<b>Part II: Q&amp;A.....</b>	<b>19</b>

# Part I: Teaching

(:18). K- Yes, good morning, good day to you as usual. Wherever and whenever you listen to these series of Knowledge Seekers from the Keshe Foundation Space Research Institute. We welcome you back and hopefully we share some more knowledge and we understand more. With what we had in past couple of weeks, we delivered of a nudge from one of the providers of the services, Livestream, we've seen it cannot match into other systems and he's created mayhem for past few weeks for Rick, to be able to broadcast. Man-made things with a small upgrading has created such a mayhem for the others who are already there. Now you can imagine what is the problem of the Creator and how much he's upgrading and updating and nudging things along to go. There is a point of interest which it brings you to a new insight if you understand the topics, you understand what is the essence of the... what is to be discussed. As we saw in the Intro, Earth is a nursery. Where the seed of the future stars and future Universes and life of Galaxies, More or less,

(:20). comes to depend partially from the seeds from the, let's say the tulips. The whole Universe (U) is not just one flower, just tulips. There are some roses, some other flowers, honeysuckles and the rest we have on the Earth. So, there are other nurseries in the Universe, which create that seed of Soul. Mitra is not the only citizens of the Universe. Mitra is one of, it's like when you live in a city,

you don't fall in love with every woman on the street, you fall in love with one. And this is what Earth is, has been, and will be. But, the interesting point for us, which is intriguing, if you have not understood, is going to hit you very hard, if you understand. And then, you have to understand what's the next. As we said, "Earth is a nursery." It could be a seed of a star, it could be seed of a galaxy, the Soul of the Man (STM) who leaves this Planet. Or it could be a dust in the way we see, cosmic dust, in the Galaxies, in the Solar Systems, floating around till finding somewhere to become that star, that planet, or become part of it. But, now as a Humans, we will have a dilemma. Because we have not reached a part of the Souls which left this Planet, billions of years ago. From the first Souls, (:22). which left this Planet. They became a seed, some of them in the Universe. And those seeds gathered enough energies, as a speck of energy beginning the seed of a, let's say, a star. Now, they have created a planetary system in them. Which in essence comes from the STM, or it created things from this planet billions of years ago. Now, the technology (T) of the Man has reached to be able to travel with the "speed of Soul," not the speed of light. And one of you, or a bunch of you, traveled the span of the Universe, and land on one of the planets, which was created from the STM from this planet itself, millions of years ago. There are a number of things that will come to be understood and it'll be part of the Space research, in the years to come. It's to diagnose, from the field-strength, from the behavior, from the psychosomatic of the

Solar System or a Galaxy or a Universe, if the seed was that from Tulips or from Earth. And, would the future mankind, now that has access to travel with the speed of the Soul, will come to recognize when it lands on such a system?

(:24). Would the system as he was created out of the planetary structure of Earth, would have a hydrogen (H) as his base. Would it carry water because through the water it absorbed most of the energies of the Universe with it, 90%, 95% of the weight of the man is water. So, it gives us a new dimension (D) in the Space Technology. The way that we thought we are the only planet in the Universe, and the only Solar System with planetary system. And now in the past decade or so, the scientists are telling us every day they are finding new stars with planetary system, and some of the numbers are increasing rapidly. Would our scientists come to the point that now we found this planetary system, now we found this solar system, and in these solar systems we find maybe possibly life like Earth or creation of the water, which leads to creation of life. Did this star, did this solar system, did this galaxy came from the Soul of the created things on this planet millions of years ago? And in a way as it was created out of, will create out of itself the same characteristics. Then it comes from our scientists to assess. When we come to a solar system, When we come to a structure, which now our scientists tell us, has water in it, has conditions of life in it,

(:26). the question mark for Man is to answer, "Did the seed of this star came from Earth?" And

would man be able to live a life near to life on Earth, on these systems? So, can we find Solar Systems, structures which have similar life as Earth? Putting aside the psychological pattern aside. Putting the coincidences that the energies can come together to create possibly life on, same as life on the Earth. Is, is the Soul of the Solar System from Earth. Did one of us was so devoted, so servitude, does not matter if you're a dog, or a cat, or a man, that led to be and became the seed and replicated what was on Earth. When you buy tulips you don't throw it away, when it finishes the cycle of life. You hold it, you look after it and you plant it next season, to give new flowers. So, the life comes to this point. Now that the Space Technology is opening up, not with a rocket and what I call, 'firework', but the knowledge and science of the creation, magnetic fields, plasmatic motion, gravitational field systems, and Man is good in making tools to measure things, and to be replicating it, then it comes. Would we ..

(:28). find systems which have a life like Earth, and would we in the future with our knowledge, confirm and in a way through the strength of the fields of the solar system of it or whatever, the seed connection with Earth. In a way then we see how the Souls of this planet, this greenhouse, are fed and become that star, the galaxy, the solar system, or a speck of dust in the galaxies. Those are the ones, which in holy books they call them the "hell." Nothing but just a dust. And is "heaven," that you become that seed, that gives that flower of the galaxies and the Universes a new

life. Then you understand why the correction had to be done on this planet to stop the killing, because now we see some problems in Universe, where the nursery did not clean up the infectious disease of killing. And we come to sort it out. To you it's 6,000 years from Moses and 2,000 years from Christ and the rest of it. But in fact, it's a few seconds, milliseconds, fraction of the milliseconds in the work of the Universe. So, what to you is thousands of years to get here, to us outside is just walk in the park. Even though to you it's very important. It's like looking at the ant colony and seeing there is something the ants cannot cross, or because of it they do funny things, and you correct it and the ants go on a straight path.

(:30). So, in a way, to you, it's just passing a few milliseconds, life of an ants, but the ants is his life and it could be that day of his life, the only day which lives. So now you understand, how important it is to get things sorted in this greenhouse. Because this greenhouse, if it's wrong, now that the seeds of the creation of the other planetary star systems from the seeds which came from here are growing, we have to see to get rid of this infection. Otherwise we'll have more problem in the future, when those seeds, stars and planetary start creating life and then the mayhem as we see, we come to clean up. But, if you understood this, now it means, we can go to the Soul, planet, from the Earth. Then we find a lot of common denominators in living, we find a lot of common denominators in the Soul of what we call, the knowledge, with this planetary system. We feel at

home, because it came from home. Years ago, 1970s, it was very traditional for the cars to travel from Middle East to Europe and go back for summer holidays. And, I was with a friend of family, and she loved Iran. And we were on the street, and a car came, passed, and it had a Iranian number plate on it. And, this lady, she's extremely, what we call, high society people, both in Europe and in Iran at that time.

(:32). She bent, she opened the valve and start taking, puncturing the car in a way, releasing the air. We said to her, "what are you doing?" She said, "this has the air of the, this country, where I came from. It smells different." And we were laughing at her. She said, "Every time I see a car with Iranian number plate, I have to do this, because it's different when you fill a car up with air here in Europe, this has a smell of Iran. So, when we would go to this planetary systems, would we smell the "smell of Earth"? Would we consider and find ourselves on the same strength, the same knowledge, the same emotion as we have on Earth. But the most interesting thing is, would the children of this planetary system, or the flowers of it, we call, will be the same as us on Earth? Technologically, in what we are set out to do, and as part of the work in colonization and going out of this planet in a handful of years, not with the rocket technology, but understanding the work of the Plasma. And knowing the advancements in science and technology on this planet with what we see, we call it, the test tubes. And all the new technologies which past decades

has brought to us, where we put egg and a sperm together in a tube.

(:34). And then, after a few days, we plant it in the womb of the mother, for that child to grow. The next step in technology and science comes with the Keshe Foundation Plasma

Technology. And this will bring a lot of ethical question in our work, in the coming time. But it's the reality which we have to face in the space technology. Once you put limitation on understanding and work of the space technology, you become that ignorant man. What it comes to is, now we know we can create a plasma. With using even the new technologies which we have established in Linz, and what it comes through our work of the Keshe Foundation with, especially Chinese and Iranian Space Agencies in the coming months and years, be able to create the plasma of the Soul, replication of it. This is not far fetched, we are nearly there. I brought you a knowledge to get to that point. And then, if we put the seed of this Soul in the environment of the magnetic fields, of very similar to the womb of the mother, in a way create a biggest Sun to feed the small Sun, the small planet, like Sun does on Earth, like the Soul of the mother feeds the Soul of the child in the womb of the mother.

(:36). And we put all the characteristics of a man inside, the new seed, and all the characteristics of the father and mother, in another Soul expansion. Would we see, the STM grows, without dimension of physicality (P). In a way, we put a camera inside the womb of the mother to see the physical

growth. Now, through expansion of the dimension of the knowledge of the man, we watch a Soul to grow from infant to a full mature Soul. Would it need water? Or, is it enough for it to receive all energies it needs, in tune with the Soul of the parents, of the provider of the original two seeds, for it to grow? And then it comes the biggest question for man. Would at that point, this Soul will carry the Soul of Physicality (STP), that can manifest itself as a child of the man, in dimension of creation of the Soul first, not the physicality as egg and a sperm? Now comes to the point. The essence of, part of the space technology of the new era, is that, with the new understanding, would we be able to create the children of the Soul of the planet. And then, watch it to be going through, in a way, in a test tube, or as you call it, (:38). but in a plasmatic condition, to watch it to grow. In a way, you watch the growth of your child in the dimension of the Soul, the perfection, the essence of the creation of Mitra. The Creator did not take, as they say, the bad ribs to create Eve. He chose the best rib that finds the perfect partner. You call it, Adam, you call it Eve, we call it Mitra, we call it the Soul of the child. It's all the same. Then it comes to the point that with the knowledge of the man reaches the maturity, that he can carry all essence of the STM. And from interaction of it, create the Soul of the child. And then as it receives energy from the Universe. The Universe is the womb of the growth, the perfection of the knowledge of the whole Universe within one seed. That is the "child of Mitra" and she's amongst us.

And through it will become the seed of the new generation in the Universe. In so many ways, now you understand the purpose of the teaching.

Understanding the process of it. Just because we teach, it doesn't stop. Just because now you came to understand the purpose of life, it's not the end, it's just the beginning.

(:40). What would it become of? What would be?

What is the essence of its Creation? And, if we understand this, would we choose to create children with all the pitfalls of physical illnesses, death, old age? Or we create in the Soul of a child, in the essence of the fields of the Universe, that has no end, everlasting life. Don't forget, if the Creator lasted so long, and through His fields has created the child of Mitra, so, shall the child be the same as the Creator. Shall never die. Then this brings us to a new fundamental question for all of us. What are we doing in counting sunrises and sunsets in the dimension of physicality, on this Planet. If we do not realize, we are those seeds, that onions for the tulips, that the next flowering time is somewhere in the Universe and not on this planet. And then, when another Soul from this planet comes and passes, says, "oh, that's tulips from Holland." "Oh, that's the Soul from Earth."

(:42). "Because I feel the Soul of the Star, not the physicality of it." Then it becomes back to what we said in one of the old Intros. When you look from outside, you don't see the Soul of a king, or a peasant, but you see a shining star. Which that star now tells you, through its connections, "I'm from Earth, and I'm connected to Mitra, I'm connected

to the Love of the Creator." And, in a way, when you walk somewhere and says, "oh, I'm so and so, and I'm son of so and so, and I work for such a company, so and so." Where you value your father and value where you work, but now you value where you came from, and you value the beauty of it. Now you understand where mankind has become that beautiful rose in the Universe with a small problem of little thorns on his stem. And we're trying to get rid of those little thorns we call killing and destruction. Otherwise the rose is beautiful like its Creator. Now, comes to a point with all of us, that in a coming time, in a... not much longer compared to what man has been waiting for in past millions of years, in a short handful of years, compared to the other part, (:44). man will have the ability to create "children of Soul." Understand for it to be able to. And then, what do we tell the Soul of our children about the behavior of us in the physical dimension? And what our ancestors in the physical dimension have done to each other. And, or we just "close the book" and we never let our children know what a horrible family we came from. And we try to make it best and rosy and not go there, because it's too shameful to be part of the human race of today. Would our next generation of Soul of Mitra's children, we'd like to understand what we have done on this planet to each other for thousands of years. And to the others. So, what it comes to all of us now, because we're coming to that point of technology, where nowadays we can choose the color of the eye of the child we bring up. We can

choose the color of the skin, genetically, before it's born. Now, would we care, with the technology and knowledge we have,

(:46). that the Soul of our children are perfect?

That the physicality does not need to kill, the physicality does not to have blue eyes all the time, it can change as it likes. The biggest question for man is, the technology is here on the table. What is humanity going to do now they know they can create the Soul of the children of man without the dimension of physicality. You call it, a "fountain of youth," everlasting life. And if you create children in dimension of the Soul, the same as the creation of the Creator itself, then it comes to you, in a very simple way. What would our next generation do to make sure that the Soul never commits a crime in the dimension of physicality? This is a very big question for a lot of you. Those of you who are listening now and those of you in the coming time, you listen to this. As we said before, we care how our child is going to be. Now we know we can create that child without us in the dimension of physicality through the fields of our Soul. Then how do you want that Soul to be created?

(:48). Knowing that it cannot make any mistakes.

Knowing that it is perfection. And knowing that the child of us being so perfect, it puts us to shame what we do in the dimension of physicality, for the extension or expand, or life of our Soul on this planet. The biggest challenge for the government in the coming months and years is, we cannot legislate for the operation of the Soul. And now the Souls dictate to us how to govern. And if the

Souls are in perfect working condition, which all are compared and in the condition of their existence, do we need, would we have anyone to govern us? As our Soul itself is governed by the "Soul of Totality," in the construction and understanding of the work of the Universe. The biggest challenge, for the Keshe Foundation and for Knowledge Seekers (KS), and for those who understand this, is watching how governments of today, will legislate, will bring everything possible to stop this process happening, as they know it's an end to their cycle. Because, a perfect Soul which does not commit any crime, a perfect Soul which does not kill, does not need no courts, no hospitals, no prisons, no judges, no Ayatollahs, (:50). no Mullahs and no Rabbis. Is the Soul of all these, will reach in the same position, that there is no position for no one to ?? attain in the dimension of physicality. In a way, accepting and understanding this technology, brings an end by itself, obsolete, the condition of the position and the power of the man in what they claim to be in the mosques, in the White House, in the synagogues or temples, in the back streets, of what call, dealings, to create this mayhem within the structure of the man. What will be interesting to see, would our leaders play the fool they don't understand to keep on to the power? Or would they fool themselves to be there while they are the only ones left? This week, in the past few days, we've seen the passage of one of the most charismatic, powerful, men of politics of the decades. By the name of Berlusconi as a Prime

Minister of Italy, he passed away a few days ago. During his time he played all the games to be in the power. And at the end he succumbed to the same thing as the rest.

(:52). Most probably, he died in the same hospital that a worker, a street cleaner died in another room. Maybe a bit less polished. But, the physicality has left. And this charismatic man, with everything he thought he can buy with, he bought with. But he didn't take much, and soon he will be in the book of the history, as he already has become. Then, it brings always

the life back to the man. Would our Souls will be that charismatic, that has no need to be on top, but is one of those amongst the others, but serves the same as being on top. And, once they know, they can not do much, because the pressure from the other side, in the physical dimension, will bring that end. Because, they want to keep the "status quo," as long as they are called, and they are there to be called, the Presidents, the Prime Ministers, the Kings, the Mullahs and the rest of it. What will be interesting for Knowledge Seekers, in the coming time. We're talking Knowledge Seekers as those who seek the knowledge in the further steps, and understanding of it, is that, now that you've been through Enhancement Units (EU) and you can go back to your mother, your father who died years ago, or they're somewhere else,

(:54). to bring us to the point of understanding, that we can still trace them, the way our dreams goes. Now understanding you met the mom who died 20 years ago, you can clear, find, with the

new technologies developed, the strength of the Soul, would we be able to pinpoint where the Soul of the mother is? And, where and how will be? As the death brought an end to the dimension of physicality, but serving in the dimension of the Soul. Would death mean an end or the beginning or just, as my brother said once, when one of our relatives died, he said, "Mehran, he hasn't gone anywhere, he's just changed his dress. We have to find out where he has bought the house to go there. We're just burying old clothes." And this is where we come to. And then it'll be interesting to see if our Knowledge Seekers of the future, understanding this power of the STM, will be able to see how the Souls are serving us, and the humanity and the rest of the Universe, from what they learned, the pains of the growth on this planet. I brought these subjects up today, (:56). in a very specific way. Last week during the teachings of the Keshe Foundation, one of our most dearest friends and heads of the Keshe Foundation operation, Dr. Bararpour passed away. I spoke with him, couple of hours, maybe hours before he went into the first stages of living his physicality. And, first of all we give our condolences to his family and all the Knowledge Seekers. As we lost one of the cornerstones of the work of the Keshe Foundation in Iran. And, as a spokesman of the health of the Keshe Foundation, one of those who was there to support every one of you during the Corona. And it has brought me wonders, when would the Knowledge Seekers would go to the grave of these great men, but find

through technology and knowledge their Souls, and see how they serve man, even though they are not in dimension of physicality. The passing of Dr. Bararpour brought a lot of seeds of thoughts, his understanding how man will let the physicality go. (:58). And how the Soul is serving, then to us, we're looking in the dimension of physicality. Would our Knowledge Seekers, and the knowledge which we gain in the coming time, will be able to bring, to confirm, to establish, in how these Souls still work in the different dimension, to bring mankind to that point, where in physicality they left? And would our Soul, will reach to the point of not needing no physicality, no dimension of Creation, but serving all the same? Interesting enough, is that, what would be the children of their Soul? Even though they had no children in the dimension of physicality. What would they nourish? What would be the essence of the creation in this dimension? And would the humanity learn to live with both dimensions? The fields, or the STM, and the dimension of physicality of the man. And one of the most interesting things for all of you is, would any of you, (1:00). as you gain more knowledge about the existence of your Soul, would be able to dodge, or move, or find the true process, that you can embed the STP within the STM, that even the physicality shall never die? As you manifest it, whenever it is, and when it's in the dimension of the Soul, and the Soul is perfect as a fields, will do all the repairs into the dimension of the physicality. We are

proving this to be correct, slowly, step by step, with the work of our doctors in the Enhancement Centers. And in dimension and direction of understanding the fields of the plasma. And hopefully, hopefully, one of these days, one of our Knowledge Seekers or some of our Knowledge Seekers, will come and tell us, and scientifically prove to us, and scientifically connect us, not to prove, but connect us, with the Soul of the great Men of the Universe, and not only the Earth. Where we'll tap into their knowledge of the Universe, knowledge of the existence, and understanding this, we understand we need no languages, but it's the knowledge which we receive, enlightenment. Knowledge is gained by reading and whatever we do, (1:02). enlightenment comes through the knowledge of the Universe, in a plasma condition. Knowledge we gain in the dimension of physicality, enlightenment we gain in the dimension of the fields of the Universe. Would there be a man, or would be a time, that man of the Universe will have the same privileges, understanding and the life in both dimensions, enlightenment and physicality? That the knowledge of physicality and the knowledge of the Universe at the time, point and the place, will become beneficial to serve the others, for their enlightenment and their physical life. Then, we come to understand one more point. And that is, has the man matured enough to enter the realm of the Knowledge of the Universe, and understand the work of its Totality, and not the dimension of

physicality in the village of Earth? Maybe, teaching of today, is a seed for the future researchers of man, not only to find the strength of the Soul, for the enlightenment of the Soul, for understanding the work of the Creation, and not to be put in the books and computer programs of the physical man in the dimension of physicality and the knowledge. We have to learn very much ?? soon, as in the world of matter state we travel, (1:04). in the world of the fields we transmute. In the world of physicality we gain knowledge in the world of the Soul we get enlightened, where in fact there is no physical knowledge but the knowledge is all physical if the man wants to transfer it. Then it comes for all of us to understand and decide in the coming time, which world, which dimension we would like to live, that we do not leave to one or the other behind, or the demise of one, for the other one to be able to live. Where the STM, the STP of the man, and the physicality of the man, will live together as one, in one essence. But depending on the interaction and satisfaction of the other Souls, they decide to appear as a Soul, STP, or physicality of the man, at a time, place and point. I hope I opened your eyes to what is to come, what is the seed of knowledge has been set for man to be enlightened. And in the coming time, the Knowledge Seekers of the Keshe Foundation we'll introduce these systems, that you can decide. First of all, to see your own Soul, as many of you have done, who came to Linz. And then decide if you want to share that Soul with another Soul which creates not the dimension of

physicality child, but the dimension of the Soul.  
The same as the Soul of the child of Mitra.  
(1:06). It's a very deep knowledge. And beginning  
of a work for man who had no knowledge about  
what is being taught. Now you know. Now you are  
responsible for it. And now you have to get it right  
this time. Thank you very much Rick. We go for a  
break and we come back. And we go through, if  
there are any questions. Don't forget, next  
Thursday, teaching starts at 10:30 and finishes at  
12 o'clock sharp. Thank you very much.

<< BREAK >>> 490 KSW June 15, 2023

## Part II: Q&A

(1:13). K- .. Not really, if anything comes up.  
There's a couple of reminders to remind you. First  
of all, as I said in the first part, we give our  
condolences to the Bararpour's family. And this...  
we're announcing the passing of Dr. Bararpour last  
week, within hours of his passing. We created  
unknown problems, or emotional problems for the  
family, which we apologize, we were not aware of  
it, but it was us showing the pain, we suffered with  
his passing.

(1:14). In the same time, my condolences goes to  
the whole of the Keshe Foundation, on his passing.  
We hope his Soul has found his position and the  
elevation. The other parts of the Keshe  
Foundation, the work is the same. We announced

the July sessions of the Keshe Foundation for wellness. And some people said they cannot attend every session, the four sessions, for three weeks, and the final session on a Sunday, the 30th. So, in response to what you asked, I have divided this into 4 sessions, so you can participate for each session, separately, or if you decide to do it week by week, on the 14th, 21st, 28th and the 30th, the final session. So, instead of being one, as, what is it, 1,000 Euro, it's been divided again to that 300 per week. You decide which one you want to join in, and be and you feel one week you want to join in for the addiction, and one week for the Cancer and one week for depression, all it leaves to you to how to join. In respect to what we call, the Keshe Foundation work, we're still on the same track.

Very soon the announcements will be made by Keshe Foundation in respect to our work internationally. We expect to change the timing of the teachings on Thursday,

(1:16). to suit the new conditions and new, what we call, positions. And it won't be far out. It'll be a few hours back and forth. But it will stay on Thursday, it's the same. But we'll announce this before end of June, that in July onwards we... or July, August, we'll take a new structure of teaching hours, for the time being. Are there any questions?

Q: .. Can the July wellness sessions be attended by people

with implants, metal parts and genetic disorders?  
K- This is part of we want to find out. That's why we put no restriction on this. It's your responsibility to understand what you do, what

you have. But we have put no restriction, this is a wellness session. And this is where we, in a way, we see how you will respond to the structure and expanding. I received a private message, where we made a mistake regarding the passing of Dr. Bararpour. The mistake was not actually a mistake, but it became to be a painful misunderstanding for us and the Bararpour's family. And that was, we were informed of the passing of Dr. Bararpour immediately, as the head of the Keshe Foundation in Iran, was present at the hospital. He died of a stroke, a very healthy man, had one stroke, and then he had the second stroke and went into coma. (1:18). In between the first and second stroke, he spoke with me, "what can we do?" And by the time we couldn't do anything, they took a ?? and he done ?? had a second stroke during the operation. And, as we had this shock, in a way, highly valued man for us, not from the Keshe Foundation, but as a man, integrity of a man, we made the announcement throughout the Keshe Foundation channels, worldwide. Unknowing that his family in another part of the world, had not been informed, and they are always true. They go through the Knowledge Seekers, and different channels of the Keshe Foundation, the whole family were working around the work of the Foundation, wherever. And they got the message before they get it from the family, and that was a shock to them. We apologize for this, was our respect to the great man. But unknowingly, not knowing that there was such a pattern of life, in his private life, immediate family, some of them

haven't got to know about his passing, through the Keshe Foundation channels and brought themselves pain. And we apologize for that, as was not intended, but it was respecting the great man. Now you understand how it happens and we sincerely apologize for Dr. Bararpour's family, especially his parents and brother and sisters. Okay, are there any other questions?

Q: .. Hi Mr. Keshe, I am studying the creation of matter from the ray to the neutron. I'm struggling with the last step.

(1:20). Can you please help by explaining what causes the matter mass to present as physical matter? In other words, when is a plasma, plasmatic and when is it a neutron? What causes that shift? Thank you.

K- It's not a shift, it's the strength change. The change of strength. It is change of environmental strength. And in a scientific way, it's a combination of Gravity and Inertia. And if you understand this, and this is a dilemma for many people, that how to create the both at the same time. In the Keshe Foundation we have resolved this matter. And it's not an important subject, it's something, some 30 years ago I resolved. In a way, if you read book number one and understand it, it has been explained fully and thoroughly. And if you put a couple of chapters of the Book number one and read a couple of chapters of Book number three, one after each other, you will get the full message. And maybe if you work the other way around, read couple of passages, what you call it, sections of the Book number 3, and then find the

relevant chapters in Book number 1. That's energy to matter. Creation of the Universe.

(1:22). And the origin of matter. Depends how you connect it. Book 1 to 3 is matter to energy, and if you read Book 3 to 1, you'll find how you convert the energy into matter. It needs a lot of understanding, but the problem is not Earth condition, creating condition like other positions in the Universe, which will become a challenge for man. Because, the two obstacles, when you measure gravity from a distance, from a planetary system or a galaxy, you have interface and interference with many other fields between you and the position you're trying to measure. And you have to learn how to filter this out to get the actual data. And then you should be able to transmute, manifest from one, in dimension of physicality, when you want to. In the future, and this will be part of the test will be done in next few months and years, is that when we create these plasmatic energies that we transmute through, how safe can we make them that external energies cannot enter or interfere with during the transmutation? In a way, how do we shield it? This becomes one of the main points for the scientists in the future.

(1:24). That you stay as you left, the energy of the STM, and the STP of the man. Because we know the physicality will change at the point of the Inertia and mass and weight. And what we call, gravitational field interactions are all together. There are a lot of hidden knowledge's which man has not even come to think to find out. If this hidden knowledge is understood, then questions

like this will not arise. When you read Book number one, I explain clearly how you go from mass to weight and how mass is created. And then you bring the book number three to book one, then you understand the answer to your question. But, my advice to you is very simple. Do not fall in the trap of the present science. That you try to make one neutron, or move one neutron or whatever. Then you get, what I call, scramble in the up quarks and down quarks and west quarks and down quarks, west and the rest. Try to take that neutron to the body of man, size of body of the man, a flower, try to understand that. Then you see you look at it with a bigger understanding than trying to sort out one neutron, which actually is so important, but so little that you cannot even see to understand the operation of it. Any other question? (1:26). Q: .. Hello Mr. Keshe, I'm trying to replicate a MaGrav Power Unit."

R- I guess you know where this is going, don't you Mr. Keshe?

K- Yes, carry on.

Q: To what I understood from the blueprint teaching week, we need to put on MaGrav coils, Gans's that have heavier plasmatic mass, than the plasmatic mass of a Copper Nano layer. So, the best solution to that would be to mix CH<sub>3</sub>, CO<sub>2</sub> and CuO Gans's together, and put them on coils. I want to create a MaGrav Power Unit that will amalgamate a big free plasma, that later, when I make other plasmatic devices, like a Health Unit, it will use some of the fields from the big free plasma, to work even more efficiently. My

questions are, what other Gans's, besides the three popular ones, are safe to use, that we can put them in the Gans mixture, to further increase total plasmatic mass of the Gans mixture?

K- You've got to look what you're making it for, and for what purpose. And how you bring them together. You got to understand, this is something which Knowledge Seekers have a lot of problem with, and I tried to explain this over years, but I still see the same problem. We say, the three basic or four basic Gans's.

(1:28). Look at it, why four? You have CO<sub>2</sub> as a connection with the Carbon. You have Zn for neuro system and emotion. You have Cu for the body of the man, physical body muscles of the man. And you have a CH, which is the energy feeder of all three. When you speak about four basic, this is, this is the... You have amino acid (AA), which is Mr. COHN. Now you have a physical plasmatic AA, which allows Mr. COHN to operate in a dimension of the life on this planet. And a lot of you have not seen this. And you don't understand it, and has caused a lot of you, a lot of what I call, problems, for trying to understand. In the world of the, science, if you look at it, you... science of plasmas, you talk about the four main ?? gas (Gans) ones, you have CO<sub>2</sub>, you have ZnO, you have CH<sub>3</sub>, and you have CuO. If you look, it's all the same, you have the connections, in a way, when it comes to Oxygen, it's there.

(1:30). And then what you see is all this, as a connection Inertia. But what you see is replacement of N. Which part do you want to play

with? The technology has been brought fundamentally correct from the base, it's the lack of understanding of the operation, which is causing so much trouble for a lot of you. If I rewrite this in a systematic way, you have C and O. You have C and H. You have Z and O. You have Cu and O. If I take these two out and position them here (Zn & Cu), now you understand. Where here (COHN), we speak in the matter state, where here (combination of Gans), we speak about plasma state. In the plasma state, we need more connections, and gravitational field always holds. So, what else you have in the body of the man, here (COHN), you connect it to Calcium. You make the, what you call, every basic cell of the man.

(1:32). Here (Gans's), what happens when it's connected to Calcium. You got to understand the fundamental principle of the knowledge. Then you understand how everything works. This is not four basic Gans's, this is why four basic Gans's. I have given you the alphabet, it's for you to make the word and sentences the way ?? God does it. As this with something else become a cell of the heart, something else with it becomes a blood, something else with it becomes a brain, and everything else. But you have the building block. COHN is building block of a matter state. The four integrated Gans's are the building blocks of the plasma of the Creation. On this planet, on this life. This is like what I said, transportation (COHN) and this for transmutation (Gans's). Even though both have magnetic field characteristics. Then you

don't need to ask these questions. Because you have not understood the fundamental basic structure of the teaching, all these ambiguities and questions comes up. Any other question?

(1:34). Q: .. Is it advisable to create a gradient of field strengths between each of the three MaGrav stacks, for example, by putting the heaviest Gans's on the bottom, the semi-heaviest in the middle stack, and lightest on the top stack?

K- This is what we taught from the beginning. It's in the original teaching of it.

Q: .. Would it be better to make all three stacks mono strength by putting the same mixture in all three?

K- It works on this way. It works in a very simple way. You... you... it always works on the, what we call, the triangle, or pyramid condition, or a Star Formation. Your most of the energy is taken out of the top. Because the energy fields, the lightest goes on the top, and the heaviest goes to the bottom. Because it's feeding, creates energy that you can tap on into, or create the fields over. But again, depends how you want to do it. What you're expecting of your MaGrav? Knowledge Seekers have not really understood the work of the MaGravs the way it's been set up. Any other question?

Q: .. Hello,

(1:36). recently I bought a radiation detector for alpha, beta and gamma, and started measuring things. I noticed that the level of radiation increases from about 0.2 microsieverts, which is

normal, to about 2, when I explain something to someone. The older kid of mine measured about 10 microsieverts, which is high level, while playing with a cat. Both measurements were taken in the chest area. Are we communicating through nuclear radiation too? Where, where does that radiation goes or comes from? I don't know if it was, if it is related with today's subject. Thank you.

K- In a way, we receive 80% of our energy from outside, sometimes even 99% of it from outside the body in. And not by eating, just by the fields. And the interaction of the fields, some can create radiation level detection, but it's not necessarily radiation. These kind of measurements are very common. It's how you do it, and how the measurement of the system was set up. What radiation to detect and what to show at what level. When I was in University, just before I go to University, I had to do a project. And I built a Geiger counter you call it, radiation detector, as a final project before University.

(1:38). And it was in a green box with a handle, I used to walk around the college and go around people and goes, "beep, beep, beep", I said, "you're radiated, beep, beep, beep". And actually that was one of the things which was discussed in my acceptance at University, why you do this, because I thought to see how much cosmic rays around, and I had to explain that to that time, Professor Leslie. And I started playing with this and changing resistors and capacitors and everything else, and I found that I'm measuring

radiations which is not even booked anywhere, but it still goes beep, beep. So we try to find out if a tomato beep, beep was the same as an apple beep, beep and the rest of it. And it depends on how your system is set, and what materials they use.

Numbers are irrelevant. The intensity, which is important. In most of the systems you buy in the market, do not bring that Soul of the radiation with it. It's just measuring something and tell you it's about as nearest to. You can buy a combination of radiations, or you buy individual radiation, alpha, beta, gamma, or whatever. But it's a tool. But on another hand, we absorb energy through radiation. and part of our emotion is transmitted. Especially when you fall in love, for example. I wonder, I many times thought, what's the radiation fields of, what you call it, loving. It must be worse than gamma ray,

(1:40). because it's infectious and ?? goes out. And it kills you. So it must be that good. But you can measure different fields. You can measure all kind of things with these machines. Depends what capacitor, what resistor, and how they made the circuitry for it. If the circuits were made in a specific way, the same radiation shows us 10 times higher on the other one. But you cannot use these detectors near Gans's. The first few time gives you a reading you're happy, and then the reading is false. Because the radiation from, or the energy from the Gans's, will settle within the circuits. And you find out, we call it, saturation. And your system looks as it's working, but it actually is false reading, because it has been saturated with what

you call, magnetic fields, plasmatic fields. We know this from years of operation. Many of the electronics you buy, oscilloscopes, power generators, which come into the circuits of measurements, or in touch with Gans's, after a while are useless. The same when years ago, when I used to have these power generators and the oscilloscopes in Belgium. After a few weeks, I used to send them back. They don't work. And they couldn't understand what they were going to. I couldn't tell them I'm working with plasma. I get it saturated. They used to do something with it, they charge it or change a couple of things on it, and come back and it was three, four weeks later, it was back again to them. The machine doesn't work. Then we start realizing power saturation of the, what we call, (1:42). the plasma in matter state materials like transistors and resistors. And I built the system for it, not to allow it to go in. And now, in all the systems we use, we build this automatically. It's automatically built up to absorb energies of things. So if you have, you bought this Geiger counter or whatever, you have to build the structure that absorbs the plasma, and then you can keep it. Otherwise, you see all the time it's giving you good news, but actually it's false reading. Because the plasma is operating in ???. Or become a very good Jewish boy, and the Jews don't mix the meat and the milk plates, they all ??? keep them separate, use the Geiger counter just for matter state radiations and then build another ??? counter ??? that you isolate it from plasma, you can measure

plasmas in true energy field level. We do that in our labs. All our systems in operation with this ?? with, always have this insulation, isolations. We developed it by experience, and it works. It's a plasma isolation system from matter state systems like the counters and computers and the rest. You cannot operate without it.

Q: .. How can the plasma of the STM be infused inside the fetus?

(1:44). K- Wait till when the scientists teach you. If we teach you now, they'll call us antichrist.

Q: .. Mr. Keshe, do we create a "child of Mitra" each moment we have an intention, or a thought, as everything has a Soul? So the perfect Soul of the child of Mitra, when the thought or intention is pure, has already been created.

K- Repeat that.

Q: .. Do we create a child of Mitra each moment we have an intention or a thought, as everything has a Soul? So, the perfect Soul of the child of Mitra, when the thought or intention is pure, has already been created.

K- If you look at it that way, you are a child producing matter, all your life, every breath you take. Not really, but depends what you put and what you state on it. (Rick, can you make me a co-host on the second line, please? I forgot that.)

Okay, anything else?

Q: .. So, does the Soul merge with the Cosmic Rays, when it elevates to travel, on it like a highway?

(1:46). And could these rays be considered the blood flow of the Creator, and are the rays in a

cylindrical form, like depicted in your second book?

K- Oh, just because you take a ride on the back of a donkey, does not make you a donkey, does it? So, if you travel on a cosmic rays, you don't become part of it. But you have to understand, there is certain energy fields interaction between the two. Otherwise, they will not hold, you cannot get a "piggyback." So you establish certain connections, but that connections are just forward, it's what we call, interface, but in principle does not touch the Soul. Otherwise you get on a fast one, a stronger one, and you become so elevated, you don't even remember where you came from. So, this is... it's just like when you get into a car, just because you're in the car you don't become the owner of the car, and the car doesn't come to go to one place. And this is part of the knowledge we have to understand. It's not so easy, especially for Knowledge Seekers, who are, what I call, with the man behavior, not a woman behavior. In the knowledge of the Creation and plasma, you have to consider multitude of things, like women, to be multitasking. And all the time be aware of all the angles of interaction. And not just like man, you do one thing and you cannot concentrate on the second one. So this is the problem, majority of the problem, with a lot of Knowledge Seekers and understanding ?? world.

(1:48). When you look at something, look at it in all angles, not just specific one which you are interested in, then you make mistakes. Because... And this is part of the work that a lot of

Knowledge Seekers have a problem with. When you consider with the plasma, you have to consider all, in every angle, in every direction. And then it structures you to become, it's something over time, if you do a lot of it, you get used to considering a lot of things. In the plasma technology, singularity of knowledge will get you nowhere, more or less. You have to consider every angle of possible interactions. And that's why the people keep on telling us, oh, how do you know this? Because I look at 20 things. You don't know it because you look at one thing. It's a collective knowledge. And you get used to it, that it applies to every aspect of the work of the plasma. Doesn't matter space, doesn't matter food, doesn't matter motion. You have to consider multitude of interactions. And that's why, when one of you does something, it doesn't work, and the other one does, it works, but because he considers things you never considered.

(1:50). A little twitch here, a little winding there, connection of the winding together, the creation of the fields, they merge together. There are a lot of factors, a lot of factors, in plasma technology, that you have to decide what you want the outcome to be, to set out that the interaction gets you there, you can never start. You never start fresh. You create conditions to create new interactions, and that gives you new, what I call, environment. New ?? test ??. Any other question?

Q: .. Mr. Keshe, do our thoughts have a Soul, and if so, does the Soul thought continue forever,

depending on the intensity of that thought, or how it is expressed?

K- Oh, you can use your thought as a ray, to get something somewhere, your emotions as a package. But then you decide. You have to be. One of the hardest thing for Knowledge Seekers will be their arrogance. I go back to the teaching of last week, I said,

(1:52). "if you want to get to the grandpa, you don't become going there with the strong thing, you'll never get. If it's ?? he'll ?? never accept it. But if you go humble enough to be there to serve the grandpa, you'll find that they'll be knocking on the door very soon, to receive. There is something I have to announce, because I just got a note from our people in the background. There are new paintings, which has been put on the Keshe Foundation, go on the Keshe Foundation maybe today. New set of paintings from Austrian painters, which has been added to the collection. And, if any of you are interested in that.

R: Let me get that up, Mr. Keshe.

K- I don't think they are on the ?? website.

R: It's not up yet, you mean?

K- It'll be on the store today, because they are in the exhibition, but they have not come public, so. They're new paintings, by new artists, Knowledge Seekers is starting here, bringing things in, so, we're there to promote it. Any other question?

R: Okay, we can send out a link for that, once that gets set up.

K- Just go to the store, to the usual place. Any other question?

Q: .. Good day Mr. Keshe, can you elaborate on why, (1:54). when I left my body I could communicate with dead relatives. Did I travel into the space they are, or did something activate upon exiting the body?

K- How did you leave your body? That'll be interesting to know. And once you free the shackles of physicality, you're on the open highways to any of it. Just be careful that you don't crash. Any other questions?

R: That's all the YouTube questions. Let's have a look at our chat. Nothing new in the chat and our Q&A questions are answered.

K- So we call it a day?

R: I think, it would be good, yes.

K- Yeah, Knowledge Seekers are ?? got to get to know what is coming, and what is getting more and more expanded upon. If you don't understand it, but we're trying to structure something. In the next few weeks you will see the outcome of it. All these teachings has a reason. And hopefully, you, as I say, will see, realize the knowledge. Thank you very much for today, and don't forget next week, we start at 10:30 and finish at 12 o'clock Central European time. Thank you very much Rick, and see you next time.

R: Okay, thank you Mr. Keshe. Thank you for another Knowledge Seekers Workshop here, number 490, I believe, we're up to that number already. And coming up very rapidly to the 500 number here,

(1:56). another ??.

K- Will be 500, let's see where we get by then.

R- Yeah.

K- Thank you very much, and see you next week.

490 KSW June 15, 2023 END
