620th Knowledge Seekers Workshop December 11, 2025 (Transcription, Editing and Proofing done by KF Brazil) (Auto transcription by Elias) ENGLISH TRANSCRIPTION

Part 1

(:10) K- Thank you very much. Good morning, good day to you, as usual, wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. As usual in this tradition, we welcome you back, and we try collectively, all of us, to add to the knowledge. Knowledge of matter state, Energy state, knowledge of the fields which make the Universe (U), and we always been too busy looking at our planet, where we were born, where we stayed, and we attach ourselves to physicality (P). In the world of what we call, fantasy and in the world of what we call, poetry, we have an old poet which he wrote a book which is called, in a way, Conference of the Birds, his name was Attar, and later on other cultures picked up on his book, what he spoke about, which in the English language of today we call it the Phoenix. Phoenix never existed in the history of Man till Attar wrote in his fantasy book, in his poetry, about the bird which burns and from it,

(:12) from its ashes, rises a new life. In a way, we are all that Phoenix, every single one of us. And then, in a way, in the book, he doesn't call it Phoenix, he call it a different name in Farsi, 'Bird which rises from the fire', and in the history of the Egyptian, and then the Greeks, they changed it, and now we know it as a

Harry Potter, what we call the bird which comes up as a Phoenix. But, isn't that us? He wrote about the life of the Man, in a poetry way, as it is. We grow, and when we die we leave the ashes behind. And from our ashes rises the Soul of the Man (STM). Which is the precious, where in that process, we get detached from the physicality, and that Soul creates a new dimension (D), which now with the knowledge we understand, is the seed from the cycle of creation, a new life, in the depth of the Universe. But what happens when the STM, and the, what we call, the physicality of the Man at the point of death, how do they separate? It's very simple and if you as Knowledge Seekers understand next 5, 10 minutes of the teaching, you will understand how to transmute and how to change. You don't need to die, you don't need to burn that body for it not to be there,

(:14) to start this journey of without physicality, to manifest yourself in the dimension of the energy and the Soul. But, wherever that Soul goes, in interaction with its environment, somewhere in the Universe, it will manifest itself. Doesn't matter how much steam you make in the room, till that steam, that vapor, does not hit the coldness of the mirror, the coldness of the window which is cold outside, will not manifest itself as a drop of water. And this is exactly what is the STM. We, when we separate, when that position of the Phoenix takes place, that we leave the ashes behind, we leave the physicality behind, then the STM takes the 'flight of fancy.' And where it comes to the

point of field balance, it'll manifest itself and that will be its position. The window is huge, and it depends which drop is yours, because there are many drops on that window, when the vapor, when the steam in the room hits that window, which drop is yours? And which drop is the Soul of the other Phoenixes, not only of this planet, but the Universe, which they were created, and they have a balance field, as we heard in the Intro, between the Gravitational (G) and Magnetical, giving and taking, this is where my home is. I'm not a drop on the top left hand corner of the glass, or at the bottom of, I'm somewhere in the middle, I could be to the left, I could be at the bottom, but this is where the fields,

(:16) the coldness of the window allows me to manifest myself as that drop. That drop is your Soul and the window is the span of the Universe, where your Magnetic Gravitational field which you created, you nourished, you grow on this planet, dictated to be in that position. In a way, the pot in the middle, which creates that vapor, is your Phoenix, is your body, is the ash. And when you cannot vapor and fly the flight of fancy, you could be anywhere in the room, but you never manifest yourself. You as part of the air, you are lost. Because you did not create a condition to be able to manifest. Very few drops become that drop on that glass. The rest of the room is full of vapors, Souls which are no destination, looking for a place, a time to manifest themselves. And then, when you see those drops getting stronger, absorbing more moisture from

inside, they start floating down. They become part of the bigger condition, bigger material. But biggest point for you to understand is that, at the point of burn, at the point of separation, what decides, that part of the energy, part of the field of the STM becomes part of that vapor, and what decides it will become part of that ash? This is the point, that you as Knowledge Seekers, If you understand that you never come to the point of the ash,

(:18) but you still have the combination of cycle of emotion and feeling, then you know to separate the two, carry one inside the other, that when you hit the wall, you can become a drop, you manifest yourself again. You were water in the pot, vaporized, you became to the point of Phoenix, in 'resurrection,' and then at the point of the glass you manifest yourself. But you're still that drop. You were that drop in the pot, and now you're a drop on the window. Evaporation, separation from the physicality of Totality has brought you to that point. In a way, Attar knew, if you read his poetry, if you read the book, what they call, what is known, if you get a chance, then you understand in truth, what it means, when he wrote this book, "The Conference of Birds", those birds are us. But, each one of us goes into that cycle, goes into understanding of it. He understood, but in a way framed the STM as the bird which flies and manifests itself. Then it comes a question, would that bird find a matching fields on this planet again, in direction of magnetic field of itself? Or, due to the connection to

the ash, which is again, we understand nowadays, is another Magnetic field itself, we call it Nano material, if you like to call it, connected to the Soul. But, what decides to be the Soul of the ash left behind, and what decides to be the Soul which becomes a flight of fancy of the energies,

(:20) which take into the horizon of the Universe? But this brings a very deep, deep question, (that) one day Man has to answer. If we say, I made Man in the image of Myself, and now we understand the separation of the STM and Soul of Physicality (STP), and the physicality of the Man which is the ash, if we are made in the image of Him, does He go through the same cycle? And then, where does His Soul finds manifestation? This is not theology, this is understanding the process of Creation. This is understanding the dimension of field interaction. This is understanding scientifically what means to be part of, to be created from and to return back to what created you. But what created you suffers from the same condition as you. Then this brings back the question of the Unicos. Where is that God that our God is part of? Our Creator is created, otherwise He wouldn't be the Creator. There is no... you cannot have a child when there is no father. You cannot grow a child if there was in the womb of the mother, we call it the womb of the Universe, there is a womb of the Unicos.

(:22) And in that proportion, it comes to the one point, we go back to Macro, to understand the Micro, and

vice versa. If we become that ash in the dimension of physicality, and our Soul becomes the new bird which takes the flight of fancy. Then, it comes to question, who, what, and what condition decides, that you become the field forces of the ash, and what decides you become the field forces of the Soul, the bird of the flight? If we look at this process, and if we understand this process very clearly, you Knowledge Seekers (KS), knowing that the only connection between the STM and the physicality and the Soul of Physicality (STP) is the emotion, is which emotion you use, how you use the dimension of the field of emotion to transmute in the dimension of the field that it leads to manifestation and transmutation in either direction, the field or the matter. But what is interesting, which Man has to answer, Man shall see, is that on Earth we leave the body behind. The cells of the body of the Man and everything which is within the skin of the Man stays behind. How the decision is made, (:24) what is the systematical system that separates what becomes part of the Soul and what becomes part of physicality. And then, if you understand you can carry that physicality using the Soul, then you all can transmute. The reason you die, and your body stays on this planet, or anywhere in the Universe, is because the part of the fields of the cells of the body of the Man, which are connected to the Calcium, the Inertia absorption of this planet, stays behind. There is not a single cell on the body of the Man at a point of its conception, as it's created, without a Calcium (Ca).

So, we have a reference point. We know if we can understand, replicate the Inertia of the Calcium, we can take the physicality with us. Because, it still carries the emotion. In a way, the essence of the creation, that every single living things on this planet, is connected to, is the presence, combination of the metals, semi-metals, any kind of matter state Inertia. And if in the dimension of emotion you can create the what we call, central Inertia Mass, the connection to this planet or any other planet, you'll be moving on, you can transmute.

(:26) As long as you stay within the structure of the gravitational field of the Earth you can manifest yourself as a Man, unless you change the emotion. And many have managed to do this. Then you can transmute, then you become that bird which never leave the ash behind because instead of the Inertia of the this planet to hold on to the physicality, you create that Mass energy field, we call the Inertia field forces of matter state, into dimension of the transmutation. Then every single one of you can instantaneously transmute. When you come to another planet, when you come to another dimension, when you come to another field force, the body of the Man with the lung, with eyes, is no good. You're handicapped. You won't even be able to manifest. But because you have the replication of the fields of the emotion of the physicality that I need a system for me to take energy from the environment, I need to create Inertia balance that I can manifest myself in that area as an entity. I

need a system to store the energy and I need a system to be able to make me mobile. You'll manifest in that position on Mars, Moon or any position in the Universe, in the shape of the body, in the shape of physicality, that allows you to sustain life. Which means to be part of, which means not a rock on the planet Moon, but entity which can move, live,

(:28) enjoy the condition and be part of. In a way, the Inertia of the position in respect to what you carry, that you did not leave the ashes of the Phoenix behind, dictates the manifestation of physicality of the Man. There is an assumption that this process has been done before by men of this planet. Through knowledge, understanding what we call transmutation of the STM, but carrying the physicality. In a way, within the structure of the physicality of the Soul, you create the mini-environment, mini-structure environment, which matches the environment of the Amino Acid (AA) and the Calcium dimension Inertia of the Man. Then you transmute. Then in a way you cocoon the ash with you on your backpack inside you. It's an energy, has no dimension, and only manifests itself at a point of the balance or condition of the emotion to what it is. You've seen in Beijing, we produce different materials, we, you took the spoons of it and as I said before, most of the spoons are empty. Somebody said that this is the bits. If it was any bits, after six months you should have had something in your spoons, because we create the energy Mass, we create the dimension of fields of

what I call emotion of Inertia. I deliberately gave the spoons,

(:30) 100 spoons or so was given to people around China and some of those who came to see the conference. And now those spoons with matter state are empty. If it was matter, it would have been still in the spoon. This is a condition of Cosmic Rays. This is a condition of connection with the field of the Universe. This is why those who produce gold, they cannot sell, they cannot give it confirmation of the clarity of the matter state. This is why life is in a dimension of plasmatic energy as Gans and why you as every single entity, as the Phoenixes of your life, will decide in time the energy fields of your Soul what kind of physicality will create in the Universe as you carry the Inertia interaction with the environment of manifestation. One question to ask is that, if we look in the dimension of Gravitational Magnetic field of the earth, the way we see human body, having a slightly different emotion and a slightly different combination of the fields, we become cats, dogs, trees and whatever, the fish? Because, the environment decides how Gravitational manifest .. Magnetical of the Inertia of the Soul, manifests itself. Then, goes back to the question of few minutes ago. I made Man in image of Myself, Man can resurrect, Man can become from the ashes, to the direction of Phoenix, to be that energy, that free bird.

(:32) What happens to the Creator in the environment of the created Unicos? Don't forget, we are part of that

drop, because He is the Totality of that drop. But now the condition is not a pot, is the window, a new dimension, a Unicos, where it brings all the dots together. This is for you to understand as Knowledge Seekers. Understand what Gravitational Magnetic field you have to create within the STM to in a way replace Gravitational Magnetic field Inertia of the planet, that you can transmute. But don't forget, it's all connected to the emotion, which it has a specific Magnetic field strength, it has a specific resonance, it has a specific dimension and direction. In a way, within the STM, when you want to transmute, in the emotion of, I want to carry the physicality, I love what I have, and as long as I live on this planet, I want his fingerprint, then you understand, how Man can transmute. I made Man in the image of Myself. So, I have given Man every possibility, every opportunity, every attribute which is within me to the Man. As Muhammad said, bless his the name. In the Koran there are 99 written attributes,

(:34) beauties of the Creator in dimension of physicality of this planet. Which most of it and all of it connected to the emotion of interaction. And when you read all 99 and understand it, then you have reached the 100 which is the Totality, which is that 100 is the Creator. Now a lot of you have been battling to transmute. Go back to the teaching of some time ago, where I showed you how you hold your hand to create that light. Now that your knowledge has reached the point, put that hand together again and see if you can

create that light, share emotion with that light and watch the creation of the ashes. If you understood that, that emotion of how to transfer energy of the light into the ash in your hand, or a dust in your hand, or a gold in your hand, you have then learned how to transmute. And the key word is, not I want, it will be a pleasure to see, that I can give. Then if you understood that, you transfer that energy, because now you practiced it how to transfer that light into matter you do that with your own Soul, but with the dimension of emotion, with the detachment to be attached to the physicality,

(:36) but for it to be a guest for me to carry the beauty. I made Man in the image of Myself, in every shape, dimension and direction and emotion. And there is no exclusivity. Every living thing in the Universe has all the attributes of the Creator. It's the Man who decides which suits him and which is the dimension that he wants to live in. He wants to manifest himself in, jealousy, darkness, evilness, happiness, fairness. It's all a decision which the Man makes. And if you can make that decision in dimension of the emotion, you can make a decision on the emotion of transmutation. Many have done because they understood the field strength of. They understood in a way what is needed to be done. They understood the concept of plasma, they understood the concept of matter state, they understood the concept of emotion, to understand the dimension of Time. Now if you go over all the teachings of past, especially six months, twelve

months, and understood what I said today, there is no reason for you not to be able to transmute. There is one factor which sits in the subconscious of the physicality of the Man and it's called, fear.

(:38) And that's the only thing, as I've said before, which is holding you back. That fear energy does not allow the Inertia Magnetic field strength to be created within the inside of the STM in dimension of energy that he can manifest itself anywhere in another dimension. But the biggest problem is now that fear of going back. Once you become the dimension of Energy, the same fear exists, what happens, I enjoyed the beauty of the Universe without physicality, if I go back to dimension of physicality and I get imprisoned by the physicality of the Man, like in the brain of the Man as we know. Then, Man has to understand the fear exists on both direction and dimension. And it's not exclusivity of the present time. Trust in yourself. Trust in being able to manifest this dimension of physicality, it's part of the structure you have to teach yourself. In a way, we've seen that in the world of Man many times, concentration of the energy that the body goes to a pre-transmutation, but due not understanding the process Man will go backwards into dimension of coming back to be in the dimension of physicality. You have to understand how to transfer that energy, and you have to understand how to direct it dimensionally to be in that ?? world.

(:40) Let me explain to you something very, very simple that if you're a physician, if you're doctors or

you check in the future, you can see the correctness of what I explain. Some of you drink alcohol to become legless and don't remember anything. The dimension of emotion of the fields of the alcohol because of the Nitrogen connection separates your physicality in the dimension we call you drunk, totally out of your head. But when the energy extra brought in, released, you become conscious, no problem, and you go. It's like a Russian roulette. In Moscow, if they find you drunk, they put you in the prison, there is no court in it, because there is half of the city drunk, so they keep you in there. And when the alcohol wears off, they leave you on the street. This is what you got to do. If you understand it. But we have another dimension which is controlled by Man. Many, many cases of what we call epilepsy is created by the person itself. And they do it because it's like not addiction, but in a way of forgetting in the dimension of. They separate the physicality from the Inertia of field forces of the Soul, and then you get the shaken ?? bottles and the rest of it on the floor. But how do they do it?

(:42) Many people, many, many of those who have epileptic attack, they learn how to do it. But at the point of creating so much information the physicality takes over, instead of directing the energy into the Soul to create

the separation and transmutation. If you look at the back of the throats of, as I said before in some teachings, of a person with epilepsy which comes on

the process of addiction, except some epilepsies are due malfunction of the brain, a large majority of the people who create epileptic attacks for themselves have a habit of in a way, sucking on the back of the little tongue in the back of their throat. It needs a lot of concentration, needs a lot of intention, needs a lot of knowing how to handle this energy, and when he gets to a point that emotion direction of the wanting, bringing, leads to massive amount of information, which is as energy sits within the brain of the Man and the clicking block of the brain cannot handle, so the energy has to be stepped out of the brain in the steps. And then as the energy cannot be added to the Soul we see the shaking and the vomiting and every other thing we see with the epileptic attack. In a way they have learned how to concentrate this energy which then it goes through the spinal cord with a valve on the top with limitation of the leakage, but they cannot add the energy to the Soul that creates transmutation.

(:44) Every time you see an epileptic attack, every shake you see is scientific, as I explained before in other teachings, well understood. The top of the brain and the connection of the main brain has a little valve which is size of a pinhead, which controls the energy transfer from the brain into the body of the Man, otherwise you're shaking and dripping everywhere. There's a little valve and what is needed it just changes polarity and allows so much to go through and then it shuts, and every time you see a shock it's like have you seen you got a hose in your hand and

you stop you block it, and you see the shake goes off the ?? pump and you hear the tap going ?? clunk. That's exactly what people with epilepsy do, majority of them who have epilepsy on demand, because they know what to do. And they know how to reach the energy of the brain that they know how they lose control of and then becomes the shakes and everything else with it. If you understood this and you understood how epileptic energies are created through the interaction of the field of the Man itself, in majority of the cases, which then it becomes fake. It is exactly what you need to do, to create the energy, that in conjunction with the STM, become a passenger of Space. But don't forget, you have a very big problem. Your problem is,

(:46) how to release the energy that it leads to manifestation. And the manifestation you like, that you're given in a dimension of environment you know nothing of. In a way, waiting for that Day of Judgment of me with my Creator on the table. It's me who's going to lose, because I have not understood the process, and very much like an epileptic guy, I lost the control of. If you manage, instead of letting that energy of the epileptic attack to go through your spinal cord, but to go dimension of the center of the brain, all of you can transmute. When you ask a epileptic attack condition in force, those people who can actually do this transmutation much easier than the rest of you, you see the little thing dangling on the back of the throat very long. Very, very long. If the height of that

little dangly thing in the back of your mouth is one centimeter, in a epileptic attacks, continuous, non-reversal, you see it is literally sitting in the middle of the throat. But, if the people with epilepsy put a emotion into it, in a dimension, for sure that physicality will manifest itself. Usually controlled by pain in the physical life of the Man, and then abandonment.

(:48) Transmute, but we don't know where we are. Create condition and that condition forces what we call transmutation. In an accident, in one of the laboratories of the Keshe Foundation we've seen this. Due to change we were creating condition of transmutation. Accident, no accident, cracking of the glass of the fish tank, we have lost many, many of our fishes, but we can't find them anywhere. There is no carcass, there is no left, but these fishes were trained, these fishes were created, the condition of transmutation in the fields. So when that steam in the back changed, cold changed to warm, there is no more steam on the mirror, the fishes have gone. We are not talking about one or two. We have no leftover, we have no cats, we have nothing that will explain the whereabouts and how these fishes do this. So we changed the environment. Don't forget the year before we had one jumping from a fish tank to another tank which wasn't supposed to be there. One thing, it'll be very interesting, and it's part of the discussion of today, according to what is supposed to happen on the 19th of December with the 31, would and if this

enormous energy pack changes magnetic (M) field of this planet,

(:50) would many of us die, because the field energy has changed? Or you become another, what we call, "jack in the box" of the visitors. Think about the teaching of today. Understand it, apply it and you all reach transmutation. You have to go through these phases before the final phase of transmutation understanding exactly what you're doing. As Indians say, ?? half doctor is danger to life. If you do half of it you lose a Soul, so you cannot be damaging anything for yourself, but to understand the process. We go for a break and come back, and I hope you as Knowledge Seekers understood the essence of the teaching of today. (:51) (Plays a video about Christmas packs ...

>> BREAK >> (:59)) 620 KSW December 11, 2025 ...

Part 2

(1:00). K- Yes, thank you very much. That's, you have seen these, what we call, Christmas Packages. Very unusual for the Keshe Foundation. All the orders for this materials has completed. And in so many ways, there is no orders outstanding. But there are few odd pieces which are mass produced and they are there. And then, immediately after New Year, The Keshe

Foundation has done a series for Valentine, in the ??, we'll call it, ?? of Valentine, and for Easter. Those products are already produced. So, it's a limited, when they release it, and this time it's not the packages, it's individual items, as it's sold, it will not be there. But again, it carries all essences of, and what we try to apply. There is one thing that we have explained before, I put this out last week, slightly in this week. Those of you who bought UBESUS, you received the first half in the conferences or some of you received part of it. The second part is released or the most advanced part of the, what we call, UBESUS, which is the new version, is released.

(1:02) It's going to be delivered and step by step. It's a very complicated system. And the first 5 will leave hopefully before Christmas. And the balance will go into next year and you will receive it. Please understand, these will be invoiced and you have to clear customs with it. It's part of the structure. You can use this with the initial systems we gave you. And or use this on their own. It's very, very advanced, in what we call the UBESUS. And, they are not, if the packaging might look, something you've seen before, but internally they are extremely advanced. And, they should be with it, coming up, two pieces, hopefully, that you can position anywhere in the body, for whatever purpose you want. So, please be ready, you have to clear Customs, these ones is delivered to you, and you are subject to all the, what we call, dimensions of the, what we call the, importing goods

at the prices you paid you, whatever Duty they ask you to pay, whatever, is with you. We have to put it through the customs, because last time we gave it to you, in the conferences, this time has to be registered as the goods has left, we should have taken, what you call it, as we said in our agreement with you, any update in technology which applies to it, will come, and after two years, this is an upgrade version, and needs to be delivered. So, please be prepared, those of you who bought the UBESUS,

(1:04) for the delivery of these systems, you get a call from the tax, and you have to complete it, and the rest of it to be accepted. Otherwise it'll be sent back to us and they're no use to us, because it's locked into the system for you. Is there any questions? We try to answer. Q: ... What is the difference between feeling and emotions? And is the emotion, is it the emotion that makes the feeling? Or is it the feeling that makes the emotion? So can you clarify? K- This is, in a way, they are both the same. But, if you go to the English language as emotion, it means something which created from in reaction to movement of something. This is what we look at it as an English language. But emotion, what happens physically to you, creates a feeling. And that sometime feeling, creates the emotion, that is in a way the creator of the other.

(1:06) A feeling is connected with the dimension of physical life, and emotion is dimension of Energy side. You have to feel the cold, you have to feel the touch, you have to feel the energies of hate. Or do we feel

the emotion of hate? Do we feel the emotion of the being in danger? And does being in danger creates the emotion of being unsafe? So we have to understand which comes from which dimension (?? direction) and how at that point they are connected. We create emotion with the Soul which has no dimension to physicality. It's connected to the other dimension of Soul of a lower order. So, a feeling, because we feel it, we don't feel a touch with our Soul. It has the dimension of physicality and the emotion to it, that, that in a way energy leads to response of the what we call the total physicality in that dimension. A few years ago, quite a few years ago, I met a young girl in her early 20s, mid 20s. She had cancer of thyroid. They did the normal procedure for the cancer. (1:08) And she was very much dependent on taking tablets to go to sleep and not to fall asleep for a long time. So her life is controlled by tablets, how much she sleeps. This girl sat across me and I asked simply a direct, if those of you been with me know me, I don't beat about the bush when I want to know something. I said, you're young and this cancer cannot be at your age. Have you been raped? And you could not defend yourself. She burst into tears, she said, "How do you know?" I said, "You have created emotion because you could not shout, you could not make a noise, you could not do anything. You blame yourself for that." So this physical act of feeling being raped has brought the emotion of death, ?? not failing. It was on one of the campuses in the United States, which is supposed

to be the most place you can ever educate yourself. And I sat in front of her and I explained the emotion that this is not your fault. It's nothing you can do because the guy put the hands on her throat. Twelve o'clock at night she was going from one hall of residence to another. And she was targeted by the students. As you know in America is very common. Killing and raping is a backbone of the education system of United States. And it took me about a week, and a continuous discussion.

(1:10) She would not finish her education, because she saw no purpose to be alive, no purpose to be, the emotion of living and the joy of becoming a doctor was not there anymore. She understood that the feeling of shame, not being, protecting herself, brought the emotion of everything else which goes with it. When she understood, she does not need to create that emotion of failure, and is nothing she could do with it, she went back to United States. She finished her degree, she became a doctor, psychologist, and now she practices. The strangest thing she practices, because she has felt this, she knows how failure and other thing comes. She's one of the elite doctors who handles only the top, top brokers in American stock market and top senior managements in American business. Anyone in the stock market and in high level Microsoft, or whoever hits the bottom, which many they do she's the last post. I was talking to her a few weeks ago and she said, do you know something, I learned a lot from you the difference between the

emotion and a feeling. I felt ashamed, but the emotion was mine to carry on. You taught me how to do it. Now a girl if we don't come and don't understand this in one,

(1:12) she would have been lost most probably with secondary cancer and the rest of it. 20 years down the line anybody hits the pot in the high pressure life in New York Stock Exchange top management of top companies in US end up on her desk. Because she knows what failure means, she knows how to guide them and knows what emotion creates. Then we have to understand this, what leads to what emotion or feeling we feel that creates an emotion how we can separate it but use it to our advantage, use it to understand our weakness and understand the process. And this is part of your understanding of yourself. What led to this emotion? And as an energy, feeling is an energy which we feel in respect to our physicality, creates the understanding of transfer at the level of the given emotion. And our body is geared up for these kind of emotions and how to judge, how to balance. We have a shine line just between the fold of a leg and a stomach. This is the line we have created, our body has created, that no one can cross. If a Man touches you at that point, you slap him in the face, because it did it created the wrong feeling and the emotion which came up with the slap.

(1:14) But you allow your husband, your boyfriend to cross it anytime you make love. Because we decide the same feeling what emotion it creates. We are in

charge of that emotion. And once we understand these little nitty-gritty's about dimension of the Soul, physicality and emotion, we can do a lot of things. We can ignore it, become numb to it, or we can, what you call, make the best of it, to what makes us to live, to be part of a society alive. And I can give you many, many examples like this, how we exchange feeling, ignore feeling, and with it don't create emotion, or but for some people we create that emotion, because we want to be human and still feel. I had experience sitting in front of a woman, who more or less became a prostitute, and she had a husband, truck driver at home. I asked her, "How do you make a difference?" She said, "When he touches me, it brings me joy, gives me a different feeling. The rest does nothing, physicality doesn't count, I have no emotion, no feeling." And so we have learned to categorize, we have learned to control emotion, we have learned how and where feelings create what emotion according to our secondary,

(1:16) what we call, standard. As we say in English, "What is good for the geese is not necessarily good for the gander." Because it could be gander has got nothing to do with the geese and he has a different dimension and emotion. We do this, we are aware of it. The feeling can change according to the level we set, then you have to understand how feelings are created, and then you have to understand how our emotions are created and where triggers what to the another what creates the emotion. So we are in

control of it but feel, Soul have no feeling, Soul react to emotion. It's physicality which creates that feeling and then emotions created from it. Does not need to be touch, sound, eye, everything gives a feeling that that creates the emotion, conversion of the matter to stay to energy. Any other questions? Q: ... Can you train a person to use the little tongue to direct transmutation in the moment when that person's about to have an epileptic fit? K- Don't do it, don't touch it, it's very, very delicate. You enter the world of Unknown, if you do not know what to do with it.

(1:18) And it's a lot of literature on this, and the one of the first things some of the doctors, specialists in epilepsy do with their patients. They ask them to open the mouth. They think what epilepsy has to do with the mouth. You see tingling, then you know it's initiated. If not, then you use to see how they do it. They create so much information that the body cannot handle. In a way the information comes from emotion. And those of the, some of actually those who get to this position of using the bit in the back of the tongue which tangles down, go to vomiting and convulsion. It's like you're putting a finger in your mouth. But that depends again when you observe them, is that to the extension of the emotion when you do it, or because you create so much energy that it has to be released in pulses through the gates of the brain, through the spinal cord, it creates like being in a, what you call, roller coaster. And then that comes through the neuro system through the front part of the body which is like a

normal vomiting and the convulsion we see. If you watch the convulsion then you see which way it comes and then you know. I observed many of these cases so I know exactly how what to look for and to create it. Some of it is fake and some of it comes from psychological pressure, to create it you don't need necessarily physicality to do it.

(1:20) Some people create it with fear and they build this fear up, and then they can't control it. By that time the energy in the brain, so much information is gathered, that it needs to go somewhere, brain cannot handle it. So we see sometimes in a brain stroke like this, or these people learn how to do it and then there is a gate. It's this gate in top of the brain where you connect to your brain and the spinal cord is like a valve. It has a capacity of let's say, one terabyte per second but the brain has produced 10 terabytes and there's no way to go because you haven't learned to divert that, and add that energy to your Soul in the central position which is a technique to do it, and then you can transmute because the energy goes, you now, the Soul expands beyond the physicality. That's how most of these gurus do these kind of things, because they direct into the dimension of Soul, it goes and they can fly, because then it creates positioning. But those who cannot do, they don't understand that part. Their brain has 10 terabytes, each pulse cannot be more than 1 terabyte, it opens up, release the energy. So the energy has no destination, so all the legs, all the part of the body shakes, because it got to

get rid of all this energy, closes, second one is charged for the second one, then you see ten shakes of the body. And watching the process of these people, tells you how much they're in control of. It comes usually through attention seeking at a very young age. Fathers who were abusive to the children and the child doesn't want to be...

(1:22) not sexually. It's verbally, or whatever. But the child is looking for attention. At the time when she is in that condition, the father can't abuse. So it becomes a way you cuddle, you kiss, you hold it, you cry it, and your subconscious are aware of the attention, you did that, I can do this, I still get my attention. Raising children and to, for them to get to a point, is an art, which are not taught. We teach our children in the schools, how to use condoms and contraceptives. We don't teach our children how to be parents and to be there. This is the biggest problem for men and then all these psychological problems comes back (on the back of). You're more inclined to teach about the matter of physics than the psychology of life that bring perfect parents for the future. Because our teachers are ignorant with themselves, how can you expect them to teach what they do not know? Q: ... Is there a correlation with the full moon and epileptic fit? K- There is a correlation between the Chips and Fish in England for you, and this. It was made up.

I know, I know, I think I explained to you, we had a case years ago in Belgium. The girl didn't want to have a relationship with her husband, so she created

fake epileptic attacks. Every time the guy wanted to come close, because she knew he was not faithful.

(1:24) Made up. In English you say, I have headache, you know, or I'm washing my hair. Some people create a fake epileptic. You have to watch these things, they are very, very careful things. It needs a physician (?? to recognize). We see epileptic attack. Why we studied this, you have to understand, it's not for medical or for you having .. The extension of the energy, as we spoke in the Space Technology of the past, where I was involved and then it was done by a professor in Washington University for NASA, introducing first Nano technologies for fields which enter the eye and the pilot, the astronauts see flash in their eyes (Flash of light when entering atmosphere). You have to understand, if you can see those flashes in the eye, there is massive amounts of Cosmic Ray energy which enters the brain, and creates exactly what I explained to you, 10 terabytes where the brain can handle one, leads to the epileptic attack with the astronaut. We had to study it. We can't put it (under) the blanket. So, we have to understand how it's done, the way it's done, how it can be handled. And if you understand how to teach a pilot, an astronaut, or future passengers of the Space, when you go to Space, you create a subconscious channel to feed the energy to central part, which is your Soul, you get no problem. But if you don't, you get a brain hemorrhage, you get an epilepsy, and the rest of it. We studied this in detail, and see the effect of the epilepsy on the

brain. The effect of epilepsy on energy, extra energy. And these things have to be understood.

(1:26) This is part of becoming a multinational Space program belongs to every nation. This is part of the structure. I'm doing a lot of ground work for your future generations to enjoy the safe Space position travel, even for your Soul. You have to be able to control the energies which you travel through, even in dimension of the Soul, because you have emotion, you're aware of it. And all these had to be studied. We didn't do it just for doing a testable, we need to understand how it's done. What's the reason. Now we see many, many, many, many Chinese, Russian, American, long stay in what we call, (Space) station. You don't see them in the front, in the back door after they disappear from that coming off the aircraft, the ?? . And they end up mentally demented because the energy absorption from Cosmic Rays to the brain is so huge. Behavioral change, body change. It's not just the brain, the cell, the heart, everything, the strength of the change in emotion in the brain, all changes. You are a soft target with a good dimension of the plasma, we call the brain, now you get hit ... If we see so many flashes in the eye of the astronauts, which we know that, how much and what other higher energy gets absorbed by the brain and he has to handle it. The Agencies don't want to handle, we handle because we have to, Man is busy with, maybe it .. rays of the Sun, we are busy with the rays of the Universe.

(1:28) And Man is a soft target for this. Any other question? Q: ... Is it the same when you have a seizure? My first was four years ago and I remember looking down from the ceiling at my body shaking on the floor. This only happened the first, first one. K- Again, you have to understand how the seizure was done. What was the purpose, what caused it? Emotional, physical, long-term physical that you tap it and top it, till it comes, yes. And then you go to a position of body there but the Soul moves and but I'm not going without it so I just watch it till it comes back and I go back to the cage again. Many. I know many Knowledge Seekers who do this. I know how it's done because I used to do it when I was eight, nine years, ten years old I became a very good flyer. I became an expert and I didn't need I just go. Mom I'm going to bed are you asleep? Yes. Just go to different rooms in the house, go different high and low. And you teach yourself, you train yourself. Sometimes you come and pinch the body if it's there, it's mine. But what is he doing there? I don't know. But I can go somewhere else, do something else. I have done that when I was very young.

(1:30) Any other question? Q: ... Mr. Keshe, but there's emotions of the physicality, where does it fit, if emotions is attributed to energy and feelings to physicality? K- Physicality is to feel it, is still again in emotion, it has a magnetic field, in ?? motion which creates that physicality, that feeling. The problem with you Knowledge Seekers is that you continuously

made the pigeon holes and it has to be in that pigeon hole. Yes, it has a pigeon hole but it has no wall in between. And if you understand that, open your eyes to the process of the Creation, there is no restriction, there is no limitation, there is no cage. If you can cage the sun, you can cage the STM. It's the Soul which has decided to give itself physical manifestation. I sit here and I do and I watch. Any other question? Q: ... Hello Mr. Keshe. Carl here in Central Victoria, Australia. K- We love you out in Australia, accent. How are the kangaroos there? K- I'm standing on my balcony looking out at the sunset. I can't see any at the moment, but often there's 20 odd on our property hopping through.

(1:32) We've had an echidna circling our house the last few days, so that's been a new perspective. K- What? Q: An echidna. They're like a porcupine, but an Australian marsupial. So my question relates to the epilepsy topic. There's a concept called non-epileptic fits under a functional neurological disorder. It's one of the new kind of hidden illnesses that seems to have evolved over the last decade or so. I'm just wondering whether you knew of anything there. It's electrical activity, but it's non-damaging to the brain, these types of seizures. K- I don't know anything about it, but that is quite possible. Don't know, but we've seen this. There's a lot of activities in the brain. There are a lot of things in the world of medicine that are created due to new medicine, or are created with the new contaminations. So these create new conditions we

had no name for. Now they try to name it. We see a lot of pain, a lot of strokes with contamination with aluminum, which the doctors go there says, oh, I have the test of blood and the test of brain, but when you go deep into it, I had to do this very recently to understand where the case and I just asked a simple question.

(1:34) And it answered the whole thing and the whole process, the doctors stopped because there was no. Nobody ever asked this question and usually when you ask a question because we look at things in a different way, I asked a simple question. I said, "What did you do at work?" I did this, this, this, this. I said, "Did you do anything else as a hobby?" "Oh yes, at the office, in the work, we had to use chemicals like killing funguses and I was one of the team of three or four people and I did it for 20 years." I said, can I have the list of what you were spraying? Yes. Got the list, aluminum. Question answered. Creating high level of metals, headaches, shortage, convulsion, aluminum contamination. But a lot of it started with just like epileptic, like not being able to walk, couldn't go up the stairs, like a small seizures, and we are all now are touched by these contaminations. And yes, it's quite possible, but depends when these energies concentrate, increase and go. You're a pilot. Have you ever thought how much energy you absorb in that cockpit at high altitude?

(1:36) Have you ever sat and considered how much comes in? I'm a passenger, I fly 10 hours a year,

that's it. A pilot sits there so many hours all the time, it is worse than being an astronaut. What energies we get absorbed? They don't land across because of the high sun flares and high energies. They still up there flying. Day in day out. And what other things happens if you absorb these energies? Nothing. It creates internal energy and your body has learned to absorb it. Your body has learned somewhere to connect it to. We have to look at the way we structure our lives and what is involved in our environment we are sitting. Quite possible. You don't see but there are signs of high energies because what we do. Q: I love that you're working on microplastics, that's a new environmental factor. I don't know if I've heard you talk much about Wi-Fi and the electromagnetic spectrum, what's happening up there? K- Watch the space. We have developed a technology (T) through Cosmic Rays (CR) which we don't need Wi-Fi. This technology is very, very interesting,

(1:38) where we use two Cosmic Rays because we produce condition of Cosmic Rays in our systems. WiFi don't exist. And these are in the plasmatic condition, so they don't interact, they're part of its own spectrum. You can pick up emotions from them, you can pick up technology from them, but what you need to take. It is not forced in by conversion of matter state. It's different way of communication. And this is part of the system. We connect as part of the system. You connect, it is part when you receive these, what you call, ONN's, are going to be part of. No damage to

the users, no interaction with the physical body, but you can take energy what you need from it. So you have a headache we continuously deliver what I call, the plasma aspirin or paracetamol and your body needs it, it takes it. Very recently we had a case. There's a new kind of flu which is affecting many, many people and high temperature, very, very high temperature, and just using the new technology within three hours no sign of temperature.

(1:40) And the doctors even in the airport tested the child shows every symptoms of the latest type of flu, but no temperature, nothing else. We have managed and I'm sure from the ?? of the Keshe Foundation ?? in 2026 you can get this for the first time we will release virus liquids for any viruses. It's developed, it's getting tested in different ways, so you take antibiotic for the headache. We introduce a new concept of medicine into the world of medicine with licensing of what we call, a specific technology which we have developed. As the guy said, "Do you know how many absences you are going to finish with this?" We just give them this, say, "Go to work." It's very advanced, it's extremely effective. So, we can download this down your ONN Units, these computer systems, through the communication. So, Wi-Fi for us is already dead, because systems are already working. But the beauty with these systems is that they create their own energy, their own power. They don't need to be powered from outside. So, you never go back into the matter state that it infects you, like the radars and the

(cell phone) Masts and everything else. Your body takes what it needs from the fields.

(1:42) Q: Well, I'll be looking forward to that one. It was about a month after we got Starlink, that my daughter started these non-epileptic seizures. So, yeah, it's been a grim year really, but... K- What do you see with it? Q: When she's about to have a seizure, she starts to almost talk like a drunk, and she gets sort of wobbly, and she pass, sort of passes out into the seizure, wriggles on the floor, and then wakes up 30 seconds later, and starts laughing. K- Make an appointment with the Wellness site immediately. Q: I wish I could, but my family are not, I can't get them on the Keshe train, I'm sorry. K- Okay, no problem. No problem, but it can be done. I'll explain to you. Doesn't matter, you can do it at home yourself. Yeah, but now I understand what you're talking about. Q: A last question, how are you going with Lithium? K- Why Lithium? Q: Well, just having the plasma near Lithium has caused some issues for a number of Knowledge Seekers including myself and I just wonder if you've got any closer to understanding why that might be the case. Lithium batteries. K- Explain. Q: I bought a Ford (Toyota) Prius and left a Health Pen in the car that I'd made myself. I prefer to call them Health Pens rather than Pain Pens by the way. Stay positive. But it didn't really seem to be having an effect on other people so I didn't think there was much to it.

(1:44) But six months later the batteries stopped working and it had an error message that none of the

best Prius experts could figure out where that error message was from. So the car was a (tax) write-off. K- I've heard that before. Q: I know you have. K- Never heard that ... There is a test done, I think it's by Germany, and I can't remember exactly where, but shows that the electromagnetic field inside the new electric cars is so high, that I think it's safer to sit in the microwave, was the program talking about, than actually sitting in electric cars. Q: Yes, effects on the red corpuscles in the blood I've heard, I've read the same thing. K- Yeah, but is it preventable? Can we block it? And it's a lot of other things needs to be understood. It's like that in England, I think it is. If you get the electric car fire, they don't touch it, they just... even the fire brigade doesn't go near it, say leave it to burn, it goes out, because it's so poisonous. This is a policy by the... I think by the fire brigade, I think it's England, if I'm correct, I can't recall exactly.

(1:46) But the buses and the cars which go off the smoke, and they have Lithium batteries, they don't even bother to say or do anything with it. It's so toxic. Q: How is your fire protection R&D going? We're here in the Australian bush and it costs four thousand dollars a year to insure a house, so of course I can't afford that insurance and I'm living on the edge as summer kicks into gear here. K- There are certain ways you can do this. We've done a lot of work on this because we had a Knowledge Seekers in US years ago who wanted to use the technology for stopping the fires. We stopped, I remember why we stopped

the research. But there is a way you can create condition of CO₂ or absorption of the oxygen into Carbon. It doesn't need a liquid Gases or anything, it just needs the creation of condition. And it can be done, but we left our research a few years ago. Maybe, maybe we can bring it back into another research structure next year or two. But it can do a condition creating continuous Carbon as a plasma. And that in the condition of the fire will absorb the Oxygen which becomes like a live CO₂, stagnating it. Nothing for now.

(1:48) It's about 2, 3, 4 years ago we stopped this research. Can't remember the reason. Q: Last, last question. Last week you answered a question, I think, from Paulo and it was about the future of cities and I work in affordable housing and today it was revealed that there's not one capital city. There were 96 major cities that were studied around the world and not one of them has affordable housing anymore as the median price is not affordable and I just wondered if you could build on some of these cities of the future you're talking about. Because my big concern is that when there's all these technological advances that save people money that it will capitalize into the price of land and lead to another huge land boom? K- Not really at the moment. We are very much concentrated on three or four fields in past two years, three years, and we have to complete those. And maybe in 2026 we open new angles into research, but we are bringing the experts do it than anything else. .. As I

said, we used to put everything on the pan, or people who were around us were putting it on a pan to be there. We found out the less we talked, the more research and development we can do. So you don't hear us doing anything, a few bits here and there. And we bring people in to do the communication research, but it is what needs to be done.

(1:52) We take the data and we carry on with the work in another angle and direction with the whole process. This is how it's become nowadays. We have too many people sticking their nose in our job. So, as I said to a guy, we want people only so, our failure, they think we don't do anything, but underneath we do more research than actually we were doing 2, 3 or 5 years ago. But nobody needs to know. If you know our failure, that's good to tell, oh they can't do anything, but you don't see the success and what we are achieving underneath in the different direction. Talking about this, I explained this last week or the week before. If you have developed a technology, with our technology, with the ?? technology, or something with a combination of our technology with others, and you can... you see it, we see if it works, if it is there. We are prepared to bring it in, develop it and market it. And we still leave you in charge of it, because you understood, you came with the thoughts and... The structure offers you partnership, that your technology become part of your success. But if you see we can use it in the other parts of the technology for the Foundation, we still are interested to. We don't want

you to take technology and just walk away, we want you to be part of it, because you understood it, it will develop. And, as understood in the research centers, there are no doors closed. Everything is open for everybody who is in research to see what is going on, what they need to develop. And what the others are doing that it could be beneficial to. So, if you run Keshe Foundation websites around the world, and you have your own website,

(1:52) you want to join the Keshe Foundation as part of a bigger structure, much more variety of products, that all takes from one center, then write to us. We prefer if you have developed something next to your system, which is interesting to us. Or if you just have a workshop, or you have a website, or you have a shop, you can sell it, or you're selling products, you make it yourself, become a reseller for Keshe Foundation worldwide, in China or outside China. And you can take a lot of advantages on it. Your... if you sell 10 items, maybe 1% of people who go to Keshe Foundation website from your side are there. So you have 99% clients or customers which are totally yours. Instead of having 10-20 items and you get, you know, limited income, we can give you a spectrum of to a huge number of products that you directly work within the structure of the Keshe Foundation, you take from the producers through the Keshe Foundation, and you increase your portfolio. But to get that, you have to make an agreement with the Keshe Foundation and your website becomes part of our structure, but you

run it. You can increase your income tenfold, twenty fold. We're not interested in that part, but if you have a product you develop and you sell it with license and certification, we are interested to talk with you in partnership. Number of groups we talk to, if you are joining us in the past few weeks. And if we see you have other talents which can be used inside, we always discuss it. So, instead of you selling 5 or 10 items, whatever you see on the Keshe Foundation website,

(1:54) plus all the associates of the companies which become, there you can put on your website, instead of selling 10 items, and half of it you sell out of God knows whatever, you have a thousand items. And your customers, very few, might ever come to Keshe Foundation or go to the others. So, consider it, we have many people who like to become resellers. But if you are a... you want to become reseller, but you produce a product, which is unique, and has a scientific understanding, not that it have to be Gans technology only, it could be a mix of Gans technology

with the others. We are interested to bring you in as other partnership. But you run it, we keep an eye on it, only develop it in a bigger way. Any other question? Oh yeah, write that info@keshe.foundation. If you're just making Gans's at home and selling, but you don't have a website, you can still talk to us, but we don't know how to set that up, because if you have a company. It's very easy for us to take shares and monitor and everything else. You used to resell a

program of the Keshe Foundation, you have to write it in the criteria, and you have to agree, you sign documents and... and Keshe Foundation website products becomes your product, in your website. We have no problem with it. Any other question? << Knowledge Seeker raise the hand by mistake. >>

(1:56) Q: ... Yes, a couple of things relating to seizures. When they happen during sleep, is that also something that has something to do with manipulation? K- It's usually when you produce too much energy. Q: Right, but you were saying that people intentionally or do this? Some they do, some yes. Some yes. Q: And if it happens during sleep? Is that? K- It's unintentional. It happens, yeah, because you can create a lot of energy in your dream. Because it's what we call action of your Soul with the physicality. It can happen.

(1:58) Q: And second thing is metals causing this type of thing. When my dog first started having seizures, I talked to all kinds of alternative health people. And the first thing some of them said was he recently vaccinated? Because the vaccines contain all these heavy metals. K- Could be. Quite possible. Could be. But that has to be done by the scientific world. Q: Right. Because these, they call it idiopathic seizures and they blame it on heredity. But I think that if you have these pets and they get repeatedly vaccinated, for no good reason, then that could be a big problem. And then over a period of time during their life, there comes a point at which it's too much. K- Most

probably yes, but you got to understand that how they mix, and how they base it back, or they call it in world of medicine, they create a ?? back end structure, which is supposed to be to hold everything together, but that ?? back end structure is a poison to the brain. We've seen that in the reports in the American Senate, regarding the children. Q: ... Yeah, and so what we ended up doing is just doing ?? tiger tests to prove that the animal was still immune, because why, why add more when they're already immune. K- You make good money. That's all it is for. It's just them making more money. And this is what all of medicine is at the moment. Making more, more, more, more, more money.

(2:00) In a very short time, in 2026, towards the back end of 2026, we'll make a, hopefully, if everything goes okay, announcement about work of the Keshe Foundation on the Wellness section, not on the Health section. And then, you can use our Knowledge Seekers, people around the world can use it. It's connection, hopefully, if it goes to the hospital, that service goes from doctors in the hospitals, but Keshe Foundation technology used directly. We'll inform you when it comes to it. It's a process which is just on the table and it's getting talked, to get sorted. But we'll let you know. K- ... Shall we call it a day? R: Sure, if you like, yes. K- Yes, no more questions? R: Well, there's a number of questions in our Q&A, as usual. K- Let us read a couple of them and call it a today. Q: ... Mr. Keshe, the last day we were in the classroom in

London, in the last few minutes with you, I came up to you and asked about my ?? clinodactyly pinky fingers. I couldn't bring my hand together because of this. I asked what you thought, I was hoping you would give me an answer on why they are like this. You told me to speak to Dr Kern, about how we could fix this.

(2:02) Would this affect my ability to use this technique for transmutation? And why would I be born with this condition? Is it emotional? K- Speak to Dr. Kern, make a time. info@keshe.foundation. Q: ... Gerhard had wondered if there was any Soul pictures from the Saturday, Mitra's birthday meeting. K- I got there the last minute as Rick was saying goodbye. I think you need to ask Rick. We were monitoring. I can't remember the outcome. Those of us who are sitting in the background, did you make anything of the Mitra's day on Saturday? Because I know they were on time. See that, send me that, then we'll see. R: It's actually a very, very good turnout, there was at one point, and a hundred and seven people had shown up, and as Gerhard says, "This was so heartfelt, difficult to describe." A lot of people were moved by the... A lot of it was the reading of the words of Mr. Keshe, regarding Mitra, and Mitra's Daughter. And we were supposed to have a 10 minutes of silence at the end of the program. It was only a hour, hour and a half long.

(2:04) The 10 minutes went to 15 and then the 20 minutes, and I'm wondering whether I should, should shut off the program. Went up to a full half hour of

silence at the end of the show, before I was... I made the announcement and I was all ready to shut down within a few seconds, literally. And Mr. Keshe popped in and delivered a statement and that was quite nice. Thank you Mr. Keshe. K- It must... You lot must have had a fantastic time. I just received the pictures (graphs) of the birth of Mitra. And those of you who are familiar with our work, you will understand what this means. Let me just ask you. Just wait. Okay. We can share this video with the 100% correctness. You've seen many a time, what we call, these graphs with us. I have to go... you might hear a little bit of... but just wait please. I have to go here, go back. Okay, this is the what you had with the Soul of Mitra.

(2:06) Now the question is, was she there, the Daughter of Mitra? This is the answer to those of you who were there. And I share it with you, and I give you an insight to what you've done. This is from a live video of that session. I've never seen it, I've just seen it now in this. Have a look. Just have a look. Usually with these systems, with these graphs, we get like this and we come into the physical side. Interesting, very interesting. You lot must have a lot of fun that day. This is the graph. This is the physicality, the STP and the Soul. You lot had a direct line of connection with a Soul side of the physicality. This is the graph. This is the physicality, the STP and the Soul. You lot had a direct line of connection with a Soul side. Very amazing. Never seen this before.

(2:08) And you see that dot next to it, that you can see it. She (Daughter of Mitra) must have been with you. And I hope you enjoyed the trip. What is interesting is you see on the physical side a lot of activities, but on the Soul side you see very direct line. Far, as far as distance from the line of the Soul to the physicality is. The dimension of the energy on the further back it goes on the right side. So you ?? connected and you see this interesting point is this here. Any other question? Q: ... Hello, hello everybody. Thank you very much for fitting us all these things. I have a question about when you said there is an ash and the Soul goes from it and goes to that window where there are all these vapors and he finds the place where it should be.

(2:10) And so when you talk about ash and then we learn about how to create that with their hands for transmutation and do this system of the Soul going to that wall of vapors is regarding the body without Soul? Or can we do... K- That was an example, that's a description example of how you can imagine it to be. But I presume if you become good at it, you can choose the window, if you call it that way. If you become good at transmutation, you can choose exactly where you want to be. Needs a lot of work, needs a lot of, lot of work, to understand to do. Q: So it's not just the body which is dead, which is ash, but the life body also can... K- You get time, you get time, then you're a good reader. Read this in the original language. It gives you a lot of insight. Q: Yes, thank

you very much. K- Thank you very much. Q: The thing is, what's the... I mean, I like to love to transmute. What's the purpose? Why should I leave here? I have a lot of things to do. K- Nobody said go anywhere.

Would you like, let me put it this way,

(2:12) would you like to get in a car, sit in a car for about, God knows, one, two hours, some was more, some was less, to go to an airport, to fly for another, oh, two hours again, minimum, in the airport, till you get your plane, fly another 10 hours, and then, God knows if nothing hits it, there's no birds, the engine doesn't fall apart, let's say you arrive safe, which a lot of us do, and then again, another one or two hours, picking up your luggage, going through the customs, and then getting a taxi or a car back home. 14 hours flight, let's say, travel. What do I do if I do in 14 seconds? That's the difference. Q: But that is a lot of knowledge. K- Yeah, it's what you prefer. And how you prefer. How you would like to do it and what's your fear. It's very, very... I don't know if I explained to you something. It happened to me in my business life. I think I've said it years ago. I used to work in Armati. I had a beautiful office. I used to work out of Kazakhstan for years. Those who are in power, they said to me, "Can you go to this district? We would like you to go there and do the negotiation with the governor." And they appointed a guy to take us there. We usually fly everywhere. This guy said there is no flight, we have to go by train.

(2:14) We go by train. There was an entourage of a cook, a chef, bodyguards, waiters, and four or five of us, I don't know how many of us were on that train, just to go to this district. I had a most beautiful sleep at night on the train. I thought I'll never go to sleep on the Russian train. We arrived. We started in the evening. We arrived next day in the morning. We went to the office and when finished, I said to our office manager to do this trip. I'm not going back on the train. There must be a plane. He said, "Yeah, there is a plane." I said, "If there's a plane, why did you bring us here on this commotion?" "Oh, the guy appointed by the President to bring you here, he's scared of flying. And he organized you to come by train because he doesn't want to fly." I said, "Get me to the airport." I called the head office, we call it, the Presidential ??, I said, "I'm coming back with a plane." I said, "There's one flight, very soon, we get you on it." I watched 3 or 4 people being dragged out of the plane, literally, on the back door, if you've been in Russian planes. And we got in, they got the guy, absolutely drunk out of his head, to get him on the plane, because he had to be back with us. So we took a drunken Man back, Because he had a fear of flight. And when we got back to Armati, he couldn't even remember he's been on a flight. The fear is the problem.

(2:16) The fear of what happens, we are up there and something happens. It's our fear which is holding us back from everything. It's good to be having a little bit of fear, but if it gets a phobia, then you are in a

problem. I remember, I walked into the office of the top guys and I said, "Next time, you send me somewhere to do the work for you, I decide. I don't want any of your people." And that became the norm, because we are not afraid of anything. And this is how fear is your biggest problem, otherwise you all can transmute. As I said, you can do it in 14 seconds what you do in 14 hours. Fear of what's going to happen.

Q: Yeah, but I don't have trust on myself to go somewhere not coming back. ... K- Ah! ... The problem with you is you got a beautiful husband, that's why. That's the problem. I think you love him too much to leave him behind, and that's the fear. No, it's just the fear. It is just the fear we have. The scale... Q: I think we should little by little maybe, step by step to get confidence. K- If we were taught from the childhood, it becomes second nature.

(2:18) Because we are not that, we can't do. We have that fear in the back of our head. That's the fear they put in us. Death is the ultimate and when you die everything is finished. And none of us want to be in that position. Q: Yes, thank you. Well, I don't fear death. Because I always say people, if you do good, think good, talk good. If you do service and good wish and things like that, so you will have a better life after that. So, it's really not something fearful for me. To go ahead... K- You see, the fear has changed many things in the history. Fear of a lot of things. And fear... and we see that fear in the history of our religious books. And it's changed. We see the fear of Pharaoh.

And end up with Moses. The fear of Darius and Kourosh, the father of them. Of a man will take over his empire. He sent his own grandson to be killed. When you read the history of Iran. And the grandson became to overtake the grandfather and we see the, the ?? finish with the ??, and we have the ?? ... and the rest of it. Then the fear has changed history.

(2:20) But again, you read about Darius and Kourosh and their grandfather and the rest of it, but we see the same repeats suddenly appears in Jewish books, in a way explaining fear. So I always questioned. We have a kingdom and you have the same thing in different narrative, same as Darius, Kourosh, as Moses, was any of the two real? But on the, on the Iranian side you have historical tablets, and Jewish side is just all made up history. The same as Christianity was made up. If you read the story of the grandfather, the last king of ?? of Iran, you read the story of ... Moses, same. And both explain fear of loss, fear of power, fear of life. One got all the male killed and no, and the child ends up in a basket. In the Iranian side, the king gives his grandson to be killed, is given to a shepherd of the palace and is brought up and then he becomes the king, what we know as ?? Ahmadinejad, the beginning of a justice, and the Jewish side becomes a destiny of murders. It's the same.

(2:22) None of the religious histories are true. Any of the three, Christianity, Judaism, or Islam, it's just tampered to fit. If you ask, read. In those days people used to travel between Palestine and Iran and the rest

of it. So when they wrote Jewish books, Torah, they just changed and tampered the way it fits, because it fit. It's the same as in next week is Mitra's birthday, 21st of December, my life at all ?? time. Then we see the same thing with Jesus, virgin mother like Mitra and the rest of it. Mitra was a virgin mother because the father was the Creator and the womb of the Universe created her, and it's just adjustment. I don't believe any part of the history of the Moses ever existed. Because it's too parallel, too close to historical papers we have from ?? Akkadian. Just change of names and change of narrative. Because we have tablets, we have nothing from Moses time. Bunch of lies and cheats, and fear. Where Kourosh and Daryus, even when they got the Babylon, he made sure the wife is kept safe, that the king came to submit, he said, "It's yours, not mine." And then they read Moses and they, what you call, the history of Torah,

(2:24) it is all killing and fears, because that was only so, kind of, down the same blood line of acceptance, not ?? blood line of being part of, with Palestine. We know most of the Islamic, what you call it, what is put on, is rewritten, (in the) 2nd, 3rd century by Jews, and it's become, as they found the place, they wrote the place according, so it's accepted by the ?? place. We know it will not be... In Iran we are the only nation, which we have two ?? two ways to pray, one the original, where Muhammad is, in Jerusalem. And made up one by the Jews, which goes into, what you call it, other place (Mecca). Why do you need two

sites? And then you see a lot of things, it's out of fear. Jews couldn't handle, there were too many Muslims, out of fear of their own demise, they created a book for it. The true Muslim still prays towards Jerusalem.

Q: Yes, of course, fear of religion or what they give us culturally as religion and taboos and all that is one of the things which is hindering us from reaching the absolute power. And also what I'm fearful, if you can say fear, is my own, which calls STP, my own, these emotions which I say something and then I regret. That's what I'm fearful. That's what my goal is, to take care of it so that I can achieve the true power.

(2:26) K- You know, I believe, I live deeply by Zoroastrianism, by Mithraism, in the school of thoughts. Maybe because it was the way I was brought up. As I said maybe before, in the world of Zoroastrian or Mithra, there is no punishment. Because what you've done wrong, you have to carry on your own back. So, the only fear is you watching not to do wrong. There is no hell, there is no heaven, there is no punishment. Read, read the beautiful books of Avesta. And these fear came with religions because they wanted to control you. The ?? jan , mahesh, and the rest of it, the heaven and the hell, and the paradise and the rest of it. And that fear of brought to us from childhood becomes part of us attachment of physicality which you cannot transmute. If you know you're responsible for what you do, and you don't... You don't leave it, some other date to be sorted, you carry it. It's written in our (?? Avesta) ... it's in the Zoroastrian books. You

can never wash your crimes off. You carry it on your back and it has to become a lesson. And this is why Zoroastrians are very serene, they are very calculative, how they talk, what they do. Seeing as a Zoroaster losing temper, is just seeing God having a heart attack, as sometimes we used to say.

(2:28) Because they know that anger can do something that they cannot wipe out, they got to carry it with them. And then, in the other religion, they create a fear of punishment, so you always have that fear, but it shouldn't be a fear. Q: Thank you very much for your teachings, very enriching, very eye-opening. And I thank you very, very much, sir. God bless you. K- Any other question? R: ... Claudia had a question, whether you had more information about the Comet 3I Atlas and the 19th of December. But before you answer that, I had a question for Grock. Is it true that the Comet 3I Atlas will be in the same sky position late in December, like December 19th, 2025, as the star Bethlehem was 2,000 plus years ago? So I was figuring, well if the star Bethlehem signified the birth of Christ, perhaps this comet in the sky would signify the birth of Mitra. And... K- It appears on the 19th, huh? R: So, Grok thought for two full minutes on it and assessed it all out and it says, "Yes, the claim appears to be true based on available astronomical data and historical interpretations of the star Bethlehem.

(2:30) The comet 3I - Atlas will reach its closest approach to Earth on December 19th and on that date

the comet will be positioned in the constellation Leo, visible in the pre-dawn eastern sky and located near the bright star Regulus, which is Alpha Leonis, the heart of the lion. And it turns out that one of the leading astronomical theories for the star Bethlehem it's also in appearing in the constellation Leo near Regulus. Regulus symbolized kingship in ancient astrology. And for that time in star Bethlehem it's thought that it was a conjunction of Jupiter and Venus that came together and appeared as a single bright star. So just sort of by chance it seems that this is 2,000 years later that this we may even see it visibly in the sky as far as the 3I - Atlas goes but it's in light from that constellation. K- By chance, it's near 21st of December, the birth of Mitra. By chance. On the 20th, with the day 1 gap whatever, is the night of 21st, is the birth of Mitra, the longest night. Coincidentally and coincidentally and coincidentally, many coincidentalities. We'll have to wait and see what comes. The social media of World News is not much about 3I and social media is specialized for people working around this thing.

(2:32) They are full of hypes about 19th. And we shall see what are the outcomes. And how we'll see the effect in next 10 to 20 years, than just immediate. And we'll see. There's a lot to wait and see. But in so many ways, we see (in 3I) a biological intelligent structure, which protects, defends and reacts and responds. The latest test by different organizations in the bandwidth of emotional return of it, it's very clear there is more to

it than just a piece of rock. Let us see next Saturday, Sunday. And see how the humanity changes 20, 30 years later. Shall we call it a day? See you next week, hopefully. And we'll see what else we can add to the knowledge of the Man and learn from the Man. Thank you very much and goodbye. R: ... Before we go,

(2:34) I'd like to just read the little statement from the Universal Council... "We the Universal Council invite the Keshe and Universal family present at the Earth, to unifying at the Soul level, every time, every day, at 9 PM Central European Time, and every 3 hours, to give through our Souls to all Souls in existence. To elevate in the level of understanding the Ethos of Mitra, Universal Love. Living life as a Peaceful Being, respecting all life and living equal."
