613th Knowledge Seekers Workshop October 23, 2025 (Transcription, Editing and Proofing done by KF Brazil) (Auto transcription by Elias)
ENGLISH TRANSCRIPTION

Part 1

(:17) K- Thank you very much. Good day. Good morning, good day to you as usual, wherever and whenever you listen to these series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We welcome you back as usual and as we said we start something new this week, but before we do we I would like to go back into some things which we talked about it a couple of teachings ago and now scientifically we've seen it to be proven to be there. And it's good for you Knowledge Seekers (KS) to know what is going to be next step for humanity.

(:18) I've asked Rick to take out a specific section of 611 out that he will play and then I'll tell you the reason why and how close man is to what is about to come. And this is two weeks ago when 3I was heading towards Mars and the Sun and right about 20th and 19, 2 or 3 days ago, it disappeared behind the, what you call, the Sun, from the view of the Earth. We don't see it, the world of science doesn't understand what's happening behind it, but, we would like to play this section, which is 1 hour and 5 seconds into the teaching of 611, for about 10 minutes, and then we come back and I explain to you exactly what it is, what we have seen, and what scientific world has reported in past 48 hours. And then, as we told you was going to be seen, you'll see what is going to happen to humanity, hopefully in next few weeks. We'd like to play this part of the teaching two weeks back. << Rick plays the except of the 611 KSW. Below is the transcript of it is in italics. >>

(:20) Q: ... Hello Mr. Keshe. In the 610th Knowledge Seekers Workshop (KSW), that would be the last one, Mr. Keshe, one said the two ships, 3I Atlas and Swan R2, will meet behind the

Sun as seen from Earth. They will mate with each other to create a new race in the Solar System. At the time of mating, a flash of light will appear, whose intensity will be stronger than the sunlight at that time. According to my logical deduction, it is very likely that a very strong Magnetic field storm, pulse, will appear to blow to Earth. And it is also possible that it will trigger the Sun to create a secondary Magnetic field storm that blows to Earth afterwards. I have a question. Mr. Keshe, can this happen? If it happens, besides causing damage to the artificial satellites orbiting the Earth, can it cause other natural disasters? For example, the reactivation of the volcanic belt, or earthquakes in the geographical fault zones. Thank you very much. K- Not really, because, first of all, the interaction of these Magnetic fields in the plasma condition, are very, very subtle. And they are not the storms, they are the feeders. They are at the lower strength, much, much lower strength. And they... they... only reactions, if we see from the other side, will be like a secondary Aurora around the Sun.

(:22) If they're going to be a massive interaction, the interaction of the new fields should create a secondary ring on top of the, what we see as the image of the Sun. What does actually this mean? Just one second. What we should see if such a, what we call, extension of the fields. Let's see why. What we should see theoretically, is that we have the Sun... (If I can draw it and you can see it, it's very thin, I go another thicker one). If we see the Sun like this, and if these two objects, Magnetic field wise, interact with each other on the back side of the what we call, the Sun. Us as observers on this side as a human being or our technologist, should see some sort of different radiation fields of different color depending on different strength around the Sun. This is because these two fields would interact with the Magnetic field of Sun, being of the same, will create maybe like a

rainbow effect, but the Cosmic Ray. We need special systems to be able to see this. It might be seen with the naked eye, it might not be seen with the naked eye. But as the fields come you, you say you might interact with us. It won't be as, it's not as a Big Bang.

(:24) It's more or less as a rubbing off. The release and the release of the Magnetic field of the two together will create such effect. If we see such effect around the Sun in next two three months, we know the, of the order of the magnitude by the color. We got to understand that these fields are extremely powerful but extremely low. They work on the Magnetical Gravitational field strength of the absorption that interaction. What does this mean? They use as a feedback, in a way, you can absorb everything. When we saw for example the 3I receiving massive surge of fields from the Sun few days ago, couple of weeks ago and then it went to what we call, Magnetic field ?? side where it cannot be seen, and then we saw number of satellites coming from it. The world of science says, they can't understand whatever. But you have to understand. We explained this before that this absorption is not to the physical structure, this absorption in this field is directly to the center. And you can hold to as much as when you have a Black Hole in the center of the system. This Black Hole has called upon this ray, not the ray coming to it.

(:26) So it has the capacity and it can take as much as. We see lightning hits a tree and the tree explodes into pieces. This thing needed this energy to be able to release, to charge up, to release what was from it for them to go. In a way it needed charging, tapping up, topping up and then going on. This energy which was absorbed, some of it will interact in this area, and then that interaction in turn will become like this. I explained this to a Knowledge Seeker in a very funny way, is that it's like the shedding of the wall of the womb. You need to receive the energy for it to become energized that the

next cycle of children, or the egg, or the sperm can come in, or be produced to go on. And this is what that lightning was. And we see this lightning. What we saw on Mars was a very direct effect, where we seen unusual storms on the surface of the Mars while this was passing. Two things, was the storm due to, they say it's about 29 million kilometers away, or we had a landing from the Space that it created that storm. There are a number of things which is ?? depth obscure, but Man has to be ready to understand it. This interaction will not give us a massive bang and a flare, it's going to start. No. This interaction between the 3I and 2R or R2 will release energy that we will see what we call,

(:28) if we see the rainbow around the back of the Sun, in interaction with the field of the Sun, then we know they met. Then, for sure, we have met. We have seen a galactic system, a system from the Universe, fully controlled, intelligent, and according to what it's supposed to do. It's like putting a fertilizer on the land for it to give life. It's very much, I said before, it's like the... We see red flowers, where we see came out during the World War I, across the plains of France. The poppies, they were there for hundreds of years. The received of the energies of the bombs and material which brought the land to be energized, the poppies came out. And this is that kind of energy. Everything is there, they have seeded it, they have brought in, and that energy will start the cycle. It's not a destruction field, it's the field of life. And we see it, and we have to be very, very vigilant, as they don't need to land, they need to pass, to confirm the creation. And the biggest problem we have on, with us on the Earth, we always look what lives above. Some of these energy which comes through 3I, feeds those who are within, because we said, as I said last week, the naval forces confirm it. That energy is going through the water,

(:30) into the center of the Earth, as an exact time lapse, as in the 3I. In the next, maybe week, two weeks, we will be testing the system. I expect interference in a certain Magnetic field bandwidth, across certain part of the planet, but it's a good bandwidth, it's not a bad bandwidth, is something that will bring, it's the beginning test of the feeding the Universe. We are in that process, in the more or less, in the second phase of this process. What we've seen with 3I, will be replicated most probably, if we get a chance to complete it, for October session of the Fridays. The last Friday of this month, which we'll bring it, hopefully it'll be ready to show. But don't expect a huge Big Bang, these are the plasmatic, they are not matter state to create that Big Bang. They will change the Soul, they will bring enlightenment, they bring energies which is in the dimension of emotion and Time, and they start and they create a new Time. Any other question? R: I had a question, you mentioned the interaction with the fields of this object with the oceans and so on. And I understand that these the object like the 3I Atlas is giving off enormous amounts of water,

(:32) and I was thinking, while it's spreading its water, whatever from wherever it came from throughout the entire Solar System basically. And they say that it's putting off so much water. It is unusual, because it probably hasn't been to other star systems that would have burned off the water basically. K- No, no, this is the lack of knowledge, lack of understanding. The... anything produced by the systems like this is produced by the interaction of these fields with a field of the environment. Nothing to do what they carried before, because they don't understand they have to come up. You know, Earth is the center of the Universe. Because we didn't understand it, we're actually part of a bit of nothing. And this is the process. The material produced by systems like this is from the interaction of the central cores with the environmental reaction. And our Solar System

has a beauty of creating liquid. This is one of the parts of its structure, the Magnetic field of the Sun, its positioned in the galaxy, the compression of the other Solar Systems around it, forces that this Solar System creates liquid. And if you have it in a certain fields, it creates water, we call it water, or we call it vapor. K- Thank you very much. The reason I brought this up is that, as you know,

(:34) we got Knowledge Seekers going everywhere and searching everything. And research the spectrum of the knowledge just getting spread about this system (spaceship). And interesting is that in past 48 hours, Space Agencies and organizations which are involved in this game are reporting exactly what we said that might happen when the system goes in the back and you see it. (He shows a picture of the Sun). The interaction between the two systems has happened. We've seen the flares and... is much, much more powerful than we could say. We see these flares, this dot in the middle, the white dot is the Sun. And then there is the filter and you see the expansion of it. This happened more or less, within hours after 3I went behind the Sun. And this is simultaneously when the East Coast of United States run into a problem with the Internets and the rest of it. They managed, they got the tip of the, the tip of these fields coming in direction of the Earth. When you cut this picture and what we explained, we were going to see, is exactly what has happened. This tells us one thing.

(:36) Or you can come to two conclusions, one or the other. The Solar System (SS) is set for a new life. The energy released due to its proximity to the Sun will stay within the Solar System. We have to see which planetary system was on the other side. When you add it up together, if this event would have been on this side. If you go back on the pictures. Rick if you can take the pictures of the drawing of put and this next to each other that we can compare. Then I'll show you

another one (picture) and this is the very exact one. This happened exactly when the two system met behind (the Sun) as I discussed in the teaching of 611. These fields will create new dimension of life in the planetary system which we're facing it. Absorption of fields, creation of new life. But this has a beauty if you understand, if one understands this. And that is, this rendezvous as I explained before was pre-planned. We might see a second one. I know if the second one is about to come. We might see a second or a third one either (even). (:38) Whoever is behind this structure, this interactions, is a caring team, a caring group, a caring race. They're aware of the power they release in their interaction. And whatever is set up was to be away from the Earth where there is a confirmed life that it not, it will not get endangered. If this flare, if the interaction of the two systems, and closeness of the 3I to the Sun was taking place on our side, we would have not been here today to speak. We've seen the performance from this system, past months, we observed it, and everything it does is against the law of the matter physics, but everything it does is within the law of the Energy of Matter. Our scientists are matter energy and we are energy matter and everything here, every single picture comes from this system, confirms one after another, intelligence, life, care, love and more and more and more. When they planned this interaction they were aware of the life on this planet, and a caring life not to damage.

(:40) But the beauty of it is in next few weeks we move to the side and we meet with this system. Energized to a specific level and for sure if we are lucky, if we don't run out of luck, if what we hear is consistent with what you've seen and the communication systems and the rest of it, all of us will have the pleasure to meet the Universal Community. And if it doesn't happen, we have to wait and see what going to be the next step. We will come across the energies of the Universal

Community. We feel it as emotion and we might feel it as a direct contact, physical manifestation. Physical manifestation is possible because we've seen the prelude, the pre-performance on the Mars. This system is fully aware of every position, dimension, thinking of world leaders, the citizens of this planet, and knows exactly how to behave. And we received warnings. We know, we know that for the first time, maybe if we are lucky, we'll encounter together.

(:42) Not to be the guesses of the Egyptians, did the knowledge come from somewhere, the others claiming that they are the first and the rest. But we with the new Communication System we all have, if we don't get damaged because of the highest strength magnetic (M) field of the system, to be accepted into the Universal Community. I explained on the right hand picture what is to come, on the left hand picture some 12-14 days later, scientific pictures confirm. And what we see is exactly what was supposed to happen. And you see when I drew the picture of the, what we call, Aurora. You see on this one is much more profound in the same side. This is not a magic, it's understanding the science. North Pole should release more energy to be able to keep the balance of the rotation without damage. But one point, what do you see from the center of the white dot to the edge of the black where you see there what we call, the Aurora or the extension of the light is millions of kilometers. Hundreds of thousands of kilometers. This is how much it expanded. It means the system 3I with the SWAN have the capability and they have within their power to get the star dancing.

(:44) We've seen when meteorites or whatever come to inside Earth at atmospheric condition, what lighting you see. But these guys are playing on the energy level. They are playing it on its way that creates life, doesn't destroy life. They chose the other side of the Sun to protect the humanity, otherwise they could have put a shock for you on this side. They are

aware of every possible damage it could do. Maybe I'm wrong, maybe I'm right, but if I'm right, mankind is ready to what we have said, fulfillment of our promise. Taking Man to Universal Community. Man will meet, Man will touch, Man will smell and taste the knowledge of the Universe. In other pictures from Space organizations, we saw again the system creating shields, magnetic shields, protecting itself from the fields of the Sun as it passed it, which is again showed intelligence, we see in this, what we call, intimacy between the two units of the 3I and the SWAN, and then we see life. You got to understand, they don't need to touch each other, from millions of kilometers they can create a mayhem, in interacting with the Sun. What will this bring us? We have to wait.

(:46) Would this in the course of next 4 to 6 weeks or whatever, it take us to be on the other side, or on the same side as we are of the Sun? But for this system to come out itself towards us, maybe 90% we hope we'll see crafts not only on Earth but other part of the Solar System. We'll see beginning of life and as I said to a Knowledge Seeker last night, it's like a cruise ship it's come to port. As I said in the other teaching, some of the Universal Community people who we always said that about a third of us on this planet are not from here. The cruise has come. They have to take back on the ship to go home or to the next port of destination. And some of them in the shape and condition of the Man will join us in a way they 'change hotel.' And with it they bring us new dimension of intelligence. If we do not preserve the condition of Universal condition, what we call the world peace, mankind will lose. And if we observe the conditions, if you remember you, most of you who were with us, you signed the World Peace Treaty between yourself and your Soul, except the Brazilians, you will see a new dawn, a new beginning for

mankind. Either way, we have received such energy, all of us, that many of us,

(:48) even possibility of the change of the race of the Man is on the card from now on. What is interesting is how fast we've seen this going. Because it's possible that this little chap will jump out much faster than we thought from the back of the Sun side, or waits longer for us to come out, or we see it joining us, a new race of the Space, and fulfillment of the promises. As we said, wait and see. And if the, what we call, citizens of the Universe decide to open the door of the Universe to humanity. As I said, the only thing which will bring this about to happen, the final, what we call, conclusion of contact with us in this cycle, because this ship will come back, once it goes for its tour around the Universe. The point of change will come, and this is in dimension (D) of the Soul, with the interaction with the Soul of the 'Daughter of Mitra,' a new race in the Universe (U).

(:50) We have to wait to fulfill and we have to wait to see how humanity changes and/or if our leaders cannot accept peace. They are in touch, they are part of this, they become part of this structure past few weeks. The only alternative left will become what we have seen with the pyramids in Egypt. Legacy of building achievements with no citizens. And how mankind will change. Would we go for peace? Or we don't? Or they think they've done enough by releasing such energy that in due course mankind will change and take over different condition and positions. We were correct in assessment and we'll see most probably we are correct in the outcome. And most probably we leave the same as we are, but this time we will not go, and we will not find another excuse what happened to the people who lived on this planet. And hopefully we will not go into the rat holes and those who are in the oceans ?? do not hide.

(:52) Those who are in the, what we call, inside oceans will not come out as different race as the race of the Man, as the race from this planet. As I said this is not a hostile, it's a very friendly system, has even looked after us, not to let us to face this energy in front of us. I said in a very polite way, it's like the mother and the father hiding in the room that the children don't know what they are giving life, creating a new life. Being aware of them in the house, but not knowing what they're up to as a new life takes shape. I hope if this encounter happens within the next times it's not that they going to destroy us, they are Passengers, they just move on and/or we see a new development. Many of us could be standing by Christmas, not in front of the Christmas tree, but in front of those who can tell us truly what was it's Christmas. They've been here, they've seen the show. Now they can tell the story. And it'll be very interesting how we as human race accept, believe and go, or through the enlightenment.

(:54) Light of enlightenment we receive from them, we will understand the wisdom of the truth and the reality of what is on, and what is going on. I hope you enjoy it if it happens, but every indication here is that we should... I think it's time for man to become part of the Universal Community. And I hope it can be fulfilled. New knowledge, new understanding, new race. A race can be accepted by the universe, not with the animal behavior of today. As they say, 'fasten your seatbelts' and see where the ride takes you. Going back to the teaching and what we said, for mankind to go into the next steps of understanding the process of creation, mankind needs to understand the play game of energies. The Time, the Place, the Position and how life is created. Mankind has to understand that there are two different things in two different dimensions, but one leads to other, and other leads to the one which created it. In the world of the physics of today,

(:56) we look all the time on the material side. We see the material side and the energy, but we ignore the energy side and carry on with the material side. With a new understanding we have to allow, we have to understand the dual role play of energy. When the energy changes to a matter state, or how does the same energy goes into the energy state without the need for matter state manifestation, state of the Soul of the Man (STM). And then if one understand this, one understands how the Soul is created, how from the interaction of the fields of the Soul, which one leads to the creation of the Soul of Physicality (STP), which itself leads to creation of manifestation of the physical life. STP is the Weight. And is the outcome of the interaction of the STM with the Soul of the Planet. And in that process the interaction of the outcome of this, which we call the STP, again back itself with the Soul of the Planet, lead to physical manifestation of the Man. In a way, the Soul is the Creator.

(:58) And the Soul of the Planet in its interaction creates the Mitra. In interaction of themselves, the two lead to create the manifestation of the physicality. How much we understand this and how much we follow the interaction between the fields and in combination with the matter state, will dictate how Man will explore the Space. Where through same hand as creating a dimension of the physical life to live in, one understands what needs to be done between the STP and the Soul of the Planet to lead to manifestation of the physical structure, or no physical structure depending upon the magnetic field strength of the STP. And if one understands this, you don't need to go on the magic box. You will be always on the magic box. It just depends when you want to create the magic. You got to understand the way the fields play with each other, and the way the fields play with us, and then understand how you can separate the two from each other.

(1:00) If life is created by interaction of the fields, we need to understand which field strength is for what job, and what it means, and how it manifests itself, and how we allow it to be. If we look at the reports coming from 3I, they keep on telling us that this system is sending so much field information or whatever or movement or correction of movement or whatever at a given space gap. What does this mean? This space gap means this system wants to, has the capability of and it will lead to creation of life. .. What it means, it means this system will produce life.

(1:02) And to do so it needs to have in common with us, with planetary system it works, and is about understanding what every action it has taken fits to us, fits with our work, fits with our understanding. This system is regularly sends pulses. The system, we've seen pictures now coming from what we call, the other agencies, we are aware of his shape and whatever, sends pulses. We are used to one system communication and that's what we are. The radio, television station, whatever. We create, we made a box, we made all our noises in it and we transmit. This system has multiple systems with their own half, or their own pulses. How is the pulse created?

(1:04) In the body of the Man, with the heart of the Man, because we attach every muscle tissue to something, we control the heart, the pulse. When you look at the pulse of the heart, it's no difference than when a polarity changes in a planetary system. In a planetary system we allow the pulse variation in the field to go through and then has no attachment it revolves. With the heart of the Man we have struggled it, we attached it, so it cannot go through the half. Plasma in the system goes through the half cycle of polarity change, the heart cannot follow, so it kicks back again. We call it the heartbeat. But there is no difference in the World of the Creation between the heartbeat and the polarity change of a physical dimension. And as our heartbeat changes, according

to different emotions, the heartbeat from, or the pulse from system like 3I does the same. We kept on speaking about the emotion and the Soul.

(1:06) The interaction of the fields which has been released and what we will come across will be at the space gap field strength energy that will make a peaceful Man out of the Man. You all play the game with us for past few years and you all across this planet have in your kitchens, have in your house, maybe you don't do it, still left something somewhere, the Gans's. Those Gans's create a pulse. The Gans of your heart create the pulse of the heart. And depends how you shackle this pulse, how you speed it up or reduce it, and put it in interaction with the pulse of his environment, dictates the life. Every cell has a pulse and when that cell has a tune, magnetical field strength with the pulse of the Soul, and the pulse of the heart, lead to its creation, generation and sustainability. If we understand this, we understand how a system like 3I reads our emotion, knows our outcome, knows our fear, knows our needs, and everything else.

(1:08) The captain of this system creates a pulse that if your pulse tunes to mine, you go to it. The call of the nature. But the nature and dimension of the energy and not physicality and mankind knows exactly what this means. If we understand this and if we can bring it to work in a sequential way, mankind will find peace, will find a new way of life, and then mankind will understand how the system works. The energy of the emotion, if it's in pulse with the energy of physicality of the motion of his energy, Man will never have a heart attack. Man will never have a brain hemorrhage. We don't understand it. And for that reason, we die of it. One is a pulse and one is the frequency of the physical matter, and when they don't match, it's the end. This is why mankind dies. No one on this planet has ever died of a cancer, but we all die

of lack of energy, because the cancer lump takes over, changes the rhythm of the time of the cell, don't match.

(1:10) The pulses don't meet the way it was, because the pulses of the cell, the pulses of the STP, the pulses of the heart, the pulse of the STM, originally in the womb of the mother tuned with each other. So they follow it and once one is out of position, it creates a mayhem. When you are emotionally involved and you cannot handle it, you... it raises your blood flow because of the physical dimension that you have created. The energy has to go somewhere, it comes to the heart. The cycle of the reversal is not, cannot be carried because it's too strong, the muscle tissue are holding the heart in position, you have a heart attack. That heart attack unleashes such a huge energy between the energy of the Soul, energy of the STP and the physicality of the blood which comes in. Booms up, goes to the top, gives you brain hemorrhage, ?? burns the cells. If you go back and look at the pictures we just saw of the interaction of the fields of the 3I with the Sun, you see the energy is up the North much, much stronger than the Sun, where the energy transfers all the way through the dimension of the rotation. In the past 10 minutes I've given you a secret of Creation, the way the Creator creates. If you understand it,

(1:12) you are not far from to be the passengers of the spaceships when it comes. That spaceship is not a 3I, it's understanding of yourself how you want to be part of the energy of the Universe in the right order that it comes from you, the right creatures of the interaction of the fields of you with the environment in the future. Frequency is the game of the matter and the Man. Pulse and plasma collection of fields is the game of the Creation. And just because Man does not understand this, he ignores it, denies it and everything else which comes with it has to be stopped, because he hasn't got the intelligence to understand the two are the same, but in

different houses, different rules. Remember, when we were teaching some times ago, in our

systems I always explained. There is no AC inside the plasma. Plasma only appears, we know its boundaries, when we can detect AC. AC is the feature of physicality and DC is the feature of what we call, a plasma. As it has nothing to interact, it's always within itself and the dimension of it. And for that reason it absorbs energy from the whole of the environment, not collective, selective to the field strength.

(1:14) If, as Knowledge Seekers you understood this, you have found the key to Universal peace, you have found the key to dimension of the Creation, and you have found the key that if you decide makes you candidate, if they decide for you to join them in the trip round trip of 3,000 years to come back again. And if our scientists understand this point, the game of the life as a citizens of the Universe has started. I leave it with you, I gave you a lot of little information's, and then we build on this more and more, that you can see how you can create life. And what is the purpose of life through the eyes of the Creation, not the created. We go for a break, we come back, and try to answer some of your questions.

>> BREAK >> 613 KSW October 23, 2025 ...

Part 2

(1:22). K- Thank you very much. We are hoping by next two, three weeks, two weeks, to send out the first batches of these systems. Everything is getting ready for it. Hopefully the people who are working in the background for the software to complete it. Once you receive the Units, try to connect it to Wi-Fi to your Internet. Or we are looking for a system registration, which means the Unit can carry its own connection directly to a SIM card. This is a another cheap way

to do it but in a way you can take it anywhere and the system is continuously connected. All you need is to pay a fee for a connection, it's a satellite connection, or a system of the Internet connection, and it doesn't interfere with anything. (1:24) And that is a system on its own, not us. We have to negotiate to purchase if any of you want to have that independent system. You can take it anywhere, it doesn't connect to your Internet, cannot fall out, and you pay annual fee to the subscription to the what you call, the provider. On the other hand, once you receive, you confirm you received it, then we, within weeks, send you a second part to add to, just plug and play, that it connects it to our system, which means we cover, as I said before, the governments cover the satellites and the space above Earth started from the ground, we cover the mankind from the ground with these Units, which means all of us we are connected to each other. And the system will cover everybody else in the mesh. We create a dome on this planet. And we try to be in as many nations as possible in the first hundred Units, that at least there is one unit in every nation. Those of you in your countries could not buy one or receive one, could not afford it, we send you a Unit because we have received donations to cover for this. As part of our system, those are you who've been generous to us, have paid for the others to receive it. And so in the first 100 Units we try to cover as many countries as possible.

(1:26) We have not received more or less any orders from Africa, but our Knowledge Seekers in Africa will be sent the Unit, we'll give you the Unit, the only part left with you is the what you call, nation's import duty, that if you can, we contact you before we send you, that if you can afford it, that we don't send it to you, that it gets stuck in the customs and everything else, you have to chase it. And if you have a continuous Internet, this thing has to be continuously connected to Internet. And then we test the first 100 for a month or two to

see its capabilities, any problems and then we start delivering on a continuous basis till we reach our 10,000 Units. And please when you receive the second part, just plug it in. Don't try to pick at it, what it is. As I said, you lose what you came in for. These are very sensitive. They are built on a specific structure and has to stay that way. All you need to do is supply it with the power. And automatically connects to the Wi-Fi and the people will set it up in the background. We have set things up to be able to deliver this as Man didn't come from the sky, Man doesn't fly all the time. Man is grounded and 99.999% of us are always on the ground. Some of you live on the lower ground levels. Amsterdam, around that area, you're 10 meter, 20 meters, in some of the places you are below ground, and some of you are on top of the mountains and the hills.

(1:28) So you cover each other very well. And so, once you receive this, please understand that it's not yours, it belongs to humanity, it belongs to the rest of us, to change us and the others to that dimension direction. This system transmit in their own way emotion of peace, that's why we put it out. In their connection to our systems, we connect one of the systems to the system which continuously radiates the what we call, you call it the frequency of peace, but in the way that we work with the STM. So please be vigilant and be aware of receiving these things. If you live in any part of the Third World, you can have a continuous Internet, and continuous facilities to have access to Internet, let us know and we try to provide you with it. And at the same time we will in the next few weeks open in what we call, the supporting side for those who want to have a yearly premium to one of the international organizations for a continuous Wi-Fi connection that it never disconnects,

(1:30) because through these you will understand we'll put a session most probably two sessions for you to learn how to

use the system for its tokens and how to play the game of enlightenment. And in that process for you to gradually learn how to use these systems. That is more or less what is set up for and we take it from there. The session tomorrow, for those of you who are participant, will be very interesting one. And I hope you will enjoy the session tomorrow. We're going to hammer you with joy and pleasure. And I hope you can tell us. We will take you into dimensions beyond your imagination. And in a way we're testing before the rest that we receive the packages of being tested on. If you need any help during the session, please let us know and please be aware that in what dimensions, and what position you as Knowledge Seekers in this tomorrow in the session of the October, would like to be, and how to participate in it. We still, we ask you please, we need more donations to put more of these ONN Units across this planet and we are doing our best to cover, spread and be able to complete this job.

(1:32) And I hope you all succeed in being able to use it, enjoy it, and then sometime in the next year or so, I'll connect you those of you who are the 'Man of peace' to the Universal systems to these systems to carry the message of peace through you, through your Soul to the rest of humanity. It is a very complicated job, but we need to spread at least a few thousand of these before we can do this. In a way, what I envisage, that in a very near future, through the connections of Knowledge Seekers around the world, those of you who live near ocean, to be able to drop these Units in the oceans of this planet, providing you (have) a sealed waterproof system, which can transmit, receive and spread this, what we call, the Knowledge of Creation into it. And let's see how far we can go and how we can develop this thing. And in tomorrow's session partially we'll test this and I'll explain to you tomorrow when you're in the session with us. If there are

any questions we try to answer and hopefully we'll see how far we can go with this.

(1:34) R: Mr. Keshe has sent some images of the Halloween products and would it be appropriate to share them now or? K- Oh, you received them? Yes, do it. I think some of them are gorgeous. This is the range and there's a limited amounts left. We shipping everything out this week, maybe today, tomorrow. I think it's going to be shipped out. You all receive, if you are in Europe, your Halloween packages. And those if you are in a far distance places, you have to pay for it, so it will go. Just open the pictures we can see. << Rick show the images of the Halloween products. >> K- It tells you how to play the Halloween games does it? These don't forget they're all saturated with Gans's. These are those products that you can put around the house to get the fields, or in the room, or on the table. They're not just ornament, they are a functional working system. They carry the Gans's of peace, equality and everything else. R: Mr. Keshe, the particles we see in these, is that part of the Gans's, or is that something else? K- Some of it, yes. Some of it, yes. R: Maybe even some gold? K-

(1:36) Every single item here is carrying a message of plasma technology in peace and everything else. These, the bats are like a Coasters, they're like small trays. You can put your cups in it and it charges up. You have a coaster of it, puts it on top. Don't look at it as black actually. Look at the different ways. I think the sphere... There's a game, there are games where you actually can hold the items in your hand. And these are all part of the positive energy of the Gans's which we have added to the system. There's something with this, you don't just receive the items like this. There's a full table of things which goes with this package. The table mats, the table coaster, the table, even those, I think the packaging you see in the back, you receive everything that you can set the table up, it's not just the item. It's a full Halloween table set up. I

think this one glows at dark, one of these glows at dark, it's a pumpkin which I've seen it glows at dark. Everyone is different, different features. Yeah there's a tic-tac-toe, the tic-tac-toes, the plates are Gans's. If you receive the X and zeros or the O's, those are Gans's saturated.

(1:38) The rest is the ornaments. This, what you call it, the Halloween mystery package is a literally when you open up you can set a table of it is fun, but this carries a lot of things which we wanted to pass. And it's a lot of fun to have it to play with it. Do you have any more pictures? R: I do have plenty more but they're much more of the same but if you want to see more of them we can definitely do that... K- Do you have any of the cubes, the big cubes, they're the nice ones, I saw them. R: Yes, I do, just a second here. K- It is the same kind of theme for Christmas, for Christmas package. But they'll be very limited, these are very limited range. If you have an order, you can still place an order and then I think they should be fulfilled. If we don't receive too many orders, we still can support with it. This is a nice one. The sand, even the container, this glass see-through, what we call resin, is filled with different Gans's. The resin itself is transparent one, is saturated with different Gans's. R:

(1:40) So what we see at the bottom is not liquid as such, it won't slosh around? K- No, no, no, it's a solid sand. No, it's a solid sand. But it's made up with Gans's. Okay, I think we've seen enough. But if you go on the website, if any of you wants to place an order, if there is anything, they'll be sent forward. You'll receive it. But it'll be out by Monday latest, and you'll see it by the end of the week. A lot of it will go out today or tomorrow, I think. ?? I think you see a lot of Halloween Soaps and that kind of thing goes as well, which I just saw a package there, in one of the pictures. All the Soaps which is made for Halloween with a pumpkin smell and all sorts of things which goes with it. It's been on this, I told you this is a, this is a full

venture Halloween home joy. Okay... I think they might have connected it to the, what you call, the website. Just we go in there and you just play it as it is. R: ...

(1:42) Okay. So you mentioned the Store? K- Yeah, it's just on the Store. It's a packaging Halloween. I think it should be there, whatever they can see. R: Under the Cosmic Halloween? K- Yeah, I think so. R: Okay there's three different variations that folks can get a 250 Euro, 500 Euro or 1000 Euro, the bat, the cat and the pumpkin. (Talking about products) ... Q: ...

(1:44) I've run into trouble with paying for the test tomorrow and I realized that there have been some change in the account number of the Keshe Foundation Store. K- You just go to the account, it's the same place, it's the same account, has been for years. Q: Then it's a problem on my side perhaps. K- Yes, send a message to info@keshe.foundation. Q: I already done that. K- When did you do that? Q: Recently, just five minutes ago I have sent it. K- Okay, wait for it, they'll answer you back. Q: ... I'd like to ask you about these frequencies of peace related with these Units and what can we do in Romania for example to benefit from what you provided with these Units? How can I help? K- I don't know. (1:46) These systems when they are delivered they carry more or less, they should carry all the teachings, all the websites of the Keshe Foundation, the what we call enhancement (enlightenment) game, and they are connected to the Keshe Coin structure. And step by step we follow it and then we'll explain to you as they come, what you can do, what it can be done and how different people can participate in it. Q: Okay and I have other question regarding Linz. Do you have in Linz your... because I was not present for a few time, sorry. And I'd like to know if Dean and you, you are still there in Linz or you are... K- No, no, no. We have closed the Exhibition Center for nearly two years, year and a half, two

years. Q: Yes, I knew something like this. We don't have any ?? place now? K- We will announce a new place for Keshe Foundation structure very soon, in next few months, needs to be done, needs to complete. That it's part of the research and the exhibition together hopefully. We'll see what comes up.

(1:48) We're still paying heavily to store all the exhibition materials till we reopen a new exhibition center. But no. Q: Thank you very much. I was asking you because my nephew just choose Linz because of you to go there and study classical music master program and I didn't know. Yes, he took it. So there by, I don't know, God, God did this. I think so. K- Linz has a couple of, what you call, musical institutes and universities. Of course, as you know, Austria is famous for his musical universities and institutes. Q: Yes, he got first there, first place. And I am very proud of him. I hope he will help humanity for peace development. Thank you very much. ... K- Thank you very much. Q: ... What will happen on October 29th? There are rumors that the 3I - Atlas will do something. I would like to know if this is possible. Have a good day. R: I think that was one of the milestones, wasn't it?

(1:50) Is it the closest to Earth at that time or the closest to the Sun? K- How many planetary systems are in the Solar System? Rick? R: .. Well I think it depends on if you include poor little Pluto which they kicked out of the planet system... And brought it back in. I think it's nine. Some talk about a planet ten as well. K- Yeah, they're trying to get something in. If you notice the... go back to teaching of to 609, 10 or whatever. I explained that this system split itself to 9, 3 and then 9. And strange enough, each of these are creating their own batches. They are small. We have seen some of them in a way. And strange enough is a cluster disappears every time when some of these go near, and come near a planetary system. This is very interesting the way this thing is taking

shape, and there is a lot of debate on what's going to happen. (1:52) But you got to understand if from 29 million kilometers away it could create as they say dust, hurricanes on Mars, how far he has to stay from Earth not to interfere with the rest of us. R: The October 29th I'm seeing, that's the closest point to the Sun that 3I Atlas will be, will reach. K- He's supposed to rendezvous with us somewhere in November, December, isn't it? Back end of November, December. R: Yes, we'll be able to see it again once it comes out of the other side of the Sun around then. K- Yeah, but how many 'chicks' will it carry? He's busy mating on the other side, isn't he? We've seen the flashes of love coming out. All the sparkles. Yeah, we have to see what it makes and how this, how this mating keeps going. Don't forget it's hidden from us but other planets are having good fun watching what they are doing there. The beauty of it is, 100% sure if we could have been there is that we'll see, most probably what you saw as a light. And we'll see, or something like this is in progress in the background on the other side to the part that's not, we are not invited. Looking at it from the top angle of the, what you call, the Solar System. Most probably we are somewhere here.

(1:54) .. This is the Earth, we are here, the Sun is somewhere here. These systems (spaceships), don't forget this 29, they say it's going to be the closest Sun, this is approximate. That's why they think they'll do their slingshot. At the moment what is most probably taking shape is huge magnetic fields flow between these three. The interaction is when they ?? hit was where we saw the peaking of. The original peaking came through the R2. It's massive and that created the splash. The reason for the splash is very simple. Why you see this, what we see, these winds or whatever. The fields are magnetical and they hit, suppress the surface of the Sun, and it becomes like throwing a stone in the pond, and the splashes we saw is that. So if we stand outside, if you look at it, there is a

structure that these three are creating. This will go its way, this will go its way, and then we meet up somewhere here.

(1:56) This encounter, if, if, this system does not split itself, will bring a massive energy that encounter with us, if, I cannot go on if, because there's a lot of factors involved, we will lose half of our satellites. The present communication we built up will (be) gone. Unless it's system we see a tail back on it. If we see the system has a tail again towards the Sun, this is protecting us. In a way as it's going through its trajectory, if it's going out, it has a huge fields, it actually breaks it off towards the Sun to protect the Earth. If they haven't made any mistakes up to now, one thing we know, we lost number two in control. So we know that there's a channel of the communication with what is outside in the Space. But most probably the civilization of relying on the communication system for a time will be disturbed. No satellites will work. The reason is it takes time to go and the satellites rotate one by one coming in front of it. The magnetic field effect of it, the magnetical field will be huge but we have to see how they control it. And if it's not controlled we go back to the time of the Stone Age.

(1:58) In a way, we have to rebuild all the communication systems. Most probably only the cables work. We will lose most of our energy systems, power stations, nuclear power stations. And that's the absolute horrendous if that happens. If the system comes close enough that what we've seen the performance of the magnetic fields in the past, within the past few months, how it's created the shield to approach the Sun. Then it can create a magnetic field to protect the Earth. But if anything goes wrong, we literally go back to the donkey's age. Literally in seconds we go back to the Iron Age. Or the Stone Age more or less. Because none of the systems we have will work. But I don't see it. System is very caring, what it does. They must have a very good

captain. And we see what happens by January or what you call, December. There's a focal point December the 6th, where it's possible we might see something on that day. And that's the type of target on December 6th on (St.) Nicholas Day. We might see something in that day if it happens.

(2:00) But if systems are not controlled from what we've seen from the other interactions, the way this system targeted the only unit we have outside in the space so rapidly and it's taken over it. It took us 50 years to get it there and it gets there in seconds. It works in the combination system. You know we'll see what happens. I explained a little bit of this in the meeting with the Brazilian and the Chinese community last Sunday. And a lot of things will change. We have to see if they produce. If the fields created and held as the other plasmatic fields, we all walk away with it because we are born in it as a Gans bodies. If at any point anything happens that the energy of the plasma converts into the matter state, or one of our stupid leaders makes a mistake to try something, which we think there is one is about to do something like this, we'll see it. You got to realize Musk tried to use one of his systems trying to go and explore, and it was wiped out before it takes off. And the policy apparently with these people is don't mess around with us. We do what we like. We don't. We are not there to harm you. (We are) observers. And we have to see more how maybe somebody thinks a bit too clever, does something stupid.

(2:02) So this is how this light has happened, this is how it is and watch what happens in the next few days and few weeks. Or would we still see another side of the game when it comes out. Would it be much brighter? He has topped up. This is what they do, they go as close as possible to the energy source, they download the specific field strength into the load, which is what you call, is an energetic system. And they load up and they store. And they have refueled till the next time

they approach they arrive. It's a 'tanking job' that's why they go so close. If you looked at what we saw as pictures which was moved to us by the different organizations. This system where there was the Sun and it was approaching, it created a completely confirming a plasma system. This confirmed it beyond shadow of a doubt, but again our scientists have no clue, which is normal with them. It created a shield. It was half shield, and we see it in some of the images we see. So, actually what it does is continuously protecting itself with shields. And when you look at some of the detailed features coming out, it has a multiple shielding in different strength. And that's why it can get close to the Sun. And it keeps the back end away from the Sun all the time. The shield moves. And the shield has a specific field strength, but has a filter for a specific fields to top up.

(2:04) It's in a way it has a parameters which is collecting certain amount of plasmatic magnetic fields tanking into its inner core, but it's shielded from the others. This we'll see and it depends how much is tapped in. Don't forget the last time when he was, before reaches to Mars, when he loaded, we saw it, it split itself. Now it's had a good time. Would we see a school of them coming out? And what is interesting, keep an eye on your neighbors, keep an eye on the people you think you know. And see if suddenly after December they're not here for any reason, they go traveling, they leave. These are the ones who returning back to the ship, they've had their time here and some of them are 3,000 years old, they just move on, change their frock. Just something to watch. Any other question? Q: ... Over the past few days, a friend and I have noticed a strong energetic background activity that has had a powerful effect on our psyche.

(2:06) Yesterday evening, this activity reached a peak, after which we both suddenly experienced a sense of relief at the same time, independently of each other. We have observed

such phases repeatedly, but this time it was particularly intense. We do not know what triggers these processes. Our question is, could this be related to the tests or activities of the Keshe Foundation, or to the presence of 3I - Atlas and 2R - SWAN, which might amplify such processes. R: And then Kirsten goes on a couple of questions below. Thank you for your answer. You answered already. Amazing time now. So, you've already answered that question apparently. Q: ... Mr. Keshe last couple of days there was a global Internet outage. Reports said it was not from hacking. Would this be from the 3I effects on Earth? K- Yes. We are monitoring this. It started... A lot of banking systems have been touched on the East Coast and in what they call, in the United States. Yes. That's why I even refer to. We're going to be touched and the only... the only more or less secure place is the cable lines, but they still are vulnerable at the point of emergence, at the point of the switchboards and the servers.

(2:08) This started since two days ago, three days... well two days ago, so now. Since the Atlas and we saw this flash in the, what you call it, by the Sun. Monitoring this very closely, yes it is. It came at the same time. There are no coincidences. You know we help a lot of people with things, say "Oh, it just happened from now." There is no coincidences. It happened at exactly the time. The fields are of the same strength. If they convert in your system, you got it, you get it. Just hope that the surge is there, that we can accept it. The new system we are developing will never face this such a thing. It's developed in a way that one transfers into the other and shares. But yes, you're 100% correct. We're going to get more of it till January. Q: ... Great Professor Keshe, I have three questions and a business proposal. Not long ago you sent a message to the Universal Community. Is the interaction of interstellar objects with Earth related to your message? If so, did you activate them from your hometown? Or was it an SOS for those

passing closer to us on their excursions? K- None of it. Q: ... What will happen if we don't abandon this habit of killing in the Space race?

(2:10) Will autonomous robots with Souls and therefore plasma intelligence be more valued than humans, their creators, in the Universe since they will survive solely on energy? K- Well, we can dream that way. It's possible. There is something which they don't tell you. At the moment with the knowledge we start building the robots, they're all mechanical, then you understand dust and time plays the game. But you can make it with this robot. Man repairs itself. We heal ourselves. Robots can't. It's impossible to get to. You can build systems that they can monitor, correct themselves and the rest of it but... Unless they build a factory that they keep on replacing themselves that's only pitfall with them, but mankind have always got the advantage. You got to realize these systems are not tested in deserts, they are not tested in the oceans, they are not tested in islands with salt. There's a, there's a new ones, they do everything else, they clean your house, they do everything else, they add AI to it and does everything sweet, but at the end of it, we made them and they're vulnerable to age and destruction of their own selves.

(2:12) Next question. Q: ... What will the ceremony be like to give thanks, make proposals and receive guidance from the Creator when science, religion and politics come together? K- Good imagination. I think the celebration will be when the Man becomes peaceful. At the moment we... You know what they say people, when they got nothing, they turn on themselves inside. And one of the nations which promoted war for peace is turning back on itself inside. And we have to see how they demolish themselves in one way or another to get there. It's very interesting. The American structure, Western Europe and the structure of the war system relies on the system and materials which as we all know 80-90% comes from China,

and China is refusing to sell anything to anyone who uses these things for arms. They did exactly what they did with them. We don't sell you any Chips, you have no advanced computers because you can be more ahead of us, it's okay. Now we are economically and scientifically good enough, we are not giving you the material to make you to fight us. If President Xi stays alive and they don't get rid of him somewhere,

(2:14) and the CPC carries on with his ethos, we are heading for world peace. Because one guy has understood, if I don't supply you, you can't have it, and if you don't have it you can't make war. And if China withholds rare Earth material to go to any company who makes the tools of war, we are in for peace. Whatever ammunition you got in the house, aircrafts, missiles and the rest, hold on to it because you cannot make any more of it. But the beauty of it is, even the bullet you use won't be there because the material is not there. I hope President Xi sticks to his and controls the raw material into where it goes. And they want a full explanation, they've asked for it. They want an explanation for exactly what he used material for. If it's used for arms of America or Europe, you're not supplied. Let's see how far it lasts, how much pressure they can take. But if G6 is gone, we are in for a world peace, because nobody will have material to make arms. But again, it's Man, there's other ways to do it. Any other question?

(2:16) R: Okay, Paulo's proposal was, at least partial proposal, because it cut off here. There are thousands of hectares of steep mountains that I would like to begin managing to reforest and create an ecological park as a sanctuary for endangered wildlife, in addition to being able to produce food using a bio-agro-forestry system. I would... and then it cuts off and he reached

the limit of words in the chat apparently. K- They've got to realize what is involved in ethical works. I explained this

recently and I explained this for Knowledge Seekers to understand for the records. We set out to feed the humanity. We got two big problems. One is that technologically we are getting there. It takes time, maybe another year or two years. Secondly is that, if we use just the energy that you receive tasteless, odorless, whatever, your emotion will run with the essence of life. But if you are supposed to feed you with apples and tomatoes and God knows, we have to go back and recreate the structure that has no contamination. So, the first job of Keshe Foundation is to go bring the,

(2:18) what you call, products into a first of all creating a pure apple that has had no, or as let's say all the nitrogen all the bits which over years have gone into the structure of its roots are withdrawn or taken out. And then make a system which with that can produce energy fields that is pure that you can transmit. If I have let's say Aluminum in a structure of a food which is not supposed to be there, when I transmit this energy the Aluminum transmits too. If you have antibiotics given to an animal, when we transfer it, it gets transferred back to and then you get all the side effects in the body, because everybody else ?? gets it. Purity of food, essential, fundamental basis, needs to be redone and Keshe Foundation has committed itself to that job. Creating the first seeds which have no contamination. And we have set out, the structure has been set out to achieve this. Pure seeds which from it we can produce materials, vegetation, or whatever, which have no contamination and is accessible to all Men through the technology. There's a very big problem with me, I cannot sit and do nothing as usual as all of you know.

(2:20) So in the near future in a couple of years, remember 613 (KSW) and then one day say, he knew something. But the problem is most of the food we have over the age of over the time of past hundred years has been fully contaminated. We have to do two or three things at the same time. It's not

just cleaning the food, we have to clean the air, we have to clean the ground, we have to purify the water. And we have started the process. And you will see, I see somebody who is very devious in the background, sits and listens to the teaching and tries to play with the Markray Corporation shares. We are on you and soon you'll have a knock on the door. And that knock will cost you a lot of time for interfering with the stock market. You thought you're clever, but we get you. You're marked. For that reason, I explained to many of you that in the very near future, we set up this cooperation through Markray Corporation International to promote the production of materials which are pure. And then for purification of the air and the water, and then the food. This is why we got involved with Markray and once the, what you call, interference with the shares of the Markray finishes in the next few days by this clever gentleman, then we move on. We are delayed till this is sorted by the authorities in the United States.

(2:22) And then we move to the direction, dimension we have to do. Because we can't allow drug addicts to be in playground of the Keshe Foundation. And then you'll see the programs which we had laid out for all three next two or three years. The rain rains on us is contaminated, the air we breathe is contaminated, the waters we drink are contaminated, the food we eat are contaminated. And there is a process that... we needed pure, clean, now we can change it and we have started this with the food, the basic fundamental of the foods. We don't need tons of it, we just need to create a batch of it, and that batch gives us the base to use the communication system which you are supporting us to be built. We still need another four or five million dollars for these Units to be complete, at least in the lower phase, to go through and then sustaining it, holding it, and then sharing the necessity of Man. And we'll see what happens next to it.

But the structure is to clear the pure seeds. That if it has a lead in it, we transfer it as the energy, you receive that lead in it, and then God knows the mayhem. So we have started the process, maybe next year, two years, we will achieve it. And everything needs to be cleaned up, that you go back to it, and then you transfer it to energy that the Man doesn't need to contaminate, to kill on the rest of it, for the systems we have.

(2:24) If you can donate or put a few millions to purchase these systems, we'll go with it. We need the help. And as I said, in November, those who've been instrumental to defraud the Keshe Foundation, from our core assets which was allocated for this Foundation are in court. God knows if we can get anything back but whatever comes will go back towards this process. What was supposed to be done will be done in a different way. Any other question? Q: ... First of all, says thank you very much for everything you have done for humanity. May I ask when the plasma generator will be available for sale? K- Working on it. Actually, very much in a different way. We... the problem with us is we keep on moving into the next step, next step and now the whole principle is that when you use, when you receive this second part, the second part we're trying to bring the generation of the energy that the Unit does not need even to be connected to the landline or what you call, to the power supply to feed itself. That's where we are working at the moment with it, and then this translates into plasma generators. The movement, the speed of the understanding of the technology by the Knowledge Seekers in our team is getting so rapid that soon we'll do this.

(2:26) We set up a test to be done. And something happened. October of last year we set out to bring this change. And something interfered with our work, early this year, where we tried to go through the plasma generator we had a very bad incident. We were lucky that nobody was killed. It had nothing

to do with that side, but it had two part of the system which we lost, and we had to set back and restructure. This won't happen to the plasma system. These are the systems, auxiliary systems, which are to provide this material, went into problem. And we go for testing it again this year, with a different way. And hopefully, with the new technologies, we'll be confining it to a very small unit, with no other bits. As I said, the Knowledge Seekers, you don't hear what the Foundation does in the background. We are evolving a lot of things in a very deep way. And this incident, delayed a lot of work of the Keshe Foundation. But in a way, it happened. We are lucky that we didn't lose any life or any injury, when there were a number of people in there. And this is part of our work.

(2:28) And it will not stop. And plasma generators, what we call Cosmic Ray generators, come as part of the whole process of tapping, take what you need. And we'll explain it. It's just maybe six months, maybe less, maybe more. Any other question? Q: ... First of all, thank you for all your dedication to us Knowledge Seekers and to all of humanity. My question is this, since the teaching of the 598th Knowledge Seekers Workshop, have the Cosmic Rays changed each time? Or are new ones added to the existing ones? I see a set of multi-colored luminous threads that increase with each teaching. So, at each workshop, in addition to the new Cosmic Rays, we also receive those from previous workshops. Thank you for your attention Mr. Keshe. K- Can you explain? R: I think you're supposed to explain that one. Well this person is saying that they're seeing these teachings as multi-colored luminous threads of Cosmic Rays and when you get these Cosmic Rays do you get all the existing ones plus the one that you generate in the current workshop,

(2:30) or do they come as a package? K- We produce, we continuously produce Cosmic Ray materials for different

purposes, but different Cosmic Rays with different conditions. And now it's depends what you see. But you got to remember the physicality of the Man only contains, I explained before, I think I explained that in teaching in last couple of weeks or so, the physicality of the Man contains all the elements which are on this planet. The STM contains every element in the Universe, which the physicality is not even one fraction of it. And you see different field strength according to your, what we call, intellect, according to your level of field strength of. What is, what is visible to some is not to the others, but this complete spectrum is open to the others. And we forever endeavor to create or to connect the Cosmic Rays of different strength. The white or transparent white is the ultimate. Not gold.

(2:32) The goldish color we see, they show us on the Sun in the pictures, it's because Man loves gold. But it's always the white color. It's the color of the Sun. And that's the color of the plasma. It's the additives which changes the color. It's like when you put a small dots in the diamond change the diamond color, but the rest is carbon. Any other question? Q: ... Could you describe how gravity is formed from the interaction of fields? K- Where is your video Rick? It's exactly how it's done. R: I'll dredge that up once again here. Let's see. K- That video sums up everything you need to know ?? about plasma if you understand it. It's done by Man, it's understandable, but more or less what you need to know how it's done and how it's created. But there is a bit missing in this video, because again it's made in one direction. R: See that, give me a second while I attempt to rearrange my situation, there we go. This would be the video in question.

(2:34) (Shows video of 2 fields coming together in space). R: So, at this point, let me just stop it briefly, you have the interaction of fields, so that is part of the question of Ike, which is, "Could you describe how gravity is formed from the

interaction of fields?" And we do see how these fields become plasma, with its own Gravitational Magnetic field that, that external Magnetic fields, as it says here. Does that automatically generate the Gravitational fields? Just because it's... you can't have just the Magnetical? Or what was it that you were pointing out that's not correct with the images that we see Mr. Keshe? K- ... I'm just trying to find a way... trying to find a way to... Knowledge is to understand the difference between the gravity and the magnetic fields. (And I have a problem with charging my system, that's why I keep on having a problem trying to see how we can charge up).

(2:36) It's a stone you throw up in the air and it comes back on you. That's all it is. The way we change the Kinetic to potential difference energy in the matter state, state, the same thing happens in the energy matter state fields. We go from one to another and then if we get it right we can go back. And this is what happens, you change the magnetic to gravitational, there is a, there's a conservation of energy rule, there's a conservation of magnetic field rule, and at the end it's always balanced. Some parts are locally controlled, some parts are centrally controlled, some parts are controlled by what I call, the Mass Center. And otherwise it's exactly the same. What you do is in gravitational, you gain in magnetical, but at the same time, one or the other can be added to. And it's the same as what we do in the Kinetic and Potential difference. If you understand in the world of the physics of Kinetic and Potential, you understand how voltage changes to current.

(2:38) And if you understood how voltage changes to current, then you understand the work of the gravity and magnetical, they're all the same thing, but we are totally confused, lost in the mayhem, in the maze of too many what you call, too many "cooks spoils the broth." Too many scientists have tried explain too many things of the same thing and now we're all

don't know where we are. If our scientists, if you as Knowledge Seekers understand, there's no difference between gravity and magnetical than current and the voltage, and Kinetic energy and the Potential energy, then you're in business. Till you're in this process locked, everything doesn't make sense. There is a video pictures published in past few hours by one of the Space Agencies and the pictures we see of this object, it's Book number two in addition with Book number one and Book number three all in it, but I like to go with Book number two at the moment. It is a spherical cylindrical plasma. They are showing things on it we don't know, it has to be clarified. We've got to wait and see what we observe when this thing appears near us. The funniest thing is we can see the hills, the mountains, the valleys, the oceans of the planetary system in the Solar System,

(2:40) but we cannot see an object's surface so precise from here which is much closer than them. And from, if you understand gravitational magnetical this entity has a hexagonal skin which means it's life. One of the signals of a system with a Soul system with the structure when it's repeated means intelligence, means life. 3I has hexagonal body, skin, like you and me, but in different sizes and positions and everything else. Protects itself with the skin it's made. It's learned how to convert its energy to matter state, but at the same time hold on to it at a high speed of traveling into Space does not flip off. This is what a lot of our scientists have a problem to explain. And what does he do? Continuously converts the magnetic field to gravitational field. This system has thousands and thousands of miniature plasma reactors which creates this condition. You know these little mini Chips in our pocket? They are miniature reactors and they all produce energy at a given point in a certain way. Go and read the second patent. If you understand it not in the matter state as an energy state you fully understand how

magnetical works, how gravitational works, and how if you play with it you have such an entity in the Space traveling with the speed of the light.

(2:42) This is the... in the Magnetical and Gravitational. With Magnetical going away, Gravitational coming to me. And then, how this... Are you under a cliff, watching a waterfall, the water comes to you and then runs away? Are you in a sitting holding a plug in your hand with a wire? Or are you going, are you just getting pulled back to a planet without anything any string attached, you call it gravity? It's all the same. You have to understand. You are the system. And the environment goes around your system, not anybody else's. Any other question? Shall we call it a day? It's nearly 12 o'clock. One last one more question and we go. Q: ... I have a question for Mr. Keshe, I'm sure he's been asked to discuss this many times, but maybe I missed it. He's explained to us how Souls are created, but in Eastern philosophy, they believe in what, that when people die, they are reincarnated.

(2:44) And some even have memories of past lives and so on. Can you explain this dilemma? What's the truth of it? Is reincarnation real? If it is, what percentage of Souls get reincarnated? If not, what's really going on? K- ... It is RNA, and the rest is all talk. R: RNA's is that what you said sir? K- Yeah, I said. If you understand RNA and DNA regarding the Man, carrying memories and then they say I'm reincarnated, yeah. But you have to understand the Souls carry the information too. As much as we have memory in our RNA, there is a memory in the STM. But the STM carries the memory of the Universe. That's why you can, when you have a dream, you can say which part of your life is connected to it. And if it's connected to RNA, if it's connected to your Soul, or ?? is it a physical dream? And in a way it's part of the same. You have to analyze how. Do you understand the dream through the knowledge of the Soul, or do you

understand the dream through knowledge of the STP, or do you understand the dream as part of your DNA? Or are they? Once you understand this, then you know how the dream you had is connected to where.

(2:46) It's not that you just load up the memory in the physical side. You load up the memory in the Soul side. That's how the Soul remembers things, knows things. But your physical life, you remember your uncle, your mother, your grandfather, maybe a thousand people. With the Soul you're connected to the whole of the World of Creation. It's as simple as that. When you dream, analyze it. Why? Did I talk about the cat yesterday with somebody and tonight I dream of a cat? Do I dream of going somewhere which will affect me or it'll be somewhere and then it comes out that you're going to a trip to go to such a place? Why did I dream about it? That's to do with the STP. Then you have a dream which brings the essence of peace. Then that's the dream of the Soul. You have to understand yourself, then you understand what it is. You have to understand the position of physicality. What does it bring you physically? Why? We, with different ages, we dream different. According to what knowledge we have put in. When we are a child we dream different than when we are adults. Because we bring in the memories of the growth of adulthood. When we become older we do that. Then it becomes of the physicality.

(2:48) And then it goes on and we dream of another stage through our DNA and RNA. Another type of dreams that we couldn't dream when we were younger. And this is how it's structured. Any other question? Q: ... I thank you for all this free knowledge and solutions for humanity before it's too late. I hope it's not, there is still a chance for humanity for peace. So there is a message from which, from the Universal Councils, Universal Councils Support invites every Knowledge Seeker, every peace-loving person, to join the Souls at 9 p.m.

CET, to connect the Souls together and wish for the peace for humanity and eventually, the technology of Keshe Foundation in exchange for peace to solve the humanity's problems. So, there are a lot of things happening and I'm very happy that you inform us. And I wish you all the best and also for those people who come tomorrow for your session. Thank you very much again. K- Thank you very much. I presume you're going to be there as usual.

(2:50) Q: I will be. << Knowledge Seeker raised the hand by mistake. >> K- ... Thank you very much. There is something which I'd like to explain to a lot of Knowledge Seekers. It's usually we go off this sides every now and then when it comes to... because it affects some of our friends, or Knowledge Seekers who are with us. Many of you have been around with us and you work with the Foundation, with the work of Foundation, especially on your physical side of the body and everything else and there's something which is important for you as Knowledge Seekers to understand. Some of you are young, some of you are middle-aged, some of you are older age. And we got used to living a life, in a way, what grandma used to make, mom made, I make, and then my children make. And this has become passing it on the line.

(2:52) But we see changes in some parts with some lives and we have to understand as with a human body that we live through three elements, the earth, the air we breathe, the food we eat and the water we take. And you have to understand that all these elements play part in how physically we live. And how our physical body is created. And again it goes back the way we have muscle tissues, or we have the three layers of the skin. They all have to be understood and once we find a balance in we can live a thousand years without pain. But we have to understand the structure of it. Just because you put a number on it, on age, does not mean you have to suffer, you're going to lose. We have to understand the process of

the life, how it came, how we are and how we go. When we are young we eat anything, meat, roots, vegetables and nuts and whatever it goes. But you have to understand what it does to you. What's the purpose of it? How it works? And if you understand this, you see life is the same. It looks that you have one muscle in for your arm, but in fact if you look at it, that muscle, you've got three, four layers inside of it, composition of to make that muscle and there's a purpose for it. And we see people with the pain, we see people with not being able to walk, with a backache, a headache, what you call it.

(2:54) And it's a fashion nowadays, you go to these gyms and do high speed, do run, do exercises and we, in the whole process, we have not learned to make a homogeneous system for ourselves. How we eat, what we drink, what we emotionally get ourselves involved in, how we look after our physics, how we look after our what we call, emotional and physical life. If you find a balance and know how to control it, you can live for years. And if any of them is disturbed, we get into problem. To be in that awareness, it means a lot of things needs to be done the correct way. And one of the essential part of it is the physical. If you can keep your physical body active, regenerating, but the right way, then it doesn't touch your emotion, then it doesn't touch the way you eat. We change things gradually, we change our habit of eating, we change our habit of emotion, we change our habit of... But when one of them goes wrong, we don't understand why, we run into all sorts of problems. And then when one goes the rest follows. You got to understand a simple language of life. When you are young you ate everything. No pain, nothing. The body regenerates. Muscle tissues are regenerated like flies. You damage a muscle tissue, two days later with a bit of exercise, a bit of the medicine you walk. This doesn't happen when you become 40, 50 and doesn't happen for sure when

you're 60, 70 and 80 and 90, because the body does not produce the material to support your bone structure, (2:56) because you're eating the wrong food, or you're consuming the wrong energy. Try to understand how you can keep your physical body active without these all this now become fashionable. Every shop you go in China is a food shop, every other shop in Europe you go is gym exercising. But the minute you stop the whole thing falls apart as long as you have the money to pay for it. ?? Gym , you go for a run, and you think you're good running. Your body has three layers of muscles in a muscle or on the bone. And the most important one is not the bone you run to keep it nice and sharp, it's the one which is underneath which does not need exercise. It needs understanding. And if you keep that correct you don't have a blood pressure, you won't sure be diabetic, and for sure you will live a very painless comfortable life. When you start looking at these things when you start looking why do I have all the pain I'm 50, 60 and then when you pass 70, 80 then you breaks down and you age rapidly because you don't, you haven't done the right thing. Try to look if you are in that way you're trying to keep to live a free, pain free life. Look in how with simple, simple movement. You can fix the smallest, small muscles underneath these big ones.

(2:58) Two things, first of all they can be active, secondly they can regenerate. If your muscle tissue doesn't regenerate, you are as good as crippled, cannot walk, get off the chair, you can't walk. Then you have to learn how to exercise those thin muscles. Then you have to see how you eat. 'Horses for courses.' When you're young, meat, fiber creates protein and the rest of it. The muscle tissues only created by protein. When you come to middle age, up to 50, 55, yes, you can still take some protein, whatever you do, but now you have to add more understanding of which protein, the way you choose fish, you need fish for this, you need chicken for that, you

need beef for that. Now in the age, upper age, you have to look at the foods which creates fiber generation through the thinner, faster, correct energy absorption by vegetables and grains. Because actually you can take as much egg and meat you like, you still become fragile, pain and rest with it. It creates more inflammation in your body. In the passage of time, even when you're young, body without you knowing, you eat the kebab and the steak and everything else and meat, you put on the top muscle. But those vegetables you eat, if you know the way of the vegetable, those are more important than the ones to make a big muscle because the foundation is not set properly.

(3:00) If you fix the foundation, the tiny muscles inside keeps the big muscles on the skin and it can work and it have to be regenerated. As much as you need to regenerate the small muscles at the old age, you need to give the big muscles at the younger age. Try to understand exactly what I'm... just go and do your own research, see what it fits you, and understand how to live a painless, free life that you don't need to get old, you don't need to fall, you don't need to break your hip and everything else which you could have prevented by understanding the process of the exercising the right muscles not letting them die, and eating the right food for the age. And the up body at the older age of 50 plus does not absorb that much protein, does not matter if you eat 10 eggs a day. Zero absorption, but you need to look for those who give you protein with fibers which regenerates the lower muscle tissues, that's where you need it at old age. This lower muscle issues, then they create a blood pressure, then they create a diabetic and everything else if they are not looked after. Then how you exercise. If you are anything over 50, 55, the only way you're going to walk straight, the only way you're going to walk without a pain, the only way you're going to walk without bending is one set of muscles in your hip, which connects

your legs or hip to the upper body. If that muscle is not looked after, which is a very tiny muscles but it looks big from outside, inside if they're not looked after you lose your mobility and it doesn't take much it takes 10 minutes,

(3:02) 5 minutes a day to just keep that muscle in active condition, then you live a life, painless life, because then because you're active, then a lot of things happens. To support these kind of fibers, underlying muscle fibers, that gives you no inflammation, you can live a life free pain, more or less, look at what protein materials you eat, for what purpose. And then you make your life. We try to introduce these as Gans's to you, in a very near future, we'll release these things as Gans's to you, that you can do, what we call, as energetic material for age. But what I'm trying to bring to you is to start thinking, the way the Foundation is working towards it, because when we start using the Communication Units (ONN), will feed you that way. That you don't think, "Oh it's a miracle I have got access to what we call, these things." No, because it's research, it's done and it's there. Till we get there, you have to look after yourself, to get rid of all these things which comes with it. The way you do, the way you look after your daily life. All events, when, how and the way we are. The way you walk, the way you stand up, you bend forward because this muscle in your hip is pulling, so everything is like a curtain, you know when you pull the curtain it just shivers up, you're shivering because more or less, one set of muscles on your hip on the back which holds you straight, gives strength to the leg, and it needs to be stretched and exercised, we don't do that, the older we get the more we sit, the more this muscle disappears. You go to toilet, you can't sit, you want to sit on the chair, you can't, it takes time to get up.

(3:04) And little exercises, little change in foods, can change your life. And I see a lot of Knowledge Seekers, especially

those of you in their 50s, 60s, 70s, around the Knowledge Seekers, with different pain and different things, and they say, "It's not, it cannot be." Because we have to learn the process of how our body was created, how it was put together, the way it was put together, and the way it runs. You can live to the day of death, a week before, 10 days before, and then you finish. That's the time, because a lot of things are not switching on anymore. But you don't need to suffer with pain. If you are over 50, 60, very little things, little vegetables, which actually create those muscles in the body, which if they get damaged, they retain the elasticity, the work of it. The same with exercise. Go on the Internet, learn what exercises, very subtle, you don't need to move from your bed or your chair, exercises these small muscles underneath which build the others on top of it. When the foundation is wrong, the top you get all the pains with the big muscles, can't walk, everything else. And then because you change your bending position, the digestive system, parameters, field strength changes, you cannot digest other foods, then you become more and more and more back into cycle of pain, suffering and the rest of it, which is not need to be done. Try to study, especially you are, even the young ones, how you look after the foundation of your bone structure, foundation of your small muscles. Those small muscles are 90% of your pains all your life, because nobody, chiropractors don't teach you this, because you don't go back, they don't make money.

(3:06) Doctors, they don't tell you because then you are... there's no need for clinic. Search for yourself and then understand this special muscle in your back which comes from your end of your spine to your hip is one of the most important. But doesn't need any exercising, can live a painless life and the rest of it. You walk tall, you walk straight. And then look at the foods which repairs muscle tissue, and then you change your emotion and you start a new cycle of

life. Very simple things can change a lot of things. Thank you very much, and I hope you find peace physically and emotionally and every other way. See you some of you tomorrow in the session and hopefully we see you some next week and hopefully by the end of the year we'll be all here that we can see what the new year brings for us with our Space friends. Thank you very much.
