugh, but they believe in it, world of science, or world of medicine believes in that. What has made us to believe in that? So a woman is born with 600 eggs already in the sac, but where did it come from to be 600? Why do we need 600 of them? That's considering woman will be fertile for, let's say, 50 years.

(2:14) Any other question? Q: ... How can someone in the near future earn Keshe Coins to pay for his energy, food, water, medicine, since he or she is living in a remote place, very poor people financially speaking? How can a young children earn Keshe Coins for themselves if they want to, other than throwing their parents money in the future? K- The Keshe Coins which we will release are not in the form of the present Keshe Coins, which (you) are used to. The Coins we release will be very much in a plasmatic condition, which means it reaches to who needs it, will reach it. You don't need to pay for it. But there's a system set up for it. What this means is, I have put it so far in front of your, as we say in English, 'your face,' that you don't see it. Our job is not to sell technology.

(2:16) The whole purpose of the Keshe Foundation is not to develop technologies. The whole purpose of the Keshe Foundation was understood by a very old woman in Shenzhen. When I saw it, that's what she understood, she knew what she was doing and what she said about it. If you remember years ago the Chinese in Shenzhen used to throw buckets of Gans

every Sunday, or every day, in the rivers or in the ocean. The purpose of the teaching and the way we're going about it is to change, or to bring about for man to develop, to understand, and to nourish the system. That what has been short fallen by the structure of this planet, to be fulfilled. That's all it is. Which means whatever we could not get from the Earth, that it brought us to kill, to destroy, is the responsibility of us to understand the cause of it, the reasons of it, and with the technology developed to satisfy it. That man does not kill. It doesn't come in by selling gold or by selling technology. The enlightenment brings the Man's Soul education to a level that will not repeat this in another planet. This is why we are doing it. We are teaching the physicality for the Soul to be educated, for the time when the Soul finds a position will not do the same. But to do that we have to change the ground, we have to change the environment. So, we take the responsibility to bring as a knowledge, in a way to change the structure of the DNA of the Man, (2:18) if you understand it, to get, to create access to everything the Soul, the Man needs to feed the physicality of the Man that we cover that 20%. There is no need to pay for the love of the Creator. When your child make a mistake, do you punish it? Or you see it as, "My fault, I should have taught him not to do, so I teach him not to do." So, this is the purpose, this is the reason. We are not here to make gold, we are not here to... But we have to make the Man to understand and go through all these battles of it, for

Man to understand the time has come that we feed the Man does not matter in the jungle, in a cave, dog, a cat, that, what is short fallen by the planet's structure is fulfilled by the knowledge and the creation of the fields to feed the Man, to change the DNA of the Man, to change the structure of the emotion which affects the STM in his new Place, Possession and Position. So, the Coins are just a way to get the thing done in a way that connects. One Coin is enough to feed the whole of breathing creatures on this planet, let alone the Universe. But we have to change the DNA. That's the reason. And soon we release Coins, which are in plasmatic condition, has no connection with the rest,

(2:20) but connects to the Soul of every being thing on this planet. We don't need Coins to be on the Cryptocurrency and the rest of. We play the game, but we are, we have a different target, different plan. If I can put it in a different way. It takes one Moon to lift and shift all the waters on this planet. It takes one Coin in the ?? phrase of a Coin to feed all the Man through the same process of understanding. There is no generator running on the Moon, except it's plasmatic Magnetic fields of it. So is for the Man on this planet with the knowledge we bring. We don't need Coins. It's just part of the game for Man to be attracted to understand and change the game himself for his existence. Any other question or shall we call it a day? Q: ... Will there be an announcement on a Markray license agreement soon with China? K- We

need time. We are taking our time, as advised by our legal team.

(2:22) R: Okay, I think we've covered pretty much what we need to cover here. Thank you Mr. Keshe. K- Let me explain to you something. The agreement with China is not the only agreement which we have, we achieved what we're doing. But we have to work within the frame and we have to correct a lot of things which was not done, or fully done, or incorrectly done in the past. And this is taking time, another two, three weeks, four weeks, whatever. We have to correct a lot of things, and there's been a lot of mismanagement in respect to a lot of operations which we just come to be aware of. And we have everything right, and our team of lawyers, our advisors, legal advisors, we have to listen to that we can correct these things. A number of people who were in that job abused the position of the Keshe Foundation and abused it extensively. And you don't see them around the Keshe Foundation, because we came .. aware of their misconduct and the rest of it. And in due course we'll let you know exactly what once we cleaned up their mess, which has been created, abuse of the Keshe Foundation, and other things which connected to us. We trusted, and we (were) betrayed in (our) trust, but it's our responsibility to correct everything. Thank you very much for being here today. Please register for the next session, those of you who join us. And if you have a means for joining and ?? then something new for next Friday session.

(2:24) It'll be very, very interesting, because you have the Captains, but we still control what happens to the captains, so you're not alone. Thank you very much for today, and hopefully we see you soon. R: ... this has been 591 KSW ... We have something from, speaking of the Universal Council, Lissy, who arranges most of the Universal Council presentations sent me this invitation. Let me show it and read it.

(2:26) It says... Not sure if I got it shared properly here. Yeah. It says, "The Universal Council invites the Keshe family and the Universal family in unifying at the Soul level every time and every day at 9pm Central European Summer Time. We, the Universal Council, give freely from our Soul to connect to the leaders of all nations, work as one Soul in one direction with Markray Corporation and Keshe Foundation to achieve peace through technology in exchange for peace as One Nation, One Planet, One Race."
