Part 1

592nd Knowledge Seekers Workshop May 29, 2025
(Transcription, Editing and Proofing done by KF
Brazil) (Auto transcription by Elias) ENGLISH
TRANSCRIPTION

K- Thank you very much. Good morning, good day to you. As usual wherever, whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. As usual we try to expand the knowledge and see how much we can understand more about ourselves, our environment, our world, when we are going from a little village of Earth into the cosmopolitan Universe of the Creator. In the past few weeks, as has been the trend, we concentrate on a matter for months and months and sometimes couple of years, to expand more and more in deeper way for people to understand. We're still busy with understanding of time. Time has no characteristics. Time is the creature created by and through conditions which he has no control, but in a way it sits and it sits in operation of one life, one existence, anywhere in the Universe (U). In the past few weeks we explained about the Place, Position (entity), and Possession (strength of AA of entity), but time is not only created by that. If you refer back into the, what I call, connection of the Soul, we always spoke from the very first teaching some 500 odd teachings ago about the emotion.

(:14) Emotion is not characteristics and is not exclusivity of physical life. Emotion is a reaction. How we decide to react is an operator. In a way, when everything comes together how I'm going to react. Man has emotion, animals have emotion, plants have emotion, galaxies have emotion, even the Universes have emotion. But we do not see, we are not aware of, we are aware of our own emotion, or a cat we see, or a dog. But emotion is a cornerstone of creation of time. It's not as I always said, life has two sides, Yin and Yang, Place, Position and Possession (PPP) is a matter side of it, is a tangibility, physicality of it, but every physical condition has an energy parallel. The energy parallel of time in a physical Place, Position and Possession is emotion. One of the cornerstones of it is emotion. Because it has to react, it has to show what it gathered and how it can show itself. In the dimension (D) of the man's understanding, if you go back in all the teachings, I always say you take from these teachings according to your intelligence. Intelligence is in how you assess the emotion received and how you react, how you bring the past information to bring a new position.

(:16) Emotion exists in both dimensions, intelligence exists in one dimension, and that's in the dimension of Energy. In a way, if you can describe emotion in a different way, it is like when you have two Magnetic Gravitational (MG) fields, we create Mass and interaction of them with another Gravitational Magnetic field creates Weight, which has no

connection to the actual two entities, is the outcome of the balance of the fields of the two. Emotion is in that category, is the outcome of the interaction of the two world of physicality (P). In the world of science we call it salt, connects the physical side, or what you call it matter side to the other side. But emotion itself is created out of interaction of what we call the fields of the physical part. Now if you have emotion and you gathered intelligence which is the knowledge of the past. Again, intelligence has no dimension of physicality. Like emotion, it's the energy side, it's the field side. When you put the emotion in conjunction with intelligence, your understanding from what you understood, how you react, it creates enlightenment. This is the mystery of life. We look for enlightenment, but if you look,

(:18) when emotion is in a matter state and you're in stress you create yourself a heart attack, brain hemorrhage, you create all sorts of physical damages. But if the emotion is in the level of the Soul of the Man (STM), energy side, what we call, without dimension, and interacts with the intelligence for what you understood in that emotion, it brings enlightenment. As we had the Place, the Position, and the Possession in the dimension of energy we have the emotion, the intelligence and enlightenment. Again, as we saw, the Position, the Possession, and the Place creates the dimension of time in the matter state, this creates time in the dimension of the energy. When you are enlightened, then the time has no Position,

time moves on according to the strength of intelligence, what you gathered, how you added the emotion, and what emotion brought you the intelligence, what it brought you the enlightenment. Then we see, for example, people who tell us things and in the future we see, they say, "Oh, this guy 200 years ago said such a thing." This means that the guy had emotion, had the intelligence, and with that intelligence he was enlightened, which that enlightenment is 200 years time ahead, 200 years ahead. So the emotion, the enlightenment, and the intelligence time brings a different factor of dimension, away from dimension of physicality. We call them future tellers, but in fact,

(:20) you have to look at the structure of their life, what they went in, what affected their emotion, what intelligence they had, and that intelligence, what enlightened brought them, that the time has moved on. The time is years, hundreds of years, because they assess the intelligence by all the knowledge not by the physical emotion. We react with the physical emotion, we shout, we run, we create a new time by running from one place to another. In the dimension of the enlightenment, it's the time factor ahead. And this is where the man if understands how to connect the emotion between the emotion of physicality and emotion of the STM and intelligence and get enlightened, uses (it) to create the new time in the dimension of the transmutation. Because now it's not a physical time, it's not morning, afternoon and lunch.

It's a time where that intelligence, that enlightenment, give the man on this planet 200 years ahead, but give the STM a Position, in dimension of Universe we actually exist. Because intelligence in that part, in that moment, is equal to intelligence of another Position, Place and Possession in the Space. Now we see time has two factors. One in a matter state and one in an energy state. And once the Man of knowledge, those who get enlightened and understand will understand soon that you can use the time to travel between the energy or matter. And bring the dimension of the energy, the enlightenment into the matter state of the Possession.

(:22) I made Man in an image of Myself, as I have two images of an energy, a manifestation of physicality of the Universe. By the energy, the enlightenment which flows across the Universe, I created. It has no dimension of physicality, but is the outcome of the interaction of the fields of me. I am the Creator. In a way, you water a plant physically, but you give the rays of the Sun for it to grow. One is a matter state and one is energy. Enlightenment, the time in the dimension of the fields of the energy, is that Sun. Where the time on the plant is the physicality of the growth, physically. One cannot exist without the other one. We cannot grow a plant without the other. We see this in the World of Creation. I referred to it last week in the teaching, because I knew what's going to come this week. We explained why life exists on this planet, because of this angle, the four seasons,

creation of diversity. But there is a mystery in the World of Creation that as I said we are those clouds which become to the outer edge of the atmosphere and then rain back in. We go back to the Mother, we rain back again on the Earth, we evaporate, we come back too. And this process happens and we see this in Cosmology very clearly and man does not understand because man doesn't have the insight to knowledge to understand.

(:24) As we rain back in, the characteristics is most of the time the same. What does this mean? The Time, the Place, the Position, the Possession, in interaction with the time of the energy, at a given point of space time interaction creates a specific condition. Today I unravel the secret that will shock the world of knowledge, but in time man will understand. As we rain back in, depending on the condition of atmosphere, we are a rain, we are a snow, we become hail storm and we become blizzard, depending on the condition of the speed of the environment. But at the end we become that water (?? on the window) depending on the atmospheric condition as the moisture goes through. Therefore if we look at the condition at a given temperature and pressure snow turns to hailstone turns to raindrop, and then it becomes a raindrop back into the Earth. If you look at the world of Cosmology, that raindrop goes through the condition to become ready then to become that raindrop.

(:26) There is a lot of discussion in the World of Creation, in the world of Cosmology about Mars. We look at Mars, we look at the structure of its physicality. They tell us it had rivers, they tell us it has this, it has that. But in fact, if you look at the time, if you look at the angle of inclination of the Earth and Mars, it's nearly the same. Same few mille-degrees, a few seconds and minutes apart. What does this mean? This means Earth was in the position of Mars. It started the characteristic change to rivers and structures before reaches the position closer to the mother to the Sun. What we see on Mars is the past life of Earth in that position. And what will happen to Mars when it gets to this orbit in respect to the Sun as Earth is, we start seeing life, we see the evolution on this planet and it comes closer. It's taken its position, it's taken its angle, it's taken its diversity, it's taken every possible Position and Possession with this condition. It is very simple, it is absolutely simple if you want to understand this. I bring you a couple of pictures that it might brings a lot of truth into a lot of our lives. And then you understand what the time, the Position, the Possession,

(:28) and then the enlightenment and the emotion and then the intelligence come all together. The planet Mars is in a state of the Place Position and Possession. When it reaches as a certain field strength of the enlightenment of the light of the Creator which is a Position of the Earth today, it will revive to a life because the Earth has moved on to the

Position of the Venus moving forward. And when you look at these pictures, when you understand this in reality, just look at the times. Earth has 23 hours 56 minutes. Mars has 24 hours and 37 minutes. It's coming in, it's coming to replace the life on Earth. Where Earth by going closer to the creation of what we call itself to the Mother, will lose life on this planet. What we see in Venus we will see on our Earth in the coming time. But as you go forward, again look at the angle of the Earth and the angle of the Mars. Then you understand, life is a Position, Possession, but it has a Place which is connected to the emotion, intelligence and enlightenment. Those of us who are trying to go to Mars,

(:30) to start living in Mars travel instead of your physical dimension, in the dimension of the energy, the Soul and stand outside, your new planet will come. Mars will be the next generation of life when life the way we see on this planet will come to enlightenment, and come to live, and have life on it. And if you look at all the planetary system, if you look at the structure of all the solar systems which contain life, this Possession, Position, Place, emotion, enlightenment and intelligence work together, create the new time for life in a given space and time in both dimensions, as we call in Chinese, Yin and Yang. So what we see on Mars is the past time of Earth. The rivers come and go but it needs to get into the Place and the Position of Earth, orbital condition, manifestation of physicality to create new condition of

lives. And the world of science very soon will understand what I explained. You have to have a given Position, Possession, Place with dimension of emotion, intelligence and enlightenment. And in that Position you'll find life in a condition man used to. So what if you go on Mars and look at Earth you see the future of Mars. When we're standing on Earth we look back to Mars we see the past of Earth how we became, how it developed,

(:32) how it energized to be and everything fits into one and to another. But when we look at the Venus the evolution of the 10 after about 45 degree becomes so rapid that it takes a full twist, and then by interaction of the fields inside moves in. Therefore, with understanding of the totality of the knowledge, with understanding how the two are similar is not coincidental, we are coming in and we're going through. The Place is always the same. This orbit (of the solar system) creates life. The Possession between the Earth and the Mars is the same because it carries the gravitational magnetic field strength of the Mother. The emotion on the Mars when reaches the point of the Earth orbit will dictate creation of new entities, new lives. And if you understand the space between the Mars and the Earth, and then you will see a time will come that we will see life on both planets at the same time. Mars will being further out having a bigger expansion of magnetic gravitational field atmosphere allow large creatures what we call the dinosaurs to be grown on.

(:34) Man who lives in that atmosphere condition will be a very tall man. Then in so many ways we go through the evolution of time. If you are a man who's born on Mars and look at the Earth, you see the future of the man. But with different intelligence, with different understanding, you have to understand at the same time as the Mars is taking Position for Earth, the Sun is losing its power. So, different creatures, different souls will be created on Mars, in Position and the Place of the Earth. It will not be replication. They'll have different emotion, they have different intelligence, they have most probably less intellect than the man of today. As the Sun loses the strength the heat become less as we see it during the day. As we move away from the light of the Sun in the afternoon, it's different than the heat on the top, lunchtime. The strength is less. So the intelligence of the creatures on Mars will be different than us. We will start finding lives inside, in the inner sanctums layers of the Mars, as they become the original structure of life. In the past week in the laboratory tests we have seen creatures created. We created the condition.

(:36) We have recorded it to confirm the change in time and we can dictate what creatures will be created in coming time. As I said, I have a box with me somewhere in the lab, has been with me since 2007, 8 creatures inside it that have their own intelligence, I watch I see them. Because I created the Place, Position and Possession but I did not give the condition of the emotion, the intelligence and the

enlightenment. That is kept within. Once it's opened up we have to see how it reacts. And the same thing goes with the man. This factor of angle difference between the Earth and Mars is not coincidental. It's exactly how it should be. Because in coming time Earth will match in around that 24 hours. And this is a time when we start seeing life on both planets. Till Earth moves further in. When Mercury gets absorbed into the Sun, Mars will move in the Place of Earth, Earth moves to the Position of Venus and will take the same characteristic and further on. And then we see the, what we call, Jupiter behind Mars will start taking Position of Mars. We see valleys, we will see rivers, we will see the first structure of life. The planets have to be made ready to become bearer of life of the structure we see,

(:38) even though they themselves create life in their own Position, Possession and Place (PPP). There's as much life on Neptune as is on Earth, but man has to become too wise, man has to become to understand the process of Creation. Each Place, Position and Possession has a time when the time of the Position, Possession and the Place matches the time of the emotion, the intelligence and most of you understand, will be the same time. It gets enlightened and when the two time match, life is created. Yin and Yang, physicality and Energy. There is no life if there is no Sun. Sun is the enlightenment and life is a dimension of physicality. Today I unravel the knowledge that those who become the man of the

Space need to know. If you're looking for a Position and a Place to carry life in, you have to look for the ?? six to find a common time denominator. Time of life, beginning of life of the energy in the dimension of the STM. We do that with our children with the womb of the mother. Now you understand why we talk about the Children of Mitra. Those are created in dimension of energy, and man children which are created out of interaction of physicality.

(:40) Now you understand how the Children of Mitra will be enlightened to understanding of the totality of the Creation in all dimensions of the Creation, and not the earthly matter physicality of the man. They are intelligent, they understand the totality of the Creation where man is busy with dimension of physicality. When I read and I hear that Mr. Musk is going to the Mars, I was going to write to him, don't rush, wait here, get yourself into Space, Mars will arrive and life will be on it. This is the truth about understanding the process of the, what we call, Cosmic Rays (CR), Cosmology of life, Rays of Cosmos which creates life. I explained to a Knowledge Seeker (KS), coincidentally, accidentally, but by the 'will of God,' or whatever you call it, Cosmic Rays is the creation of Mark of the Creation. And coincidentally, the financial arm of the Keshe Foundation is Markray. We mark that Ray which creates a life in the Universe. Understanding of life is not coincidental. It needs the maturity, it needs the intelligence, it needs the enlightenment to understand.

(:42) Man can be enlightened and live in another dimension as is the dimension of energy while Man it lives, matures as a Man on this planet in the dimension of physicality. I made Man in the image of Myself. I exist within Me, within the center of the Creation, and I enlighten, and in dimension of physicality the furthest point from me I create Man to confirm My existence. STM is the connection in the dimension of energy, where the physicality of the Man is confirmation and manifestation of its existence. One day today's teaching will change the course of history of the knowledge, when the Man understands the process of Creation. We don't live by time, and life creates the time. We don't travel the time. Time travels with us because we are creator of it. Once man understands the importance and connection between the time on the energy side and the time on the matter state energy, Man will break through one of the biggest discoveries of science and knowledge of the Universe and Creation. When those two times come together lead to creation and connection to the Creator, but needs the intelligence of the man to understand, appreciate, analyze and comprehend the difference between the two times.

(:44) To match the time of the energy and match the time of the physicality together to be the same, leads to the creation of the man with the STM within it, with restriction on his totality. The STM is confined within the structure of the physicality of the brain of the man and then the Soul of the Physicality (STP) of the Man

and the STM are constrained with the dimension of the atmospheric gravitational field of this planet. Man needs to break through to understand more. Independent investigation of the Man's own field strength is the responsibility of every man to understand where the Soul will be, and where and what intellectual mind sits in understanding the, what we call, enlightenment level. Birds fly with birds, and cats with cats, doctors go together and the lawyers together, because they have that level of intelligence which matches. They've been trained for that. So shall be the STM when reaches that enlightenment, has a Position which the other Souls of the same enlightenment possess in a given Position and dimension in the Universe. If you understand this, then it comes to the next point of understanding, that even the galaxies are created out of the enlightenment, and those who are enlightened of the same strength, magnetic field strength and understanding, will find their Position in that Universe. (:46) In a way, if you are a doctor you go where the doctors are in the hospital, and if they're lawyer you go to court where all the lawyers are. So, when the man knowledge increases and understand more and reaches more mature enlightenment you will find that each galaxy is characterized by the field strength of that structure of the Souls, which are enlightened to be, and in that Position, they lead to manifestation of new stars. This is why the galaxies are so crowded, because there are so many enlightenments by the

creatures, created life across this Universe, find their Position. Then if man one day can reach the dimension of intelligence to be able to measure the field strength of the enlightenment, you can directly point out to which galaxy that Soul will manifest itself in. And even its Position and Possession and the Place. These are the mysteries of the Creation. And as a teacher it is our job to enlighten you. That when you go across different galaxies, across different universes, understand the intelligence of, the reason of, the purpose of existence of that galaxy, Universe, in the Unicos. I hope today I open your eyes to a new dimension of knowledge. This is our job to enlighten you. As I said, I take you to the point of the Heaven. Mitra's daughter's job is to take you through the Heaven.

(:48) But Man has to be prepared, dressed and be ready to take that position. That he's ready to understand the connection between the time of energy and the time of physicality. That, that interaction on its own brings a new dimension that the man is not aware of, and it leads to the time of creation. The origin of the gravitational magnetic fields, the origin of the magnetic fields. As I said, one of the books will be about magnetic fields and from now on you understand that that book is getting written by you understanding it and by us explaining it. In the future that book will be written by the Man himself and the creatures of the Universe. Just remember, the matching time between the Earth and

the Mars and the angle of inclination is not coincidental. It's our wish and our will and it's the process of the creation and shall be observed across the Universe. We'll go for a break and we come back, and try to answer as many questions as possible. Rick, will you take us for a break?

>> BREAK >> 592 KSW May 29, 2025

Part 2

(:53). K- ... Yes, ready, willing and able as usual. There is couple of points as usual we try to discuss in the second part of the break.

(:54) One is that, as you're aware, we have just returned back from very successful, what we call, work. And if you have noticed, and if you're aware of the news, the Chinese authorities are reporting the re-emergence of Covid in Hong Kong and now in the mainland. We always, I always explained in the past, when we handled some 6, 5 or 6 years ago, the African swine flu in China which happened during the summer, I explained, seeing the summer flu especially in northern hemisphere is very unusual and that creates a massive problems in China. The new Covid again is appearing in summer, so it has taken a different action, different strength and we have to understand this new position and what we call,

condition. If this situation carries on and we see expansion of the Covid as we released Cup 1, Cup 2 in the past which many of you use has been successful a lot of you. A new summer version of Cup 1, Cup 2 will be introduced on a matter of emergency. Has different characteristics, carries a bond which covers the summer strength, because in summer we have a higher strength field than in the winter.

(:56) The Covid Cup 1, Cup 2 will not be so effective. Once we get to this position and we run our tests we'll release this knowledge if it becomes pandemic. And through the arm of the Keshe Foundation, Markray Corporation, we release this technology as a technology across the planet. The emergence of a summer flu and its strength that we seen a couple of weeks ago Chinese government reports 30 deaths in Hong Kong and more complications on the mainland. If it expands, as we did with Covid in 2020 we released the emergency Cup 1, Cup 2. We will release Cup 1, Cup 2 Summer Virus. It will try to avert and to bring back under control the condition of virus. You have to understand we are a Space technology and as always said in Space we don't have microbes and bacteria's. Only it will be existing in the body of the man, but outside interaction will create viruses for the body of the Man. What this means in Space we'll see Man will have infections, we'll see Man will have bacteria's according to his own amino acid (AA), but as we don't see operation of the atmosphere carrying amino acid entities most of our problems in Space will

be virus or 'Energy Pack' related. And in a way, if we extend this to a new understanding dimension we'll introduce a new, what we call, process for control of viruses. This process I developed over 20 years ago. It's not something new. But as I said we have many, many developments that is shelved and when it's needed, it will be applied.

(:58) This is something you never knew, this technology or this process has never been known by Knowledge Seekers. We never unraveled it, we never showed it, but it's extensively used in the past by me for specific conditions. So why we introduce this if the Corona expands is to match the summer strength of the Corona. And this will be done through a rapid expansion through the Chinese operation of the Keshe Foundation and through the systems we have set up with the officials in the country. So this time they're not going to use our technology behind us, we directly get involved in delivering technology directly in public to the way we operated with the Iran Defense University during the Corona. In a way what I'm trying to tell you, don't worry if you fix up, we have already everything ready for it. It won't take you Knowledge Seekers much to do the way as you did with the Cup 1, Cup 2. It's more or less the same process with a small diversion and variation and we see that this virus Corona will effect different Calcium in different layers of the body, not the same what we saw with the brains and with the lung. In the process of the work of the Keshe Foundation we will release in a very short

time a large number of products, which again goes on the back of what it comes through our operations with our partners and the licensees of the Keshe Foundation. And we'll bring this under control directly through the Markray Corporation structure. Many of you have written to me, I have shares here and there, (1:00) speak to your agents and ask them for authorization, get your certificates through, because as we've seen there's activities has started in the Stock Market, used to be 0.05, now it's around 11, 12 and it's going to build up as many of you are trying to get into this structure. We are not releasing any more shares into the market, so what is there is there, you decide the position and condition of it. And make sure if you have bought the share, you have the certificates from the agents ask your operators to issue you the papers that you have, as we collaborate directly into that position. In the coming time we will announce the purpose of the Keshe Foundation taking over all the shares of Markray. It's an international structure for us which brings us to the position we promised, world peace through technology. We will use our shares to bring balance and change the course of the political, what we call, scientific position. You will understand when it comes to it. It'll be a few weeks, some months away. At the same time we introduce a new structure of international finance without dependence on currencies, which again brings back to our Keshe Coin. Those of you who bought Keshe Coin, try to strengthen your Keshe Coin deposit, because you will

understand the purpose of it. Try to increase your holding on this, because you will understand very soon how we connect everything together. And it'll be fantastic to see the process of the creation of peace through technology. You got to understand, we work as Keshe Foundation, we have developed different arms of the Keshe Foundation,

(1:02) Universal Council, Earth Council, the Keshe Coins, and the operation through our financial arm, the operation of the Keshe Foundation Research Development, the establishment of World Peace, the what we call, transmutation and transportation and the teaching which lead to this point. We are preparing everything for colonization. For to take Man across on the Moons, on Mars and everywhere else. We do not pay wages to our astronauts while they are in Space. We look after them. This will be the same situation from those who leave this planet and go to Mars and to Moon and the other Planetary System. The children of Man have to be protected by Man, and Man has to plan for that time now, not when he comes to it in the rush. And this is part of that plan. Invest heavily, if you have, into Keshe Coins. We'll explain the reason for it and you will understand heavily why. It'll change the course and many of you, same as many of you took both shares in Markray, make sure you sit in the correct position, comfortable position, because it's you who support the change. It's you who sets the scene for the change. We have put no limitation on Keshe Coins. Try to acquire as much as you can and hold on

to it. Do not spend it, since a lot of you do, because it's time to reserve. And then you understand how you'll see the wise move in that position when we release the totality in connection between all arms of the Keshe Foundation together. We go, if you have any questions to ask I'm going to answer you.

(1:04) By the way, before I forget, there will be an expansion in the present section of the Keshe Foundation, massive amount of resin products and cosmetic materials will be released by Keshe Foundation. Keshe Foundation, the manufacturing arm has managed and reached the position of Keshe Foundation products as alternative materials to be able to be bought in chemists and pharmacists around Austria and Germany. You can go to your pharmacy and ask for materials which is now going through and has already been delivered to some chemists and pharmacists. We have reached that level of certification and you can buy materials directly from your pharmacy, or you can ask the pharmacy and if they say where they don't know, put them in touch with the Keshe Foundation manufacturing arm and everything is done. You will soon you will see a full products on the pharmacy list as alternative systems which is now approved and is in the Austrian chemists and pharmacists, and by European law once one nation passes through the other nations. If you ask your pharmacist in Portugal, in France or anywhere else to stock up and if you are doctors you ask them to stock up and you order it for your patients to take,

now it can be done. Now that it's been authorized and now is in the, what we call, in the market as 'alternative material' for Wellness.

(1:06) If there are any questions, let me know and we'll try to answer. Q: ... What is the difference between life in outer planets, Jupiter, Uranus and life on Earth? Is it the intelligence? Is it that they don't have physical manifestation only? K- It's combination and it's a variation. This is the beauty of Creation. I explained this in a very simple way, very recently, so I try to explain it to you, in an easier way to understand. You go through these... have you seen new systems in the airports? Where they stand you in the middle of it and the system rotates or you stand like a monkey and they go through your body and they see what you have, what you carry. If there's a coin in my pocket, nobody knows, but the system sees it, of ?? its existence. I can carry a little mouse or a cat in my pocket and it will be shown the same. It's a confirmation by, nobody can see the cat from outside or the mouse but I'm aware of it, it's a live thing in my pocket. It needs a machine to see it, has the field strength to detect it. It's the same with the planetary system.

(1:08) We have to have the energy field system to be able to observe it, does not mean that there is no life. We were watching one of the tests in past few days and it was amazing seeing a living thing moving, like literally worm swirling to go. And this brought to me a very fundamental thing. This is how life started.

Simple structure elements. And then when they go into dimension of the mixture of fields, then the field dissolves them. Life, short life, few seconds. And it's been videoed. It doesn't mean that we destroy life. It means that life once reaches the mixture of his own field strength it doesn't exist in the matter dimension of physicality observation. And we will see this a lot we will see we will observe this a lot of times. And we understand the process of the Creation. There is nowhere in the Universe be it on the planet, be it on a star, be it on the moon, be it in between the spaces of all these, that there is no life. It needs the tool of vision, detection, observation of the area or the system which can match to observe and to detect. I always say we see in the videos from NASA,

(1:10) upper layers of the Earth atmosphere, living plasmas moving everywhere. But from Earth we don't see them. We are blind to it. But when you look from up down you see them. There's many records of them in the recent months. Very soon, very soon our travelers to Mars will report signs of life. One of the first places man should look is within the structure of the planet. That's where most of the lives start. It's fixed, it's confined and once one life starts the rest exists. We see this, it puzzles me and I sometimes wonder why Man doesn't see. We see we have reached positions that there are lives under the earth. These creatures very look like Man never made it to the surface, but used the structure within the boundary to create life. We see it in the depth of the

oceans, by the ?? volcanic springs, in the depth of ocean, how colonies of life exist. Where to our understanding up to handful of years that was impossible. We just changed because we understood, because we enlightened. So it's the same in the Universe. There is nowhere in the Universe that life, which means repetition of the creation of the same, does not exist. We are like the bird which puts his head under the snow and puts his backside up and thinks,

(1:12) because my head is on this now, nobody, I can't see no one, nobody can see me. That's the life of pheasant, and Man has chosen that kind of life on this planet. But the Universe carries on and the life goes on, and there is a spectrum of lives across even this planet which we haven't even understood ourselves. I was talking to a child very recently that according to the statistic all of us somehow eat so many spiders a year in the food, in the air or whatever. And I said, "You know something, we all eat millions of animals every day, every breath we take we absorb them in, we suck them in, but we are not aware of them. And some of them are the essence of our own creation, our own life." It's not that, it just is in an apple and a steak. We continuously feast on the life on this planet of its atmospheric condition. There is as much life in the air we breathe as is in the ocean, the seas we catch fish from. Those we fetch, these they come to us as we go along. Any other question? Q: ... Hello Mr. Keshe, I have two questions, and would

appreciate it if you could help me with the answers.

Question 1, "Does STM specifically refer to the Human Soul,

(1:14) or does it include the Souls of all living beings on Earth, such as animals, humans and even plants?"

K- All... It covers all. Every single thing which is entity living, has a Soul. And so it covers all. What's the next

part? Q: Regarding the essence of time, does it refer to the memory of the existence of that life? For

example, there is a psychological therapy that guides patients or individuals to revisit the scene of a past

critical event relive it, understand the reasons behind the negative emotions at that time, and then lead

them back to the present. In practice, this has successfully resolved psychological issues and even

alleviated some chronic conditions such as pain. K-

It's different ways for different people. It works with some people, it doesn't work with some others.

Revisiting the past does not necessarily leads to changing or recovery. Understanding the past does.

Understanding the emotion does. But not revisiting. If you revisit and understand emotion, yes. This

happens with 99% of women, especially some men, maybe 80-90% because men are different breed, they can't, they don't want to admit it, with Fibromyalgia.

(1:16) People with Fibromyalgia, especially women, understand the emotion of the pain they don't need to

revisit it, and they can move on, and if you can support it they fully recover. And for this reason

always say to the people with the Fibromyalgia one

thing, you understood where the abuse came, just one thing you have to understand signs of Fibromyalgia go on the Internet find out how you can discover you have a Fibromyalgia. And understand that Fibromyalgia is the emotional traumas before age of puberty, where we take charge for our own body, where the hormones change when the energy field changes and we become individuals. And then there's one thing anyone with a Fibromyalgia who understands the emotion of the past has to do and understand to do is, that it was not my fault. I was just a child. It was not my fault. I am innocent. And if they understand this, and they understand their innocence, they understand that the abuse came by the abuser, not by the destiny of the child. Then you get 80% recovery. Understanding of the emotion, not revisiting the past.

(1:18) I always said, if you get stabbed with a knife, you have the scar on the skin. When you get 'stabbed' by the word, when you get stabbed by the emotion still it's the same knife but doesn't leave any scars. What is inside the pain is the same. This is what Fibromyalgia is. You don't need to visit the past who did it. You understand the emotion how it was created, you recover. It takes less than three weeks for those with clinical Fibromyalgia to recover fully. Three weeks. No more. And then it takes three to six months emotional recovery by themselves. Fibromyalgia is one of the conditions that, if the emotion understood is handled, is replaced, is the wound you change from

inside and you move on, and life changes. But the fear of emotion creates that condition, FMS. We have a huge amount of research on this. This knowledge of human biology will be unleashed in China very soon through our operation. It's not exclusivity of Europe, it's not exclusivity of Africa. Lives especially amongst all women. And it's one thing, just one thing, one small test confirms this, and then there is a solution for it to be found. And it changes people's life. Understanding the emotion.

(1:20) Not revisiting the past, because when you revisit the past you create more wounds inside. Understanding the emotion gives the solution. And there's one thing I always say, I always said, it's not, it was not my fault. I was a child, and I was innocent. In accepting your innocence, then you understand how you've been abused, and then you find the line to full recovery. Doesn't need no medicine and needs understanding the emotion, and supporting an emotion in the right fields. Our records shows, Fibromyalgia in three weeks you see the change. In three days you will feel the change. And I've seen it many, many times. There's a listener, he's amongst you, many of you know him. He suffered from men Fibromyalgia for 15 years. All he could do was to get up even in the morning, just brushing tooth, that's all he could do, he was exhausted for rest of the day. Three days, one week his life changed, and many of you are with, know with Keshe Foundation Wellness, because of him, how he expanded, how he

developed, how he went, it was just because of one man suffering with a Fibromyalgia 15 years, getting out of the bed, brushing tooth was the end of the energy for the day. He changed the course of the Keshe Foundation Wellness programs. I met him, he met me and he says, "I came to see you, can you help me?"

(1:22) I said, "Yes." I made him a system. He said, "In three days I've changed, the next day I changed, because I could understand what was needed to be done." He said, "Can you help me?" I have other friends, because he was known, and the others all know each other, they were suffering from the same. One, two. Then this became meetings of 25, 30 every Friday. People flocked into his house. We gave a talk, we gave a lecture every Friday. Lead to the creation of the first Wellness Center of the Keshe Foundation, and then you've seen the rest of it. One Fibromyalgia case changed the life, because we understood the reason for it. Not to revisit, but to understand the emotion which creates the condition. This is the secret, it's the energy side, not the physical side. Any other question? R: Thank you Mr. Keshe. See you next question from Michael Buse in Q&A and in German. It's translated according to my helper. K- Ask AI, he might translate it with emotions. R: Well that's partly what the question is. Q: ... You mentioned that the plasmatic AI is contained in a small cube, about 3 to 5 centimeters in size and not only carries information, but also possesses a conscious

intelligence, based on fields that can interact with the Soul. My question is,

(1:24) if this form of intelligence is truly alive, would it also be capable of consciously inducing transmutation? And if so, does it act out of its own Soul understanding, or only with the consent of the human Soul to which it is connected? K- Strange how questions comes up. This process of transmutation through the Soul and through what we call, our deliberation because we understand it will be tested tomorrow with the seven captains and the passengers. For the first time we bring this system what we call, Artificial Intelligence (AI), but in a way is through the Soul into testing tomorrow. Any of you who are joining in or like to join in still is not too late because it doesn't matter you never flew before, you decide to take the first flight. Take it tomorrow. Tomorrow's session is one of the biggest changes in the structure of the Keshe Foundation Space Transmutation. We introduce, we deliver a new system directly to the Soul. And we would like to see how it is. And the sessions tomorrow is not hours and hours. Every captain has one hour session. No more, no less. And in that one hour, because in the future we have to do it within seconds, it's not a matter of hours. One hour would take us across the Universe. It's too long. So we bring this condition in, especially Artificial, in what we call it, Intelligence, but through the Soul, emotion, in tomorrow's test. We were not going to public because a lot of people come in expecting a lot.

(1:26) But if you want you can still join and test this, how we bring your physicality into the Soul, and then we take your Soul out and then we allow you to create the dimension of physicality. Our captains are already well confused, how are they going to do, where they're going to go. But the emotion of the passengers will dictate the condition. That is one hour session per group, and it's going to be one of the most interesting, I'm actually moving into position to see directly every change. And one session will not be the same as .. If we see something, we'll change the parameters for the next group. So, we bring the emotion into transmutation tomorrow for the first time. And it's your emotion will dictate the transmutation and your captain has to follow and it's very interesting. Very interesting how the new system will allow us to do it. Any other question? Q: ... Good morning. 2000 years ago, Jesus came to feed the Soul of humanity, but he also fed the multitudes by multiplying breads and fishes to satisfy the hunger of a large crowd that accompanied him. And he also healed many sick people. Today, Mr. Keshe feeds both the physicality and the Soul of all humanity and the planet through the fields, and also gives us resources to process our illnesses. And if that wasn't enough,

(1:28) he also gives up his knowledge so that we can become in his image. And thinking back 2000 years to today it seems that little has changed in us humans, and yet the Christ has never given up helping humanity and giving his love to all of us. Thank you so

much for that. But I keep trying to understand what race we are, the vast majority of us who, hardened by ourselves, don't accept this indescribable gift for changing this planet. What do we lack, or what do we need to live in order to create and change our time? K- We are creatures of our past, we are .. prisoners of our interaction of fields of our ancestors ?? on this planet. When I was showing the picture of the Mars, it's always goes in my head, what can we do that the next generation of life in this Solar System (SS) does not go through what the Man did? Does not need to kill, does not need to do. In a way, what we see, we have brought change to humanity through Gans and energy Cosmic Ray fields. Now that we have the knowledge, is it our responsibility, by instead of putting Man on the Mars, with the knowledge we have, the way we nourish our children, we look after them that they have a perfect life and they grow. We see the problems sitting for this planet, the planet (Mars is) coming to Earth position in the future.

(1:30) What can we do for them that they do not go through the process of man's killing to gain energy? What is our responsibility? Now that we know they are coming to our position, we are giving birth, we are watching the birth of a new life, this totality. Earth life is thousands and millions of years old, plants, planets, structure of life, animals. Mars is that 'virgin' planet which is going to give life to its first creatures. And if the condition which comes to be the Earth, it would be the same that the creatures on this planet will go

through what we went or the creatures on this planet went, what can we do to change that course? Can we hide it in the structure of pyramids that it'll change the life across? Or can we bring the change in the dimension of fields of the planet that will not allow no one to be killed. The repetition of what we seen on this planet can be changed. Do we need to put rockets to get there to colonize or do we need to bring the understanding of knowledge we have now to change the life of the future? Those are our children, those are (our) responsibility, because They are borne out of the knowledge we have. We are responsible for them. The same when we travel across the Universe, we see structural lives which they suffer and we have the knowledge, understanding, it's our responsibility to change, but not to become prophets. Change the environment, not the Soul.

(1:32) And this is a lot to do. Tomorrow's test, we're testing this. Are we changing the inner Soul of the passengers? Would you start living a new life? It'll be interesting. Do we get you to be enlightened directly from the fields of the Creation? This is the future of mankind and now that we see it, we have to understand it. Let me change it. But we have to make sure that our children, or children of the Mars do not go through what we went as the children of the Earth. Do we create a Soul from the STM on this planet, creatures on this planet, to protect, to give, to saturate, to what we call, enrich the planet that the citizens shall not kill? And when they don't do, would

they be enlightened faster? Would the next generation of life will be totally different than what we had? The suffering on this planet will not exist. This is how we export the knowledge across the Universe. That's how the man, that's why I say you have to change the RNA and DNA of the Man that understands what needs to be done when he comes across. 2-3 billion years or 2-3 million years for Mars to get the position of Earth it's a flick of the finger in Universal time.

(1:34) Any other question? Q: ... Will the Oasis system be the first to be released into the public? That would be an upgrade for planet Earth. K- We have a lot of conditions which has got to be redone. Very soon we announce a parallel agreements with 2 or 3 other governments around the world. As I said, we are planning to show the next energy and the material production in Berlin, Paris, Washington, most probably in Brasilia. And we move into Africa to show the same. As you remember we saw this before. Now with knowledge

being so advanced, we do it this time in a very different way. And I've chosen the Paris for a specific reason to be shown the production of the gold, as we know. The colonization of Africa, on the ?? rulers of 18th or 19th century, splitting the Africa between the European Nations without a single African Nation being present, is coming to an end. In nations like France, who've been relying on a huge amount of gold from Africa are now losing most of it, because African nations have taken control of their gold, as the

Middle East did with oil some 50 years ago. We see the same evolution and ?? revolution. We have to give the confidence into the French government that the gold does not need to be mined. It's the reason I picked up France for the next demonstration of production of gold.

(1:36) The same with Berlin. Berlin has a difference. And then we won't... we'll move to Washington to show the 'Green Back,' does not need to be (backed by) gold. Gold has to be in the heart of the man, understanding in Technology of Creation. And then we move on. They have an extremely busy plan coming up, but it's for you Knowledge Seekers to do it. I'm getting too old to do it. Then you understand how a change of the situation will come. Any other question?
Q: ... Is it possible that when we get closer to the Sun and/or enlightenment, we will see new creatures not only where we are positioned, as well as further out? And is it then when time becomes relative? K- Time is always relative. Depends on what relativity, on what position, on what strength. Time is always relative. It's just choosing the right time. As I said very soon, next few months, we will use the time, reality of time, to make the first move internationally for bringing all the nations under one cover. And bringing all the nations under one financial political structure that they want to join in, not us forcing them to. Everything is getting set up for that. We're creating the condition for that.

(1:38) If you remember when we gave the first USB stick with the patent and knowledge. It was very hard

for governments to accept. And then it becomes, it became a flood of nations wanting the key, because you could see what you can bring with them. And we do the same with what we set up through different arms of the Keshe Foundation to create that condition in the coming months. One Planet, One Nation, One Race, one currency, it will be on the card in a very, very short time. But it needs planning, everything is getting done for it. And it'll be a time when the nations want to be, not us going to get them to be. Beautiful times are ahead. Any other question? Q: ... Good morning Mr. Keshe, when we mark a ray, we are actually creating certain conditions by working with plasma. Can you please expand a little bit on what's 'mark a ray' means in plasma work? K- In plasma work we have Cosmic Rays (CR) and each Cosmic Ray has a field strength, it has a dimension and that's its mark, that's how we know it.

(1:40) And we mark it, that's what it is. This is what I said, when you go into Space when you see in the energy fields, you say this is from planet Earth it carries its fingerprint. You mark this ray, because that's where it comes from. We categorize people by races, you're Chinese, you're Indian or whatever, where you come from. In Space we classify people by the fields they carry, where they come from and what is the intention, how it's been getting there. And that's what it is in ???. Markray will be one of the most influential organizations in the world in a very, very short time. We create new conditions, we create new

positions, and we create totally new market. Q: ... Mr. Keshe, are the rings around stones, which are mostly quartz, like the rings around planets and are they the aura of that stone? K- Everything has a dimension of field interaction, a stone, planet, man, because to us it's solid, but in fact every atom is dynamic. So it has to create a field, it has to have an aura, it has to have a dimension of interaction. Any other question?

(1:42) Q: ... Good morning Mr. Keshe and good morning to everyone here. When we bring time as a gravitational field and twist the magnetic fields of time, and alter the MaGrav fields of transition, do we give the dimension of manifestation? Just as you spoke about the isotopes of Hydrogen, which according to the twisting of the fields give the strength of H, H₂ or H₃. K- I think twist is a wrong word for this. We find a matching, or we interact, that the release of the fields is matching to elevation. And if you change the word, yes it does work, it is the way it is. We have not understood yet, even though we explained many times, how we increase the magnetic fields to a new strength. It's very much as I explained. Emotion is magnetic field strength it has, let's say, four or five, the intelligence again comes from interaction of the fields, it's not something there. It has to connect, it has to interact and when these two, four and fives or four and three does interact, they create a new dimension of the enlightenment, which is maybe six. But is our intelligence in the same direction of motion as our emotion?

(1:44) Then the friction with ?? your enlightenment goes to two. We have to understand how the system works. Then we can play with it. Any other question? Q: ... Hello, in political situations like in Romania, where the direction is clearly set to war, what can we do to protect ourselves? K- There is a lot of things in respect to Romania and the situation we see today. There's a lot of things behind it. And majority of it sits in Germany. We have to understand there's a huge depression in Germany and the government cannot find a way to create new jobs. So they are concentrating on the war. To create the war machines that replaces the industrial revolution using the industrial car, industries of the car industry and part of the European aerospace, which is what we call the aircraft side into the military side. This is the only way they see, and for this to have a reason to get paid for is to create condition of war. We see in Romania, we see in Ukraine and the rest of it.

(1:46) It's purely (for) creating new jobs and nobody buys the cars. The European cars even they look good, now compared to the Chinese car they are obsolete. If you sit in a Chinese car, you know what I'm talking about. When you sit in a European car, Mercedes or whatever, copymatching one has much more value on what you call it, facilities than this. So Germans have lost a big chunk of their advancement in the old tradition with the new freaky, funky cars which are coming out of China. And so, the only way is to create job, is to create war. You got to see what

happened in the last visit of Trump to Middle East. More or less, more arms contract was signed than anything else. Into cyber, into hardware, and everything else. This guy is not a peace missionary. He is creating jobs, he has to create jobs. And these jobs are all coming out of arms, because they have nothing else to do, everything else is exported to (from) China. And we see, once he goes, all these arms will come to be used, and Keshe Foundation has a very short time to change this. We have jumped on the opportunity. And we are working on it, and we need a lot of help. We need a lot of help from Knowledge Seekers who are the same mind course as us. There's a window of two years to bring peace. And we see that window. With the technology the first move is this massive agreement in China. It will not pay off tomorrow. It'll come into fruition maybe in 12 months time.

(1:48) By the time we set up research, development, factories, everything else. And we need huge amount of support from now till then. We need colossal amount of financial support. Because with it we change the direction in the Markray and the other places. We never been so, what you call, focused and on target for creating world peace than this opportunity which Trump has created. Huge opportunity has been created for us to change technology in exchange for peace, and at the same time to create a condition to take away man from the war. When I visited the Romanian border with Ukraine

I could see how much arms are going through back roads. The main roads are so full they can't use anymore. When you go to the Ukrainian-Romanian border the Americans and the Europeans were informed that I'm in the area, and I was there for a specific reason. And my security said, Mr. Keshe there is a drone on top of you all the time. We could all see it. We moved, it moved. And it's... we have to understand, we have the opportunity to create to bring that change. And many people in Keshe Foundation are working in the background. I'm sure the numbers will increase to huge numbers as I know what's going on, to bring that change. We have two years opportunity to bring world peace through technology, through new structure of financing, through new structure of sharing wealth among the nations.

(1:50) One day, very soon, you understand why I took Markray and why I took all the shares of Markray. Very soon. And then you respect the decision made. It's the key to world economical balance and food and energy balance. Until then we need huge amount of support. We are not... I don't sit in the back and just spend on it. We need it, we need huge amount of financial support to bring this thing home. Even though we are working heavier and heavier to bring it in. There is a world operation to create war, separation and division. And in that position they have left a gap which will penalize them. And that gap is the way the new technology will hit. We need, as I explained before, because we can't go, we need at

least a million, two million dollars urgently to be able to complete. Every penny spent is spent on development and confirmation and development. It's not matter of, "You

can make gold, why don't you sell it?" Governments are watching us making gold. And they are opposing it. Even in past 48 hours one of the top governments in the world questions Keshe Foundation, they asked us to explain what does it mean that we're going to produce gold. We don't need gold. We need the energy of the gold, but we don't need the gold to produce. And this commitment takes time, and takes a lot of effort. You've seen what happened in Beijing.

(1:52) As I explained, to have such an exhibition, which hundreds of you attended in one of the major positions, major hotels right across the diplomatic core, right in one of the most famous parts of Beijing, to ask for that area and be granted within two days by the central government needs a lot of trust from them in us. Now you understand. We are not in the West that we choose a hotel, we show. In China, central government, the policy makers have to accept you can show such a thing in public and so openly. And then you understand the strength of the Keshe Foundation, how much work has gone into to build such a confidence that they want us to show the technology in China for the first time in such a prime position. We didn't go to exhibition somewhere hall putting it up. It's right in front of . And we have that support. We need to utilize it to change. Soon we'll be

in Moscow. Very soon, I'll be in Moscow for completion of the parallel work as with China. The same. We have to change the course that the present situation has no power. It loses, it gets diluted into. Don't fight it, just create a condition not to. I need nearly 1 million dollar in the next two or three weeks to get this done. And our only source is you Knowledge Seekers. We don't have anywhere else. We don't steal, we don't rob.

(1:54) This is the position we are in and we have to change it. We have created the condition of change. We have one of the biggest nations behind us. As I said, we need to make one nation to two, to three, and then the whole thing will crack open. We have put a nail in and it's just now opening the crack. Any other question? Q: ... Actually I'm working at a drone assembling company. So ?? would you like to ?? talk to the manufacturers ?? of drones in India. K- I can't hear you .. can you repeat. Q: .. Are you interested in collaborating with the company? Can I talk to the management regarding this? K- Yes, we're collaborating directly with Chinese military on drones. We are very interested, very, very much. I'll come to India even fly in tomorrow. Drone is the future of the Space technology and feeding the people. Part of the part of the 10 billion contract we have signed with Chinese is rapid development into drone technology. (1:56) Send an email to info@keshe.foundation and we'll respond immediately. Q: Okay I'll talk to the management Mr. Keshe and then I'll let ?? you know.

K- Please do. Let me explain to you what is the future of drone. The future of drone with the new technology is no motors. All these propellers you see the new versions of every whatever is obsolete. We are introducing a new system which carries no propeller and zero cost to operate. Literally zero cost. The Chinese drones will literally evaporate all the drone technologies right across the planet. And India is a country we have not managed to break it through. If we come through the drone it'll be fantastic. You need a single system inside which positions and creates condition and everything else. Open the door, we'll be there willingly to collaborate. Thank you very much indeed. Send a message to info@keshe.foundation and we'll respond to you directly. Thank you very much. Any other question? Q: ... Mr. Keshe, my question is, if you have Markray shares would it be wise not to sell them for Keshe Coin? Or is it, does it make any difference whether you have one or the other? K- As a CEO of the Markray I cannot make a comment.

(1:58) But if you... I have to be very diplomatic. Concentrate on the Keshe Coins, we tell you the reason. You'll do thousand times more effect, effectiveness than the Markray Keshe .. shares. But paid in Markray shares because you're trading, don't look at the profit, the valuation brings it to attention of the world leaders. This is the difference, we have to find a balance. Keshe Coins gives us a lot of operation to bring it up. Markray shares, when you,

the more you deal in it at a higher value pushes up to come into the level of the, what you call it, effective operation. That's the difference. And Markray shares will go crazy very soon, you will see it. Don't forget three months ago, four months ago, before I take over as a CEO we shared to trade at 0.005, now it's at 11 I think this morning and this will go to one or two dollars in the next few weeks or months. It should go, according to what is to be, and what is sitting there. But it doesn't make any difference because we haven't bought the Markray shares to sell. Markray shares are set up for world peace and you will understand the reason of it. It has to reach dollar, two dollar, three dollars in the next few months. And it's a limited amount of shares. So, don't look at it upward, I made a profit. Use that profit to be part of the bigger structure to create that position.

(2:00) And the Coins is the backbone of all the works we've done for world peace. We need, we desperately need 1 to 2 million dollars next 2 or 3 weeks to complete our operations. And then, Keshe Foundation is free to work. The situation in China has brought us this position and we have to take advantage of it. Any other question? Q: ... Mr. Keshe, is there anything we can do to save our Palestinian family, before it's too late? K- We are doing a lot of work on it. You got to realize, situation in Palestine has take a worse turn with the new administration in United States. The new administration in United States, as I said before in couple of weeks ago, sees the Palestinians as a

French Riviera. And they want to bring all the hotels, casinos and prostitutes houses across it. It brings them wealth. And secondly, by moving the Palestinians and taking over the territory, the oil fields across the water will bring a lot of power to the Europeans, that they don't rely on the Middle-East on water, or oil.

(2:02) But, the, what I call, stupidity, is we see the British talking to come back into EU again, because then, British Petroleum will have a lot of say in this arrangement. It's a bigger political game. But the new situation with Palestine is diabolical. What we... nothing can be done because new administration has received a 2 billion hotel resort in Saudi, and a backing of another 4 to 6 billion in Palestine. It needs to become Riviera. The Europeans enjoy the front and the slavery goes back to Palestine in the back running them. We see what's happening. The only solution to this position with we have in Palestine is the end of the, what we said, take the love of God from the ?? father of Moses, and we have done so. Just wait for the time. Many Jews will bury their names not to be known that they are Jews. This time they do it themselves, they don't need a Hitler. Many Jews will burn their ancestry books not to have any track record of, by themselves. When you kill a man you're a murderer, when a man kills himself it's a suicide. They don't put him into jail because he already killed himself. If you kill a man they put you in jail. Why should we do that? You know when,

(2:04) why people commit suicide and nobody loves them, when they are not loved by no one. And that's the ?? there . Just give it time. Any other question? Q: ... This is a bit strange, but has in some way time changed, it's hard to explain but it feels different. Has it got anything to do with the Sun? It's now white and it was yellow when I was a boy. K- I think you do better speak to the guys who want to talk about the chemtrails. It could be a lot of chemtrails in there. Any other question? Shall we call it a day? R: I think we've pretty much covered it, yes. K- Thank you very much for today. I hope you understood a little bit more about the future of our generation of people who try to colonize the Moon. The Moon, I'm sorry, the Mars, that they're just coming back home again. It's just getting on the taxi which is coming reverse. And I hope they won't make the same mistakes. See you next week and I hope those of you who fly with us tomorrow have wonderful trips. One hour session starts nine o'clock tomorrow. One hour each group .. each captain gets one hour. And don't ask me where I'm going to go, because I know where I'm putting you. See if you go where I put you.

(2:06) We haven't left anything, oh, Mr. Keshe is not there. We are there in a full, but this time very collective, smaller numbers and very easy package to get people moving. Thank you very much for today and please don't forget we need huge, huge support, very urgent in the next two weeks, three weeks. And even if it goes back to lend us, we give it back to you,

we have no problem. But we have to accomplish this situation very fast. Thank you very much. See you next week. R: I'm going to play our ending music but I might not have the music part of the video, because my audio is not functioning properly right now. But I'll give it a try. K- You can whistle your way out. R: If it's quiet, we'll call it a minute of silence for contemplating today's workshop.

(2:08) K- Thank you very much.
