612th Knowledge Seekers Workshop October 16, 2025 (Transcription, Editing and Proofing done by KF Brazil) (Auto transcription by Elias)
ENGLISH TRANSCRIPTION

Part 1

(:18) K- Yes, thank you very much. Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We welcome you back and we had a very different topics covered in past weeks and months. And I get a lot of questions asked, which is different topics or part of the topics of the teaching of the months before, weeks before, or combination of. For this reason, I decided to have a extended question time, to go in more depth, for questions, if you have, that we can cover, to cover the time, the 3I, and any other aspects of the teachings in the past year. The last time we had this session was over a year ago, maybe even more. And so, we open this, because next week we're going to a new topics of teaching. Very, very versatile, directly to the point and hopefully you will understand the reason that we take that position. In the process of this year we have covered Soul, we covered the transmutation. We have covered Time, in the past three time, we've covered the, what we call, Celestial Object, the 3I.

(:20) Or you have any other question, which brings us into this position. You got to remember that we are testing something very new. This is one of the reasons I put this as a question. Today, as of past few minutes, a revolution in the world of science, is taking place in the background, as usual, where you know you are there. Don't concentrate on something special, but leave a floor to see how you as Knowledge Seekers (KS) interact with new change. The reason for it is, later on be explained sometime, maybe, next week, the week after or whatever. This is part of the development of

technology in transmutation. And so, let us know how, in the course of today, and next few days and weeks, feel, as this test has never been done. We explained before we are working on something, and for the first time today we are literally hitting you with it, or bringing it into play. The three ?? Units on the teaching side is already added to the system and it will be very interesting if you want to be a part of this even though you are on the what we call, maybe Youtube or somewhere else, leave your microphones open. Because this is part of the work of this structure, needs to communicate to receive, it'll receive the what we call, the knowledge from you without actually having much to do with it, but opens the channel. And this is part of the new technology (T) we developed.

(:22) This is part of the transmutation system, but at a very, very specific level. And we're testing to see the limitation and how far we can change, bring change, or deliver, or take from you what we want. We never had access to this knowledge as a system. It's on today, it's been put on and it'll be loaded accordingly. If there are any questions, we'll let you ask and see if we can share knowledge. Q: ... Hello Mr. Keshe, in the last teaching you said that, Jesus did not fully understand his mission, and that is why he ended up on the cross. When we don't fulfill our mission, we are in debt, and somehow we have to pay. And that's why Jesus' fate was the cross? Or was the episode of the cross, a consequence of attachment to physicality (P), that prevented him from transmuting, and freeing himself by not subjecting himself to the cross? K- You have to realize,

(:24) we have a physical commitment, and we have a Soul commitment, and we have conditions of attachment and detachment. The whole structure, or when we talk about this condition with Christ, a lot of it is mythical, symbolic, and it's changed that way for, for it to be believed, to be accepted.

When we talk about the way he was put on the cross by Romans, was for a physical behavior, not for the, what we call, dimension (D) of Soul. What we hear, what we've seen in the literatures, of the three days, and the ascension, and the rest of it, is what was added to, by the, what we call, the rulers of Rome, to bring it to Mithraism. To see, to understand the whole structure of return, you have to read, understand the life of Mitra and Zoroaster, and what we call, the life in how Mithraism was set. So, you don't take it literally, but in so many ways, you separate the two. Don't mix the two together, but be aware how it was patched together. That being put on the cross was what the Christians wanted, the symbolic of the coming of the cross and the resurrection, is what goes to the part of the, what we call the Emperors, which is Mithraism. (:26) And this we see very clearly, has been done many times in the history of the religions, and then in that process, part of it was polished by the Jews. And so when you talk about Christ's resurrection, going on the cross. The cross sign, it was something physical, punishment for act. They used to put this right across all the way from Rome to Palestine, or wherever they went, for people to be, don't forget allegiance (to Rome), and understand what you do wrong is. We haven't changed as a human race. Cross was put up for everyone who did not fit the system. And if you've seen in the past 24 hours, 48 hours, in the same land where cross were put up, the crown was put on the cross, we've seen how Hamas put people on the street and shoots them in front of other people. Humanity has not changed. But is there any difference between the explanation of the resurrection and awareness of the Soul to the position of the, what we saw yesterday or the day before in the Media? For example, in Gaza, putting seven people on the streets and shooting them in the head. It's just the method has changed. But the fear and the rest of it and punishment of it is there. Man has not moved in 2,000 years. Maybe he's gone worse, backwards.

(:28) So when you understand this, then you understand about the Soul and what he did and what message he had and what he decided to change. How he going back, is repetition of the life of Mitra, resurrection, ascension and the rest of it. The isolation and the reason they try to keep the religions apart, and don't bring others up, because it explains it's just one repetition of in difference stories, because the story was in, what we call, Persian Empire, now in Palestine and in Rome, had to be fitted, changed the name, the story reads the same. So, the physical putting cross up and putting the Christ on it, was a punishment of his adulterous life, he had. It's part of the pleasure of the life. On the other hand, another message, but the message is correct from him. But, this, the second part, after going on the cross, being aware of his position, then it's translated into the, the life of Mithraism. Has no match in the real Christianity. But it's accepted because it's written, and then again and again, emphasized on. We see that again, how the rulers do and what they've done. We see the same thing in Palestine today. Nothing has changed. Cross has changed with a bullet. And the people who don't belong to a nation, has taken over the same area, the same land as time of Christ. We see with the Zionists, the Jews, what we call themselves, Jewish which are, actually they are not even Jews, are in the land.

(:30) The Jews which are in land of, born in Palestine, they are the Jews. The ones who are in Israel today, 90% of them are not Jews. They are a tribe which came from Northern Europe, lost many time, and they went to the verge of, because of their, what we call, belief in killing children and the blood sucking and the rest of it, when they got defeated, they were given a choice. You become Christian, you become Muslim, or you become a Jew. And this tribe, the lost tribe, losing their war after a hundred years to the Muslims, they chose to call themselves a Jew. And that's how the Jewish of

the Ukraine and the rest created, they got... they have no idea, they have no knowledge of Judaism. For the leaders not to be killed some 700, 800 years ago, they called themselves a Jew, or they could have been all Muslims. What you have in Palestine as Jewish, they would have been Muslims, they would have been Christians from the middle of the Europe. And then they came to Poland and the rest, and that's what we have today in (Israel), in the name of Jew, but it's actually a business, there are businessmen who are given a choice, and now we have what they call, Zionist regime. It's got nothing to do with the religion. It was the same with the Romans, the Romans were the... It's a repetition of 2,000 years ago. And this is why you have two sects of Jews running Israel. The one which are European Jews, which have no blood, not a single blood of Jewish in them. They just had a choice, six, seven hundred years ago, after losing a war, to be destroyed, to be wiped out,

(:32) because they have belief of in a Paganism and everything else, where killing the children was a norm, and sacrifices of bodies was norm, and when they lost a hundred year war, they were given a choice, they became Jews. What you see in Ukraine, all the Jews, East European Jews, don't have a single blood of Jewish in them. They are businessmen, they were the way they were, they still can, they ?? steal everything else. And now they moved on a deal with Hitler to Palestine, and that's what we see now, it's business, it's not religion. Then it's the same with the Romans. Palestine was a business where they used to get their oils and everything else from. So, history is repeated. When you study the history of this area, then you see how everything has been changed by these people, deliberately in conjunction with a lot of other things to befit (what they wanted). The rituals have been changed, everything else has been changed to fit into what we call, the frame of work which

does not fit the reality of history. When we see, a lot of us, watch, we see the Jews go to the Great Wall. What is this Great Wall? Has anybody asked? We just see it, they bang their heads and they bend back and forth. Has anybody explained to us what is this? This is a wall which was set up of the boundary of the city, in a way, by the Romans.

(:34) And you read the history, how came men shake and no women goes to this wall. And if you look at it, it's a sexual behavior. Because again, goes back to the woman they worship, which goes back again to Mithraism, which came from, to create a wall, they make love to the wall. Go and read the history, then you understand how meaningless this religion is. It's a money-making system. And again, added to by Central European, what you call, made up of Jews. Have you ever seen a woman going to the Great Wall? The Great Wall, they bang their heads on and they bend back and forth in their sexual behavior, is making love to a woman, to a, what you call, a fairy, which again goes back to the history of the Mithraism, being in love with. You watch, you ever see a woman goes to the wall? You never ask yourself that question. Lesbians did not live in those days. So, when you talk about the history of religions in this area, you have to understand what was the reality, what is received physically, and what is the historical connecting back again to the time, worshipping ideology of a, what you call it, an Angel. Again, comes from Mitra. And now, the, what they call, European Jews, have put it against the wall, where the Roman built, the great wall of the, what we call, the boundaries of the city, everything else was destroyed inside, there was nothing left of the original Jerusalem. And, then they add the act of this sexual behavior to the wall.

(:36) Then you understand how much we as humans, historically, following the books, where the money has set. Historically, is different than, but they added, literature of the

sense of emotion to the history which they made. And this is the way we are today. People who are not from that land, they destroyed another land of the people who are there, in the name of occupation, even they have nothing to do with it, it makes good money. You watch what happened in Gaza in past two years, now the pictures are coming out, they flattened the city, and the President of a nation, and the President of (another) nation got together, "Now we can build properties and make money in it." And, have they lived (left) a single home? No, that was a plan from the beginning, flatten it out and we make money (re) building it. And they do it every 5 or 10 years. We've seen Gaza, genocide of humanity. Let's see what they write about it, and how the Jews will celebrate this in another 100 years in another name. The structure of the state of Israel and Jewish religion, has been nothing connected, short of money, women, and what we call, destroying life. Goes from time Moses to today, hasn't stopped. Being a Jew or making yourself to be a Jew and behaving like one. When you talk about the Christ and the crucifixion and the resurrection,

(:38) the physical part of the Man connected to, recently polished in the past two, three hundred years by Vatican, about his behavior, why he went on the cross, and then adding the mystery of what was put in by the Emperors of the Rome, to make the other part which matches one part from you, one part from us. Physically hanging is from the Christians, resurrection in the three days from Mitra from the Emperors, and that made the religion you all believe in. In a way, Christianity is what I call, Roman Persian Empire, religion and life of, way of life. And this is what we see today. Any other questions? Q: ... Could you give us some tips on what to do to gain clarity about our mission, so that we can easily proceed when we are straying from it? K- We are not a religion, we stay by ethos of ourselves, in what we do. There's

even... This is a partially ingrained in my, what I call, forehead. Maybe it's just because where I come from, where I was educated, the environment of the family and education I was brought up is... The biggest sin till about 200 years ago in Iran, was to lie. It still runs part of the East Asian life.

(:40) And then it became known when the British came. If you live by the Ethos of Mitra, which is, "Talk good, Think good and Act good." And then, that is the cornerstone of life for every one of us, anywhere on this planet, in the ocean, in depth of the Universe (U). It's part of the life, you do it, you can't do wrong. When you don't do wrong, there's no punishment. When you don't talk wrong, you cannot create a wrong environment. And when you don't think wrong, you don't talk wrong and you don't do wrong, so it keeps your own path. And the guideline for humanity is set by Mitra, and in different names. And Mitra is the Soul of the Man (STM), in a way. In the dimension of Soul or Physicality (STP) of Man. Where the Soul is the Creator, and the STM is Mitra, and manifestation of the love of the Man, the physicality (P) of the Man. I've made Man in the image of Myself. So, I'm the Soul, interaction with the environment of where I'm created, I create, manifest the physicality of Man. So, the Soul is the image of the physicality of the Man (?? The P is the image of the Soul). This is applicable in every corner of the Creation. Any other question?

(:42) Q: ... What we see on the screen today, is it a coincidence that this comes at the same time, as 3I and R2's meeting in our Solar System? And Antonio asks, "Can we consider 3I Atlas as the Creator, or something very close to him?" K- This is an intelligent life. It is... Maybe it's time for us to let you know something. As of next week, Keshe Foundation (KF) enters in changing the social structure and economical structure of the world. The team of the Keshe Foundation in the background, working extensively. And if we

succeed from next week, through the channels we set up Markray Corporation of United States, Keshe Foundation operation. Keshe Foundation operation in China, in Austria, in Iran, will collectively bring a new change. And with it we endeavor to bring what we see, a change which puts Man on the path of what you call, 3I's. And we change, our teams are heavily involved in all directions working with it. And we have taken the position, it's time to bring the change. We have informed Chinese governments through our connections that we're taking this step. In two, three different channels we operate with,

(:44) through Chinese military, and Central Command, that we will interact. And, in so many ways, we want to collaborate, we ask collaboration of Chinese to be part of the operation through Markray Corporation of United States, to start bringing equality and change. And with it will come the knowledge of 3I. It is in the research sector of the Keshe Foundation, we achieved the massive developments, that part of it you, today, are going to be touched by it. You're getting touched by it, without you knowing. And this will allow in the near future for humanity to be that 3I. We've seen what happened to it, we've seen what part of it is there, we've seen it splitting very recently again, and it's not a... It is an intelligence life. Achieved something, maybe thousands of years ahead of humanity, and maybe in the cycle of the passage through Earth, humans might have had some influence in where the knowledge for this system is.

Everything it does is, what we call, is on the manuscript. Many of you understand, if you understood the work on teaching of the Keshe Foundation, on the systems, how the system split, how system follows a pattern, how system can go into depth of the center of the planet, using the same. We are getting reports, no agencies is confirming it, and so many people, that the system has split, part of it is going directly head on into

the Sun. It will not melt, because part of the structure is to go to the center. Because,

(:46) the heat which we are baffled by, is on the surface, inside there is no heat. As we know, we run the systems. And when you have the, what we call, Magnetic (M) field defense, protection, dynamic Magnetic field in a plasma condition, billion temperature, it doesn't make any difference, because that's a matter state and you are operating in the Energy state. And this is what we call, Energy of the matter, or matter energy. What we see on the center, on the surface of the Sun, is Energy of the matter condition, in interaction with the matter energy, and energy matter, and that's why we get such a high temperatures. We look, and the thing is. It's not actually hot, it's hot only in that Space gap, the rest of the Solar System (SS) is not burning, it's ice cold. And it's reality of the system, and we have the knowledge, the knowledge you all Knowledge Seekers have had it. It's in 611, 12 (KSW) teachings plus other sessions. So, as I said last week or the week before, it looks strange to the others, but if you're a Knowledge Seekers and you understand the work, you see it's exactly, crosses every line of the teaching or wherever ?? If you had a... go through the scripts of the teaching, then what it says, test been done, people are shown, flight system tested. It crosses and takes on every point. Every point is according to the law of the plasma.

(:48) If you work on the matter state it looks strange, it's not within the law of the physics, yes. Physics of the matter. But if you understand, like you Knowledge Seekers understand the work of the Magnetic field in the plasma condition, it is dead on (perfect). There is no strange behavior from the system. The ignorance has brought this mysterious thing about it. So, is it the knowledge of the (god's)? No, it's another cycle of the energies, which have managed to understand and do what the Universe

does. If you listen to the Intro (video), the beginning where we said we're in the process of transmutation and we contacted governments, it was all done, and we did it with, bless his Soul, Jon. Then, at that time, everything was perfectly according to what it is, but there was a piece of, piece of what we call, technology missing. And that piece of missing technology, today, you lot are getting in touch with in this teaching of today (through our system). What is getting tested today, with you lot on the line, we had at the time of the work with Jon, with his passport standing in his room, being in this, not manifesting, was with us. He would have manifested himself, (but) there was a piece of technology missing. Now, you lot are testing (it). In 5 or 10 years time, if now we see mankind put the guns down, and start developing technologies, then we, we will be most probably, hundreds of 31's in the skies of this planet.

(:50) There is a huge change of the steps of the knowledge, and it's there. It's just been misled, and too much energy was spent on wasted times of killing and the rest of it. It's not from god's, it's a knowledge, especially what we saw in past few days in splitting, several times splitting, separating, equal speed, equal separation, it's like, literally like a life of worm. You know when you kill a worm, you're, somebody kill. Or you cut a worm, two halves start moving, because worm has no skeleton background of the way we know, but the structure is a energy way, so it creates its own head and tail and carries on. And it's exactly what this system is doing, it's an energy system. Doesn't have the solid structure of back to hold it on to, which brings this condition. We'll see most probably part of it will go right into the Sun, absorb into the Sun, actually goes inside the Sun, never melt and possibly stays in all, in hundreds of years, will come out of the other side, or out of the Sun, or about to come back out and say, "Oh, ?? we've been in the Sun I came through. What's the technology?"

There's no technology, it's got a magnetic field shielding, which keeps the heat away, allows it high speeds, and there we go. Man studies this object as a... in an energy matter, as you have to study as a matter of energy. And then you study both together and then you see what it is. Matter to energy, energy to matter.

(:52) Any other question? Q: ... I'm just interested about the Plasma Energy Transmutation Units. We haven't heard anything about them for a long time now. They seem to have gone quiet. I'm just wondering if there's been any further developments? K- Working on it. Working on it very nicely, but it's the transfer of energy which we have now achieved a lot of different dimensions to it. That it brings, and it should be ready to go. A lot of systems are ready to be added, to be brought in. Q: I'm very much looking forward to that. K- Yes it is, it's very interesting what we see, what is developed. It's progressive knowledge, and we are part of it, and how we are dealing with it, in expanding the knowledge. I'm getting graphs of today's session with this new, what we call, systems, structures. It seems a lot of you have moved into the dimension of the Energy,

(:54) with the system, which gives us a different of, what we call, understanding of the work, and how it needs to be done. Q: Mr. Keshe, while I've got you on the line, for the last three years or so, my young son's been going plasma processing with Dr. Kern. We haven't really seen too many results so far after three years. Would it be possible for you to have a talk with Dr. Kern at some stage just to see if there's anything further that can be done for a little Patrick? K- Yes, yes. Arrange it with Dr. Kern and we'll do it. How, what happened? How has he gone? How did he change? At the beginning was some changes. Q: Some small changes, but he's not progressed much since then. I mean a little man changes quite a bit between the ages of 6 and 9. But no he's still in

pampers as you say and still not talking. K- Are you using the system again with the three ways? Q: No, we were doing that and just recently with the system upgrade it's gone to one single set of headsets. K- Yes, this is what we realized that the system was used (too) extensively, and the system has to stop for a period of time to let the brain go, to develop. This is the new change which has come in as people who used it so continuously should (?? not) have been done so.

(:56) And I think with the new procedure that the system should not last more than 6 to 12 weeks and stop for 3 to 6 weeks and then start again. To let the brain grow on its own and I think this is how it should be, it should have been done. Arrange a time with Dr. Kern. I know I spoke with you two or three years ago. And then we bring a new procedure. It should work because you have to change, let the brain grow the way it should do. Q: Yeah, we're always hopeful. K- No, it has to be done different way and I'll have a look at it and advise Dr. Kern what to take the steps. You should let a gap of three months, six months for the brain to grow. When you set up, it doesn't grow, it follows to the rhythmic of the system. So, I'll ask Dr. Kern to make a time that we meet and I'll advise Dr. Kern how the system should be used for it. Q: Excellent, we'll organize it. K- Thank you very much. .. Q: ... The Universal Network Unit (ONN). When there's enough around the planet, will that create between the people that have that Unit, like a group consciousness? Like a connection between each one of us?

(:58) K- It should do, it should do. These Units, the first lot, should be out, sometimes we hope, by the end of latest November. As I said before, seven Units and three control Units have been completed, it's in the hand of the people who work with it, they start finalizing, writing, whatever it is, it takes 2, 3, 4 weeks to complete, secure it, and then once they are happy, the Units will start going out, in the batch of 100, 200,

and we add the antenna to it. The physical side can be sent out straight away, but it needs to be loaded with the programs. The other side, which is from the Universal System Communication, we are testing things in our lab for the completion of it, maybe in the next two or three weeks. So you receive the information on the Net, but you receive the energy and Cosmic developments on the side of the second part which you receive. And this should be able to set up to create the energy for forward energy for what we call, Wellness and the rest of it. And then that will affect. What we done, what we've seen in one of the test is conversion of the Universal fields into vibration, which means it takes its frequency and this is very important.

(1:00) What this means is, it works on the harmonic if you understand the work of the systems. (Rick, I sent you a picture. Let me see how I can get it). This is, this brings in the play, the, what we call, the structure of the change of the Universal System into what we call, to physical dimension, changing the Universal energy, or energy of the plasma, or energy of matter to matter energy which manifests itself as vibration, and then it becomes energy depending on what the vibration is, which creates what you call, frequencies and then a combination of creating it. This is a very small video but very significant, you have to understand. (Let me see if this can be done ..). What you will see is significant. And (Rick, I send you this video). The significance of this, what you see is conversion of Cosmic Rays (CR) into matter state and energy.

(1:02) (Which this, I have to, I saved it but it doesn't come out. Let me see where I can find it). Q: Mr. Keshe, with the Cosmic Ray Balls, would there be use, a useful, for the One Nation Network (ONN), and the Cosmic Ray Balls, is there an interaction between the two? K- It can be, yes. We can tune into that. We can. It's part of the structure we have set up in the future, yes. (Right. Just wait one second please. I send

this, you can see. Rick, it is loading on your channel, give it a few seconds, then I tell you when it arrives, you can go into it). And then you understand, this is very important. No energy input has been put into this, it's just receiving, combination of two different layers of the combination of the Cosmic Ray to a matter state, creates a vibration, then you can use this for anything. It's... some of you might think, you know it. It is not what you see, but this is taken pictures that we don't reveal what we do, it is about our internal, what we call, works. (Let me see.

(1:04) Rick is sitting with you, if you download it). R: It's coming in now, yes, just give it to me a minute. K- Yeah. This vibration, if you look at it systematically, is conversion of Cosmic energy to Kinetic energy, or we can do it to anything. It's important, it means we can convert digital data to analog data, and everything else. And at the same time we don't need to change it to analog, we don't need to change it to digital, we can change it to emotion. And then, your emotion and the thing creates a physical motion, which means you become in control of what you're thinking. (They show a video of something vibrating). This is a huge step in this development. And this is getting modified in the lab. And so we can convert. If you look at this vibration, understand it, you can change this into what we call, magnetic field motion in the plasma section, that can create lift and motion. But with emotion, which means you don't need a system to fly. By thinking ?? you can do. This is a very, what we call, to use a little vibration, this is years of research and development. And in the interaction of these systems in the environment themselves, they can lead to creation of many, many other things.

(1:06) There is another piece of information which is in many ways will bring the changes. With this understanding this, and developing a new part of this technology which allows the lift,

the emotion, and whole thinking done to be done in one go. We... this shows itself in a physical dimension. But if you understand the potential difference and the vibration, with this you can create ?? the motion, you can create electricity. And it's the way the energy is done (created) in the Cosmos. So, nothing is used. This is just connecting different dimensions of the field strength of the Universal magnetic field together. They are passing through this planet and for the first time we can show it that they create vibration and motion. But now we can control it. This will, this little vibration is change, brings a lot of things, because it does everything. You can make it vibrate according to your emotion. And then you understand the control, and then the vibration which creates the energy and the matter with it. Any other question? Q: Thank you. K- You're welcome. It's development of a lot of technologies coming together, understanding, producing. What you see here as a vibration here, part of the structure which creates this one is part of the system which you lot are under today at the moment.

(1:08) And we see amazing results in graphs which are coming in, in the background of the session. We usually share these things with you. You all have seen the graphs of yourselves and different dimensions. And very interesting is when you see this graph you see you are all become part of the energy, which sits more in the Universal Energy side than the matter energy side. I explained to you this is the first time we see this because we are adding to you that kind of, we have we have connected all of you to the Universal energy. And the amazing thing is the work on the Soul side is totally different than dimension of physicality, and the what we call, the dimension of the work of the systems. I try to share for you to see. .. Q: Mr. Keshe, the picture for today, Peace in the Middle East... It seemed to me a bit of a 'Reality Show' on Mr. Trump's behalf. I didn't see a positive...

(1:10) It didn't seem positive to me, the Peace in the Middle East. It was just a reality show, a Trump reality show, that's what it's looked like to me. And even now the killing still goes on in Gaza. K- There's a lot of showmanship. There's a lot of showmanship. And this peace is not done by what you call, the will of people, it is done by the bank accounts of people. Go back what happened to Amman, go back into the summit of the Islamic world, go back into how main sections of the Israel were literally demolished in the 12 day war. And then, as I was talking to some military people, We had the Six Day War of last century between... in the Sinai desert, where they called it Six Day War, the Yom Kippur War, Israel became victorious. We had the Twelve Day War between Iran and Israel, most of the Israeli technological development got wiped out. The only way was to do it. When you look at this, you talk about how it is, how did they flatten a nation, when now we see the pictures from inside. It's all pre-planned, to do, and now. They talk about the peace, but they don't talk about how they've done. Israel has kept 53% of the land of Gaza. They only give them 47% of it back.

(1:12) And most of the side they're keeping, is the oil rich, gas rich, which Mr. Trump will make a lot of money out of. Now, there in a very small quarter, that all these Palestinians you see, they get paid to become workers, servants in the hotels, resorts and oil fields which will be run by the American and the Black Rock Lobby (Private company that makes the wars in Middle East for America). That's all it's going to be. This part left 47%, this ?? gap, they had to bring in some people to do the work. And then you see what happened, why Mr. Trump and the exBritish Prime Minister (Tony Blair a billionaire from deals as PM) are heading in this. He'll be the part of it, yes, because ?? his son ?? has already signed 2 billion in contracts and the rest of the building goes to the American companies which he and his family and the rest of

them own and Black Rock works in the background with. They ?? covered up 53% of Gaza, the best lucrative part with gas and oil. Q: But with the Cosmic Ray technology, Mr. Keshe, eventually the gas and oil won't mean anything really, will it? K- Watch the Markray Corporation announcement next week. We are heavily involved in that side. Just watch the Markray Corporation announcement next week. I cannot tell anything more. We are talking about the Keshe Foundation. But monitor and then you'll understand where the changes are going to come. You got to understand there's a very big problem.

(1:14) You got this oil and gas and now you have the Chinese government controlling 70% of the Rare Earth materials which is zinc, copper, platinum and the rest of it. But they control 97% of production. When the West was busy building wars, and occupying Middle East, and the fake 9/11, and then the fake chemical (?? Saddam) business, and the rest of it, robbing banks (Libya, Iraq, Syria, etc), China robbed the nations of their assets in the form of mines. At the same time, when the factories, they, when they took these mines, they diverted the supplies up to America and Europe, to their own country, to their own refinery. European, American refinery is closed because they could not get the supply, the price was too high to handle with it. And so, 97% of the processing is now (?? in the hands of) the Chinese. This is how they have cornered the world industry. You can have a gold mine, you can have a zinc mine, but you don't have the processing plant, it's just the rock. And the Chinese, in past 30 years, while the Americans and the Europeans were looting banks of some, God knows, Middle Eastern nations, the Chinese looted the, what you call, the reserves of the actual stock. And they've done the same thing with Kazakhstan, they've done the same thing with .. Russia. In what I call, colonialism

through economy, which is worse than the actual, what the British did to the rest of the Africa and the French.

(1:16) So we see the Americans are even fighting for Rare Earth materials in Ukraine, and the rest of it. It's just hit Mr. Trump on his head, that okay, and Black Rock the same, okay we, we get these mines, but we don't have the refineries. There are very few, very odd, small, small refineries, who can handle, even after processing with China. Even you get these mines, it takes you up to 10 years to set up refining capacities, to even meet a fraction of demand of the West. So, (even) you get this, you have to go back to the Chinese. Q: Checkmate. K- They got checkmated while they were robbing. They were too busy robbing Central Banks. Chinese were too busy locking Central Banks. And we see it, we... whom Mr. Trump bid something on Friday, and (bought) it back on Sunday, but he made himself, nearly two, three, four hundred million, billion dollars of profit. And we see the situation. We respond to this situation in the coming months. Keshe Foundation will, through its arms, Markray Corporation, Chinese Corporation, and Iran operation, will bring back some sort of structure, in the way we see. If they don't try to shut us down, we'll start working with what we promised. And, we will keep to that structure. Everything is there, but everything is taken away to be there.

(1:18) And the Chinese have locked up the world industry. In a way, up to now we had the America, the British, the French, partially, what you call, the smallest nation in Europe, called the biggest nation in Africa as, what you call it, colony, now we have every single nation, every territory on this island, as a colony of China. And in past two or three weeks, what was hidden in public, now has come to public. And nobody has brought it more into public than Trump. He banned any shipping. 70%, 80% of the world shipping is ?? owned in London, and different titles, is Chinese. They put hype on

material, Chinese control 97% of it. We have one superpower at the moment, and that's China. The rest are pretenders. There's a very good saying in English, "comes your background, fair coats and no knickers." The fair coat is bought by the Chinese and no knickers on the street in the American structure. Now we see, world has become one nation colony. China and the rest of the world has become its colonies. Russia is in debt to China for life. Everything they can put out will go to China for what they received in Ukraine and giving the industry. Kazakhstan, the richest oil nation on this planet, and people living just about poverty because they have sold everything to China to get industry place going. (1:20) Plus the huge bribery the nation suffers, and all the world's cheap ?? prices are going to China. Africa is the same, South America is in the same bed, America is worse in the same bed than Europe, can not do anything without it. So, the world has become one nation, one colony. Nation is in China and colonies are the rest of us. They show you the shipping, they show you the raw material, And now we see the superiority in the Space and Military. Q: The only way out Mr. Keshe is to share the resources, which belong to everybody. K- You see there is a very big problem, I explain this to a Russian, what you call it, the Chinese military. China is taking everything from every nation to the benefit of China. And now it's become worse colonization than the British did with Africa. Economical support doesn't come, especially in past five years, by reducing the prices to a minimum you can, that you can get the best for your nation, and that the other nation suffers. We see that in Kazakhstan, clearly, we see it in Africa, clearly. I worked in Kazakhstan for 20 years, and the time of after 1991 was much better than today. Because the government has, whatever makes, at 40-50% discount, oil is given to China, China is getting cheap oil for its nation.

Kazakhs are suffering and then they're in debts for next 25 years. The nation cannot move.

(1:22) Because, let's say, 100 billion loan, 25 years, nation pays interest, 100 billion, 20 billion was given to the bosses as a bribe. Or they take it as a bribe, the nation pays interest on that 20% on top of what the bosses told. Kazakhstan will never come out of it. Where the correct way was to make Kazakhstan market prices 3%, 5% discount, not 50%. Trying to get the people fed is killing people with hunger. And we see this now, there will be, if China does not change the pattern, there'll be a backlash on China, very, very soon. Much faster than they think. We saw the first backlash last week in Holland. The governments will take over Chinese assets, and they can't do anything, and the investors, they can block, they can say, "We don't do," Without the investment return, there is no investment. It has to become fair, but would China bring that fairness back is totally different proposition. At the moment, you look, Chinese are doing business anywhere around the world, they want 50% discount. What is left? The skin is gone, the bone. And this was not supposed to be, it should be a fair, and they blamed the rest of the world. Now Chinese are doing what the European did to the rest of the world, to some different part of the world, but now they are doing it to the whole world. What? There's a massive resentment in Africa with the Chinese, because of the same behavior, and the government silencing them.

(1:24) But if the whole world turns, then China has lost, it looks as a winner, but still, as we saw how they kicked the French out of Central Africa, and the West Africa, they'll kick Chinese out if they don't bring the balance back. It's nice to have roads where they can get the Gold from the mines in the center of a nation, to the port to take it. But the road doesn't feed the people. China's leadership has made a huge mistake, especially in past five years, strangling. They had a

better policy in the past, but since the One Belt, One Road this has gone totally wrong. Needs to be corrected by the Central Government. They will invest and they will lose. Because nations cannot pay, and when you cannot pay, does not matter what you do, Chinese can not burn more than ?? and center ?? amounts, can not do anything else, and the wealth of the nations of ?? will go back on them. It took 3, 4, 500 years for the Africans to revolt against French, and the British started, with the Chinese will be months, years. We see the same... Those of you who bought shares from or through and holding Markray, stick to it very hard. We have started moving after seven years, taking over Markray. Any other question?

(1:26) In a way. I'm sorry about that. In a way, we counterbalance China. You will understand this. We counterbalance China with the help of China. And that should bring what we are looking, equality and fairness. You will understand in the coming days and weeks. It has to be done, otherwise there is ?? an alternative. And many of you, been part of that alternative, I brought you into it without you knowing. When you put the Cosmic Ray materials in your hand, showing you can convert energy to mass, then everything has to be equal, because others can do it, if you don't open the doors and don't bring fairness. We do it, or you do it for yourself. You soon understand. Just keep an eye on Markray Corporation announcements in coming weeks, and then you know exactly why we become a counterbalance to China. But the fairness, and it brings the operation between China and the Keshe Foundation, will bring fairness and many, many things in equal and balance. Sometimes, when somebody wins the table gets carried away and gambles a little bit more, he just needs a small reminder, we are that small reminder. You will understand. Any other question? <<

Knowledge Seeker have problems with her microphone.
louder ... >>

(1:28) can you speak a little bit Q: ...

(1:30) In Christianity, they say you pay part of your money that you earn to other people (tithing), like in Islam also they say you pay a certain percentage like they call it homes and has that caught. And then I don't know about Judaism or Buddhism, none of that. But then my question is when they put a measurement on it, like, okay, if I make \$10,000 a month, I make, I give 500 to somebody or some group. But then my question is, if I encounter something that they need my \$10,000, I have to give all my \$10,000. So why do you put measurement on it? You do as is, as is necessary. You give all of your money. K- It is... this is what they... most of these (religious) structures have this. Because that's how they could finance keeping the people going and what they needed to do, because it came from the Roman time and before. Religions found another way of taxing, but on the name of religion. You know when we used to live in South of Italy. In South of Italy, when you go towards Estonia, and you go towards Trani and down, you see a lot of piles of stones. And then when you go further South, out of Bari, you see houses with little domes, it's like little... we see the head of the mosque, it's like this, but now it's become fancy, very expensive. These stones now has been put up together. During the Roman time, they taxed you by the size of your building, or what you had as a house.

(1:32) So there were people who were running ahead of the Roman army, or tax people collecting, telling people that the tax man is coming. They used to build houses out of a stone, so they demolished the stone, that there was no house, when the tax man gathering the tax gone, they used to put the stone back and they had their house back. You understand? Like Eskimos. They used to be the ice block. In this part of Italy,

they do it with the stones. Italians are on the line, they can tell you. And we used to live near the, Bari's office and everything was on this side, then we went out, we saw it. This pile of stones, when you saw a pile of stones, it was somebody's house, in the Roman time for example. They used to tax people according to the size. Religions puts it on the conscience and tax it, it's another way of governing. And that's all it is, you understand? And nowadays, we find different ways, government find it, this is. Because these laws of religion is made by Man, so Man follows what is in format. Q: Because somebody told me, "If you don't pay ?? (tithing word in Farsi) you're going to go to hell." And I said... K- Oh yeah, that's always been... When they frighten you, you do it. This is what I told you, I've said this, years ago when I went to Iran, 2008, after 33 years, I was puzzled that every few meter there's a letterbox. I said to my bodyguard, "What are... Iran has always the best Internet, how come you have these letter boxes every 100 meter or so?" He started laughing, he said, "This is not letter boxes, Mr. Keshe." He said, "These are for homes of ?? (tithing), you pay in there if you do something wrong, you put your money in." I said, "Where does this money go?" He says, "Nobody knows." Who has got the key, collects the money.

(1:34) Q: Yeah, because there was a girl I recently heard, that it was a family member, I think they're very religious, I haven't seen them for a long time, they're living home, and then there was a suitor, they went to the house for proposal to get married, and the girl asked the man, "Do you pay your ?? (tithing)?" He said, "I hardly make enough money, I cannot pay until maybe later." So she didn't marry him, and I said... K- Yeah... When I saw these boxes, I said, this is the payment to the God, this is God's letterbox. Man have found out how to get paid, get God paid. Yeah? You understand, this is all made by the Man, it's the same process. I know exactly what

you mean. It's the same when you go into the church they pass a bucket. And some people, you know, they look how much you put in there. Q: Okay. You know, I have another question. When you look at the trees, and then you look at the leaves, and on top of it there's a line of dust covering them. Because in Tehran right now, I look at all the trees, because it doesn't rain enough, all the trees really are dirty. Like they have a layer really of dust. Somebody has to take, I touch one of them, I remove the dust from it, it became nice and shiny. But how do they breathe when the dust sits on them? K- It is, they transfer energy. Q: So it's okay? K- Of course. Did they die? Any of them is dead? No. It's transfer of energy. Q: Okay. But they look dirty. K- Dirt, it doesn't matter. It's received the energy. Q: The bottom is okay, but the top is covered with a layer of dust. K- It's not a problem for the plant. They adapt. Okay. They need a layer of fat, so it doesn't matter what goes in between. Maybe sometimes it's a good thing to get in. Any other question?

(1:36) Q: ... Was Mitra's Daughter born to a woman? If so, did the mother know about it? And was Jesus' origin the same? And does this have anything to do with comets? K- The answer to the first question is yes. The answer to the second question is yes. I don't know what you're talking about the last part. R: It was... was Jesus' origin the same? K- As a Soul, yes. As a physicality, no. It's two different things. R: And do these births have anything to do with comets? K- Not really. Historically things are put together. When we get these things, comets or ?? they bring out. When you get other conditions, they bring enlightenment and enricheness. And with that comes new cycle of wisdom. This has been and will be, not only for this planet, but the whole of the Universe. So, we see this right across, in every

shape or form. We lost the pictures, I was loading up for you. Have a look at your pictures now, and then I try to explain. I'm going through this rigmarole of bringing things up...

(1:38) << Mr. Keshe search for a picture to be shared. >> ... I have to choose something from this and I explain to you one by one. If you remember the pictures (graphs) of the past we had, was very interesting, we had the division and separation. If you see the shape of the picture today, because of the connections and system we set out. If you look, your shape is somewhere around here. This is your side. You are totally encircled in dimension by Universal Energy. The Soul side, the STP side, and then this is your dimension of physicality. Through the connection we set up, you are all in a different, receiving different energy. And I expect a lot of you will behave different, and will receive, and be very, very different in that structure. Just wait, you are looking at the picture, I lost my system. << Mr. Keshe search for a picture to be shared. >>

(1:40) ... And, I go back again, and if you watch, if you remember, and it's very faint, this time it's not very clear. So it means what we set up to do is a new structure. And with it, you see your line is all scattered here. Scattered here. It's here, STP and then back in. Before you had a bit there, comes bit here, and bit there. Now, you're all different. Watch this. And let me clean up, because otherwise you have a problem with all these dots. And watch this one. This is the most clear one. If you look, because of the energy cycle, because of the position, we are transferring through this time through the new system. If you look, you have a little here. This is ?? spreading , this, which means we have totally connected you to Universal Energy. And if you want to know why, how this is, maybe we can show you something very strange.

(1:42) Let me see if I have it here, I'll show you...The ?? corporate is another version of this. You've never seen this material before. (Shows a white bluish powder material produced by systems). You all are getting interacted with this. It's not white, if you see it, depends on your thing. It's a shade of light, very, very light blue. This is a new addition to the piles of the Keshe Foundation materials. It's the first time you can see Carbon 14 on the Cosmic Ray level. But what is interacting with you in the systems where you saw, is very much on the Energy side. And you all are reacting to it. You all have reacted, are interacting and we'll see, by the end of today, where this will sit. You have all shifted away from physicality. We don't see any physical condition at all here. Which this is what we set up here, to connect to your Soul, and the dimension of Universal Cosmos, and you see it, we don't need to explain.

(1:44) And this was the purpose of today's testing. This is what was missing to transmute you through the dimension of the field of the Universe. And then, we have a switch system to change you to a matter state, as a physical state of the Gans. You see nothing here, not even a dot. And if you go back in the pictures (graphs) you have in the teaching, see what you always saw here, this area. Physically you are here in a physical Man, but the Soul is totally connected, it is captured. And it straight drops, doesn't go in that direction, it straight drops. Out. Any other question? Can we have a break for about 5 or 10 minutes and then we come back and we finish about 10 to 12? R: I think it's 10 to now already, Mr. Keshe... You wanted to quit in 10 minutes, didn't you? K- No, no. Just have a break for about 5 or 10 minutes and then we finish in an hour or 5 minutes or so. >>

BREAK >> 612 KSW October 16, 2025 ...

Part 2

(1:57). K- Those of you who run operational companies using Keshe technology, we... due to the things which are about to happen, and is to develop, is developing, you can become part of the Markray Corporation in the stock share exchange. If you have considered and it's good for the Markray Corporation, you can become part of or in share exchange when negotiation is done, for your company to become part of the stock market in US, as a subsidiary or as a boundary of work of the Markray.

(1:58) There you take the shares of the Markray, we take the shares of your company, you become part of the structure, and Markray Corporation becomes a shareholder and a promoter, as to what is about to happen. You will understand in the coming weeks, what is going to go on. You can choose to stay with the Keshe Foundation or you choose to become part of the Markray Corporation of the United States as an operational entity. Still stay independent, but go on the total work of the, what we call, international work of the technology, what has happened. As I said earlier on, we have changed, we haven't changed course, we are mature enough to stop, or to the way we've done, and start the process of bringing different aspects of the technology into what we call, validation. At this moment of time, the stock exchange in, what we call, "Pink sheet" in US, and very soon, coming months, maybe a year or so, in Shanghai stock market. This is what we are working on, and then we split the two sides of the non-Chinese and the Chinese-Chinese cooperation partnerships. It will be done through structures which we are setting up through Shanghai Corporation, or what we call, stock market. Same as we've done with Markray, but now, in a very systematic way. The work has started and you'll hear

very soon about what's going on. Any other question? Q: ... (2:00) Do the Cosmic Rays that we receive, the Cosmic Ray device that we received before, change over time? K- What does that mean? R: Does it wear out or does it continue its activation? K- This act... It is connected to Universal links energies, these are not matter state. It's life. If you take pictures of this, keep it in one place and keep a picture of it, you'll see changing. It's like when you have the Gans's, so before you sometimes green changes to yellow or white. Take periodic picture of your, what you call it, .. Cosmic Ray Balls, and see what changes you see. Don't move it, just leave it in one place. It's a living things, is not a stone sitting there on its own. Q: ... If you build a Star Tetrahedron with Gold, Titanium, Nickel and Hydrogen fields, Can you interact and connect with 3I Atlas? K- Why? Let us know if you're still here. This 3I is a living control system. Highly intelligent.

(2:02) What we've seen, especially in the past... If the reports, what is coming from different agencies and groups is correct, that it has split in two equal halves, and they said, "Oh, the Sun has exploded into pieces." No, it's very controlled. They move the two units, if you explode, you go in different directions, the new parts are moving in the same direction. The number of, what I call, the children has increased in a drastic way, which is more sub-satellites. And one is supposedly heading towards Earth, which is actually, is carrying on with its own original line that will meet, the other part of it is gone. And it has, it sticks to its factor pulse, which shows it has intelligence. 22 seconds, 2 hours and 22, and that kind of sequences. And, the strange thing is, if you split ?? you gone, it's like a magnet. The two, if you break a magnet, the two pieces have the same characteristics. The two, three, four pieces, all carry the same, what you call, space gap. Follow, change, the same direction and dimension. And so, what you call, interaction of these things

with each other creates plasma lights. You know, like the way you see, have the plasma Balls. If you are in the car you see the lights, when you touch the ball, it comes to you. We see them having that kind of line of connections, continuously. Every single report which is genuine and is coming from the different observers, and observer laboratories, more and more confirms we are dealing with a Spaceship. Very highly intelligent Spaceship. And one of those Spaceships which colonizes, because it shows that characteristics.

(2:04) Has too many passengers downloading. You have to understand the process of creation of the Soul. Then you don't nickel, you don't need Nickel, Hydrogen and the others. You create the Soul. Stop being physical matter state. Work with Energy, you can get what you want. Any other question? Q: ... Is there anything that those who have signed up to be Satellite Souls can do, to support the process we are currently in as Mankind? K- You are already in it, you don't know. I remember as I said once before, when we start asking for the World Peace Treaty, some Brazilians objected that, "I have committed my Soul to Christ, I cannot give that to the Foundation." So, we don't give it to the Foundation, you give it for the peace within yourself and your Soul. It's the same with your Satellite people. You, when you accept it, you're already in it. Especially with what we set up. And as they say, "The process has begun." You will understand. The most important thing is, ask your family, ask your friends. See what they say about you. How you changed and how they see you compared to the past.

(2:06) Any other questions? Q: ... Lately, I've been witnessing something shocking. I fell asleep while I'm driving the car instantly without warning. Something about, I think, I think they mean I was the author of two accidents, in a devastating impact on the car last Friday night, October 11th. Does it have to do with the Thursday sessions? Or, something else that

happens in the Universe from solar flares? or from the impact of those fertilizing Spaceships? Thank you Mr. Keshe. K- Is it to do with the cats sleeping on the wall? R: The point is we have a lot of things that are interacting, it seems, with humans that normally in their lives,

(2:08) perhaps they weren't aware of these other influences, or perhaps the other influences just weren't interacting as directly as they are now, but it seems like people are opening up more to the Soul level, and maybe that has unexpected disturbances to the physicality, for example. K- You can't say yes, you can't say no. R: There are a lot of factors involved. K- We do things, we don't think about it, other people do things, we don't think about it, and then years later, far later, we find out it's the consequence of what was done to us, or to our other people near us. See what happens. Now, we see a lot. This is increased beyond imagination, but they all put it out in different things. There's a lot of massive rapid strokes, out of nowhere. Cancers with a short life, two months, three months from finding out till death. Now we see a lot of these things in past 12 months, and a lot of it no one knows, but indications are vaccination we had during Corona, or the Corona we caught now suddenly changes something and brings this up. Many, many young people are dying out of, with no reason apparently, in all sorts of conditions, even elderly people with no reason. And getting attributed towards the injections we had three years ago.

(2:10) If this picks up into five to seven years, it'll be huge losses. But we see this, you see accidents, people are not there. And they call it the heart attack, but when you... in some cases they've done, especially you see why, they find calcification of the heart, which we never had before. R: The statistics I was reading yesterday, the heart is just taken over as the major killer in the whole world, as it's taken over from Covid, which was the greatest killer for the last few years,

apparently. And how it's... K- Yes, it sits with heart, yeah. R: What they call heart, but it's perhaps related to either Covid or vaccine. It's hard to say which. K- It's calcification. We see a lot of solid hearts, which heart has usually soft. There are reports that the heart of a lot of these people are... it feels like it's got texture in it, which is very abnormal. It's... we have to live with it, it's gone, it's done, it's done, it's damaged. We got to see who takes what, and what it is. Nobody knows what these vaccines were put in, done, and the government forced people to take it, two or three doctors, specialists. If this pattern works and we lose a lot of doctors, what's going to happen? Because the people in the front line were forced to have injections. We see a surge in some sectors of diseases connected to back end of the Corona. But it's a topic you can't talk to, then you talk, you end up in prison.

(2:12) R: Yes, we're probably better off not discussing it here. K- We won't. .. R: Although it's opening up a lot more than it used to be, in terms of that. We have... K- Yeah, this doctor took us all for a ride, with Mr. Microsoft. He's soft everywhere, so his brain is soft too. He can't help it. Any other questions? Shall we call it a day? Q: ... Hello Mr. Keshe, you spoke last week about, the separation of the neutron as radiation. Can you speak more about how we could practice the process? K- Depends. R: Oh, sorry. Steve says later in the chat here, he says, "I meant electron, not neutron." Well, I thought Neutron made more sense, but separation of the electron as radiation. How can we practice the process? K- It can do that with neutron too, it doesn't matter. In this, you cannot do it, unless you're aware of what you do. .. In the world of chemistry, they call it sharing electrons, where when you do that, you allow electron to move in a new orbit, new condition,

(2:14) but you go one step further, you share with a larger dimension, strength field outside, which takes the electron out of the boundary of its atomic structure. In a way, you fool it, or

you force it. And this will bring a lot of new dimensions of work. And when you do this, because you're working outside the environment of the atom, you create Cosmic radiation. You need dilution of the fields, you need the extraction of the plasma. And it's very easy to do, but once you understand it, it's not hard to achieve. R: Is that a natural process in Space? K- It happens in Space naturally, yes. Actually, most of the moons are created this way. Most of the moons are created through this principle. Partially it's rejection, partially it's attraction in two different dimensions. If you look at the 3I, 3I uses it very well. I watched many, many, many of the pictures coming up. Not these fancy pictures they show you in the screen. But in reality of how this thing works is the good example of it.

(2:16) This system continuously, continuously uses the, what you call it, reverse interaction. And every time ?? they say, it uses massive explosion because they don't understand. It's like putting a bread in your hand and pulling it apart. It's not an explosion from inside. If it explodes, it goes to pieces. But if you get a, what you call it, a piece of bread and pull it apart, it cuts on a certain line. Depending how much you want, how you want to twist the bread, what shape to make out of it in two halves. And 3I does this very well, using separation of the fields, in ahead and behind it. It anchors itself every time it has made connection to the Sun, it has anchored itself for tearing apart. And then it anchors itself back on the direction of the flight of it, to where it came from most probably, to another star. And the two, in connecting, give energy which gives a balance and allows it to split. It's a very clever system. It's a very advanced technology. They are aware of the works. The technology we understand, this building, we want to replicate it. And this is why, if you listen to all of these things, and we always said, they said, "The light is in the front of it..." Of course the light is in the front, last week, the week before.

It creates a fields ahead of it. It has a reason, at high speed, anything comes in. Because, these people cannot see this light ahead, is a dynamic rotating thing, that anything comes on the way, just gets screwed up. Possibility of this hitting this thing is zero. Secondly, it has a magnetic field dimension, it also has a protection, it's got atmosphere, we spoke about this many times, past 10, 12 years.

(2:18) We are living, we are working, we are watching a dynamic system. And if you understand this, and then you understand how you ?? split the plasma, you create a condition, much, much stronger, but on a specific field strength, which matches the electron, and you can extract the electron. And when it comes out on its path, with the interaction with the field, which is pulling it, ?? in its environment, it creates Cosmic Rays, a massive amount of energy, massive amount of energy. Any other question? This is why, as I said, Keshe Foundation, through our way we have set things up, be open and the opportunity is given to us by actually the Americans, and then the reaction of the Chinese, and every other thing, for us to come in as a third alternative. If they shut us down? Would they bring Markray down. Would they, where the technology will come in to be accepted in a different dimension? We have to wait and see in the next few days, next few weeks, and how the market reacts with the announcements ?? on of them which the Keshe Foundation will make. And everything is scientifically backed, it's not just we say so. And, would we become counterweight against those who end the war, but now they can create a mayhem for themselves, that we become a balance point, ?? with the knowledge to be shared. Q: ...

(2:20) Hello everyone and special thanks to Mr. Keshe, Rick and all the Knowledge Seekers in the back for your tireless work on the elevation of the planet. My name is Emmanuel from Germany and my question is about the Space Travelers

that are paying our Solar System a visit at the moment. Since their technology and knowledge is so far ahead compared to ours, is there anything that can be interesting for them to learn from humanity and Earth, besides the process of transmutation? You once mentioned the way of loving that's common between Earthlings. What might be their exchange with other civilizations in the Solar System? K- In matter state humanity is very advanced. In Energy state, man is baffled with the stupidity, the arrogance and ignorance. So, if these people would like to learn anything about the material world, humans are best of it. If it comes for Man to understand the work of the Energy, they tackled the wrong guy. Yes, they have to learn a lot from us, from computers, Microchips, how we handle stupidly bacteria's. Knowledge of Man in matter of state is very advanced. The way we envy them sitting in that UFO, they envy us, the coming up of the 'four wheelers' to this position. Don't forget, these travelers have seen us many times. They have seen us, you know, being on the donkey, (2:22) you know, not drinking water from somewhere, dying, not knowing it has got a microbe in it. And now, we become very good in matter state. The counterpart is the other side, is the Energy state, which they use, is puzzle to us, which is we are puzzled to them with the matter state. But now we understand the matter state, and we understand the ?? ?? Energy state, so we see it on both boats. The 'Four wheelers' have learned a little bit more. Yes they do, they come, they learn from us, engines, computers. But they laugh at us because we haven't learned about the working of the Energy of the matter. And on the other hand one question I put before. Are you sure every time you sit on a train, the one next door to you is from this planet? 30% no. If you want to make a Man, you have to do a lot of work in 9 months, what you call it, pregnancy and the rest of it. If you want to work with the Energy of the Man, it's instantaneous. You don't need the Man. Man has chosen the hardest way.

You remember the song says, "Sorry seems to be the hardest word." That applies to mankind and the path is taken, but we're still there for other people to learn.

(2:24) Any other question? R: Thank you Mr. Keshe. I'll let you go. K- I just received a note. Those of you who ordered the Halloween Bundle, it should be leaving before next Friday, or maybe much earlier that you have it by next Friday. Hopefully it will be released or be sent out by the Tuesday and if any of you putting in your it has to be by tomorrow or Sunday latest that it can be handled, to be dispatched, to be with you for Halloween. It's a beautiful package. I've seen it, it's very nice. And the same goes with the Christmas Bundle. The Christmas Bundle this year, last orders will be around about, anything received before 10th of November. And after that they won't accept any orders because it has to be done properly to be ready for... We should leave it till last minute, not this year. They are well ahead. Any other question? I answer one more question, if there are other ones and we call it a day. I have to go into another meeting. Q: ... Thank you very much for all the treasures you give us freely.

(2:26) And I wish you all the best. So my question is from past time. Like, it's a long question, maybe because, I mean, the answer, because I'm comparing the blood circulation in the body with the energy circulation in the body, which from the old time, they have put the map on it and they used in acupuncture, qigong, tai chi, these old stuff, kind of medicine, Chinese medicine, part of Chinese medicine. So, how this energy circulation in the body is created? Is it created according to the needs of the system naturally? Or like the blood circulation? K- It has different reasons. It's cellular structure, bone structure, environmental pressures, environmental Inertia, all sorts of things. It's not one thing. It's very interesting. The evolution in certain races is very amazing. If you're observing it, if you're watching it. These we

observe because of the research and other things which sometimes comes handy when you work together, natural, what you call it, samples of it.

(2:28) We see black Americans, tall, well built, huge feet. Race has been there, they've grown into over decades and centuries or whatever. Now we see Chinese and some Japanese guys, tall, with very small feet. You go to a shoe shop in the West, 46, 47, always is available. Some shops keep size 47 and a half, normality. And in Chinese shops, Japanese shops, you ask for 45, we don't keep. And you see so many tall guys, all wear shoes. We adapt and ourselves adapt according to the environment, according to what, the, what we call, local Inertia gives and develops. They extended the height in the tallness, but the feet which is there, and size and shape of the feet, brings a lot of different understanding mentality, emotion and all sorts of things. And it's not there (they didn't evolve their feet size). Next time if you go to China, as for a size 46, they look at you, "Are you idiot? Doesn't exist." You go to European shops and Western shops, ask for 46, it's normality. Would like 47 and a half, we have that size too.

(2:30) It does matter, it brings a change, and what we do locally, and how we feel emotionally, and how environmental condition affects on a structure of our body. And how we look, how we feel, what emotions we carry. And it's collective. And when sometime we create, we take one race from one part of this planet to another, the two don't understand each other, because the structure of the brain, it creates different logic in the Inertia of the Space. This is the same right across, down every aspect of the knowledge science of the Creation. I hope I answered what you were looking for. Q: Thank you very much, sir, for your time. Thank you. K- Thank you very much. Thank you very much for being with us, and hopefully we'll share new structure, we open a new dimension of teaching

next week. Again, goes back to part of the Time, and evolution of Time, and connection with the Soul, and the rest of it. And, this opens up a new dimension through structure. But, what we have today from your graphs, is very interesting. And, what we see is more or less in line with what we were looking for. To interact, spread the Soul, than collecting one Soul. Which means, collecting Universal energy. And we see that, (2:32) and in so many ways we are on target to run a test for you lot for the last Friday of this month. I hope you enjoy it when you come in the environment. Thank you very much. And I go back into it. Please still support us, we need more of these Units to be purchased for the communication. We need much more, and please support us to be able to complete, and set this up. See you next week. R: ... Small announcement, invitation actually, from the Universal Council, sent by Lissy, who... it says, "We, the Universal Council, invite you to freely unite your Souls every 3 hours, unifying them to illuminate the Souls of all leaders, and find the path to permanent peace, avoiding the suffering of physicality on this planet."
