# 489th Knowledge Seekers Workshop June 8, 2023

Note: Transcription has not been checked by KF. Transcription by KF Brazil. Proofing done. (Auto transcription by Elias)

## Table of Contents

**Part I: Teaching.....2**

**Part II: Announcements.....21**

**Part III: Q&A.....21**

# Part I: Teaching

(:10). K- Yes, good morning, good day to you as usual. Whenever, and wherever you listen to this series of Knowledge Seekers, programs from Keshe Foundation Spaceship Institute knowledge sharing. We welcome you back, as usual. And it is interesting to see how the story of the KF and its work and embracing a larger and larger structure of science technology (T) and space.

(:12). We see with us in the past few months in the sessions of meeting with the Creator and we had so much success and so much understanding and development with these systems and with the sharing of your time with us, that we have reached a point with our doctors and scientists in the background, that this week KF has launched very interesting international what we call, collaboration with the wellness centers and we in conjunction with the doctors, have launched a very unusual meeting with the Soul of the Creator and the wellness of the Man himself. This program is unusual as before we had one sessions for one Friday. This sessions which is now promoted on the KF as a wellness, is for anyone who can join on a 3 week session which is 7th, 14th, and 21st of July and the conclusion week on the 28th of July. Where we run a 3 hour session and each section. This is part of the background of the programs we announced months ago where we can reach anyone at any point, any destination, for anything that they wish. Would it be addiction, would it be

food, would it be any wellness conditions that they have.

(:14) And we think this will open a new dimension (D) in what we call 'Wellness of the Man'. You have psychological problem, you have a physical problem, it could be you have a tooth pain, and you have knee pain, or whatever, and you want to see how you can get better, how wellness comes. We are not in a medical world, we are in the understanding of how we can communicate and transfer new technologies, which has come into operation as of next week more or less, in the process of reaching everything people need at the same time. This is a mass trial, hundreds of people, and we have launched this. And we think this will be one of the pre-requisites and part of the Space Technology development. Where we can reach Man at any point. He can connect to systems at any point. And 3 hour duration is more than enough to complete the cycle. And then teach the body in the following weeks, to what we call, 'tune itself to it'. We want to know how much we can reach and how far we can reach. Somebody called me and I... "Can you do help me with this?" "Can you help me with that?" The only thing is, you need two sets of headphones. One on your head and one where you want the energy of your Soul to be transferred to. You might want a big muscle on one eye, or you want to have a condition, doctors tell you, it needs exercising this, (:16). or you have any condition else, where wellness, you put it on that point. And then, we run a massive operation in the background, for Keshe

Foundation, to reach you. You might like a water melon, you might like to fall in love. You... we want every combination. Somebody says, "Can I test it with my cancer?" We are not there on the medical side, but if this is your wish, you can try. It's a freedom of the... reaching the wellness of the man. I like to feel better in my life, can we reach you emotionally. And you know where your emotion comes from. So, we have launched this, you can go on there, ... with the Keshe Foundation Sale, is the agent for this operation. They are not running it, they are appointed by the wellness centers, to distribute, what we call, the "Promotion Pack." And it's for 3 sessions, for 3 weeks, for 3 hours each. And it is something, a breakthrough we are looking for and we do. Do not forget that the Keshe Foundation now is involved in a massive project, with one of the leading Nations in the World. And whatever we do, now on, and we've done in past 10 years, will go into the operation of our signed agreement with the National Government. We have become an organization beyond imagination of many of Knowledge Seekers (KS). And that's what you wanted, to reach the knowledge, the technology to every man on this planet. And we have signed ourselves into it, with one of the leading nations on this planet. And we are working in that progress, that as our agreements come into flourishing, part by part, bit by bits, you'll become part of it.

(:18). We become part of One Nation government, in conjunction with another government, which is

a leading Nation, but the signed agreement is use of the technology for Peace. I signed this with the Iranian government in 2007, 2008, and now the new agreement signed with the government, it stipulates the technology on the basis of Keshe Foundation, "technology in exchange for Peace." So, whatever we do, on a larger scale now, You will understand in the coming months and weeks, who we signed with. Who is our major partner in the National and International operation. And these sessions we put on, will allow us in collaboration with the Space Technologies, Space Agencies, to put a new way to do, to be done. You, if you're in the International News arena and you can hear, part of the agreements of the Keshe Foundation in past couple of weeks has been announced by the Space Agencies internationally. But, beyond it, has been the discussions which we had, and now we see it appears a National Program, till the Keshe Foundation comes in and becomes Keshe Foundation and the Nation operation. We... we have come out of the cocoon of what we call, 'kept silence' by governments in Europe, and leading Nations in the World have backed the Keshe Foundation. And we'll see the results, you will see it. We're working, the Keshe Foundation team, working very hard in the background. Moving, bringing everything step by step, according to our agreements, step by step. National governments want to make sure everything is secure, everything is correct. And, for next year or so, two years, (:20). we'll be working on those levels step by step, working with the national scientists,

government scientists, proving. Many of you Knowledge Seekers will be called upon, to join, to be part of this new work. A number of Knowledge Seekers have already been approached, and going through the transition of becoming part of this Keshe Foundation One Nation operation, with the national government. Many of you will be called upon to join, according to your expertise, to bring in, as part of the 500 strong Keshe Foundation Knowledge Seekers team, which will become part of the national government operation. As we grow, as we develop, as we prove the technology step by step, through the officials, through the test, through the lab, through the scientists, then we go to the next step. It's a massive project we've taken on, and the first phases of the project has already been approved by the governments and a number of Keshe Foundation Knowledge Seekers have already started working on these projects. They know what they are doing and they know they are part of this new revolution and evolution in science. What we would like to understand in the July sessions is how we can feed the man in space, collectively. Colonization, for us, is not just to move somewhere and colonize, it's to be able to reach everything. We cannot grow all the tomatoes and potatoes in colonization, but we can reach you through the energies of the fields, that you are fed. We cannot have shuttles for "Expats," the way Americans fed Berlin, (:22). inside Berlin. We do that "airdrop" through communication lines, through new development of the technologies. And as we do this, when we

come to the space technology development, and as we announced by governments to colonization to start, in the coming years, then colonization becomes easy. What you've done in past few months with us, and what we do in July and forward, would allow us to jump that part of the technology, that we colonize, but we don't need to take ?? shuttles every week, every month, to feed few people on the Moon, or few people on the Mars. We feed hundreds. The colonization program, which now you hear in the background announcements of (one) the leading nations, will be feeding hundreds of people, not one or two scientists. This is not colonization. Then you understand how important this July session is for all of us. You participate in a large scale, multi-facet dimension projects of the Keshe Foundation, which will be implemented in a coming time in the space program. As we said, we come to you when we need help, we come to you when we share our joys, and we come to you when we share the technology. Many of you stopped the habit of the chocolates, when it was addiction. And many of you stopped other personal habits. It showed us, yes we can reach. Many of you showed us how pH can be raised through the technology. How we can make you happy. And now it's the face of multiple, multi-facet dimension. Which means, you could be hungry, you come for the food in that 3 hours, (:24). half an hour of it, another half an hour you want to reach a muscle, in another half an hour you had a headache, and you divide how you would spend that 3 hours. You send it to us, you

record it, "I wished, I wanted, and I received." And, "what I came in for." So it becomes a multi-structure understanding, covering different cultures, different nationalities, different religions, which you all have. And we see how emotion changes, in this 12 hour session. So, if you go to the Keshe Foundation website, and sign yourself to it, please understand the Keshe Foundation accounts in Holland is totally closed. Keshe Foundation, you used to send funds to Keshe Foundation in Holland. All that has closed now.

All

the payments has to go through the links, which is given, and go through the same. If you are making donations to Keshe Foundation, please wait till, we make a further announcement in, how it'll be set up and the way it's going to go. Coming to the teaching. We come to the point of understanding even what the Intro (video) was saying. In the last sessions where we asked you to look through what we call, the second screen (Curtain), second vision, where you close your eyes and you see and you look. And many of you might have tried but you see darkness, you see no light. Because you have to learn how to see the light. You have to learn how to look at the light.

(:26). As we said in the Intro, you take banana as a vitamin as a seed in your stomach, And it becomes that process of the (Gans) "Patch," where you send, put a Gans Patch on the front, with ratio of, let's say 1, and you put a bigger Gans patch with ratio of 3 at the back, where the, by the properties and the characteristics of the plasma, the larger

tries to feed the weaker, the stronger tries to cover the weaker, to bring it back into balance. This is the work of the Creation, always balance, and not to be better. I give for you to be equal to me. And in that process, as Knowledge Seekers, we transfer energy through the body. You take banana, and the banana creates the Gans, and then opens the transition of the vitamins, which is in the banana, to be absorbed from the environment. And we know that the environment exists, because we call it, aura of the body of the man. Aura of the body is not just the heat of the skin, it's all these energies, which banana and the others change. If you keep and looked at the aura pictures which is created, it changes by your food, it changes by your emotion. What you take, what you give. Now it's the same with your vision. You look, say, "I don't see anything. It's dark." The secret to it, is that you have to set the seed, in your emotion, in your Soul. And we tested this, as you heard in the Intro, (:28). in hundreds of you who came to Linz. Our doctors are testing this continuously with those of you who are in different processes with them. You sit the seed of, "I want to see my mother. I want to show love." And you create that seed, that love, not so strong that you overwhelm the love of the mother. You become that banana. That with it, you get the communication line with the Soul of the mother. This is the secret of using the second vision. You can have and you can deal with hundreds of people at the same time. One secret which mankind has not understood about the structure of his eye, is the color of his eye, the

shape of the eye. You have an eyeball and then you have a different color circle, which is the shape of the Universe, shape of a plasma. Why your colored part of the eye is round? There is a reason for it. It absorbs certain strength fields, in the dimension of the plasma. You see that color, the color of your eye, dictates the emotion you carry. (:30). Dictates even the color of your skin.

Dictates the color of your hair. Because it's not just a vision, it's not just for you to see, it's the line of emotion. It's why we have different cultural, mental differences in the nations, what we made nations of us, and the cultural behavior we created. A slight change in the tone of the eye creates different emotion. And this become part of the characteristics of life. Now, if you look at your eye, you just see the color part. But the most important part of your eye is the white part, not the color part. The color part is for your physicality (P). The white part is part of your Soul. It's where the Soul transport, transmutes, where the Soul always, irrespective of color, keeps his communication, his line of opening. We are always looked at the color part of the eye. Our doctors look into it, because they are physical doctors. When you dream, you don't go through that channel. When you dream, you dream through the white. It's a travel, the space dimension of the Soul.

(:32). This is why, when I keep on telling you, you live a two dimensional life without knowing. The eye of the man looks at the person in front. The Soul of the Man (STM) through the white, sees the

Soul of the person. We have ignored, the most important part of our lives. What happen to the blind people? What happen to the people who only have the white? What happen to our children when they are born? Now you understand how much man has ignored the second part of his life, all the time. When you close your eyes, when you bring the shutter down, you close the dimension of physicality, not the Soul. And this is why, sometimes we remember dreams, we see them as visual, because the eyeball, as a white, with this section, which is a physical part, is part of the same, some of the fields gets absorbed, touched through it as it goes, and you remember it as a dream. So, next time when we ask you to close your eyes, lift the eyeball that most of the white is in use. And then, set the seed in your emotion and the Soul, that I want to see the mother. I want to see the whole family. My dad, (:34). my brother is half dead, half alive. Some on the Moon, some on the Earth, some in Africa, some in Asia. Then you understand, multiplicity of the power of the use of your Soul. Multitasking is not the job of the Soul. "Always tasking," is the job of the Soul. This is why you say, "I was going and somebody pulled me back." That someone is your Soul, which looks through the white (part of eye), is aware of what physicality doesn't see, but in openness, can instruct, interact with your physical dimension, and move it back. You do this through the emotion and the Soul, and you give yourself cancer. No part of the body of the man, not a single hair, is created for no purpose. Your

liver absorbs multi-faceted dimensions of energies, you call it, different proteins and whatever. The eye of the man has a multi-faceted operation. The color part, which creates interaction with the physicality, and the white part, where is the communication line of your Soul. When you die, your eye moves, most of the time up, to allow the Soul to depart. Physicality has no more use.

(:36). Maybe now you understand why we do this. Now you understand why many people in coma move to the same position. Now we understand why a few weeks ago, when you joined us in elevating the Soul of the children, I taught you how to use the second (Eye), because you reached the Soul of the children. This is why the babies always look deep. Flicking of the eye is for the physical part. And understanding to register the Totality. World of imagination comes into the same way. We stare into the distance, because we allow dimension of physicality imagination. Now you understand, how you use your eyes. You use to understand that nothing is coincidental. Play with yourself something very interesting. Many of you play computer games. I know the generation of us is computer game generation.

(:38). I played the first games when I was in, just about, before University. When the first things came out, we used to go "click, click." And it's developed to a multi structure of today, play games. Set your mind and pre-determine the game. You will win. It means that you can even with the structure of the Soul control computer games. This is why some people are very good at it. Without

knowing and fixing the vision through the Soul, they create energies which sets them in that direction. I still do this. I play a number of games and then I say, in this game I want this and this, and I get what was impossible after that. So world of magnetic field of electronics can still be manipulated, let alone transfer of energy and information and emotion. You cannot harm. You can only elevate. And you can only receive to elevate your own Soul. When we told you, we let you to see the Soul of the Christ, it's because you were humble enough to accept him as a higher order energy and you set the love in your Soul, and you received it. That's the secret of the play, you put that banana as a love of your Soul for the Christ, bless his name.

(:40). You don't see yourself lower, but you set the small seed of love in your Soul, that it is connected to him. You do the same thing with your mother, you do the same thing with another point of position in the Universe. I'll see you on the dark side of the Moon. In the coming time I'll teach you how to manage this. How to pinpoint with the accuracy, not even with a satellite system of today you'll be 5 centimeter out of position, you'll be "dead on" position every time. You tune to move from New York to Tehran to meet your mother. You create the love of the mother within your Soul, the pleasure that she gave you. And understanding of relationship and the field strength, when you land in Tehran, you wish to cuddle the mom, the mom is in your arm. You don't want to cuddle your bus when you land in

Tehran. The same distance ?? emotion will put you in front of him. The same emotional distance in conjunction with the Soul of Physicality (STP) dictates the position.

(:42). So the system of taking energy to control the Spirit, or the STP will dictate the position and distance. You have nobody in Tehran, but you want to go and see the most beautiful restaurant you ate 20 years ago, you heard in Tehran but the GPS doesn't show you, you want to go there. That systematically uses the Soul of the others who have been there. It's like you ask on the street, "can you tell me where this shop is on this street?" Now you interact with the Soul of those who are, who've been. When we put a magnet on a set of magnets, we see how the others move to adjust, not only one. So, you establish that connection, because you want to be in that position. The others indicate how much they move and where for you is, to be, for you to put that

magnet. It's the same way. When you travel through the STM, through the STP, you never get lost. You always land where you should, and you train yourself. So, next time when you walk on the street, next time when you sit in front of your cat, next time when you hold your mother, next time when you put a flower in front of and enjoy your beauty,

(:44). try to look through the white of the eye and see the Soul at the same time. Then, I've told you many times, thy shall not lie. Then you understand how you live the schizophrenic of physicality in the fields of the Universe and when you close the

eye you call it, the dream. You've been a dreamer all your life, but the dream of reality, not the dream of what we call, fantasy. Your vision has around 17 kilometers horizon vision, plus or minus. Your Soul vision is Universe and Unicose. Now you understand the tricks, that when you join us in July, where to look for, and how to look for, and how to dimensionalize the energy, through the Soul. And then, through dimension of emotion, the position of physicality. It'll be interesting, if some of you don't like a little lump somewhere on your body, and in July you concentrate on it, and that little lump by next July is not there, it's no coincidence.

(:46). Because you learn to transfer the Soul and the emotion of physicality together to where the physicality manifests itself. This is what you do when you travel into the deep space with no "monkey suits." We live this life with a "monkey suit," within the atmospheric condition of the Solar System. Because the material is created, the "suit" we wear is created out of the interaction of the field strength of the our Sun, our Solar System, it's blue. In the next Solar System, next door, the field energy of the plastic you wear as a "monkey suit," is in the gaseous state. What are you going to do with the body inside it? Now you understand why man needs to understand the use of the field energy of the Soul. Now you even understand why when people tell us they became with the position of death they saw a light. This is a point when the STM, energy of the STM, crosses the field strength of the STP of the Man. The interaction of

two fields creates light, and that light position creates a dimension of peace. They always talk, it's so peaceful. Yes, because now you're cocooned within the energy of it.

(:48). You allowed it to expand and complete itself around you. Now we understand the whole process of Creation and death, if you understand the structure of your eye. Even more, you can understand why you have a spinal cord and why your spine, your neural system is even white, greenish color. And why it goes down the body of the man to the ground. It's like a volcano. You have surrounded it with a skull. It has nowhere but to go for communication down the line, which you call it, a spine. Does not matter if you walk on four legs or two. Now you understand, even the animals who don't have bone structure, how the Calcium (Ca) structure in their body, transfers its energy through the Amino Acid (AA), connected to the Calcium. You don't need a spine in the space. The Calcium in part of the space will change to Magnesium and another to create the same communication line. In some points, man can never transfer from energy into physical matter state, to become a body, to get physicality. Because the field strength is as such, that can lead (to) the opening of the plasma of the STM.

(:50). The plasma continuously creates the layers to protect itself, to keep its integrity, because it's within its center. Now you understand, how you as a body, have lived these two double life. Now you even should understand, how the position of your eyes, and the volume of the color part into respect,

to the white part, dictates your behavior, your emotion, your openness, your "meaning-ness," for you to be a lot of things. When you interact with people, first interaction is to look into the eye, and see the Soul. Does not matter if they're wearing dark glasses or light glasses. Physicality has no dimension when it comes to the position of the Soul. You've got to understand, now the knowledge given to you is deep enough, (:52). and gradually establishing the point of understanding, that in no point in time and position you need the sight to see or have the dimension of physicality to live, if you manage to understand the dimension of the fields of your existence. I once said, one atom of Hydrogen can cover the whole universe. So is one seed of love. And this is how the Creator created, loving what he has, within (?? Himself). And we starve for it. And we work that when we finish the physicality, we are loved, that we go into heaven, which is the closeness to his Soul. It's within us, and within our Soul. And if we learn to do, to be that banana in the seed, all the time as a love and care, then you understand the principle of Mitra. You have no time to do anything but think good. You have no time but to act good. And no time but to actually do good. Now you understand the importance of your eye. Because once you learn, the color and the white have to operate the same, you cannot lie through the color where the Soul tells you the truth.

(:54). Then you understand when I was telling you last week, standing in the front, I knew I was lied

to, because the Soul told me I'm betrayed. The life, physical life, in any dimension, has its physical interaction and its Soul interaction. Does not matter where you appear, anywhere in the Universe. This principle does not change if you are on Earth, on Moon, on planet Zeus, or within the Soul of the Creator itself. Then you understand how Moses lied, that every Command had, "thy shall not lie." Because he wanted to lie. Because then he ?? wouldn't have been able to do it himself. Now you understand a lot of things about yourself. This time when you close your eye and you say, "I see nothing", you understand you cannot have a flower if you don't sow the seed. And you have to learn how to grow the seed to become that flower.

(:56). You have to re-teach yourself how I see the physical, or with the eye of the Soul. Many people call it the third eye, but in fact is your own eye, it's what you ignored. You will understand through the teaching, gradually as we go forward, how to transmute this energy out to create, when you feel like it, that cocoon, that shelter, that envelope the plasma. And you shall see how you change your life, because there is no two dimensional life in respect to the others, as it has one dimension. And that dimension comes from the collaboration of the physical life and the Soul at the same time. Now you understand how gradually we are bringing you to be both passengers of the physical UFO and the passengers of the STM as an energy plasma of the man. Then you ask why do we need to have the UFOs and the rockets and whatever you create.

There is a pleasure in everything. Very soon you will get tired of just seeing everything without tangibility, that you yearn to move back in the dimension of physicality for a while.

(:58). To be able to feel and touch what you love. Don't forget you are no different than the Creator. He said, "I made man in the image of Myself." I made Mitra to love the dimension of physicality. Now you understand, you are no different. And you have to learn to teach yourself. There is no guideline, there is no Prophet to teach you how to do it to abuse you next time. This time when you close your eyes, to reach the Soul of a child who is abused, you move, to move the emotion of the world president, to a peaceful president, create that love within you first. Then you'll find the child to elevate, the president to move. As I always said, it's in the writing, even the stone has a Soul. You find the strength of the Soul of the stone, you'll live within it if you wish to. I've done that many times. I sat there for centuries, watched man passing by. Life is not to be active, to do all the time something. Life is there to enjoy the time when you want to do something.

(1:00). And when you have a dimension of the Soul, there is no time. Always is zero. Because you decide the step of time from the point of manifestation and the move. And it's never late, because you are the starter of the time. The day starts for the man in Japan, 6 or 10 hours ahead of you, if he wakes up to see the day. While you're still asleep, waiting for the light to come, that your day starts. Before that, for you, zero time, because

you're asleep. It's the same with the STM. Wherever you start, you start from that zero. I manifested myself at that point, and thousands of years later, in another point in the dimension of the time which I promised it would be. I did the same in another time, in another name. And then, because I was there, I became that stone, watching the time goes by. Then I fulfilled my promises. Because I know where to manifest the STP within another Soul, or within the Soul of itself. Now you understand the biggest magic, a manifestation of many prophets. The same Soul. Promise of time, the fulfillment of what I promised myself, I would do. It's the same with you.

(1:02). You decide. Now you understand to the manifestation of the Soul through the white of your eye. Next time when you close your eye, you don't say, "I don't see anything." Of course you don't. You didn't take that banana, did you? And once you have that banana, all the energies of the bananas in the Universe will target you, connect to you, you take what you need. You connect with the Soul of one abused child, and that Soul is connected to many other abused children, then they receive from you. Now you understand how it works. It has to be in it, nothing but giving and no taking. We go through a break, and we come back. And we'll answer any questions you have. Rick, would you like to take us through a break?

<<< BREAK >>> 489 KSW June 8, 2023

## Part II: Announcements

(1:10). K- No, yes, something to tell you in advance, we're going announce later on. On June the 22nd, Thursday teaching. Teaching will be from 10:30 till 12 o'clock for an hour and a half only. We don't start at 9. We start at about 10:30 till 12 o'clock. So, we'll make an announcement for that, but Knowledge Seekers not next Thursday, the Thursday after. In two weeks time the teaching is for an hour and a half, when it starts at 10:30 and not at 9 o'clock. R: Okay, good. We'll make sure that that's clear for everybody before that workshop.

## Part III: Q&A

K- Yep. Any other question? Yes, just one more things I have to announce. The teachings from July,

(1:12). on Thursdays will be allocated a new time, that we'll move it from 9 o'clock in some weeks, into a different time, most probably around 12 o'clock, instead of 9 o'clock. And it'll be kept that way for some times, but we make the announcement when we come to it.

Q: .. Hello Mr. Keshe, I've recently made some Aluminum Gans and Aluminum amino acid. Is my deduction correct, that if we could use fields of Aluminum Amino Acid on a person, to help them

if they're suffering from Aluminum poisoning? From what I've learned to this point, I'm deducing that fields of Aluminum Amino Acid would interlock with fields of cells of poisoned person and Aluminum Gans content in these Amino Acid would interlock its fields with fields of Aluminum in the body and balance it. So now the Aluminum in the body would have its fields detached from the cells and the body would have an easier time removing it. Is this deduction close to what would happen?

K- Theoretically, you're correct. Reality, you never touch Aluminum, at all. Aluminum, Lead, (1:14). and a couple of other materials should never be used by Knowledge Seekers, you should never produce the Gans of it. Doesn't matter even if you produce it and keep it somewhere. These materials have affinity to attach to, due to construction of the field plasma interaction presence of Magnesium and presence of conversion of the fields due to presence of the different field strength, to solidification or manifestation of this matter in the brain. We have the same problem with Mercury. So theoretically you're correct. Physically I advise you with the knowledge we have never ever make Gans's of Aluminum, Mercury, or lead and couple of others. Because it is field strength, is on a field strength of the part of the emotion of the man. You think you're removing, but you can add more misery into the whole work.

(1:16). You never, in a physical human body on this planet, should make these 3 Gans's. If you

made them, put them in a container of themselves and bury it deep in the ground. And if you can, build a concrete cocoon for it, that it stays there for a long, long, long time. That it doesn't even seep out to harm other creatures of this planet, inside the planet. So, my advice to you is, don't even think about it. Next question.

R: So, I guess his next question, you would probably say, no, as far as other uses with Aluminum Gans, have in respect to plasma devices, like the MaGrav Power Unit Plasma Capacitors or plasma batteries?

K- No, do not use, do not use. It's just it's field strength. Its field strength is very close to some of the field strength of the amino acid (AA) of the brain and emotion. Aluminum poisoning or ?? extra Aluminum fields can create dementia, internal bleeding, blindness, loss of orientation. We know this especially from Eastern Block. In Eastern Block in prior to nineteen nineties, (1:18). they use Aluminum as poisoning for rats and for disinfecting silos with rice, and grain, and flour. And all the workers who used to spray this, have ended up with massive problems. They had special teams disinfecting and all the workers in these teams have shown long term huge problems. So, don't even go near any shape or form with these things. One of the most horrendous ones are Mercury and what you call it, Lead. They have a strength and the strength of the emotion. And we've seen in the report to (US) Senate when the interaction, which was hidden from the what we call, public and then when a push by a member of

the Senate in years ago, the vaccination companies had to confess that they use Mercury in a 3 MMR injections for children, which brought a lot of problems for children. This is a report to the White House reports, and the Senate following this over the years.

(1:20). And now they say they produce it with no Mercury, but still the combination of chemicals is the same effect to all the two, three together. This is a discussion now with a lot of world of scientists, that the three MMR not to be done in the first year, two years to children, but delayed to the puberty. And a lot of doctors are supporting this, even their own children. They don't give the MMR in the first cycle of what they are pushing now. Because a lot of papers connected to a lot of other problems. And they moved it, a lot of doctors moved the parents to do the injection of the MMR after age of 12, 14. But what I was in a meeting recently, and I explained to them, is you inject this now at a point of the change in the life, you would hit a new cycle. Do we know what is the effect on that cycle, just because we delay it? Will we see more aggressive children? Will we see more other things with the children at the point when it's vulnerable and changes are taking place? And it all had to do, originally, with Mercury, which in the brain, when injected, it became a Gans of it. And it touched the emotion. but it permanently changes the, what you call, the brain operation. And the more doctors I talked to over years, nobody understands why they put these three together. They were happy with individual injections.

(1:22). It's just pharmaceuticals make a lot of money out of it. And very large percent of people, families pay for it for rest of their lives. Any other question?

Q: .. Last night, when I heard that somebody was making these Aluminum Gans's, I was, I was shocked. And, how little knowledge the people that are making the Gans's have in their repertoire of understanding. We were always taught that you use the four main Gans's and you don't get out of that. And even when I made it, that Gans of Aluminum, it was horrible. It was absolutely horrible. I mean, I've made some Gans's, but I've never felt anything so, as abhorrent as the Gans of Aluminum and the feel of it. It was the feel of it. It is when you get it near you, you go like, what the hell is this? And you just want to get it, it was far away from me. And this particular young man was putting CO2s and other Gans's near it.

(1:24). Honest to goodness, I almost freaked out. I can't believe the misunderstanding was going on here. And I thank you so much for addressing it tonight because this is really important. You don't make these Gans's, they're not good for us, and they've got nothing to do with the knowledge of Creation. They're like, if I could put it as a subset of what you can create, but if they were to be created, you have to know exactly what you're doing in order to get to that. And it was, honestly, I was "gob smacked" yesterday.

K- When did you hear it?

R: It was in the Keshe Plasma Reactor Group and we all, or several of us disagreed with the creation

of Aluminum Gans's and talked to Peter about it. Peter gave a presentation about him making Aluminum Gans's and showed it. And we suggested that it was not a good thing to produce. K- If you can delete it, go and reload this and delete it. Off your teaching, of your, what you call it, program.

R: Well, we're telling people not to do it, so...

K- If you can go back, because... Yeah, not to do it, but if they don't listen, if they don't listen to this program, or the others like it, they'll think it's the way to do it.

R: Right, okay, I'll delete it.

K- Delete it, delete it from your brain.

R: Yeah, let's just forget the topic totally.

K- This is something which we know, (1:26). we know, that the Aluminum pollution. We looked at this. The same thing..

R: We looked at it several times, and you've had the same answer for quite a few years now for the Aluminum, the Lead, and so on. We hear the same stories.

K- Because we know, we know, we know, we see the result. One of the other effects which we see it, effect, is Plutonium. A lot of you don't have access to, a lot of you don't reach to that level, but as nuclear physicists we have access to. Gans of Plutonium and certain isotopes you never make.

R: I suggested that the Gans of Uranium might not be a good one to focus on.

K- It's a very good one.

R: It is?

K- Gans of Uranium in Isotopes 235 is extremely valuable. Some isotopes of Plutonium has the same effect as what you call, Mercury. But the effect of the Plutonium isotopes energy is that it clogs up the, what you call, you know the sperm of a man is singular, it clogs them together. They become like ?? "vermicelli's". And it is... and then it has no genetic effect. But it does have, as far as we know. But certain Plutonium, (1:28). some conversion of the higher order radioactive materials, we keep away from making the Gans's. I have made Plutonium Gans's years ago, and we see the effects of it. And it is their field strength, which creates emotional interaction with Lead, Mercury and Aluminum.

R: Well thank you for clarifying that Mr. Keshe.

K- Any other question?

Q: .. Good morning, Mr. Keshe. I wanted to ask if you had had the opportunity to read an email that we sent to you from Mexico about a month ago, in regard to the biofermentation process we are about to begin.

K- I looked at it, we would like to collaborate and bring some things to you. But the reason I don't come, I did not come back to you is, we can discuss this,

(1:30). but through the agreement we signed, we can change your program inside out. Maybe in a year or so, to literally bring it into a very large international operation. Not by financing it, but bringing other part of what we agreed with. It's a very interesting proposal, but you have to... I have to put in a framework, in something if we

done the correct way, it'll have a lot of implication. If you do it the way you are doing it, there will be something done enthusiastically, a few bit projects and then disappears. This what you're doing needs a huge financial backing but it needs a bit of what you call it, tuning. It's not all the way you explain, or what you discussed to be. There is more to it. If you want to make a time we can talk about it but I'll be looking at this maybe in six months a year time to bring it. But this needs a huge financial backing to be what you want to do. Otherwise it's just a what I call, prototype platform and maybe in a few years you push it to a few more projects. It's a very interesting project. But, the projects like this, needs very detailed looking and then, make it into international operation.

(1:32). Q: Okay, yeah, that would be... It would be wonderful if we could connect to the point and touch on to that. Because we are definitely open to the idea of this being a much longer term project. And I don't think we were thinking we had it all figured out at this stage.

K- Have you actually finished any prototype of it? Have you... in any scale?

Q: We are in the process right now of meeting with the Congresswoman tomorrow, I believe, or the day after. And we'll be bringing the first unit into operation, probably within the next month. So that'll be the first beginnings of that.

K- But what do you exactly convert? What do you exactly do with your system next month?

Q: Yeah, the idea is to bring the bio-fermentation systems into an existing facility, perhaps in

Zamora or in another part of Mexico here, where they're producing a lot of food waste. Perhaps going into a facility where they're freezing fruit or vegetables that they're packaging and have a lot of waste material. We would go to these companies and offer to collect this waste material as the input mass for the bio-fermentation system. And then we would be inoculating the biomass with specific bacteria's, which are able to convert that biomass into bio-stimulants in a much shorter period of time than is conventional.

K- What is the shorter time you're talking about?

Q: We're talking about 24 to 48 hours, as opposed to 90 to 180 days, which is conventional with biogas.

K- Biogas, yeah.

Q: This is a much faster, a more high stream process and these plants can be made in various sizes.

(1:34). But at the beginning we were just looking to do a prototype facility and show it with the local Congresswoman here and have it be a use case.

K- Do you have the financial backing for the first time?

Q: Yes we do.

K- And how much you estimate that'll cost?

Q: It looks to be at this stage between 50 and 100,000 dollars.

K- This is a very nice project. And I was talking to one of our, what you call, top management of the Keshe Foundation. And what you do, what you suggested. There is a growth industry, very parallel to waste, biomass waste, food, whatever, in

cosmetics. And the Keshe Foundation is looking into it. There's a company now producing these, very successfully. And what you do as a biomass, a lot of what you call, green ?? wedge, can be changed in a lot of things, healthy things for, not just for energy. We're looking at it as one of our top people is very deeply involved with this now. You can look at both side of it, but it will be very interesting. And I would like to discuss it, but in a few months time. And then we'll see how we can take it to the next step. Because I think you can, as not only a speed up the process, you can change the process through a specific way of using Gans's. This is where my interest is.

(1:36). And then we can collaborate with you.

Q: Fantastic. Yeah, thank you very much. We were wondering if the email had, fell through the crack or not.

K- Come back to me. Come back to me. Yeah, come back in about six months or so, where we tied ourselves in a very big way internationally. And we can't divert any attention from it till it's, what you call it, the baby starts walking in the next few months. And then this is a very good proposal. Maybe we can still bring you into operations somewhere in Mexico for us. We can collaborate with you there.

Q: Wonderful, thank you very much, I appreciate it. And ... yeah, I look forward to the opportunity to share the knowledge that we gather through the first tests and perhaps we do it in the background, if that is the best way. I can contact you in Telegram and share updates that way.

K- Contact me that way, yes. Keep me updated and we can even, maybe, interfere through governmental channels. It's much easier than you battling it on your own.

Q: Absolutely, that's why we reached out in the way we are. And that's also why we're moving in the direction with this influential Congresswoman because she understands the vision and is very much in support of what we're doing and wants to share this with many of the areas in Mexico, which are the food producing areas, because they have a massive problem with the soil quality and the bio-stimulants, which are a process of this equation, can be used to revitalize the soil, retain moisture back into the soil and give better yield to the crops as well is doing something positive with the waste material that would otherwise be in the trash.

(1:38). K- Yeah, but you know how South America became a fertile land by original settlers. They just burned their waste and ashes became fertilizers, and now we call it, Nano materials.

Q: Yeah, we see that across the countryside very often, and as we're driving around, and they do that here too. And whether that's intentional or not, that's another question. But..

K- They know it works, but they don't know how scientifically. Now we understand how scientifically it works. You produce it into a perfect Nano material for absorbing energy. It's black. So it holds energy, but because it's a component of the same vegetation and the fruits, that is, it'll grow on it. So it has the right strength to give back. In a way, when you make a tomato

roots or tomato leaves and whatever, and you make a biomass of it, or a Gans of it, or what you call, charcoal of it, and you put it on the land, and then you grow a tomato on it, that burned material, which is a Nano structure, has a strength of the tomato, because it was made of it. So the next harvest grows better because already the seed of the energy for it is there. We understand the process, but it's interesting what you're doing. But we've seen this in China. I saw a system like this in China about three, four years ago. They built, but the government could not carry it out through to produce gas from it and then you still had the mass you could use for as a by-product. It's somewhere in our files.

(1:40). When they took us to see, what do you call it, the skeleton of the structure. I was interested in it then and I can see a lot of usage. But do you produce a lot of gas out of it, prior to conversion?

Q: Yeah, the gases produced, I believe, are Hydrogen.

K- But you burn it, you use it as an energy source?

Q: That is to be determined. We could probably burn it at the source, at the location itself, and use it as an energy source.

K- No, don't do that. If you produce it, use it, you need a compressor, use the gas, compress it and sell it as a product to the farmers, for the conversion of their ?? cars, or their tractors. That will attract them a lot more.

Q: Yeah, then we have all kinds of bases covered, and we can do this in a decentralized manner, where we go to the farms and offer them a "one

stop shop" for converting their waste material into usable fuel, as well as a specific fertilizer, specific to their land based on what they're growing. That was the whole purpose that we wanted to go to the mango farmers and give them the Gans materials or the bio-stimulant materials from the mangoes and go to the avocado farmers and give them the same.

K- Yeah, but we use the gas, use a compressor for the gas instead of burning it, as a product to the farmer. They'll grab it, they'll embrace you for it. It's you serve three purposes. You give them the energy, you clean up the land, and you give the land new life. Just look at adding a compressor in, because when you pull the gas with a compressor, you produce more of it anyway, and you speed of your conversion. You understand?

Q: Yes, yeah, wonderful. Thank you.

(1:42). K- You compress, if you do it, let's say, in 48 hours, you might do it in 18 hours. But the more gas you pull, the more fermentation you create. But sell that gas, compress that gas into a product for the farmer. That will change the balance a lot for them. And they'll grasp it, because the fuel cost for farming is huge. So very interesting. I'll be interested, but come back to us in a few months time then. Maybe then we can build up in a different way. But we'll have the governmental backing for it as a project.

Q: Wonderful. I appreciate your time and thank you so much for adding to the knowledge.

K- Thank you very much. Any other question?

Q: .. It's fine Rick. And I know actually, I know

your voice pretty well because I've been doing some translations with the gardeners workshop. And this is why... well I was told to ask this question. Somebody in the neighborhood recommended me to join this session.

K- Introduce yourself. Where, who are you? Where are you from? You're Australian?

Q: No, no, I'm from Germany. And I'm in a... well, in kind of these Plasma groups around our neighborhood here.

(1:44). And I've been... well, I started with the Gans's already, and I have them in my garden, etc. And, what I wanted to ask, it's got nothing to do with Gans's, but it's about what I smell and perceive. And, well, one of the guys and persons in my neighborhood, they said, "Okay, please contact Mr. Keshe. He may give you an answer." Because I've been perceiving these kind of things attached to people. I smell that and I do not know what I perceive. And that's why I have to be keep away from people. I have to really consider very wisely where I go, because sometimes I feel really sick. It makes me feel sick. And what I perceive is, well, actually I can't judge. It's a little bit, as I said, it's attached to people, rooms, clothing. When my kids come home, they have it on them. And I've started perceiving it when the vaccination started. So, and I, well, I don't know what I smell. Difficult question probably, and I don't know if it's out of place here.

K- No, no, no, no, you're perfectly home.

Q: Okay, thank you.

K- I'll ask you a couple of questions.

Q: Sure, you may.

K- When did it actually start?

Q: With vaccination. And well first I did not know what it was. And I was attending a meeting, an official meeting. And I really was about to have... yeah, sorry.

K- This is very, very, very common with vaccination.

Q: Yes. Yeah, but now the vaccination is over. And I smell it with my kids as well, who have not been vaccinated, and my family as well.

K- No, no, no, no. let me

Q: Ok, sorry.

K- I stop you because I understand where you come from and a lot of people will do. It all to do with the Corona. And is... Did you get the Corona at all or not?

Q: Well, yes, well we did this kind of testing, yes. (1:46). And yeah, well officially with this PCR test we had it, yes. And of course we see people who had it, yes.

K- Okay, a very large percentage, we're not even, what we've seen, runs into double digits, of people who had the Corona, have this problem. You're not the only one. The reason for it is very simple. I'll go on the screen, if you can see it. (The problem is, where did I put my pen. This pen will not be with me when I need it. I cannot find a pen). But I'll try to explain to you scientifically, you understand?

Q: Okay, thank you.

K- You will see, you can, you can help it. You can help it yourself. You can do a lot of things with it

to get rid of it. Okay, I'll go on the sharing of the screen on the whiteboard. (....)

Q: Well, I appreciate your time, so don't you worry.

R: There are very few questions that I've seen Mr. Keshe, you know, not take. So, it's appropriate and might spark some interesting.

Q: Well I was really wondering and it got me worried already because I can't go to a lot of places these days because I'm restricted everywhere I go.

(1:48). K- You have to bear with my fingers than actually a pen. This is your eye, this is your nose. I hope it's much nicer than this.

Q: Thank you, yes.

K- Here, right in the center there is a very fine, very fine bone structure. And it sits in a cavity, it's a plasma cavity. And when you smell, the smell goes up, passes. How this bone vibrates, will dictate what you smell. Because each smell has a strength. And in touching this bone, this bone vibrates. And then your brain recognizes this smell. That's how we smell. In people with, have a head on collusion, this bone usually goes and sticks to, what we call, one side of this wall. And they lose their sense of smell. Corona is a Calcium based virus. And you most probably got your Corona through breathing. So, it's (goes) past this (bone). And as this is a very fine Calcium gel like, not a bone, but it's a bone, your, what I call, (1:50). "smell bone," has picked up a mass. So it has moved in sensitivity in this area somewhere. It has moved somewhere, slid into one direction or

the other. And because it's an energy mass of a Calcium, it might stay with you for six months, a year, two years. We see people now gradually losing it after a year or two, going back to normal. A lot of people couldn't smell after the Corona, because of this delivery of the Calcium, what you call it, mass of the Corona connection. So you have, it explains what it is and how it is. We usually have the capability to help with Gans's. But it's a... you can get it back, you can go back, you can wait maybe another year, that gradually this mass has lost its energy and it gradually the bone frees itself, or you can go and, what you call it, take other options with producing a very reverse Gans of it to deplete this energy.

Q: Yeah, but the... May I say something?

K- Yeah.

Q: But the point is, I have a very, very great smell, and I actually never lost my smell. Also during Corona, what I smell now, I mean, go out into the woods, etc., I smell everything. I smell the...

K- Yes, it's becoming...

Q: But when there are certain people passing by, it's as if there's something attached to them. And this is what I smell. Once they're gone, everything is fine again. Just, I just come to try to...

K- Yes, because this bone has become...

(1:52). Yeah, this bone has been energy mass sensitive. That's correct. You don't pick all the smells. You understand? I know a lady who could pick up a smell of a shoe when she entered the house, from the back of the house. You understand? It's one shoe she was allergic to, or

she picked up after Corona. And every now and then she still smells it. Not all the time. Gradually it's getting better. So it's not you... this bone vibration is very sensitive. It can smell 3,000, I think, different smells. And it has a memory bank in the brain. The minute it moves to a position, brain recognizes that ?? this. And it has a connection to emotion as well, this line of the smell. And you've been loaded by Calcium energy on this bone, 100%. So, you can wait, it might go away in a year time, two years time, three years time. Because now we see a lot of people who got, some people lost their smell totally. Absolutely, the bone got so heavily loaded, that it stuck to the side of the... actually, it's cavity. And, gradually you can get it back, or you make a patch of CO<sub>2</sub> with the Amino Acid of CO<sub>2</sub>. And just place it in the position of the top of your eye, between your eyes and your forehead, where this bone sits, that you might be able to release some of the energy, and you get your smell back. Not everybody smells. (1:54). Q: Okay. So just CO<sub>2</sub>? No Calcium patches ..?

K- No, no, no, no, no, no, no, no, no, no. Don't go anywhere near Calcium, you already been interacted by the Calcium. We don't know the extent of it, but this is the problem with this ... We see a lot of side effects of Corona, now coming, now coming out.

Q: Okay, would you recommend then to also drink it?

K- You can inhale it, if you just rub your finger with the Gans's and just rub your nose, your

nostrils. And see if it gets worse or it gets better, and then you change the ratio of the Gans Water. It seems to be helping. Because if we go with a Calcium patch on it, you can reload it and you can literally stick it to the wall and you won't smell anything. It is a very, very light, very light mixture of CO<sub>2</sub>, with a lot of water in it, and just try it and see. But it's one of the side effects of the Corona, 100%, and you're not the only one. Many, many people lot their smells. I hope at least they smell good, not the bad smells.

Q: Well, as I said, it's just that, so sometimes I go places and I'm thinking, "oh my God, what do I smell?" and I have to leave, because I can't stand it. It makes me feel sick actually. And I do have problems sometimes with that, so going out...

K- Yeah, but it's... you are correct, you are 100% correct. It is... it comes with Corona, which means you've got the Corona through your nostrils, not through the breathing, through the mouth. And it has transferred its energy, because it's Calcium based. We saw it as a calcification of the lungs. We've seen it as calcification in the brain. So, this energy has calcified on your nose.

(1:56). If it's calcified and become part of it, you'll carry this for the rest of your life. If it's as energy, maybe in the short time you get rid of it.

Q: So thank you very much. I hope... I'll stay in contact and tell you.

K- No problem. This is what the joys of new science, they experiment on all of us. Thank you very much. Any other question?

Q: .. Hi Mr. Keshe, when we are sleeping you taught us that the STM expands and can go anywhere in this Universe. But at the same time the STM is connected to our physical body. Since we can have physical sensations during the dreams. Could you give us more details about this connection between the STM and the physical body and why the transmutation doesn't occur, even when we are dreaming? Is it that the fields of the emotion of fear prevail over the other Souls, even when we are sleeping?

K- No, this is just to do with the STP. It's with Inertia ?? and Mass. When you dream, you're in a different dimension than when you actually go through transmutation. When you go through transmutation, you...

(1:58). When you go through transmutation, you envelop the body, the whole physical body (Soul envelops whole body). When you dream, you... it's the reversal, which is the actual, if you take the body, and you (are only) peeping through. And that's why you cannot... And if in your dream time you can do this (expand STM over body), create this, you'll transmute yourself. Christ did that on the cross. It's .. that's the difference. It's in our brain, it's in our system structure of our Soul, and man used to do it. That they could use this with the STP, and amputate the arms, the legs.

(2:00). But, we have forgotten, we haven't forgotten, we have not used this. It's very much like reptiles. You get your tail trapped, you drop the tail and you move on. You create high level of energy, which is a field energy, and not matter

state energy, and then you, that field separation, can literally loosen all the muscles and the bone at a given line, and then

separation comes. But the trick with it is, to create this energy, in a very high temperature energy transfer. And man used to do that. Exactly like reptiles. Every mammal has this, every creature has this capability. If the plants, even the plants have this capability. They'll amputate to cut a piece and grow somewhere else, or re-grow next to it. But we don't do it, and that's why we don't remember the dreams, because we go through that peeping hole. You look, literally, this is what we're teaching today. You look at the sight, and then you bring the STP and the STM to that point, and you create separation. But between it is, if you understand it, is that, because the way it's done, (2:02). later on you grow the arm back again. So, that's why you dream, we ?? do not go with it. But I can put you in the dream, create the plasma around you and you'll join your dream. It's very easy to do, extremely easy to do. Any other question?

Q: Can you give us more information regarding the element Indium?

K- No.

Q: .. Good morning Mr. Keshe.

(2:04). I understood that the key to the success of the transmutation is the elevation of the Soul. Only this is not an easy thing to do and therefore...

K- It's more expansion than elevation, there's a difference.

R: Okay, and he mentions that you will do a special course with the first 25 of the 200. The question would be how will it end up as millions of people, if not billions, will be able to raise their Souls to be able to participate in the colonization of the Moon, for example?

K- Oh, we'll give you a helping hand, don't worry. It's called the Vertical Unit. We don't transmute you in the Vertical Unit system. We expand your Soul, you do the rest yourself. But we tell you, you've got to go in that box. So, it's easy, it's not that ?? hard.

Q: .. How many times needs a Soul to be elevated normally?

K- What?

R: I think he means, how many times would you need to elevate a Soul, in order to be elevated? I'm not sure exactly. How many times need a Soul for it to be elevated normally? Maybe for it to be elevated ...

K- I think people have a physical dimension, they think it's an elevator, (2:06). you can go to the next level and next level. Elevation comes in terminology of the plasma technology as "enlightenment." And if you understood the story of the banana, you should have understood how to enlighten yourself in which way. This goes back to when I told you, you go to China, you speak Chinese, you understand the essence of it, and it's just not the book, dictionary. And this is the essence of. And that's where it comes in. It is elevation of the Soul, not getting in the elevator, but is expansion of the Soul

in the way of enlightenment. Then I think you understand what it means and how you've got to work with it.

Q: .. Hello Mr. Keshe, utilizing MaGravs Plasma Science and Technology, can we make dead planets livable?

K- As long as you can make a dome in there, yes. There are no dead planets, you've got to find out what lives in there. There's a no life, no corner of this Universe, which does not have an active plasma as a life. When you have a gravity and when you have a Inertia, life is a consequence of their interaction.

(2:08). It's always said, for thousands of years, we drank the waters. Sometimes we got poison, sometimes we got all sorts of diseases from what we didn't understand. It comes through the water. When we got educated and we got enlightened in the science, we found, oh, they have bacteria's and in the microscopes it has been there. It's just us who's been ignorant to their existence due to a lack of our understanding. Now, space is the same. It's that river of knowledge we have to tap into and see which part we haven't understood? That the life exists in that point, in that position. If you've been hiking, they always tell you, never drink of a running brook. Doesn't matter how thirsty you are. But you can drink from a spring where the water comes actually out of the ground. The same spring you saw is 20 meters higher, you don't drink 20 meter lower, because you know where the spring was. You don't know what has been contaminated in that point, from the start to the bottom. Usually

at the spring, you have no contamination or less contamination. Down the line, other energies added to it. The rats, the mouse, the deer all drink from the same brook. So it's the same in the Universe. You have to find out what lives in that rivers of fields. Even there is no planet, even there is no life to you, but it could be a colony of what you call,

(2:10). Covid plasma energies. So, there is no way, no way, anywhere in this Universe, which there is not life, or you are in it, is part of a bigger life, that you don't observe it, because you are too small to observe. So, there's no dead planet. You can immigrate. You can ?? own it and immigrate to it and colonize it. But watch what's underneath of you, because you thought there is nothing there. Any other questions?

K- This colonization will bring a lot of interesting, what you call, data on it. It brings a lot of new research and understanding. As we said, we are prepared, we are preparing for colonization and it has to be in a real state stage. I'm sure within next few months you hear more about Keshe Foundation program and other satellites colonization. And most of you in one way or another who've been regular with the Keshe Foundation have participated in that understanding and growth and trial and test. We foresee colonization if things go the right way within the next two years. On the book.

(2:12). Our conservative people talk about 8 to 10 years. But technology development is so advanced, that two years is quite feasible, even a

year from now is quite feasible. You've got to understand once the governments allow the new plasma gravitational system to replace the rocket space technology there will be an evolution in the whole of the space industry. And we see this announcement within the next 12 months even, maybe much, much sooner. If everything goes the way is set out, we will see a total change in the space technology of the present time. This is not what we think might happen, this is what we have signed ourselves to happen. So, Musk and NASA will become part of the history book of the space technology, within a few months. Because other governments have decided enough time has been wasted in propulsion. We have not wasted, we have reached the limitation of cargo carrying, food carrying, life's and ???. We need, we have to look at the new ways, new understanding. And the new way cannot be under the man made system. It has to be replication of the Universal work.

Replication of how life exists in multi-facet, multi-direction,

(2:14). like Earth. We move, we create heat, we feed, we create life. We create dimension of emotion and dimension of presence. If energy transfer from a star has become a planet which has all these facets, cannot be that difficult, once you understand the process. We have understood the process and replicated it. So, once it taps open, it will change. And we were silenced to steal, to abuse by the Belgians. And other nations have broken rank. And this technology has opened up. Very soon you will hear. The collaboration with

the Keshe Foundation with the most powerful nation on Earth, has been signed and sealed. And you will see, Keshe Foundation, you supported for years, is what you supported and what we came here for. Irrespective of bunch of pedophiles in Belgium, or from the head of their nation, to his servants and the police force. But it was a good thing, because it allowed us to go with it, and correct a lot of things, develop a lot of things. Any other question?

Q: .. About the waters.

(2:16). Normally, cities are taking the waters from rivers and treating them with the ?? flocculent Aluminum to precipitate the contaminants. But all this is contaminating with Aluminum and they can't get rid of the chemicals. All these waters are not really good for people to drink, are they?

K- We see in the places where they do this, certain collective diseases. We... Nowadays, in a larger scale, we look at the local and national structure of the processing of the water, and the effects on the society which uses that water. And certain diseases, certain behavior comes from it. For example, one of the biggest studies goes on, is on big cities, like London. How this cleaning up and processing of chemicals, and returning the water back into, has created a massive problem for birth control and birthrights. Where the big expansion in the use of contraceptives by women, directly feeding into the waters of the city of London, and then been cleaning up,

(2:18). for reprocessing, for consumption, recycling. In being drank by both men and women,

has reduced the sperm counts in the men. And it's one of the biggest problems in large cities. So, the effect of these chemicals used, we already know. And they create certain specific problems in certain countries for what is used. So, it's not something new, but it does exist and you are very correct. But you have to see where this cleaning of the water has ended up, and what is used for and what is the effect of it. We see the farming, a lot of cleaning water has been read into the farms, because it's not good for human consumption. But what is not counted at this, now as a part of food, has become part of the human consumption cycle. So, we'll change. A lot of things will change in coming time. New technologies. We are not the only alternative. New, as we heard from our friends in Mexico, new ideas, new interaction between what you call, fields, different fields of science, will bring emerging technologies which help us. But we cannot use it just, because we use it in one place.

Q: Yes. I personally use natural fountain water. I produce quite a bit of Gans water daily.

(2:20). But I've offered this process to the processing plant here, but they don't... they're not interested in doing it.

K- Because they have to spend money on it to do it. They have... this is one of the problems, changing the course. If you get yourself, if you get one country or one government, do what you do and show all the benefit of it, they all jump on it. But that breakthrough is important.

Q: Yeah, well I'm helping a lot of people, about 100 to 200 people come along every month to fetch the water, and they... once they taste it and drink it, they realize they can't drink any other water. Be it processed, be it from deep wells or whatever. K- You create an emotional connection with this Gans water. It's because, especially when you produce like CO<sub>2</sub>, you have a certain amount of Zinc in it. So, it affects the emotion. We saw this with Lisa and Jim in Australia with their lettuces. People were picking up their lettuces, and they wanted that specific. If you remember years ago, they were telling us. They do better in supermarkets, than when some people pick up. Because you receive what we are short of, so the body goes for it, subconsciously. I know how you live, I understand. And how you produce these waters. You actually touch the emotion with it. Any other question?

Q: .. You mentioned that in the monthly meetings, a "child of the Earth" should be begotten by those involved? Can you tell us more about it?

K- Can you repeat that?

R: You mentioned, it says, you mentioned that in the monthly meetings, I'm assuming the ... one of the flight meetings.

K- Yeah.

R: A child of the Earth should be begotten by those involved. Can you tell us more about it?

K- Explain what you mean.

R: Okay, well she'll have to, or he or she will have to put that in the chat.

Q: We can go to the second question now. It says, you said a month ago that world peace would be proclaimed in hours to days. Can you tell us more about that?

K- It's been settled. This is very interesting. Even you see separate things happening in different ways. The basis, fundamental world peace basis, has been settled.

(2:24). So much so, that the Chinese have taken lead on this and economical power of them is dictating it. The hot spots of the war, past 1,500 years, has been Middle East and the strong influence of the Americans. We saw the same thing in Africa for a long time with ... between the Communists and the rest. And this situation has been settled two ways. The basis for the world peace is now fully grounded by the Chinese. It's the beauty of the leadership of president Xi of China. They pushed the... they stood on the sideline they didn't take sides, but they pushed the mighty power, of purchasing power, to influence those who are purchasing from them. That you want us to purchase, this is a new way, find a solution. American pushed war between the neighbor country of Saudi to create, to bring Iran into war as supporting that country. And it was very lucrative for Americans and Israelis. They sold everything to it (weapons) and the Saudis line it with gold, black gold. And Chinese came in said, the stability comes when we have a continuous supply and there is a peace in Middle East and Persian Gulf, in that part of the world.

(2:26). The wisdom of military did not work. The wisdom of finance and collaboration worked. So much so that this week, Iran, after seven, eight years, has opened its embassy and consul in Saudi Arabia. We see the same thing. United Arab Emirates canceling a number of military agreements with the Americans in favor of collaboration, bigger expansion with China. We've seen a massive injection of 100 billion by the Chinese into gas lines of Iran. And they want to make sure these gas lines are never been damaged, or there is nothing ?? They needed this peace, economical peace, so with Saudis. We see the same pattern in Africa. And next month's meeting of the BRICS with 20 new nations on the board, lining up to join, devaluing the dollar. And this now has pushed the Americans to change direction, more maybe short term, trying to get nations back, but long term, knowing they lost the ground to the Chinese. President Xi uses this for a very prudent way of doing it, because they push with their massive construction companies that we give this, but we do this. China might lose long term, but short term, will guarantee the long term success. And we will see the same, very soon in the next few months in Ukraine. Vatican will pay heavily for their interference in Ukraine. And we've seen it even in the past two or three days, (2:28). by breaking up the dam in Ukraine, either by accident or deliberately, a huge plan by the Western allies to push the war into the line of the Russia and maybe beginning of another war. A huge number of soldiers and hardware have been

washed down the ?? Rhine (line). They don't tell us in the West, but military reports, official reports in military shows hundreds and thousands of vehicles have washed down the line. So all their promises of getting back now has become a bigger danger with other things. But China will be the beneficiary of this dam. They will rebuild this dam. No government has the financial backing and the material backing of China to build this dam. Billions of dollars. But with what we see sitting in the side of the Keshe Foundation with the support, agricultural support, and new technologies, Ukraine and grain breadbaskets will soon be replaced by China. By (2027 to 2030) China will become an exporter of grain, replacing Ukraine. This is the biggest mistake Vatican made in encouraging this war. And Americans will pay for it more heavier, because the Chinese grain will not be, what you call it, (genetically) modified. And the Keshe Foundation will have a huge hand in this development. By 2027 - 2030s China will become a, one of the major, (2:30). natural, normal, beautiful, Non-GMO (seeds). Which again pushes the Americans back and all these, so many debts we see in the farmers in Africa and Asia, which they cannot, every year they have to buy the seed. So, in general, we'll see a massive change of shift. But it has to be fundamental, it cannot be by talk. We know clearly, situations like Taiwan will be resolved by Chinese in a very amicable way, because they're making, trying to use as a hot spot. But, we'll see Taiwan to become part of the mainland China, in

next 5 to 7 years. Chinese don't go to war, they don't go to war to create war to get. They use wisdom, and it's the wise way to do it. And the only beneficiary we'll see, it's a long term, is Chinese. And they use that for peace. And the seed for the world peace has been set by the Chinese leadership. And you will see it. They tell me I support Chinese a lot with this and that. But we sit there with reality. We sit, we watch, we've been part of the structure. And we see how the changes are coming in. What comes in the Western newspapers is a bunch of lies, which is only (to) lie to their readers. That's the only way they can keep their, what I call, "colonial time" alive. But in fact, there's no colony left.

(2:32). As a Chinese ambassador told me once in Brussels in 2010 - 11. He said, now colonization comes with science. If we get hold of scientists like you, (You) are an "oil well," we become rich. No more lands can replace the new technology and sciences that scientists like you bring. And that oil well has landed in China. And we see the whole angles of the development. And it's not based on military might, it's based on fairness and what we call, development of the peace. We make more money out of peace than the few factories making guns. The only people who make money, especially in the West, is the Church and the gun manufacturers. They kill, and the rest of the family pays in every weekly prayer to the Church. And this is what has to come to an end, and it has come to an end. So, it has started, it's backed, science and technology is backed by the most powerful

nation in the world. And you as citizens realize and see it gradually in the coming time. Any other question?

Q: They promised that the compact units would be shipped in the second quarter.

(2:34). Can you still keep this promise due to the current situation?

K- We are trying to, yes. We try. If we don't do it second, we do it third. It's development which we stop and we just go for mass production, yes. By end of June or in early second quarter, third quarter, we start shipping everything out. This will be done before we close all our operations in Europe.

R: And can people still order products and so on?

K- Yes, that's...

R: Still being delivered and all that?

K- The structure is that our shipment, everything will move with our staff. Our staff will move, most of our staff will move to new locations. And the exhibition center will move to two new locations, most probably we know by end of next month.

And, as I said, we move out of the mainland Europe. It's not in favor of our work. But, we will have a distribution center in Europe, for the products. But the product range will increase massively, in next 12 months, maybe two years, the product range of the Keshe Foundation will move, increase massively. And it'll move out of the hand of the Keshe Foundation. It'll be, we are still part of the organization, but we concentrate on research and development, and our partners do the commercialization,

(2:36). and the marketing, and the rest it's their job. This allows us through technology to influence the products, to influence the, what we call, what we see as the outcome. This works perfect for us, because for us, we did enough to show the technology works, making the small things. But now, this has already moved, it's not something is going to be done. Our team are working on it, even this morning before coming on I saw messages. So, in next year, two years, you'll see products from two or three hundred to tens of thousands. And, in the background, it'll be logo and confirmation, and you know when the name of the company appears, Keshe Foundation is part of it. We've gone that way. We are in development of a space science technology, not in marketing, but we had to do it to show the technology is correct and is applicable. But, you will see a new brand and a new structure of marketing. Because, this is where we always went from Knowledge Seekers now, is in the hand of professionals, it's in the hand of governments, to launch the Keshe Foundation products, not in our hand. And we are major part of the ownership and we are happy with it. It allows our team to do what we came here, to bring new technologies, to bring the change. But, collectively we'll see European depots in a very, very large scale, even bigger than Amazon in the next 5 years, both in America, and in Asia and in most probably Africa.

(2:38). We have signed ourselves to this agreement, so it's not talk we might do. It just needs to go through the process. And you, the

teaching will carry on as it is. The timeline as I explained earlier will change, because we'll change our headquarters of operation. And at the same time, the product range of the Keshe Foundation in the banner of a new organization, will appear internationally. We are backed with a massive, massive structure. And we have signed sealed agreements, it's just that we have to learn how to operate within this new environment, and they have to learn how, or to adjust themselves with new technologies. It's a growing process, and it has started weeks ago. And even our own teams are learning how to become part of it, organize themselves to be in it. And, as I said to you a few weeks ago, Keshe Foundation Technology will bypass Apple, Microsoft and the rest in the next 5 to 10 years. Because it touches everything, from agriculture to energy, to food, to space, to health. But we have to be very prudent and our partners are very, very quite careful. And step by step we have to confirm, we have to deliver and step by step we've done that. And it'll go that way. So, you still get your products, (2:40). you will see much more, much more bigger product range in 20 - 30,000 in next two years it's more or less very feasible. And everything will carry the Ethos of the Keshe Foundation in the process. We have (emerged) out of obscurity in a very big way, but we needed that to grow. Even maybe the cause of losing so much was to bring us to where we are now. And very soon you will know, I presume many of you can guess where we are going. And we are committed. We sign

agreements and when I sign an agreement I stay to it. Without a doubt we become one of the biggest corporations in the world. In next few months, years. We are part of a bigger organization. And we are only involved in research and development of the new technologies and new structures. That's thanks to all of you and all of you who support us in the background, and many of you, you've been called upon, we kept a track of everyone who's done something, not just because you made one Gans's, or you are a good things, whatever. You'll be brought in to specialties of the jobs we need, and we flourish. The teachings will not stop. We have guarantees that the teachings will carry on. And the product range and the deliveries, is all will merge into this one ?? organization next year, or two. Any other question?

(2:42). Q: .. Will Turkey have a new position regarding peace?

K- This is a very delicate position Turkey has taken. One of the reasons for Erdogan winning the election last week, 2 months before the election, he was very far behind. And he needed certain support to get to be re-elected. And the major person in creating that support is one of our close Knowledge Seekers. Very good friend of mine. And we are very much aware and in touch with the situation in Turkey through his operation. He's one of the devoted Knowledge Seekers for years. He's a very high-ranking diplomat. And we meet quite frequently with him. He's a family friend, become a family friend. And it's... he told me he's going to change it. and he puts his life on it, that he'll get

elected and he managed to do it. We see very important role for Turkey to play for Erdogan. But you have to realize he suffers from a very severe cancer. The biggest problem for Turkey is not while he's in power. Would he be able to hold on for another 5 years? Or maybe 10 years?

(2:44). And the geo-politic of Turkey will touch the operation of China in Middle East. And this is very, very delicate position. How much Americans will try to entice him and what we've seen the bilateral and combination of meetings between Iran, Syria, Turkey, Iraq in resolving the situation is very important, because he had to relent to the Chinese. You have to understand the political situation Erdogan is in. And China again played a massive role in this discussions and what we'll see as a peace in this part of the world. The earthquake was part of it. Turkey does not have the financial backing to reconstruct this massive earthquake. And guarantees through Chinese construction companies will bring him relief. And it'll be paid in a way we know how. It's been set to be paid in a very, what you call it, physical way. And Erdogan to get that, to re-elect and to be there, had to relent to peace applications and pressures of the China with the, what we call, quadruple nations. And in the background he had to kick the Americans and turn back on the Israelis. But this time he cannot jump just to get re-elected.

(2:46). Chinese will hold him to this. And now we see a lot of... Erdogan talks, but position of power has changed in his operation. And Chinese have a lot of say in the process of changes politically in

Turkey. And we'll see in the end of interference of what you call, Americans in that part of the world. When you look at these things and when you speak about the person, you have to understand the whole culture he set up. As we say in English, Chinese have got him "by the short and curly's." And he will stick to it. He will not budge and we'll see the peace process in Syria will complete in a favorable manner for everybody. The biggest problem has been to resolve the situation in northern borders of Iran on the, what we call, Russian satellite countries, which now they think they have a power and they've gone in "bed with Israelis," but the tale has been cut. Again with this agreement. So, Erdogan has a lot of freedom, but he cannot... domestically he is very powerful, but internationally to stay in power he had to give a lot out to the Chinese. And to get it he had to say goodbye to a lot of American's agreements and you see more and more of it.

(2:48). We'll see a peaceful in what we call, West Asia East European zone in next 3 to 5 years. Any other question? Shall we call it a day?

Q: .. What does it mean when someone has two different eye colors? There are two different colored eyes, I should say. And what does bloodshot eyes mean for the Soul?

K- Then you have to ask the guy who got the blood eyes shot. The different color eyes usually have a very... two different characters, or not personality. And they're usually very pleasant people to be with. I have a couple of friends who are like this. And I tell them sometimes, I used to

tell them, "can you close your eyes on one was green and one was blue?" And I used to tell, "can you close the blue eye and tell me what the green eye thinks?" And then I say, (2:50). "okay, close that eye and tell me what the other eye thinks, for the same emotion." They say, "no, it's the same." But when you sit there, they change part of the story. So, it has an effect. And she was a very close friend of the family and it was interesting. I did a lot of tests on 2, 3 of them like this. It's like the Chinese with 2 different position eyes, but with them is more emotional, with the Chinese is more trust. And I always said to my friend, don't get involved with her, you never know where your emotion sits. The blue eye loves you and the green eye hates you, so you never know which one you are. Any other question?

R: I think you did pretty well today with the questions, thank you.

K- Thank you very much. There's something which came up through, with the picture which is on the screen, in the today's teaching. We start seeing the real side effects of Corona. As long as we can connect to it and understand it. And the smell, behavior, new cancers, new conditions that we should not live in a way with all the way, but with a new way with the Corona, we have found new opportunities to survive them. What one of the parts is people who had a bone mass problem and they got Corona, we see some correction in their lifestyle.

(2:52). And so, it hasn't been all bad with Corona. It has had, but we have to look into it, and be aware to connect to it, to understand that Corona is a Calcium based. And not everything will be bad when you get a virus, because now viruses are part of our daily life, now that we have become man of space. Space does not have bacteria's, and nothing but viruses. So we have to learn and see which one benefit us and what hazards for us. And we had the first international contact with it in such a large scale. And for second, third time and we'll see the opportunity and the rest of it. We learned a lot from it as a scientific organization. And I'm sure once man start traveling in space with fields, we'll consider, we'll study the cycle of Corona in a very deep, deep way, to be able to stand the fortunes and misfortunes of space travel. Thank you very much for today and please join us in this July sessions, because this will complete a very huge part of the work of the research and trials for our work. Thank you very much for today and hopefully we meet you next week. And don't forget on 22nd we'll start at 10:30 to 12 and from July on we'll change the regular time of the Keshe Foundation 9 o'clock in the morning to a new time on Thursday.

(2:54). Thank you very much.  
489 KSW June 8, 2023 END
