Part I: Teachings.....	1
Part II: Q&A.....	24

Part I: Teachings

(:14). K- Good evening, good morning, good afternoon to wherever, wherever you listen to this series of knowledge subject, Keshe Foundation Spaceship Institute. We welcome you back. And we apologize that we had to change the time of the teaching today from nine o'clock to six o'clock as usual. Whenever we have something important. We try to be the same day, but try to move the time when it can be fit, that we can be there to learn from each other. Today's we have a number of announcements and a lot of things, which has happened in the last week, and a lot of things to learn, and answering some questions and see where we go. If you were with us on the 19th of February, we did the session "Dining with the Creator." And then it allowed the Knowledge Seekers (KS), some 150 - 160 of them, to dine for the whole week with the Creator. And then the second week to entertain the Creator, to see what they bring on the table. And this gave us a lot of insight, opportunities, for us to understand who we are, what we are, what we do, how we handle, how we feed, how the feeling to us is, and what it means. And what it does. This was a quite a large number for us. And learning from it was the cornerstones of the whole exercise, for you and from us. As I was explaining to one of KS in last couple of days,

(:16). to do these kind of surveys, to do these kind of trials, to do this kind of testing, for an

organization costs a huge amount of time organizing and all sorts of things. And a lot of financial backing into it, and all sorts of finding at the end, if you actually find the right answer, and you get the right emotion from the test you've done. But thanks to the Knowledge Seekers we are leaping in a very fast level to where we want to be, because we get the data we see how it is. And we understand about the behavior, human behavior. On a return call in a way, to see how people did. How it was. Did they actually feel anything? Does this system work? Because it's easy for us to say, "oh, you came, you went there, you did this and you did that. But it was important for us to see how the system interacted? Does it actually interact? Or is it just for us to say, we have a system? And in a the way, the food is the best way to get man going. As the Chinese say, when you say hello to a Chinese, you say "nei hao." And then the second word is "Sha ma," "have you eaten? Are you hungry?" So, this is the habit of man. Man, are you hungry? What do you want? What can I give you? How can I satisfy your hunger? And in that process, we come to understand a lot. What we expect. What we want. What we see. How do we feed ourselves? Can we find? What is the effect of living in the space without food.

(:18). And we allowed in the first section of the Sunday Testimonials, which is fully recorded and kept by the Keshe Foundation. And some of the Knowledge Seekers have recorded it in the background, to see what it was. How it was. How

people felt, and how do people feel getting in these kind of conditions? We saw some interesting results, some interesting answers. And at the end of the session after what we call, Sunday, we took a poll, we asked people questions, and they answered. And we took a good look at what it was, and how it took shape. And how many people answered. And I took a screenshot of not the final poll, but near to last 10 or 15 minutes of the poll, how people responded as we went from different languages and different things. But more or less every person on the panel except the organizers and translators, whatever putting aside, we had 79 or out of 80 answering the 79, the 79. And this gave us a very good indication. There was a small misunderstanding in the last question, when we said, what would you give your Soul, you would you give up your Soul with the other entities with this? And this created a lot what we call, dilemma for some. Otherwise, still sits in a very interesting position. The most important thing for us was, does our system interact in the mass numbers? Because we have a reason to understand. And the beauty with this is that, if we can interact with you by food in mass, can we interact with you by food for your energy.

(:20). Can we interact for your wellness? Can we interact with you for creating conditions of transmutation and transportation together? And this was one of the very first trials that we looked at this, and how it is, and to take any ambiguity away from the whole process. How many people who actually went through the 19th of February

session, and the following two weeks, how did they feel? What was the feeling? And there were 8 common questions between them, which we wanted to know? And we explored to understand these, what we call, answers. What does it bring to us? How does it allow us to expand our knowledge? How do we see? And how can we go further, in understanding of the Totality of the whole structure? Does the human race, would the human race comply with the what we call, the standard pattern of what we wanted to do? And what can we understand from this? One of the first questions we asked is, did you salivate during the session, which means did you create water? Because this water we produce creates a salinity, which decides what energy we absorb from the environment. We have this, as you can see on the statistics,

(:22). we went to at 79 out of 80, we took a screenshot of 69 people watching while it was going on. And we see about 75% did. Which means the system has a capability to trigger the brain of the man to produce water. But most of the water which you produce at this moment through the interaction of the plasma is a plasmatic water, and it's different than the water your drink. It's already converted into a plasma. Saliva is different than water, which means it's a combination of interaction of the fields. Because it's already, it's within your structure. And this structure allows us to see how you feed yourself, how you absorb energy. When you have a dry mouth you absorb different energy from the environment, when you

have a saliva, or what we call, salivation in your mouth, totally different kind of energy is absorbed. That's why we drink water, and drink water, drink, it's not the saliva, it's a different structure, it's a different plasma, because it just entered, it has not been converted. And it was important for us to see, that you actually create that water in your body. And we see the same thing in the lungs. When the condition of the lung changes, we collect water in it. We create a moisture of the lung, and if we change the breathing technique, we can get the lungs flooded, or different kinds of energy absorbed. This question was very wise. Because if we can get you to create a saliva, we can get you to create a different salinity to absorb different energies.

(:24). So in according of the plasma, we can create a condition that it creates a saliva for chips, it can create the saliva to absorb the energy of an apple. Scientifically, this is a huge answer for us. But scientifically to us, it tells us we can give you energy the same way, the same structure as for cancer, as for schizophrenic, as for Alzheimer, as for any virus in the Universe (U). So, we can dictate. And we put to this structure, people who are receptive to receive. When we put the same team again back in a month time through the same process, you will see the figures of 75 will go to 95. Because the body has set for, we have prepared it for. So this first question was a crucial question for us. It's that, first, if our system interacts with the people, and how we can use the fields of the interaction. And the whole purpose was, if you

remember, we had the German lady which we asked her to drink water. She said, I was getting flooded up, so much water was coming, so I was creating so much saliva. So, we knew it with one person. Now we have 75% of the people in this, and this is half of the people who actually came to dine. The second question for us was, have you noticed reduction in food consumption in the following week? 77% say, yes. So, if we pattern the first question,

(:26). in a way that every day we change the combination of the food, most of you within two to three weeks will not eat anything. If 77% of you have noticed reduction in food consumption, which means you have taken it from the system, because you came in every week to eat. But you take what you need, you can't be obese, loads of the plasma. So with the second question, we came to understand that we can feed you. Because you stopped taking physical food. This goes back into the program, which we put so much, you can sign in, and we will feed you for life, for a whole year. You don't need to, it's one of the policies we put out to cover. Because we know now by creating salinity, we can get you to eat as much as you need, but the body takes what it needs. And the most interesting part of this was question number three. Have you felt better overall, in the following week? 83% are happy, are satisfied. Which means man can move away from killing. Which means by combination of the food, by variation of the energy every week, even three, four times a day on a program of the system, we can satisfy all your

needs. And you'll feel better because you're not killing anymore. You don't have to have worries, where is the next food comes from? I have a headphone on my head, I get the food I need, I need, I feel better for it.

(:28). And we went to the beginning of the system, do they feel more energetic? 77% say, yes. If you notice the figure sits around 70 and 80, we always have that 10 - 20% we cannot reach the first time. But the ones we reach is complete. We have people who come to the system say, it doesn't work for me. And we know why it doesn't work. And in the long run, it will take time. When we Nano coat a wire in a house not all the wires get Nano coated at the same time, the same strength. Step by step, you tune it until it is done. So in a way, when they feel more energetic, it means they're taking the energy they need. Transfer of energy through plasma. What was interesting for us was question number five. Have you lost any weight from the time of the session started? A third of people have lost weight. And we expected this, because it means you don't eat what you don't need. You take in what you need from the system. So in a way, you have not been on a diet, you are well fed, but 33% of you in two weeks, some lost 1kg, some lost 2kg, some lost 3 kilos. We have in trials people who lost 12kg, 10 and 12kg within eight weeks. And we have using this structure of the plasma communication from the system. But we have people in China and other places where they went on the liquid take of plasma, they've lost

20 - 30kg, and it stabilizes after three or four months,

(:30). because that comes what it needs. But the question number six is a very tricky one. But you have to understand where the trick sits with it. It says, have you felt more the feeling to feed without killing another life? And we see the balance goes to 80%. Man going into a butcher shop, man going into a shop to buy grains, subconsciously he is not happy with what he does, because it's another life in the fridge. It's another life on the shelf. But he to survive has blocked this one out. When you block it out, you don't want to know, it's just there because I have to do it to survive. Now, with this understanding, it means, I don't need to kill, I'm more happy. The energy comes from where I can take, a plasma energy without killing. And that was the whole purpose, to see if the man changes habit. If the man gradually, if we start feeding it, he will come to this point. And would he become calm? Would he become a man of peace? Would he gradually accept that he can survive without killing? We created a generation of vegetarian by convincing that the vegetables have no life, seeds have no life.

(:32). We eat them, because we are not slaughtering the neck of a sheep, or a lamb, or a cow. But we put a celery on board and we chop it to pieces. At least with the lamb, we slaughter with one go. With the celery we chop it every part of the life of it to pieces. This is the way we have been brought to accept this life not worth counting for. And men cannot do that in the space. Every

count of life is counted for by the plasmatic fields of his existence. Doesn't matter if it's green, yellow, orange, walks, talks, baa's, cows, whatever he does. This question number six was crucial to us. That man is ready to move away from killing. Man is ready to walk away from taking another life, and he feels good about it. 20% have no feeling, they don't connect to the system. We have a full statistic of how you have voted in every question, every single one of you. We have the data on analyzing if it's the same people answering the same questions the same way. Interesting part of this question after the nearly four and a half, four hours of the deliberation, and sharing testimonials was,

(:34). have you learned anything about yourself? Has it brought you closer to know yourself? And we see 93% of the people say, yes. It means we are ready to explore another dimension in our lives. We are ready to understand that there is another way. I can have energy, I can feel better, I don't have to kill for it. And okay, if you've got a body that you're worried about it, I can lose weight for it as well, that brings me another satisfaction. And it brings you to the point of understanding me, myself more. But this has a very, very fundamental question mark in front of it. If we provide you the food online, we provide you the necessities for wellness of your body online. Would you get cancer? Because now in knowing yourself better emotionally, and more stable, would we see any more the extent, and the number of psychosomatic illnesses we see? Or would we see a long life

without pain? Because don't forget, at a point, when you know more about yourself, you're more happy about your condition. And more illnesses you pick up,

(:36). the more imbalances in the structure of physicality you create, you call, illness. And if you learn it, it helps you. If it's just there, because it happens, it's just another noise, another distance tools. Those important questions for us, which is the totality of the whole research or this exercise was, would you give up, or share your Soul for another Soul to live, elevate, exist, become higher than your Soul? A couple of people did not understand the question when it went through it. If we would have put those in, would have gone to about 95%. And this is the attributes of Creator. To give unconditionally, even if it means others become better than me. In the level of the STM there is no jealousy, there is no hierarchy. In the world of physicality, jealousy is the backbone of existence of many people, most of crimes. And this shows mankind is ready to become Man of Universe. Take the pains of physicality from me, I am there to give unconditionally. We see the white light, we see the freedom when we enter the kingdom of the Creator at the point of the departure of physicality, we call, death. Because everything else for our existence is provided from the fields of His existence. We don't have restaurants and cafeterias in the Universe, for people come and eat. We don't have hospitals, we have no prisons, and we have no mental institutes. We have no fuel station. And for sure, there are no

Arabs to open oil wells of Soul. Now you understand what we brought you in. As "dining with the Creator" was, in fact, understanding the essence of the Soul of the Creator, which is you. And how much the mankind is ready to move on. If we put the same questions to the world leaders tomorrow, do you think they'll give up the seat of presidency, ambassadorship, and kingship for the others to exist? Or have they become a special breed of selfishness? Totally selfish people. Change anything, as long as I'm called the boss. As long as I can bend the rule for me, for others to listen and become call it, the power. There is no house of power, there is no parliament, and there is no Senate, and there are no judges in the Universe, for you to become the king and Senator of the Earth. It'll be interesting to see when we have of the number of world leaders tomorrow, **(:40).** and ambassadors, and religious leaders with us in the session. You will not know them. And for security reasons, we disguise them. But amongst you tomorrow will be world leaders, the Soul of world leaders, and some of the religious leaders. And we shall see. As I said, in a very, very recent talk in past few days, it's just about to come to what I call, "head on collusion." We see the unification of the churches and the mosques, unification of religious groups in different parts of Western Europe. Where Rabbis try to talk to the Priest, and Muslims and the rest of it. What the KF has called for in the past few days and now we bring it to open, is that we have requested and we have asked, and the Keshe Foundation will bring

it, the first meeting of the world religious leaders. We have kicked this into process, and will take us a few months to reach it. Where we have asked, with the present situation, which is risen in Middle East with Iran, and upcoming meetings and opening of the embassies in different places within different nationalities.

(:42). The meeting of the world religious leaders in the house of temple of Mitra in Iran. We have asked for the head of the Zoroastrian in Iran to attend the meeting. We asked for the two heads of the Jewish religion, which each one takes six months ruling in Israel, to attend to the temple. We asked for the head of Islamic world, for Shia, for Ayatollah Khomeini of Iran, to attend. The same as the head of the Sunni sect of Islam. The two heads of Vatican and Church of England. The representatives of Bahai faith in Haifa, in Israel. The head of Buddhist, Taoism, Sikhs and Hindus, to meet in the temple of Mitra, where the original religion of the Man started. And see, if amongst them, they find a common denominator as Mitra. And amongst them they find that the religions have no space to be different, but the path to the Creator. If the way we bring the head of top 20 power generators of the economy, or G7 and G9. See if we can bring the 12 ?? arms of the religions together, the 12 disciples.

(:44). And see how they interact. And with them bring other sects of their own path. Shall we see if Ayatollah Khomeini of Iran stands ahead of Pope from Vatican? Would the highest man in the temples of Buddhism sees himself higher than the

others? Or would we bring the unification of the religions and would the whole structure accepts to meet with their Creator? Conference of the religious leaders. In a way the heads, not just delegations. Would it bring the change in the dimension of humanity? Tomorrow we'll summon some of these religious leaders as they are in power of the corridors of the power as the heads of their own state, into this meeting. You'll have ambassadors amongst you in the meeting tomorrow. We have done our best to cover our people. In a way, for reasons that will be explained in the future. So in the meeting with the world leaders, to laying out the terms of peace by you, and by Universal Council, is the cornerstone of the meeting or tomorrow.

(:46). We'll leave the lines open for you to be answered by the world leaders and the ambassadors online. We leave it to see how you feel. We don't want to see your vision. We want to see your demand. What is your demand from world leaders. And we're

not looking for solution, as we walked through the Soul of the Man (STM). The way we fed you with food, and you feel energetic, we'll feed you with the powers of the corridor of life in the Universe. As the session is part of the universal connection with the human race, as the leaders of the world will be there to attend, we have invited the Universal Council members to be present. To establish the first links between the Universal Community and the leaders of this planet, in the true essence of what we call, interaction. It'll be

interesting to see how the wishes of you as ordinary man of this planet will become the structure of the life of your leaders. It'll be interesting to see how you feel when you address these so called world leaders. And there are some other surprises in the meeting tomorrow, (:48). which we'll bring it to you as usual. And we'll see how you react. And we'll see what will be the outcome of your wish in the coming time. As we know this week has been what I call, a beautiful week for peace policy. And we've seen President Xi of China in Moscow as part of the bigger plan of China for taking leadership on the ethos of the Chinese structure. Very much from the basis of Taoism, and understanding the process that this nation works, and how the Chinese leader will assert his leadership as a leader of peace, and more than anything else. As I said to one of our Knowledge Seekers in the past few days, nobody will benefit by the Ukrainian war which is created, than China. The western capital and expertise is not there to in a way feed back some billions of dollars in Ukraine, who'll guarantee for supply of grain for Chinese. That the policy of the Silk Road of the President Xi and the massive, massive construction companies sitting in China, that will be given opportunities to rebuild Ukraine. President Xi plays 2 cards, one is the peace, which is his main target. But with it, as he is the most nationalist person I've ever known, bringing massive contracts the construction of a Western nation, payment by grain,

(:50). is what sits in the back of the negotiations. Reconstruction. And this will bring 10 years of work for Chinese construction companies. But with it shows another side, making peace is profitable, making war feeds a few. In the upcoming time, and in the process we're involved in and as some of our Knowledge Seekers know, we'll bring this process to the full understanding in the coming months. Where China does not need to do anything, but just to be in a banner of peace, of peacemaking to feed this nation. In the eight questions we showed you, it shows we can feed the nation without a single grain ever been harvest. The most remotest people in the most remote corners of the China will receive the same health care, wellness care as the ones in the richest hospitals in Beijing. They all sit and put the headphones on. There is no exclusivity to a Man being healthy anymore. And in that process, we have established the understanding that, what is going to happen with all these farmers?

(:52). What is going to happen with all these agricultural policies and the wars man ever made, when you can feed the man as you have seen in the survey of today, that they don't even need to eat? In the coming weeks we establish this structure of feeding Man on a continuous basis 24 hours a day. You can come and eat on the table of the Keshe Foundation. And you don't need to kill, you don't need to destroy another life. We go to restaurants to sit and chat, but nothing on the table. In the upcoming time, we release the knowledge that Man can do what will be very soon impossibilities.

In advance of my trip to China, we'll make sure China as a nation will start building colonies on Moon and Mars in the next two years. Long term haul with hundreds of citizens to live on Moon, Mars and any other position, which the Chinese leadership decides. Colonization of space with what we showed you today is 100% guaranteed. The knowledge will be transferred to the Chinese leadership to start the process of what we call, excursion into space. Long term excursion. We have to give a solution to the government's to what to do with so many highly intellectual people going on the line,

(:54). getting fed. Going on the line, receiving health. Going on the line, be entertain in the new dimensions or plasma technology, that they will take the next step to bring that into operation. The alternative is to shelve the technology (T) till Man is ready, and Man will never be ready. In the technology which will be delivered to the Chinese government in the coming weeks, will allow China to super pass the American space technology by hundreds of years. We have found partner in peace and we set out to make sure it happens. We'll show, we'll transfer T which will be developed by the Chinese directly in next two years, that colonization will not be sitting and waiting for a rocket to have fire on its backside, that it gets to the Moon one day, and carries a few spoons and a metals. Otherwise there's too much payload. We have shown we can feed people, as you have seen, and keep them satisfied and happy and the rest of it will come with it. In that process, we set out the

process of what we call, heading to space. One of the questions for the world leaders tomorrow will be, are you going to open a mosque, a church on the Moon, and the Mars? Or do we end with this hypocrisy? Don't forget,

(:56). they have to travel through the Soul. When they travel through the Soul, would they accept the, what I call, hypocrisy of the religions. How can you take a priest from Earth to Moon through his Soul, and then he still believes in reincarnation? Where he reincarnates himself in the same way. You understand science and technology will end up to be the what I call, the last leg of the religions to exist. We don't fight it. We give it the knowledge that itself by itself dies by itself. We cannot say, Muslims don't go to the Moon. We cannot say Muslim don't go to the Mars. We cannot say blacks, whites are any different, as the Soul has no color. Then we understand, where we appear we appear in the essence of what we feel to be happy with. What is contentment for our Soul. We transfer so much technology and advanced technology to the government of China that it brings, forces world peace in the next two years. And it brings for the Chinese leadership to enforce the path of peace with the rest of the nations.

(:58). "Gun policy" brought nothing but pain. "Peace policy" brings nothing but joy. And that will be our target. And in that process, delivering a technology, which can change the course of humanity to become content has been proven in the statistics of today. They are more content, and

they're happy with what they have, and they don't need to kill for. It's what I call, the time for change. And the change comes by example, and the change comes by understanding. Would we be able in the meeting of today, in the meeting of tomorrow with the world leaders, come out in the following weeks and say, we are happy with what we achieved? This time you satisfied, and you felt good, and brought you joy, and you learned about yourself with the table of food. I wonder how you will feel on the table of peace with the world leaders. On the same way after tomorrow session **(1:00)**. We randomly different hours of the day, we'll switch the meeting of the world leaders open every day. That you as citizens can meet with them. Before was always between four and seven, some people was middle of the night, some people was middle of the day. We will leave a line in the random manner, which we do not add what we do not announce in advance, open on the table. That you do not need to come in to bring that request and the demand for peace, but it becomes part of the life that your Soul will extend to the others. You will understand the reason for this in the coming time. We will announce what hour the system will be open, for how long. And the most important thing is that you have made the what we call, transition, connection through your Soul with the world leaders, not there to demand, not there to serve. But be equal, that I wish to create a world peace, is as good as yours President Xi of China, Mr. Biden, of United States, or Ayatollah Khomeini of Iran, or any other religious leader. We

demand peace, but this time through our Soul. So, we elevate you to understand our Soul. This time it's not the word of mouth, it's through the STM. **(1:02).** We didn't feed you with a spoon, or a fork in the past two weeks. You fed yourself, and you shared yourself with the Soul. And this is what is going to mean the next coming weeks. We don't announce the hour that at this time it'll be, if you want to come. Because then the world leaders escape not to be there at that hour, because they know they're going to be touched. In the session of tomorrow, those of you who attend will understand your bring the change which for generations Man has been waiting for. We started the Spring this week. And with it we bring the "spring" of peace. But offering an alternative for it, not just to be there for it. When you speak about peace it means you have to create jobs, that the governments can sell. We offer space as colonization for Man to the governments who take the path. Extension of life beyond Earth. Rapid development, be it in the dimension of the Soul, or dimension of physicality for citizens of the Earth to transfer, transmute and transport things across the Universe. If we do not offer an alternative, we are just another "talking box."

(1:04). We take enough with us, to show enough to those who are the peacemakers. The mankind calls 85 million barrels of oil a day sucked out of the depths of this planet, A money making machine for those who control. This planet is bleeding "black," and there's a limit

to this bleeding. One day it will collapse. By the introduction of new energy systems the bleeding of the Earth will stop. Technologies will be delivered to Chinese government, that make sure China will be one of the first nations, which will not allow the bleeding of the Earth. We'll deliver enough technologies which are not still revealed to mankind, to the Chinese government as one of the largest and most powerful nations, to enforce, to bring and through the ethos of Taoism. To bring that point of need to an end, but makes it a point of pleasure for Man to live. My needs, my request to world leaders is very straightforward, in we can deliver it and we can demand it. But it's you in the meeting of tomorrow and the coming days, to understand you stand shoulder to shoulder equal to any world leader. And as we always said, my wish is my command.

(1:06). And you command your Soul, and that's the "kingdom of Man," and no one can touch you. And question eight answers you for all the meeting of tomorrow. Would you give up, or share your Soul for another Soul to live, elevate, exist, become higher than yours? That's the bigger leadership as anything, ever to any Man has been offered. And we are there to facilitate. We're not there to create. The creator of the change is you, we are there to give you the facility to access the world leaders. We have brought with us the Universal Council members, which tomorrow they will understand their new position and the new responsibility and what they need to know. They'll be enlightened according to their understanding.

And they will understand what needs to be done to be in that position. Now you understand today's teaching was planned weeks and months ago, that we are ready for the change. You see the results of your own work, your own feeding your Soul and your physicality (P). And we'll see tomorrow what changes mankind will bring for Man himself through the Soul.

(1:08). And not through revolution, marching on the streets of Paris, robbing the justice, claiming to be no different on the streets of Tel Aviv, and no killing of children on the streets of Tehran for a piece of cloth in their head. We'll see how you as the new leaders through the strength of the Soul will lead the humanity to where it should be. In the coming sessions of starting tomorrow you will see a new breed of leadership through the sharing of the Soul, and that we can give more, we bring more to be changed towards the dimension (D) and direction. And whatever happens from tomorrow is not coincidental, and hasn't been coincidental for past years. But remember one thing, be humble, even at the point that you think you can bring that influence and that change. Learn from me and don't be attached to no physicality. I hope you understood the teaching today. And I hope what you saw, some 80 of you have been through, and many of you would have been more of you to be there. Understand from what is to come and understand what you have triggered to become.

(1:10). I hope we have managed to share enough, that you will learn how to share your Souls as

much as we do with you. Thank you very much. And we'll come back for any point of discussion or anything else you need to know. There'll be a couple of announcements will be, what I call, big change for Keshe Foundation, and huge change for many of you. If we can go for a small break and we come back, and then we answer any questions and the few announcements we need to make.

<< BREAK >> 478 KSW March 23, 2023

Part II: Q&A

(1:17). K- Yes, I was just listening to the last commercial you put on, it says, by June 2022, we'll take transportation, transmutation.

(1:18). Once we started doing in June the transmutation and people went to the Moon and went to fly into space and went home. Trying to do the transportation became much harder than we thought. Because now that we have the technology, that we can go in a few seconds, why should we go back to do it for hours, or whatever. And the fulfillment of transmutation, many of you came to the center and many of you now you will understand in the coming time you'll do it in mass, the same as you did with the food. It doesn't make transportation so interesting. In one of the sessions tomorrow, you will understand what it will mean. We'll try, if we can arrange to be doing it, the transmutation will be. I'm working on it, and if we get it all right. Tomorrow you'll have, those of you who attended will have a very interesting surprise where you laid out. One of the things that will happen tomorrow you will understand that there is no need for transportation. And transmutation will bring that point to us in a much, much faster way. The people who attend tomorrow's meeting, you'll be given certain instructions. Please follow the instructions. And there are a number of lines, which will be set up. Please do not try to communicate in the background in the Chats, under no circumstances.

(1:20). You will understand the reasons and we'll explain this as we progress with this situation tomorrow. As I said, there are a number of announcements which we would like to make. First of all, many of you have you been waiting for the, or have been requested for the Cups. It will be returned. The Ceramic Cups have been re-launched back into the Keshe Foundation from next week or so. So you can place your orders for the "Pressure" Cups and the others. We have 4 new selection of paintings from our original paintings of Gans's, which will be released this week or next week to be added to the collection. These are again, the Gans's, which are commissioned by the Keshe Foundation and the material chosen by us to be what is going to be. There is a, we had a very interesting response, results with the Knee Gans. We will launch the second batch of these and hopefully will be the last time we launch this. Second batch will be put in the position as the first batch has already finished. But please don't forget to send back as much information as you can to us, that we can set it out correct way, that we have the right information for what we are doing. We are receiving number of booking for the Addiction, for the next month. We might change the date of the meeting to the 29th than 23rd. Do to things which are about to happen and we will not be able to what we call, bring on 23rd the program through.

(1:22). It'll be done on a Friday of that week, that we'll keep the same tradition going. There has been a massive change in the structure of the work of our doctors. In a way due to advancement and

the results we have seen to the same first cycle of the, what we went through with our doctors with using the what we call, the understanding of new technology. And due to the sponsorship and support we have received by an international organization in the background with the Keshe Foundation. The Keshe Foundation has made, I made that clear, we have to be able to sustain this, that about 100 what we call, wellness volunteers can apply for any condition. The people we talked to they are not satisfied with the number of cases, which has been done. They say, the numbers is not big enough. And the spread of the work of your doctors has to spread that it shows technology applies to all applications. For this reason 100 new cases, anything which has no genetic deformation. No, what we call, prosthesis, you don't have anything like heart transplant, or shoulders, or whatever. The sponsors will cover the costs with us, that we will see that the doctors will be able to sustain the first 100 cases.

(1:24). Can be anything. But it has to be done in a way that we can complete it very rapidly. That they give us six weeks to gather the answer. They'll cover most of the expenses, the Knowledge Seekers for any reason. It cannot be we will be informing your, yes or no. If the big cases comes up, if we can accept or not. The fee to be paid for this to the doctors you work with is 3,000 Euro, any condition. And the process can start very rapidly. 100 cases we have received subsidy or support to show the full spectrum of what our doctors can do. .. If you have any wellness

condition and the first 100, we close this very rapidly. Cases will be looked at, accepted to be completed within the next few days. We'll take up a six week session to see how effective this new plasma technology with our doctors is, and how .. they spread it, and how much we can spread it. Can it do wounds, can it do nerve damage, can it do whatever. This does not apply that you come in and say, you said, 3,000. We have to see the what it is and the conditions acceptable to us to do. And it's five or six weeks session. We collect the data the way we done with like the food, we've done. So if you suffer from any condition that you think our doctors will be interested,

(1:26). we'll be looking at it and respond very rapidly within 24 hours, 48 hours, you get a response and the rest comes with it. Or you get response from our doctors, not from us. In the success of what we've seen with the health section of the what we call, satisfaction of the Soul, we saw in the statistics we've seen. Very soon we will endeavor for working only a session or section of what we call, mental effects. Many of you, we have many people, the doctors asked us, they have a mental condition. A session will be allocated for this in an upcoming time. The same has to do with what we call, addiction. There is a plan for a day for the children. How to teach our children to become the "children of the space." And how to be prepared for the next cycle. These sessions can only be held when there is one parent accompanying the child. These sessions are not just put for children, you have to have what we

call, one of the parents to be present during the session. And this will come somewhere in June. We will announce this in time. This is how to teach our children to become children of the space, what it needs to be, what it has to be, and how the parents with them will guide them. If both parents want to join with their child, there is no problem.

(1:28). The session of creating children of the space comes with a lot of understanding that they understand. They are more receptive to understand the knowledge and the technology which goes behind it. So what we're announcing is, what is upcoming. One of our main interest is this 100 case. Any condition you have, you suffer from anything, go through the usual channel, the doctors will get in touch with you and we proceed to the next step. We have an announcement for a position which the Keshe Foundation is opening for June, July of this year. We are looking for 7 to 10 doctors, who have a good command of psychology and a good command of, what we call, medical applications. As a general practitioner even. These doctors will be paid a fixed salary. We need a doctor in each languages, because in the trials done, we see one of the problems has been the language barrier, Spanish, French, Portuguese, Chinese, Arabic. We need doctors full time work with the Keshe Foundation. And if you are one of those who can work full time on this basis, then send your request and the rest will be detailed to you how it is, as we see the process of expanding and up going. And if there is such a position available you can support,

(1:30). it will be appreciated by the Foundation. As I said, one of the main things we want to push ahead. It could be anything from eye defect to emotional, to whatever. Do not come back, we've seen people coming with 10 illnesses, I have this and this disease. We will not interested. Because whatever we fix, there is something else. We would like individual cases, maximum that our doctors can handle. We can show to our supporters, the backers, that it's not just with a few things. We are gathering Testimonials from the people who been in the first cycle with the doctors. What they've seen, what **??**. We have started seeing that the doctors are discharging the volunteers who came in because they have achieved what they came, and so much more than when they came in for. And so we are allowing them to, or releasing them on to the next step. But they know if anything comes back, they can come back in to receive the support, because most of these cases is a long term. And then other bits hidden come up and it gets sorted. So if you have any condition... Last time, we were given a few days, with a sponsor this time, we have taken time. You have a week or whatever, any condition you thought it cannot be. Be it from a join pain to whatever, we would like to look at. Send .. it to our doctors. On acceptance, then you're given the time by doctors when and how. And the reason we put a small amount on it. Because, if we don't do this, we get a lot of problems.

(1:32). People think that it's their right to get whatever. So this allows us to at least keep

everything together. It is 100 cases, and that will stop at that point. And it's not that, I paid so much for this, so much for that. We don't look at it. This has a sponsorship behind it. It will go back to the same structure, and then we see if this can be applied and we can sustain it, we can show, we can cover a bigger spectrum. Then we go with the agreement we have with our people to 1,000 cases next year or the year after. Because it needs a lot of planning and structure to be put on. Any questions that we might be able to share answer with each other?. By the way, when you send your request, you put the "100 case trial test." And then we send it to doctors for it.

Q: .. Mr. Keshe, in tomorrow's meeting with the world leaders are the UC's, Universal Council (UC) members invited? And will it be the same link as the lunch with the Creator?

K- We use the same link for all our meetings. It is just that people cannot come in, because people who have registered according to their emails they'll be given access. Universal Council members have gone into the email, which they have for the language they have, they're already been locked into this. It is not for the supporters of the Universal Council.

(1:34). Universal Council members you just join in as a usual, you join a Webinar, a Zoom session.

R: He actually asked as Universal Council support I see. It has the "s" there.

K- Support no, but Universal Council members, as I know their emails has already been locked in yesterday into the system, or today.

R: And the support members are just like the regular participants.

K- Yes. We have a usual group, team of people which are there like, Rick, and the translators, and what we call, the head of our groups like Yosef, Rafael, and others like Dr. Bararpour, from China, Wang Lin, and a couple of Chinese doctors in the background who are given that part of the regular team. But the rest are what we call, registration, we have the emails. You can come in, but if your name is not set according to registration it's not

admissible. Q: What's the link to reach the doctors at the Keshe Foundation regarding the 100 trial cases? Would that be the

doctors@spaceshipinstitute.org? (

1:36). ... K- The answer to you is, health@spaceshipinstitute.org. .. For every case we accept for this, the funding has to be accepted by the sponsors.

R: And if a doctor would like to participate in what you were saying there lately, would they apply at the doctors@spaceshipinstitute.org?

K- Use the health, the same. It's the fastest. Because the doctors take responsibility for all these cases, it's their patients. And they get advised how to, or whatever. If you can imagine or understand, this is the beginning of a general health cover of the Keshe Foundation to cover (Health Policies). If you look at the policies we put for a family, person, and then the food and the rest of it, this is part of beginning of that structure, which we announced weeks ago. Now, it is the beginning trials of setting up a massive structure

for hundreds of thousands of people to be able to use the system.

(1:38). Q: We had a question in the Q&A about the address of the Keshe Foundation in Linz. .. Is that something that we can release?

K- The address? Yes, it's common. It's strange, people are coming from... I was in the Center yesterday morning for a meeting. And out of nowhere, there were three Brazilians who came all the way from Brazil. And they came to the center. It's a long way to come. We used to get Japanese and the Koreans and it was without any announcement, today came I said, this is your home. But try to understand there are things happening in the background. And the address is what you call, know to the people who come. Because .. Mario always disperses the name with the address, everything else. But we would like you to announce when you coming in, because there are tours which are taking place on a regular basis in the Center. Sometimes we do tests, sometimes there are other things which is happening. You better get in touch with the Center before you try to come in, at least it gives us a chance to be there at least. You don't come in and wander around. It takes Mario two or three hours for one tour on the top floor. Because it's not just coming and look at things, he explains everything into detail. Everything, the knowledge, the essence of things you see. But the space what we call, floor downstairs is not open to public.

(1:40). And we run tests continuously in different parts of the structure. Even today there's some

tests run around two or three tests run on different things downstairs, we are upstairs, we cannot do. The address of the center is a public knowledge, it's a registered of the, what we call, the Exhibition Center. I put it on the chat. But please just don't turn up because you have the address. Turn up, that you already preagreed to come in, that you just don't come then get disappointed. This is the address of the Center in Linz, of the Exhibition Center. I received a notice somewhere in the background from our team, let me see what they're saying. Yes, it is the same one. And this is the... Get in touch with the doctors of the Keshe Foundation for their contracts.

(1:42). The addresses has been put above, health@spaceshipinstitute.org. We had a case, we had a look at with our doctors this week, a Knowledge Seeker with a child with a heart transplant and we told them it cannot be done. You have to understand we're dealing with plasma and two structures are different from each other when you have a transplant. And interaction or inter connection between the two different structures. It's not like the heart and the lungs. This is another tissue from somewhere else which is not an exact match, it can create all sorts of things, rejection, and the rest of it. So if you have a transplant, at this moment of time, the knowledge and the structure of our system is not that far to be able to bypass. So if you have that kind of things... Please, before a transplant our doctors can have a look at it. But after the transplant, it becomes at

this moment, with the knowledge not acceptable to be able to support. Any questions?

Q: Does the offer also apply to cancer cases?

(1:44). K- Send your request, it's a 5 week track. We stop after 5 weeks. And yes, it can be done. But depends on the decision of the doctors, not us. We go through it. This 100 cases is by the doctors will be very rapidly filled up.

R: And how about hip problems with cartilage? People that need a hip replacement, but perhaps haven't had one yet. I know you've mentioned if people have had like a titanium or other hip replacement, then you wouldn't be able to treat them as we understand it.

K- We don't treat, we process. Secondly, the doctors decide on that one. We have seen very good results with the hip damage and others, it can be considered. And I repeat, again, it's a 5 week session, not a long term session. So we will, we want to understand how fast the structure can move and what it can be given. So .. I don't see any reason why hip replacement **??**. Don't forget, we have developed techniques now, which is in past six months, eight months, in reaching, targeting and developing fast results for outcomes. And it's just techniques, how much more the doctors will add to application of techniques then what they understand.

(1:46). What we're really interested is like, .. we need a bigger data on like, the eye positions, the damages to eyes, physical damages to the eyes. How much we can do. Deep wounds we want to look into. If you have a deep wounds and or... I

was talking to one of our UC members to find a specialist in skin burn, and grafting and replacing or extending amputations. We're looking at these things. If you had a bad burn on the skin, we would like to see how the plasma technology interacts with it. And then the doctors know what to do. You have wounds which has been there, painful whatever, for years, you want to see the doctors, will look at it. We are providers of the knowledge to the doctors, and they decide how to go. And in a way the doctor, which will accept you will take you through the process. And they know and they're backed by our knowledge what to do. If you had a wound, or if you have a wound, which has not healed for a long, long time. We would like to understand how this will interact. Would it be able to. We want to expand with this sponsorship a broader spectrum of the knowledge.

(1:48). If you look at it in a world of pharmacy, this is why they test one thing, and then to the next, and then to bigger numbers to add a data. And we are going through the same process, but nobody can effect our data. And we ask for people to give testimonials and how things go. It's a learning process for the Foundation. And our doctors will support you to that way. The good thing with this is, a lot of knowledge is getting centralized and it's access to everyone. So no pharmaceutical, nobody can claim to it. It's a public structure knowledge, it becomes part of the bigger structure, that if we get our ways we can do a lot. I would love to, if we would we, due to the situation we are in, like in Syria. There are a lot of

people that the West who calls himself civilized, gave everything to the imaginary line of the border, the Turkey side. The Syrians have nothing, and they die, it's the same blood. And this to me is wrong. And we tried to break into. We went to negotiation with a government, with ambassadors. But the first thing they asked us, how much money is it in for us? We would like to, when we come to the situation like the earthquake in Syria, we offer to Syrian government officials. Just anybody who has a headphone can get the process.

(1:50). We negotiated long with the ambassador, and through them, through the government, but it's amazing how corrupt they are. And this is what we want to do. These trials, our basis for this to come plus what we develop in the space technology. How much we can effect different conditions, and tolerating it, understanding it, and developing it is part of that building structure, which is coming. We are literally destroying the foundation of knowledge control, by patent, by fraud as we've seen and deception in the Covid, injections, and the rest of it. And all the hypocrisy which went around it. And you're those who are building it. We have not signed any nondisclosure secrecy acts with any of the doctors who work with us. What you bring in, like the data we saw in the "dining with the Creator," it's all in public. We put it in, but we know what we're looking for what we can get. The other organizations take it up different way. Nobody shares knowledge the way we do. And long run we'll win, because when the knowledge is public, nobody can hide it.

(1:52). And everybody can benefit by it. Any other question?

R: There's a question also about neurological problems or brain issues. And I suggested they could write to the doctors at health@spaceshipinstitute.org.

K- Write everything to health, don't write to doctors. Write everything to the health, it's controlled from there. And what we cover initially, is massive knowledge base technology. We are literally handing over years and years of research and development freely in the hands of the doctors for them to do. Even we saw what we did with the doctor in America, I spent hours and hours and weeks teaching this doctor. And when he thought he has learned everything, wherever, he went with the Russians (?? Med Beds). But we'll see what will be the outcome of it for them. They gain none, because by time they thought they got something the technology for them was already obsolete. The technology we delivered to China will baffle the west. How they did not go with the technology was in the West, so much. And even the technology we take to China with us is not what will be delivered to the Chinese. The condition has to be that there is no position for war to be, that the peace is the only option.

(1:54). And I'll make my point. I made my point to the Chinese very, very clear. I had a very in depth talk with the Chinese officials today, and I made that very, very clear where we stand, what is going to be and what we expect of them. Any other question?

Q: .. First of all, I am looking forward to the upcoming change. Thanks for all the efforts. I had this question for a long time. But because of the time of the meeting, I was unable to reach you Mr. Keshe. This is like two years. About two years ago, I made a CH₃ Gans. And I got a black liquid in the container, which I don't know what it is. I heard that in one of the workshops you mentioned that it is the black matter is deuterium. And the orange liquid stays on top and the black liquid stays at the bottom. It's like for two years, staying there. I really don't know what to do with it, whether to carry on. At the beginning, it was like, greenish, dark greenish color, and then it turned to black color. It's in liquid form.

(1:56). K- What's the split gap between the bottom and the top the full amount? Or is it sporadic? Are they moving from top to the bottom? Or is it totally clear separation? Nothing is moving from the top to the bottom?

Q: No, it's totally separated. I have the picture, but I don't know how to share it.

K- This is the way you use this. You put a syringe in, and you take from the water in the middle.

Q: The orange one, or the black?

K- It doesn't matter. There should be a clear water somewhere between the black and orange.

Q: I don't see that. Okay. Maybe there is. I didn't pay attention.

K- If it is a total homogeneous, they're everywhere inside each other, most likely you have created is deuterium, or combination of the carbon graphite. Or in a way of grapheme, if you, if you look for it.

And your CH₃ stands further out due to its gravitational magnetic field. When we make a mixture of CO₂ and zinc (Zn) we get this as well. The separation. Till .. in energy balance, they .. the one become balanced in energy with the other one. One of the best thing for you to do to see how you made the CH₃, maybe your black material is deuterium, but iron based, it's mainly iron. When you made the CH₃,

(1:58). you consumed the layer of the Zn faster. Then you reach the metal end. Get a magnet and put it on next to the glass and try to pull it up, to see if the black has stopped gathers together like what you call it, a magnet? And it creates a column. Then that is what we call, partially deuterium and partially iron Gans.

Q: Should I put the magnet on the side, because at the bottom?

K- Yeah, the black side is at the bottom, yes?

Q: Yes.

K- Just put the magnet on the bottom and just very slowly pull it up and see if you see the particle of the Gans come to it as a column. Then you have created the iron Gans and deuterium together. And the CH₃ on the top, the orange part.

Q: So should I pull out (with) the a syringe, the liquid part in the middle of the container?

K- If you can. If it's clear, with no Gans in it.

Because usually we see a full separation between the two, and you have a water in between. If you don't see it, it's most probably a very poor alloy, what you call, galvanized metal you used to produce the CH₃. A good coating, but the poor

metal, at the iron side, very low grade. Which is very good for making, what you call, Gans of iron (Fe) and deuterium.

Q: Yes, the metal was this. I bought it because of its shape.

(2:00). It's not chicken mesh it's parts sold in warehouses, home warehouses, and then it's like kind of hinges, or those pieces that they use for the door. And it had a very, like shiny bluish coating on it. I asked them they said it's galvanized, that's why I bought it. And my husband said it's usually they are iron and they are galvanized with Zn.

K- Yeah, but if the Fe inside is lower quality, or very high carbon base, you get this. It's another problem. If you can take the water from the orange part, you have the Gans water of the Zn, or what we call, CH₃. But with a lot of effects of Fe in it. Because even they are in what you call, the orange part in CH₃ part. They still are connected to the field of the Fe and the deuterium.

Q: Should I separate the black liquid at the bottom in another container? Actually, I didn't touch it after I saw it was produced. I didn't know what it was.

K- You can do, but you see what separation would that create a clear water between the top and the bottom? Or would the orange will come and sit to the bottom of the material, to the container?

Q: Okay, and then what can I do with this black matter?

K- A lot you can do. You can do a lot of things with this black matter.

(2:02). First of all, determine if it's what you call, Fe based Gans. 99% should be. When you pull it out it's like iron dust, will come to the magnet. Turn the magnet both ways. One on the north side, and one on the south side. And you see how they gather, this will give you a very good indication of the fields forces, of what do you have in your hand. What you want to use it for.

Q: Okay. Still, I don't know, I just will do that. But I'm not sure what I'm going do with that. I'll just keep it.

K- Do you have any CO₂ Gans, or Zn Gans?

Q: Yes, I do.

K- Okay, just put a CO₂ Gans or the Zn Gans next to the jar of this black stuff. And see if the CO₂ pulls up in a column, or the Zn pulls up in a column. Then this will give you a lot of what you call it, field interactions, what you can do with the black stuff. If you don't have a magnet, just make, put your CO₂ Gans and leave it for a few days, and see if the Gans gets pulled, the CO₂ gets pulled towards the black stuff and makes a column going up like a cloud, like a smoke.

Q: Okay, I have that circle magnets I can use.

K- Yeah. You can use. Let's see what... use let's see what. Thank you very much

Q: Dean .. So, I've been away for a few days,

(2:04). and I came across some people that I realized this, like, I was introducing some of the technology and speaking about the "dining with the Creator." And the processes behind this and what to experience. And for many people, this is when they first come across it, it sound so "far off"

from what they're used to, that you can see them, many of them as a Soul sort of, you can see it's very difficult for them to accept, to understand it. So how does this relate to bringing this across to a nation and across the humanity in the times to come?

K- Very slowly, very slowly. You see, the good thing is that we have nearly 20 years of building a solid base, then becoming a fashion. And thanks to the effort of the Belgians to take us off the newspapers, magazines, and Internet, and not Internet, what you call it, televisions, and the rest of it. It allowed us to grow enough and solid enough, for many of you to gain knowledge. So we, we wait. And "play the time" as they say.

Q: I noticed, a lot of it's to do with very strong beliefs as well, people have very, very strong beliefs.

K- Because it's not on television.

(2:06). If you put... If we open a channel, like what's it called, the social influencers, they call them nowadays on the internet. And I go on it like the rabbis and teach about the Soul, we'll hit millions, and then we become a cult, you understand? So we can do that. We are looking at putting Keshe Foundation certain part of it, on social media in a different way. But as long as we don't become a, what you call, "social media influencers." Now it becomes against the religions, against pharmaceuticals. We don't need these kind of things. The more people come, and the more people go. It has to be in a way of acceptance by a person. And when it's on television, they see it,

yes, it's there. "Social influencers" influence very few people. But they're very good gimmicks for people to go and have a look and spend some time with. But this has to become a pattern of life. How we live, how we are, and this is where we are heading and where we are going through. And it's this matter of next step, and next development and how we open the door of knowledge the way it is. In past six months, I had released so much information and technology, which is now with our teams in different places. That literally makes all the things we taught in past 20 years obsolete. **(2:08)**. But it's not that they're obsolete, it's just because you understood the basis of it. Now the new technology will be accepted and be developed much easier. Much faster. If, as I said in the beginning of today, if I would have told you we feed you with the microphone with two headsets on your head. You tell this to anybody, and it's all a joke. But you have 80 of you who went through two weeks of it.

Q: Yeah I experienced many things Mr. Keshe. Over the last few days, I went into a situation where, obviously people are still feeding and they presented these meals. And I struggled, I was trying, I was being very respectful and you know, I wanted to be part of it. So I had, you know, I felt obliged to eat. I didn't really need it, but so I asked for reduced amounts. But you soon get back into the habit, strangely as soon as you start getting involved in the ambience of it, you fall back.

K- Get into the habit, because as I said in the past two weeks. If we supply you continuously, and in

the morning you go to the headphone and you have your breakfast, and lunch time you get your energy for lunch, which are habitual or once a day. Do you eat when you're about to go sick from eating? You are full? You say no, I am full I can't eat, I have eaten. I'm not hungry. This is part of the bigger program which we have put into operation. If we can put 100 of you into a system that one gets, one meets the condition of the cancer, one meets the condition of the Alzheimer, one meet the condition of a wound,

(2:10). one meets the condition of a hunger. Would your friends spend their money on something that nobody eats? Because those who are invited have already been on the headphones. It's not going to be much now when this thing is released in a bigger scale, that the way you call for a "takeaway," you dial the number and you have a pizza of your taste in the energy field and you have the pizza and you pay a penny for it. Oh, I feel like a "fish and chips," as you come from England. You put the headphones on, and there's an organization who has the feeling of exactly the taste you like and you receive it. You become that "Cup and the Orange." And how many of you will eat again when you're not hungry?

Q: Mr. Keshe, just to let you know that so this group of people, they are very, very aware. And they're a group of very active souls who would deal in a way, on a soul level, and I'm trying to say this very gently. They're like people that who are very aware of all the conditions around us, and

very sympathetic to try and to help many many people. and themselves by living a certain way.

K- But they still have to eat. They still have to eat.

Q: They have community gardens and things that they feed from, so they are very ...

K- But they still have to eat. What would we do if you put tomatoes in the supermarket,

(2:12). that all the people who go to the market have eaten and take the taste they like from the tomato, exactly the taste they like from your headphones. Tomatoes won't sell on the supermarket. Now if you understood... I was reading things. Azar bombards me with messages everyday. And now she's in Iran, how she eats, or what she eats, what she takes, whatever. And what about if , you , it is unknown, why do we eat different fruits? Because fruit is like a lottery, until we don't put it on our mouth we don't know it's a sour, it's sweet, it's exactly the way we like it. The way you get energy of a strawberry with the plasma. It's exactly that you enjoy, the taste you like. Or you expect it to taste. There is no "cuts" (leftovers falling to bottom). Unless somewhere in your subconscious in structure of the Soul you want to taste bitterness or something there, because they remind you of the good. And if you receive exactly what you want as an energy with the taste of it, with the pleasure of it. Then supermarkets become obsolete. When the East Bloc opened, I traveled to many what we call, ex-communist countries. When we went to supermarkets, it was amazing.

(2:14). The shelves, and shelves and shelves up and down. Top shelf and bottom shelf, but more or less the whole supermarket maybe 20 different, 2 kilos, five kilos, ten kilos of the same product, because they didn't have the range of products. Limited. And when you go to a supermarket, you look at the depth of the goods on the shelf. A supermarket, which is busy goods are stack, they just push it forward from the back. They put it in the back with the last one further to go in. And when you don't buy then all become historical. Maybe if we carry on with the process of the food, what's going to happen? Then it will become a history going into a supermarket for the items that it is not, cannot be the way you can make it, or you feel it, or you want to taste the new taste what this will taste I can produce in my own Soul. Then we see change of structure of supermarkets. It becomes like Africa. In Africa, when you go to a supermarket, some of the supermarkets have one item of each right at the front (of the shelf). In Europe, they don't know how much they can put more on the shelf to stack it higher and higher. And our supermarkets in the West will become like Africa, because nobody buys. Maybe you buy a new taste to see, and then your Soul reproduces that effect and emotion.

(2:16). This is what is to come. This is... It's inevitable it will happen. When we move people to the Moon, to the Mars, there are no supermarkets. Unfortunately, you can imagine what's going to happen to a tin made on Earth in the gravitational magnetic field of the Moon, or the Mars, or

another position, it crumbles. Then in another position Universe, the metal used is the field of the environment, it just becomes gas. Oh, your tomatoes is on the floor.

Q: .. Some people, especially some of the people I'm speaking with recently, they would not want to go to the Moon or Mars. So .. if this technology through the elevation and receiving the foods, or any of the tools that we use, would they as a Soul, would they change? Would they become to an understanding that maybe they have a very fixed position? .. STP

K- We always change. You know something, we have a very good say in Farsi. It's amazing what they means if you understand it. They say, the cat can't reach the meat, it says, it smells, stinks. You understand? .. So we can't afford paying quarter of a million, ten million, five million to other organization to take us to the Moon. So we don't think about it, though. It's not ours. But when it's freely done, and when it's available for you to go, you tell me how many people will say (no).

(2:18). but we had this situation in the trials. We had even one a few weeks ago. The lady said, I don't want to go anywhere. I just want to see my husband.

Q: It touches people Mr. Keshe when I speak about this, obviously as I would do. I noticed when I say certain things, you can see that it touches them on a physical level, but it touches them on a Soul level, you can see it go much deeper. And I can see the different reactions as I say certain things to them. It's like a field strength. Where I

can see the Soul is aware and the Soul of Physicality (STP) is saying, no, no, no I can't, I don't agree. However, I can sense they, .. it's like all these teachings and all the information's. It's a gradual process, you say very slow process, and so on. The knowledge is so profound and so touching, that it's very hard for some to accept, even though they know on a much higher level that it is possible. And they know it's the truth. K- You know, above you on the panel is Rosanna who just spoke. She is an Iranian woman lives in Canada. And they say the understanding of the Soul and the STP is like Persian girls. They push you away from the over the table, "no, no," but they pull you with the leg underneath, "yes, yes." The STP pushes you, "no, I can't accept it. It's impossible." But the Soul underneath says, this is what needs to be done. This is what I want. You understand? Because it's not fashionable.

(2:20). Once it becomes fashionable, everybody knows we knew it, but we couldn't speak about it, we couldn't do it, we didn't do it, we cannot do it. You know, when I came to England in 1970s it was very fashionable, it was something if you had the Iranian guy as a friend or whatever. When I came as a teenager, the woman in Brighton took me to different houses (to her friends and said), I have friend from Persia, they come in the rest of it. It was something like a Persian carpet, value it that way. And with one revolution we became the worst thing. Now all we are coming back into fashion, to be Iranian, you will see very soon the

way it's coming up. So people go by fashion.

What's in the media, what they're told to be.

Q: Yeah, that's very interesting Mr. Keshe. I totally agree with you there. I understand what you're saying.

K- So, we do our groundwork, we do what we are to establish the knowledge complete, and when it's the time for it, it'll come out. The way it has to.

And to what extent you can change it, to what extent you can improve it, to what extent it will bring change? Not everybody wants to go to the Moon, otherwise become communist. Everybody is marching straightaway, in the machine we go. The beauty of it is, you cannot send anybody to exile with this technology. There are no prisoners. You cannot build a planet like Australia, like English to send all the prisoners to this island, Australia. The way they sent all the convicts there. This time it's the STM, has no conviction, **(2:22)**. has never been convicted of anything. He chooses his own position. No leader can send no one to nowhere as a prisoner or exile.

Q: .. So this opens up a huge thing with what's going on at the moment. And I know that with tomorrow's meeting with the world leaders and the situations, that we know are happening and are part of the structure. The world leaders are now coming to a position of understanding, and the ones that as you have you said many times, would not walk into these systems. However, I sense that they are very aware that once this process has started, which it already has, then it will touch them at some point and they will have to then

stand for themselves. And you know, you've said it many times that, it's the shame of the man if you've done some things that you know are wrong that that's the worst thing you can bear. And if you have to do that on a Soul level, then this is going to be something that's more of a judgment than anything you could ever have from anybody else. It's your own commitment to yourself on a Soul level, which I think will be very hard to bear for us, for some.

K- We wait and see. We are not all the same. God is not communist all the same. Same school, same clothes, same dress. The varieties is the beauty. And we are a small part of the collection of the flowers of the Creator in the Universe. We're just a speck of dust.

(2:24). There's so much beauty to see and learn from. We wonder why did we choose the physicality to be here so long and not enjoy the rest of it.

Q: It's because they enjoy the physicality so much Mr. Keshe.

K- Maybe, maybe the Souls has bigger pleasures? No one knows.

Q: So, what can we expect tomorrow? ...

K- You can ask as much as you like. I keep my lips sealed. .. But, you know, we set things up months and months before, or we put it in different ways, when it's ready for harvest. And tomorrow is one of those days.

Q: You say to harvest Mr. Keshe?

K- Yes, tomorrow is a very big harvest.

Q: On a Soul level Mr. Keshe, the Souls obviously brought us all into these positions and all Souls have a unique beauty, a beauty of the Creation. So we're all being positioned and coming together to bring about this change.

K- Yeah. I lived long enough as a nomad. Let's see what I find in the trial. Let's see what comes up.

Q: .. It's always an honor and happiness to talk to you all, to be with you all. And Mr. Keshe I was reading one of your teachings very directly, and when you mentioned that the world peace, would it be achieved when we don't have any child abused, children abused, children smuggling, and drugs cartels controlling the drugs and the trafficking of it. Because even though that we don't have the so called, wars with the bullets or guns, we still have this kind of abuse that's unbearable. And we know they are created and they're maintained through the many of our religions leaders or others. It's there any possibility in the future that we can include this... I don't know if it's this is elevation, but it's a fact, the children are suffering many children are suffering, so many problems in the future that we look at the new generations they are so beautiful.

(2:28). I brought this to our group already in the daily intentions, this topic, maybe we could include it in our daily intentions. And that's what I would like to ask you, if is there any possibility that we can include this topic? Because I think, and the way that I see, it's so important...

K- What topic are you talking about? Are you talking about the child abuse or drug trafficking?

Q: Yes

Q: Child abuse and drug trafficking.

K- You see, child abuse is ... it's the way I, I have spoken about this before. They come in to it, as to them as it's their right. And everybody else...

When you speak to a child abuser it's, and they see it as their right, and everybody else is wrong. And there's something wrong with you. And they cover it up in a very big way, that you don't see it. Even you're in it, you don't see how they set it up around you. It's the way of life to them. They're brought in it, they're grown in it, they are part of it.

(2:30). And they carried on with the children, and they see it as their right. And when it comes to child trafficking or human trafficking it's the same. If a person who's getting trafficked knows about the technology, knows about the knowledge of the Soul transmutation, would they be able to transfer his body or traffic his body? You understand? This is part of the education will come in. Even with the drug trafficking, or with the drugs, to abuse of the drugs in every shape or form. Years ago, if you go to news, you find it back 20 - 25 years ago. I used to be part of the British customs and part of my companies were involved in these massive jobs. And they found a large number of bodies in one container, in one of the ports in England. As my companies were set up to receive all sorts of things through customs, I was called by the customs, he says, that one of the things coming to you is this vehicle, what do you want to do with it? We want

nothing to do with it, because it was used for evidence in the courts, and the rest of it. I said, just crush it. Just crush the whole thing into a crusher. That the pain in that box, the pain in that what you call, system which brought these bodies to their end. I feel, the feel of their Souls. I don't want to be part of it. I wanted to. I don't want it to go through the books of my company.

(2:32). At the end with the British customs and government we decided, this container is going to be crushed. But how much money did they make out of this? And what's the suffering of so many in the box, worth it ? What do we get with this money? Would we come to the point that we can understand, you have access to a mobile phone, a child can move his Soul and the physicality cannot be done, cannot be abused. And I brought my life to a big change because of this. But it took me time to set it out, because it was woven into my life in a way I could never imagine. Because when you're in love you don't see what the lover does to you. And you accept everything, because that love is so important. Till your eyes open up and you see why all these things happening around me. And as you know I made it very, very clear, especially recently when you talk about the child abuse, when you talk about the child trafficking. The woman next to me for years, you thought she is, and now I see around, is coming from the most notorious pedophile organization families in Belgium. Notorious. She was brought up in it, as she brought other children into it. She trained her

son to abuse her siblings. And it was all okay. Her brother rapes young boys frequently.

(2:34). And when the police find it, the hand of an arm. All was hidden from me. And how we got involved all these pedophiles around us. Red Circle, Sterling and the rest. All brought in by her. To them it's normal. Go to the village she comes from. They opened a pub called, "Charlie's Pub," and they trafficked children when the police raided in 1970s. She was put in custodial sentencing for bringing children and other children under this. When she comes into organizations she sells our server names, and (IP) numbers and people who come in. Two characters. I couldn't live with myself, it took me two years to get rid of this rot in the structure of the Keshe Foundation. And then they linked up with another well known pedophile. You know as Jackie. He had to flee from Switzerland to Denmark for the police not to get, the same as her brother did. Escaping from Belgium to Thailand from the police. They bring their own people inside. When you're put into custodial sentencing in juvenile at the age of 13, you've got to be "well up in it." You've got to be well up in it. Just go to the village of ?? Erheim, find out about this family in Belgium. The whole family has been into prison for child trafficking, for child abuse.

(2:36). People from South America being found in the premises abusing children and sentenced and deported. I had to face this, and for it, find a solution for it. Then they said, we were victim. Victim, yes, but why your son. You told your son

to abuse her two siblings, that the father bans the child from coming ever to the house. When it's presented to us in a different way we don't look at it, but when we sit out and we look at it, then we understand the truth. The woman next to me comes from the most notorious pedophile organization in the hands of the Belgian government together. Because she her thing, they used her to infiltrate and they brought people in with her. And she claims I'm innocent. Going to prison, sentenced into prison for being part of the biggest criminal organization thieving in Belgium. Sentenced with the ex-husband together. A lot was covered up in different ways we couldn't see. Ask where is Jackie. He is in Denmark, because police office of Switzerland are after him. Because linked up with my ex, and they were watching what's happening. That's why Keshe Foundation became so... We saw one pedophile after another. Because the "head of the snake" was sitting next to me. At age of 13 sentenced into juvenile prisons, **(2:38)**. for being part of the most notorious pedophile family in Flanders. Just go, find newspapers, courts, police station. We don't tell lies. But they see it as their right, and we don't understand it. I always looked at how we can escape these people, how we can release people from this pain. Now with this new technology we can. You teach children that they can from childhood. That's why we said, we are bringing a child teaching, how to elevate your Soul that nobody can traffic your physicality. It'll come an end to it. A lot of you thought I just moved on. It

took me two years from the Italian conference, second conference when I found out what's happening around me. I set up without damaging the Foundation to get rid of this snake. I can talk about it because the court case is finished. The whole structure is set up to deceive, and we are not. And it's no use finding how to, not to traffic. It's to start educating the children how to use their Souls, for the physicality not to be trafficked. How come we can send Man to the Moon? How can so many of you went to the Moon, how come you bring people home and stay here, they can see where the... Why can't we do that with our children to teach them from childhood. With this technology I bring an end into child trafficking, human trafficking. Just give them a pair of mobile phone.

(2:40). When I realized after the Italian conference, when the "head of the snake" disappeared into another part of Europe for days. And then we found out. Yes, it was connection. But the Interpol informed me that, the two snakes have met. They brought me to education of the Keshe Foundation. They brought them as people who, what was it, "free energy." Sterling used us to get marks, and I was wondering how come these people always come to us. Now it's clear. The woman from childhood being in one of the most notorious family of pedophiles, bringing customers from South America and everywhere to "Charlie's Pub." Go and check, go and talk to the people, you'll find out. When one raided, the father, the mother, the brothers, everyone went to

this part of the structure went to prison. And the girl who was bringing children was sent to custodial juvenile court, what you call, center. The woman next to me for years, you thought she's such a thing it is. And then they thought that they can take over the Keshe Foundation and then they would have all your IP's. We never allowed IP's, anything to leak out. Thanks to God, we saved you all. But that's all they are after. You come in make a chat. Any woman associated with me, if you look, has a daughter. They were after that child. You associate yourself with that woman you clearly are where you are. Go to village of ?? Severhiem, ask for Charlie's Pub, which was there. And ask for the family how they all been sentenced. Uncles are still under "sexual control" (by police) 40 years on, 50 years on.

(2:42). With this technology we have a chance to bring an end to it. This is why I said in June we start teaching children, that nobody can touch your child. The child knows how he can use the energy fields. It's like a 999 (911) you send to save emergency. We set up a structure that children can move the Soul to another position that physically cannot be abused over the adults. Why should the man beat you to death, because he is who? You can move yourself through the Soul (just dial, ?? try to) Just connect to them and move. You cannot understand the implication of this technology yet. With the drug trafficking it's the same. I was talking to one of our most beautiful Knowledge Seekers, he is in the heart of drug trafficking area. He says, Mr. Keshe my family doesn't, we don't

do, we don't need to. And funny enough, another member of the Keshe Foundation is notoriously came to Keshe Foundation, because he used the Foundation for trafficking. We just found out recently. We sort these things out. But all this needs a new technology, a new understanding, not escaping and calling somebody will rescue you. How do I rescue myself. If we turn, if we teach our children from a young age, that there is a way that nobody can touch you, physically abuse you, **(2:44)**. you can move yourself through the technology which is there. I gave this, I gave a gift of "Cup number 1 and 2" to the Chinese government during the Corona. This transportation of the Soul, freeing man from position it is to brings peace. It's another gift which are given to the Chinese government for the worldwide use. And for 30 years, I came. I was locked in the brainwash that this is their life, nothing to do with me. I hear things, but it wasn't there. It was what you call it, "caked up, creamed up," that it didn't look. When we started looking into it, it's horrendous. The lady next to me. You go and check, we gave you names. You have, we are in touch with. Your mobile phone, your thing is sold till the time it comes when it's time to hit you, they hit you. She's notorious pedophile, covered under the name of Keshe Foundation and stood next to me for years. I didn't know this, if I knew... When Interpol gave me data in Switzerland my head went through dizziness. Boy age of eight, was taught by the woman how sexually abuse his two siblings from another woman, two girls. You don't

do that to your enemies. And you know I'm right. Many of you read. She said, she wrote that, **(2:46)**. Mr. Keshe put my son on a pillow for a week. Yes, I did. Because I was told the boy did something wrong, and he accepted. And it wasn't, he didn't do it. I said to the boy, sit there till you find out you don't accept what you haven't done. And I found out later on from the mother that he did. This is how they change the truth and the fact. Boy age of eight, trying to rape girls of five and four. Taught by the mother. And this is a woman who was next to me. I did not know. Keep away from this woman for miles. Go to the police station of Severhiem, in West Flanders, and ask for the file, they say, the file is here. And the children are in the list. And anybody who ever talked to go after she accused of being a gay, pedophile, having sexual relationship with it and that. And people all walked away out of fear. And she did what she liked. She accused everybody of being gay, or pedophile, or having connection with other men and whatever. Because this way she could silence them. What I tell you is in documents of the court in Austria, you can ask for it. When you talk about pedophile, child abuse, child trafficking, this is what I said. From June on we teach parents with the mothers and the fathers with their children, how to be able to move, that nobody can abuse you. Bullying, sexual abuse, physical abuse.

(2:48). It's not, I'm here one second, I'm not there next. I'm not there at all for you to abuse. Why should a woman get beaten to death? You call woman refuge centers. No, you move through your

Soul, your physicality. This technology is complete towards that point. She never made any friendship with any family, anybody I was connected to, that did not have a daughter in it. She wrote about Ella, Emilie, or Eliya Kostova. Look at them, they all have daughters, young daughters she could abuse. They are ruthless. To them, the body is abuse, ?? move, money making. And as they're the head, they never get their hands dirty, they have the others do it for them. Now we have the knowledge, we have a technology to move.

To move the Soul of the children, and with it their physicality, that they cannot be abused. When you talk about child trafficking and child abuse. This technology, this knowledge is for humanity and it's free. Completed, we learn from it, from the food. Now we learn the freedom in the coming time.

(2:50). I spoke about Thailand (Korea) last week, everyday a woman or a man dies in what we call, common household by abuse. Why should be? The beauty of it is, when you don't let abuse, a husband cannot kill a wife, then the children have the mother and father, at least they are alike, they can live with each other. Somehow the parents are there. You don't put one person in prison for life for murdering a husband or a wife and the rest of it. When there is no child to abuse, where is the trafficking? When we all have food to eat, when we can complete this cycle, do we need people to come from China to go on the what you call, "Blackpool side" of this, South port side of the

England, that every few years we get so many of them drowned by the water, just picking up some muscles and cockles to be able to live, to live somewhere free. This technology will give us that solution, for us all to be free. And we teach our children. Teach our children how to move, how to be able to move the Soul, that the physicality does not get trapped in it. Then there is no abusers. But the most interesting is,

(2:52). these people with devious mind, what they find next? Who's next? I hear the same lady now is starting other people Chat show, ladies watch where your children and grandchildren will Chat into in the background. The bosses never dirty their hands. You've got to understand, the new technology, the new cycle of energy and knowledge has to be good for every being on this planet. The dog, the child, a man, a woman, a tree. If we give you food and you do not go hungry, how many trees (plants) as a vegetarians, you have saved not to slaughter? Then you understand how much the change has to be fundamental. How much the change has to be real. And how much we are responsible to bring that change in.

(2:54). Now the technology is there, the communication line is there. It's hundred, thousands of you listening to this now, live. Every corner of this planet, every religion is here, Muslim, Christian, Jews, Buddhists, you're all here. As knowledge has no limitation. Because you gain the knowledge, you teach the knowledge. And this knowledge, the way we teach it gradually step by step you see this statistic to prove you've been

there, you're part of it. You pay 300 Euro to be there. Tomorrow is your right to be there to change the world leaders. Not just somebody will go and do it for me. Then what about you? What about your school of thought? Then we see the change. Then we see the next step to development. And whenever we solve a problem, we have to put a solution for it. We are giving a solution for food, for space to the Chinese, at least 50 years ahead of Americans, at least. But putting that, creating condition has to have a benefit for it. The Chinese to be on the Moon, to be on the Moon, at the moment is the best thing for (them), it shows advancement in technology. When another piece of a nail shipped from Earth, to the Moon to produce. I have not even taught you. Go into the patents,

(2:56). and read. We haven't even showed you how to create structures, buildings without the bricks or water, with fields. You think you're going to make a building of bricks and clay on the Moon or on Mars? Or do you need to take all produce Copper and Zinc and whatever? I still got to teach you how to make walls, partitions, floors, buildings without a single brick. Remember, every brick is made of an atom and every atom is a plasma. And now you know how to make the plasma. How you cut the field, how you create. This is part of the teaching I told you about the radiation. How do you cut two rays that you have a children room, you have a mommy's room, you have an entertainment room. Not a single brick. It's in the patent. And I'm teaching you a step by step what is

in the patent, what is next. Chinese will not carry a single brick, they built. If you go to Almaty in Kazakhstan, it used to be the capital. In the Central Park of Almaty there is a Japanese structure, and they're very proud of it. And in this structure, there is not a single nail. It's a beautiful structure.

Japanese are experts in it. It's an origami of wood. Chinese will build cities not a single screw, not a single hospital, not a single prison.

(2:58). No policeman on the street. I said, you show a step, we show more. Xi decided to use technology for peace, and it's in the memorandum of their meeting last week of CPC. We respond according. They break the rule, we break our point. They keep to what they are pursuing, we will carry on. Gun policy only shoots the presidents in their own head. The same with the child trafficking, the same with human trafficking, the same with the prostitute trafficking. How many girls are trafficked around the world. When you teach them, then you understand, and then you can put a stop to it. And the teaching has to come through a knowledge, technology solid that is accessible to every man, child, a dog, a cat. When you speak about the child abuse, I had enough suffering for past four or five years. It took me two years to uproot this snake. Look at when I separated, and look at the time of the Italian conference.

(3:00). When we found out exactly where everything is. I was in Aman with one of the most beautiful Knowledge Seekers. They thought, because I'm not here, they can do what they like.

He saw me what I went through. When I came back I found out. Bunch of ?? as the Swiss Interpol have told me, the two biggest pedophiles organizations have met Mr. Keshe, and you didn't know? I said, no. A football coach, boys football coach. You heard about the priests in Austria in 2004 – 05, the football coach is in Switzerland, I have'nt known, for the same job. There were children of Alan Sterling, they were part of the same organization. And I had to find a solution with it. And the solution is, this is what I said before you bring this subject, the next few moments we'll bring to teach the children. Why do we need to teach them? So they cannot be abuse, the snake cannot reach them. They can lie as much as you like to the courts, you can pay the judges for the money they're going to receive, but it doesn't change the fact. I set my life totally different from Italian conference onwards. When I found out more, when I sat with the Interpol in Switzerland, and the facts they put on the table I just bashed my head, what have I done. Why was I blind to this?

(3:02). And showing an immediate reaction was not the solution. We kicked Jackie out, we kicked the rest out, I cleaned everything very silently. Now I can tell you why. Bringing the most notorious pedophiles as the education people. Promoting one of your own inside. Now we understand. The new technology will bring an end to this, and we have to start teaching our children how to move their physicality from position of abuse. Abuse, as I said, bullying in the schools,

bullying in the life, bullying in the home environment by husbands and wives, bullying at the point of work, where because you need the money to live to stop the hunger, you have to take the abuse. Now you don't you dial a number, you're fed on the phone, everything you need is given to you, you don't need to go into MS, and Fibromyalgia and the rest of it. Knowledge Seekers have not realized the implication and application of this technology to come. Because you look at, I want to go to the Moon, but I don't want, nobody wants to go to the Moon. But you learn how to move your Soul and your physicality that it cannot be touched. You don't need to die with a hammer hit on your head, or a knife going through your body by the husband or a wife in what you call, domestic abuse.

(3:04). You don't need to stand the swearing, and the shouting and abuse. Where through your Soul you can raise the Soul of your partner, that it never gets to that point. They say in love makes you blind, and made me blind. And when I opened my eyes, I found out how blind I was to the rest of it. As the knowledge I have has to bring that to an end. The child abuse, child trafficking, woman trafficking, everything else has to come to an end. Because you teach it. They laugh at you. Oh, some of the fairy tale. But when they get abused, where's this guy called Dean? He was talking about this, where can I find somebody who can stop me from getting abused? You come to us for the cancer or diseases. But the back end of it is, when you understand it, and you elevate yourself,

when you understand the field of the Soul, and you go and eat on the table of the Creator everyday when you're hungry, and as you need it, because you just connect to it, the body does his job, you'll never be put in a position of abuse. You never get diseases, you don't have a fear of life. And this is what I've done. And when we went to make it, expand it, that it becomes faster, we got robbed by another bunch of thieves. Many of you helped us. And I came sincerely to you asking for help, **(3:06)**. because we wanted this to be done. And we were set up by another Knowledge Seeker the same as the snake. But the time will pass. Nobody will lose anything. But the structure has moved to a position we can deliver now. We can bring to an end a lot of things by knowledge, not just by word. By teaching, by example of them testing themselves. And how we can mix it, how we can bring that mixture to bring the totality. And see how the knowledge can be, that it becomes accessible to all. I suffered, I lost a boy. But I know what it means to loose a boy. But I know with this many children are safe. Many of you who came here

as Knowledge Seekers, how these people in the background were finding where you are, who you are, if you have children, whatever they could do with you. And they asked us, we want to teach. I didn't understand why. I said, okay, she's there, why not. But it was all planned. We are innocent, we don't think the way they do. But now my eyes are fully open. I know. I live a beautiful life. But I

know that with this life I don't have to worry about anything.

(3:08). And I always have a habit, I ask. If I'm given, is where I live. I never go and take. I asked for all of you to support me when I was planning to expand, it wasn't the time for it. Maybe next month, maybe next year, maybe traveling, expanding the knowledge through China will bring that change. But when you speak about abuse, I know I can put my head down on the pillow at night, knowing I have the solution for it. Knowing the solution you already tested as the hunger, you went to the Moon, many of you did a lot of things. So it's not a gimmick. It's a reality we all live it, and we can find a solution to it that it reaches everyone. And it's the whole thing is a step by step. The children becoming aware of their potential, and they cannot be in a position to be abused, to be bullied, that they become suicidal, and they do all sort of ?? them, or attach to the drugs. And this is what we have to learn. And we are always blindsided when we are emotionally involved. And there is no emotion in this, it has to be reality, teaching, direct teaching. Our children it has to become part of the life curriculum before our children go to school to be bullied for the first time. It's the responsibility of the parents to teach the children the strength of their Soul.

(3:10). Move yourself, nobody can catch your Soul, nobody can touch it, because you don't want to be in that position. Pedophiles comes under different names, color and ways that we none of us

know. Till it comes to public, till we get to know.
Any other question?

Q: .. Hello Mr. Keshe, thank you very much for your tireless work. My question is, there are countless helpless Souls on this planet who suffer from the abuses of humanity, Vertical Beings, minerals, animals and many others. In past teachings, I remember you saying that they are also participating in the process of transition and elevation of the planet. If possible, could you tell us a little more about this?

K- The thing is, with this planet,
(3:12). due to his structure, everything living on it except the stones, or what we call, rocks, more or less has a need to gain energy to move. And this is very important for a lot of people to understand. And this need to exist by taking from the others has become a pattern of the life of this planet. When we.. It's so fundamental, if we could see the whole picture. I'm not a dreamer, I deliver technology which brings the dreams to reality. When you see the communication of last week. 80 people. I have a near final what you call, near final data at the end of it. It's somewhere, if I can get hold of it to show you.

<< Audio cut and fading out >> This is the final of
Question #2 & 3 79

(3:14). R: I can take a screen share of the picture and put that on. So you don't have to share it. Can you hear me?

(3:16). K- Yes, our power supply was ?? cutting down, was getting weak. It's on the low battery notice. That was the reason. Is it better now?

R: Yes, yes.

K- Yeah, it was one of our systems going, because I'm not in my usual place. We were running short of energy battery. So, it's okay now. But this is, when you look at this statistic. Which is your statistic not ours, unless 79 of you in the survey of Sunday told us a bunch of lies. Then you understand, the more satisfaction the less you eat. The less you kill, comes to the point that you don't need to kill, you learn how to use energies. It brings a change of life for the planet, for the plants, for the animals. And the life pattern it finds its own balance.

(3:18). The animals will find a balance with themselves. If you can deliver the same kind of field energy into the forest, into satellites. Our satellites now, spies satellites used to spy and taking every note of everything, who's got soldiers, where is the border. What about if on the satellites we put the plasma fields that the shrubs, the dog, the cat, the lion, all receive what they want, they just pass each other. In the holy books you have a promise, where the lamb and the lion live in the same nest. This comes through when you can feed the lamb and the lion. That the lion does not see the lamb as a food, but as a companion. And the lamb doesn't have the fear of lion, that I become the food of. And the only way you can do is two ways, feed the lion all the time that doesn't need to kill and be ?? in every jungle,

every bush, to feed every animal the same. Or feed enough that the snake pass you, but it doesn't touch you, because I don't need to bite you, because you're not food. And the only way comes is when we deliver enough energy, what is short by this planet, which two ways. You can continuously feed a Man, or teach the Man to use his Soul to feed himself. The same goes with, when you do that with the STM. You've done the same with a cat, the same with a fish. How many of you when you participated paid for your dog to have a headphone on?

(3:20). How come you as a human being are (more) important? How many times whatever you use as the plasma for yourself, you use it for the plants, you use it for the fish in the tank, or the dog feed everyday? Now we have the technology, we're expanding the technology, we're expanding the knowledge. So why don't we use these satellites to feed everyone, create a , whatever is short from underneath, which makes us to kill, we feed from the top to makes humane. We use satellite to spy and kill. We use the satellite to feed and to grow. This is the problem. I had this discussion two weeks ago with a very good friend of mine. He's a highly respected ambassador. I said, you know something, speak to the president. He was going out to diner with him. Tell him Mehran says, give us access to help. That we can operate in the freedom. He says, Mehran, there is no money in it, nobody talks. Let's see how many of you will take up the option of the 3,000 Euro for anything you have.

(3:22). Because you don't know what data we're going to gather. And you always look what's in it for me. Ok, I get enough **??**. What about the data, the information that's collected that helps millions of others? You want me to sell the Foundation to the organization's for billions of dollars, that you have no control you don't get educated anymore? Or we still battle things with our own doctors and our own teams and step by step? So let the technology to feed the plants, and the trees, and the dog, and the cat, the lion, and monkeys in the jungles as much as the man. We will see if the promise of the "honey and the milk" will not be there. Any other question?

Q: .. My question is, when and how will the criminals pay for the crimes they committed against the population?

K- Oh, let them. They decide. They pay everyday. Their life is not as "hunky dory" as you think, their lives is not. The fear of their own crimes don't let them sleep every night. They might look happy on the top, but underneath they shake everyday.

R: Yes, I agree. I think they're shaking in their boots now.

(3:24). We have a hand up here from Imgard who has some questions I think about the units that... Home Energy Enhancement Units.

K- They're going through certification. We have to wait that our team now. We had to get this certified independently and they are working on it. The units are all in Europe. The units are all here. They are testing, and we have to get the certification independently. And to see once we get the

certification we can release the goods. All the units sold are in Europe, are in our hand, are in our warehouse. And they're testing it. Even last week, they were testing it for the power, for the energy, and everything else. We cannot do anything.

Whatever is sold is fully in stock in Europe, we have to receive certification independently tested. We did the same thing with the other things. When it comes to these things like this so serious, we have to have an independent certification. And it's going through that process.

Q: Then I have one more question. And that is with the not eating. I got vertigo so bad that I went back to eating. I was wondering if there's another way that I can deal with that, because I'm afraid of falling.

K- .. You spoke about this on Sunday, I think, or before. Find out why you get the vertigo.

(3:26). We have to find out why. Because vertigo comes from the pressure from the inner ear, or middle ear inside the head. Why do we get this? Has there been a change in, or you did not produce enough liquid as a saliva, that you .. run dry? We have to find out why. I would like to speak to you separately about this, because we have to see what parameter has led to this. It's a knowledge we have to gain, we can't just sweep it under the carpet, oh, it's just something. We have to find out why it gave you this condition. And it only comes from us exploring and understanding why and how.

Q: And when and how shall we explore?

K- I have to make time to talk to you, finding the time. I went for a meeting yesterday for half an

hour and I had to stay there with the same clothing, because it wasn't expected for me to stay. It was just day, and return, and he just dragged on and all sorts of things. So, at the moment, all our effort is going with. Especially now we have this "100 group." Sign in for the 100 group and see how we can get you the headphone in. .. The 100 trial case we put up, sign up with that, and then with doctors we have a look why, if we can change. If it's a "one off," or is there a reason. Because then I can set the systems up to handle it. We have to find out. With this technology you cannot say, oh, it's something, we don't. There's a case going on with one person for weeks,

(3:28). doctors can't find the solution. And we are exploring which part of the knowledge has not been understood. Or ay sorry, you can go, you don't need. And we have to understand. Because we come from the origin of the Creation through plasma, every condition has a plasmatic or something to do with the plasma of the Creation. We have to find out what we haven't understood, what we haven't managed to match it. That's all.

Q: Yeah, I signed up for a consultation with a doctor, and I was contacted back a while ago...

K- Do it again today. And put in there, and then I'll get it done. Because we want to get this 100 done this week. So we have to find out, we have to learn. And the whole understanding is, we have to fill in the gaps where it's not understood, what we need to change. We have a guy I think the lady is here. .. We had a lady for 30 years having a

damages eye because of a caustic dropping in her eye, and burning. And first two sessions she said, I don't feel anything. And the third session with the doctors she said, for the first time in 30 years I don't have any more burn, it stopped. So it's when you start the process with the doctors your body has to build up to the point of the change. It doesn't mean, it's not a plug and play. And this is one of the parameters we have to find out. And this is part of addition which a knowledge, which goes to the doctors, that they can use for their what we call, for their volunteers and what happens to it.

(3:30). Q: Do I need to have the Tabletop Unit and the Headset, to go with it?

K- No, just the present (headphones) will do. The doctors will tell you what to, the procedure is there. I stood by the support for the medical team, up to this week. I was there, I'm there all the time, people who've been around they know. And from this week is all getting handed over by the doctors. We stay behind as consulting, but doctors will handle everything. We advise what we know, what it is, what they can add to our knowledge. And all your contacts from now on, will be, if you come in is to learn, or to listen that we can teach.

Otherwise, from now on, you're totally in the hands of the medical teams.

Q: It's just that it's not just vertigo. It's memory, and vertigo, and everything that relates to the ears and the eyes and the sinuses and that whole area.

K- Send it in, let's see what the doctors will say. Thank you. I think we will call it a day, nearly three and a half hours. We had a very long day,

yesterday and today. Thank you very much. But please don't think I have a pain in the neck, or I have a joint problem, whatever, for 10 years, whatever. Let us, give us a chance to make up the database. And then we'll see what we can or where we can go. And we don't get these kind of offers every day. And how we can do it. Thank you very much.

R: Okay, thank you, Mr. Keshe, for another Knowledge Seekers Workshop here. Anybody has any leftover questions,

(3:32). they can bring them into the next workshop, please. And which will be next week, I assume at the same usual time Mr. Keshe at 9am, for next week, as far as we know?

K- Yes, I hope so. Today we went through an unexpected situation away. And we could not be, because we had to be in a meeting. And the meeting takes two or three hours. So we had to. It was better to have a half an hour session than actually delaying it and having a full session. Thank you.

<< Rick make announcements of the next Public Teachings >>

K- Can I just coming for one second?

(3:34). We still leave the room open till midnight tonight, for those who want to register for the meeting tomorrow. I just been told by the webmasters. The room will be open. If anyone wants to register for tomorrow's session with the

world leaders, it still stays open until midnight tonight.

R: And you're talking about the Telegram room, correct? The Telegram group? As well for the people that are signed up for the workshop?

K- No, I'm talking about the meeting with the world leaders tomorrow.

R: Yeah. What's going to be open? The Zoom?

K- The booking. If anybody wants to book in to be in the meeting tomorrow, they can still do so.

Because we have people booking late, so the registration still is there. It will be open till midnight, and you'll be allowed to come into the meeting tomorrow. Thank you very much.

R: Okay, and there is a Telegram group that is the contact group for people that are in the workshop apparently or can be used, which is the @customerservicekfm telegram group, apparently.

K- I don't know about that, maybe there But you go just to the website of the Keshe Foundation. And in there you'll find the booking for the meeting tomorrow. The website. Because some people just say how do we book? If you can just put it on the website, if you've got access, go to the shop. In the store of the Keshe Foundation, there is a link for the booking for tomorrow.
