Transcription

(:17) K- Thank you very much, good morning, good day to you as usual, wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. We welcome you back and, as promised, we start a new cycle of teaching. The reason for the new teaching, new information, or whatever connects to the past, is that mankind is getting ready for that emergence of the Universal Community. We have no choice.

(:18) The time is set and hopefully we need to know more, otherwise these people, as we see today, all our NASA scientists and Space scientists are baffled by how one of these objects or both of them are behaving, but understand the plasma technology (T), that's exactly how they should behave. So, if somebody comes out of any of these Spaceships and some say he's God, half of humanity will bend backwards and pray and kiss his foot. But, if you understand the technology, you understand, most of the human race is a step ahead of him, because, as I said before, they're still in the Spaceship, where we are teaching, we're developing, the transmutation of the Soul of the Man (STM). What is important, and I think we should have covered this at the very beginning of the teaching some 10-15 years ago, but mankind wasn't ready for it, is to understand what is God. What do we call Creator? And how does the Universe of us works within Him, by Him, and through operation of the, what we call, the rest of the ?? Unicose. One of the most important thing for us as Knowledge Seekers (KS) has to be, and comes to be, is to understand, what is this, what we call, Creator, is made of. It goes back to understanding of the

totality of the structure of the work. And how us as a human race, which is so materialistic,

(:20) can understand this and bring to us, for us, a dimension of what we call connection. What would it be and how would it be and how does it operate? I have to answer a call, if you can wait one second please, I come back. << Mr. Keshe answer a call. >> R: ... Our background image here today is from the products of the Keshe Foundation that are being offered as part of the Halloween package. And you can still order, but it'll be for next year at this point. Hello, Mr. Keshe are you back? K- I'm back yes, I am. That was an important call I had to accept, we've been waiting for it. Yeah, the Cosmic Ray Bundle is, what you call it, the Halloween. It's the last pack went out yesterday, as far as I know. And we're getting ready for the New Year pack, it'll be out by the 11th of December, the latest and whatever it is there, and what we need to do with it.

(:22) And what we need to, what we call, deliver according to what we have. << Mr. Keshe has problems with his Zoom connection. >> K- ... What is important for us is to understand what we are dealing with, and most probably, in the coming time, when we come to understand, when we see our, what we call, Space brethren, the people who are on their way towards, they might land here this year, they might land there next year, or 100 years from now, but we have put a beacon out. We're telling everybody what we are doing, and we have become so clever that our beacons are on satellites and the rest of it. So, we are making a lot of noise in the Space, where Man did not used to, it was just shouting and howling and maybe drumming. And a few kilometers we would have gone. Now we are drumming to the Universe. Our satellites, our Spaceships, we are intruding in every dimension and every possible way.

(:24) And we come to see. As I said, the biggest problem for mankind will be that anyone claims to be the God or the Prophet of Space, and human race falls for it. Because they can do magic's that they couldn't do, so they know more. What is important for us is to understand the truth about our own Creator, to analyze how it works, how it creates, how it manifests, and how this thing exists. If we look at it, we call this a plasma for example. This is what is as the entity of the Creator (he draws a circle on Whiteboard). At the point of conception, it's nothing but the energies. Magnetic (M) fields are created out of the energies, not energies out of Magnetic fields. So, if our Creator makes a ripple, in shape or another, these ripples will become interacting, will become pressurizing each other, and leads to creation of Magnetic fields. Mankind has not understood this, and that's why we are in problem in a lot of direction and dimension in Space Technology and others. Magnetic fields are created of the motion of the energies of the Universe. And not Magnetic field creating the energy of the Universe. Once we understand this, we see the Creator decides, let's say, to move a plasma muscle here, (:26) it leads to creation of a Magnetic field. It's a ripple effect. It's literally, as I explained once before, it's like being an ocean, calm, no movement, flat, flat water. And then suddenly, something ripples, something moves, and what do we see? We see waves establishing on the, what we call, the surface of the ocean. These waves are the Magnetic fields, and the liquid of the ocean is the plasma of the Creator. Once we understand this, then we come to understand more and more how these waves interact with each other, and interaction of the this one with the other one creates an Inertia. And this one with this one, creates life. And once we understand this, the whole dimension of magic goes out of it. It's a logical, it's a system, but the only difference is, we call it oceans to be big. The ocean of the plasma of the Creator is a Universe. So, if you understand this, we come to understand sometimes,

when one of these things by accident touches something, another field of the other one, it creates Inertia. So, when Inertia, depending on its strength or whatever, leads to the creation of stars, and then the same way with the Magnetic field of the rest. What we will see, which is now shocking the world of physics with the 3I,

(:28) and now R2 has entered the scene very heavily, is that we have not, our scientists have not understood how Inertia is created. What Inertia is, we just call it Inertia. We just call it the gravity. But Knowledge Seekers you understand exactly what it means, and exactly what it brings. Then, it comes to the position of the interaction of the fields of the environment anywhere in this galaxies of the creation of the Creator, and this leads to creation of life. The life which is connected to the life of the Universe and is not localized has two characteristics in it. One contains Hydrogen (H) or elements of the Hydrogen singularity, and dimension of the Carbon. The other two are local industries, attach themselves, and then you have other things like Calcium and others, attach themselves for this cell to operate. So, our Creator, the plasma of the Creation, has a sense of giving and a sense of pulling. Pull is only effective if it's heavier, which is the Carbon 14. Pull is ?? space?? , if it's thin enough to go with the other, which is Magnetical. And if we observe this, we see our Creator is just a huge gel of energy. And everything else is created by the interaction of the fields of it. And if you understand how to play, you can go through the center of stars. If you can play and create the right fields, you can sit on the surface of the Sun and don't get burned, and the rest of it.

(:30) And, this is where we have to understand. And this is where the Time comes into play, the fields comes into play, and the Soul comes into play, and the Essence of the Creation. So, in a way, you get a pot of jelly and put it on the table, and every now and then shake it, you see different

ripples, different things and everywhere, and you see lines, and collection of lines, and the rest of it, and it's exactly what happens to our Creator. He doesn't have bone, He doesn't have a skull, He does not possess eyes, but through the vibration of the fields of the energy, what we call, creation of Magnetic field, it gives access to the whole knowledge of what's going on. He's top, He sits on the top, then He knows what the Man is up to, as much as the others in the Universe. The most important thing for our scientists, and the Knowledge Seekers, and the people who come in, is to watch what the new contacts with the Universal Community tries to teach Man. That the Man will not get fooled to fall for what is a natural process. They have huge power over Magnetic fields, they can create huge shielding, which we know the technology, and we understand the technology, and our wish is that by the end of this year Man does not start another cycle of creation on Earth, as we've seen with the pyramids, where the knowledge was buried, the knowledge is there. (:32) And those of who were there became Passengers of Universe, because they were, in a way, lured to this beauty of what they have, they couldn't understand. Human race now understands most of this, and cannot be fooled by magic's and powers, and the rest of it. The biggest problem for our world of science and technology, and the governing bodies of this planet is, how to digest maybe this encounter with 3I or 2R, and the future Passengers of the Universe. If we show we are naive, we don't understand, we'll be more or less abused and treated like a, not only a third class citizen of the Space, as an ignorance, and does not matter what you're trying to teach about the dimension of the Soul, because you don't have something physical, you can now be trusted. Typical European attitude, "Show me I believe it, because when you show me, I can cheat you and take it from you and it becomes mine." And, "Show me to believe, is for me to believe, I don't need to show." So, as Knowledge

Seekers, now you understand where you came from. You are within a journey of Magnetic fields created by the interaction of the energies of their Creator. But, this system has always a basic fields, which is the Carbon, and is a Hydrogen, or single atom, fundamental atom, and a combination of it, because it's Carbon 14, the six sides to connect and the seventh side to emit, or anchor to. And once Man understands, the magicians of the Universe cannot do much. Because we understand, you have come with the technique, that's good. But, what about us?

(:34) The biggest problem mankind will face if we go through the encounter, which is now set up to be around the end of this year, we think, if they don't change their position and dimension and the fields, will bring a lot of disaster for Man, because now we become electronics, we become everything else, computerized, and the weakness in this is Magnetic fields. If you carry a credit card with a chip on it, they just put a bit on it, and they read your chip and they empty your account, but if you know how to have bags or purses, you just put it in there, they can't do anything. And we have to become that way. We have to understand that we cannot be cheated. And for sure our governance will do that. Starting from the Presidents and the rest, they'll be lured by the gold and everything else, which is meaningless to anything else, but they get their way done. This is what and where mankind has to become very clear. Understanding the truth about one's own creation. That we are part of the Magnetic field of the Universe we live in, which has come from the movement of the energy of the environment of the Creator. Now you understand why for years I tell you, "Energy is Magnetic fields in motion." That was taught for years, because of what we explained today. What we explained, how this sits, explains and you understand, how you can speed it up, how you can

reduce it, how you can use the energies of the Universe to the advantage of yourself,

(:36) without doing anything, by knowing when to tap, how to tap, and how to live. This is opposite and against all the teaching of scientific world of today, because we've been pushed to accept the nonsense of the matter energy, by the energy of the matter, and does not fit. So, as we start this cycle of teaching, we speak about the fields of the Creator. Energies of the Creator which leads to creation of the Magnetic field, which lead to creation of you, me, the mountains, the stars, the galaxies and the rest. Think on what I explained today, because this is the breaking point where you lot have to start moving. Not me, I have moved a long time ago. To understand the process of physicality (P), to understand the process of Energy, and to understand when one goes to the other and back, and understand the source of your creation is your Creator. So, you don't need to tap into the Sun, you can tap in the dimension of the plasma of the Soul of the Creator (STC). And all of you today in this session are receiving it. It's free. We have set up our systems that you absorb it. It's you that has to start changing and bringing peace to yourself and to your environment, and understanding how you can absorb energy. In today's session, we are sinking you with the energy of the Universe. Let's see what you come out with, and how you understand the process of the Creation. Understand one thing, your Creator does not have a bone and a skull.

(:38) He has Love, energy, which in transfer of the energy becomes the Magnetic fields, that by resisting and interacting becomes the body of the Man. You call it frequency. Once you understand this, we are half way through understanding that our friends of Space, if they turn up on the 19th, 20th of December, don't bring us any surprises, but you will see, mankind will be surprised, they are very advanced

technology, but not advance as the Knowledge Seekers who understand how to use the STM. They are here to learn that, and it's your job to teach it. We stop the teaching today and answer you some of the questions. Until next week, I'm extremely sick. I tried not to cancel, but to be here as a respect and honor for all of you. So, we try to answer a few questions and we curtail the teaching of today, and we come back together next week. << NO BREAK TODAY >> Q: ...

(:40) Good day to Mr. Keshe and all Seekers of Knowledge. During last Friday's training session in overtime, the 5th hour, a completely different feeling could be sensed. Could Mr. Keshe comment on this and the results? K- Well, the last session we brought in a special technology in, that we saw it appropriate. And we are not using it today. We'll assess it next week, maybe. And this gives you a direct to transmutation, many of you had different feeling in the last hour, and hopefully our team will be able to put it together for next week. And, it's primarily, it's for you to connect to Universal fields. When you want the energy of an apple, you don't look on the Earth for it, you take it from the depth of the Space which is surplused there, does not need to destroy an apple or a lamb or whatever. And this part of our work now, and should be completed in next few days and weeks. And we try it today, you're on that system, but in different way, you're all receiving, we are not taking anything from you, and we have not applied what we did the last time, because we have to be ready for it to be done. It brings you directly in connection with the Soul of the Creator, if you can understand it that way.

(:42) Q: ... Thank you for the breakthrough teachings to humanity. In the early hours of Thursday morning, around 4 a.m., I woke up and walked to the living room and laid down on my back on the sofa, put on my headphones, and began to listen to the teaching. I soon noticed the presence of intense fields emanating from the system, creating a very specific

energetic condition around me. It seemed to be the beginning of the process of the transmutation of the Soul. I felt a powerful energy running through my entire body, concentrating mainly in the upper part, especially in my head. This energy became stronger and stronger until a very real sensation of levitation arose. At that moment, I understood that I was in a state of separation from physicality, and I thought, "This is the state of the Soul; I need to learn to maintain control when I am in the dimension of the Soul." Then I pushed myself hard, with the desire to free myself from the physical body. On the second attempt, I succeeded. I found myself standing, still in the living room, fully conscious. I walked to the bedroom and saw my wife and daughter lying down, sleeping peacefully. I felt peace and said to myself, "Everything is fine here." With a light heart, I declared, "Now I want to go to our visitors at 31 Atlas." Instantly, I began to rise into the sky, able to see the stars clearly. However, before I could reach my desired destination, I felt a sudden force that pulled my Soul back into my physical body, ending the process of transmutation.

(:44) Question: I believe we are beginning to understand and experience Soul transmutation, but we are still unable to fully control the process when we are in the Soul dimension. Often, we do not go where we want to go, but are taken where the Soul itself wants to go. How can we develop conscious control and direction during the Soul dimension experience so that we can choose our destinations in a balanced and correct way? K- The more you do, the more you learn. It's just a practice. The more you test, the more you learn, the more you know where you make adjustments. There is never a mistake, but don't forget the Soul has its own connection dimension, it's not that you, where you want to go. You are the 'piggyback' rider, not the rider itself. And this is one of the most important part for you to learn. Try to learn step by step,

how to fly, how to see, how to connect, how to communicate. And understand that, what you say, once you come across the face of these people, entities, living things, you have to understand the logic of them, and not the logic you want to convey. Then you'll succeed. Fear is your biggest problem. Q: ... When I am in the Soul dimension, I often say, "Now is the time to transmute physicality." However, I am unable to perform the physical transmutation.

(:46) Could you enlighten us further on how to create the right conditions and emotions so that we can consciously and naturally bring physicality into the transmutation process? K- The secret is, was just in the early part of the session. Understand Gravity. It's the Gravity and the Inertia which is holding. You have to create a field strength that is balanced with Gravity, and at peace with itself and the Inertia. The obstacle is not one fold, it's three fold, One is Inertia, one is your Gravity, and one is the destination field strength. R: The person had already commented that this energy became stronger and stronger, until a very real sensation of levitation arose. So, that seems to be to... K- Many people are... Yeah, many people are trying, many people are succeeding. You just need to practice, just practice. You need to, there is no other choice. Now we have one more question and we call it a day, I cannot stay with the session. Q: ... If the 3I Atlas came to sow new life, and if it has come before, then were we created by it, or by another similar Spaceship? K- No, it's a combination of which part of us, part of us, bunch of us, a lot from this planet are visitors, I always say, bunch of us got affected by the presence of it, created new intellect. And, there on goes. We should understand, that they are not the masters, but they know a little bit more on the matter side, (:48) not the Soul side, and you see it from their performance. Every indication is a very materialistic structure, physical,

and knows how to play with the fields. That's all it is. We have to wait and see what happens in December. Shall we call it a day, and we meet next week. Sorry about this, I'm extremely sick. It's impossible to hold on, with a lot of headache and other pains. R: Yes, thank you very much for making it this far. K- Thank you very much, we'll see you next time. R: ...

(:50) Speaking of the Universal Council, I've got an announcement that I need to read... "We, the Universal Council, invite you to freely unite your Souls every 3 hours, unifying them to illuminate the Souls of all leaders, and find the path to permanent peace, avoiding the suffering of physicality on this planet."
