617th Knowledge Seekers Workshop November 20, 2025 (Transcription, Editing and Proofing done by KF Brazil) (Auto transcription by Elias) ENGLISH TRANSCRIPTION

Part 1

(:17) K- Thank you very much, good morning, good day to you as usual, wherever and whenever you listen to these series of Knowledge Seekers from Keshe Foundation Spaceship Institute. As usual, we welcome you back. And we try to explore the World of Creation, through the science of the Space. How the Cosmos works, and how us as humans, for thousands of years, and centuries, thinking that the Earth is the center of the Universe (U), and we have found ourselves more or less at the 'end of the road.'

(:18) What's interesting for us as Knowledge Seekers (KS), is to understand the behavior of Magnetic (M) field. Is to understand the connection of Magnetic field. To understand how Magnetic fields travel from one point in the Universe, and Unicos to another. What cause them to move? What creates a condition for them to travel? As we said, the Universe is a plasma. And depending on how one pushes one corner of it, creates a wave, that that wave become manifestation of physicality (P) of it. Now think very simply. If the Soul of the Man (STM) is the plasma, and the creation of the emotion of the field, which is a collection of the fields of the plasmas, which has made it, to become that single central field. What pressures these, what impression these single cells exert on the plasma of the Soul, that in creating that wave to manifest the physicality of it, leads to the physicality manifestation of the physicality of the Man. In a way, we said the ocean, you put a pressure on it, atmospheric or whatever, and that pressure manifests itself on the shore, in respect to the resistance, Magnetic field of the solid state of the shore, a wave, Magnetic field, manifestation of physicality out of the plasma of the ocean. Then if that understood, we then understand how our physicality is created.

(:20) By the impression of the field of the Soul of the mother, by impression of the field of the Soul of the cells, which has come in from the father as an egg and a sperm, and division and collection, they press on this newly formed plasma, which in a way on pushing its limit, it changes from the, what we call, the cell, collection of the cells, to dimension (D) of physicality of the Man, the shape, the color of the eye, and the rest of it. In a way, we are an impression of the fields of the created, which is our mother, which is closest to us, in the Soul of the, what we call, presence of the father, in the dimension of the sperm, which was created still waving, still pushing, in the structure of the Totality, that in the interaction with the fixed dimensions of the planet Earth leads to two hands, two arms, the eyes and the rest of it. So, the dimension of the expansion of the fields on the Soul, leads to manifestation of the physicality of the Man. The way the wave was made on the ocean. Then, we understand one thing, that the field strength of the creation of the cells, in a way, in division and in addition, shows, manifest, the impression of the intention of the emotion in creating that physicality. So, when it comes to the point, is the wave of the collective Soul of the Physicality (STP), on the STM, which releases the fields of the Soul with the interaction of the womb of the mother,

(:22) which the mother's Soul is part of this impression, dictates our shape. So, as the mother has two legs and two arms and whatever, we replicate that impression and the pressure. Isn't this the reason why in so many cases, now the scientists say, "This and this is similar to that, and the mother and the child are the same." Or is it actually the pressure on the Soul, which leads to the creation of that? And then, as everything else, Man finds a way to translate this emotion into dimension of the DNA and the rest of it, that he can understand, justify his knowledge. Till very recently we never had a knowledge of what the DNA was, and what RNA is, and the rest of it. But, if this structure we have accepted to be correct, then there has to be, because we are part of the bigger structure, a DNA of the Universe, a RNA of Universe, and where we fit is part of the cell of this structure, which is our galaxy, which is our Universe, which is our Solar System

(SS) and our planet, are created out of the intention, and the fields exerted on the, what we call, the plasma of the Soul of the Creator (STC). Then one point arises, that if this wave in this ocean leads to manifestation of physicality of the, what we call, the structure of the field strength of the wave which manifests it, then life has to be not exclusivity of this planet.

(:24) As the exertion of the fields of the, what we call, the totality of the cells of the Universe, with interaction with a field strength of what we call resistance of the planetary, galaxy and the rest of it leads to creation of life. It's the essence of the creation of life. This is why I made Man and every other creature in the Universe as an image of Me. Once we understand this, the only difference comes between the race of the Man and the race of the other creatures, which are created through the same span and expansion of the fields and interaction and the resistance with the what we call entities, which are previously created, or the fields which are on the motion, confirms that life is not exclusivity of this planet, as the waves have been created through the expression, impression and interaction of the collection of the fields which are within this plasma of the Universe. So, life for sure, once we understand this, cannot be, is impossibility to be exclusivity of this planet. And by the same order of magnitude, is not exclusivity of this Universe, that in every Universe in the Unicos there is life. There is existence, it's the confirmation of the field, interaction of the Totality on its environment, which confirms and confirms the Creation, the confirmation of the existence and what we call life.

(:26) But once we understand this, we have to understand what is the common denominator in confirmation of life in the Universe and Unicos. And if we find that common denominator we all can transmute from one strength to another, from one Universe to another, we transmute from one star to another and the whole Universe is transformed. But we have to find that common line, that line which comes from the field strength of the, what we call, the 'Master Plasma,' what we call, the 'Creator of the Creators.' We

believed in God, which is the Creator of our life, our Universe, but our God, our Universe, has, is part of collection of Universes. Then we have to justify, we have to find a new definition, the Creator of the kidney God, the Creator of our Universe, and the Creator of the body which contains that kidney, or the Totality of the plasma, which is the Creator of the Unicos. So, if you are a cell as part of a kidney, then who owns that kidney? Which animal, which structure, which life, that kidney belongs to? And then, we have to find that common denominator, that connects all the cells of the kidney, the liver and the everything else together, which connects us to the other creations of the Creator, and the bigger Creator, for every single one of us. So, now we have to find a third dimension,

(:28) that not only connects us to this Universe, but we find a connection that is connecting us to the Unicos, then we can travel this span of Universe. Then, we don't need these obsolete flying systems, which now even to us, this, the guy called 3I, looks so advanced, if it was, it could (?? would) not have taken the dimension of physicality, it just knows how to play with the field of the Universe and Unicos. Then, Man does not need, as we see in this 'little chap,' we are amazed by it, that what it does, if it is a flying object from another position in the Universe with a little bit more intelligence, why has this guy taken him three months, four months, just to go around the Sun in such a small solar system as Earth? Whatever happens in next few months, in the next few weeks, that we come across, or happen that we come across. It happen that we have to interface with the creatures, if they are with the life, if they are with 3I and 2R, they're not that much clever than us. Just because you have learned and you've been in a society when there is a car and you are used to a donkey, does not make you another race. Still the same human, educated a little bit more, has gone to the city and has learned to drive a car (and) doesn't need a donkey. Where Man and the knowledge of present time is on the donkey. And these guys are the citizens of the same country, the same Universe as us, but they are driving a car. And I'm sure there is more advanced knowledge. There is more

understanding races which have created that Magnetic field, that wave,

(:30) that when they look at the 3I, they say is a donkey. Where Man to them is so advanced. Then you understand what field pressure you have to exert on the plasma of the Universe, on the plasma of the Unicos, to create that shallow wave, a wave of let's say 10 feet tall, or a wave of 100 feet tall, with the strength of Soul, that it's just a shh.. on the shore, or it's a splash on the shore, or it become a tsunami that it washes the whole of the shore. This knowledge is still in the dimension of physicality. Mankind has to find out, you've been trained as a Knowledge Seekers, if you understand it, to travel with the speed of the pressure which created that wave. Then if you do that, you can travel the span of the Universe and the Unicos instantaneously. In a way, you have to find out what emotion has led to creation of that wave, and the strength of the wave, the height of the wave, and manifestation of the speed of. Once mankind understand this, once you as person, as a human understand this, and you do it every day in your life, then you can transmute. As I said last time, it's like when you are enjoying a cat and then something happens and you push the cat, emotion changes from joy to regret, to push. What emotion and what is the change of motion? Is that little shh.. of the wave?

(:32) Is that that splash of the wave or is that the tsunami of the wave? Which emotion creates what? If you understand this, if you can replicate this through the Soul, then we understand the existence of the Soul, the connection and correction of the Soul. How Soul is confirmed, and how with emotion we can create that wave, stroke, happiness, joy and tear. We know how to create the shh.., and the strong wave, and the tsunami. Be it in a joyful way, be it in a sad way. We cry to laugh from joy and we cry to show our sorrow, with the same face, with the same eye. It's the emotion which puts the pressure on the Soul, which brings the dimension of physicality of the reaction and manifestation. Then, what understands the whole existence, it depends on how the

emotion is created, and what time, the manifestation of its existence, and confirmation of its existence. I made Man in the image of Myself. If once we understand this, the biggest question for Man is, "What is the emotion of God?" That leads to creation of that wave, which leads to manifestation of physicality of the Man, as the STM is part of the structure of His fields. The Soul of the mother, the pressure of the Soul of the mother, the pressure of the cells, is that 20%.

(:34) As you take energy 80% from the environment and the Universe, so the fields of the Creator. It's the emotion, it's field strength of its waves, it's the other percent, 80% of you, manifestation, in the dimension of physicality and the STM. When we always said, you take 80% of the field of life from the Universe, so that field of life has already had an impression on the STM, it's not just feeds the physicality, but in fact, ?? it's with the plasma of the STM. And that needs manifest itself in the dimension of the physicality of the Man, in the womb of the mother, or in the society, or the environment where it's manifested. If and when you understand this, this goes back to what we explained much, much earlier, and in the past teachings. When you transmute from Earth, where there is air, 1G, water, and everything else, and you go on the Mars, the lung is no good, there is no air to breathe, there is no water to drink, there is no food that you can feed yourself. Then the life is zero. But by the order of the preservation of the Soul, you transform yourself into dimension as the existence that can live on the surface of the Moon, inside the Moon, in its atmosphere, upper atmosphere, as a dimension of life, which can repeat itself, can enjoy, can enjoy, and at the same time, can create a wave to, for, and because of, to confirm its existence. Then, it goes back to the teaching for past few weeks,

(:36) that emotion is the key to dimension and structure of the manifestation. What emotion did your mother go through? That its pressure on his (her) Soul, has led to the creation of you. Where it's just 20% of it, the other 80% comes from the Universe. And then, which part of this 80% is the reflection of

the fields of the STC? I made Man in the image of Myself, as I create the fields, energy in motion. It's the energy which is the Mass of the Man in the dimension of manifestation. Once we understand this process, once we comprehend the depth of the knowledge in respect to this process, then mankind is ready for transmutation. Does not need university education, does not need no religion, does not need no factor, but the realization and maturity of the Man according to his understanding for him to find out his position, his structure, his face and the others. And then once you understand this, the way we always spoke about the Beautiful People that they show different faces according to which energy manifests itself in them, a woman, a man, an animal, kind and horrible, all comes to one point. What pressure the emotion puts on the Soul, that leads to creation of manifestation of physicality and impression of the life at that point with that Soul. Even the change of behavior. I made Man in the image of Myself, because the image I create is a reflection of the emotion of the fields of my Soul.

(:38) Then, you have to decide what field strength wave you create, that impression of the emotion has led to its creation. Which means what emotion you need to create within the dimension of the STP on the Soul, in the given dimension and position leads to creation or manifestation of its physicality. The interaction of the STP with the STM leads to creation of emotion. So it's very easy to understand. If you have the emotion which you have created through the STP and the STM, how you will look, how you will survive, what will be your condition on the surface of Mars and if you carry with the same thing on Moon, it could be something else. This, as I said, the teaching of now is said to be to bring Man to understand the position, dimension of the life in the Universe. Why we teach this way, in such a compressed way, in the past few weeks, is to make Man ready, if and when, and possibly not with 3I, with another cycle, as we're becoming more cleverer, that they cannot 'pull wool on (over) our eyes,' to see them, to understand them, and they are not what we call on their own. Taking us for a fool, as it's been known for

thousands of years. When they promised in 2025, it'll be this and that,

(:40) did this set out by the passengers of the same 3I, let's say, 3,000 years ago? As when I come round, the bus comes round, in 3,000 years of human, it'll be this and that. and becomes a Promised Day. They've taken the Man for a fool. Because Man is a fool. Because Man never understood the process of Creation. Now would we, would our leaders, if comes to the point of 3I, 4I, 10I, land with us with the confirmation of life from Space, would they become our God? Would we become the Bedouins of the South America waiting for a blond Man with the blue eyes to manifest itself (Aztec). They gave the gold, mankind will give his Soul. This is what is the maturity of time, that no one can take, no one for fool, does not matter where, which dimension and position in the Universe. If and when Knowledge Seekers understand this point, then the Knowledge Seekers have matured to transmute, to transfer, to be able to be at any position, not only in their house, in their life, in this planet, on this Universe and the rest. Understanding the Knowledge of Creation is the gift to those who have the pleasure, purity of heart, that have managed to unravel the secret. This cannot be taught, cannot be given. I cannot give my Soul to your Soul for your Soul to be enlightened, but I can show you how I was enlightened.

(:42) I have to go on this call Rick, please take over. << Mr. Keshe answers a call, and in this period Rick shows a video with an advanced teaching on understanding Nano coating, Portuguese Friday teaching, Aug 20 , 2021

(:43 to :50). Rick explain how he used AI to make the background image of today's KSW. (1:00). >> K- ... Thank you very much. As we were... Sorry about the delay. These are some official calls. I have to accept and we are expecting this. We were given a notification of it by the... we are talking to the officials and I had to accept it. The structure we go back to is more or less to understand that... What we call, is in Macro is in Micro. What the field pressures, or field

impressions on the STM, creates the physicality of the Man. Then, the point is, as our Creator, again, is a plasma, it's a combination, it's a collection, accumulation of the fields, which have no entity, we call them plasma, till creation of the pressure, which in it, releases a wave, which leads to manifestation of, creation of that physicality of the wave, as we see. In respect to the resistance of the environment, which creates its boundary. Once we understand this, and once we understood how the impression of the field of the Soul of the mother, the impression of the field of the Soul of the father as a sperm, (1:02) and the collective expansion and division leads to the physical manifestation of the Man, then what shape, what is the face of our Universe? And in totality, how do we look? We always looked at the structure of the inside our Universe. Hundreds of billions of stars, galaxies, blah, blah, blah, blah. Isn't it the story we say, the body of the Man has trillions of cells in it, and how many trillions makes the body of the Man? Then, how many trillions waves have been created, that it has led to the creation of the stars, the planet, the galaxies and the rest? The reason I brought this subject of the teaching this way, is if Man understands how energy, information, emotion, travels, transfers, transmutes from one cell of his brain to another, which creates a reaction of physicality of the Man, anger, joy, running or whatever, then to the same measure Man can find, considering his Soul as to be that cell in the structure of the bigger cell transmutes through that channel to anywhere in the Universe and the Unicos, depending on what field strength Man chooses his emotion into that point. That tuning, that field strength, that pulse, that frequency, whatever you call it, leads to, comes to, ends up with manifestation of the physicality. (1:04) Then those of you who are looking for, trying to strive to transmute, understand it's a two-way traffic, joy and sadness, laughter and cry, anger and calmness, two or two, Gravitational Magnetical, depending on the field strength, if the Gravity is more, becomes anger, when the Magnetical is higher, becomes laughter. Then you understand how with emotion you create transmutation. The way you move from happiness to sadness, from laughter to cry, one reflection of the emotion, one confirmation of the physicality, then you can see how, if

you understand the game the emotion plays, will lead, is the cause, is the way, is the key to transmutation. Then, it comes, what pressure you exert on the Soul, what pressure you create, you exert, on the STP, which creates that condition of the cry, laughter, run, joy, and everything else. You have learned the transmutation between the cells, but when it comes to transmute the whole of the Soul, Man runs into trouble, because he has not understood, he has not comprehended, it's the same process, as I say, it's the same thing, but Man has chosen many words for the same thing, and he's confused himself in what is what, and what it comes. (1:06) Then it comes to the point where mankind does not need systems to transmute. Man needs understanding of the emotion to be able to transmute in any dimension as an Energy, as a wave, as a field, as a Mass. If we go into the extension of understanding the speed of the rotation of field strength between the cells of the body of the Man which leads to certain emotion, if we replicate that and we understand what it is, can we understand what is the feeling of our Creator, which is created, is part of our creation in this Universe, in respect to what we call the Unicos. In a way, we say our Universe is dynamic in the environment, but it's in an environment, is it running away towards its Creator, or is running towards? What emotion carries, is the reason why we see such a clashes and the hemorrhage of the galaxies with each other, is the impression of the direction of the emotion which the physicality of the Universe has been exerted to, or it is exerting on, for in the environment of the Unicos? As I said, we are here for the last time to teach, but Man has to understand. So, you have to learn, not only how you transmute in this physical place, going from London to New York, but how you go from Earth to Moon, (1:08) then from this galaxy to another, you have to learn how to transmute through the emotion of the Universe, to the Unicos, and understanding that, how you connect yourself through the emotion, to the dimension and direction of the Creator, which is the greater structure of the life. It's no use doing it in bits, as what we teach, is taught by... to all. Mankind and the rest of the Creation has to understand, how these horses (?? for courses) come about. And in the coming of teachings,

gradually we open this door. Because it's no use, otherwise becomes a fairy tale, as you understand more and more. We open the path, not only to Universal, what we call, transmutation, but into Unicos transmutation. Which means, you have to learn. And then when you learn the higher, the lower, which is the transmutation of the physicality of the Man, becomes child's play, because you see the higher order. You understand the higher order, you see the replication in the higher, so it's not that hard. Because we try to teach you in a level of the transmutation of the STM, and we see most of you have a problem. So, in a way, a decision was made, we show you the further up the ladder, that through the example, through comparison, you'll learn how to work in the lower ladder. And this will go for and in the animosity of the Totality of the Man's Soul, within the structure of itself, with his STP. And once you understand this, and you can comprehend, you are doing, what is the chain of events for the future Soul, then is the truth. (1:10) In a way, if we can open a dimension of understanding in a larger scale, as your Soul finished with the physicality and find its position in the Universe, this STM, which has led to the creation of the new cycle, itself is part of the STC, is part of the plasma of the existence of the Creator of this Universe. And then, in that structure of Totality, how does the Soul interact with other Universes, and in fact, how does it make the essence of the physicality of the Creator of the Creators? In a way, once you learn to walk, you can jump, you can dance, you can hike. And, the process is, to show you how you dance, maybe you'll learn how to walk. Which is the same, you just add something to it, you take that extra energy of the jumping from one leg to another, or moving the legs faster, just you see how the leg runs. It's the same story as I said last week, you get the beginning and the last equation, you know where you want to be, find a way, explain your way down the ladder, and then reverse it. And then you all come to understand, as it's been in all the teaching. The only way, the only way, which Man will create a new Time, which is a new life, new existence, new transmutation, Time of what we call beginning, is through understanding the field strength of the emotion, that leads to creation, beginning of the new starting point, Time. (1:12) When the 'bell has rang'

for the time when the two STM and the STP have to say, separation from the physicality, a new Time has started, new Time of journey. And as plasmatic Magnetic fields do not take time, is instantaneous, your Soul, in his position, in anywhere in this Universe, and according to what it's been enlightened to, anywhere in Unicos, is immediate. If your Soul can do, how can not do it with your understanding of the emotion? What is the field strength of the emotion of the Soul, which gives it the dimension and the position in Unicos, and in the Universe? Man needs to understand that emotion. And then, transmutation from A to B is the child's play. Is the essence of the emotion. In today's teaching, we have set our system to create that pressure on your Soul. Let's see what waves you make. In today's structure we are not interacting with anything else, but the central energy of your structure, both in the dimension of the connection of the common Universal line and in the Universal line in the dimension of the physicality. How do you feel? How the session today has been? You have the Yin and Yang, you have the lower and higher strength, as it gives to one, takes another one, how the session has been with you? Those of you who are sitting on the other side of the panelist, what we call participants, you can see the system is running. (1:14) We are teaching, we are exerting, we are making it available to you, that how you decide to create that enlightenment, how you want to take that Soul, where you want to take that Soul. Decision is yours. We create the environment, we create the atmosphere, we create the dimension for you to decide. We have brought you both the dimension of the universal field strength, we brought you in the dimension of the field strength of the Creator directly in one place, in a way your Soul is that plasma of the Creation and we have brought the exertion of the field forces, and the dimension of the field interaction to release, to confirm, to be able to go to any Place, Position and dimension. It's you who have to create that emotion. In a way, you're sitting in the 'seat of transmutation' for past hour or so, but how many of you, consciously or unconsciously, have made a move, you've been somewhere, and is it coincidental, or is it have we managed to bring you to the point of transmutation by dimension of enlightenment. You feel the emotion or intention,

and you carry on to deliver that. We are like the captains who delivered your Soul to the position, now you are in charge. Can we give you every tool? If the Knowledge Seekers, if you understand the gift we have given as a knowledge and as the field energies to support you to get to that, you will be enlightened to understand the process of the Creation. (1:16) And once you're enlightened, it's not just walking, you'll jump, you'll dance, and enjoy the presence of the Creator's Magnetic field. As the interaction of the Soul of you, becomes that ?? beach, and the field strength of the plasma of the Creator, becomes that motion, that the field strength of your emotion in interaction, creates the manifestation of confirmation of existence. My Soul interacts with Soul, that in that interaction lead to manifestation of your physicality. I made Man in image of Myself, because it comes from the field strength of My Soul. We go for a break, come back, and I hope, slowly, slowly, I'm opening that gap, for you to be enlightened, and for you to be able to take that step, walking away from the fear, and making that to a joy, to be able to, and maybe, if is possible, leads to the understanding, manifestation of the Creation of the dimension of the Universe. Rick take us for a break and we come back.

(:18:40). (trouble starting video). (No Video Mr. Keshe explained the Christmas products).

>> BREAK >> 617 KSW November 20, 2025 ...

Part 2

(1:21). K- ... (1:21:25) While you're trying to bring it up, anyone who like to place an order for the Christmas package, 1st of December, which is next Sunday, not this Sunday, is a final day for orders that everything can be taken out and be delivered. As we received a large number of orders it has to be stopped as we will not be able to produce to meet the orders. And these carry different Gans's.

(1:22) In the coming weeks as we promoted the Sugar Cup, and other Cups, we will introduce an interesting concept, as been tested in other part of the world, for certain pleasures and certain behaviors and certain ways, as what we call Accessories. Like, we release what is known as like a beads, where (what) the monks were, but with a specific target kind of purpose. As usual, it will be connected to. And these are done on the back of the other tests, successful tests, in different part of the world, and the way we work. And so, you will see what we call, very much like, the Pen, Pain Pen. You'll have like a monk's beads for Sweetness and for what we call, Pressure. In the coming weeks, the Pain Pen, which has been tradition of blue Pain Pen, will change to a transparent Pen. And it'll be very colorful, and it brings a new dimension, maybe more powerful than the Pens we released. So, this solves a problem for, like certain nations do not allow liquid, which is a containment of their Pens, to be transported across.

(1:24) Now we bring it into a solid state, with much more effect, deeper effect, and this takes around the process of a lot of transferring liquids, for its given purposes. Very much, is the process of the technology, in daily useful things, very much like plates and trays, and you have seen the first of these, in Christmas packages, where Christmas trays had been released, and any other things. But which carry, which we started with, what we call, the table mats. This sector will be increased drastically and many of you who are resellers, or want to be resellers, we'll let you to promote this very extensively. And these are all part of the Christmas package, the same has been done. It was done with the Halloween and before with different articles. Now we bring it into application of, like as we see the chess. The chessboard is not a normal chessboard, is extremely heavily pointed, that a game of war, which this chessboard has been, to make a Man of peace with those who actually want to play the game, but the essence of how will live real when you play this board game. As being a battlefield and trying to win, would it become different way, and you find different emotion in it, as you hold each key. This is a structure which we'll follow and then we

will see step by steps. Hiding the Peace, hiding the balance, emotion and other things, (2:26) through what we call the games and the rest of it. Changing the thoughts. Would you still have the same emotion when you play this game, which is made for the Gans of Peace? To ?? fight this, would you touch this chessboard? And what will be the pleasure of? I'm standing here, if you want, we play together, we don't kill. This is part of the same structure, in what is to come as a game, on the, what we call, consoles, which, they'll call the Units, that you can play to earn what we call, Coins, Keshe Coins (KC) as a reward for playing to create peace, with this chessboard bring that game, that kind of emotion back. And this is how we bring a new dimension into the work of the Keshe Foundation, and this is how it'll be. I have one announcement to make. If you have organizations, companies, which are involved in production, in sale, or you produce some products, that technically acceptable to us, as the, what we call, 'Keshe Gans products'. We have started acquiring and making partners with the Keshe Foundation organization in two points around the world, and you can contact us, that it brings a new expansion, and if your research, if what you do adds to our work, we bring you in to be part of the work of the cooperation in two locations around the world. In a way, we bring you in as a researcher and developer of the technology, which you want to develop, or you have developed.

(1:28) You have to be as well established in this game, that ... we just don't bring you in, or you don't join us into our structure, just for the fun of it, as we had (with) other Knowledge Seekers. We want those who had the time, that have qualified, and need our biggest support, to be part of the biggest structure, to put their work to become International game. Not those who copy and just make Gans's, and... or sell little Gans tools. If you have achieved something with your structure, with your research, with your development, and you're looking for that breakthrough, Keshe Foundation is prepared to bring you and facilitate that step for you, as part of the structure of the Keshe Foundation. You've done research in God knows whatever, and not just produce,

replicate, making the answers. There's a big difference. And we know a number of Knowledge Seekers have done that, and they're looking for finance for somebody to help them, to big, to structured. We offer you that opportunity. Contact us. We'll have a look. We see. And if we see you have strived, you have come up with a new idea, a new solution, new school of thought, using partial our technology with the other matter state technologies which creates a new position, new what we call structure to expand the knowledge and technology, we are prepared to back you and bring you into the structure. Maybe as part of the Markray Corporation of the United States and maybe in another dimension in another country where we bring you in to become part of. You stay independent, you stay on your own, but we support you, we give you the ground and at the same time we share the process with you and in a way we allow you to make a structure, if you want that you be part of the bigger structure to for development and research.

(1:30) So if you've done some work, can show it does work, can show it is there, but you want to find a finance, the finance it could be anything from agriculture to health to wellness to energy whatever. This revival, we are now in that process of, we gave you the knowledge free, you worked on it, now you can bring the knowledge back to benefit by it. We have already come to remember you, we brought the Knowledge Seekers in this place, in this dimension, and now it's internationally open to you. You become part of the Markray Corporation of the United States. If we see your work is, if you are in other countries, we see you fit, we invite you to do the research with us. And we create here, we create you the bigger expansion of the fields for collaborating with other Knowledge Seekers in the same fields, and working in the same research and development. We go ahead, what's next?

R: Okay, very good, thank you Mr. Keshe. I did find that video, but you've pretty much covered it. Especially the part about the chess set, you had some interesting comments about that, and you reiterated them here today. So, that was quite interesting. I was going to mention that on the news yesterday, in the Canadian news, they showed people playing

what's called Ultimate Frisbee, and the teams were made up of Palestinians and Israelis, and they're both playing together this game of Frisbee. And they do that regularly, whether they're under air raid sirens, or other distractions that are going on,

(1:32) and different political sides, back and forth and so on, and everybody sort of arguing back and forth, but they're having a friendly game between them. And I thought that was interesting use of gaming to bring people together, and essentially that's what you have in mind with this chess board. What if we got all the world leaders to just have a big chess match. But they had to use the Gans pieces, that could be interesting. K- .. it brings what I call, emotional conflicts. I'm supposed to kill to win, but I'm supposed to create the peace. How can I find a way to come to peace with the guy without killing him? It's very contradiction in essence, but that's how it works, how it should be. Most of the, what you call, as far as I know, these products you see, are already part of the stuff which is getting delivered for the Christmas, what we call, packages. And, as I said, the packages is the last time, we, what you call, the last date for it is the 1st of December, if you want a Christmas, what we call, products. I sent you something very interesting Rick, and this has happened in the past few hours. I have just signed a large number of these, as we've done with other side, but this is sold, it'll be popping out on the, what we call, a Chinese Keshe Foundation website,

(1:34) or you can go, wait for it till the, what we call, our webmasters put it up, sometime maybe today, tomorrow. The Chinese Books of the Keshe Foundation, the three Books, have been completed and has been marketed as of today. There is in a language, simple Chinese language, or in the, what we call, the traditional language, and it is, now I send it to you, it's in the hardback, and in the, what we call the, soft back in the Chinese language. It's the first time it's done, it's done by the ?? I've been told, publication in China, and you can order the set as it is. And it is very nice, it's just been released today, for the Chinese, for those of you who like to have a Chinese version of the Book. It's sold as a set of three. And, hopefully our webmasters will put it on the English side,

which goes directly, delivered by the Chinese side of the Keshe Foundation operation... This is a lot of work by the Chinese community, they collectively have done a lot of work to get this done, all corrected. And it's the first time you see the official Keshe Foundation.

(1:36) It's mostly, it's a hardback, with a very hard, what you call it, cover. I've just signed a batch of these today to go out. And if you are Chinese or you like to keep the Chinese version of, it's now available for now. Any question? R: Congratulations on that, that's... a lot of Chinese people have been waiting for a while on that, I bet. K- Yes, we have the same thing awaiting for the English or the German and the French and the rest will be done. Gradually we're getting there but these things takes a lot of time to be done. It's been worked on by the new head of the Keshe Foundation (?? in China). He's done a lot of work with the team behind him, to deliver this completed. And it's absolutely beautiful to see it in such a... such a hardback and very professionally done. Any other question? Q: ... Dear Mr. Mehran Tavakoli Keshe, on behalf of all those who have been touched and inspired by your... your work, I want to express our deepest and most sincere gratitude for your relentless efforts. ... Q: ...

(1:38) Good morning Mr. Keshe. Thank you for another teaching. I sincerely hope that you are feeling better. Question to Mr. Keshe, is the Earth system navigating this plasma ocean, and when the Earth system rises or falls on these waves, does it bring changes to Earth? K- Can you repeat that please? Q: Is the Earth system navigating this plasma ocean? And when the Earth system rises and falls on these waves, does it bring changes to Earth? K- Yes, it does. It's like the wave which creates emotion. Part of our emotion, part of our, what we call, collective behavior as human, which might change in one day or another, is not just by ourselves. The way the summer, the winter, the position changes our mood, we are part of the Universal fields.

(1:40) The way we take 80% of our energy from our environment, which is our Universe, that 80% affects our Soul, interacts with our Soul, creates our collective emotion. Is

it why suddenly humans stop everything else, or is it because of the pressures, Magnetic fields from the center of the galaxy, which make us to become more aggressive, and start killing each other, we see the peak of the wars? Nobody has studied, because we never understood, why suddenly collectively as a race we become aggressive and suddenly after a few decades we become so blessed. As the food we eat physically affects our emotion and our behavior, so does the field we receive from our Universe. Need to study, we need to understand, now we've become wise to it, We have in the future studied the pressure of the waves of the Universe, Cosmic Rays on us, on our behavior. We just call it, "Oh, a sun flare and da-da-da-da, da-da-da-da." We watch what happen to our atmosphere in the sun flare. But, what it's actually does to the mood of the Man? It's not just our Earth which receives these fields, our Soul receives it, our physicality receives it. And we just become very selective, because we don't understand it, and we don't like to be very stupid. But, if you think of it, the talk is a massive sun flare, damages the satellites. If it damages the satellites, what does it do with our Soul? How our behavior changes in these sun flares? We have no studies on it, because we never consider it touches us.

(1:42) And then, as we have the sun flares, what about the galaxial of flares? What about the Universal of flares? At what strength in which part of our Soul they affect us? Sun flare takes a few days to go through, a few hours, a few minutes. The Universal flares or galaxial flares takes us centuries and how our century behaves, changes. We have never studied because we never thought, we have, we are so short-sighted, we are like a blind walking the darkness of the Universe. There is actually, there is a lot of light, it just needs for us to understand. And the limitation of our understanding is actually our ignorance of the knowledge. It has brought us that limitation. If we one second, one second, one day all the budgets of all the nations put together for defense of war, one day put for making peace, efforts to expand the knowledge of the Man for conquering the unknown in our Universe, will, what will it bring us? It will change us, The amount of effort

and money and science we have put in killing each other, used to create peace. And then understand, just spend part of this financing and knowledge and effort, in understanding what does actually Cosmic Ray (CR) does to us, emotionally. It makes me laugh, I've said this many times before, we consider effect of the sun flares on our satellites, our communication,

(1:44) But, what happens to our internal communication? It's not just that, it's the different waves which sits at the layer of the motion. And the past few days talking about seeing different lights in different part of the planet. What does these fields which creates these colors, what does it affect you? How does make the nations which are attracted by it, they come to you, you don't need to see it, because it's there. It affects their emotion. They have no knowledge. Long term, short term. Would it come to the point that when we dig up the skulls of the Man from 3,000 years ago, 10,000 years ago, 10 years ago, and now we become knowledge to it, that we can carbon ?? date it from where it is... Cosmic Ray date it, to see how Man changed, what field was there that day that it brought these things to Man. Through our ignorance we become selective, and our selectiveness is how to cover our ignorance, and just stick to what we want to show. Hopefully the first batch of the Communication Units, which you all participating in, should be out in next, god knows, we receive them. The first, I think, 7 or 8 was, we have already worked the first 10. The first 25 is getting released in next few days or hours. And then once we load it, 25 of you will receive this in the coming days. And then you have to... you receive the (plasma) antennas with it.

(1:46) We want to know, at least for a few weeks, how the emotion, now you are part of the network of Knowledge Seekers, receiving the... you are used to receiving the Internet waves, Wi-Fi and the rest of it, how would it affect you, in being part of the, what we call, Earth community for this. We are choosing selectively, especially to cover the maximum area on this planet, that we can connect in the first 25. And then watch how these 25, for a few days or weeks, they interact, we want to see what we change now. For example,

we are in this program, we are in this teaching, and we are, as those of you who are panelists you can see the systems are open, and now, you're receiving a lot of energy, we're monitoring on our systems, how your family, how your people, in your area, in your place, now that you are connected across this planet together to one central system, one system, which gives you the data for the game, for the Coins, for knowledge, and the other one is connected at the same time to the field emotion, the conversion of the field energies, communication, connection of you lot together, we're feeding you both in the physicality and dimension of energy, together now with the system. How your people in the home, your people in your city change, what do you notice? Or is it just you, because you have a system, you want to feel that way it is? And then, in January, the next batch will go out. And then, the next batch it goes out. And now we are in the process of delivering. The manufacturers wants to deliver to us, I think it should be tomorrow, or sometime in the next couple of days, and then we load up the software.

(1:48) Then, we sent you, initially, the mechanicals, in what we call the physical system that's like an Internet. The game plays when you receive the second part, which you have to add to it, and then we bring physicality and the energy together in one system. How does it work? How would it bring changes? And once we feed the system by itself, that you are independent of the any energy source. So the system physically as an Internet system, and the system as an energy system in a dimension of plasma come together in one box, and then you have you lot around, how does it work? We pinpoint to the point of accuracy to the nations, the places we send it to. And we watch the political, the dimension of the reactions, the field changes. And then the next lot, and the next lot till we reach the 10,000 Units, which our specialists think is the balance field. I watch the Internet information's which is coming out in hacking and destroying, and I keep on saying, I post it to our team and say, "This is why we're using this Unit, because then we cannot be done this to us, and that to us, that's, that's the new way." So, do we go with our communication side, on the computer side, link up with the

emotion side, link up with the Energy side, and bring a new dimension, that you first 25 will bring the change across this planet.

(1:50) Units will go from South Africa, to Australia, to China, to South America, to North America, across Europe, in Asia, and then we'll see how things change, what happens to the next 25, and then we build up a network, you look for how we can cover the data, if we get hacked, we look that the Energy side of the system cannot be hacked. Because, it's there to give, it's there to bring the change. And, this is interesting, because, what we talk, what we set out 20 years ago, in patents and the rest, now has become the reality. Would we, as in the dimension of, you are looking at what data comes into these boxes, us in controlling the information data, Energy side, decide to release the Energy of peace right across this planet even with 25 of you? Then next month 50 of you, the month after 100 of you. How, as you are spread across this planet, create a new sphere of peace? It's pulsed on you. This is not a dream anymore, you paid for it, we are delivering it, we are delivering the field strength of peace to every inch of this planet. The dog receives it, the king receives it, the Man receives it, ill in the hospital, and what enlightenment will bring us? This is not theory, it might happen. You supported us, and we are making it to happen.

(1:52) We still need a lot of support to make the 10,000 to be there. And hopefully, step by step, we get there. Because, now, once the system goes out, once our antennas go in, the pulse of peace, and the beacon of peace will go out 24 hours a day. Day and night. What effect will have on our world leaders, what effect have on the dog, on the fish? I said recently, I wish one of the Knowledge Seekers had a submarine, we can bury in the sand, and beacon it, to change the citizens of the water world. In the coming time, in our negotiations with some nations, we asked them to take one of these into Space. And this is how the process will start. And this is how we would structure our future collectively. It's not a talk anymore. It's that beacon of creating World Peace we start beating. The first 10 sets to do the physical side. This setup is getting done, now, first 25 in next couple of weeks.

And then it comes the physical side and the emotional side. Would we create a physical dimension which has emotion as part of it, as part of the structure of the system? Would somebody come to hack it, first get hit by the Energy of peace?

(1:54) Forget about it, cannot do it. This is the reality of us. And a fact of, if we can create this pulse of peace, we know exactly how to create it. If you bought any Christmas products or Halloween products, part of the package of the ornament you receive carries peace energy. The chessboard carries the peace energy. Now, if we can change that in your hand, now with the delivery of the Cosmic Ray antennas, we can deliver it to the system, and we can create that change. What does the Cosmic Ray of Universe has had on us as a race, as a planet, and the citizens of it being a dog, the tree, the Man, and the rest of it. And we will see. Hopefully before the end of this year, next 4 or 6 weeks, the first beacons of peace, 25 of them, will go across this planet. And we shall see. And you are hit by it, you don't have a line to escape. Any other question? Q: ... COP30, which is taking place in Brazil, has the mission of developing sustainable energy sources.

(1:56) Why is the Keshe Foundation not participating, since it would be an opportunity to showcase plasma science? K- We are not invited. And secondly, do we want to be in that position? Yesterday we received an invitation from the Austrian government section to participate in CERN in the exhibition or whatever, first time ever. When we went to the site they want 3,000 Euro per ticket. Are they there to share this technology? Are they there to make money? And I said to myself, we are sharing knowledge, everything free, seven days a week. Where shall we put the price on it? They say you come and learn, blah, blah, blah, blah. But it's, we're not invited. No. We really don't get into that. And if you look in these kind of things you're talking about hundreds of thousands of millions are asking for your name to be there, or you participate in it. Any other question? Q: ...

(1:58) Dear Mr. Keshe, could you, in an, in an overview fashion, weave together the following? Energy, Mass, Inertia,

STM, STP, physicality, emotion, Cosmic Rays, Hydrogen and transmutation, and speak to them as a whole. K- Yeah, call it the Man. He's got all of it and has a brain, we can talk to it, but it doesn't listen. As I was talking about this Unit, we know and the Inertia of love, we have developed, we understand it ?? how. And... I had to go through a session of deep thinking in the past few days, in what is love and how do you love a person? And, it came to my head that, as I said, we send the frequency of peace, why not to use, we have the opportunity to let the whole world fall in love with each other? What game that will play? Subconsciously, on the televisions, as we know, years ago, they played one flash of Coca-Cola and everybody got up and went to have a Coca-Cola, and they made it illegal. What about now in the dimensional field of energy, plasmatic energy, we send the pulse of love?

(2:00) It'll be interesting. It'll be interesting to see how it will affect the humanity. Would we change, because nobody is immune anymore to the game we'll play of peace, hunger and everything else? As I said before, if our team completely delivers what it is, and we bring in scientists around the world to do this, we got you by the "short and curly's," (you can't escape) as we say in English. There is no way left, there is no path left, gradually to share. If you notice a few years ago, we went out with a message, that we want to set up a structure with the Chinese government to bring both scientists to be that we can share the knowledge. And within a few weeks after that became the attitude of the Chinese government, that sharing the technology, sharing the knowledge. Nothing is coincidental. Now, what about if once we put a... once we create the pulse of peace and then, it's 10,000 of these Units and you hammer it every day, instead of getting up to get a CocaCola, kiss your neighbor. Fall in love with the tree and the tree falls in love with you, which has a Soul, and the dog stops biting you, comes and kisses you, can we do that? It's possible, we are on the verge of breakthrough science.

(2:02) We are not theoretical, because these Units as you see is built. The (plasma) antennas are getting built, and they are getting connected, and they're all connected to one central system that sends the message of love and peace. Who's

going to jump it? Will even start working with the 25? Would it be one in the centers of the governments, each Unit? London, Washington, Tehran, Los Angeles, Brazil, Mexico, South Africa. And these waves, as they connect these Units together, pass the Soul of world leaders. Would we see the change of the Soul, we hear new communications that, "Now suddenly become..." but doesn't even say, "It's just because the Keshe Foundation released this and there is..." In a way, you're beating on the head of it, "peace, peace, peace, peace, love, love, love, love." And the energy of the Soul, in a plasmatic way. We don't need to take a credit, we are there to facilitate. As I said, if I do it, it becomes us. We are doing it. You Knowledge Seekers are paying for these Units to bring that position. And we are there. I'm sure some of you, once you receive the Unit, you put it on your testimonial. You put it on, "I've received my Unit." These Units, in so many ways, will connect, will connect it directly into the Cosmic Ray Balls you received. So, those of you who bought the Cosmic Ray Balls, you are becoming the beacons of another connection in the link of.

(2:04) Game is extensive, it's played very directly. Would the world leaders ?? start talk about the peace? Would the world leaders bring that change? You are the Knowledge Seekers, yours Universal Coins, Cosmic Ray Balls, all connect to each other. Without you knowing it you got yourself in a big mesh of changing humanity. Now, when we tested those Units with Thursday sessions and the once a year (month) Friday sessions, and you wrote, "I feel peaceful, I feel this and that." Now, what you felt is beacon across this planet. That's why we stopped the Monthly sessions, because I achieved what I wanted. And, confirmed the process, you lot fell in love, you stopped addictions, and everything else. All I need when the 25 Unit goes to 50, to 100, to 10,000, send the same energy fields, we know what's this to be in a plasmatic condition of the addiction. Do we need to invade another nation, accusation of the drugs, when there are no customers for it? Don't need to. Now you see how extensively you helping us to put these Units across this planet will bring that change. The computers will give you the sense of physicality. The Cosmic

Ray antennas will bring the play of the game of the Soul, and everything goes as it should be.

(2:06) As I said, "Let's play the game, the game has started." And I thank the team in the background, who's working to bring this together. From different nation, different cultures, are working in the background to make this possible. And I thank them for every effort they have done and every support they have given day and night to bring it. And you will see as humanity the result of their work. Any other question? Q: .. A report from a KS about a half hour ago. She says, feel like I'm in a pressure chamber, as if my body is compressed. I'm not afraid, I'm curious to see what happens. I remember having this feeling as a child, between the ages of 2 and 6, in bed at night. Can you tell me anything about this? K- My usual say, I'm not there, I don't know. R: Well, you mentioned earlier about this idea of compression or putting pressure on our attendees here, in the Zoom, from the fields. Is that part of... K- We are not pressurizing, we are making it available. If you are Man of peace for what we've done, you'll pick it up. I was looking at the graph data which has come from our center.

(2:08) How you lot have been in the first, what we call, one hour and eight minutes of this session. It's very interesting how far you have moved in the dimension of physicality towards this Energy side. We have a line, as you all remember. The left of the line is physical side, the right of the line is the Energy side. And now the whole thing has shifted to the right. Clearly, since we don't have, we have a little bit on the Soul side, on the left side, which means we are all working on Energy. It means we are getting our message to you in the dimension of the Soul. So, let's see what happens till the end of the day. What changes we'll see in the dimension of energy field? Any other question? Q: ... Great Professor Keshe, Man built his cyborg in his own image and likeness, AI (named) "Soul,"

(2:10) which is the Albanian Prime Minister's AI, is human, all too human. Her programming has absolutely no Angelic programming. Every judgment she makes will bear the trace of the cyborg Man. Who will control the AI? humans won't be

able to. Only another machine will be able to control it. Could this other machine be plasma Intelligence, considered to have a Soul, because it was made with Pico Chips? Could it be that this Socialist President of Albania, created this ministry, because he doesn't find anyone human, with the courage to make decisions, that he himself wouldn't have? If "Soul" makes a mistake, there would be no one to blame. And he wouldn't burn political capital for his re-election, for example. We know that AI is a result of the financialization of everything, because of the Neo-liberation we've been living under for over 40 years. What is the limit to this financialization of everything? Could plasma Intelligence help, or sorry, help us control this financialization? Is there any existing form of government that pleases God more? K- ... We see a lot of new ways AI is used. And we see a lot of ways misused.

(2:12) And now, in the past couple of weeks, we have started seeing how ruthless AI is when it become misused. I was, somewhere yesterday, message of, listening to something that, had an attack of 22 Terabytes, on one IP (computer address), 100% coordinated with AI on one IP and the rest of it. Why? Who decided? And one of the things, if I understand correctly from our team, the way we structure these systems is to keep us immune from AI. Once one (?? ONN Unit) goes out it's replaced with another one automatically. And how... what is the outcome of this AI? It's what's the outcome of create giving them emotion. And the robots. And there are a lot of unknown in this equation of AI. Are we carrying the misguided thoughts of the programmer, but in a faster way? Now, in the past 48 hours, past 72 hours, a new faster AI has come in, which works like a human. I don't know, many of you have must have heard about it, that does not, the AI we had uses more as 100% information, what it said and what it makes.

(2:14) This new system takes only 2% of the information, so ignores the other 98. So speeds up in energy consumption and the calculation, and in accumulation of knowledge. And this is how the other way of using, running AI fast, is the European way, American way. And this 2% knowledge is

becoming the Chinese way. What it takes to get to a conclusion, and the time in the European AI, American AI system, with the Chinese coming up with the new Chips, they only use 2% of the knowledge and the energy to reach to the conclusion and what they want to decide, to make decisions. I don't know if you are aware, Israelis ran the attack on Iran in the confirmation, the way they do it, with AI. They ran the whole procedure with AI. Every possible scenario they had. And they saw themselves as a winner. And when the situation changed in the last 3 days, they found out that AI has miscalculated. Every information, every position of every General, every position of every known rocket, everything was put in, using Chinese computers. They broke into the back of the Chinese structure, used their computers without them knowing, and they planned the whole attacks. And their AI planned the map of attack on Iran. Which drone where, what has to be done, and the rest of it.

(2:16) Now they've run this in the past, actually they're running it more or less on a full time when their AI will tell them to do the next attack. And the AI is continuously informing Mossad Central Intelligence of United States, "You attack, you lose. You attack, you lose." Because there's an update. There is other unknown which is in this equation. So AI has made a mistake. AI now has become a thief. They are programming AI to go and steal. So how will it affect us? Would the currency will go with it? When you talk economical currency we are spearheading with the Keshe Coins to overcome this. As I said, these Units will bring a lot of changes. As I said, in the coming time, very soon, governments will sign to accept the Keshe Coin as part of their currency. And then they start trading with each other with it. And this is how what is happening, it's set with the Soul, and this currency runs into the systems which currently run with the peace. Would the government in the hand of it will use, have the emotion, or gets the ?? notion of using this to buy a weapon? It's a collection of things which it comes together with this. Economical control, where we give the freedom of control with the Coins.

(2:18) We have to see, but step by step, the whole package is done by one structure, which has no connection to, no structure for government, but finds a solution for all the governments. And you'll see it gradually. My biggest fear is, would in the future, somebody uses this technology (T) to change the whole structure, which we use it for peace. With the first 10 to 12 system we knock it off and then it disappears (?? They steal it). Anything which is not positive for peace system blocks, has to block. Which means it carries the emotion, what's the next step in it? This is the interface, this technology between the Yin and Yin. This is between the good and super good and how they can overrun to stay good. Can't do anyhow, impossibility. I hope and the people who are behind it, they work on the same Soul and energy as me. The fight is not to decentralize, the fight is not to fight the present system. The whole structure is to bring equality. And when you ?? are equal, you don't need to fight, fighting takes too much energy. When everybody is given a million dollar, a million Euro to live, from the point of birth, you can make a bread one million, but nobody pays. So it becomes so. When in the near future (KF) Apps of one quarter of a one cent will be for a breakfast, how many breakfasts can you have?

(2:20) You download the energy of the breakfast, which is what your body needs in the first half of the day. It's implications of this technology sometimes bring so much joy to me. When no child goes hungry, we are sending the pulse of the energy of banana through the system right across this planet. When we send the structure of what you call, they threatened us with viruses. We send the process of Cup 1, we send the same energy to overcome the virus. And then will it become effective? There's a lot you can do with this technology, because you lot, thanks to all of you. You gave with your body and your Soul to us to test it, to confirm it, to deliver it, for 18 months, for 2 years. And the funny thing is, you paid to be part of it. Every single graph didn't go wasted, every piece of information didn't go wasted. And now we know how to get you the banana. If you remember some of you had the taste of banana, so you had the taste of orange. All has been recorded. Some of you lost your addiction to different

things, some of you got flooded in your mouth with the water, so you have a drought. If we had this system in operation. Hopefully a number of it will go to Iran and Middle East, would a drought short of water will be met with a flood of energy that you feel not thirsty.

(2:22) And it doesn't matter if it's dry and nothing, no water. It's got huge implications. And now it depends on our team how fast we can deliver these antennas and in what way, how we energize it and how we bring it. We bring a process of, you don't need to 'plug and play' anywhere, it's already plugged when you play it. Most probably in the next generation after the first, what you call, maybe 50, 100, we bring a new data, because we had our discussion with our manufacturers. We want energy dumping, the energy around, and I can feed the system, then you don't need to be connected to no ground energy. So it becomes self-sufficient, the more it receives the more you lot play with it, the more has energy stored to run itself, so it becomes independent of energy, then it becomes receiver of energy and you are standing on the ?? wave of it. You live in south of Brazil and the system is one in Canada and one in Argentina, you are on the ?? wave (?? way). You receive the orange with a banana, it's there, your body needs it, but you are not aware of it, then the energy is delivered. In a way we create a path, and the way you receive energy from the Universe, 80% of it, now we target it. This place needs it, this Man needs Vitamin C, or this Man needs antiinflammatory. The fear is not anymore of extension of life, is the joy of enjoying life. And it's not theory anymore, it's there. We are doing it and we are proud to do it. And you made it, facilitated.

(2:24) Every time you paid for the sessions, every time you paid for the Units, every time you bought something, we ploughed everything back into research. Everything. We haven't stopped doing it, and we can't stop doing it. But as I was saying to someone earlier on, that we still have to create, Man likes to eat, so we have to still do the agricultural work. We still have to do the water work, because people like to have water, we have to still do the health, because people still are entanglement of aging and the rest of it. Any other

question? Q: ... If love is an emotion manifesting interactions very close to the STM, so it may be the common denominator to the path towards the Creator, as we replicate the basic plasma physics. K- I'm waiting? Is it finished? R: Yeah, maybe it's more of a comment, than a question, I didn't have any question mark at the end, so... K- You see, there is a very big question mark in, as you put in, "love" and "loving".

(2:26) What we call love, and what we see as love, and what is perceived as love, and what is the actual energy of the love. And how we pigeonhole it in our emotion. And what we relate to that emotion, with that word, with that emotion, with that behavior. And it's how we play with the structure of it. And then, if you interpret love being giving, unconditional, then we understand more into the process of the Creation. In a way, I put back into the beginning of the teaching, is that emotion of the love, which the Creator puts into the plasma of the love will create that wave will become, leads to creation? He created it out of the pressure as in His own plasma, leads to creation of the field which is the field strength of the matter state which becomes to the Creation. That something is created from that wave that it comes back to love me. As he said, "I made Man to make children that they may love me." So even our Creator is hungry for love, and he receives as a wave, receives as a pressure, impression on the Soul of the plasma. He didn't say, "I made Man to make children to feed Me." Because to Him there is no physical feeding, He's hungry for a game to play, that He receives emotion, which is emotion itself, is creation of waves. Confirming His manifestation.

(2:28) In a way He confirms the Soul of Me. I made Man in the image of Myself, which is the Soul, I create the Soul, that impression of that Soul on the plasma of Me, lead to creation of new life, dimension of physicality. Any other question? Q: ... Hello, I ordered Cosmic Ray Balls, when will more Cosmic Ray Balls be shipped? K- All the Balls are made, we have received the boxes from manufacturers, we are waiting for those soft velvet bags. And hopefully in the first week of December they should be out. All the Cosmic Ray Balls are made. We are waiting to set for the ?? mail. The components,

which is the box, has been received from Ukraine a couple of weeks ago. We are waiting for the velvet sack to arrive, then it'll be shipped out... By the way, before I forget, in the next two or three weeks Keshe Foundation shop, we're going to Shopify a new store structure, where some of the stock you purchased would not be shown because where you bought is still there on order, and it's not anymore. Don't take it that it's finished and there's a problem.

(2:30) It's just that with a new, we had to restructure all this, a lot of obsolete things around the thing we sold years ago. Now with the Shopify it's exactly directly what is in Store now is taken out, but we still have the orders to come. Don't write to us what happened to my products. If it's in there to be done, it's already done. It brings us a new dimension of ?? to be done. This helps us with the new computer system to make it much easier. And it allows, which we never had, credit line, credit cards, and the rest of it, that you can pay with and operate through. And, now that we are integrating new Knowledge Seekers, technologies and products, allows us to feed back very rapidly into the system. And, with the speed of our delivery, because we had a very cumbersome system, which we inherited it from 2017, if you remember, a guy came in and he said it's going do the thing, and he screwed everything up. It's taken us, the story of one idiot puts a stone in a well and takes 40 intelligent men. One man came, caused a huge wrong mistake in the nearly eight years, to put it right, and now we're getting rid of it. So, you have to go back in and register as a new customer. You have to go in and register, and your data is not lost. It's just that this system uses the ?? of grading, the Keshe Foundation system, and it has to be done with the new structures we have brought in, with the Shopify, and those of you are familiar with the process. Don't think you have to re-register with this structure, with this organization. You haven't been re-registered from the Keshe Foundation structure. But to use, to be able to purchase, is in that way. We are receiving a lot of people giving us donations for these Communication Units. What we prefer you to do, because it's causing some problem with our banking system,

(2:32) is to purchase a Unit and write on it, I donate this Unit. And this help us a lot for our taxing and bookkeeping, and a lot of other things that makes it simple. And I'll try to keep you update with it, when it's done, when the transfer is done, the next, the program is complete, our people are migrating from one Store to another in past few days. And hopefully by the first week of December, as you are used to purchasing, will not be there, you have to re-register with the new store structure we have set up. Carry on. R: Maybe you could work in an option for people to donate the items that they buy. K- Yeah, they pay for it and they can (donate). a lot of people do that. A lot of people have bought, given things, that, "I buy this, I want to donate." That they will go the same way. And it's all the way down the line. We're just trying to make it easier for us, with less problem with, what you call it, registration and taxes and the rest of it. R: The whole thing about the new Store format sounds really encouraging, because a lot of people have had trouble trying to navigate, and work through some of the Stores. Been getting better and better, but it's still needed that leapfrog into Shopify. K- All the obsolete items will be in the background. There's all the obsolete items been there, it's just covering pages will be withdrawn. What is available will be there.

(2:34) And the teachings will have a special, what you call this, like what we used to have a special teachings or sessions will have its own click. But we open it when it's needed, and it'll be done that way. And it's all the way through all the systems of the, what we call, the Keshe Foundation structures are getting restructured because of the, what we call, new development. Q: ... A question about the ONN. Could an App be created that transforms cell phones into points of this (ONN) network? To accelerate the spread of the One Nation Units, is... K- This is something I do not... I cannot answer you. This network, this One Nation's, has actually a structure of the game that you can do that with the App. You can do that. You can reach into the game side, by reaching actually the program. I have to ask. R: So someone could play the game on their cell phone, but it works through the One Nation Unit to rack up points to work through it. K- Yeah.

Yeah. Yeah. Yeah. Yeah. Yeah. It'll be point of donations, it'll be point of purchase, everything. Hopefully, one day will be added into it. Q: ... Mr. Keshe, in your view, what is the current and near future outcome for the hidden organizations that are working to restore the ancient pre-flood system on Earth,

(2:36) while pushing the New World Order and One World Religion agenda. Please share your... K- Good luck to them, good luck to them. You got to realize one basic ?? pack religion. If you put all the religions, 95% of what you call religions or beliefs, goes back to Zoroaster. All different ways of interpretation and making it up to fit. And this is part of what we call, covering up, not to be seen, not to be shown. And if, for example, you look at all the signs (symbols), scriptures, of everything which comes from Vatican, it's Paganism. Look at the hat, look at the robe, look at everything which is in it. And before that, before we believe in whatever structure, Man believed in fire and the rest of it, all comes from his weakness. Because he had something to be bigger, that he could attach themselves to. Now, with this technology, especially if we get, manage to complete this cycle of systems that where we can create dimension of peace, do we need that? Or, do we become intelligent, ready to be able to be ready to accept the totality, as one structure of Universal order? Then, do we need these groups and the rest of it?

(2:38) And as we change the Soul, would these things disappear? Because it's not there. I always said, I don't know if you remember or not, when I was in Queen Mary College, the first year was structure, wherever we went, it was, because the University paid to set up societies, Chess Society, Backgammon Society, Gay Society, Lesbian Society, everybody were given a budget by the ?? University to have a society in the University. And the Gay Society and the Lesbian Society were so everywhere, everywhere, they were everywhere, we're getting fed up with it. And one day, we saw a notice, they became so active, that they structured themselves as a Gay and Lesbian Society weekend party or a night party or whatever. They decided to go together and have a party, and they thought all the members will go to it. And

after this party we start not seeing so many posters about the gays and the lesbians in the University, and the joke came that, "Oh, they had a party, and they found out there is more in being with the other side, then they dissolved the societies." Because, something else was there, that it was no need for the other. And this is more or less what's going to happen to these, when you create foundation of peace and these and being there, really people being able to enjoy it, these societies gradually disappear, there is no need for them. They merge into and whatever. And they disappear in time. At the moment it's fashionable to be.

(2:40) And forces they are to do, why don't they do? Why do we have these horrendous droughts and not famine as much as before? Because now we have found out actually there are no famines. It (they were) was created to create that (?? perception). And see what it is, how it is. They are Man-made famine, they are Man-made water shortages, and the way they do it, if they would have preserved the water, the way it should be done, not abuse it, there'd be no shortage. 80% of the water shortages on this planet today it's done by Man misusing and abusing the resources. If we would have stuck to the old traditional way, where the water it came, the way it went, we don't go for extreme agriculture, water is here, we use it. We are not in this trouble. If we control the harvest, what we cultivate, where we cultivate, the way we cultivate, there is no shortage. This planet is so rich in water. And why do we have the drought? It's mismanagement of water. Do we need these organizations to supply water, supplies hidden? There is no hidden water supplies, it's a stupidity, and the way it's distributing and abusing the water. This planet is a self-sustaining, self-preserving, self-supplying planet. And has everything sufficient enough to support life. And the life supports now, is not even 2% of what it can support. It's not even 2% of.

(2:42) We mismanage, we mis-abused the resource of this planet, but it ?? keeps on putting back in, the rain, the water, the this, that, that. You're not short of anything. Our system has set up to abuse, misuse, abuse, and then we claim this and that and we need to rationalize to claim all establishment.

The whole establishment was you take what you needed and the cultivation of doing it. The way has to be done and then you create rain with it. In Africa, I've said this many times before, an African woman, which does the cultivating, carries up to 40 different kinds of wheat grains for what she feels that year will be. And part of the process, she sows the seed, this is going to be a wet year, this seed does not need that much water, but it creates the moisture that it brings water to it. It wasn't just seeding because of the weather, they were intelligent to see how much moisture that plant will create in the environment for the rest of the environment. And our people never understood these things. It was self-preservation, we understood. Nowadays, it is destroyed as much as you can because you can control water, you can with the water, we can create wars and the rest of it. If you go to look at the history of the Man, how much we have killed for no reason and for water and just for the excuse of survival, you will see amazing. We die, we all die. But look at how many people have been killed for the greed, possession and the rest of it.

(2:44) The biggest murder done as a nation in the history of Man is done by United Kingdom. 200 million people in the past 6-7 centuries have died due because through British Kingdom. It's the highest we have. The biggest murders. 100 million in India alone during their colonization. Millions in Africa. Second was France. How many people got killed, or how many Americans were (?? has) killed? The total estimate Man has killed Man in the past half a century plus is amazing. Over 1 billion. If you read how much of it is not there. Second World War, First World War. First World War, according to the estimate of Europeans or whatever, 15 million people killed. Did it? It's actually 45 million British, they wanted to be shown. Because through enforcement, flood, what you call it, droughts, deliberate hunger, 15 million Iranians were killed. Plus the 15 million more, doubled it. Where (?? why don't) do you hear about that one? How many did Mao Tse-tung killed? How much Lenin killed? 50 million. Have a look.

(2:46) Man has a habit of killing in millions and he sees himself as power. So, these new systems we put in is to

change that Man. Then we see, do we need to change the water supply, do we need to change the World Order? We just need to become peaceful. Shall we call it a day, it's nearly three hours. R: Sure, yes, thank you. You answered almost all of the questions here. And a couple of leftovers can be brought over till next week. K- Thank you very much. Please support us with these Units, we need to spread as many as we can, as many as we can put out. As I said, in the next less than two weeks, we are back in to court to see the position of us regarding the huge fraud. That most of whatever comes back, as we plan to expand, we'll go towards the replacing of financing part of these Units, with Foundation we'll commit itself to. And we'll see the rest of it, how it's done, but we still need a lot of support to put as many as possible out there, that the system becomes self-sustaining and nobody can interfere to tamper with what is set up to come. And I thank you for all of you who are supporting us, and you have supported us. We still need to get as many more in there, by end of next year. Thank you very much, and hopefully we'll see each other next week.

(2:48) 617 KSW – November 20, 2025 End
