Part 1

594th Knowledge Seekers Workshop June 12, 2025

(Transcription, Editing and Proofing done by KF Brazil) (Auto transcription by Elias)

ENGLISH TRANSCRIPTION

(:12) K- Thank you very much, good morning, good day to you, as usual, wherever and whenever you listen to these series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We are traveling the time and in the teaching of the past few sessions we try to make connections in every direction about the time, about us, about our connection to our Creator, the Time which we have in the dimension of the physicality (P), and there is another point to the life, the Time of life. We always considered that we live physically and we separate or we die physically, separate the Soul from the physicality. And that's it, there it goes. We know now through understanding and the work of the Universe (U), that our Soul travels the depth of the Universe and its Place and Position is already preset at the time of departure is what we call, origin which is within the Soul of the Man (STM). The question for the next step comes is very simple. What is the Time of the Soul? Physicality has a time. But how long that Soul will live in the Universe? Would it dispose of itself the way the physicality of man does? Become part of going back to the materials and the matters and the energies in the planet? Or it could be a physicality of the man in the Space? (:14) Or would it become part of the time

of the creation, part of the time of the Universe. What are the consequences of this time by law of physics, by law of conservation of energy, by laws of Creation? For a plasma to exist it needs a balance. It needs to balance with another field for it not only to confirm its existence, but to confirm its Position, Possession. And with its Place (PPP)? And what is the time for that Soul? And how does it interact with its environment? We in the loose language of man speak about 'Twin Souls.' In the misunderstanding of the knowledge man uses this word very loosely. But, is the Twin Soul, the Soul that in the STM on his departure, Twins with, to create a new dimension of time? In a physical death, the Soul of Physicality (STP) is within, is gone. With the transmutation,

(:16) the STP is within and it's there to be manifested in a Place, Time, Position and Possession. But what happens when the physicality is not there? What Time does the Soul have? How much can he, or it can travel? Would it be within the confinement of the magnetic (M) field of the planet Earth? Due to his Possession, gaining strength, will choose another ?? Position in the Universe. And then, what is his Time? His Time has to be measured in accordance to other factors of the Creation. Does this Time start from zero and then becoming the seed for another cycle of life? Not necessarily in a matter state, but in given field strength of the matter will live another cycle in the Universe. In the DNA of the man we can follow the genes, the evolution. In the field strength of the STM

we can follow and track the evolution of the Universe and the Time. But what is important is and will be is the strength of the Soul in the cycle of evolution.

(:18) And to what extent to which time. In the dimension of physicality man has come up with what we call phrase of carbon dating. How would we date the Soul? In which cycle, which part was added to it, in the what performance and observation? Can we Carbon Date the STM or can we 'Time Date' the STM? We observe the changes with the Man, evolution and everything else through the matter state. What about when our knowledge extends that we can through the field strength do the same? Then would we be able to trace the cycle of the Creation? It took man decades to come up with the, what we call, the traces of his DNA. How long would it take man to understand the power of the magnetic fields as an energy and date the cycle of the STM? Would we go back to the Time of Creation through our Soul? On this planet we have no traces of the Universe. We have physicality of the change in the solar system (SS). Energy is boundless and energy is limitless. What is the condition that our Soul can be traced back, timed back, Soul timed,

(:20) Soul dated as we carbon date and see which part of the Soul comes from which part. What is connected to? What is our ancestry comes in the dimension of the fields of the time of the energy side? Nowadays we pay hundred dollars to United Nations organizations which set up some times ago and we

trace back our ancestors. We are from Northern Europe, which way we came to be there through the Straits of Hormuz, or we came through the ?? Sinai deserts, and we just got through and we led to the creation of life, or we took the boats from the coast of East Coast of Africa and we conquered other islands and the rest. We track it through the data of the DNA of the man. But once a man becomes knowledgeable, he can track the field strength of his Soul because he has no connection in a way at certain fields with the what we call, physicality of this planet. But he collects energy from the dimension of the Universe. In the teaching of the past many times I have always said what we consume is 20% of what energy we need. The other 80% comes from the environment of the Universe. The physicality of the man takes the lower energy for the physicality, but the higher energy fields of the Universe come from the depth of the Universe and adds to the inner sanctums field strength of the STM. So, we can Time it. Is it on the dimension of the Universe, or in the dimension of physicality?

(:22) When you look at the spiral, which I usually draw with the GANS, field strength, magnetic field strength, you can understand. Then, how we can trace back man to where he came from. Part of his Soul, part of energy of his construction, has the traces of another Galaxy, another Universe, another dimension, and what time. How these times were added to the intellect? Does this mean the new Souls are more mature? Because they received the latest, the most

powerful fields from the direction and dimensions of the totality of the fields of the Universe. Does man transfer part of the Soul of the energy time through the interaction of the creation of a child, creation of the new Soul? Then there is a meaning to the 'Children of Mitra' that are created out of the STM and not out of the dimension of physicality of the man. The concept, the understanding And the principle of the creation of the Children of Mitra is in essence explanation of the creation of the Children of the Universe. As they gather from the fields of the Universe and not from the dimension of physicality of the Man. That's why these children are unique, these children are very few, far, and very, very few of them in the Universe, because they carry the whole essence of. In the physicality of the Man we see the blue eyes, the brown hair, dark skin, and we can trace it back, to where there could have been a mixture of something.

(:24) So, the Children of Mitra, in time, have no time for them, as they take the dimension of the life, in time of the creation of the Universe. They are the energy side and not the physicality side. There is one of them amongst you and she will turn this planet upside down in the work of the Universe. She comes from the origin of the Creation. Man has to understand the Time. We have bracketed the time into the dimension of physicality of the man. And as usual, as we never accepted that the Soul is part of the man, inner sanctums of man, is the creator holding everything together, then we understand that the Soul on its own

has its own genetic fingerprint. This will indicate the time, but it goes back to where does the STM goes, what time limit it has. How does it survive in the span of the Universe? Isn't it to be the beginning of another solar system, another cycle of life, another Universe? Then it raises a question. In the dimension of the physicality of a solar system, the sun, we always talk about the second sun. Look at the pictures on the screen. It's a Twinity of two.

(:26) When the Soul departs the physicality of the man it needs another Twin Soul to confirm its Time, the Place and the ?? Possession, and the Position, not only in respect to the universal system, but to itself to maintain life. This is what in reality we call the Twin Soul. In essence, the energy of the STM arrives at the destination as an energy pack, has no dimension of physicality. The interaction with its Twin Soul leads to creation of manifestation of existence of itself. Twin Soul is not dictated as the fancy word of today, we are Twin Souls on this planet. But Twin Soul, in reality, is the Soul is a dimension which leads to the creation and manifestation of confirmation of life in the new Place, Position, Possession, emotion, intelligence and enlightenment. In a way the interaction of the Twin Souls with the STM leads to what we call, creation of emotion. Which way do we rotate? How do I feel in what Position I stay near you? What is my reaction in towards the energies you carry and the destiny you have created for yourself? Do I need to be inside you, or do I need to be near you? What time do I want to

be and in what Position and Possession we meet again? Then it comes to the truth point that,

(:28) as the STM is a seed for creation of another dimension in the Universe, how does he choose the Time, the Place, to meet with his Twin to create a new time, a new cycle? He has no Time and Possession till he decides according to his field strength, inherited energy fields about its Position to manifest itself and that needs environmental condition to be able to manifest. It can manifest itself against its galaxy, but it needs to manifest itself against itself. Which means it needs what we call, a Twin Soul, what we call, the STP, as the Soul on its own without the STP in interaction with the environment cannot manifest the physicality. Now you understand the essence of the Twin Soul. The essence of Time, how does it choose its time? How long will it last that time? And what leads to the cycle of its existence? It will not be the same rocks and the same rivers in the dimension which it creates, but the emotion it carried from the physicality of the Man is within it, anger, hate, love, caring. Why do we see so much diversity in the structure of the, what we call, physical dimensions of the observation of the Man in the Universe? Volatile stars, calm stars, stars which create life and their ?? life, which they nourish life. Man needs to find answer for all these.

(:30) Today is an enlightenment teaching. Those of you who understand will see, understand the future of the Creation. In a way you understand about your own

Soul. By the age of 50, 60, 70, we think, how much more time I have? But in reality, how much time I have given to my Soul to exist in the Universe? We become vegetarian, we become meat eaters, we become blah, blah, blah, blah things, but we have to consider how much of each of these behaviors has ingrained, has taken, has given, to the dimension of the, what we call, genetic fingerprints of our Soul. Extremely dented in the physical life of the Man. Then Man has to decide how much time his Soul has in the Universe, and not how much time he has in the dimension of physicality on this planet. We are too busy with a 'crumb,' which is the physical. We have not understood and we have not looked how big is the 'cake' of life of the STM. The time, the dimension, the strength it has in the Universe. We are too busy with nothing.

(:32) And we are far too busy with nothing, which is the physicality of the Man. Which is the dimension (D) of the manifestation of matter state. Maybe the time has come for Mankind to look at the time in the dimension of the Universe and not time in the dimension of the rotation of the planet around the Sun. Where does our Soul rotate once it finds a Position? What happens if you gain enough strength to become the seed of the (a) Universe? What do you rotate around? By principle of the magnetic fields as energy you rotate in which direction, which dimension, and which creation and how close to your Twin Soul, and how big is that Universe which you Twin with, and

then have you mature enough in the field strength of gathering whatever it comes from the Universe and the Unicos in the strength of the STM Twin with the Creator, the Mitra. Coming from, going back to being part of. How do we track our time of our Soul? And what happens, when with the new knowledge of transmutation understanding dimension of the Soul we can travel the time of the Universe through our Soul? Is this what we do in the transmutation? That's why we go to the places we never been, we see creatures we never seen and then we know who they are.

(:34) Maybe once we understand the dimension of the time travel, evolution of the STM which receives energy from the Universe more than it receives from dimension of physicality, we can understand the ?? position of the STM. It's ancestry. It's track, not from east coast of Africa, but it's track from the Creator. How it became to become. In the new Space Technology (T) and what we set to come we'll be able to track the dimension of the fields of the Creation, very much the man does with the DNA.

Understanding field strength, understanding the Mass, understanding the Weight, but in the dimension of energy and not in the dimension of matter state. We are created out of the Weight of the fields of the Universe, by interaction of the one with the other. We become Mass without what we call, field strength in energy, is constant, the same in every Universe. We do not need to measure the Mass, but we measure

the energy interaction of magnetic fields in motion. The knowledge will come through the knowledge of communication, where the emotion, the intelligence, the what we call, the understanding of the world of Creation becomes enlightenment.

(:36) And through enlightenment, control of enlightenment, understanding the process of the creation of the Universe, we create Time. Emotions are fixed. Intelligence comes in a different dimension. The only thing which (will) change the time for the STM is enlightenment. The true enlightenment, through the fields energy of the Universe, control of the fields of the Energy of the Universe. The way Man in dimension of physicality, as we explained, becomes enlightened and sees Time in front. If Man learns to tap into the fields of the Universe, the original fields of the Universe, which are not touched in interaction with the others, Man will be enlightened to see the world of the Creation in Totality, and be part of the 'Yin and Yang,' part of the 'Adam and Eve,' part of everything else man has ever made to be. Become another partner with the Creator, become part of the Creator as it was created by itself. In a way I gathered enough to match you, I gathered enough to be equal with you, I gathered enough from the Universe to stand, to share, to give, to become part of the Creation. I am the Creator and I create for me to be, that I am.

(:38) In a way, the world of Universe stands on one leg and the Time and the Place and the fields of the Creator in another. The whole of the Creation, in

Totality, is a Twin set with the Creator's fields and Energy. And this is how the Creation is created. What we see and what Man will see as a Universe, Unicos, the rest, all in Totality is the Time, is the Place, is the Totality of the emotion of the Twin to the Creator. Then imagine what is within the Creator. Once Man understands that, once Man gathers to that point, then Man can measure the fields, the dimension, what we call, the path of the Creation ?? and time. 13 billion light years and other things man has come up with is literally a dot in the time scale of the Creation. But he's busy with his light time, when in fact he has to look for enlightenment Time. Then man understand the true meaning of life and time. Time in the dimension of the man as he has created it is very flexible. Because he works with the smallest of the fractions and frictions of the totality. Where one man, once man learns, he will understand the true meaning of life and time. Time in the dimension of the man, as he has created it, is very flexible. Because he works with the smallest of the fractions and frictions of the totality. Where one man, once man learns about the true essence of the time, man will follow the path to the Creator in a much rapid way,

(:40) then he knows the time that his Soul will be before it becomes another part of the structure of another life, in a way transferring his DNA and RNA to another dimension of DNA and RNA. And if man understand this, man will find out that there is no time. Time is always zero. As at every step and strength

man starts a new cycle of life in different dimensions and strengths in the Universe. I made Man in the image of Myself, timeless, limitless. And that is what man has to understand about his Soul. Our Soul does not come from physical side, our Soul comes from dimension of the Universal Energy side. And that is why at the point of departure, goes back to where it came to, where it came from, how it was created and how by gathering more of what was there in the ?? like of a vacuum cleaner of the fields of the Universe goes back to start a new Position, Possession, intellect, emotion and intelligence (?? enlightenment). There is one point man will understand in the coming time. The cycle of the energies which come from man leads to creation of more information advancement in the next cycle. Then man has to ask himself one question. Those we look up to as to be more intelligent,

(:42) how far in time they started, and how much more they have gathered that they, to us, are considered as advanced. In a way, man has to look not to the evolution of his physicality, man has to look into the evolution of his Soul. Time, emotion, intelligence and it's enlightenment. Now you understand how far we have to go and how much we need to learn about time. Then Man understands how to divide time. How time has divided for Man in the cycle of his Soul. And the time from the Position and the Place from his Creator. And the only way Man will change that time, is and is and will be by enlightenment. Which brings

all the dimensions of the energies of the Universe, from the physical and non-physical, to understand the operation of both. This is why we are called the Messengers, Universal Messengers, because we understand both. And we live in both dimensions, the time and the energy. And we understand both need time of their own maturity, and that's why we are patient with Man.

(:44) As we understand, the time for it to be enlightened is about to come, but Man always escapes the job, as he likes to have more dimension of physicality. Maybe now you understand how much knowledge Man still needs to gain. Not in looking at the stars and Cosmos, but looking at the energies of the stars. Energy of their life, where they came through, energy through the fields, and where they go. Man has never questioned, where is the origin of a star? He just accepted it. Now he has to ask that question, because, manifestation of it as a star is the beginning of the time for that cycle. Where did it come from to reach there? How did it become a star? It is not by what we've been taught today, by gathering whatever, we don't even understand. Nowhere in the world of the science of today we have watched energy to be transferred into a star. Many fallacies and no truth, many accepted by those who have no enlightened Souls. Understand the essence of time in the dimension of the field and energy, then you'll have everlasting time and life,
will not be attached to dimension of physicality.

(:46) And one of these tests is the transmutation. You need trust to become the Soul, lonely driver in the Universe for your own Soul is not such a pleasant thing. We need to confirm Position in respect to another field. We need to confirm our enlightenment to another equal, what we call, Twin Soul. I hope I opened your eyes to a new dimension of teaching which is about to come. The path, through the time, through intellect, through enlightenment to the Creator. Then you understand, all these teachings of past 10 years will mature by the 12th year. Where Man will be enlightened to the true knowledge of his creation, and not just the time in dimension of physicality, the sound and emotion of Man. Be ready to understand more about yourself. And we'll use every tool the Man has to bring that enlightenment to Totality of the Creation. On this planet, as some of the Universal Community has already been enlightened and understand the Totality to their own limit. We go for a break and we come back and we'll see how much time you have. Rick, would you take us for a break and come back?

>> BREAK >> 594 KSW June 12, 2025

Part 2

(:52). K- Thank you very much. We've being receiving a lot of questions regarding the, what we call, the Keshe Foundation and our operation in regard to Markray. Please be aware and understand, we cannot give any comment, directly or indirectly, about shareholding and operation to individuals or privately. Or what we think. As I've received a number of requests this past few days, especially, where can we buy shares and whatever. You have to find your own way through your own banking system, through your own brokerages. And people ask us, "What do you think with the value of the shares?" We cannot comment. We have a very clear idea of what the shares value will be, what our position will be, but that's internal to us. Even though we operate very openly, on the other hand the shares are in the hand of public. We don't know who owns the shares and how they'll effect our work and how our work will effect the value of the shares.

(:54) We give you a broad outline as you are part of the Keshe Foundation to understand. Your dream was to bring the technology into public, that it becomes common, what we call, tools for the survival of Man. And the only way we could and we have done is through the financial arm of the Keshe Foundation operation. And, this way, very soon, in next few months and so, you will see massive interaction with the products and use of the technology internationally,

as we released it in collaboration and cooperation through our financial arm. It's not anymore Keshe Foundation. It's what we have given from the Foundation to the financial arm to do, put in the, what we call it, the hand of the public on a commercial way, in a very, what we call, extensive way. We have chosen a very specific way, never done by no technology, by no entrepreneur. This does not just apply to Markray. We have set up different ways very similar to Markray, but in the background. That we will enter the international, what we call, world of finance, world of commerce, world of manufacturing, in a punctual way and in a very effective way. Which means the technology will not take years and years to come. The technology will be out across different nations in less than handful of years.

(:56) In a way we have used the system to play the system because we understand how the system works. Markray will be one of the arms of the Keshe Foundation operation and in so many ways, we will use the new way that we set ourselves to go, that we are never involved in manufacturing, We are never involved in services of the Keshe Foundation, we are never involved in disbursement of the knowledge, but we stay fully in charge, fully in control through the operation we set up. This means we will, we have used the structure of the, what we call, international operation of the finance and manufacturing and everything together in one what we call, target. So we need support now to bring that position and we are

very open about it. We need still haven't risen even 100,000. We need at least 1.2 million to do it. We're trying to manipulate as much as we can to reach the target, because with that we have very short time, maybe another week, two weeks, maximum. Then, if we don't reach it, we fail, and it will take us years to get back to this position. And we've been very open about it in every shape or form. And we need to bring this to a point of maturity very rapidly in next, more or less, few days,

(:58) that we can start, which we have already 'kick-started' it, to move in the dimension where we want. There's a lot of time, talk about the war, attacks and everything else, we are blind to it. It's nothing to do with our cycle. The Christians and the Muslims and the Jews bashing each other's head because of the non-existence of the truth, is their problem. We have started a cycle which overpasses these things. And we sat with a nation which is not involved in any of it. And this is where we see the change will come and the way we have put our efforts. Using both dimensions of the work. So please don't ask us about what you think the value of the shares of Markray is, how can you buy it. We have allocated the shares in a very specific way for the support, those who support us. All of you who served Keshe Foundation in past 20 years in different shape or forms will receive enough support from us. (blank) In so many ways we need to understand that we have to stay very impartial. We need to stay very correct both to the Knowledge

Seekers (KS) and the path we've taken on the financial world through the Markray and other companies like Markray will emerge in the coming time.

(1:00) Any detail with regarding to Markray will be announced by Markray through the operation of the American stock market. We know the share values, what it will be. We know what the share values are. And the two do not reflect the true figures. Because of the things which are set up and was not controlled by the, in the past years. Now that we have started to sort it out, to clean it up, we find out there are the problems which has nothing to do with our way of work, but it's something to do with the financial world, and this is what we need the money to clear it up, that we can move on. I always have found the solution, I always found a way to bring it and I'm sure we'll find ways to do it. But please don't write to me, don't ask me because we said we kept some shares for Knowledge Seekers, those shares are there where people put the true value of the shares on, it will be given. Our silence is our knowledge, it's not our weakness. We've seen many people playing with shares in the stock market, that's their prerogative. The share, true share values, what we see is not what is actually in the trading, but we have to abide by law.

(1:02) Many of you Knowledge Seekers who supported us will see the fruit of your support. And the only way we can do, and how we have come to be to that position. The rest is for us to assess and develop.

And we have started the evolution of the change of World Peace through technology. It's not something we're going to do. We have put it on a 'sound base' and it'll take its own shape. Does not matter if I'm not, or if I am here, and how will happen with whatever. Technology is set on a very, very solid base now to be commercialized. And a second time to be properly done outside the hand of the Keshe Foundation. Keshe Foundation is a knowledge provider, not in the world of the manufacturing and the rest. That has been passed on to our arms of the work, in the hand of the experts which come around the world to do. If there are any other question, we answer. Q: ...

(1:04) In Plasma work Twinity is a big concept to take in consideration in our daily work with Plasma. Can you please give us some more understanding of it? K- Hello ... I lost you, give us more understanding. Q: ... in Plasma work Twinity is a big concept to take, it's a big concept to take in consideration in our daily work with Plasma. Can you please give us some more understanding of it? K- If you want to understand Twinity, you have to have the comprehension that there is a conservation of energy, conservation of magnetic fields. What does this mean? It means nothing is lost. Everything is used, but in different shapes and whatever. It's like making or baking a cake. You take some flour from a bag. You take some salt from another container. You take some sugar from another container. You take milk from another container, you take everything else from different

containers, and then you mix them. But the totality of all the materials was left in the bags and containers, and what is in the pot you put in, it's always the same. And this is the principle of the conservation, this is the principle of what we call, Twinity.

(1:06) What you put in the pot comes from mixture of other pots, but in totality everything is the same in the value, in the mass, or in weight. So, your Twinity changes by how much more sugar you take from one part and how much more flour you take in one part and how much more milk you get, you change the composition, but this is a Twinity set. What you create is a part of the totality, that in a way is always conserved, it cannot change. This is the way the Universe works, this is the way Creation works. We see different Galaxies, different Stars, different Lives, different UFOs, different things, but all of it is in that pot, what's on the table it cannot change. It cannot bring something else extra from outside. What you make is the Twin of the Totality. Even though you took part, portions from each one to mix it. And this is in essence, the world of Creation, the world of Twinity. You can still divide that what you mixed into different cake sizes, but the pot is the same. You cut in two half, you make two loaf of bread, you make it in four halves, you make four pieces of cakes. But, still that 2 and 4 and whatever, is combination what's on the table. Cannot change. And, that bread, that half of the loaf is a Twin part of the whole amount what's in the pot.

(1:08) But, the whole lot is in Twin, part of the Twinity with what's on the table from all the pots. That all the pots is the Universe and those grains of sugar, those grains of flour, those dust of flowers, are the galaxies, the stars, the Universes, everything else. There's no difference, but you have it in the matter state conversion, or you have it in the energy conversion. What you mix, if you .. put the sugar, salt and everything else and flour and whatever in a pot, it still you can separate it one way or another. But, once you put the energy of the, what we call, milk, or water, or liquid, that they all mixed up together, you cannot separate anymore. And that milk is the life of the Creator, essence of His energy. How much milk you put in the pot, gives you different mixture, different dough, gives you a solid dough, thick dough, makes it into a liquid. And, depends how much love, how much milk you put in. That milk is the amount you put in is the love of the Creator. More dilution, and at the point, if you dilute enough milk in it, you know the sugar is there, you know the flour is there, but you see none of it. Because it's covered with the love of it, with the essence of the milk, the liquid.

(1:10) But in fact the liquid was on the table from the beginning. And this is how Twinity works. And what the essence of Twinity is, does not matter what you mix it, how you mix it, what's on the table is the totality and how you take part of it, you make a Twin of it, it's like a STP compared to what's on the table as a Soul. The interaction of them gives you the cake, that's the

manifestation. So you decide what part of the flour you take and how you divide it to Twin it. But in essence it's all part of the same pot, the love of the Creator, the essence of His fields and His energy. And He dilutes it in such a vast way that you cannot realize anymore what's what. But if you go into the detail of it you can find a piece of flour in that part of the liquid and a bit of the sugar even is diluted. Any other questions? Q: ... Andrew mentioned he tried to buy a Keshe coin to do his bit to help, but he hasn't received back an email. He's tried two times to... K- If you purchase, you just pay through the Keshe Foundation channels. You go to the store and you do it there.

(1:12) Or you go to the donation on top of the Keshe Foundation website, there's a donation button. Choose either way, you can go to the store or the donation, you can buy Keshe Coins. .. Q: ... First of all I'd like to thank you for the valuable knowledge you share, for your willingness to answer my question. I would like to know more about the different types of dreams, and whether all dreams are considered a travel of the Soul. K- We have explained this before. There are two types of dreams, or what you call two types of travel. It's the same as how your Soul is free to interact with the Universe and bring back the knowledge. You have the interaction of the STM and the STP of the Man, which creates a dream. This type of dream is usually very easy to tell. It's a Man's dream, Man's dimension of physicality. The other dream, which is the interaction of the STM with the

Universe, or what we call, the Soul of the Universe, are very far in between and usually brings enlightenment. The dream which is a physical, you talk about a cat today, and tonight you dream about the cat.

(1:14) That's the physical dream. This is to do with the dimension of the Soul and STP, mainly the dimension of the energies of the physicality with the STP of the man, which leaves an imprint in the dimension of the emotion and the memory of the man. That's how we remember these dreams. The enlightenment dreams, which is when we separate from the physicality of the man, it's deep rooted in understanding of the operation of the Universe and Creation. The physical dream has access to part of the Soul dimension field, which can take you to your mother who died years ago and the father, and the other things, there you can connect to their Soul that you see. And from our point of view, there is a clear, what you call, line between two type of dream. And the one which connects within the STP of the man and the STM is what we use for transmutation. That we don't let the Soul separate. The one which travels the span of the STM with the Universal fields is the one which you travel the depth of the Creation. And it comes back with the enlightenment because now you see more. In the interaction of the field of the physicality and the Soul you see, you get enlightened about physical dimension. When you travel in the dimension of the field of the... This is done usually by the Prophets.

(1:16) That's why they see the weaknesses of the Man in that dimension, in the Soul level, and when they come back they abuse. It's the test. As I said, we test the heat of a fire with gold, when it melts. And we test a Man with gold to see when he melts when you put that gold in his hand. And, the test of the Soul, is when you come in touch with the Creator, and how you melt. That's a different dream. Those who are created through the Soul, the Children of Mitra, dream in that dimension. In a way they are enlightened all the time by the knowledge of the Creator. And when you see the Children of Mitra you see the enlightenment. And when you see the man of knowledge in this, on this planet and man's and the rest in the Universe you realize how physical they are. Physical ones are always arrogant, and the true ones are generous. That's why we see professors and leaders becoming so arrogant, because they just think they know. In the dream Souls, in dimension of physicality, if you understand and separate it between the STM and physicality of the Man,

(1:18) or between the physicality of the Man and the STM and the STP of Man with the STM, each can be explained very easily which you are, what you are. Look at your dreams and just don't just take it as a dream. You dreamt about a cat, you dreamt about being somewhere. Look at your memory bank of the past few days and you see usually it's the same day, it's one cycle and you dream about, "Oh, I dream, but did somebody talk about the cat today?" That's

between the physicality and the STP. And it's about 80-90% of the dream of the man. What you thought in the background about, "Oh, I miss my mom." And then tonight I dream of mom. But you forgot that you had that intention of creation. But the biggest problem or understanding is, how did you come? How come you thought about mom today? Has she sent a message? That physically you're not aware of, but at the energy level it's woken up. Let's talk. Any other question? Q: ... I'm going to attempt to combine three people's question in one here, because it's a... it's becoming a common concern, you could say. First of all, Jay has seems to be upset, he says, "I'm seeing riots and wars taking place all over the world,

(1:20) racist hatred everywhere, and weapons testing, killing thousands of people every hour. Donald Trump is having a laugh, flying around in a helicopter and planes, telling people to drill, baby, drill for oil, coal and other fossil fuels. What's going on? When will it stop?" And then, we have other questions from Antonio for example. His question or concern is, "Israel may attack Iran soon, and will Iran in this case be able to defend themselves with Plasma Technology by neutralizing their missiles as they appear?" And then we have another question from Anonymous Attendee, "Is it true that Israel is about to attack Iran and do you know why?" So there's a lot of upset in the world and people are agitated and it seems like something's coming up. Can you comment on those questions? K- If you look at the... We don't look at the

civil side. Civil side is to do with your leaders, and it's created primarily by the world leaders internally, for their own use and abuse. Internationally, when we look at the world, 95% of the world is peaceful. 99% of the world is peaceful. We have two flashpoints. One is in Ukraine and one is in Middle East. And both of them are finance fed by Vatican. It's the war of religions and how they support.

(1:22) If you've seen the news in the past few hours, we see that the head of IAEA has been, and now the documents are in open in newspapers, working for Mossad. Now for the first time we always suspected somebody in the offices of the IAEA passes information to Israel and killing Iranian scientists and the world scientists. It's not just the Iranian scientists who have died, Israelis have been busy killing many scientists, many, many. And they are the arm of the other people. But what has been released in past few hours through the, what we hear from the Iranian intelligence gathering and the information they received, the head of IAEA has been all the time working for Mossad. That's how we lost our engineers, and that's how we lost. Then we have people inside Iran who are paid. They were given ultimatum earlier this year, some 30,000 of them, if they don't change the regime by the end of 2025, their names will be released by FBI or by Pentagon. Now we see how much they have in there. On the other hand, we have a psychopath sitting in one place which caused the Iraq war, Libya war and the rest and they all make

money out of it and we cannot stop that. And this is fueled and fanned by the Vatican. The Middle East and Ukrainian war is just a religious war and that's the beginning of the end of themselves.

(1:24) You got to realize why suddenly in past few hours, or past couple of two or three days, suddenly Israel became hot. Very simple. In the past three months, Iranians managed to break through, through intelligence and move something like 2 trucks of documents plus cyber information out of Israel. Iran according to what is released by the Iranian press, a lot of they don't announce it much outside, have access, have located every single 90 odd nuclear warheads in Israel. It's like black and white. They have access to all the private life of Netanyahu, his mistresses, his bank dealings, and it's all done through his own connections. It's not an allegation. They have access to all the plans, how the Europeans helped Israel to build a bomb, to do everything else. And this has pushed Israel to take action because now they know Iranians have their position of their nuclear warhead. You cannot just put a warhead and move it somewhere else. Where you going to put it? And when it's in open it's very easy to track. The other problem is that Iran announced that they will share the knowledge with other people. Now the Russians have the location of every single Israeli missile. What do you think Israel is going to do? The hand of the West is literally broken with this disclosure. And it's not one thing, everything, the whole of every Israeli national,

(1:26) medical history is in the hand of Iran. They have emptied all the vaults, the banking, the courts, the social welfare, their addresses, their supporters, where the money comes, the banking system. This is what they don't tell you in the West, but Iran announced it on the 6th of June, 7th of June. They literally trucked it out of Israel. Trucked it out, not the cyber, cyber is part of it. And literally, if Israel doesn't move, and America doesn't move into attacking Iran, Iran has technologies now that in next few, God knows, time, can target this (these) points. The biggest problem for the West was where these bombs are, where is how many, where. Every location, every house, every officer, every personnel who handles nuclear material, or involved with military part of Israel, their name, the children, the bank accounts is in the hand of the Iranians. This is why they suddenly gone into ?? . Just they don't release it on the West, because then they want to say, "Iran is going to attack, blah, blah." But, in a way what Israel kept away from IAEA, now it's in the hand of Iran and they'll release it. How the Americans, the British and the French have been helping, and building nuclear materials in Israel. It's very deep.

(1:28) And what we hear suddenly, Israel is trying to get attacked, because now the hand is in ?? , every nuclear place is done, and you just don't need to do anything, you just literally attack them, no nuclear war will go off, because the ignition is on, we have a small amount of, what we call, radiation leakage, but can be

contained in Israel. This is the reason for sudden heat up, since the 6th / 7th. Netanyahu mistresses, all their names, Netanyahu bank accounts, how he made fraud with the couple in United State, everything is now open. And part of this structure shows the involvement of the Trump. This is why you suddenly see, sudden surge out of nowhere, according to the news, Americans are emptying all their personals out of Iraq and Emirates, but they don't tell you why. Israel has become a 'belly up.' Iranians don't need to do much. If they launch every rockets, every whatever they have, with the supersonic missiles into these targets, Israel has bombed itself. Now they have precise precision videos, literally physical videos, of the position of these missiles. This is what the Iranian, what you call, intelligence has put in public in Iran, which nobody is aware of outside. There's a list of two truckloads, they say, physical documentation, and there is no accusation. They have physical confirmation of the Grossi to be a member of the Mossad. That's what they say.

(1:30) And they have published it in past 24 hours. In a way, he went to see, but he redid everything for Israelis where to hit. IAEA has no leg anymore in the negotiations. So we wait and see. They have to strike. They have to do something, because now they have no protection. I advise to take a different action, but no advice goes unless what they see in their hand, they have in their hand and how they planned it out. The meeting of the IAEA this week about the Iran is

meaningless. We're sitting on the table negotiating with the Israelis in the cover of Mr. Grossi. That's why whatever Iran does is no good. That's why Israel has not... Iran has opened all its nuclear centers and it's not enough and Israel hasn't given a single document to IAEA and they are protected. And now the 'belly is up,' where are we going to negotiate in Geneva or Vienna, what is the verdict they give the Iran is that because what Mr. Grossi, he has an intelligence officer of Mossad has put the thing on to fit the suit, to create. It's lost its leg, IAEA has lost its leg, the sanctions lost its leg. We have to wait and see.

(1:32) At the movement is inevitable and past 72 hours thousands of American soldiers have been taken, or families have been taken out of Iraq and Middle East. Imminent attack of Israel. Why does Israel need to attack? They don't tell you. They're 'belly up.' That's the only way they see to their survival. And Iran said they share it with everyone. Now the Chinese have the data where the Israeli bombs are. The Russians have the data. Russians have been bothered by the Israelis in Syria. What are they going to do? Pom, pom. It's not anymore, we did what we like. Now we're done with it. And I'm sure if any attacks happen on Iran, Russia will not stay silent. Ukraine is on the same pattern. Vatican used Jews to play the game and doesn't touch them. They, the Israelis and the Jews, pay for it. This is a war of religions and not economical war or whatever. Any other question? R: Thank you Mr. Keshe. I was

wondering when you were describing all that which is part of what is going on,

(1:34) and some of the special information that you're privy to, and has become public in Iran and so on. What does the Soul think, in a way? Or what is the Soul's time of all that, those events? Is the Soul interacting with those events in any way? Or is it impartial and doesn't... ?? act. K- It's part of maturity. It's part... These things are part of the maturity of the Soul, for man to walk away. And I watched that for a long time. We don't see international ?? wars. Most of the world, we saw how happened between India and Pakistan, it was a 'tictac,' finished within a few hours. And it came by the superiority of China. The reason India submitted, it was an actual full submission by the Indians, was the way the Pakistanis destroyed the air forces of what you call it, India. In a very short time, using Chinese new aircrafts, and where the European latest aircraft tested by India failed to even to operate. And, so we won't see skirmishes. China has a different principle into warfare. China sees as making all the nations one, in a way of communist way, but in an open communism which is today's China, will have a free trade. Will have a free system. But systems like America and the European take the smallest piece of land on this planet called Israel,

(1:36) and make it such a big thing to cover their own news. Do you think Chinese listen to this? Do you think Indians listen to this? Do you think Russians are aware, bothered with it? Does it affect any African?

We are Western CNN broadcasted to make it so big. Eight million population, out of eight million (billion) population has become the center? No. And the Chinese look at the Global System. Does it make any difference if Iran hits Israel, or Israel hits Iran? No. This is all westernized media blow up to show they are big, but there is nothing. If you can use the smallest ant on the ground to create mayhem, so you are that much intelligent. The world does not go around Israel and what happens in Middle East. The world does not go what happens around Ukraine. It's going on extremely fast development, and the rest of the 7.988 billion are developing, growing, extending, and this thing is just a play of the infants. So, don't get busy with what happens in Israel, or what happens in Iran, or what happens in Ukraine. This is not even 1% of the world population. And 99% is growing, extremely rapid, especially, especially, in the world of understanding new technologies and science, and with it comes enlightenment. And maybe it's the time to change the dimension, direction of people.

(1:38) Everything is just because it's on CNN. Why do we listen to this? Why do we need to listen to CNN? Why do we need to listen to any American news? They have their own internal problem. If you look what happened when the German Chancellor and other world leaders, in recent times, have met with the Americans, especially with Trump. It's just people keeping saying hello to themselves. It's like gangsters meeting each other, we are very big. Look at the

growth, intelligence growth and evolution in Brazil, Canada, in China, in Japan, and in India, see how fast humanity is growing. Everything is not about one, this little bunch of Jews. They actually are not Jews, they're a bunch of Ukrainians who went to Jews. They are fighting both in Ukraine and in Israel. You look at the background of every leader in Israel, they're all East Europeans, Ukrainian, Poland and the rest. Same as, you know, what happened with a bunch of no man had no meat, they went to America and they served buffaloes and how they made everything, what you call it, meat. It's a bunch of insignificant people who came from the most poorest nations in the Europe and now they tell them that they're big. Watch the behavior of Israel and watch the behavior of the Ukrainian leader, it's exactly the same. In English we call them new ?? mutants. Just ignore what you see, because it's not always right. Look at the advancement in New Zealand, in Australia, (1:40) how Japan is breaking new dimensions every day. How China has changed everything. You invest money in war, they invest money in peace, and in Technology, and the rest of it. Americans have a big problem, supposed to make a, what you call it, a fast train, whatever, between Los Angeles and another point, and there's still 10-15 years down the line, they can't do it. Chinese opening a 1000 km an hour railway, near Shanghai, very soon. With the Americans dream they do, the Chinese have already achieved. That's where the intelligent... That's why we

work and concentrate on Chinese development. Don't worry about it, they're going to hit each other, they're going to do whatever they can, because they are in state of... they are a bunch of bandits. But ?? at the end of it , what do you call it, 8.99 billion of us are peaceful, running our nations, serving our people and the rest of it. Any other question? << At this part the Knowledge Seeker from India ask Mr. Keshe if he read his email about the use of the Technology for drones. (read your email, message has been sent back to you) Mr. Keshe asked for him to talk about this through the email. >>

(1:42) Q: ... Have there been Knowledge Seekers who have managed to feed themselves from the fields by listening to Thursday teachings? K- I don't know, ask them. R: Well, we have definitely people that have given testimonials, in the testimonials, public meeting for testimonials, and folks like Mark, who have gone months by skipping two out of three meals a day, because they just don't need them anymore. He's feeding from the fields essentially, and able to get all of his energy for the day with... by twothirds less food. And he's notating how he's using the vials of the Gans's of different foods.

(1:44) And finds it's that's been working quite well, and very much paying for itself. He was detailing how much money he saved over you know, a hundred meals or whatever. And it's quite significant, much, much more than the price of the items. So, it's a way that you can invest in feeding on the fields through the

Keshe Technology. K- There is a lot of Knowledge Seekers who are testing, people who've been through sessions, some of them have lost their appetite totally. And some people have lost a lot of their, what you call, addictions. And this doesn't happen coincidentally, it just happens. In the teachings we do not bring in the process of the, what you call it, our systems to back. We did that once, if you remember, some 3 to 400 of you were online, and we saw the result. If we bring the process of the, what we call, our systems, during the 3 hours of teaching, God knows what we will do. So, Thursday teaching is enlightenment by yourself, not condition created by us. And you have to test it, you have to see. Many Knowledge Seekers in China and other part of the world have gone for weeks and months and days without food, without anything, but they, it's the reliance on what they want to get.

(1:46) And my advice to a lot of you is, if you are relying on Gans's for nourishment, continuously change your Gans's, with a fresh one, with a different mixture. Because, two reason. First of all, the body gets saturated with one spectrum. So, it needs to go and use other spectrum for the shortage. Secondly, your Gans's will give the energy for given spectrum and then they don't have anymore. So, if you have come into the process of feeding yourself with energies, learn that you need a spectrum of energies, different mixture of. Even you have the same Gans's on the table, mixture and mixing them, positioning

them, creates different interaction, different fields. It's like you can't eat meat every day, your body gets saturated to it. And then it... you eat meat, but then the body has to convert it. So, it's the same process, you're dealing with the meat which is called energy, So you need different energy levels. Don't rely, "I take the same Gans's." You have to change it. We see this even in people who used for Corona. The same Cups of Corona becomes next cycle less effective, because the energy level for that has been used. It's in a way, it's from number 1 to 10, you use number 8. So it's not there anymore, unless you put a new 8 in. It's life, it's a creation of balance of energies.

(1:48) So, if you do, if you are in that game, you have to understand how the Creation works. They keep on telling you, for example, take vitamin C. It's no use taking a cup of orange juice every day. Body gets saturated with that bracket of Vitamin C. There are hundreds of other Vitamin C energy levels. Fruits, nuts, other things, meat, whatever else gives you the balance of it. If you give all the time there, body rejects it. Got a point of saturation, but it still needs to make the others. When you read about the vitamins and read about Calcium tablets, there are at least, at least 40, 50 different type of Calcium's which your body uses. There's a Calcium for your bone, there's a Calcium for your cell, there's a Calcium for what we call, operation of the liquid in the body, there is a Calcium for solidification of the cells to organs. Each Calcium. So you just keep on taking the same

Calcium tablet. Doesn't work. Insufficiency brings other problems. This is like, I was explaining to a scientist, a doctor actually, over the past weekend. The discussion comes on the point of toothpaste. As you know, I explained to you many times, get used to brushing things or tooth, whatever, without anything. Pick a toothpaste, doesn't matter what brand, and see the ingredients. Write all the ingredients down and then go into the world of AI and encyclopedia and the rest of it and see what this material is, and what deficiency in this material will create in your body. Zinc. Oh, it's got Zinc in my toothpaste. Hello, do you swallow the Zinc? No, you spit it out. But you give the information to the body that Zinc is coming. Go and see Zinc deficiency. And then see your diseases. Acid 'so and so.' Well, see what this acid actually is. Is it synthetic? And what this synthetic acid does in your body? With your toothpaste, you are creating money for the doctors. You are creating your own diseases. Ask yourself a single question, "Do I swallow this?" It has this, but it doesn't go into my body because I spit it out, I washed my mouth ten times. But the body got fooled that it's coming in. And, if it's a chemical combination, body makes to get rid of it. So see what elements are in that chemical, that your body rejects. And then look, where my pain comes from. Where my psychological problems has started. 90% of you having depression, you're using a toothpaste.

(1:52) Go and read the ingredient. Whatever is on the list of ingredients, which for any reason, you don't

swallow, is the creation of deficiency in your body. And what does that deficiency does? Don't get bothered by fancy names, go into Wikipedia and look for a chemical combination. Zinc, Copper, blah, blah, blah, it's in this chemical, covered under fancy name. This is what you lost. And then, open it up and see what is the losses, cause in your body, the diseases, deficiencies, heart attacks and everything else. The science used to destroy man. They tell you, you have such and such a disease, such as such a problem. Look into herbs. Look, I teach you something you learn. Many of you, ladies and gentlemen, you travel to different country or you have an active sexual life, you run into what I call, urinal diseases. You go to doctors, get all sorts of antibiotics. Try to drink 3, 4 or 5 times just the clove tea. Leave clove in the tea and drink it 3, 4 times over 2 or 3 days.

(1:54) Do you need antibiotics? Many of the people who go to China, go to India, get water infection. They tell you cranberry is the best thing. No, clove is the best thing for urinal infection. What does it do? When you boil it at a very high temperature, you create a Gans energy of it, and it reaches 100 times, doesn't create any damage to the body, because it's made from part of our body. Look at its chemical composition, what's in it, and see what's your body made. It has a protein connection. You have stomach problems. Look at the way the material combination gives you. We have to teach ourselves, we have to look at... Then it comes, you look at the energy side.

Look what energy releases, and then you find the energy matches. In Space we don't have chemicals to stop viruses, we have to look at the energy better. It's the same what we hear now, the new Corona, which I explained before, which has appeared in China and Hong Kong and is growing rapidly. Why it's changed to the summer strength, not the winter strength? And why is it getting so fast? This time, the game of Mr. Bill Gates and the World Health Organization, it's not there, Chinese are handling it different way. That's why it's done in public as such.

(1:56) But, 100,000 people have died in the past few weeks. Now, it is an infection. Is not a virus. Viruses we... WHO created a big thing out of viruses. Now the game is finished. Bill Gates is on the run. And there is nothing heard of, but it still there. Is not an infection, is a virus (not a virus it's an infection). And we have to be ready for it. We have to understand how it works, the way it works, what effects. We don't need to become medicine men, but we have to understand the medicine of life of our own life. Next time you pick up a toothbrush, think, what am I going to do to myself? Depression? Anxiety? Other diseases? And this is proven, one of the major, I explained it two or three times, one of the major toothpaste manufacturers added one element to the toothpaste. In six months, 10,000 people died

across the world with it. And they withdrew it. (They remained) Silent. Nobody knows. The energies you put in should absorb energy from the Universe. You

find a way to feed the Soul, to bring energy to the Soul, to expand the Soul. This is what we do in transmutation with the headphones and the rest you do. Then you find a new dimension of time. Any other question?

(1:58) Q: ... The last teaching you were talking about Plasma cars. Would it be commercialized soon? He can't wait to get one. K- Yeah, these cars... you have to understand. This doesn't apply to Keshe Foundation Technology only. Applies to many technologies, one of the millions. Technology which will change the balance of the financial control politics are not usually so easy to get in unless you find a shortcut. I was talking to some people over the weekend. The cost of a plasma system for a car will be very cheap. No fuel, no electricity, nothing. It will be very cheap to do. But the world of economy, world of politics have a different view.

(2:00) They make money, I don't know why they make it for, now it's got to the point they are prepared to give it away for, oil, gas, and whatever. But the biggest problem for the plasma system is, the minute we introduce, release, as we did in 2011 when the Belgians came in. We show them, China has no more economical power over Iran, Middle East, half of the world which buys oils from, because nobody needs oil. The shipping companies will most probably sink all their ships, in a matter of days or months. So those who are in shipping, those... The countries like Qatar who thrive and drive on gas, will have no say. And this

is one part of it. Multi-billion communication satellite systems worthless. There is about 15,000 satellites in orbit and they are planning to increase it to 25, 30 satellites. All connected with AI. Everybody can talk to everyone. The new technology we showed in China needs no satellite. What we're going to do with this 15,000 bits we put up. So we have to stop it, because now we can't make it. This is the same story that they don't tell you in the West. Because you don't like to hear it. Why the Americans delayed everything with the (high speed) Internets and the rest of it?

(2:02) Because they did collect the money from the cables they (already) set up. And world of finance cannot see huge losses. So, they stop technologies like this to emerge so fast, unless you find a way through it. And we have found a way through it. And this is why we keep on asking, we need this money because we have to bring the change. Done through science and technology and understanding the world of commerce. No other way. Sometimes you can run a thousand miles, you get to somewhere and it takes you years. Sometimes you can just jump it and do it in a second. We found... We have not found that, we have planned it to be there, and now it's time for it to be there. The reason we invested so much money, which we lost was to get to this point. Now by the 'will of God' brought us to this point. So, Plasma Cars is on the table today. But the world economies, world financial powers, world economical power, world political powers, would allow it to come? We showed it

the first time in 2011, on the 25th of November. What did they do? They locked it up, and they made us criminals and everything else. But, we come from the Creator, we rule.

(2:04) But we do it through their way. If you fight them, they always have something. When they destroy themselves from inside, it's a different story. We're destroying them from inside. They're destroying themselves from inside, they don't need us to do it for them. That's because, in the next five minutes I can put on the Internet, you test it, you build it and you put it in your car, and you see if you need MaGravs, if you need. We had to show you the power of the energy to understand. Man had to go through a process of teaching and maturity, in past 10-12 years, we've done that. You separate from the matter side, you see the energy side. And now we have a way. As I said to our guys, whatever we can do, we have found how to make a flying carpet. And you will see, you'll understand. As I said, the cost should not be more than a thousand, two thousand dollars, you just buy a box and the furniture in it, it's like a house, but moves. The new drones, the new systems, you don't need ships to carry a thousand containers, how many falls off the thing, and then get to another port. You manufacture, you deliver to any point .. . China, Iran, Africa, America, minutes of it. Within seconds you are delivered. Do you need to ship, do you need to burn so much fuel? No. But the governments don't like it, shipping is a big income, a big controller, all sorts.

(2:06) So, Plasma Car will bring the change, but the economical governments have to allow it. Because the financial control, political control comes with it. And the governments don't like, don't like to see it come. But we got a plan, we know how to do it and we are there to complete it. I'm still short, as I said, very openly, you help us, we get there, you don't help us, we have to see what happens. We are a Foundation, we put everything in it, it's you who will get benefit by it. Any other question? R: Yes, definitely a quite a large challenge there, with all the world entities that are essentially invested in, and not able to change their ways too quickly. They're like those large ships in the ocean that can't turn around very rapidly, or very tightly, need time to slow down, many kilometers just, just to stop. K- The bigger the ship, the bigger circle it needs to turn. R: That's right. But, they're turning, I think. K- Let's see. But just remember, as I said to somebody very early, Don't... 99% of us as Human race are living a peaceful life for the first time. And the other 1% who are insignificant, they're trying to show themselves they are very big. War does not go around Israel or America, war goes around China, India, Brazil.

(2:08) All the other nations in Africa who are working, so, changing so much. Let me explain to you something very simple which I explained to the Iranian leadership in past few days. When we start talking about the cycle of reducing the sanctions on Iran some years ago if you remember, the Americans put

pressure on the rest of the world, if anybody talks, signs any agreements with Iran will be sanctioned. France, Germany, Italy, England and the rest did not dare to move, but they had all the contacts in Iran. The American companies, Boeing and the rest, moved to Iran and signed the Memorandum of Understanding of Relationship. When all the contracts were done, in the name of the Memorandum of Understanding, then the America said, "We can trade with them, with Iran." Americans, who already had everything signed, and Memorandum of Understanding and changed it into contracts. And they walked away with billions, created about 15 million jobs in US. The Italians took a walk. British licked their wounds, the French saw that, the Germans, why do trust the Americans, and the rest. Now comes the present situation with Iran. The Europeans and the rest learned how they were cheated by the Americans last time. This time we are all in it. French and very soon the Belgians and the rest have lost their gold reserves,

(2:10) the uranium mines, everything which was taken free for decades out of Africa, because of nations now they're producing their own gold, and France runs biggest source of their gold reserves and uranium by their new leaders, which they said, we do it ourselves, you want it, ?? you paid us 80 cents a kilo, now you pay us 200, and now they're becoming the new Arabs oil bases of the world. You see Africa will come up very rapidly. So the West, the Italians, the Belgians

and the French have no nuclear reserve. There is no Uranium going in, but France, Germany have nuclear power stations. Iran has a huge uranium resources used for nuclear. In this new agreement between America, the French and everything, the uranium mines of Iran goes to France. That's where the deal is done. The oil Persian Gulf goes to the British, to pay for the losses of first time. They don't trust Americans to negotiate with Iran anymore. They negotiated what they call 1825 European summit, splitting the Africa with other African, single African nation being in it. That's what we have in Africa now. They've done on Iran. So, the French are taking the uranium of Iran. That's why Iran has to be stopped nuclear. The British are taking the oil operation Gulf. Iran has already been split. Americans take all the political strength within the controlling the, what we call, the Persian Gulf and the Arabs. So now you see why Iran, Israel is going to... It's not just Israel. The French have been wounded very heavily in Africa.

(2:12) The same with the Germans. Now you understand where the shout of war comes, because now Iranian damages Israel, there is no reason to attack anybody else. All the sanctions on Iran is that Iran has a nuclear power, it can attack Israel. But, now it's worse. The French are bleeding, so are the Germans. Italians have lost it totally. And so, Iran is the new resources for them and they don't let America do it on their own to cheat them like last time. Now you understand. As a senior advisor to governments

we look at everything and the reasons for it, and how things move. I advise more than five nations' leaderships. Always correct, always with their point of view, not in the interest of the others. Now you see why Iran has to, the war has to, because the guy in Africa have changed the game. Now they're sitting on their assets. They used to have 1 billion a year income, poverty-stricken nations. They are poor, they are backwards, while we're sticking (taking) their gold and their uranium and the rest of. Now they're refining, they're

doing themselves, and they are in 30, 40, 50 billion income. But the income is not important thing, the resources are. How come France has a second largest gold reserve, where it doesn't have a single gold mine? All the gold is stolen from the Africans. So, now you see the game, why the war in Iran has to come.

(2:14) France has no uranium backup. Iran has one of the biggest uranium mines. That's where our nuclear industry comes from. French is pushing for war, British you've seen the Foreign Secretary and the rest, running around to do it, because they want to have 99% control of the oil. Read the rest of the story yourselves. Any other question? Q: ... I'm from Asia, where it's rainy and full of trees. In our village there are many mosquitoes in the house, causing a lot of malaria in children. I've cleaned the environment and removed stagnant water, but mosquitoes from other areas still come. I've tried using Gans of CO2 with

lemon and lemongrass, but it didn't work. Do you have any comments on this issue? I want a mosquito free environment, so that people who visit my home can feel comfortable and at ease, without being bothered by mosquitoes. K- Two things you made a mistake. You first of all, you need to use Gans of Calcium, (2:16) Gans of CO₂ and Gans of CuO. And in all of them, you need their Amino Acid (AA). The reason you can't get rid of your mosquitoes most of the time is because you don't put any Amino Acid. Amino Acid is a... Produce Amino Acid separately, leave your Gans's there and keep on topping it up. Amino Acid is a connection to the structure of the animal, and then the Calcium is the collector and the structure to the, what you call, content. Then use your lemongrass, then you use whatever else, you use ginger or whatever. You have to make that link and you have to make the link with the Amino Acid. And use anything else you like on top. With the copper it's needed because certain strength of copper will change the structure of the, we call, environment to allow life to exist. If you go a step further, use the same with magnesium, but magnesium can affect you inside the house emotionally. Brings a stability, but has other factors. And then use your, when you use a lemon grass, when you use lemon or whatever, you need that oil on the skin, not just the juice. That oil is a connection and people don't understand this. When using lemons and other materials as whatever reason like this,

(2:18) you have to always include the oil. And that's why some people do it and it's effective, and some people do it and doesn't do anything. The oil connection. You squeeze the oil to your hand and then you clean it. That oil should be in the juice, in the Gans mixture. Any other question? R: That's very good, thank you. That'll be useful to me as well. I've been dealing with... dealing with mosquitoes in my environment. K- Well, it doesn't mean it always works, but you have to find the strength that the... effects the environment you are in. Use always local material. It's like when you have a people, children with the lung problems, asthmatic. The best thing for them is find a honey producer locally. Because the bees take from everything and the small dosages bring immunity. In Iran, when I was in Tehran the last time, I went for a walk in north of Tehran, and it was amazing to see a shop with God knows how many different types of honey. It was a honey shop, honey from different blossoms, honey from different plants and the rest. To me it looks very nice, and then scientifically, for you to be immune, you will have from all those honeys because it comes from all the pollens, but your own area.

(2:20) You move area, you never had a problem, now you have a respiratory problem, go to the local honey producers. You pay more, but you guarantee your life. Doesn't mean you become something special, but it helps to increase... That's what the injections are, what are the immune injections we do. All the

vaccines they call it. They give us a little dosage of our body to build up. You do it locally with yourself. And one of the best sources of (building the immune) system, a body, especially young children, is with local honey. Where they live, they get mixed in, they're always in touch, and then once one builds up the other one builds up. One spoon, two spoon a day. Don't boil it in the milk or the... just let them digest it. The same with you, it's the way we have to connect with our environment. A lot of us absorb mosquitoes because of our emotion. I've traveled Africa for decades, not a single once I have been bitten by a mosquito. ?? Luckily up to now. Let us call it a day. Is there any question? Q: ... Hi, can I use Gans to protect plants from frost? R: I know the answer is yes to that, but perhaps you can quickly say something about that? K- It's summer, I don't know how you get frost, but maybe you're in the Southern Hemisphere, somewhere, with winter coming in.

(2:22) There are different ways to do it. Absolutely different ways of using Gans's. You have to change the temperature of the ground. Use dry Gans's or use Gans's with different extreme balances that it creates a flow. You have a ?? raw, which is, you can use a Gans as a fertilizer. The gap between the two, if they say the Gans, let's say you use a Gans of Copper, which is 60. You need to create a temperature on the plant side. So you need a flow into. You put a Gans mixture which is 120, 130 in between the trees. You Knowledge Seekers, you just do one thing and you

don't understand the whole process. This just really gets on me sometimes. But you hang a CO₂, CuO Gans on the tree and in between the trees you hang a Gans which is 180, 200 CuO, Zinc, but with connection of the two together, that the energy from the top going to the smaller one creates a heat transfer. Why do you need your plants to die of frost? Or do what the French do with the grapes. When it's going to be a sudden frost, they go out and spray water on their grapes and they literally freeze it in. This is what I tell you, Knowledge Seekers are so surface, this is what bothers us so much. You don't go into the depths of the knowledge, 'Monkey see, monkey does.' Understand the technology.

(2:24) Simple information now repeated it many times today. Magnetic field in motion create, that's what energy is. You block the energy from higher to lower, it has to release itself, creates heat. Heat does not need to be in temperature, it can reach the Soul of the plant, still does better than actually heating the greenhouse. Knowledge goes right across, not when it suits. Let's call it a day. Thank you very much. And we'll see you the next time. .. We'll be there. We still ask you for your support. We need the support to complete our work. And we thank for those of you who are supporting us in either way. Thank you very much and goodbye. R: Okay, thank you Mr. Keshe. All right, there's one last thing I'll show here, is our requested from the Universal Council. And I'll just read it. The Universal Council invites the Keshe family and the

Universal family, in unifying at the Soul level, every time and every day, at 9pm Central European Time, to give freely from our Soul to connect and elevate all leaders to work as one Soul in one direction, with Markray Corporation and Keshe Foundation, to achieve peace through technology in exchange for peace, as One Nation, One Planet, One Race.
