602nd Knowledge Seekers Workshop August 7, 2025 (Transcription, Editing and Proofing done by KF Brazil) (Auto transcription by Elias) ENGLISH
TRANSCRIPTION

Part 1

(:17) K- Thank you very much. Good morning, good day to you, as usual, wherever, whenever you listen to this Knowledge Seekers programs from Keshe Foundation Spaceship Institute. We welcome you back, and with some joy and anxiety, and some pleasure, and some reservation, today we will not teach the process of the Time,

(:18) but we teach how the process of Time has brought Man to the point of valuing and living, and what can be done and what we promised to do over past years, and now we have reached that point. That critical point of starting gradually to bring what we laid out years ago, and you're all familiar with it, to come into operation gradually over next years. As you all know we do a lot of work, we do a lot of developments, we bring a lot of ideas and we let it nourish and flourish. And gradually, as it's run its course and it's developed, we've seen it's pitfalls or whatever, we start using it, applying it, and, in so many ways, utilizing what the seed we've sown in the past for the benefit of the work of the humanity and advancement of the knowledge and the rest of it. As many of you know, years ago, some 7, 8 years ago, we launched two things. One was the Keshe Coin, and one was the Universal Identity Card in a passport. The time has come that we bring this into reality and be in charge of it. It's not that we join other organizations, we depend on the others, but we set out to do ourselves. We set out to bring a point of change in the hand of the Knowledge Seekers (KS), in the hand of humanity, irrespective of color, race, religion, position on this planet, or nationality. We are members of One Nation on this planet, we are a human race. (:20) And, on the banner of the One Nation, One Planet, One

Race, Keshe Foundation, through help of the Knowledge Seekers who work relentlessly over years to, in a way, mature the ideas of the Keshe Foundation. To bring, to achieve the goals, we do some ourselves and some others do a lot to literally devote their lives to bring the change, the concepts we put down, into working condition and reality. And today is one of those days, which the work of, relentless work of Knowledge Seeker has brought us to that point. I let Rick to play the video, which we all knew some times ago and we forgot about it. And then we'll talk about what is about to happen and how you as Knowledge Seekers become instrumental in bringing the World Peace and the unification of mankind. Go ahead Rick, please. << Plays the video of the Keshe Coins. >>

(:22) K- As we've seen, this is, you can mute the video, but you can let it play in the background. As we have seen, we talked about the Keshe Coin. At the same time, if you remember, we promoted the idea of Keshe Foundation card, Universal card, One Nation card where it's all our IDs, it's our ID passport, we need no passports, and wherever we go doesn't mention nationality, but just your name, language you speak, or which continent you come from. And now with this system, to advancement in technology (T), we can add your birth certificate number that identifies you, and iris, or a recording of your face, and your palm of your hand, that nobody can abuse this card. But in it we add the, what we call, the Keshe Foundation Coin.

(:24) Which means it's your Coin, does not matter where you are. This card will carry all you need. And it does what it says. Nobody will ask you, you are Mexican, you came here, your parents came here 20 years ago, 40 years ago, even though you are born here, you are not of this nation and this place and we kick you out. Irrespective of birthright of where you were born, just because of your ancestors. And, the only thing

they cannot do at the moment, those who went there 2 or 300 years ago, before even their family comes, they cannot kick out because they are deeper than their. We've seen the commotion, we've seen the United States in the past few weeks. And we've seen flood of refugees looking for a better life, having more money, or at least having a bread to eat, and not living in a poverty. To this effect due to the hard work of Knowledge Seeker and all the structure which is sitting around it, with the help of number of Knowledge Seekers around the world, today we introduce something which is the beginning of that change. You've seen this. This is a unit which the Keshe Foundation is putting out to bring decentralization, and in a way, connection of all the Knowledge Seekers and the whole of the planet together without relying on the Internet. Without relying on somebody's program that you can run. Without a bank somewhere say, "You cannot move your money" or "What you're doing?"

(:26) As we've seen in European countries in the past few weeks, that everything has to be done. In a way we have brought the Keshe Foundation work into working operational system. What we need is that we need as many of these units to be bought and just plugged in your house to an Internet, or connect it to a Wi-Fi, and plug it in, and forget about it. When we have thousands of these spread across this planet they can never bring the system down. They can break into it, but there will be a few computers, a few of these units, but they cannot penetrate beyond. Then the system becomes more or less unhackable << audio cut >> other things become absolutely impossible. But it needs a collaboration of all the Knowledge Seekers. We need thousands of these to go across this planet. These units will be equipped with a system that the antenna system will connect all the units across this planet and beyond this planet. Which means you're on the moon, you're on Mars, let's say you want a bar of Mars bar to

eat, you want the energy of it on your mobile phone, you use your card. A card has been developed that literally is like your credit card, you swap on your mobile phone. You swap on the system which is there and it's paid for.

(:28) Deducted from your Keshe Coin. Deducted from your investment. We introduce this system and this system will go for sale today sometime. So they sometime, what's our team in the background be able to do everything on the Keshe Foundation website. We need to have not one or two, it's impossible. We have to reach at least a thousand plus units that we can switch the system on. The beauty with this Keshe Coin which comes controlled with a card you carry where it is what we call, your wallet, your 'Coin wallet,' will bring changes to you in a different way. We value the Coin as a thousand euro, as many of you have been buying for past years, and now with the Keshe Coin, having the beauty of the control of the Markray Corporation of the United States, which we are shareholders, the profits, which is the share of the Foundation, will be shared amongst the cardholder, which means it's backed by scientific income. It's not one of these which is just in the air. Secondly, as we are the developer of Cosmic Ray in the present world of finance. Central American Bank, Bank of United States, has nothing to back it, it's just we print paper. We back our Coins, we back our Keshe Foundation Coins, with Cosmic Ray (CR), which contains all the elements of the Universe. Gold has value here, but what about you need energy in another planet, in another position. So, now you understand why we launched the Cosmic material.

(:30) If you decide, I want the backing of my Coin which I bought from Keshe Foundation, we give you the Keshe Cosmic Ray material. You can change it anywhere. All the Coins, all the Balls which you as the other Knowledge Seekers have bought and received, is photographed, is image

coded, and we know who owns what. That's why you received the certificate. With this Coin system, which we have brought out, with these machines you have no worries. Your money is in your wallet, it's in a credit card, it's like what you go to debit cards you use, put in a machine, deduct 1% of whatever it is, 10 cents for a chewing gum, a thousand dollars for a mobile phone, you just swap it. This is taking time. We have to set this up that we can bring the other processes in. But at the moment, as many of you know, I know a large number of Knowledge Seekers who started their, like Bitcoin, crypto currency, and they lost their wallet, their wallet was stolen, and everything else. And they lost everything. With the Keshe Coin, as it's an internal Coin, it's not an international Coin, it's internal and is only given to Knowledge Seekers. You say, I'm a Knowledge Seeker, we don't know you. You provide us the detail of everything we ask. You receive the card you buy your Coin and you add to your wallet. If you lose your Coin, if your Coin gets stolen, we replace it. Which means for the first time no one will lose on their Coin, on the crypto Coins of the Keshe Foundation, which is carried by Knowledge Seekers. This is not in the stock market that you can increase the price of it and make money out of it. We have facilitated, which we don't release how,

(:32) we keep the price of the Keshe Coin at 1,000 Euro. And then we change, we ?? attach it from Euro and any other currency that it can spend to that same value at any time, anywhere on this planet. It does not matter you are in the United States, you are in China, you are in Japan, you are in London, your card says the same value for the same thing across this planet. Which brings financial stability and at the same time, as we put so many of these units across the planet, no government can touch. They cannot confiscate one million units. They cannot find it to confiscate it. The hackers cannot reach to hack the Coins because we have put facilities

in it that they can go into the system, try to hack it, but immediately the system becomes replaceable.

Which means we replace the Coins directly in your version and it's become useless. And then we can block it. Every provision has been made for the safety of the Coins and this is an internal Coin. I repeat again to understand. This is usable by Knowledge Seekers, this is applicable for the Knowledge Seekers, and it will bring security and parallel. In some of the contracts we signed with some of our partners, which you will get to know, we have put the provision that we can pay the wages of our workers, scientists, the ones who make material, they can choose, "I want to keep my money in Keshe Coin, or I want to be paid in a local currency." Every facility will be made with this, that it changes the direction of financing.

(:34) No central bank has control, except those who carry the Coins. These machines are available as I said today. Once we get to the limit, because you have to get to a limit that it cannot be hacked, and we bring a network in which is secure, we release the cards that you can buy Keshe Coins. That it allows us to further develop the technology. And at the same time, in a very near coming time, we transfer Keshe Coins according to the population of a nation to the central bank of a nation. To be updated on a daily basis, that means who's born, who's died, what's the position with the card, with the Coin of that person. We will allocate a thousand Coins to every living person on this planet, which is identified, which is there to be identified. It does not matter where you live, to your central bank, which is yours. You receive the Coin, you receive the card, according to yours, coded, cannot be broken, and you spend the money from your central national reserve. Each Coin is valued at a thousand euro, so every citizen of this planet will be a millionaire from the second they are born. Guaranteed, the way we have social securities in

different countries of the rich, that we look after those. And if you are in Africa you don't have money, you die. I've seen so many dying of hunger, will go away. Nations which create war, their accounts will be closed. Nations which promote peace will be given more to spend.

(:36) Do not forget, the technology, the Coin is backed by technology. Which means, on the agreement we give to the governments, that every citizen has money to eat, every citizen is born rich, not born poor to become rich, will change the condition. I am not a dreamer, it is produced, it is there, and it's built. It needs time to take hold and go. 12 months, 24 months, it depends how you Knowledge Seekers reach your nations. How you Knowledge Seekers encourage your government to take up. In a way to back this up I carry 2.9 billion shares of the Markray Corporation, which belongs to the Foundation. We give the same amount of shares to the 115 nations of the United Nation, as the shareholders of Markray Corporation. Which means the economical life, the profits of the system, is collective responsibility of all. This gets rid of IMF, it gets rid of all the central banks. The governments agree how much each nation will put into the pot, equal, they have equal amount of shares, they have equal say. No one is bigger, no one is higher, I have bigger population, I have no population. A small nation of 1 million is as powerful as a nation of 1 billion, because every citizen in that 1 million has the same right in every other part. The shares of Markray, the profit of it, will be shared amongst your nation, amongst your authorities which you want to live in to be spent on your nations. To be spent on the locality you live. With this card, with the structure of the Keshe Coin,

(:38) with the structure of this network, which nobody can interfere with, you choose where you want to pay your taxes. That at the end benefits that area. You cannot touch the taxes, "I don't want to pay taxes to here, I'll live somewhere

else." You choose. There is no nationality. At the same time, if you want to have a living, it is different. These units, when you buy them for 2,000 Euro, plus VAT and the shipping, the Coin operator, which is the Keshe Foundation, pays you 0.2 Coin every month. Which means you earn 2.4 Coins per unit per year. As your services to support and as income. For the rest of the time of the unit. The unit is carried for 2 years, we support in every way, if something goes wrong, as we can. So, in a way, you have an income. You buy 10 units and don't put it in one place, give it to 10 people, member of your family. You have every member earning money. If you live in a rich area, you need people in Africa, they have a little room, they can connect the thing into a power supply. You don't feed them, you give them, you buy a unit, and that unit does not feed them. But the income from the unit, 2,500 Euro per year, in Africa is a lot of money. We bring nations out of poverty, we bring nations into the hand of the technological development. We are working through governments, we are working through organizations, that we back, we change the condition of the income of the Markray to benefit the humanity.

(:40) By the time we reach a point you'll have an income. You don't want the income you pass it on. Through the certificates, we have brought the designers, the developers, a beautiful idea. We become peaceful when we get enlightened. We become peaceful when we can bring something to us. With the present crypto currency you have to go and mine. We have mined all the Coins. That's why we can give it. But, we have created a structure, the designers, the developers, thanks to their wisdom, have developed a game called 'Enlightenment Game.' Which means, by playing the game you get enlightened to the operation of the Keshe Foundation, the Peace, One Nation, One Planet. You understand what it means to be peaceful. And as you develop, it's like winning a game, you are given a Coin as a gift. So, you can literally play

in a game, make a living. We monitor. We have not gone through the system of what we see with crypto currency, so much Coin that we can push it up. We have gone opposite to. The more you do, the more value is kept and the more prosperity comes to all of us. Governments decide to build the dam, need the support of another part of the world to help them to do. They pay them with your currency and we support it with a ?? backup currency to encourage. Nations who create peace will get peace dividend by the Coins, which gives to their nation. When you die, it's your wish. I carry my Coin, or I send it back to the center, that it is there for it. We have mined enough for two, three hundred years to support humanity. We are not here to make money.

(:42) We are not here doing this to become glamorous. We come here to change the course. The child born in Africa automatically is given one thousand Coins. You still buy the Coins because your support is your, their guarantee. You get the benefit from the profits of the Markray. You have guarantee of a solid material because man is materialistic and we made a Cosmic Ray to be there. You take it with you into Space and the energy of it changes from the energy of the environment to your body, it feeds you. It's a solid backing, it's not the dream. And it's only done through Keshe Foundation. You have to be, and you only buy it, you confirm you are a Knowledge Seeker, and you do. The cards are individual, the cost of loading it, you go on the line or whatever, with the iris (identification method), and nobody can copy your card, they cannot steal it, it's a representation of the two, or with the palm that is now replacing fingerprint, you are identified. You lose it, you lose the card. You do not lose your assets. You decide to buy more Coins and put it in the card, and it's there. We monitor, we have people evaluate continuously the whole operation. Any abuse, once you're kicked out, you cannot come in (again). You think I stole somebody's card, use iris

you can track it, system blocked. You are blocked, you are on the street. Because if you've done it once, you'll do it again. And then we see how we bring the system. Is the system backed, that you still can, as you are used to it, 'mining' (?? crypto).

(:44) System is backed with an income from its own Coin. And then the income from the Markray Corporation share profit of the Keshe Foundation. Now you understand how much Markray shares will be valued in the coming time. We are backing humanity with it. Now, with the gains, with some people in California are playing with it, taking it up, selling it, buying it, and playing the game we've seen in the past few months, by those who were kicked out of the Keshe Foundation, drug trafficking. And they told us how they do it, because now we know who is doing it. All this game is finished. Solid base, connecting the Markray Corporation shares value, because it's held by your nations, to the income ?? earned from your nation, to the pot of the Markray, which has become a central operation of all the governments. You want to build a .. a dam, you go to Markray, this is proposal we have for this part of the world. What can we do? The decision is made, we have the income, you can get people who would like to go and build it, they do it for you. There is no difference between a cleaner and a doctor and a professor, and a professor, which we've done today. You work 8 hours a day .. you clean the floor, you get nothing. I sit behind the desk and pretend, because I read some books on a doctor, I get a fortune, you are ??. Gone through the window. The service to humanity, ?? has a credibility to get paid to live a comfortable life. We need to set the network up, every system has. We can do what a lot of people do, put satellites and spend a lot of money and come with all that. No.

(:46) This goes back on, every man in the Keshe Foundation, every child, every woman, is responsible

to bring this network up, to bring it to the point that nobody can hack into it, and more and more can be added. The Keshe Foundation website will be on this, the stores will be on this. Everything we do will go on this network. Only those who are men of peace will be joining it, they are in it. This unit has a number of what we call, evaluators, they are continuously monitored. It's a specific number, we don't disclose, but two members of this group of validators. One is been elected by the members of Universal Council and one by the Earth Council. Which means they have a say in operation of everything. And no nation is more than anybody else. There is no way you can bring somebody because of America to do what I can do, and the rest of it. In a way, all of us will benefit from the work of all of us. We become One Nation. We are still born in China, still born in America, still born in Africa. But, being born as a child of humanity, become irrespective of Place, Position, Possession (PPP) and the rest. We all ?? bleed the same. We all love the same. And with this process we all live the same. I have committed a lifetime to see the change,

(:48) to structure it the way it is today. It needs the humanity to change the course. With this technology, Americans using Cryptocurrency, Chinese making their own currency, British coming up with something else, has gone to bed (it's over). We have made a system that values humanity and supports humanity for the next two, three hundred years. It's not something to make money off and run with, it's something which gives me respect to live with. We need to get thousands of these units into public to Knowledge Seekers, where we protect the interest of humanity, and not us. I spent years planning this, that by the time it comes into operation it's the only Cryptocurrency, the only currency, the only Coin System that has a value, because we are Humans. Does not have value because we can cheat. Because we can make

something, somebody makes today 100,000 dollars
Cryptocurrency, today, tomorrow goes to 60,000, many people
have a heart attack because they lost whatever they saved.
Value stays the same. And the nations through Markray
Corporation and through the Universal Council, and through
the Earth Council, and through the Boards who monitor,
(:50) they keep the value the same, that doesn't matter if you
are in China, or you are in Africa, or you live in Hollywood, or
in the Bollywood, you pay the same. Tomato when it's planted,
and when it's picked, does not know if it's in Africa, in
America, in China, or somewhere else. It has the same value.
It's us who changed it because of those who see value with
money. Value is something which Man created to create
separation and division amongst itself. Now you understand.
We will not change the process of humanity. Man is still go
fishing, Man still goes hiking, Man still runs a factory, but this
time Man pays with the effort and support of every Man on
this planet. When we give one thousand shares, Coins,
because we ?? pray, it does not matter where you are on
Earth, on Moon or whatever, has the same value. Do not
forget, you are born from now on as a millionaire. But, at the
same time, we are developing technology so that, for
example, you can have steak and chips in Africa, on the
moon, in New York, in your basement, working place, the
same price, through an App, through conversion of energy.
So, it would not cost that much to live from now on, ??
gradually. You had the orange juice last week, it's not a dream
anymore. So, many of you changed and felt the changes,
(:52) the honey, you don't eat anymore, because now you
haven't tapped only to honey, you tapped to all the
energies ?? of honey. And that's how you'll be. So, thousand
Coin, as a value of the present one thousand Euro, only one
thousand Coin, still one thousand Euro in a hundred years
time. Because, you'll ?? buy the same, equal to all of us.

Manipulation, stealing resources, colonizing, kicking people out of your country after years they've served you, just because I am white, or black or whatever, comes to light. Because we're all One Nation, we all work as one social structure to keep the humanity. The reason for this, the benefit for this, is when we get to this point we become peaceful. Drug traffickers have nowhere to go, as you've seen, you smoke cocaine, press a button, the addiction goes. I don't need to buy. We have automatically end up with drug trafficking. You're a criminal. The judge tells you, you have to spend three hours on the phone connected to social structure of you becoming joyful, you don't commit crime. It's not a dream. We become so good that we can even separate the Souls. If you don't understand what this means. If you are 'Beautiful People' now we can see both (Souls) at the same time visually through the technologies which we developed. (:54) No person can be persecuted, put in a mental hospital, given all sorts of injections, because we as humanity failed to understand the life of two at the point of birth. Not the life of ?? who we created through misconduct of ourselves. And still we can. In the coming weeks I've got the permission to show you this. And you'll understand how advanced Keshe Foundation Technology is. If we can plan out your Soul energy, your inner energy, the way you call it, spirit, planned out, we see the effect of your behavior in your physicality, then you know what we can do with you. We can change you all to be as I said, "I made Man in the image of Myself." We make Man the image of the Creator, perfection. It's not a talk. When I show these pictures to you, you'll be shocked. Today is not a time for it. We'll show you how beautifully we see your Souls. How we can measure everything about it. The introduction of these Universal Units is to bring the change to humanity. And Keshe Foundation on its own cannot do. And if we give it free, people just put it aside, "Ah, there's something there." "I haven't had something in my life." Man has respect

for what he pays for. Every time we have given a service of the Keshe Foundation to any Knowledge Seeker it's been wasted. When they pay for it, they stay there to get it. And this time, as Knowledge Seekers we are responsible to bring that change.

(:56) And Knowledge Seekers with the knowledge, have set up the structure to bring that change, because they believe in it, as I have, we worked on it, as I have, and they have, and the others like it. Some of us have the money, some of us have the ?? talent, some of us have the knowledge. Every one of us has participated in this change. And this system, which is on the screen, is the beginning of that change. And it has to be implemented fast that we don't let governments and those who see their interest in danger to be touched. You'll receive a box, which you see (on the screen). This box will have an attachment, separately coming to you. You connect that attachment to this box. For those who we choose to give that attachment to, in the package, it's ?? not all of you. This attachment connects wireless, all these systems together. In the future the energy supply will be supplied the same way. Which means, if the Internet falls, the system doesn't fall, the communication, the data is not gone. You still can cash your Coin. You still can live your life. Nothing will be lost. And as I said, we're the first private group, Coin, because we all build it together. They steal it from you, you've lost nothing. You prove to the structure that the thing is wrong, and we can follow it, we see where it's gone, we dismantle the Coin, we give you a new one. Not to worry.

(:58) I know so many Knowledge Seekers, so many friends who have lost their livelihood by buying crypto currencies, and their wallets have been emptied by thieves, who could do. Let them empty. We have a million, hundred thousand, twenty thousand of these units, ?? unlimited. And secondly, we have foreseen, the team has foreseen, the people who work on it,

that automatically a second system, a fourth system, a fifth system, a tenth system, will be sent to your house to change. You don't need these to get a card. A card, or cash currency, digital, is for your personal use. These machines are the network system. These are the satellites of the Foundation across this planet. And we need this to become untouchable in bringing peace in getting governments and nations to work together in a way because you are a millionaire. You are happy if your government when your child in Europe born they give you \$200 to buy a present or something and you have to worry. You ever been in the shops where a mother picks up a food for the child, changes it because she can't afford it. Use, buys the most rubbish thing because .. Now she can, she can give the same luxury as the richest man on this planet. This way we bring the talents of the humanity, we make man peaceful and a child is born in the house where there is love and no worries for living. (1:00) You should not be born on the streets of Delhi, on the street, live and die on the street. I promised I'll bring the change. Now, with the help of Knowledge Seekers, some of you worked in the background with this you know exactly who you are, and I thank you for it. Those of you who developed it, those of you who are working on it. The man who set his life to bring this change, because he knew how it can be done, and how the Ethos of Keshe Foundation can be brought to reality, I thank all of you. Those of you who helped us, those of you who brought everything else in. And I've said, and collectively we come to that point, One planet, one mankind, one currency, and one rule of law for all of us irrespective. Because nobody can colonize anybody else. China gets the same amount of shares of Markray as does 'Isle of Man.' As does another nation. Voting right is equal, is an economical forum for betterment of the humanity. And we have put enough reserve that we can support nations and governments for two centuries to come. And by then man becomes man of space, and all these

games he started as money ?? (will be gone). I hope, as Knowledge Seekers, I have given you to be proud to be, as Knowledge Seekers, now it's in your hand, to make sure, what we believed in, what we came in, delivered to bring the humanity.

(1:02) Buy the Units, give it to us, tell us to us, give it to gift. We give it to give. We make sure who receives it has electricity and a phone line, or connection to an Internet with a Wi-Fi, whatever, that can support the system initially, till the, what we call, the antennas and the other systems, which we are developing and is developed, is added into that it becomes independent. And then, again as it is, progress in development in the coming time. We are not asking you, we are telling you, you want to bring the change. You've been your dream to create peace, it's on your screen, you can go on the website and buy 10 units, 2 units. Please don't ask us, "Can I use my Keshe Coin of the past?" This needs to be done separately. In the future, we convert all your Keshe Coins you bought to a Cryptocurrency in this unit. Which means your ?? self, you can spend it, it's yours, do whatever you like with it. Or you say, "I gave a donation to the Foundation, stays with the Foundation." This way, you can exchange, go anywhere with it. With giving the Coins to the governments, giving the shares of Markray to the nations, we guarantee that no bribery is there, because all the Coins is shown where it is. Nobody can steal. And every man is in it to live a comfortable life. We know there'll be abusers. We don't close our eyes.

(1:04) We try to find a way to convince mankind to change position. There'll be those who sit at home because now I have this, my government has to pay. You have to find ways to do. Don't spend a million, it's not yours to go today and buy a house because now it can be changed to dollars or whatever and starve the rest of the year with it. We set

structures for this not to happen. You cannot empty the wallet of lifetime. You live a hundred years, you have one million. Spend it wisely. It's there to take poverty away. It's not there to create another mayhem. I hope I've given you what you've been yearning for. But my hope is not good enough. If you as Knowledge Seekers and the Human Race, does not work to bring this system into operation. And, surely we are not giving it away free, because Man has no respect when he's given something free. And in time it will change. In next few weeks we release the Keshe Coin as a valid currency within the structure of the Keshe Foundation. You can buy things from ?? each other there. You can pay and in turn you start trading in it, to buy a soap from the Keshe Foundation, to buying another thing from another Knowledge Seekers in another part of the world, and gradually the more you use it, the more prominent it becomes, the more it moves up.

(1:06) And as we set up, as same contracts we signed in China and the other contracts which are coming up, you will see it, will bring to us, will bring to the partners and operation the use of the Keshe Coin. And hopefully in next 10, 20 years it'll become what we strive to and what we wanted to achieve for humanity. Now the Coins are there to play, we need to set up the system that we can protect humanity's interest in getting out of the hand of central government, centralization of the what we call, finances, and trading amongst ourselves. And then gradually ourselves becomes the whole of humanity. As I said last week, knowing that this week will come, we make sure no child falls hungry to bed, and no man has no shelter to live. I've done my work and now as we say in English, the 'ball is in your court to play.' A system which actually pays you to keep it. You become like people who work in old people's home, they give them an old man and they say, "We pay you to look after him." We give you the latest knowledge, the latest systems, and for you just to plug

it, and let it play on its own. And this guarantees that your children, your neighbors, your family, does not get abused by the others through the lack of ?? funds.

(1:08) ?? We will not see children being trafficked, because the parents have to sell them to have money to live. The child is already millionaire, humanity has paid for it. Gradually you see an end to these processes. Nobody can cash your card, because your iris, your ?? hand has to be in it. Now in this ?? abnormality scene, the monitoring group blocks the card, blocks your value, till you clear exactly how it is and you're safe. You have enough to live. I hope, we have fulfilled part of the promise, and with this, there are more things to come, gradually build up to what we promised. Not to be governed, but to live, have the right, to have a decent life from the time of birth to death. Nobody can cash somebody else's card because there's a limitation how much wealth you can ?? keep. But you want to live, go on and play the game of peace, enlightenment. You still work, you still trade, but you don't have to worry about, "Am I going to have food tonight?" Some people will abuse it, but in time, they'll use it to improve their self. Thank you very much in giving me the time, the opportunity, the trust of our past years, to build different part of this with help of Knowledge Seekers around the world to change the course for humanity. And this is not a talk. You all have your Coins, you all used ?? and allows bigger change. But now it's in the hand of the Man and no governments.

(1:10) We go for a break and then we come back. And we'll see where we go. Rick, would you like to take us for a break?

>> BREAK >> 602 KSW August 07, 2025

Part 2

(1:18). (....) K- Not much, I think I've said enough, I've created enough headache for you Knowledge Seekers. You wanted a change, and the change is on the table. We need to bring this change about. And we need to balance this change in the correct way. It's not going to be all 'milk and honey' as we say, but it's a beginning of the time, to make sure everybody gets some milk and honey. Place, Position, Possession does not become the cause of superiority. This is important to us because, whether looking down the line, as we become part of the Universal Community, they have no banks, they have no charge, they get here, they have access to everything, because they know how to tap into Universal energy. Till that point, mankind needs help. And this is an interim position, it's an ?? Interim solution to bring the change.

(1:20) And to allow the change to happen. And one Man cannot decide the fate of so many. We have a beautiful say in Farsi, I love the word, the expression. It says, "It takes one crazy Man to throw a stone in the water out, and destroy, block the water. And it takes 14 intelligent Man to find a way to get that stone out." And now we have one of those running, one of the leading nations in the world, and the rest of humanity is suffering and cannot get it sorted. So many people have lost years of work, so many people have no home to go to, where now this will change. You can live any way you like, you choose who you want to pay taxes, and where. So it becomes more attractive for nations, to attract you, to be there, to make it easier and cheaper, more affordable than actually .. kicking you out because somebody decided (one) color and race is better than the other. Is there any question I try to answer regarding this technology, and this new development? Don't forget. You asked for change. It's exactly what I did years ago. When I gave the key of the

technology to the governments many Knowledge Seekers left the Keshe Foundation,

(1:22) he is one of them, he's given it to them for them to decide. Now I've given it to you first, you got two months to move. When I give it to the government, God help you. The first thing they do, they try to dismantle it, because they see they lose power. If we set up enough of this system across this planet, that can now be interfered, nobody can touch it. You are in charge. You buy a ?? cell, you live, you educate yourself. All the Keshe Foundation teachings, all the archives of the Keshe Foundation worldwide will go into the system. You find out in maybe a year time you need to upload it, upgrade it, and additional, what you call it, memory bank, to be able to house everything, which is getting loaded. And then we support you more and more. And how we can bring that change. I'm doing a lot of work with different governments. I'm doing a lot of things to bring this about. And in the next few weeks we start delivering step by step this technology, this process, to those who can bring the change. They appreciate what it is, how it is, what it can be. So now we have to work together as fast as possible. We need at least 2,000 of these units in public around the world.

(1:24) Don't forget, it's a good investment, 10% return on the capital, and at the same time if you hold the system for 10 years the valuation on you paid 2,000 Euro, will worth 24,000 Euro. Because every year you receive that 2.4 Keshe Coins which is valued about a thousand. Give it a gift to your son, to your newborn child and put away without you do anything further. Investment of Keshe Coin. And when he grows up. When he's 18, he has 72,000 in his bank and it's done nothing, you just paid 2,000 for it to start. And this is what we need to do, this is what we have to do. This is not something you pay as a membership, 2,000 every year. You buy it once, you set up part of the network. In a way we're setting up the

biggest memory bank, the biggest network that nobody can break into. And you have created an investment for your generation. If you buy 10 of them, and put them in 10 locations which have got nothing to do with each other. And you have put away a quarter of a million. If you are money oriented and if you are not and you say,

(1:26) "I have the money, I pay for 20 units." We give you the list of the names and the nations, they come from Knowledge Seekers we know. And you decide. Give them a lifeline. And you give a chance for humanity to become untouchable to all this craziness we've seen, especially in past six months. We always said, if you are English, it says, how many blondies does it take to change a light bulb? How many blond men takes to change the whole humanity, and what I call, what man built for centuries? One. With this we don't have any more Egos because we are all the same. I'm not richer than you. Because hey, you want to run (for) an Office and everything. I'm a millionaire like you are. I don't need you to tell me, humiliate me to work. Bigger things just to stay alive. We'll take this away from the framework and you'll see how humanity changes. If you look people work two shifts, three shifts, day and night just to have enough. Work lifetime just to live, to put a food in the mouth of your child. Now you don't. That time is over. And I promise, by the time I go, I change the humanity and this is the beginning of it. I'm not doing it. Everything is done, all it is, you have to apply it. There's much more to come, transportation, transmutation using these systems. Gradually we explain to you what happens. (1:28) As I've said many times, if I tell you how beautiful the other side is, you all commit suicide. And make this life so beautiful that they'll know one needs to commit suicide, because it's what is on the other side. So I leave it to you, you decide how you play the game of your life. But don't blame humanity. Go to your government. Say, "We have 10 million people in this

country, we can get 1 million dollars." And every man will get it. It doesn't go to your government. You collect, you do and we live. You remember when I gave the (USB) Key freely to the government, the first two were difficult and then we couldn't stop. Every day, every week we had a call from one government and one embassy. Can we have the Key, can we have the knowledge? Even brought President Obama to ask for it. You do your job. Go to your government and say, we don't need to, we have set up an independent system, we can all live. And funny enough, we own companies which pay us to live. And we would like to give you according to every man and woman on this planet, on this nation, a thousand shares. That you can cash, and tell everybody in your government, in your nation... << Recording accidentally interrupts Mr. Keshe Sorry about that >>

(1:30) K- Okay, have you heard what I said, or do I have to repeat? R: Yes, it just came in. ... K- ... So, let's play the game. This is the game of life, you see, it's a life changer for all of us. And I've done my part, there are still teams of people, there are individuals who put all their life, day and night, to bring this change. In different shape or format. I had the pleasure of sitting in front of the woman yesterday. She told me how she has organized as a Knowledge Seeker to bring the Keshe Foundation into a structure of the Universities. Full research, full development support and everything else. And I thought, "Hey, I didn't want to talk to this woman six months ago, because she came out with a different thing." And now, I see what she's doing, what is there. And, since everything is organized, I can organize everything you want. That, from now on, we can bring PhD's, do research on the Keshe Foundation technologies and everything. And I have met with other Knowledge Seekers in past few weeks that they have established companies, that they want to bring the companies through the technology into

Keshe Foundation that it changes. We see the change, we see the movement. But this is one of the most fundamental things that we need to do, to get rid of central control. We are all in charge, we are all in control of.

(1:32) Get rid of monetarism that whoever makes more, how you can fill up the taxes. And brings a position that hopefully in the next few months, when we go into the full application, we can feed the world through this. One million will be a lot of money to spend when the food costs one cent. For every meal, as much as you can take energy from. Now you understand. We have to end now with this technology, with this opportunity which has been created by Knowledge Seekers. What I call, Vatican City. They do not know how much to steal and rob from the nations. And outside people live in cardboard boxes with starvation. We don't have religions, we have no religion. Money making system. This doesn't go with no religion, this goes with a commitment to serve humanity. You don't need to pray five times a day, and you don't need to go and bang your head against the wall, and you don't need to go and change the regime. I decide I'm going to change the regime. There are no regime, the only regime left is how much you want to lose weight. If there's any question we'll try to answer. Q: ...

(1:34) During the Keshe Workshop of Thursday, 21st of April, 2022, you called for support, I did donate 100 Euros immediately, and then asked if it is possible to give a loan of 1 Keshe Coin. You said that is possible, and I did a payment of a thousand Euros to ABN-AMRO, then. But I never got a confirmation of this. I have a screen print of the transaction. How can I proceed? Thank you Mr. Keshe for your generosity. K- Every Coin you bought we have a copy of, we have registration of. It's not lost. Unless you paid something goes by accident in the books, you have a proof, (and) we have it (also). A share certificate, or a Coin certificate has been

produced in the past two, three months. And those of you who need it, you can ask for it, you'll receive it. But no one who's bought a Coin you lost the Coin. After, if you read the text which is on the Internet, after January, you can ask to change your Coin into digital. Which means, when you receive the card, you put that Coin on your card. You can spend it, do whatever you like with it. Till then, if you ask, you receive. We had to do these certificates for the banks because they asked us. It's not something we're just doing it. Some banks, when the Knowledge Seeker is for the Keshe Coin as donation, they wanted to see the certificate. So it's produced to that purpose. It's not just because I say so.

(1:36) And if you want a copy is there, because we always worked on the trust. And your Coin is not lost. Many Knowledge Seekers buy 5, 10, 2, 20 Coins, and they shop, and they keep on reducing from their Coin. Many Knowledge Seekers use this facility. (Sorry, I had a very bad cough, and cold in past few days, so I have to keep on medication to be stopped). So, you have not lost your Coin. If you want a Coin, or when it comes to... after January when the system is fully set up, you receive a note, "Do you want to give a hard copy or do you want to get to make it digital?" But it's been there. We haven't lost a single Coin. They paid, who paid, how paid, which bank paid, it's all registered. A lot of Knowledge Seekers shop with Coins, continuously. Every month, every year, every six months, they just buy more Coins and like the products. They buy products, it gets deducted off of their Coin. The functions we have once a month, they buy, there is conferences, they pay with. It's very normal. It's a currency we already use, it's not something you put away. But if you bought a Coin and you kept it, or you have it there, it's there. You can shop with it from the, what you call it, or in the coming time, because I know, in about a two, three years, one or two years, there'll be thousands of products on this

platform of these systems that you can shop from ... shop on. And this is what it is. This is the beginning of the revolution in condition of us. And because we have done it before, we know how to do it, we're backing it with the material, (1:38) we're backing it with the income of the stock market company. And we know it's a Coin which pays to be, and then you'll see a larger scale structure of it in the coming time. If you remember we launched the Coins nearly 7, 8 years. R: Are you still there Mr. Keshe? K- Yes I'm listening. If there any other questions I can answer. Q: ... Yeah, actually, I sent a message a month ago, regarding me asking a question, then he'll be able to join with the company over here, in India. So, I talked to my company... K- Can you please, can I stop you please? Write to the, where you send the email, because everything was made ready, prepared for what you wanted, and this does not work. Yeah? This you have to write, this is not a place to talk about it. Write to the Foundation, the email and you get response.

(1:40) Q: Okay Mr. Keshe. ... K- ... Thank you very much. Just because this is to do with the commercialization and we don't want name of companies and people to go out, because we know what... there are so many people in the background can damage things and create problems for you and the others. So we protect your interest and our interest and everything else. Q; ... it's been ... K- Thank you very much. Q: ... Everything's good, just a little bit exhausted today from... pulling out the vines, vineyard. No more, no more wine. K- Why? You had enough drink? Q: Yeah, the way the... they're not offering enough money, it's not worth it. And I'd rather put it into Keshe Coins or something like that. K- It's a strange, you know, when I look at how do the farmers going to live, the way it's going. Q: Yeah, it's getting harder. Getting much, very difficult. A lot of farmers here are going broke. So,

they're looking at alternatives. K- What are you going to do knowing, you've been around a long time with us.

(1:42) What are you going to do knowing that now people can get fed with one cent on a mobile phone than having a wine from a vineyard? Q: Well that's it, I'm pulling them out. I still got fruit, fruit trees and some people still want to eat the fruit. I've got fruit trees, organic and you know a few veggies. But I'm your age. .. K- Which means you are very young. You know, you know, an old say, they say the one with the black hair can, but he doesn't know how. The one with the white hair, he knows but he can't. The best is your age and my age, a bit silver, grayish, white, we know, and we can. So it's a good age to be in. We have the experience. Q: Yeah. I've picked up a paintbrush now, I'm doing a bit of artwork, just to keep my, take my mind off the world events. It just seems to relax me. Just a question on the new unit. What's it called again? Sorry, the 2,000 Euro units. What's the, what is it called, sorry? K- Well look, it's on the screen. Rick, would you like to bring it up? (... ..) Q: ... If I purchase a unit and you know, my life is going to be whatever, how many years left?

(1:44) Do I, can I pass that on to anybody or does it need to be... ? K- Yes, yes, yes, this machine will runs for, as long as it runs, till it goes, it breaks down or whatever by age. You don't need to do anything with it, you just put it on the shelf, make sure it doesn't heat up because it runs 24 hours a day. And make sure there's no dust on it, that it clogs it up. Yeah, you can give it a... With the Keshe Coins, which come through this operation, if you decide, if somebody decides in their Will that it's, put it back in the central, what you call it, 'pot' as we call it, it goes back in the central pot. If you want to share it amongst your children, you have their machine, then it's your right. Nobody can ask you. We don't interfere, there is no interference with this one. The Coin is on your card is on your wallet, it is yours for life. But, as we have put .. We have set

up a structure, that the world population can change, 14 times plus, and we'll still have money to spend. You understand? So, you can put it back in the pot if it's a Coin. The machine, you can leave it to somebody else, tell them don't unplug it, because then we have to find somebody else to put something to cover your spot (in the network). Q: When you say don't unplug it, what about if we have a power outage? K- No, it doesn't matter, it reboots itself automatically. And everything is automatic, it reboots itself. It's just that we need to spread this as many as we can. We need at least 2,000 to stay secure from hacking, or from interference, or bringing it down, or going out. Because, and secondly they do, they can do 5 or 10 units.

(1:46) The other units will carry on doing it. Q: Can I purchase more than one, or just as one per family? K- You can purchase as many as you like. There is no... You can have two in the house, put one up, one down, whatever you like, you want ten, but what do you call it, it gives more or less, if you look at it, it's 12% return. Which is huge. But because we pay through the Coin, at this moment it might not look much, but each Coin is about, its value is kept, it will be kept at 1,000 Euro. You understand? If you can look after it like gold, that doesn't get damaged, which is a nice dry place, because they work, they get heat up and whatever, you have a milking cow. .. You understand? Q: ... Just another question with the Cosmic Ray Balls. And one day when I'm gone, where does the Balls go? Back to you? K- No, you, we, you can tell us, you people can tell us what it is. If they don't know it, they must probably throw it away, they think it's a marvel. But, if it is what it is. You can let us know if something happens, we can't know. We know this happened very recently in past week, a Knowledge Seeker who bought one died by (before) the time we could get it to him. By accident, total accident, young, young Knowledge Seeker. And one of our Knowledge

Seekers was responsible for it. He was distorted. What am I going to do with it? So just sit and wait and see. Inform his family. This is what is bought. This is what it is. And what can we do, and what can it be done? And we'll see how it takes shape. You can return it to us.

(1:48) But if you can afford 10 units and we give it to the... Because this is an income earner, you understand? And if you find it, how 200 dollar in the next... We don't want to say anything, because the profit, what we pay as Keshe Coin with this machine connected to Markray shares of us, the profit from Markray share can change a lot of things. I structured it this way. And when we lost millions, which we came to you, and you lot helped, was to bring this five years ago. The structure was set up to... Whatever you... we are offering now, to be brought up, to bring the peace earlier. There was different plan for it, and we learned a lot from it. But, if you have, let's say, 50,000, you can buy 25, it gives you 50,000 for next 10, 20 years. And, after the first 2,000 we stop this, because we think 2,000 to 10,000 secures the network. You understand? And, over first 2,000 we give this incentive. Then next, we see we are secure enough, we reduce the payment and then the rest of it. But it's a lifetime contract of the system. But paying... Q: Fantastic investment. It's a great investment if anyone understands it. K- Yeah, we're investing in humanity, not on return.

(1:50) .. Passed 3-4 years after this incident, which I put a lot of my personal financing, and I'm, before that. And many Knowledge Seekers helped. I said to myself, and I said, "I must have been a fool, financing millions and millions for the Foundation." I could have bought myself a palace, I could have bought myself everything else. I put Foundation and its progress ahead of my own private life. But now we see the change. Now we see the development of technology. While this session is going on, while we are teaching, one of the

biggest revolution in science ever is happening in the background, I get reports on. We are monitoring the Soul of a person. I get the pictures continuously, where there were two Souls, and they think the person is crazy, or something else. But now they see there are two, physically it's there, and we have facilities to allow it to happen. The person can see. You've never seen this, when we say, and this is knowledge, this is a game changer for many, many things. Why do we put a young person into a mental institute when we don't understand? When I set up two Souls years ago, if you remember the teaching, in the same body, now we build a system which is showing it is (has) two Souls in it. I can show it to you. I've got the permission to show. He never seen, but now he manages, maybe can even mark your Soul. Once we finish with this process, I have permission to show for the knowledge to be spread on, to take up.

(1:52) Changes pain. This young person suffers for life, because everybody thinks he is crazy. He's not, it's there. And we have the facility, we have the knowledge to allow the energy to be absorbed. We don't kill, we make one of (of the two). And it's beautiful, one day, once we finish with this process I will make a file of it, and I put a session, the way we did with the MaGrav system. We put a session of teaching, just for you to see how two Souls exist in one person. And that's where the money goes. It's worth more than anything in the world, when you see a person seeing, "I'm not crazy, I'm... I don't have this there", we see it, and we can set it up for it to, and for the family to see the beauty of it, the child is perfect. You understand? This is the beauty of a knowledge, not selling a Gans Ball or whatever. We had to do those (things) to get to here, to understand. Q: I did approach the military in Australia to suggest to them that there is a solution for post-traumatic (stress) for soldiers that returned and are suffering. And they didn't really want to know, so I'm just wondering,

when will they understand, that what this, what you have, is a game changer and helps a lot of people? K- A Knowledge Seeker years ago told me, not a Knowledge Seeker, it's a guy who was around, you know, Keshe Foundation.

(1:54) I believe it when it's on CNN. So, we have to do enough to get on the CNN people will believe us. But, we have enough that we don't need CNN. It's just having trust in ourselves it will bring that change. I always say... It's good to be there, it's good to see you can change things. It's good to see we have gathered enough knowledge that we can help each other. You understand? And we are just another, what I call, block on the building. There is more blocks go on the top. I always say, "The most beautiful time for a Human race comes when Mitra takes over after me." And, the love within her is beyond imagination. The Daughter of Mitra will bring the love of Universe. And we have to let her grow in her infancy the way she is, and just monitor. And then you'll see the beauty of the Creation. I'm doing all the rough work, clean up, and brushing humanity. She will take humanity to the Garden of Eden. And then you enjoy what life is. Q: Yeah, I'm just looking... It's just nice to see... there's a bright future ahead. K- It is, if we strive, we will do. If we, we decide to do, we can do.

(1:56) And, it's how we understand each other. That's the problem. We prefer not to understand. If you... I was listening, you know, you're... I know you've been very much closely watching Palestine the rest for past years with me. What came to me in the past few weeks its that, in whose God's name we allow two thieves with criminal records, one about two and a half thousand cases, and the other guy with thirty, forty cases, decide that they want to change the regime of a government of eighty million. Change of regime. Killing another world leader. I say on the street I want to kill someone, they put me in prison. How these two are doing it I

don't understand. We have to go so low that we can't go any lower than anything we do, it goes upwards. I think we are in that ?? age. Q: We've had a beautiful protest in Sydney, Australia. 300,000 people were walking across the Sydney Harbour Bridge. It's wonderful to see that there is a lot of support. K- There's huge amount of support. I saw a report very recently where the soldiers have been told, shoot the children, parents will leave the country. Is this, or shall we do this with you and your child, and see if you run the country?

(1:58) If you leave, we'll do this with you. There is a, there is an exodus of Israelis out of Israel. And many of these people are ex-IDF who killed many. And they think by escaping the country, they don't know they still have to pay for the rest of their lives and their families for what they're escaping from. They're escaping from physicality, but what's in their head, and what is set up by the Souls will not escape you. This is the picture of life, what they try to ignore. And we'll see in time. We'll see in time. We'll see what comes up, and what goes up. As now we've seen these pictures, I don't know if you've seen it. It's the security pictures, it's not open to public pictures. One missile has hit a central, what we call, nuclear center in Tel Aviv. They put the nuclear material, the everything else, what they call this, you know they said the Palestinians hiding everything under a hospital? It's because they do it themselves. They don't do it, but they do. Because they do what they think others do... We say in Farsi, <Farsi language >>. One who denies the God, he thinks everybody else is Godless. This is the story of this tribe. And this missile is one of the last missiles which was released by Iran, has destroyed 28, this is a statistic from the Israeli security, it's videoed,

(2:00) you will see it one day, has destroyed 28 high rise apartment block, because on the basement of these blocks was nuclear warheads, and training center. You multiply,

usually Jewish buildings has 6 or 8 or 4, usually 3 to 4 people in it, multiply by 20, and then you see how many people have been wiped out. And then, what are the figures? 28 by 20 is how much? 560, correct? Now multiply it by another, let's say, 4 apartments per full-home. 2,000. Let's say 3 people per apartment, 6,000 people wiped out. Where is the statistic? All these buildings were empty. You understand? And if they were empty, they're all in the cellars, the whole building is on top of them. They're buried in their own bomb shelters. They can't even get them, to get them out. Now you understand. Total losses of the Israelis is in excess of 100,000. I've just received some information ?? that's correct. There are people who are still dying from last month accident, they couldn't survive the damages. ... Q: ...

(2:02) The anniversary was yesterday of Hiroshima. I think it was the anniversary, 80 years. And many of the survivors are wanting for nuclear weapons to be banned. And could they know from experience? K- Keshe Foundation has put a proposal, and this afternoon before the teaching I invited the Russian nuclear team to join us. We are setting up a consortium of Chinese, Russians, Iranian and Keshe Foundation, an organization or scientific group to build, we have the knowledge, it's just building it for everybody to see that we can use it to build a nuclear power station, nuclear system that has no nuclear material. In a way, we produce nuclear radiation that in the slowing down creates heat to be used for power stations, because we can't close our power station, but we can get the fuel rods out and replace it with this new technology. There is no fuel in the reactor, but it creates a radiation, which Cosmic Ray radiation, which creates that process of the radiation. And I asked my officials in Iran, "Can I?" They said, "Yes, go ahead." To set up a research team there will be most probably 200 of us very soon, to develop the first non-nuclear nuclear power station.

And the minute you switch off, there is nothing, because you close the radiation there is no more radiation. We have the knowledge, we already built a system which can confirm it can be done.

(2:04) Are we going to kill our nuclear physicists more? And this is the craziness with this. ?? monkey from Ukraine called Mr. Netanyahu. We'll see. We'll see what changes will come.

Q: Thank you Mr. Keshe. Thank you for all what you do.

Thank you very much. K- I actually, I read you just what I tell you. I read you this is a message to one of the top officials of the Russian structure. And then you see what I tell you is exactly what it is. And we are close communication with Russian teams. And I read you to see it's not something I just say. I wrote, we are setting up a joint collaboration research for development of non-nuclear material radiation nuclear power plant. This meaning system which have no solid nuclear material and there is no radiation and nuclear waste. But creating nuclear radiation that can be used to run a usual nuclear power station for electricity. This is a game changer and a developer of the technology. As a developer it is an honor to invite our nuclear scientists, our nuclear scientists from Russia, to join us in this development. In fact, we have all the benefits of nuclear power station without having any waste and no possibility of nuclear accident. Please let me know if your government is interested to be part of the project.

(2:06) This is how we work. I work closely with Russian nuclear physicists, Space people. And this is transmission time is today at 14:21, before I come to teaching. And before that I was negotiating with the Iranian nuclear physicists, and I was negotiating with the Chinese. Let's do it. And this is how we are in a position of to bring the change we have to do. We'll see. Now I put the game, you Knowledge Seekers kept on telling me, "Ah, you gave the thing to the government." Now I give it to you first. You don't do it, I give it to

government and then see what they do with you. The conditions they put for you to get to your Coins. That will be interesting. Do you know what you're going to say? You didn't give us enough time, we needed 10 years, you give us 10 weeks. You got 10 days to change it. Any other question? Thank you very much for all your support. Always appreciated your generosity on working and bringing that change. Q: ... Good morning Mr. Keshe, good morning Rick and good morning everyone.

(2:08) K- You're still alive. Q: Yes, I'm still alive. K- I thought I killed you this morning. Q: Mr. Keshe, I have a few questions regarding this system and the Keshe Coin. You see this system, what's the relationship between this system and Keshe Coin? If you have a system, you have to have a Keshe Coin, or you have a Keshe Coin, you have to have a system? K- No, the system is... when you have a bank you need a network of being able to run your bank. Yeah? That, if you go to any ATM, you go to any branch here, you have an account here, this is how much you hold. Yeah? Needs a structure, this is the structure. All the data of the Keshe Coins, all the data of the stock is kept and these have access to it. And nobody can break into it to take your customers, you take it, we put another one up and replaces what you've taken. So, it doesn't work. These are minicomputers without a screen, without anything. And, this is the way, because there are two things with this technology. First of all, the network connecting to each other, they are connected. Secondly, we are adding a Cosmic Ray antenna to this, which means it connects it to every single unit across this planet. You understand? And there are a lot of advantages into this, so we don't need communication system. If you've been on the systems with Dr. Kern or some of you received those Twinity systems, you put the thing on your head and you have the unit in front of you, you have no connection, because we developed this

technology of connection, connecting. And we use it extensively in our development.

(2:10) So, this is the building. What you see is the building, what's inside it is the furniture. The Keshe Coin and the other things are people who come to use it. You understand? Q: So nobody, so not everybody needs to have this machine. We just need to... K- No, no, no, no, no. This is a... Do you carry a server on your back, wherever you go with your mobile phone when you go on to different Apps? No. This is, instead of having one central computer that anybody can attack, attach, whatever, now we have split this to ten thousand. It's got to go ten thousand if you feel comfortable. We have to find a way to get as many out. So now, these are all minicomputers. You see, this is... I tell you what happens. You know they say, you say, "I got hacked, somebody's in my computer." They come to load a system like... they come to use a computer like this. To use it for their data storage and the rest of it. So, this does that, nobody can go in it to do anything with it. But you create a facility, and what you call it, house or whatever, for this to run. Doesn't do harm, it doesn't interfere with any of the things you have in the house. It's just a little boy on his own in the corner playing the game. But it spreads the risk, and brings a connectivity that everybody is safe. The Coins are credit card. You've seen it. Rick can bring it up. The Coins are credit card, you have money in your pocket. Doesn't matter what's in the bank, how much, what goes on in the bank, you know. When you want the money you put it in the ATM. And with the cards, you... there's an App, we'll promote it. You can literally, in the house you're shopping, instead

of sending your money to a bank or going to... getting your bank pay,

(2:12) you just swap your card on your mobile phone and it pays your bill, because the bank will accept the Keshe Coin. We can't tell you too much what we are doing, because then

we see what happens. The minute we say we are doing something, there's a bunch of terrorists in Germany and in Belgium. They start moving, they think they are very big. But, in a way, they shoot themselves in the foot, we have no problem with it. But, this is a... like a ?? part, you can't spend it anywhere, it will not increase value, nobody plays with it. And, like a Keshe Coin, was internal system. But this internal system will be internal system for the whole humanity in the coming time. Because, there is no IMF, there is no Central Bank. There is no Cryptocurrency of Chinese and the other one making theirs. This is everyone's Cryptocurrency. What I see, you remember when I told you, the time will come that the Jews will jump into the water to try to get in? And just one second please, I have to do something. (pause) So this system is to spread the load that we are all in it, and we all protect human race. Next ?? move. Q: Okay Mr. Keshe, so with this system, if you see how your technology always upgraded and then you got a new generation, new generation, sometimes you had the big machine suddenly became like a small headset. Is this going to change as well? This is going to stay...

(2:14) K- No, no. This system we buy and we modify the way we want it, because there's a modification to it. But as we grow, we ask you to buy another, because this carries four terabytes. As the size of the shops and number of the users of the bank increases, we go to eight terabytes. I'm telling you, we need a second one. And it's your choice. You buy a hard disk from outside and then you add to it. You understand? It's just the more the information increases, number of people, usage increases, then we ask knowledge. We ourselves, we provide some sort of services in the background, but we don't talk about it. You've got to understand, as I said, this is monitored 24 hours a day by monitors, by evaluators. So we see things long before it happens and we have some

knowledge of how to handle it, but those are in the computer business, they know how it works, it's a standard procedure. But used as a network this way to the extent we are putting it through, it's never been done. But in a way, instead of buying huge computers and you can get hit, we split the computers right across all the planet. Your credit card doesn't change and if you, if they steal your card and you're sincere for what you do, you know the way we tell you, "Can we put you on the tester?" The way I will show you how we see the energy inside people. This energy, the way I saw the guy in front of me in Desenzano, I said, "He's planning to kill me, he's the guy here to kill." And it happened that way. We just put you, "Can you put your iris on, live?" And we see the energy. In fact, you're lying ?? or telling the truth. 99% you are correct. That's what you've done. Don't worry. We'll replace your card. Doesn't matter if it was 1,000 card and, or you had one card. You already spent 90% of it. You get one for 1,000, because humanity pays for it.

(2:16) I'm not a bank to make money and then find every excuse not to. I'm here to make your life easy. Q: Okay Mr. Keshe, so for example, if you need 2,000 of these to be spread around the planet, so if one, if somebody buys 2,000 of these in one go, and send it all over the world, it should be okay too? K- Yes, but do you know such a rich person? Q: Yeah, I can find one. K- Give me somebody with 4 million, you don't know, our developers will kiss your hand. Q: Oh, okay, so somebody can buy all of it and send it around. K- Yes, no, no, you see your card has to be loaded with your ID. These have to be set, loaded at the factory point, with what we want, and a Cosmic Ray antenna to it, yes, automatically we send it out. If you find somebody who can, and then whoever receives it, will have the first two thousand or whatever, and income for life, as long as the machine works. Q: And then, for example with the Keshe Coin, I think I have a few of them, I

don't know how many I have. But, I don't know anything about digital currency. When they came out, I bought it, but the only thing is. I can take my Keshe Coin, to ... the supermarket and shop with it. K- In time to come, yes, we are working on it, because every time we say something, Q: But now, but now I can. K- No. You can shop in Keshe Foundation. And we are getting some of the Knowledge Seekers to produce things to use Keshe Coin as a payment. There are some of the organizations Keshe Knowledge Seekers work or developed. They have become well operated, well profitable. And they say they don't mind if they accept a few Keshe Coins because they know they can Keshe it later on. Yes. Q: But Mr. Keshe, why is it that other people I know, like somebody was telling me,

(2:18) like he sent Crypto to his wife, and he cashed it, but how come we cannot do it with this? What's the difference? K- We then become bankers and there's a lot of regulations, and they'll try to bring us down... In a coming time you can cash it in any currency. But that needs, at first, the first 2,000 to go out, that they cannot touch us. Secondly, as it's spread across humanity. Let's say there's a 1,000 in America. The American government can put their police to get the 1,000 from you. Brazilian ones, Mexican ones, Canadian ones are working, so they're connected to each other, it's their time. That's why we want to spread it across the nations. If we receive a donation, we'll give a lot to the Africans. The Africans who can have a house, not somebody who's on the street. And a lot to Knowledge Seekers around the world, that no government, no... there's no centralization to do, as a Canadian you cannot. Especially once we add the (plasma) antennas to it, there is no system to interfere with it. You cannot hack it. And so, it becomes, in a way. We're setting up a structure, which should have been here from the beginning. But now it's there, we can do it. It taken time. It's not something that... You got,

you understand, we put the seed of the Keshe Coin. The one idea, basis. Knowledge Seekers see it, they see, we explained what a Keshe Coin can do. They work on it to develop a technology to fit. It says, "My wish is my command." I wished it, I developed, I brought it out, and Knowledge Seekers deliver it. You understand?

(2:20) Q: Yeah, Mr. Keshe, so if I want to explain to a person that wants to buy 2,000 of them, How do I tell him, if he wants to buy it, how can I explain to him, this machine can make him income, or how does it make him income? K- Put him on the line to me, that's my job. If you have such a friend, I have the knowledge to explain. Yeah, there's no .. It's just that we need to spread it very fast, we want to launch this by 9, 9, 9. That's a, hopefully a system that it'll go. And if we see the target, and we have it now. But you have to understand now, once we start going, we have to get the manufacturers to deliver, and then you receive a separate package for the other parts. And you are automatically online. You automatically connect all the way around the world, and then we can launch everything else in it. And then we have to bring the developers to transfer all the Keshe Foundation website under this and it cannot be taken down, it cannot be... When we say it cannot be hacked, they can hack, but they get a few, and then we have enough to back up, to back up. (.....) Any other question? Q: ... Dear Mr. Keshe,

(2:22) why do we still not have access to various websites in Belgium? Can this be resolved? K- No. No. R: Simple answer, no. K- By the time we finish, there will be no nation called Belgium, Because it'll go back to where it came from, between the French, the Dutch, and the Germans. They become part of what it used to be. The second has One Nation, One Belt... or One Nation, One... what you call it, Race, they all become part of, they'll get diluted. They get diluted and there is no worry to be worried, because it's the same, all of us get

diluted in this pot. We have closed, we have controlled, we have closed all access to the Belgium, you know what you call it, access. Some Belgians go to Holland and buy the goods and, they want to be post Belgium, no, we return their funds. It's happened many times. We have beautiful Belgium supporters and Knowledge Seekers but you never know what these devious people are up to. When a person poisons his own child to kill, then you can see how low it is. Forget about the husband. You have mercy on the dog, let alone the child you born. Any other question? Q: ... Why do pregnant women tend to eat more than usual? How can we reduce this need in this area?

(2:24) K- Ask him a question, "Is he or she pregnant?" Is it a he or is it a she? R: Well, the name Chung, it seems like a male, but I'm not clear on that. K- By principle, you have to feed two, and by principle, the layer of the skin of the mother, it doesn't make any difference in absorption of the fields from the environment. But you have to feed that physicality. And you have to increase this physicality, by cells. It's amount of energy needed to build up the cell. Q: ... Is the baby in the womb of a pregnant woman, capable of absorbing 80% of its nutrients from the environment? And is it capable of this when it's born, or is it influenced by the parents habits? K- Oh, it's all the same, nothing changes. Nothing changes. It is there and it will carry on to be there. Just because you are inside doesn't mean that you don't absorb from outside. We absorb a lot from outside. R: And from the baby's point of view, what's inside and what's outside to it? It's in this...

K- Inside is feeding itself, and outside is the womb of the mother, isn't it? R: Yes, so, it's like two reactors, two layered reactor there. K- Yeah. Q: ... I heard some information online that the umbilical cord should not be cut,

(2:26) when it is just born, can you discuss this information further? K- There are a lot of school of thoughts. There's a lot.

One of the things for sure is, the biggest mistake our doctors make, I think, if I can say that, or it's been a pattern, is to wipe (off) the oil, or the cream or whatever, the fat, which is on the body of the newborn child. This I... this scientifically, is not just for the mother, or the child that is inside, this creates a lot of immunity for the child. And we do a lot of things because we've been told to do. And there are things we don't do to our children, we don't do it to ourselves, we shouldn't do it to our children, how we wash them, how we... It's... if you are a British, you know British have never had water, and to take a bath was a very big thing. Sorry, Richard, I put it that way for you. But, whenever Queen Victoria took a bath the whole nation knew, that was once a year. Where a coal man always washed himself every day. And, now to be very posh, the British wash their children every day before they go to bed. Their skin becomes sensitive, you get all the illnesses, because they have no immune system. And it's the same with a newborn child. And let that ?? fat staying on the body for a few days, it doesn't make a smell.

(2:28) It takes the child and it gets absorbed, it strengthen the bone, the physical structure of the child. And, it's how the school of thought has been. This is our problem. Do we cut ?? the umbilical cord? What happens if we don't do? Nowadays, in olden days most of the children died at this stage of cutting the cord. Because infection got in, both mother and daughter died. My grandmother died this way. And giving ?? death, and a child. Left five children orphaned for life. What happend if we don't cut it? How does it dry? Does it infest? Does it rot? We don't know, it's just that what we... Traditionally it's been cut. Traditionally our body should have rejected at the point of the way we cover the hole in our heart to become one system at the point of first breath. Body should have developed, or nature should have developed a system that it cuts itself, separate the two. But it doesn't do, and separation of it has

killed many mothers. What's the school of thought? Why the children are born in water nowadays, especially in Russia? Tell us the point where we believe. Any other question? Q: Gail had a question with the Cosmic Ray aerial on the unit, do we need to connect to the local service provider for Wi-Fi or Internet service?

(2:30) K- Still you have to. These are set up for the future. We try to provide you with a system. And then it comes in the future we tell you what is set up, what is for. The unit will come from different place, antenna comes from a different place. The unit the minute it arrives is plug and play. You tune it to the Wi-Fi system, where you plug it into your system, and it just works for itself. It's like when you buy these, what you call it, the robots, cleaning the house. You don't need anything with it, you just tune it to the thing, and it takes its orders and everything else. It's more or less plug and play. Everything will be preset before it's sent out, or it gets... let me tell you how it gets loaded for you. R: Would this be part of the, excuse me, of the Starlink system or this would be a... K- Of what? R: The Starlink, Elon Musk's... K- Elon Musk's Starlink soon will be useless. I know things I can't say, but you'll find out all the investment done by Starlink. When they want, they can wipe it out. It's useless. It's got a lot of... it looks... you see Americans, they make everything very glamorous because it's them. But you come and sit in with me, in the... with the military people, with the Space people, it's the easiest bird to catch. And no. Very soon from what we hear Starlink will be all cleaned up.

(2:32) All the low-level orbits, satellites, which do not belong to a government, they will see it, not done, because depends who supports, or what it does. And he's done a lot of, a lot of funny things with this Starlink. He has provided the Starlink data to the Israelis to kill as many Iranians as possible. And he calls himself a human. You don't know who this guy is. Mr.

Clean guy he's as dirty as the others. When you give your system to kill people, you're as bad as the guy who takes it from you. Any other question? Q: ... Hello Mr. Keshe, can you expand a little on women's emotional multitasking? K- You mean the creatures we don't understand? We have not understood them yet, let alone us. But they do, it's the nature. The multitasking with the women is because they're mothers. It's, it's been built that way. When you build...

(2:34) We see a lot of multitasking now with men. Men who... There's a lot of research going on. I read some of these stupid researches and one of them is something, why men are becoming multitasking. Because we're getting so many fathers becoming, 'house husbands,' they are building a thing, where they are working from home, but they have to listen where the baby is, is crying, if it is walking, if the other baby is something else, and they are building a sense of two or three things at the same time. So, the new economical condition in West is creating what we call, multitasking men. And this is why women became multitasking. They have to look after the child, there's a cooking going on, because you got to come home and if you don't have food, the whole hell breaks down. And there's another one, God knows, done something in the potty, the other one, you got three or four of them, you have four eyes, so, for you not to go crazy, you start, what you call, compartmentalizing sections and jobs. We call it, multitasking. It's very interesting, I went to one of these meetings of the parents meeting. You know, they have coffee morning, ladies after they're dropping the children at school, and now you see one or two men sitting there with women, chit-chatting, gossiping, because they have nothing else (to do). They are house husbands. And it's becoming very common. Men are becoming multitasking... I don't know if you know, there was a report very recently out of Israel,

(2:36) and out of American airports. Some of the most, what you call, daredevils, some of the most, the things they do with these new aircrafts, are women. Men won't dare to do it. Because women multitasking, controlling .. these aircrafts. Because they (can) multitask they can lift the plane, drive it up, at the same time turn it, and to them is a normal. Men are lost once they turn, they have to wait till the thing goes, and then they turn it the other way. Now we are seeing very exclusive club of women who are becoming ?? air fighters. And they are outperforming men, because they're multitasking. And a lot of air forces are bringing women into operation, because they see things men can't do. Don't forget, in one of the raids to Tehran we captured an Israeli woman as a pilot. We really don't send a woman into the war, because she wasn't good enough. And what happens in Israel in the hand of the enemy. Anyway. I carry a lot of useless information, but it's part of it, to see the structure of the society. Any other question? Q: ... Regarding the plasma waters from One Cup One Life, you told us that spraying them on the skin and ingesting them was not recommended for people with implants and/or transplants.

(2:38) My question is, are there any restrictions on the use of the technology we're receiving by way of the headphones for people with these implants and/or transplants? K- Don't use them. If you got a tooth implant, no, it's okay. But watch if you see any diversity. But in general, if you have implants, or you have pacemakers, avoid working or being near any Cosmic or Gans materials its fields and effects. I know that because when we used to build the system, when we bring it near a heart, one of the ways is you check, you know, you... You see if the system works or not, and I used to make, hand-made systems for me to see if it matches, I just all tell them, "Can I just bring it to your chest?" And they say, "Oh, it's got a pressure, whatever, then you know it matches. If it doesn't,

there's no connection. There is no connection, so, yes it does, because we, I use it, to understand if it's connected with you or not. R: So that goes even with the just the headphone connection, like in the transmutation sessions and that kind of thing as well? K- We advise not to, yeah. Please don't do. It's a field operation, it's not a jacket operation, you just put it on to stay warm. Q: ... Dear Mr. Keshe, I've learned a lot from your teachings. In the last two teachings, something different awakened in me.

(2:40) It is as if something is going to change in humanity. I do not know how, but I have been observing more than communicating. I watch the news, which is not good, and I feel that something big is going to happen. In your teachings you teach us to travel in Space to connect with our Soul. Could you tell us, if your teachings are preparing us for this 'big thing' that is coming? If so, what will it be? K- We are aware of something is about to change. What we do, even this unit of today ("One Nation Network"), is beginning of that change. How you going to live, if there is no banking system, and all your Internet's have gone out, and you can't have even food in the bank to eat. How you going to feed your child if it's hungry, unless you put a headphones on its head, and you say, "It feeds you." The child goes happy, he's not hungry. So, these things are available, and for those who use it, will go through part of this change. And they benefit by it through it, and because of it. Yes, every time we said something and they say, "Oh, he's doing this." Yes. They are huge things. But, somehow it gets delayed little bit later, a little bit later. But it does, it will be there. So, I got absolutely exhausted. Doesn't stop, in past 36 hours I only had the chance to sleep one hour and 45 minutes,

(2:42) getting things done for the Foundation. R: It sounds like we should consider wrapping up here Mr. Keshe. K- I got still got eight hours to go, I've got a shift till two o'clock. That is, I'll

do it, I do. R: Probably in second wind by now. K- Two meetings to go still. And then I have an Internet meeting later on tonight. I'll get to bed sometime, most probably two, three o'clock in the morning. God knows. Any other question? Actually, you know, they say by age, I do more now, than when I was 20, 30 years old. More productive, more, more things which we have to change. Somehow the energy comes from somewhere, I don't know where it comes from. R: Well, you're teaching us where it comes from. K- Most probably. I don't know what's going to be taught, till I get here and the teaching starts. Sometimes I have a clue, but today was man-made, because we had to set it up and do these things with it. But generally, if you've been with teachings with me, should be in sessions, there's no notes written on what's going to be taught. R: Yes, I can barely squeeze any topics or things I should be prepared for, out of you before the workshop. And it's just, no, and the way we go. And it's some detailed thing about time or whatever. And we all appreciate your in-depth teachings. Thank you. K- It's just there, we are there.

(2:44) We accept the responsibility, we have to fulfill it. Q: ... There are various types of cars and airplanes, designed for designated purposes. Is this the same for UFOs? Do they also come with different sizes and shapes? K- You have grades or levels? I hope one day I can show it to you. Yes. You know like we have... big ships and then when it gets to destination, a truck comes out. And then when it gets to a point, using it and a (another) piece comes out of it. The big units, the physical units, are huge, they're so, so awesome, hundreds of meters across. They can't land on Earth, there's .. no way they'll be hanging on top of the mountains and half in the ocean. So yes, they park ?? , as we call it, you think you see a star, but no, the star is not there tomorrow, because you've never seen detecting it, and does not appear on your radar. Then they divide, they have sub-units, flight

units, which are manageable to bigger size, and then you have the landing site (?? size). Yes, it's possible, they do, of course. Shall we call it a day? R: Sure, yes, of course.

(2:46) Any questions can be carried on to next one. K- Next time which never comes. Please help us to bring that change. And please help us to make that change, it's for us and the future of us and the future of humanity. If we manage to get this system on the road the way it should do, and hopefully we should be able to, we undo the injustices of Man by a couple of thousand years and plus. So it's upon us to do it, and we need to do it. And we made it very attractive. You can have income from it. You can have your peace of mind from it. Anything you like, if it's just for us to bring that change and do it. Or as Azar said, "Azar knows rich people." If you can get one of them to buy a thousand units, and plug them in, then we start doing what we can do. Thank you very much for today and hopefully we meet tomorrow, or next time. We don't have a session tomorrow, no, it's next time. R: ...

(2:48) ... (2:50) The Universal Council invites the Keshe family in unifying at the Soul level every time and every day at 9pm Central European Time to elevate the Soul of Ayatollah Khamenei of Iran to accept the selling of nuclear materials to the leading nations, as part of technology in exchange for everlasting peace in the world.
